

Ye Chen 3191

Chapter 3191

As the first group of 500 men, one after another, landed near the summit prism of the south wing, another group of 500 men, also leaping from the aircraft, began to drift down towards the summit prism of the north wing.

As parachute jumpers are affected by wind, direction and personal control, it is difficult for them to jump to the same area at the same time. So they had to land individually near the target and then move together in all directions towards the target area.

Generally speaking, parachutists have to prevent their parachutes from entangling with each other in the air, so they themselves maintain a safe distance from other comrades, so it is normal to be off by hundreds or thousands of metres when landing.

Especially at night, it is not strange to be off by even a few thousand metres.

Therefore, the first thing the first 500 people did after landing was to quickly assemble towards the target area.

However. To their surprise, they did not spot any defending soldiers as they parachuted down and assembled in motion. Nor did they spot any enemy concealed fortifications.

Looking at the whole mountain peak through their night vision devices, they did not find any traces of the enemy, except for their own men with special markings on their bodies.

Some soldiers carrying thermal imagers also immediately started to check around, but still nothing was found.

The reason why they could not see any enemy was because Hamid's soldiers were at the moment hidden inside the bunker fortifications on the sloping sides of the mountain, and the thermal imaging equipment used to observe the summit was also fed into the fortifications through signal lines, so the whole summit prism was in an undefended state at the moment.

When the commander reported this situation in real time to Chen Zhonglei, who was circling in a large circle at high altitude, Chen Zhonglei was not too surprised.

If it were himself, he would not have wasted his energy defending the top of the mountain when the front and back slopes were so solid, after all, under normal circumstances, one had to pass through the front slope to break through to the top.

So he immediately reminded his frontline commanders that they must take advantage of the enemy's negligence in defending the summit. The assembly would be completed as soon as possible, and then the first echelon would hit the assault first, while the second echelon would take the opportunity to encircle from the north side. The enemy will be directly blocked in the pit and eliminated.

Chen Zhonglei had followed Wan Breaking Army all the way to the present, and he had fought many similar assault battles.

He understood one thing very well. When fighting a hidden fortification, if your side is far away from the fortification, the other side has the advantage, but if your side is very close to the fortification. But if your side is very close to the fortifications, then your side has the advantage.

During the war in the southwest, once the enemy was blocked in the cat-ear hole, there was almost no way out but to die. A few grenades from our soldiers could turn their cat-ear holes into their graves.

Therefore, Chen Zhonglei had his mind made up at this moment. Tonight, Hamid's men would be completely annihilated!

The first echelon of 500 paratroopers quickly assembled, thinking that they had been very successful in their infiltration. Little did they know that they were now completely exposed to Hamid's surveillance.

And, to Hamid's excitement, there were six bursting points that could be covered near the area where they were assembling.

And those were buried with powerful explosives that could break rocks!

Twenty minutes later, the first echelon of soldiers had assembled. At the same time, the second echelon of soldiers had also finished parachuting and started to assemble.

Chapter 3192

When the second echelon of soldiers had also almost finished assembling. The commander of the first echelon ordered an attack!

They intended to attack the pit on the front slope directly, dismantling the enemy's defences while drawing out the enemy on the reverse slope. At the same time, the enemy hidden in several other directions would also be drawn in.

At that time, the second echelon will touch up from behind and directly dumping the opponent.

At the same time, as soon as the defensive forces on the front slope collapsed, those thousands of soldiers of the government army would immediately rush up, and at that time, Hamid's armed would have nowhere to run.

Over the intercom system of the Hall of Ten Thousand Dragons, the commander of the first echelon spoke up, "Our troops are ready for battle, please ask the second echelon to confirm the assembly situation."

The voice of the second echelon commander came over the intercom system, "Our troops have almost finished assembling. Pre-battle equipment confirmation is underway."

The commander of the first echelon immediately spoke up, "Our unit requests to launch an attack, please ask Commander Chen for approval!"

Chen Zhonglei said with great enthusiasm, "Approved! Launch the attack immediately! In ten minutes, finish off all the soldiers on their oblique sides! Avenge our dead brothers and sisters!"

"Yes!" The commander of the first echelon immediately said in a dignified voice, "Please don't worry, Commander Chen, we will never live up to the name of the Ten Thousand Dragon Hall! We will definitely avenge our fallen brothers!"

"Good!" Chen Zhonglei laughed and said offhandedly, "Attack immediately!"

The commander of the first echelon immediately ordered the soldiers around him, "All of you! Start the attack!"

As soon as the words left his mouth, Hamid inside the pit also gritted his teeth and shouted, "Explosion points 03, 05, 06, 08, 09, 11 in Area B. Detonate!"

The two engineers in charge of Area B immediately used their fastest speed to detonate the designated burst points at the detonator.

Just as the 500 soldiers of the first echelon of the Ten Thousand Dragon Hall were about to rush towards the main sloping fortification, loud explosions suddenly rang out around them one after another!

Three of these blast points were right under the feet of these five hundred men, while the other three were distributed around the edges of the five hundred men, and the moment they detonated, at least a hundred men were lifted high up by the blast wave.

The powerful blast wave caused the five hundred people to be injured to varying degrees, and many were even killed by the blast.

What was even more tragic was that the blast wave set off a sky full of killing and wounding pieces that were just like the rainstorm pearly needles in martial arts novels. It covered these 500 people in all directions!

The explosion was already extremely powerful, and the metal fragments were propelled by the blast wave, each piece possessing a powerful potential energy.

Although these five hundred soldiers were wearing bulletproof vests and helmets, their limbs, faces and necks were all exposed to this intense shrapnel attack!

In just an instant, all five hundred Dragon Hall soldiers, without exception, were hit by a large number of metal shrapnel!

Some of them were unlucky. Some of the unlucky ones had their tracheas or arteries severed by the shrapnel, and before they could be rescued, they were already dead.

And those who were a little luckier. Although they were not fatally injured, they were hit in the face by the shrapnel and were blinded instantly.

And even more. On the other hand, there were extensive injuries to the limbs.

Especially their hands and arms were almost blown to a bloody mess, and even if they were well-trained before, they were now unable to even hold their guns.

When Chen Zhonglei heard the explosion over the wireless communication, as well as the sound of his own soldiers' ghostly cries of pain, his entire scalp instantly tingled, and he asked offhandedly, "What's going on?! What's happening?!"

The commander of the first echelon had already lost his eyesight and both eyes were pierced by at least seven or eight metal shards, covering his eyes at this point and crying out helplessly, "Commander Chen! We we've been ambushed!!!"

Chapter 3193

"Ambushed?"

Hearing this, Chen Zhonglei's heart thudded and he asked offhandedly, "What the hell is going on? What kind of ambush have you been caught in!"

The commander replied with a sobbing voice: "An explosion! A very powerful explosion! They must have planted a lot of explosives, and the blast has caused a lot of anti-personnel debris, I'm blind in both eyes, and I have wounds on my legs and hands, but I can't tell how badly I'm hurt now!"

"How could this happen!" Chen Zhonglei's heart throbbed incomparably as he heard the other man's description.

The two echelons that had jumped tonight were the strongest soldiers and commanders under his command.

Hearing the news that his men had been blown up blind and covered in wounds at this moment, Chen Zhonglei could not wait to jump down and rescue them himself.

In the background of the communicator, the voices of the soldiers were all wailing and crying, which made Chen Zhonglei's grief even greater.

At that moment, the commander of the first echelon on the other end of the phone cried out, "The enemy has long laid a trap, just waiting for us to step in, the explosion just now, we suffered heavy casualties ah commander!"

Chen Zhonglei's veins flared up and he roared through clenched teeth, "Hold on a little longer, I'll send the second echelon over to support you!"

The commander blurted out, "No! Don't let them come!!!"

The commander said urgently, "Commander, tell the second echelon to withdraw! They have already set up a net, our team is severely wounded and we are now surrounded by them, it is impossible for us to break out, and it is impossible for the second echelon to save us.

Chen Zhonglei had never dreamed that the commander of the first echelon would be so pessimistic.

He muttered in his heart, "Could it be, could it be that they really have no chance of surviving? Could this Hamid really be so powerful and able to see all his tactical plans in advance?"

Chen Zhonglei, who was baffled, did not know that just ten seconds after the first echelon of the southern flank had been ambushed, the eight explosive points on the northern flank of the hill also exploded at the same time!

The 500 men on the north wing were really unlucky.

The entire north wing peak was relatively steep, but there was only one relatively flat area, and whoever was given command would definitely choose this area to assemble.

It was as if there was only one tree in the blazing sun and people would have subconsciously gone under it to cool off.

That is why Hamid's men have set up eight bursting points in this area.

The men of the second echelon were assembling when, on hearing the explosions from the south, they thought it was their brothers on the southern flank who had fought the assault.

They were about to finish gathering and immediately rush over to outflank them, when to their surprise Hamid's men detonated all eight of the burst points around them!

The deafening explosions sent tremors throughout the valley.

Such a dense and flying blast of fragments, with such a wide and dense cross-coverage, would have been difficult for even a fly to avoid, let alone these flesh and blood bodies!

So, after these eight bursts, more than half of the second echelon was directly killed by the blast!

For the rest, almost all of them were seriously wounded and lost their combat power instantly.

Immediately afterwards, the commander of the second echelon shouted in horror, "Commander, we were ambushed too, the blast was so violent that we lost almost all of our men! The men who are still alive are all badly wounded and there is blood and limbs everywhere"

Chapter 3194

Hearing these words, Chen Zhonglei's entire body instantly froze.

He had never dreamed that the North Wing was also in the enemy's anticipation.

In this way, the 1,000 elites he had sent out were all assassinated by the other side!

He had clearly gone to attack the other side, and the elites he had sent were all the most suitable for the beheading mission, but why were they killed and injured as soon as they landed? How in the world did the enemy plan all this in advance?

Just when Chen Zhonglei was in a state of extreme self-doubt, Hamid's soldiers attacked in full force!

According to Ye Chen's instructions, Hamid had already divided the entire base into five zones.

Each area, in turn, had been divided into dozens of detailed coordinate bearings based on the location of the burst point.

Therefore, after the soldiers inside the various bunkers knew which burst point had exploded according to the marked map, they immediately had a clear idea of the enemy's current location.

Immediately afterwards, Hamid dispatched eight hundred soldiers from the forward slant and the reverse slant to surround the first echelon.

At the same time, the artillery in the south flank anti-slope trench immediately rolled out twenty small mortars and aimed at the location of the north flank burst point from the hole in the south flank trench, ready to launch another round of shelling against the second echelon on the north flank.

The mortars were simple in construction, being nothing more than a long, thin barrel fixed on a tripod, and with their short range and low power they were nothing compared to the tractor guns.

However, this weapon had its advantages.

The biggest advantage was its mobility and portability, hitting and running when it came.

It was also very simple to fire, just adjust the angle, put the shell through the muzzle and it would fire instantly.

During the Anti-Japanese War, Japanese Army Lieutenant General Abe Gisu, known as the flower of famous generals, was taken away by a young artilleryman of the Eighth Route Army with a single shot from a mortar.

It is because of these advantages that this mortar has not been out of use by the army for decades.

These Hamid's artillery men knew by heart the location of each burst point on the northern flank, so adjustments were made very quickly before the shelling.

In a minute or two, these twenty mortars began a non-stop round after round of bombardment!

And the shells landed with great precision, exploding almost right in the middle of the second echelon's rallying point.

The five hundred soldiers of the Second Echelon of the Dragon Temple, who had themselves been bombed very badly, now had no time to make any adjustments at all before the dense mortar shells landed around them like hailstones.

At this point, the hills on the northern flank became a hell on earth.

After a few rounds of shelling, the battle death rate of the soldiers of the entire North Wing had already exceeded 90%.

Those who were left were all dying by now.

"Tommy! Tommy! Answer as soon as you hear me!" Chen Zhonglei was about to collapse as he shouted out the name of the second echelon commander within the communication system.

But on the other end of the intercom, there was nothing but the sound of heavy gunfire.

The British commander of the second echelon, Tommy Johnson, had already been killed by the mortar shells during the first round of shelling.

Chen Zhonglei could not stop his tears as he listened to the sound of mortar shells exploding over his communicator.

He knew that the second echelon was powerless, so he immediately said to the commander of the first echelon, "Onizuka, you must hold on! Don't give up! I'll have the 5,000 government soldiers launch a charge to get you back, no matter what!"

The commander of the first echelon, the Japanese Onizuka Kenta, laughed miserably and said, "Commander, don't bother, the enemy is already coming up."

Chapter 3195

No sooner had Onizuka's words fallen than the sound of fierce gunfire rang out around him.

At this moment, although there were still a small number of people alive, almost all of them were lingering, and those who could still hold a gun were not even one tenth of them.

Moreover, even if they could still hold their guns, their bodies had suffered considerable damage in the blast, so how could they have any capacity to fight on any scale at this point?

What's more, Hamid's soldiers were poorly trained, but very damaged in battle.

They knew that they were poorly trained and weak, but they also knew that their opponents were now wounded tigers, so they didn't even go straight for the kill, but engaged in all kinds of fire suppression from a long distance away.

In addition to the intense bullets, many soldiers with stronger arms began to throw grenades frantically at the position where the first echelon was, not giving the other side a chance to wrangle at close range at all.

This method of attack, which consumed the opponent to death, was extremely practical, and not only did it further hit the enemy hard, but also caused little damage to his side.

At that moment, several grenades exploded next to Onizuka, causing him, who was already on the verge of death, to lose his breath completely.

Hearing the gunshots and explosions over there, Chen Zhonglei almost collapsed.

He immediately switched channels and shouted to the government army commander, "My soldiers have been ambushed, tell your soldiers to launch an attack! Hurry!"

When the other side heard this, they blurted out, "If your men haven't destroyed the other side's fortifications, we won't rush up and die!"

Chen Zhonglei's eyes were red as he roared, "If you don't help me, I'll shoot you in the face!"

The other side said disdainfully, "If you have the ability to do so, why don't you go and save your men yourself? To ask me to use my men's lives to help you save them is a daydream!"

"You," Chen Zhonglei almost spat out a mouthful of old blood and cursed through clenched teeth, "you're fucking tired of living! I'll protest to your superiors right now! You'll be waiting to be court-martialed!"

"Sick." The other party didn't bother to pay him any mind and simply hung up the phone.

Although Chen Zhonglei was furious to the core, he knew very well in his heart that it was too late for him to do anything now.

There was no way he could do anything more to bring back his living brothers.

It was even likely that none of those 1,000 brothers would be left alive.

At this moment, the shouting and killing sounds coming from the communicator were getting closer and closer.

Chen Zhonglei knew that Hamid's soldiers had already rushed up and started the final closing.

This was also proof that his own soldiers had been killed and wounded, and were likely to have been wiped out.

The gunfire then grew closer and thinner, and when he could clearly hear the sound of footsteps, the gunfire had stopped completely.

At this moment, Chen Zhonglei had clearly realised that all of these 1,000 elites had died in battle, and none of them had been spared!

Chapter 3196

Hamid was once again victorious.

Miraculously, this time there was not a single casualty among his soldiers.

Even though these paratroopers were all elites of the Hall of Ten Thousand Dragons, even though they all had very complete weapons and equipment, under Ye Chen's tactical arrangement, the gang had no chance to play to their strengths.

In front of the extremely powerful explosion, even a torrent of steel could not possibly withstand it, let alone these flesh and blood bodies.

Hamid, who had learned of the total annihilation of the enemy, was thrilled to the core.

He personally went to the area where the first echelon of the Hall of Ten Thousand Dragons had died in battle, and watched with his own eyes as his soldiers cleaned up the battlefield under the light of a powerful torch, and his heart was overwhelmed with excitement.

Today, he had fought two all-conquering battles in quick succession, the most glorious moment of his life.

Just as he was in the throes of excitement, his adjutant came over with equal excitement to report, "Report, Commander! We've harvested a lot of weapons and equipment, as well as hundreds of bulletproof vests and helmets! It's all good stuff!"

"Although all of this equipment has suffered some damage to varying degrees, it's definitely still usable. I reckon the situation is similar on the northern flank, and we'll be able to sort out at least 600,

700 or even 700 or 800 sets of bulletproof equipment by then, which will definitely further enhance our overall advantage if we allocate them to our frontline soldiers!"

Hamid said excitedly, "Excellent, excellent! After fighting these two battles, our soldiers' equipment has gone up another notch! This Ten Thousand Dragon Temple doesn't seem to be a top mercenary organisation, they're a top transport brigade!"

The adjutant was busy saying, "It's not over yet Commander! These five hundred men, all equipped with head-mounted night vision devices, I just had them checked, the vast majority of them are good and workable! With this single soldier night vision equipment, our combat power at night will also skyrocket!"

"On top of that, there are a few thermal imagers, although three are broken, there are still five that can be used, and the three that are broken might be able to be refurbished with a new one if the parts are swapped!"

Hamid sips his teeth in excitement and exclaims, "Tsk! Tsk, tsk, tsk! These guys at the Hall of Dragons really do have money!"

At that, he said with contempt, "Damn, what's the point of having money? I still beat the shit out of them, didn't I?"

The adjutant hurriedly added, "We also seized a large number of new hand grenades from them that we hadn't seen before!"

"New type of grenades?" Hamid frowned when he heard this and asked, "What kind of man-on-man grenades, show them to me."

The adjutant hurriedly handed Hamid an American-style incendiary grenade.

Hamid took it and looked at it, and his whole expression instantly became horrified.

This kind of incendiary grenade was something he had seen before, when a dozen of his comrades were surrounded by enemy troops in a narrow cave, and instead of charging in, the other side had simply thrown two of these grenades.

With just two of them, all the dozen people inside were burnt to black.

That experience still haunts him to this day.

At the time, they called such weapons the devil's fire.

The sight of such weapons still haunts him now.

Immediately afterwards, he gritted his teeth and cursed, "These beasts of the Ten Thousand Dragons Temple are truly ruthless, they are trying to use this weapon to burn us alive in the bunker fortifications!"

With that, he added angrily, "These brutes really deserve to die! We've never provoked them, we've never had any conflict with them, and yet they come to our country and hunt us down without mercy.

The adjutant said with the same anger, "These mercenaries of the Ten Thousand Dragon Temple are a bunch of faithless, moral-less trash! Whoever pays them is their master, and as long as they are paid well, they can kill their own family members with their own hands! Evil mercenary organisations like this should be wiped out!"

Hamid said in a cold voice, "This time, I'll release a signal to the Ten Thousand Dragons Hall and tell them that I, Hamid, am not so easy to mess with!"

Chapter 3197

Having experienced two big battles in one day, Hamid's heart gradually changed from the initial nervousness and apprehension to the current exuberance and excitement.

On top of that, there was also a sense of openness and pain after he had completely given up.

In his heart, he knew that he had killed two or three thousand mercenaries from the Ten Thousand Dragons Temple twice, so he had made a complete bond with the Temple.

Since the matter had come to this, he might as well go all the way to the black.

So, with a cold expression, Hamid asked his lieutenant, "Has the battlefield been cleaned up?"

"Almost." The adjutant spoke, "We've basically cleared out all the weapons and equipment that can be used."

"Good!" Hamid said with a grim look on his face, "Gather all these incendiary grenades and place them in a separate bunker away from the men, these weapons must not be carried with you as a last resort, let alone brought into any other bunker, you will be confined for thirty days!"

The adjutant immediately said, "Yes Commander, I'll give the order."

Hamid nodded, then picked up the incendiary grenade and reached out and pulled the ring straight out.

The adjutant was taken aback by his action.

He was about to say something when Hamid had already dropped the incendiary grenade onto the pile of bodies.

With a loud boom, the dark grenade exploded into a ball of intense flame, which attached itself to the corpses and burned rapidly and at a very high temperature.

To the horror of all the soldiers, the flames from these grenades seemed to have some kind of magic power, as long as a tiny bit of them attached to the corpses, they would keep burning until the corpses were burnt to black.

Many of the soldiers had never seen such a spectacle at all and asked, "What kind of evil weapon is this this?"

With a black face, Hamid said in a cold voice, "This is an incendiary grenade, filled with napalm, white phosphorous and all sorts of gelatinous substances, as long as it sticks to the body, it will keep on burning and will not die when it meets water"

Immediately afterwards, Hamid said with a grim expression, "Adjutant! Throw a few more incendiary grenades over there, make the fires burn bigger, and then take a video of it and send it to everyone tomorrow! I want the Dragon Temple to see with their own eyes how their soldiers are burnt to ashes by their evil weapons! If they dare to come and invade me again, it will be the same fate!"

"Yes!" The adjutant saluted excitedly, and then immediately ordered his men to throw a few more incendiary grenades over.

He then pulled out a mobile phone and filmed the footage all in.

When the video was finished, the adjutant looked at Hamid and said complimentingly, "Commander, this time your wisdom and wisdom will definitely go down in history! I believe that when the day dawns tomorrow, all the brother camps will worship you after learning of your glorious battle results!"

Hamid couldn't help but exclaim, "I'm fucking brilliant, my ass! I know too well what level I am at, and I'm still alive thanks to my brother Ye!"

"If it wasn't for his advice, you would have been wiped out along with me!"

"Or we would have been burned to death in the fortifications we dug with our own hands using these incendiary grenades!"

Chapter 3198

At this point, Hamid said, "You guys clean up the battlefield quickly, and then go back to your respective fortifications to continue policing the boundary, I need to give a call to Ye's brother! Tell him the good news!"

The adjutant said, "Commander, it's not appropriate to call at this hour, is it? Will it affect Mr. Ye's rest?"

Hamid scolded, "I told you to read more when you have nothing else to do, but you just don't fucking do it! China and us are not even in the same time zone, it's 3:30am for us now, it's already 8:30am for him!"

Ye Chen was thinking when he first woke up that Hamid must have experienced another big, hard battle last night.

However, he was not worried about Hamid.

This was because he knew that Hamid had already arranged more than a hundred burst points throughout the base, which could already be called a devilish level of defence.

With this level of defence, it was impossible for the enemy to defeat him.

As expected, he had just finished his breakfast when Hamid's phone call came through.

As soon as the phone call came through, Hamid said excitedly, "Elder brother Ye, you're a god! If you hadn't warned me and given me the solution, I would be dead by now!"

With that, he gave Ye Chen a detailed report of the results of the battle just now.

Ye Chen couldn't help but be surprised after hearing this.

He wasn't surprised that Hamid would win, he just didn't expect that Hamid would win so completely.

The total annihilation of the 1,000 elites of the Ten Thousand Dragon Hall and the fact that there was not a single casualty on his side was indeed very incredible.

Hamid said excitedly, "It's mainly because your idea was great! After the explosive point detonated, the other side lost all their combat power almost instantly, plus our soldiers kept their distance and used grenades and even mortars to finish them off, so we didn't give them a chance to return fire at all!"

Ye Chen laughed, "I was just giving advice, mainly because you guys were able to implement it perfectly."

Saying that, Ye Chen asked again, "These two battles yesterday should have replenished you with a lot of weaponry, right?"

Hamid said offhandedly, "Old brother, I was just about to report to you! These sons of bitches from the Ten Thousand Dragons Temple are so rich that their equipment is no match for the US Marines or even the Navy Seals! This time I've got a couple of thousand special forces units! I'm going to hurry up and buy a batch of NATO-made ammunition, so that in the future, all my direct troops will use the NATO-made weapons captured this time, which are more advanced and far more powerful and accurate in firing than Russian-made weapons"

Ye Chen couldn't help but exclaim, "That's great! With good equipment, you have to get rid of the problem of training soldiers, make sure to select the most combat capable, and the most capable leaders from your direct troops, and train them up as basic officers and middle ranking officers respectively! The larger the ranks, the more you must focus on building up the management, and it is best to simply start an officer training course to concentrate on training the best people in bulk."

Hamid immediately said, "Don't worry, I will definitely train up the full-fledged officers!"

Saying that, he added, "Right, old brother, after these two battles, I now have more weapons and equipment than I can use, just the collected long and short weapons alone are six to seven thousand!"

Ye Chen laughed, "That's good! After dawn, I'm afraid that your popularity in Syria will be unknown to everyone, and by then I don't know how many people will want to join you. With so many weapons and equipment, it's enough for you to form an even larger team."

Hamid said, "That's what I'm planning to do. I've had video footage taken of both battles, and I'll spread the word in the morning. I'm sure I'll be able to collect a lot of stragglers, and maybe even get some of the other armed groups to join me.

I'm also planning to build up an engineering unit of 1,000 to 1,500 men if I can attract 2,000 to 3,000 people to join me, so I can continue to expand the fortifications inside the mountain.

Chapter 3199

At the same time, a cemetery on the outskirts of Yanjing.

Wan Bajun, dressed in a black suit and wearing black sunglasses, held a bouquet of white chrysanthemums in his hands as he walked up to a cemetery where couples were buried together.

Behind him, he was followed by a dozen young men, also dressed in black, who were both yellow and white and black, and even a few brown people, each of whom looked impressive.

Among them. Lu Haotian, the white-clad tiger king who usually wears all white, had also changed into black clothing from head to toe.

Wan Bajun stood slowly in front of the tombstone, looking at the words and photos on the tombstone, two lines of tears cut out from under his black sunglasses.

He was stunned for a moment, poofed down on his knees, took off his sunglasses and choked up with his eyes red: "Dad mum son has come to see you! My son is unfilial and I haven't been able to come back to see you for so many years. I still hope you can forgive me in heaven"

After saying that, he bent down and kowtowed three times in front of the tombstone.

Immediately afterwards, he raised his head. Stroking the picture of his parents on the tombstone, he said with unshakable determination, "Dad, Mom, my son has made some achievements over the years when he was overseas! The Ten Thousand Dragons Temple that my son founded. This time, I will not only avenge your deaths, but also seize the Ye family's Ye Ling Mountain and bury you both there in glory! I will make sure that all of Yanjing, all of Huaxia and even the whole world will witness the Ye family paying a huge price for your deaths!"

After saying that, he wiped away his tears and said seriously, "Dad, Mom. Please also wait for a few days, and on the day of the Qingming Festival, my son will bring you with him and kill Ye Lingshan together!"

At this moment, a sharp beep suddenly came from the Bluetooth headset of the white-clothed Tiger King Lu Haotian.

Hearing this sound, his eyebrows instantly furrowed tightly.

He knew that this sound, was an emergency notification beep that was only used when a major emergency occurred, and generally whenever this sound rang, it was not a good thing.

He then gently turned around, pulled his mobile phone out of the inner pocket of his suit, looked down and his whole body was appalled!

The message, it was from Chen Zhonglei.

He was supposed to call Wan Breaking Jun directly to report the battle, but Wan Breaking Jun's phone had been switched off before he entered the mausoleum. That was why he had sent the message to Lu Hao Tian.

In the message, Chen Zhonglei wrote very directly about the battle situation, which read: "Hao Tian, please report to the temple master on my behalf: 1,000 elites from my division parachuted in to raid Hamid's forces an hour ago. We were ambushed on the hills of Hamid's southern and northern flanks, and the enemy used a large amount of powerful explosives to kill and injure a large area, and our 1,000 elites have now been completely wiped out!"

Lu Haotian was astonished to the extreme.

He couldn't understand that Chen Zhonglei, who had followed the Ten Thousand Broken Armies to the south and north with countless battle achievements, would suffer two major defeats in Syria in a row!

In the history of the Ten Thousand Dragons Hall, this was absolutely unprecedented!

In this way, the Ten Thousand Dragon Hall had lost over 2,500 men in battle in one day, almost equal to two standard regimental formations being completely wiped out!

Such a momentous event had occurred. His first thought was to rush to report to Wan Bajun.

But then he looked at the fact that Wan Bajun was paying tribute to his parents, and he was a little hesitant.

After all, Wan Bajun had been taken out of the country when he was less than ten years old. It was the first time he had come back to pay respects to his parents in more than twenty years, and at such a time, it was not good for him to go up and disturb them.

And Wan Bajun seemed to have sensed something at this moment and said in a cold voice, "If there is anything, just say it!"

Chapter 3200

Lu Haotian was a little shocked, but he quickly calmed down, stepped forward and said in a low voice, "Hall Master. The Green-Eyed Wolf King has sent a battle report, the 1,000 elites he sent out were ambushed by the enemy after the parachute drop and have all been wiped out!"

"What?!" Wan Bajun stood up, turned around and grabbed Lu Haotian's collar, angrily questioning, "A thousand elites from the Ten Thousand Dragons Hall, who took the initiative to sneak up on those stragglers, could be completely wiped out? Are you teasing me!"

Lu Haotian was grabbed by his neck, unable to move at all, and said with some difficulty, "Hall Hall Master I said all... ..all that the Green-Eyed Wolf King sent me. You can read my message if you don't believe me"

Wan Bajun snatched his mobile phone over, and when he looked down at the contents of the text message, his entire person had fallen into extreme anger.

He fought to slam Lu Haotian's phone to the ground and smash it to pieces. Then he gritted his teeth and roared, "Just yesterday, more than 1,500 people died, and today, another 1,000 people died, is he Chen Zhonglei a waste?"

Lu Haotian coughed twice, but did not dare to answer.

Wan Bajun said with an extremely grim expression, "These two defeats. It will definitely bring our Ten Thousand Dragon Hall into disrepute! It might even cause our ranking in the world mercenary organisation to drop out of the top 10 in one breath! The entire mercenary world has not seen such a tragic sacrifice in recent decades! This is a travesty!!!"

Immediately afterwards, he took out his mobile phone, switched it on and opened it to Chen Zhonglei, and then cursed, "You rice bucket! I gave you such a simple task, and you've done this to me today?"

Chen Zhonglei was ashamed and said, "Hall Master, please listen to my explanation"

Wan Bajun gritted his teeth and questioned, "After such a great defeat, what else do you have to explain? Are you worthy of the title of the Four Battle Kings of the Ten Thousand Dragon Hall?"

Chen Zhonglei said in a dejected manner, "Hall Master I am sorry to you and to the Ten Thousand Dragons Hall However, the enemy this time is indeed extraordinary, not only have they already prepared very strong fortifications long ago, they are even able to accurately predict our every tactical step planning. Our men randomly chose two parachute landing sites, and it turned out that all of them had strong explosives that they had planted in advance, so I believe that they must have set up explosive points in all places throughout the base, and no matter where our soldiers landed, they were all within their killing range"

Speaking of this, Chen Zhonglei said with immense sadness and anger, "Hall Master, I will accept whatever punishment you give me. Even if you directly court-martial me and shoot me, I have no complaints"

"But I have to say that Hamid and his men are extremely different from the opposition groups we have encountered before, this man's strategic vision and tactical arrangements are very precise and extremely ruthless"

"All the contacts we have had with him so far have shown that he is an extreme pragmatist, all his fortifications, all his tactical arrangements have only one purpose, and that is to do everything possible to kill and injure the enemy, never leaving them any way out"

"This is the kind of person we must take seriously and treat seriously in order to be able to defeat him. If you shoot me, please also consider carefully in your next strategic arrangement, and never underestimate this guy"

Wan Breaking Jun's expression was extremely gloomy, he was silent for a moment and said in a cold voice, "Having fought two unprecedented defeats in succession, based on this alone, I would shoot you twice!"

At this point, Wan Bajun turned his words around. Continuing, "But now is not the time to take your life, it's the time to let you wear it out! The more we suffer defeat on this Hamid, the more we at the Ten Thousand Dragons Hall cannot let him go, it won't take long. The whole mercenary world will know about this, and then everyone will look at us as a joke, so we must completely annihilate this Hamid and get back the face we have lost!"

Chen Zhonglei blurted out, "Hall Master Now this Hamid has made his base like an iron barrel, it is difficult for us to attack. Unless we use corpses to pile up"

Wan Breaking Jun gritted his teeth and said, "We can't launch another blind attack, that will only bring more damage, we can't afford a third defeat now!"

I will immediately draw you a group of troops from Yemen and other regions to give you 15,000 men to surround this Hamid! Surround it like an iron barrel! Not a single fly will be allowed in!"

"Also, kill every living thing that comes out of the barrel! Even if a fly dares to come out once, I must kill it! Even if they surrender, don't accept it! No one will be left alive! This time, we'll fight him to the end, to the end!"
