

Ye Chen 3661

Chapter 3661

Otherwise, given his situation, it would have been difficult for him to take out five million dollars in such a short period of time with alacrity.

Hong Wu added: "Oh yes Master Ye, that Smith also said that the Jiu Xuan Stomach San had been approved for listing in the United States, saying that some kind of confirmation letter would be issued soon."

Ye Chen smiled faintly and said, "As expected."

With that, he then said to Hong Wu, "Hong Wu, tell Smith tomorrow morning that General Wei has decided to meet him and ask him to come to the banquet at Tian Xiang House at noon tomorrow, and I will attend with Wei Liang at that time."

"Good!" Hong Wu said respectfully, "I'll have someone prepare the diamond box in advance, so there will be no external guests tomorrow."

Ye Chen instructed, "Make an appointment with Wei Liang as well, if he's not available tomorrow at noon then make an appointment for tomorrow night, I'm free at noon and night anyway."

"Okay."

.....

This night, Smith almost stayed up all night.

His greatest fear was that Wei Liang would not be willing to take out more Jiu Xuan Zai Zai Pills.

In that case, not only would his son not be saved, but even the Ministry of Health's hope of cracking this medicine and then getting it manufactured in India would be completely dashed.

Although this is a cheap solution, he knows in his heart that this is the best solution for the US and for his son if the Jiu Xuan Zai Zai Pills cannot be successfully introduced into the US.

The reason is that once this drug is cracked successfully, it would mean that his own son would have the opportunity to take this drug for a long time.

No matter how the Ministry of Health bypasses Jiu Xuan Pharmaceutical's patent through India, at least his son will be saved.

However, all of this was based on Wei Liang's willingness to give himself some more Jiu Xuan Zai Zai Pills, and if Wei Liang closed this mouth, there was really nothing that could be done.

After Smith absentmindedly ate his breakfast, he received a phone call from Hong Wu, once the call was made, Hong Wu told him, "Mr. Smith, I've made an appointment with Mr. Wei, he'll be available at noon, nothing wrong on your end, right?"

Smith was overjoyed and said, "No problem for me! Anytime!"

“Good.” Hong Wu then said, “Then wait in front of Buckingham Palace at twelve o’clock, I’ll also send that man from yesterday to pick you up.”

Smith was so excited that he said, “Thank you! Thank you, Mr. Hong!”

At eleven forty-five in the morning, when Ye Chen arrived at Tian Xiang Palace, Hong Wu and Wei Liang were already waiting for him here.

Having received the two and a half million dollars transferred from Hong Wu, Wei Liang was also grateful to Ye Chen, and when he saw him enter, he immediately rose and said respectfully, “Master Ye, I am really grateful for the money you asked Master Wu to give me

Ye Chen waved his hand and said blandly, “A little hard work, it’s due, besides it’s not from me.”

Saying that, Ye Chen asked Hong Wu again, “Did you send someone to pick up that Smith?”

“Went.” Hong Wu hurriedly said, “The appointment with him was at twelve noon, so I guess it will take about twenty minutes to get here.”

Ye Chen nodded and said to Wei Liang, “When that Smith arrives later, say that I am the operations director of Jiu Xuan Pharmaceutical, I will talk to him about specific matters.”

Wei Liang nodded respectfully and said, “Okay Master Ye!”

Ye Chen smiled, “Don’t call me Master Ye for this meal, call me Director Ye, it’s best to change your name now and get used to it.”

Wei Liang was busy saying, “Okay Master Ye! Oh no, Superintendent Ye!”

Chapter 3662

Seeing that Wei Liang was beginning to adapt to the temporary new title, Ye Chen took a seat beside Wei Liang and asked him, “Has the reply letter distributed by the FDA to the Nine Mysteries Stomach been received?”

“Received.” Wei Liang said, “The FDA has also included Jiu Xuan Gastric San in the hospital’s guidance on the use of drugs, we have now started going through the customs reporting procedures and will soon fly five million boxes to the United States one after another.”

Ye Chen asked him, “Have the sales channels in the US been opened up? After all, Jiu Xuan Stomach San is an oral medicine, so we surely cannot sell it on our own, right?”

“Right.” Wei Liang explained, “Anything that is defined as a medicine must be sold through compliant pharmacy channels, so we will first shop at the Walgreens chain of pharmacies in the United States, which has more than 8,000 shops in the United States and is the highest sales chain in the United States. We will first lend their channels to get the Jiu Xuan Pharmaceuticals brand out, and when the brand is up, we will follow up with our health products and start building our own direct channels.”

Ye Chen asked him, “Does this chain of pharmacies approve of traditional Chinese medicine?”

“Approved.” Wei Liang smiled, “Their boss himself is a fan of Chinese medicine, obsessed with cupping and acupuncture, he wanted to introduce hemorrhoid suppositories into the American market before,

but the FDA did not approve them, and the Jiu Xuan Stomach San that we produce, he started taking it long ago on the recommendation of his friends.”

The company’s products have been used for more than 20 years, and have been used by Western doctors, but they have not improved. After we acquired Xiaolin Pharmaceutical, Xiaolin Stomach San ceased production, he started to use Jiu Xuan Stomach San on the recommendation of his friends, and now it has basically cured him, so he is very enthusiastic about this medicine.”

“Good.” Ye Chen nodded and spoke, “Since that’s the case, then let’s hurry up and push this thing into the ground.”

Wei Liang was busy saying, “Ye Da Oh no Director Ye, I think we can start registering an enterprise in the United States in advance and invest in another production line, after all, the North American market is still very large, and with a production line, the overall cost can be reduced a lot, and this way, the tariff can also be saved. ”

Ye Chen waved his hand: “It is not necessary, this way, the tariff is lowered, but everywhere you have to be subject to the constraints of the U.S. federal, may not be a good thing, and even if the production of drugs do not have to pay tariffs, the import of raw materials for those medicines also have to pay tariffs, the combination, may not be able to save much. I think it would be better to use the Jiu Xuan Reclaim Pill to negotiate with them and ask them to exempt all of Jiu Xuan Pharmaceutical’s medicines from customs duties.”

Wei Liang’s jaw dropped as he listened and said, “Is this feasible”

Ye Chen said seriously, “Absolutely feasible, don’t believe us to test that Smith later, if my estimation is correct, his current backing should be the White House.”

“The White House?!” Wei Liang exclaimed, “Could it be that they have an idea for the Nine Mysterious Reclamation Pill?”

Ye Chen laughed, “This kind of medicine, once they know about it, it would be strange if they didn’t have any ideas.”

Saying that, Ye Chen instructed Wei Liang, “In a moment, you only need to put up your aura, I will talk to him about the rest.”

Wei Liang hurriedly nodded respectfully, “Yes, no problem!”

.....

Twelve-twenty.

Smith, led by Hong Wu’s little brother, arrived at the Diamond Box in the Tian Xiang House.

When he entered the Tian Xiang Mansion, he was relieved to see Wei Liang, Hong Wu and Ye Chen.

He did not know Ye Chen, nor did he know what identity Ye Chen was, but as long as he saw Wei Liang here, half of his hanging heart could be put down.

Thinking of his wife's instructions, he knelt down directly on the ground as soon as he entered and said to Wei Liang with a face of shame, "Mr. Wei! Everything before was my fault! I apologise to you!"

After saying that, as soon as he bent down, he kowtowed to Wei Liang.

Wei Liang was a bit stunned by his move and said awkwardly, "Mr. Smith, what are you doing"

Smith confessed, "I was ignorant and offended you before, and also offended this divine medicine, the Nine Mysterious Reclaiming Pill, I am incomparably guilty deep inside, so I hope you can forgive me for my previous offense!"

Wei Liang said helplessly, "All right, all right, that's enough for now, you'd better sit down and let's talk about business."

Only then did Smith thankfully stand up and take a seat in the empty seat reserved for him.

Wei Liang then introduced Ye Chen to him, saying, "Mr. Smith, let me introduce to you, this is Mr. Ye, the operation director of Jiu Xuan Pharmaceuticals, he is in charge of the entire operation strategy of Jiu Xuan Pharmaceuticals."

Smith looked at Ye Chen in surprise and scrambled to stand up again, nodding and bowing, "Hello Mr. Ye! I'm James Smith, the head of the FDA."

Ye Chen nodded slightly and said with a smile, "Hello Mr. Smith, welcome to Jinling."

Smith made a few polite remarks before he sat back down again.

As soon as he sat down, he got straight to the point and said, "Mr. Wei, the effect of your company's Jiu Xuan Zai Zai Pills is really amazing, this is definitely the most important breakthrough in the field of medicine in this century, there is no one! Therefore, I sincerely hope that you can launch this medicine into the American market as soon as possible, and the FDA will definitely provide all the facilities for Jiu Xuan Pharmaceutical at that time!"

Chapter 3663

Wei Liang nodded and said to him, "You can talk to Director Ye in detail about this matter, I fully respect his opinion."

Smith hurriedly said to Ye Chen again, "Mr. Ye, I wonder what you think?"

Ye Chen smiled and spoke, "It's not impossible to let the Jiu Xuan Reclamation Pill be marketed in the United States, but we have a few conditions that we can consider if we can make it happen."

Smith was busy saying, "If you have any conditions, please feel free to put them forward, if they are within the scope of my functions, I will do my best to guarantee them, if they are outside the scope of my functions, I will also do my best to fight for you!"

Ye Chen nodded and said, "First of all, I request that your country grant a permanent tariff exemption to all goods produced by Jiu Xuan Pharmaceutical."

When Smith heard this, his head was as big as a bucket, and he said with great embarrassment, "Mr. Ye, this request of yours is really too difficult to achieve, the federal government cannot open such a big

opening to Jiu Xuan Pharmaceutical, because once this opening is given out, Jiu Xuan Pharmaceutical can completely use its own company shell to produce or sell all kinds of goods in order to seek tariff reduction

Ye Chen laughed: "You don't have to worry about this, it can be limited to the regular medicines as well as health products produced by Jiu Xuan Pharmaceutical."

Smith's heart was somewhat drummed, this kind of thing, he is certainly not qualified to decide this, even he does not even have a channel that can mediate.

However, once he thought that the White House was also extremely desperate for this medicine, he felt that if this matter was reported to them, perhaps they could agree to it.

Hearing this, Smith then said to Ye Chen, "Mr. Ye, I can't promise you this matter right now, but I can find a way to fight for it."

When Ye Chen heard this reply from him, it became clear in his mind.

If Smith didn't have the federal government behind him, he wouldn't even have the ability to fight for this kind of thing.

Since he had said, find a way to fight for it, then the support behind him must be the federal government.

So, Ye Chen added: "In addition to that, I also ask the FDA to give the green light to all future drugs from Jiu Xuan Pharmaceutical, and I won't make it difficult for you to pass it in seconds without any testing, as long as you can give it a pass within a month of us submitting the application."

Smith felt that this was something that he still had the ability to decide directly, and anyway, the FDA had released countless drugs throughout the year, and did not care about giving Jiu Xuan Pharmaceutical a few slots.

So, he agreed on the spot and said, "There is no problem with this matter, Mr. Ye can feel free to rest assured."

Ye Chen nodded and added, "As for the third request, it is that you must immediately disclose the actual efficacy of the Jiu Xuan Zai Zai Pills to the public, we need the FDA to come out to endorse the Jiu Xuan Zai Zai Pills worldwide."

Smith said without thinking, "That's no problem, the only case of Jiu Xuan Zai Zai Pills in the United States is my son, I can disclose all my son's treatment process and results."

Speaking of this, Smith looked at Wei Liang with some embarrassment and pleaded, "Mr. Wei, the box of Jiu Xuan Zai Zai Pills that you gave, my son has already finished taking them, he has no more medicine to continue taking afterwards, so I still need to ask you to provide some more"

Wei Liang pointed at Ye Chen: "You have to communicate with Director Ye on this matter, everything will be decided by Director Ye."

Ye Chen laughed and spoke, “Mr. Smith, the medicine is not impossible to give, but our principle is that no matter who or which country’s drug supervision agency, since they want the Jiu Xuan Zai Zai Pills, they have to pay.”

Smith said awkwardly: “Mr. Ye, according to the routine, no matter what drug wants to be marketed in the United States, a certain amount of the drug must be submitted to the FDA and used to do drug trials for the FDA This also has to pay, isn’t it a bit too unjustified”

Ye Chen waved his hand: “What you said that are ordinary drugs, but we this is not.”

Saying that, Ye Chen said with great certainty: “If it is our other medicines, I can completely follow your requirements and rules, just like the Jiu Xuan Stomach San, I can even give you 10,000 boxes for you to take for experimentation, if it is not enough, there is no problem to add another 10,000 boxes.”

At this point in the conversation, Ye Chen turned his words and said seriously, “However, this medicine, the Jiu Xuan Zai Zai Pill, any country that wants to introduce it, must follow our rules! Otherwise, we would rather not go to this country to market and sell it.”

Smith said, “Mr. Ye, the market share of the United States is very large, if you give up the American market because of such a small matter, with all due respect, isn’t your decision a bit too arbitrary?”

“Arbitrary?” Ye Chen laughed: “To be honest, this drug is limited by the production process, the production is relatively scarce at this stage, so there is no worry about selling it in the future, if it does not enter the American market, it will only be your loss, not ours!”

After a pause, Ye Chen added: “In your words, how do you say it, oh yes, it’s called ‘I don’t give a sh*t!’”

Chapter 3664

The so-called ‘I don’t give a sh*t’ is actually a foul word in American English, which should probably mean: I don’t f*cking care, or: I f*cking care about your sh*t.

The reason why Ye Chen chose a foul American phrase was to make his attitude clear to Smith in a simple and brutal way: in front of the Jiu Xuan Zeng Zai Pills, you still want to chat about your rules?

You! Also! deserve!

When Smith heard these words, he immediately understood Ye Chen’s attitude completely.

The Jiu Xuan Zai Zai Pill was here, although it was a life-saving miracle pill, but when placed in front of the rules, it was a nuclear weapon that could kill God and Buddha.

Add to that the fact that it was produced in scarce quantities, and that was all the more reason for everyone to beg for it.

In this case, everything is purely a seller’s market, and the seller is the father.

So, he could only say with an apologetic face, “Sorry Mr. Ye, it was my poor wording just now”

After saying that, he hurriedly made his attitude clear again, “Don’t worry, we are willing to pay you for the medicine, just don’t know exactly how you priced this medicine yet?”

Ye Chen laughed: "Since you are the head of the FDA, then you should know that the development cost of many special drugs is very high, so its price is also very expensive"

Speaking here, Ye Chen deliberately digressed and laughed: "Right, I heard that your FDA just approved a special effect drug some time ago, and it costs more than 2 million dollars for one shot? Is there such a thing?"

"Yes....." Smith wiped a cold sweat and stammered, "That drug is from Novartis, it is a special drug to treat pediatric spinal muscular atrophy."

Ye Chen nodded and laughed, "Then our super-effective drug that can cure end-stage cancer must not be priced too low, don't you think so?"

Smith was busy saying, "Mr. Ye, that Novartis medicine, the reason why the price is very expensive is because it can be cured with a single injection九玄再造丸 is after all a medicine that needs to be taken for a long time, if the price is set too high, I am afraid no one can afford it"

Ye Chen laughed: "Don't be afraid, we certainly can't sell a box of medicine for more than two million dollars, isn't that a rip-off?"

Smith was slightly relieved.

He was really afraid that Ye Chen would ask for a lot.

At this moment he couldn't help but mutter in his heart, "If it's really 2 million dollars a box, then except for the top tycoons with a*sets of several billion dollars or more, I'm afraid no one can afford to take it, after all, there are only seven pills in a box, one pill is 300,000 dollars, if a patient has to take 100 million dollars a year just to take the medicine, he might as well f*cking die"

Ye Chen spoke at this time: "I think, we this medicine, simply a box of one million dollars, this price is quite appropriate."

When Smith heard this, he collapsed and said offhandedly, "One million dollars a box, 52 boxes a year that means a year's treatment costs fifty two million dollars, this is too expensive"

Ye Chen spread his hands and said, "There is no way, our research and development costs are very high, the production costs are very high, and the production is very small, the end of the year may not be more than 100,000 boxes, selling a million boxes a year, the annual sales is only one billion dollars, is it very high? Your western pharmaceutical company's sales of a single anti-drug are over ten billion dollars a year, what did I say about you?"

Saying that, Ye Chen added: "You have to understand, our Eastern traditional medicine, the raw material relies on all kinds of heavenly treasures, unlike your chemical medicine, as long as a molecular formula is developed, it can be put in the production line like the production of plastic cloth, ma*s production."

It was true that Ye Chen could not ma*s-produce the Jiu Xuan Zai Zai Pills, or at least he was still far from being able to do so.

After all, this medicine truly relied on the Blood Dispersing and Heart Saving Pill, and he couldn't just do nothing all day long, just bored at home refining pills.

So, even if he had the heart to hang on to the world, he simply didn't have the ability to save everyone.

Because of this, the production of this medicine was bound to be very small.

The reason he made this medicine was also not to make money, but to help Jiu Xuan Pharmaceutical knock open the doors of the markets of various countries.

Hearing this, Smith immediately deduced in his mind, "The reason why Jiu Xuan Pharmaceutical could not make produce this medicine must be because its own production process level was insufficient, resulting in an inability to break through production!"

Chapter 3665 -

Thinking of this, he hurriedly said, "Mr. Wei, Mr. Ye, I wonder if you two are interested in selling the patent of this drug to a pharmaceutical company in the United States?"

When Ye Chen heard this, he narrowed his eyes and looked at Smith.

In his opinion, the tail of this old fox was finally about to be revealed.

He then said in a firm voice, "Impossible, we will never sell this patent!"

Smith was busy saying, "What if the American company can pay a huge buyout fee? For example, ten billion dollars or even more?"

Ye Chen still shook his head, "Not to mention ten billion, even if it was a hundred billion or trillion dollars, we would not sell it."

The reason why Ye Chen was unwilling to sell it was mainly because he couldn't sell it at all.

The formula could be given to anyone at any time by himself, but no one could produce it.

If the other party could not produce it, how could they be willing to pay the buyout fee?

This is not the same as when Kobayashi Pharmaceuticals was snubbed, when Ichiro Kobayashi came to rob the drug anyway, and gave him a fake one to eat his old man to death, and he could only eat his words.

If this is sold, it will be a \$100 billion patent deal that will shock the world, and if the other side gets the patent and finds out they've been tricked, it will be an international scandal.

Smith also thought that Jiu Xuan Pharmaceuticals was not willing to sell the patent because it was purely a lonely and self-indulgent idea, so he hurriedly advised: "Mr. Ye, when penicillin was discovered, it was also a revolutionary advance in the medical field, but you may not know, because it was extremely difficult to prepare penicillin back then, so the production capacity of penicillin has not been able to increase. The strain of penicillin that several large laboratories had worked so hard to cultivate was not enough to treat one person, so it was simply not possible to make it serve all of humanity."

At this point, Smith gave a slight pause and added: "However, in the following years, with the efforts of various pharmaceutical and chemical experts as well as biological experts, the production process of penicillin was continuously optimised, and it also achieved a step-by-step development from extremely low production to overcapacity, thus benefiting all of humanity."

“With all due respect, I feel that Jiuxuan Pharmaceuticals is like the team that discovered penicillin in the first place, and although they discovered the drug, they were unable to ma*s produce it.”

“But our industrial, pharmaceutical, and chemical base in the United States is among the best in the world! If we can be allowed to develop based on this formula, we may be able to achieve ma*s production in a few years’ time!”

“When that time comes, we join hands to benefit all of humanity together, wouldn’t that be a great thing?”

Ye Chen was amused by him and said cheerfully, “Mr. Smith, I find that you are really good at what you do, with your unique vision and foresight! No wonder a man like you can be the head of the FDA! This realm alone is remarkable!”

Smith thought that Ye Chen was really impressed by him, so he said with a smile, “Mr. Ye is very kind, I am not really far-sighted, I just want to benefit all mankind as much as possible.”

Ye Chen nodded with a solemn face and said, “Mr. Smith, a medicine to treat cancer, how much more it can benefit, it can only benefit tens of millions of people

Speaking of this, Ye Chen turned his words and said seriously, “However, since your scientific research base in the United States of America is so strong, why don’t you study and research how to synthesize oil cheaply and in large quantities? If you can lower the manufacturing cost of each barrel of oil to one dollar and produce 500, 600, 700, 800 billion barrels a year, then you will not only solve the global energy crisis, but also the Middle East will not have to be constantly being used by you to send troops for various reasons, so won’t that really benefit more than seven billion people around the world?”

Smith was embarra*sed and prickly when he heard this.

He found that he knew that Ye Chen was talking nonsense, he knew that he was sarcastic and ridiculing himself, but he had no way to refute him.

Because no matter how he refuted, it seemed like he was slapping himself in the face.

He couldn’t help but feel in his heart, “D*mn, you’re really f*cking damaged, you’re really a good material to do operations

Chapter 3666

In desperation, Smith could only ask Ye Chen: “Mr. Ye, if we decide to introduce the Jiu Xuan Zai Zai Pills at a price of US\$1 million a box at this stage, how many boxes of the medicine can you provide us with?”

Ye Chen waved his hand, “The price can’t be that low right now, if you want to introduce it, you’ll have to pay five million dollars a box, and you can give you twenty boxes at a time.”

Smith almost spat blood and subconsciously asked, “Mr. Ye, didn’t you just say that it wouldn’t be more expensive than that Novartis drug? This is already three million more expensive than Novartis!”

Ye Chen laughed: “The price of one million dollars is the pricing after the official launch, I am a man who always says one thing, if the pricing exceeds one million dollars after the official launch, we will give you the patent for free, but at this stage now, the price is five million dollars a box, there is no negotiation.”

Smith was no longer able to speak out against Ye Chen’s shamelessness.

He had now figured out that since Jiu Xuan Pharmaceutical was not willing to sell the patent, his task now was to get as many Jiu Xuan Zeng Zai Pills back as possible, so that on the one hand, he could give his son a medicine to be ashamed of, and on the other hand, he could let the pharmaceutical companies secretly attack the formula.

When the formula was conquered and mass-produced directly in India, Jiu Xuan Pharmaceutical would definitely not even have tears to cry.

He then spoke up and said, “Mr. Wei and Mr. Ye, I will compile all your requests and submit them to the FDA committee, as well as the parliamentary assembly for review as soon as possible, and I will give you both feedback as soon as there are any results!”

Wei Liang thought that since Ye Chen had asked him to put up a fight, he knocked on the table and spoke, “Mr. Smith, tell all those people in your country to get it done faster, we don’t have that much patience to wait all the time.”

Smith hurriedly nodded: “Please don’t worry, I will get this done as soon as possible!”

After verbally agreeing to a series of harsh terms proposed by Ye Chen, Wei Liang took the initiative to end the meal, and Hong Wu immediately sent someone to send Smith back to the Buckingham Palace Hotel.

As soon as Smith had left, Wei Liang asked Ye Chen impatiently, “Master Ye, Smith is so desperate to obtain the Jiu Xuan Reclamation Pill, I think it’s not just for his son, it’s likely that he has other intentions as well!”

Ye Chen smiled faintly and said, “I don’t need to think about it to know that they must be planning to decipher the formula of the Jiu Xuan Recycle Pill and find a way to imitate it.”

Wei Liang also said with a look of agreement, “I think so! This gang is really underhanded!”

Ye Chen said without a care in the world, “It’s alright, let them do their research, even if they put the entire GDP of the United States into it, there’s no way they can crack the process of making the Jiu Xuan Zai Zai Pills, it’s just a waste of R&D funds.”

After saying that, Ye Chen added, “Next, you don’t need to dock with them in this regard, go all out to promote the marketing and sale of our conventional medicine in countries around the world, now that we have the best door knocker in our hands, I believe that no country will reject us.”

Wei Liang said excitedly, “Master Ye don’t worry, I will do my best!”

.....

At this time, Smith, as soon as he returned to the Buckingham Palace Hotel, immediately reported to the head of the Ministry of Health, in detail, the progress on his side.

Ye Chen's several conditions, although very harsh for the United States of America, were not impossible to agree to.

Therefore, after a brief negotiation, they immediately agreed to all of Ye Chen's demands, including the reduction of tariffs on all medicines and health products, as well as the endorsement of Jiu Xuan Pharmaceutical, etc.

As for the introduction of the Jiu Xuan rejuvenation pills upfront, which cost a huge US\$5 million for a box, the White House agreed to it without much thought.

After all, they were thinking of cracking and optimizing the formula to further enhance their international influence, and then let India take the blame and make a huge profit from pirated drugs, so such a small investment was just a drop in the bucket for them.

Chapter 3667

So, that afternoon, Jiu Xuan Pharmaceuticals received \$100 million from the FDA.

Immediately afterwards, the Mayo Centre in the US announced to the world the big news that a drug company from China had produced a super-effective drug that could cure all types of terminal cancer!

With the announcement of Jimmy's treatment, the Mayo Centre declared to the world that the drug was unprecedented in its effectiveness in treating end-stage cancer and had the potential to completely rewrite the history of cancer treatment!

The news went through the Mayo Centre and was the first to ignite the world's experts in the field of cancer.

The results of Jimmy's treatment in just one night clearly showed the powerful therapeutic effect of the Jiu Xuan Zai Zai Pill on end-stage cancer.

So no one suspected any falsification of the Mayo Centre's release.

Immediately afterwards, the news continued to fester through the media, to the delight of the whole world!

The words Jiu Xuan Pharmaceuticals also instantly caught fire around the world!

In an instant, the drug regulatory bodies of almost all countries took the initiative to send invitations to Jiu Xuan Pharmaceutical, inviting Jiu Xuan Pharmaceutical to enter their markets as soon as possible and agreeing to give the green light to all processes.

Under the instructions of Ye Chen, Wei Liang immediately said to the world through Jiu Xuan Pharmaceutical's official channels that the Jiu Xuan Zai Zai Pill was still in a very difficult stage of preparation in small quantities, and had not yet finished clinical trials and process reform, so the time for its worldwide launch could not be predicted for the time being, and was not optimistic.

Ye Chen hoped that the whole world would know about Jiu Xuan Pharmaceutical through the Jiu Xuan Zai Zai Pills and substantially increase their recognition of Jiu Xuan Pharmaceutical.

However, he did not hope that the world would pin its hopes on the Jiu Xuan Rejuvenation Pill.

After all, this is a very difficult, if not impossible, medicine to produce, and if the world were to pin its hopes on the Jiu Xuan Reclaiming Pill to change the fate of every cancer patient, this is doomed to be unrealistic.

Although Jiu Xuan Pharmaceuticals has personally come out and thrown cold water on the world, everyone still has high hopes for Jiu Xuan Pharmaceuticals as a company.

Many people even compared Jiu Xuan Pharmaceuticals to the light of humanity, believing that since they could develop such a medicine, they would definitely be able to break through the final shackles.

For a while, Jiu Xuan Pharmaceutical's global popularity was even higher than those of the world's top pharmaceutical companies.

Ye Chen also kept his promise and delivered twenty boxes of Jiu Xuan Zai Zai Pills to Smith.

Smith, who had received the Jiu Xuan Zai Zai Pills, was so excited that he burst into tears.

Afterwards, he immediately called the Minister of Health and told him, "I've got twenty boxes of Jiu Xuan Zai Zai Pills and am ready to book the earliest flight back to the United States immediately!"

"Don't be in a hurry!" The other party immediately said, "Now that you are in possession of such an important medicine, you absolutely cannot return on a civilian airliner, it would be too unsafe! I'll contact them now and see which American pharmaceutical company has a private jet at their China branch, if they have one I'll commandeer it immediately and bring you back safely."

Soon, he requisitioned a private plane from the famous pharmaceutical company Mercer.

That plane was on standby in Yanjing at the moment, and after it was requisitioned, it was immediately flown to Jinling, ready to take Smith back to China.

Smith tied the 20 boxes of Jiu Xuan Zai Zai Pills to his waist with duct tape, and only then did he board the plane to the United States with confidence.

At this time, experts from several top pharmaceutical groups and pharmacy laboratories in the United States had all gathered in a secret laboratory in Washington.

They were waiting for Smith to bring back the Jiu Xuan Zai Zai Pills and start cracking the formula at the first opportunity!

Chapter 3668

After a 12-hour flight, Smith finally made it back to Washington.

Interestingly, the plane he was on, did not, land at the Washington airport, but was guided by air traffic control all the way to a military airport on the outskirts of Washington.

The reason why his plane was guided to land at a military airport was because the 20 boxes of Jiu Xuan Zhen Zhen Zhen Pills he was carrying were, in the eyes of the United States of America, more than priceless, and might even be a major weapon in international competition in times of peace.

Immediately after landing, the plane was led by a ground guidance vehicle to a military hangar that was used to park bombers.

By now the hangar had been completely emptied and nearly a hundred people were here, having waited for a long time.

Among these people were the heads of the military, as well as the top brass of the health department, and the elites of the major laboratories and the experimental teams of several top pharmaceutical companies.

On top of that there were some men in suits with serious expressions, and from Smith's experience, these should all be CIA agents.

Smith simply did not expect to be greeted by such a huge array of people when he returned this time.

The moment the door of the plane opened, before he knew it, a number of soldiers immediately rushed up, and as soon as they got on the plane, they immediately ordered, "All of you take your belongings and line up to get off the plane immediately, this plane will be fully inspected soon, if you have any sensitive items on you or on the plane, we will deal with them seriously!"

Smith said awkwardly, "You're not afraid we'll smuggle any contraband back to our country, are you?"

The soldier said coldly, "Mr. Smith, you must make sure that every box and every Jiu Xuan Zai Pill is intact and in your possession."

Smith instantly understood the motive of these soldiers.

They were afraid that they had hidden the Jiu Xuan Reclamation Pills, that they would leave them on the plane, or leave them with the crew and pass them on to other countries in the future.

It was no wonder that they were overly sensitive, after all, in their opinion, the value of the Jiu Xuan Zhen Zhen Pills was so immeasurably large that they had to be cautious and careful.

Smith had to lift his own clothes, flash the 20 boxes of Jiu Xuan Zai Zai Pills wrapped around his waist, and spoke, "Please don't worry, I carry all the medicine close to me."

The soldier nodded, still expressionless, and said, "It had better be."

Soon, Smith was escorted out of the cabin by the soldier.

At that moment, Health Minister Rogers came striding over and said with unbridled excitement, "Smith, you're finally back!"

Smith said awkwardly, "What's with all the fuss you guys are making?"

Rogers laughed, "Ever since I heard you say that Jiu Xuan Pharmaceutical itself has not found the mass production process for the Jiu Xuan Rejuvenation Pill, the White House has been taking this matter incredibly seriously!"

Saying that, Rogers added, "Think about it, if they have not been able to break through this restriction, then they will not be able to create a real check and balance on this medicine internationally, if we can break through this restriction, then this medicine will be able to play a huge role in our hands!"

Smith nodded and spoke, "I've brought the medicine back, take it if you want to study it, but I want ten boxes to take to my son for his illness!"

“Ten boxes?” Rutgers frowned and blurted out, “Smith, you know the Ministry of Health is paying for this, ten boxes is \$50 million! If you just take it, what am I going to tell my superiors?”

Chapter 3669

Smith suddenly tensed up and questioned, “Then what do you mean? My son is waiting for his life to be saved right now!”

Seeing that he was very nervous, Logos hurriedly laughed, “Gee, don’t be so sensitive or nervous, what I mean is that your son only needs one pill a day according to the normal dosage, and four boxes will be enough for him to take for a month.”

Saying that, Logos patted Smith’s shoulder and added, “With our ability in pharmacology, maybe, in a month’s time we will have achieved a complete imitation, and by that time I will personally take a hundred boxes and deliver them to your home!”

Smith immediately shouted emotionally, “No! What if you don’t achieve it in a month’s time? Do I have to continue to watch my son die? I don’t care about anything else, but I want 10 boxes of this medicine, not even one box less!”

Smith added, “Don’t think I don’t understand pharmacy, if you really want to find out what the formula is in this medicine, you don’t need a large number of drugs as samples, each experimental team only needs to share two or three pills, that’s enough for them to experiment for a long time! Ten boxes is seventy pills, definitely enough for you guys!”

Rogers sighed helplessly and whispered to Smith, “Think about it, how excited and thrilled cancer patients around the world have been since the Mayo Centre released all the information about your son’s treatment!”

“And think about it, there are so many cancer patients now, who among the dignitaries in the White House doesn’t have a friend or two with cancer?”

“They’re all looking forward to the drugs coming in! I’ve already fought hard to keep four boxes for your son!”

Smith’s face dawned on him.

He had understood the meaning of Rutgers’ words.

And it was well understood.

Like he said, who didn’t have a friend or two with cancer?

If they were distant relatives, it would be fine, but if they were close relatives, who wouldn’t want to save them as much as they did?

The 20 boxes of Jiu Xuan Zai Zai Pills were now their greatest hope.

Thinking of this, Smith could only compromise and said to Logos, “You must hurry them up, so that they can crack this medicine as fast as possible!”

“Don’t worry.” Rogues nodded and said, “This matter is now under my supervision as a supervisor, and from now on, all my energy is on this matter.”

Smith nodded and took the Jiu Xuan rejuvenation pills off his body and spoke, “Sixteen boxes for you, I’ll take the rest to the hospital for my son.”

Rogers shook his head and said seriously, “Smith, the envoy from the White House has said that all the teams that developed this medicine and all the patients that need to be treated with this medicine must be pooled together and supervised by the military.”

Saying that, Rutgers added, “That means you will have to receive your son into a laboratory provided by the military, the medicine will also be closely guarded by the military, and the medicine will be fed to your son by a doctor appointed by the military when he takes it every day.”

Smith asked, dumbfounded, “Is this so strict?”

“That’s not all!” Rogers added, “When your son first took this drug, the White House did not know about it, so they were not able to collect your son’s excrement in time, so from now on, any patient who takes the drug, their excrement will be collected by the military, no leaks will be allowed, all of this, all under strict control according to the highest biosecurity level!”

You know that no drug can be completely absorbed by the human body, and if the excrement carries the active ingredient, leaking it out is a risk, so we must guard against it before Jiu Xuan Pharmaceuticals itself officially launches this drug! We must not let a second country have the same opportunity!”

Chapter 3670

Soon everyone, including Smith, was in a military vehicle, heading for the top laboratory that had been prepared long ago.

This place had been taken over by the military and was being managed under the strictest controls.

Smith’s son, too, had been picked up from the Mayo Centre and sent straight here.

In addition to him, four other patients, with very strong connections, were also brought in.

A special medical team was set up by the military to take care of these five patients.

There was also an all-round filming team that was used to follow all the details of these five patients after they had taken their medication.

To Smith’s relief, his son finally took the Jiu Xuan Zai Zai Pills he had brought back.

Miracles continued to occur.

His son’s health indicators were improving and healing at a rate visible to the naked eye after taking the pills.

For the other four patients, the situation was even better than Smith’s son’s.

Since none of them had taken the Jiu Xuan Zai Zai Pill yet, they could clearly feel the unparalleled medicinal effects just after taking it.

All the relevant data made the researchers here excited, as they had witnessed the power of the Jiu Xuan Zai Zai Pill with their own eyes, which made them eager to conquer the drug.

Several teams, at the same time, began to conduct in-depth research on the Jiu Xuan Zai Zai Pill.

Almost all of the world's top pharmaceutical experts and related equipment were gathered here.

Different teams used different methods to study the ingredients of the Jiu Xuan Zai Zai Pills and soon came to a unified conclusion.

That is: the Jiu Xuan Zai Zai Pill is a purely natural plant ingredient, not some synthetic hormone or some new chemical product.

Everyone was very, very surprised when they came to this conclusion.

They had never thought that a purely natural plant ingredient could have such a powerful curative effect on cancer.

But right now, the results of their research on the Jiu Xuan Zai Zai Pills were precisely so anti-scientific.

In their view, to treat cancer, chemical drugs with extremely complex ingredients must be developed.

Just as there is indeed a natural anti-cancer drug within cancer called paclitaxel, although it is extracted from the purple shirt, it has to be chemically refined and concentrated, nearly thirty pounds of the bark of the purple shirt to extract one gram of the effective substance!

Moreover, if the patient chewed thirty pounds of yew bark directly, it would certainly be of no use whatsoever.

In a way, the treatment of anti-cancer drugs is just like building an atomic bomb, where the radioactive raw materials must be concentrated to a certain percentage to make it possible to succeed.

And there was no way that such a high concentration of radioactive material could exist in nature; the only possibility was to continuously purify and concentrate it through centrifuges, and use it only after it reached a weapons-grade concentration.

However, after they found out that the Jiu Xuan Recycle Pills were all purely natural plant ingredients, it gave them the feeling that it was as if someone had used a bunch of flowers and plants to create a 200,000 tonne TNT equivalent atomic bomb.

If they hadn't seen it with their own eyes, it would have sounded like a fantasy from heaven.

This confused all those top experts.

They even speculated that some kind of chemical reaction was taking place in the patient's body beyond what they knew about these natural plant ingredients.

So the teams soon began to work in reverse.

They labelled all the raw materials they had analysed and then bought a whole bunch of them as fast as they could and shipped them to the lab.

This was followed by various experiments and trials.

Since they did have a strong scientific base, within no more than 24 hours, one of their teams had found a formula that was almost identical to the Jiu Xuan Zhen Zhen Pills!

When the news broke, the whole laboratory was overjoyed.

Rogers immediately asked the team to take the reverse-developed drug and give it to the patients for trial.

Originally they were going to at least try the lethal dose of this drug on mice first, and then see what adverse effects it would have.

But time was of the essence, plus the fact that the drugs used for these were all natural ingredients and had very manageable side effects, so Rutgers decided, without thinking, to start the clinical trials directly on the patients.

The crowd gathered all five patients, including Smith's son, together and fed them intensively.

Smith was also thrilled to be involved, and at this point he, like the other doctors, was every bit as excited and confident.

After all, as far as they were concerned, a medicine that they could make with almost identical ingredients and ratios would be said to be an exact copy of the exact same thing.

The ingredients are the same, the measurements are the same, the ratios are the same, and then the effect must be the same.

Seeing that all five patients had taken the trial drug, Rogers said to Smith with confidence, excitement and contempt: "I'm telling you, this stuff is just like the Soviet MiG 25 fighter jets, you can't f*cking understand how the Soviets can fly a fighter jet to three times the speed of sound, faster than a missile, until you take it apart. You even thought for a moment that they had some kind of new top-of-the-line material, or even alien material."

"But when you actually get a MiG25 and take it apart, you realise that there is no f*cking new material, it's just a lot of stainless steel with no technical content"
