

Ye Chen 4841

Chapter 4841

By the time the plane took off, Yohiko Ito still looked a little sullen.

Before boarding the plane, Nanaiko took a picture of him standing on his prosthetic legs, wearing a tattooed hakama, and had the family maid carry him onto the plane immediately afterwards.

Half an hour after the plane took off and began its smooth flight, Nanaiko Ito rushed to work with her aunt to pack up food and cake for Yohiko Ito's 50th birthday in the air.

After lighting the candles and singing the birthday song, Nanaiko Ito coaxed him, "Odo-san, blow out the candles!"

At this point, Nanaeko Ito did not realise that her title for her father, Yohiko Ito, had changed from Father-sama, to Odo-san.

A few times she even used a slightly reprimanding tone without realising it.

I had no idea that this had suppressed Ito Yohiko's original arrogance, and after being reprimanded by his daughter, he lost his original temper and replaced it with a childlike aggression.

When he heard that Nanaiko Ito had asked him to blow out the candles, he grumbled, "I don't want to blow out the candles! It's too sloppy and perfunctory to be carried on a plane for such an important birthday as your fiftieth!"

Ito Nanaeko was slightly stunned, then smiled and said, "Odo-san! It's precisely because your 50th birthday is so important that you're being given two special occasions! Maybe Ye Chen-kun asked us to come over to celebrate your birthday too, and if you're not satisfied, I'll make up another one for you after we get off the plane!"

Ito Yuuhiko grunted, "Don't you lie to me, it's already after seven, I didn't wait to get off the plane and go over today, what's the point of having two birthdays?"

Nanaeko Ito said seriously, "Odo-san, have you forgotten that there is a time difference between Japan and America? New York is thirteen hours slower than us, but we can reach New York in eleven hours if we fly faster, and don't look like it's already dark when we take off from Japan, but when we land in New York, it won't even be dark yet!"

When Yohiko Ito heard this, he froze for a moment and then said in surprise, "Yes! How could I have forgotten about the jet lag!"

Seeing him smile, Nanaeko Ito said, "So Odo-san, blow out the candles!"

Ito Yohiko realised that he had made a mistake in his expression management and quickly said in a spirit of face again, "You think I would like to be forced to fly from one end of the earth to the other on my fiftieth birthday?"

Ito Nana-chan smiled and said, "Well Ondo-san, think of it as accompanying me to New York to see Ye Chen-kun, whom I have longed for, and if it makes your precious daughter happy, what is there not to like?"

Ito Yohiko heard this, the whole person drifted off for a moment, and then suddenly smiled, looking at the kimono-clad and pavilioned Ito Nana-chan, and could not help but sigh: "Nana-chan, Ondo-san really wants to see you get married sooner"

.....

At this very moment.

It was 8:30 in the morning in New York.

Ye Chen called Fei Kexin and opened his mouth, "Miss Fei make some hard arrangements, I want to go to the freezing centre to take a look at Li Yalin."

Without thinking, Fei Ke Xin said, "Okay Mr. Ye, Ke Xin will prepare the helicopter and pick you up at the top floor of the hotel within fifteen minutes."

"Good." Ye Chen then said, "See you later then."

Chapter 4842

"Okay Mr. Ye, see you later."

Fifteen minutes later, the helicopter Fei Ke Xin was on landed at the top floor of the Buckingham Palace Hotel.

Ye Chen took Su Ruoli, as well as Chen Zekai and Hong Wu, and boarded the helicopter together.

Half an hour later, the helicopter arrived above a remote building on the outskirts of New York City.

This was the Fei family's medical technology centre.

The building was the only one within a two-kilometre radius and was 25 storeys high, with very tight security around it.

As soon as he got off the helicopter, Fei Ke Xin took the initiative to walk ahead, leading the way while saying to Ye Chen, "Mr. Ye, this is a medical technology centre that grandfather funded before, mainly to develop and test some relatively high-end and advanced treatments and drugs, including the most advanced proton therapy system and cellular immunotherapy in the current cancer field, all of which are available here, and they are the best in the world."

At this point, Fei Ke Xin remembered something and added, "Oh yes Mr. Ye, you should have heard of the Mayo Clinic, right? It is known as the world's top cancer hospital."

"I've heard of it." Ye Chen nodded and said, "Mayo has a long-standing reputation worldwide, there should be very few people who don't know about it."

Fei Ke Xin smiled faintly and said, "The members of our cancer team here overlap with Mayo by more than 60%, and their top experts, who also serve here, even go a little further than Mayo in terms of

cutting-edge scientific research, after all, Mayo itself has to consider profit, but here there is no consideration for profit.”

The freezing centre is located on the fifth floor of the basement and is designed to operate for three hundred years, and grandpa said before that if he left, he would be sent here immediately to freeze, to give the future a chance. A ray of life, maybe the technology two or three hundred years later can bring him back from the dead.”

Ye Chen nodded and sighed, “It seems that maintaining such a medical research institution costs the Fei family quite a lot every year.”

Fei Ke Xin sighed, “At least a billion dollars a year to start with, and there were times at the peak when they were burning two to three billion dollars a year.”

The medical industry is like that. The medical industry is like this, although the input cost is high, but once the top special drugs or very good new treatments are developed, it’s not difficult to earn one or two hundred billion dollars a year, bet on a single product, it’s possible to turn a loss into a profit.”

Ye Chen agreed and said, “In the medical industry, the biggest fear is not to invest in research and development costs, some pharmaceutical companies, for a few years or even decades, just hold on to a few drugs, it is difficult to make any social contribution, or to invest a lot of money in research and development to benefit society.”

Fei Ke Xin nodded and said seriously, “Mr. Ye is right, for the medical industry, R&D is very important, so after I took over the Fei family, instead of scaling down the budget here, I added a flexible budget of 30% tract 50% on top of the original one.”

As the two talked, they had arrived at the top floor lift entrance.

At that moment, the lift came up just in time, and when they opened, three men came out of it. One of them recognised Ye Chen at a glance, and immediately afterwards, he said to Ye Chen with great excitement, “Mr. Ye! My goodness! It’s really you, Mr. Ye!”

Ye Chen frowned and looked at the man who was speaking in front of him, then he was surprised to find that the man in front of him was James Smith, the head of the US FDA, whom he had contacted before!

Chapter 4843

When James Smith saw Ye Chen, his whole person was incomparably surprised, and at the same time, he also had a kind of excitement like grabbing a lifeline in a desperate situation.

Ye Chen asked curiously, “Mr. Smith, why are you here?”

Smith subconsciously replied respectfully, “Back to Mr. Ye, the FDA has several clinical projects that are in collaboration with Fei’s Medical Technology Center, I came here today to complete some routine work

After saying this, before Ye Chen could say anything, he threw himself on his knees and said with more than a few tears in his eyes, “Mr. Ye, for some time now, I have been especially hoping to meet with you again, but I have never had the chance, I have been to Jinling several times, but the people from Jiu Xuan Pharmaceuticals and that Master Hong Wu are not willing to help me with the match

Master Hong Wu even charged me several times for the introduction fee, but just kept dragging his feet and not helping me out

The Hong Wu behind Ye Chen bristled and spoke, "You foreign devils are so determined to see Mr. Ye that you are not good at all, I still don't f*cking know you? Don't you want to buy the Jiu Xuan Recycle Pill from Master Ye and bring it back to the United States for reverse research and development? I'm telling you, I won't refund any of the referral fees you paid, so sue me if you can!"

When Smith heard this, his whole body was startled, and only then did he realise that Hong Wu was following behind Ye Chen.

He scrambled to explain to Ye Chen, "Mr. Ye I want to find you not to reverse the research and development of the Jiu Xuan Recycle Pill, I am sincerely trying to introduce the Jiu Xuan Recycle Pill into the American market for sale as the head of the FDA"

He added, "In addition to that, there is my son's illness The twenty boxes of Jiu Xuan Zai Zai Pills that I bought from you before were all raided by the privileged cla*s in the White House, and very few Jiu Xuan Zai Zai Pills could actually be used for my son's treatment. His condition had easily improved a bit before, but since there have been no Jiu Xuan Zai Pills So So recently his condition has started to deteriorate again"

Speaking here, he couldn't help but choke up, "Mr. Ye, my son is only twelve years old this year, yet he has been suffering from cancer for several years, if you don't save him, I'm afraid he won't survive this summer!"

Ye Chen looked at him, smiled slightly and spoke, "Smith, Jiu Xuan Pharmaceutical originally wanted very much to bring the Jiu Xuan Recycle Pill to the United States, but what happened there, I think no one knows better than you, right?"

"At the beginning it was because of your personal arrogance and prejudice that you rejected our medicine on the spot, and at the same time you also spoke out against the manager of Jiu Xuan Pharmaceuticals, Wei, who saw that the child was really pitiful and did not want him to die because of your arrogance and stupidity, so he left you a box of Jiu Xuan Zeng Zai Pills!"

"Later on, you bought our medicine to do reverse R&D. Don't think I don't know anything about this matter, your United States has always been labeled as the most important country in the world in terms of intellectual property rights and patent protection, but the FDA even led the reverse R&D of our medicine together with the US military, which is itself a shameless act with no professional ethics and no concept of intellectual property protection! This is a shameless act that has no professional ethics and no concept of intellectual property protection!"

Saying that, Ye Chen continued, "After that, Jiu Xuan Pharmaceutical captured a large number of American agents, almost all of these American agents were sent to China by the US military and the US Central Intelligence Agency, what exactly did they want to do by sneaking into Jiu Xuan Pharmaceutical, you should know very well without me saying it, right?"

Smith was instantly ashamed.

As the head of the FDA, this matter was actually more than clear to him.

After proving that the Jiu Xuan Zai Zai Pill had excellent therapeutic effects on cancer, the White House was very keen to get hold of the core formula of this medicine.

In the US, although people usually say that they should respect intellectual property rights, this kind of bullsh*t is completely out of sight.

If JK Rowling had written Harry Potter, which was lucrative but of no strategic value to the United States, the White House would not have been interested in the book, let alone doing anything to infringe on it.

But if another country or another company found any patent of strategic value, then the White House would definitely be the first to find a way to get its hands on this patented technology.

The miracle of the Jiu Xuan Zai Zai Pill is that it does not matter what kind of cancer a patient has, nor does it matter what kind of stage a patient has reached, even if the patient has metastasized throughout the body, or even has caused organ failure and can die at any time, as long as he takes this medicine, he can get better immediately!

If this medicine was only used to make money, it would be able to attract money all over the world, and both the rich and the poor would put their life savings into the hands of Jiu Xuan Pharmaceutical once they had cancer.

If this drug is considered a strategic material, it will not only make money from other countries, but can even be used as a bargaining chip to force the other side to make more concessions.

Therefore, the first thing on the White House's mind was that they had to get something this good!

Chapter 4844

Smith could see Ye Chen's dissatisfaction and choked up, "Mr. Ye, this matter you are talking about is beyond my control, after all, I am only the head of the FDA, responsible for the approval and regulation of drugs, as for whether the military and the CIA send agents, I really don't have the ability to interfere"

Saying that, Smith looked at Ye Chen and begged bitterly, "Mr. Ye, I am only begging you now to see that I am the father of a cancer-stricken child and sell me some more Jiu Xuan Zhen Zhen Pills so that my son can survive"

Ye Chen smiled blandly and spoke, "Sorry, there is something I didn't tell you, because the raw materials and production capacity of Jiu Xuan Rejuvenation Pills are extremely limited, so, after Jiu Xuan Pharmaceutical's deliberate decision, Jiu Xuan Rejuvenation Pills will give up overseas markets indefinitely, you listen carefully, it is to give up all overseas markets, not just for the United States."

In fact, Jiu Xuan Zai Zai Pills, was what Ye Chen had specifically made out to stimulate the FDA.

At that time, the FDA had a very hostile attitude towards proprietary Chinese medicines, so Jiu Xuan Pharmaceutical's Jiu Xuan Stomach Pill, Jiu Xuan Liver Protection Tablet and Jiu Xuan Solid Gold Pill all had a hard time pa*sing the FDA's review.

The inability to pa*s the FDA review does not only mean that these three medicines cannot be marketed in the United States.

This is because, throughout Europe and the United States, there are many countries that draw very deeply on the US FDA for their standards in medicine.

If a drug passes the US FDA review, many countries in Europe and the US will open their doors to the drug.

But once the drug is rejected by the US FDA, the vetting process for this drug in other countries will also be many times more stringent, and will even be the same as the FDA, refusing approval.

This is why Ye Chen used the Blood Dispersing and Heart Saving Pill, together with the Jiu Xuan Solid Gold Pill, to create the Jiu Xuan Zai Zai Pill, which was regarded by the FDA as the number one effective medicine for cancer.

However, this Jiu Xuan Zai Zai Pill was not a drug that could be truly mass-produced.

Moreover, the Jiu Xuan Reclaim Pill had already made a name for Jiu Xuan Pharmaceutical, and in this case, the mission of the Jiu Xuan Reclaim Pill had been successfully completed.

When Smith heard Ye Chen's words, his eyes burst into tears and he said in tears, "Mr. Ye, I heard that Jiu Xuan Pharmaceutical has free intensive treatment for end-stage cancer patients with difficult families in China, I beg you, can you give my son a place, my little Jimmy is too pitiful, I can't bear to see him continue to suffer from cancer

Ye Chen said with a serious expression, "You said it yourself, Jiu Xuan Pharmaceutical's free medical treatment is for end-stage cancer patients with family difficulties, the primary condition is family difficulties, this point, it seems that you and your son do not meet the criteria, what's more, this activity is strictly speaking, only for Chinese patients, countless Chinese patients are still unable to wait for this opportunity, how can I possibly give a valuable spot to a foreigner who doesn't meet the criteria at all? So sorry, there's nothing I can do to help you with this."

Smith cried, "Mr. Ye, but if you don't help him, he will die soon, you can't just stand by and watch a twelve year old kid lose his life to cancer"

Ye Chen nodded and said seriously, "When it comes to the issue of death, countless people die every day due to the disease, there are also many children among them who are about the same age as your son or even younger than him, we cannot and do not have the ability to cure everyone."

"So Mr Smith, moral kidnapping is a cheap tactic that doesn't make any sense to us!"

"Instead of morally kidnapping me here, why don't you ask drug companies like Ruihui and Novartis why they continue to set the prices of their drugs so high when so many children die from leukaemia every year around the world? Why don't they distribute the drugs to every child who has leukaemia?"

"There are so many children in Africa who still don't have enough to eat, 100 million American families could feed and clothe 100 million African children if they gave one aid to each family, and if they gave two aid to each family, I'm afraid the hunger problem of African children would be completely solved, but why don't you do that?"

"Apple makes \$50 billion a year, why do you watch those fools sell their kidneys to buy an Apple phone, why not just give one to them?"

“Elon Musk’s Tesla’s global sales will exceed one million units this year, but there are so many people in third world countries who can’t afford to buy a car, why doesn’t Tesla give them a car?”

Ye Chen saw that Smith was speechless for a while, so he said blandly, “In fact, you know in your heart that the first goal of a business is to survive, and the second goal is to make profits. This is the law of the market.”

That’s the law of the market.” As he said that, Ye Chen added: “So let’s put it back, we’re all adults, let’s not use such tricks as moral kidnapping, it’s too low.”

Smith’s expression, at once, fell into despair.

Ye Chen then remembered something and added: “Oh yes, if you want to really want to do something to save your son’s life, you should first show enough sincerity.”

Smith blurted out, “I have enough, 100 percent sincerity!”

Ye Chen said indifferently, “Then I suggest you quit your job, take your son to China, do your best to do some charity work in China first, without expecting anything in return, and if you do put your heart into it, perhaps Jiu Xuan Pharmaceuticals can give you a chance.”

If you do put your heart into it, maybe Jiu Xuan Pharmaceuticals can give you a chance.” He said, and then reminded, “But you have to remember, when I say this, it doesn’t mean that you will get what you want in return if you give, but in this society, if you want to give back, you have to give first, not to mention, you have to pay for your own arrogance and prejudice towards Jiu Xuan Pharmaceuticals. So if the final result is disappointing to you, you should look for the reason from yourself first!”

Chapter 4845

Hearing these words from Ye Chen, James Smith’s entire person was somewhat at a loss for words.

He was the head of the entire FDA, not only was he properly upper class in the United States, but he was also an absolute high elite group.

And Ye Chen’s light-hearted words actually made him quit his current job and give up everything that he had worked so hard for. This was indeed something he hadn’t expected.

Seeing that he was at a loss for words, Ye Chen said indifferently, “This is just my personal advice, you should go back and consider it yourself, I have things to do, so I won’t talk to you anymore.”

After saying that, he looked at Fei Ke Xin beside him and spoke, “Miss Fei, let’s go.”

Fei Kexin nodded and made an invitation gesture, respectfully saying, “Mr. Ye this way please.”

Smith watched Ye Chen and Fei Kexin walk into the lift, and watched the lift doors slowly close, while he himself remained kneeling in place without any other movement.

The companion beside him stepped forward to help him up, but he waved his hand and refused.

Then, as if he had figured something out, he took out his mobile phone and called the Secretary of the US Department of Health and Human Services, his immediate supervisor.

In the US administrative structure, the FDA, also known as the US Food and Drug Administration, is part of the Department of Health and Human Services, which is responsible for the appointment and removal of personnel at the FDA.

The call was answered, and the Secretary of Health and Human Services inquired over the phone, "Hey James, what can I do for you?"

James Smith said seriously, "Minister, I am solemnly requesting your resignation from any future employment or position with the FDA."

The Minister was surprised and asked, "James, what is your situation? If I remember correctly, you told me when you and I were at university that it was your greatest dream to run the FDA, but you are now resigning after just two years in the job?!"

Smith said firmly, "That's right, I've decided to resign from my position at the FDA and take Jimmy to China."

"To China?" The other party hurriedly pursued, "Are you taking Jimmy to Jiu Xuan Pharmaceuticals?"

Smith hesitated for a moment and sighed, "Half and half, I just met with someone from Jiu Xuan Pharmaceuticals, but he doesn't seem prepared to give me any more Jiu Xuan rejuvenation pills by any means, all I can do now is take Jimmy to China, do some charity work there and see if I can get Jimmy a chance in return"

The other party was silent for about ten seconds, and then said helplessly, "Jimmy's situation, I've heard the head of Mayo talk about it, there doesn't seem to be any other good way to do it now, except for the Jiu Xuan Zai Zai Pills"

Saying that, he let out a long sigh and said, "James, I know that to you, Jimmy is more important than anyone or anything else, since your mind is made up, then I won't say any more nonsense, you go back and write your resignation report, I will pa*s the application in the shortest time possible."

"Good!" Smith said gratefully, "Thank you Xavier, I will send you the resignation report as soon as possible!"

.....

Meanwhile.

Ye Chen, led by Fei Kexin, took the lift to the ground floor of the building, then pa*sed through the three defence centre on the ground floor and transferred to the special lift to the freezing centre on the fifth basement floor.

As this freezing centre was prepared by Fei Jianzhong for the preservation of his body and was designed to last for 300 years, it was no less secure than the defence facilities for the President to hide in during the Doomsday Project.

Chapter 4846

Although the Frozen Centre is five levels underground, it is located nearly 100 metres below ground and is well stocked with strategic reserves, so that even if a nuclear strike were to occur on the US mainland, it would be safe and sound.

The freezing centre, according to its design scale, is capable of freezing at least a hundred bodies, but at present, apart from the experimental remains, the only person who is actually frozen is Li Yalin.

After Ye Chen arrived at the freezing centre, he found that the place was like a scene from a science fiction movie, the whole space was filled with all kinds of equipment, and there were a large number of pipes specially designed to transfer air, oxygen and liquid nitrogen.

In addition, the biggest visual impact was the hundreds of large stainless steel tanks standing in the freezing centre, each of which was at least four or five metres high, giving people a sense of insignificance when looking up from below.

These tanks are the “freezers” used to freeze the human body.

For the sake of secrecy, Fei Ke Xin had already transferred all the scientific experts and staff of the freezing centre in advance, so at the moment, the whole freezing centre, with only Ye Chen and his group, looked very cold and clear, and combined with the fact that this kind of place was originally a cold store for storing human bodies at ultra-low temperatures, it gave people an even more gloomy feeling.

At this moment, Fei Kexin said to Ye Chen at the side, “Mr. Ye, according to the current standards of human freezing technology, after a person dies, he or she will go through a procedure of up to fifty hours of cooling, gradually lowering the temperature before being put into a freezing tank to freeze, in order to prevent the cells from producing ice crystals during the extreme cooling, thus damaging the cells.”

Saying that, Fei Ke Xin added: “However, right now the technology of freezing and then thawing has only been half conquered, the safe freezing process has not been a big problem, but thawing is still a huge problem that cannot be solved, and until now, there has not been a single case of successful thawing in the world

Ye Chen nodded, pointed to the rule-lined stainless steel jars in front of him and opened his mouth to ask, “Which jar is Li Yalin in?”

Fei Ke Xin spoke, “He’s in tank number seven.”

“Good.” Ye Chen said, “Have someone drain the liquid nitrogen from tank seven and get him out, it’s time to let him thaw out and go home.”

Fei Ke Xin said in horror, “Mr. Ye Once the body starts to warm up, the cells will probably suffer irreversible damage during the warming process, in which case, I’m afraid the person will be like a frozen steak, with broken cells and blood flowing everywhere, and if it comes to that, there will be no possibility of resurrection

The reason why this place is designed for a life span of three hundred years is that scientists predict that it will be very difficult to solve the irreversible damage caused by thawing the human body at ultra-low

temperatures in the next one or two hundred years, so we can only freeze people for a long time and leave it to humans to solve in the next few hundred years, when science has advanced significantly

Ye Chen looked at the stainless steel tank with the words No.007 sprayed on it, smiled slightly and spoke, "No need to wait for scientific progress, let's solve this problem today, I have a way to bring him back to life!"

Fei Ke Xin's jaw dropped as she listened, she was just about to say something, but once she thought about the fact that Ye Chen himself was no ordinary person, and that he was able to come up with a miracle drug like the Spring Return Pill, which was described as a bug, saving Li Yalin might not be impossible.

Besides, if he hadn't been certain, Ye Chen wouldn't have allowed himself to freeze Li Yalin up in the first place.

Thinking of this, she hurriedly asked Ye Chen, "Mr. Ye, if you really have a way to revive Li Yalin, then if Li Yalin wakes up and sees you, will he be suspicious of your identity? With his character and style of acting, he will definitely continue to trace it to the end after he wakes up"

The first thing I want to do is to have an open and honest chat with him when he wakes up, and after all the trouble of saving his life, I have to let him know who I really am!"

Chapter 4847

Ye Chen certainly knew Li Yalin's style of action.

As long as he reawakened, as long as he still retained his previous memories, he would definitely try his best to investigate what had happened before.

For example, who had actually killed that scum pervert Fei Hao Yang of the Fei family; or for example, who had actually tried to wipe out the entire An family.

So, in Ye Chen's opinion, he might as well take this opportunity to have a good chat with Li Yalin.

Let him know who he was, let him know that he had killed Fei Hao Yang, and more importantly, let him know that he had saved him and the entire An family.

If this person knows what is right and what is wrong, then he will definitely be able to use himself in the future.

But if he doesn't know what's right and what's wrong, why not erase his memory and throw him into a coma on the streets of New York?

That way, at least, he would have saved his life.

Having made up his mind, he said to Fei Kexin, "Miss Fei, have someone drain the liquid nitrogen from the freezing tank and put Li Yalin into the warm water, I'll take care of the rest."

"Okay Mr. Ye!" Although Fei Ke Xin did not know exactly how Ye Chen planned to save Li Yalin, she had blind admiration and trust in Ye Chen, so she said to him, "Mr. Ye, for the sake of confidentiality, you,

Miss Su, Mr. Chen and Mr. Hong will wait next door for a moment, I will arrange for someone to come and thaw him out, and then I will invite you after the thawing is complete.”

Ye Chen nodded, naturally the fewer people knew about his saving of Li Yalin, the better.

These few people in front of him were all absolutely trustworthy, but the credibility of the staff was still more or less difficult to guarantee, and Fei Ke Xin’s arrangement was considered cautious.

So, Ye Chen went to the lounge next door with Su Ruoli, Chen Zekai and Hong Wu.

Fei Kexin, without thinking, asked the person in charge of the freezing centre to immediately drain all the liquid nitrogen from the No. 7 freezing tank.

When the person in charge of the freezing centre heard this request, he immediately turned pale with fear and explained one after another, “Miss Fei, at present the human body freezing is still in a one-way channel state, we can freeze people safely, but we do not know how to freeze them safely, once the liquid nitrogen is emptied, I am afraid it will cause irreversible damage to the people in the freezing tank ah ”

Fei Ke Xin said with a firm expression, “You don’t need to worry about this, you just need to drain the liquid nitrogen and put the person into warm water to thaw it out.”

The person in charge, dizzy from hearing this, blurted out, “Miss Fei This This is not as simple as taking a piece of frozen meat from the fridge and putting it in warm water to melt it

Fei Kexin said indifferently, “You just have to do what you are told.”

The person in charge had no choice but to agree.

The staff then shut down the liquid nitrogen circulation device in tank 7 and then used the pressure facility to empty all the liquid nitrogen in the tank.

Immediately afterwards, four staff members in anti-freeze suits took Li Yalin’s rigid body, which was nearly two hundred degrees below zero, out of the frozen tank.

At the same time, another group of staff had prepared a pool of warm clean water in a special sterile washing pool, where Li Yalin’s body had been cleaned when he was brought here, and then put into a special freezing suit and cooled down to the extreme temperature of minus two degrees Celsius after two days and nights of procedures.

However, none of these staff members expected that they would now have to use this simple and brutal method to thaw out Li Yalin.

Chapter 4848

As Li Yalin’s entire body was a minus two hundred degrees ice lump, the pool full of warm water cooled down extremely fast the moment he entered, the staff hurriedly turned on the circulation pump, allowing the heating unit to circulate and heat the water in the pool in order to maintain a water temperature of 40 degrees Celsius.

The rough thawing method soon showed its great drawbacks.

As soon as Li Yalin's skin began to thaw, it immediately began to ooze blood, as if a piece of beef had just been thawed, the fluid inside the cells all began to ooze outwards mixed with cellular fluid and blood and body fluids due to the rupture of the cells.

The person in charge covered his face in horror and said, "Miss Fei This This is basically irreversible damage already"

Fei Ke Xin also looked shocked, but said calmly, "All right, there is nothing more for you here, all of you should leave."

The crowd looked at me, I looked at you, finally the person in charge took the lead, he put his heart into it and spoke, "Miss Fei, then we will go out first, if you have any needs, contact us in time."

Fei Ke Xin nodded and watched as the staff members left the scene one by one.

She was about to go and call for Ye Chen, but to her surprise, Ye Chen had already walked out from within the lounge.

Fei Ke Xin looked at Li Yalin, who was soaking in a pool of blood, and said to Ye Chen nervously, "Mr Ye Li Yalin's situation might not be too optimistic"

Ye Chen said indifferently, "Don't worry about it, as long as his brain is okay."

The reason why Ye Chen was so brutal in asking to thaw Li Yalin directly with warm water was down to the indiscriminate repairing ability of the Remodeling Dan.

For the Remodeling Dan, of all the organs and tissues in the human body, it only had the brain and the memories in the brain that could not be repaired, the rest did not matter.

Li Yalin's brain, on the other hand, had always been protected by Ye Chen's aura, so even if he had suffered serious damage to his cells as well as his body during the thawing process, it was simply irrelevant.

After all, his body had already been beaten into a sieve a long time ago, so even if there was more damage, it didn't matter, it would just be handed over to the Remodelling Dan later to fix it all together.

If he wasn't worried about making the whole frozen centre smell like stewed meat, Ye Chen would have wanted to have someone use 100 degree boiling water to speed up his thawing, unlike what he was doing now, where he had to wait patiently for him to thaw a little.

About an hour later, the continuous circulation of warm water finally allowed Li Yalin's stiff body to begin to gradually warm up. Fei Ke Xin remembered something at this point and hurriedly said, "Mr. Ye, the blood in Li Yalin's body was drained before freezing and all of it was replaced with cryoprotective fluid, this The actual fact is that you will not have any effect, right? Do I need to prepare the appropriate plasma in advance?"

"No need." Ye Chen, as if he were a charlatan, waved his hand with a big grin and said, "These are all minor matters, next, is the moment to witness the miracle."

With that, he stepped in front of Li Yalin and turned on the drain switch of the pool, draining all the warm water from the pool, and then, he took out a remodelling pellet from his pocket.

Ye Chen couldn't help but place the Remodelling Pill in his hand and examine it for a moment, sighing in his heart, "I would never have dreamed that the first person to be saved by the most precious pill I've made so far would be this American policeman who has been investigating me and trying to catch me."

"If it wasn't for the fact that you died because of the An family, I really didn't want to waste such a precious elixir on your body, just think of it as helping my grandparents' family and returning a favour to you!"

Thinking of this, Ye Chen sighed, pinched open Li Yalin's mouth and put the golden reshaping pellet into his mouth

Chapter 4849

The moment the Remodelling Pill was placed into Li Yalin's mouth, Ye Chen could feel that Li Yalin's body was, almost, wrapped in a dense aura.

The aura then began to reshape his body.

Although Li Yalin's body was wrapped in a special frozen suit, and he could not see the changes inside the frozen suit at all, Ye Chen could feel that Li Yalin's body, which was riddled with holes, was being reorganised at an unbelievable speed.

The first organ that Li Yalin recovered was his heart, his almost shattered heart, which had by now completely recovered its health, and immediately afterwards, it started beating again.

However, at this time, the blood vessels in his body were no longer filled with blood, and instead, they were filled with cryogenic protective fluid.

However, under the effect of the Remodelling Pill, the blood-producing organs in his body had begun to recover one by one, gradually, and immediately afterwards, a large amount of fresh blood was continuously created, while the original cryogenic protective fluid was directly expelled from his body by the pressure of fresh blood.

And then, his body, began to regain its autonomous temperature, and at the same time, all of his body wounds, also began to heal in the fastest time possible.

The others could not see the change in Li Yalin, they only noticed that his complexion seemed to start to change from a miserable white to a slightly blood-coloured one.

However, Ye Chen saw all the changes in Li Yalin's eyes and sighed in his heart: "The Remodelling Pill is really worthy of the word Remodelling. It's like a gla*s that has fallen from a height and been shattered into pieces, if you just glue every single gla*s fragment back together, then this can definitely not be considered as remodelling. cracks, not a trace, before it can be considered a remodelling!"

"The part that is broken, it can fix it for you, the part that is lost, it can grow back for you, this kind of elixir, it is really overbearing!"

At this time, Li Yalin's body organs, limbs, and even blood, had all returned to the level they were at when they were fully healthy, and as his blood continued to replenish until it reached a normal blood volume, his heartbeat became more and more powerful.

At the same time, he gradually regained the ability to breathe on his own.

Others could already see the rise and fall of his chest cavity with their naked eyes.

Fei Ke Xin's whole body felt like a thunderstorm, and said in shock, "Mr. Ye Li Li Yalin is really alive?!"

Ye Chen nodded and said indifferently, "It's almost time to wake up."

As soon as the words left his mouth, Li Yalin slowly opened his eyes!

Fei Ke Xin subconsciously took a step back at this point, her heart still racing like a million horses.

Although she had guessed that Ye Chen must have a way to save Li Yalin, she really didn't expect that it would be so quick and easy, just a pill that could revive Li Yalin in such a short period of time!

You know, this man had been in a low temperature of nearly minus two hundred degrees, for many days, not to mention saving him, it would have taken several hours just to thaw the freeze, and he had come back to life just by saying so?

Hong Wu's feeling was even more shocked, he couldn't help but exclaim out of his mouth: "Crap The first thing you need to do is to get a new one. That big lump of ice just now, it's f*cking alive so soon?!"

Li Yalin was still blinking his eyes at this moment, because his visual nerves could not immediately adapt to the bright light at this moment, his eyes only felt white and he could not see anything clearly.

To Li Yalin, it was like he was having a never-ending dream.

If he had been told that he had been dreaming for 100 years, he would not have had any doubts, because that dream was, indeed, too long.

During this dream, his consciousness was increasingly chaotic.

He felt more and more as if he had fallen into a world like the one framed in the movie "Inception", falling through multiple dream states, and the more he fell, the further he was from waking up.

And the more he fell, the more the sense of time became blurred, as if the timeline was enlarging, and the day he had been unconscious no longer seemed to be a day, or not just a year, but a century long, to the chaotic senses.

What he did not know was that in the extreme deep freeze, his brain, although still alive, had also entered an extremely slow metabolic state due to the extreme cold.

Chapter 4850

The freezing, in itself, was stretching the timeline of this body of his.

A human body in this condition is like a piece of meat that, if it is not frozen, will rot after three days at most, but if it is frozen at extremely low temperatures for three years, thirty years, or even three hundred years, I am afraid it will not go bad.

It was this infinitely elongated timeline that had caused his consciousness to verge on chaos.

At this moment, although he had opened his eyes, he still felt as if he was still in that never-ending sleep.

But at this moment, he suddenly heard a man's voice: "Li Yalin, can you see me clearly now?"

Hearing this voice, Li Yalin's heart shook.

It was strange, for so long, no voice had appeared in his dreams.

Even when he dreamed of his wife and daughter, and of his deceased father, the images were like early mime movies with no sound and only images.

This, on the other hand, was the first time he had heard a voice, a real voice.

Only, this voice was very strange to him.

What was even stranger was that although the voice was unfamiliar, there seemed to be something indescribably familiar in the strangeness.

He could not help but murmur in his heart, "I must Where did I heard this voice before"

"It's just that Too much time has pa*sed All of a sudden Can't recall"

But just at that moment, his vision began to gradually return.

Before his eyes, too, was no longer a bright white.

He could already see the stainless steel tanks that towered over him, looking eerie and spooky.

Then, his vision began to become clearer and clearer, as if the fogged-up gla*s of the bathroom had suddenly been blown by the hot air of a hair dryer.

At that moment, he realized that he was lying in a sink that was bigger than the bathtub.

And on the edge of the pool, there was a man standing there!

As he fixed his eyes on it, his whole body trembled with fright!

At that instant, a large number of memories that were already far away began to return at the speed of light.

The first memory that came back was the image of him leaving the stadium and preparing to meet his wife and daughter, only to be killed by a group of tough bandits just as he reached the lift.

Immediately afterwards, the memories began to rewind from that moment backwards.

He remembered his conversation with the An family, his annoyance at being forced into early retirement, the multiple murders including Fei Hao Yang's

And then, he suddenly remembered Ye Chen's handsome face.

Immediately, his jaw dropped as he looked at Ye Chen and blurted out, "It's you! I remember you! You're the staff member beside that actress! What's that actress' name again Oh yes! Gu Qiuyi! It's

Gu Qiuyi! She's the reason why Fei Hao Yang disappeared! I remember now! The day Fei Hao Yang disappeared, you were with that Gu Qiuyi!"

Ye Chen nodded and smiled, "That's right, it was me."

Saying that, Ye Chen grunted and spoke, "By the way, let me introduce myself, I'm not a staff member beside Gu Qiuyi, my surname is Ye, and my single name is the word Chen."

"Ye Chen?" Li Yalin frowned and subconsciously said, "Why is this name a bit familiar"

Ye Chen's expression was austere as he said aloud, "Familiar should be because I've heard the An family members talk about it, right? To introduce to you in depth again, my father's name is Ye Chang Ying, and my mother you should know, she is the eldest daughter of the An family, An Cheng Qing!"
