

Ye Chen 4951

Chapter 4951

At one point, Ye Chen felt that finding the exact address of the Five-Four-Seven lineage of dead soldiers would be as difficult as ascending to heaven.

The reason for this was that the mysterious organisation controlled the dead soldiers extremely closely, not allowing them to sense the exact time, nor the light, temperature, sound and seasons of the outside world.

Therefore, the Five-Four-Seven do not even know which of the seven continents they live in, let alone whether they are in the tropics or the cold zone.

Even if the only living person could not produce any substantial clues, it would be even more impossible for outsiders to find the place.

But Li Yalin had found exactly the clues that the mysterious organisation could not control.

Earthquakes, tsunamis and typhoons are all powerful natural phenomena. If a strong bunker can still isolate typhoons and tsunamis, even a strong bunker cannot isolate the strong tremors caused by earthquakes.

Those imprisoned in the shadows, or in some kind of underground fortification, may not be able to perceive the sun or the stars, the real sounds and temperatures of the outside world, but when an earthquake strikes, no matter how deep they are underground or in a cave, they are bound to feel it.

Moreover, violent earthquakes do not happen often, and if they have happened before, one does not need a very precise timeline to be able to judge an approximate one, so that as long as the clues match relatively well, the odds are that they will correspond.

However, Li Yalin was not overly optimistic, he said to Ye Chen with a grave expression, "Young Master Ye, the live one you mentioned is the only clue that can be found at the moment that has a connection to that mysterious organisation, if I can successfully find their premises, only then can I possibly find a clue to the mysterious organisation behind it, but if I can't find their premises, or if by the time I find it they have already evacuated this group of dead soldiers, then I'm afraid the trail will be completely cut off, after all, the mission of that group of dead soldiers failed completely last time, maybe that mysterious organization will move all the dead soldiers to other places out of caution."

Ye Chen nodded and said seriously, "I think, the odds are that they won't evacuate, think about it, why would they go to such great lengths to hide this garrison and even use all their efforts to block the perception of these dead soldiers? It's because such a compound takes a long time and costs to select, build and maintain, and cannot be replaced easily, that's why they want to make sure that these dead soldiers who are sent out on missions know nothing about where they live, so that even if they fail and are captured, they can't give up tangible information about this compound."

Li Yalin nodded and said, "It would be best if this is the case, the dead soldiers' quarters must be closely guarded by the core members of this organisation, as long as we can find this quarters, we will be able to follow the trail and find the veins of this mysterious organisation."

Saying that, he looked up at Ye Chen and asked, “Young Master Ye, with my years of experience as a police officer, I have concluded an immutable truth, and that is: contact is always mutual.”

Ye Chen said indifferently, “Inspector Li might as well expand on it.”

Li Yalin said, “After watching too many police movies, one would think that the police always seem to be able to find the criminals without them being aware of it and keep them firmly in control until they are eliminated, but those kinds of criminals are all relatively low level.”

“There are quite a few highly intelligent criminals who have a very keen sense of smell, and when we have just found a clue to him and have not even locked his identity, he has already found us, and by the time we try to dig deeper for clues, the other party has long disappeared.”

“This organisation you’re talking about is extremely powerful, and once I really start to reach out to them, it’s likely they’ll find me too.”

“Moreover, this is not the police catching criminals, the police catching criminals, normally the worst outcome is just that the person runs away and is not caught, but this mysterious organisation is so much stronger than me, maybe even stronger than you, once we make contact with them, then the situation is likely to get out of control and we might even be exposed to them. “

Chapter 4952

At this point, Li Yalin said with a grave expression, “Young Master Ye, I am telling you this not because I am afraid of death or backing out, after all, you saved my life, and my wife and children are here today thanks to you, even if I die, it doesn’t matter, I just hope you can prepare well in advance, on the one hand, protect yourself, on the other hand, if you can, please try to protect protect my family well.”

Ye Chen was silent for a moment and said with a solemn expression, “Detective Li, what you need to do right now is to work with Five Four Seven, using your professional skills, the natural disaster data you have in your hands, and Five Four Seven’s memories, in a no-contact state, first lock the other party’s location, if you really need to make some contact, I will personally take action, without you having to take any risks. ”

Li Yalin hurriedly explained, “Young Master Ye, I am not afraid of taking risks

Ye Chen nodded: “I know, and I don’t doubt your guts, but like you said earlier, contact is mutual, it’s prudent, if you really need to make contact, it’s definitely more prudent for me to make contact than for you to make contact, so you just do the preliminary investigation, and leave the rest to me to decide.”

Li Yalin’s purpose was to remind Ye Chen that he must be careful and cautious again.

Seeing that Ye Chen had accepted his advice, Li Yalin also put his heart down and spoke, “Young Master Ye, in that case, then I have nothing to worry about, and I will tell you first when I have made progress.”

.....

Evening.

While Ye Chen drove back to Providence, Li Yalin took a Virgin Atlantic flight to Beirut, the capital of Lebanon, via London.

After a twelve-hour flight, after the plane had landed in Beirut, Wan Breaking Jun personally used a helicopter to pick him up at the Ten Thousand Dragons Temple's base in Syria.

The base had already taken shape as a result of the Dragon Warrior's extremely generous infrastructure funding.

A large number of workers from all over the Middle East were working round the clock on the huge construction site, and the various high-end heavy machinery used in the construction of the base could almost only be seen in developed countries.

When Li Yalin saw with his own eyes several Liebherr 750-tonne all-terrain cranes lifting wind turbines around the Wanlong Temple base, he was dumbfounded.

He subconsciously asked Wan Bajun, "Master Wan Long Hall These wind turbines, are they also the Wan Long Hall's own?!"

The wind power is only one of them, not far away from that mountain, we have invested in a large amount of photovoltaic power generation, photovoltaic during the day, wind power at night, not enough to have the official supply of Syria, after the power generation is basically in place, will also invest in a large energy storage base station, in addition to this, the oil on the Syrian side In addition, more than 80% of the oil in Syria has been stolen by the United States, and the Syrian government can't get a penny, so they have a plan to give us an exploitation license, when we can explore and extract the oil ourselves, and then invest in an oil refinery and oil power plant."

Li Yalin was horrified to hear this and said offhandedly, "This is too big a gesture"

Wan Bajun said indifferently, "Mr. Ye arranged it, he asked me to build this place into a permanent base, so the infrastructure must be prepared with many hands, and Mr. Ye gave tens of billions of dollars, so we plan to invest more money and trade money for time."

Li Yalin could not help but exclaim, "Young Master Ye is really generous in what he does, if this base is completely completed, it might be able to compete with that mysterious organisation."

Saying that, he hurriedly asked, "By the way, Hall Master Wan, where is the live one that Young Master Ye mentioned now?"

Wan Bajun said, "Five-Four-Seven is in the core area with the highest level of secrecy, Inspector Li please follow me!"

Chapter 4953

Under the leadership of Wan Bajun, Li Yalin arrived at the core area of the Ten Thousand Dragon Temple here.

The so-called core area was a four-square-kilometre central area right in the centre of the Ten Thousand Dragons Temple's base.

Although the base was not yet completed, high walls had already been erected in the core area, and inside the walls were a large number of frame buildings of different heights.

These framed buildings are modular units procured from China by the Dragon Palace, which can be put into use in the shortest possible time after rapid assembly.

However, these buildings are only temporary and will be gradually dismantled and eliminated once the permanent base is completed.

Wan Bajun led Li Yalin to a six-storey building, where the rapid renovation of the interior of the building had already been completed, and although the outside was still a hot construction site, there was basically no sign of construction inside.

A few minutes later, Li Yalin met Five-Four-Seven, who had lost his arms and legs, on the top floor of this building.

During this period of time, Five-Four-Seven had become the tactical guide of the Ten Thousand Dragons Hall. Although he had lost his arms and legs, he still taught the soldiers of the Ten Thousand Dragons Hall the various formations he had mastered when he was a dead soldier, so that it was as if the soldiers of the Ten Thousand Dragons Hall had opened the door to a new world and had mastered many flexible tactics that they had never seen before.

In order to study how to break the tactics of these dead soldiers, Wan Bajun arranged for a number of senior officers of Wan Long Hall to work with Five Four Seven to study ways of restraining the tactics of the dead soldiers.

In order to ensure that Five-Four-Seven's secrets would not be leaked, only the top brass of the Dragon Hall were allowed to set foot in this building, and Five-Four-Seven himself never left the building.

At this moment, Five-Four-Seven was communicating and discussing tactics with a few instructors from the Ten Thousand Dragon Temple. Wan Bajun invited the others out, then invited Li Yalin in and said to Five-Four-Seven, "Little Five, this is Inspector Li, who was invited by Mr Ye to investigate that mysterious organisation behind you. I hope you can cooperate well with Inspector Li and tell him all the information you know."

When Five-Four-Seven saw Li Yalin, his whole body was as appalled as if he had seen a ghost!

He had not heard of Li Yalin's great name, nor did he know his origin and background, but he remembered Li Yalin's face and remembered that when he went to assassinate the An family, the first thing he saw when the lift doors opened was this Li Yalin in front of him.

At that time, he was even the first person to shoot at Li Yalin.

Therefore, he knew very well how many shots Li Yalin had taken at that time, and could also conclude that there was no way that Li Yalin would have any chance of surviving.

Because of this, when he saw Li Yalin's familiar yet unfamiliar face, his entire body panicked to the extreme.

Li Yalin also knew that this man was the culprit who had nearly killed himself in the first place, but he didn't get angry, he just smiled slightly and said, "Seeing this surprised look on your face, you must still remember me, right?"

Five-four-seven was stunned and couldn't help but say: "This How is this possible At that time At that time that person was you?!"

Li Yalin smiled blandly and said, "If the person you are talking about is the one who was beaten into a hornet's nest by you at the lift door, then I can tell you in charge that it was me."

"But But that's not logical" Five-Four-Seven said doubtfully, "You were shot so many times that your body died right then and there, it was clearly impossible to save it"

Li Yalin nodded and said seriously, "I was bound to die, but fortunately there was Mr. Ye, so I came back to life."

"Mr. Ye" Five-Four-Seven instantly remembered Ye Chen's amazing strength, and that Ye Chen was able to break the poison that had comforted him for more than thirty years with a snap of his fingers, and then he thought of how Li Yalin looked at that time when he was hit by dozens of shots in the end, and his heart was even more impressed with Ye Chen.

So, he was ashamed to say, "Inspector Li, I have offended you much for what happened at the beginning, please forgive me"

Li Yalin nodded and said blandly, "You were also following orders, it's understandable."

Five-Four-Seven sighed in relief and hurriedly added, "Inspector Li, whatever questions you have, as long as I know, I will know everything and say everything."

Chapter 4954

Five-Four-Seven had long hated the organisation that controlled his fate to the core, and had even been hoping that Ye Chen would be able to find the quarters of his line of dead soldiers and save his wife and family along with him, so naturally he was absolutely cooperative with Li Yalin.

Li Yalin nodded, and without too much nonsense, he got straight to the point and said, "The immediate task at hand is to find out the location of your compound on the map, before that I wonder if you have any valuable clues to share with me?"

Five-Four-Seven shook his head and said, "I'm not going to lie to you Inspector Li, I've been thinking about this for a while, but the organisation was too cautious and didn't let me leave any valuable information."

Li Yalin smiled faintly, took out the table of major natural disasters he had combed through and asked him, "Mr. Five, how old are you?"

Five-Four-Seven busily said, "Back to Inspector Li, I'm probably between thirty-six and thirty-eight this year."

Li Yalin asked curiously, "What did you use to gauge your age?"

Five-Four-Seven explained, "Within the dead soldiers, there is a kind of 'calendar' that is quietly recorded, and we roughly recorded the time based on our own work and rest, but since there is no absolute reference standard, there are still some errors."

Li Yalin nodded and said, "Then we'll go by thirty-eight years."

Saying that, he combed through the last thirty-five years of major natural disasters, and while looking at the entries, he asked, "From the time you were born to the last time you left the premises, have your premises ever moved or changed?"

"No." Five-Four-Seven replied, "The garrison where I was born was an underground fortification that I don't know where or how deep it was, and it hadn't been relocated for so many years."

Li Yalin asked again, "Then, as far as you remember, has there ever been a very strong and major earthquake?"

"A big earthquake?" Five-Four-Seven thought for a moment and spoke, "There was a relatively strong earthquake, but that has been many years ago."

"Many years?" Li Yalin asked again, "How many years is many years roughly?"

Five-Four-Seven frowned in thought for a moment and spoke, "Almost twenty years or so, but my timeline might deviate from reality a bit, within a positive or negative difference of two years, I guess."

Li Yalin nodded and reached out to cross out 2008 China, 2011 Japan, as well as a few more recent entries in the timeline, then spoke, "In that case, we can exclude the area around Japan, as well as central and southwestern China."

Saying that, he saw the entry for 2004 Indonesia and spoke up, "Did you remember that earthquake, did it feel strong?"

Without thinking, Five-Four-Seven said, "It was very strong, and it even caused a lot of damage to our premises at that time, and some people were injured and even died as a result."

Li Yalin's eyes lit up and he said with some excitement, "Then maybe it was the 2004 Indonesian tsunami."

Saying that, he took out the map and found the location of the source of the Indonesian tsunami on it, muttering under his breath, "The source of the earthquake at that time, in western Indonesia, was felt in many countries and regions, but the tremor you felt there was relatively strong, and it should be right around the Indian Ocean, possibly even in Indonesia."

"However, in 2003, there were major earthquakes of magnitude 7 or more in Hokkaido, Japan and the Solomon Islands, and a major 7.8 magnitude earthquake in Pakistan in 2005, and your timeline is not precise enough, so it is likely to be off here."

Speaking of this, he looked at FiveFourSeven and spoke up, "Do you have any other clues about that earthquake?"

"Other clues?" Five-Four-Seven was silent for a moment and shook his head, "There are no more clues, the earthquake was rather scary, but after all, no one died, so we all didn't take it too seriously."

Li Yalin looked at the map and opened his mouth to ask, "If the earthquake you are talking about is that big tsunami in Indonesia, you guys live underground, did you have any permeability accidents after the earthquake?"

“Water permeability” Five-Four-Seven pondered for a moment, suddenly remembered something and blurted out, “At that time, there was indeed an accident of water penetration, the whole premises was filled with at least twenty centimeters of water, and later on, it was pumped out that water.”

Hearing this, Li Yalin could not help but ask him with an excited look on his face, “Was the water salty?”

Chapter 4955

“Is the water salty?”

FiveFourSeven thought about it and said with a frown, “This I can’t really remember too much to clear it, it’s been too long after all, but I seem to remember that after that time, there was some white residue on the ground and clothes, could it be salt precipitated from the sea water?”

Li Yalin nodded and said, “The probability is that it is salt, if that is the case, then what you experienced at that time should be the Indonesian tsunami, the reason for the permeability is that the earthquake at that time triggered a large tsunami, and many surrounding countries were affected, which included your compound.”

Saying that, Li Yalin circled two ranges on the map and spoke, “So it seems that your garrison, it could be in the western part of South Asia, or it could be in the eastern part of Southeast Asia.”

Afterwards, Li Yalin saw a few more entries and muttered, “There have also been earthquakes in recent years where the Indonesian tsunami originated, but none of them are of a high level, did you guys feel any tremors?”

Five-Four-Seven shook his head and said, “I can’t guarantee that I haven’t felt any tremors in all these years, but I can guarantee that I haven’t detected any significant tremors.”

Li Yalin nodded and said, “In that case, it means that your site is at the relative edge of the impact of the ’04 Indonesian tsunami, and is still largely outside the impact of the subsequent earthquakes in the vicinity, so it’s probably like targeting the area between the ninth and tenth rings on a large piece of target paper, which is a big breakthrough. ”

Saying that, he drew several circles on the map, and finally marked the position in the middle of the two outer circles with a red marker, adding, “Although these parts are also very large, the good thing is that most of them are oceanic, and you said that your site, which felt the tremor in ’04 and had water penetration, is proof that your site, which must not be far from the coastline It should be somewhere on the coast within this ring, or on an island somewhere!”

Five-Four-Seven looked at the circle on the map and spoke with a somewhat complicated expression, “We have been trying for so many years and so many people to figure out exactly where we are, but no one knows”

At this point, Five Four Seven suddenly shed two lines of hot tears, allowing them to slide across his face as he stared at the not-so-small circle area and choked out, “Inspector Li Thank you”

Li Yalin waved his hand and said, “Don’t be in a hurry to thank me now, even this circular area is very large, trying to do a carpet search here is actually very difficult, and before I came, I touched on this matter with Young Master Ye, I think, it’s not quite right to actually go to these areas to search for your

quarters yet, we put these issues on paper discussing them, at least we won't reveal any clues, but once we try to go within this area to find the other side out, we have to be prepared to be discovered by the other side."

Saying that, Li Yalin added, "Therefore, at the moment, the best way is for us to find the breakthrough point together on paper, and it would be best if we can shrink the target range to a small enough size through cooperative analysis between us, and then have Young Master Ye personally go and make contact."

Five-Four-Seven nodded understandingly and sighed, "The organisation is indeed very strong, risking contact would likely lead to mischief, and we have not been able to rid ourselves of their rule in the slightest for so many years, we don't even know their true nature, we simply don't know how much power they are hiding behind, and it is likely that there is much more room than we can imagine."

Li Yalin said, "It is indeed saddening that you have not been able to escape the grasp of this organisation for so many years and generations."

Saying that, he looked at Five-Four-Seven and said seriously, "I think that if you want to escape the shackles of this tree for a hundred years, then Young Master Ye is definitely your only chance, only he can possibly save you dead soldiers and return you to freedom."

"Yes!" Five-Four-Seven nodded heavily without thinking and said with a face full of expectation, "My biggest dream right now is to be able to reunite with my wife and children outside, and I'm afraid that only Mr. Ye can help me realize this dream"

Saying that, he asked Li Yalin, "Inspector Li, what else can you do to locate our premises in more detail? If I need to provide clues, I'll be sure to tell you everything!"

Li Yalin looked at Five-Four-Seven and opened his mouth to ask, "Do you guys always fly out on missions?"

Chapter 4956

Five-Four-Seven nodded and said, "Yes! Every time, you take a plane."

Li Yalin asked, "What state were you in midway?"

"Coma." Five-Four-Seven said truthfully, "When we were about to go on a mission, we would first take a drug that put people in a deep coma, and then wake up and we would already be at the place."

Li Yalin asked again, "Then how did you make sure that you took the plane every time you went out?"

Five-Four-Seven explained, "Every time I went on a mission, I would ask my wife to help me calculate the time, although our time was not too precise, but with a relatively short timeline, the error was not too big;"

"Every time I go on a mission, the time I can't keep track of is the journey back and forth, the time spent in between performing the mission, I can keep accurate records myself, so every time I go back, I check the time with my wife and use the time she recorded, minus the time I recorded in between doing the mission, that's the time spent on the journey back and forth, generally speaking, whether it's to any

place in the world out on a mission, the time we consume on the way back and forth is no more than six or seven days, a speed that only a plane can achieve.”

Li Yalin nodded gently and said, “It won’t take more than six or seven days, which means that your turnaround is very efficient, and even the airport you departed from is probably near your station.”

Saying that, Li Yalin remembered something else and said offhandedly, “The next step can be done in two steps, on the one hand, find better maps, including satellite cloud maps, and find out all the islands and airports within the circular area, then locate the area within a ten kilometre radius of each airport as a key target for investigation;”

“As for the other hand, start with your transport!”

Five-Four-Seven was busy asking, “How do we start with transportation?”

Li Yalin said, “Although you were on a mission by plane, you didn’t go through customs when you entered the US, right, because when you woke up, you were already in the US and had completed your entry.”

“Right.” Five-Four-Seven nodded and said, “Every time we go on a mission, we don’t go through customs, we’re already in the place when we open our eyes.”

Li Yalin continued, “I don’t know about other countries, but since 9/11, the United States has taken aviation security very seriously, so the plane you are on cannot enter the United States directly, and if you enter the United States, you must pass through customs, so they must have chosen a certain country as a jumping-off point, and first flew the plane to the jumping-off point, and then immediately arranged for you to sneak across the border overland to complete your entry. .”

After a pause, Li Yalin asked again, “Have you ever been to the United States before?”

Five-Four-Seven nodded, “I went there once a few years ago, when I went to Los Angeles.”

Li Yalin continued, “The time you went to Los Angeles was the same as the time you went to New York, you woke up and arrived at the place, and the round trip did not take more than six or seven days, right?”

Five-Four-Seven nodded, “Yes.”

Li Yalin smiled faintly and said, “To enter the United States you must smuggle in, and there are only two ways to smuggle in, either by sea or by land, but if it’s by sea, then a round trip of no more than six or seven days is simply impossible to achieve, so I feel that you must have flown to the jumping off point country by plane first, and then smuggled in by land.”

Then Li Yalin added: “The United States only has two neighbours, Mexico and Canada, so if you go by land, it must be one of these two countries, but Canada’s aviation controls are also very strict, so if your plane chooses Canada as a jumping-off country, there is no way to get around the process of having to go through customs, but the situation in Mexico is different, Mexico is relatively much more chaotic. The likelihood of a plane avoiding customs and landing directly somewhere in Mexico should still be very high.”

“I’m basically sure that you are based in the coastal areas or islands of western South Asia or eastern Southeast Asia, not far from the airport, and that your mission to the United States would have involved a plane flying into Mexico and then transferring you overland to New York, and that this organisation must have another group of men based in Mexico. ”

“I think Mexico should have the lead I’m looking for.”

Chapter 4957

“Mexico?”

When Five-Four-Seven heard Li Yalin’s analysis, he hurriedly asked, “Inspector Li, do you mean that when we go to the United States on a mission, the plane lands in Mexico first, and then enters the American mainland by land?”

“Right.” Li Yalin nodded and spoke, “This is the way that I feel is the most reliable, the other methods are too difficult, since they are transporting you dead soldiers by plane, they must have a landing site, neither the US nor Canada can allow them to bypa*s customs and enter quietly, and only Mexico has this condition.”

Five-Four-Seven asked in disbelief, “Wouldn’t the planes have to go through customs to enter Mexico?”

Li Yalin explained, “Aircraft entering the country have to go through two levels, one is air traffic control and the other is customs, air traffic control is to control the aircraft before it lands, customs is to control the pa*sengers and cargo after it lands, in the whole world, no one can completely hide the whereabouts of the aircraft, unless he does not want to die, because the density of civil airliners is too high now, the aircraft navigation must be subject to air traffic control Arrangements for scheduling, otherwise there is a high risk of collision, so I presume that the plane that sent you guys in the first place must have been a normally registered plane and applied for a route with compliant formalities.”

Saying that, Li Yalin added, “But the advantage of them choosing Mexico is that after the plane landed, it must have been much easier than the US and Canada to take care of Mexican customs and transport your group of dead soldiers out.”

Five-Four-Seven nodded gently and asked Li Yalin, “Inspector Li, what is the next step to take then? You just said that planes can’t hide their movements, so let’s start the investigation with the planes?”

“Right.” Li Yalin said, “From the day you arrived in New York, push forward three to five days, sort out all the planes that entered Mexico during these days, the one you were on should be among them, the rest is how to screen them, the workload should be huge.”

Wan Bajun, who had not spoken, spoke up at this time, “Inspector Li, from your position in this circle, flying to any place in Mexico is at least 16,000 kilometres, most of the planes cannot fly that far, do you think they flew straight to Mexico, or did they have another stopover in the middle to resupply?”

Li Yalin said with a serious expression, “I am inclined to fly straight, for them, a stopover will require additional landings and take-offs, which not only wastes time, but also carries a great risk, think about it, even if they are strong martial arts masters, once they are all packed into one plane, there is still a risk of being taken out in one go. expert could survive the crash?”

Wan Bajun only felt a chill down his back and said, "If the plane really crashed, with a speed of several hundred kilometres per hour, plus a weight of over a hundred tons and dozens of tons of fuel, I'm afraid that even the strongest martial arts expert would not be able to survive."

Saying that, Wan Bajun added, "Planes that can fly such a long distance are basically ultra-long-range airliners in the large airliners, and under normal circumstances, airliners that can fly more than sixteen thousand kilometres are only the ultra-long-range models of Boeing 777 and Airbus A350;"

"If Inspector Lee feels that the odds are that they landed in Mexico first, then let's run through the aircraft that entered Mexican territory during that time and focus on those ultra-long-range airliners, which should rule out most of the flight information."

Chapter 4958

"If any of the flight information that fits the criteria takes off from or near that circular area you drew just now, then that's a key suspect."

Li Yalin's eyes lit up and he spoke, "This clue is valuable and can save a lot of trouble."

Wan Bajun then said, "Then I'll have someone check the entry records of Mexican planes during that period!"

Li Yalin hurriedly said, "Hall Master Wan, it's not difficult to investigate the aircraft entry records, but can you ensure that the channels you investigate are 100% secure?"

"Rest assured." Wan Bajun nodded and said, "The secrecy level of the information channels of the Hall of Ten Thousand Dragons is very high, moreover, we have many firewalls, so Detective Li can rest assured."

Li Yalin nodded gently and instructed, "Right, Hall Master Wan, also comb through the information of all inbound cargo planes as well."

"No problem."

.....

Soon, a dense document was delivered to Wan Bajun's hand.

This document, recorded the information of all inbound flights to Mexico within the five days before the incident in New York.

Since most of the incoming flights were small and medium-sized aircraft, only a few had a range of 15,000 kilometres or more, so the total number of flights was less than a hundred.

Of these less than a hundred flights, passenger planes accounted for 80% and cargo planes accounted for 20%.

However, since the circle that Li Yalin had drawn out was probably in South and Southeast Asia, there was not a single direct passenger flight between these places and Mexico.

And there was only one cargo plane that took off from Colombo, the capital of Sri Lanka, during those five days.

This cargo plane was of the same type as the Boeing 777 ultra-long-range passenger plane that Wan Breaking Army had just mentioned and converted.

The entry information shows that the plane took off from Colombo on the fourth night before the incident in New York, and after a twenty-hour flight, arrived in the border city of Monterrey, Mexico, in the early hours of the morning two days before the incident, and landed at Monterrey International Airport.

The entry information also showed that the plane's entry request included cargoes of tea and coffee beans, a specialty of Sri Lanka.

When Li Yalin saw this information, he said with some excitement, "The odds are that this is the plane!"

Wan Bajun also said with great approval, "This aircraft is a Boeing 777-200LR, which is Boeing's longest range aircraft, and it is not impossible to fly 20,000 km with a moderate modification. It is already not very large, and to convert a freighter with this type of aircraft is to not care about the load, just the efficiency, and this type of aircraft can basically fly from any two airports on the planet directly."

At this point, he gave a slight pause and added, "Inspector Li, this aircraft seems to be prepared to do global manoeuvres, and combined with the previous behavioural characteristics of that mysterious organisation, I think this series of inferences you made, including this result, is correct! It is the target we are looking for!"

Li Yalin nodded, "I also think that it is it!"

Chapter 4959

Wan Bajun couldn't help but exclaim, "Inspector Li, you're really something! To be able to lock onto the aircraft used by the other side in such a short time, this mysterious organization probably never dreamed that they would be exposed so quickly!"

Li Yalin said seriously, "It's mainly because Five-Four-Seven is there, with him there, he was able to gradually help me lock on to the clues, while helping me with cross-matching."

"This organisation definitely didn't expect that any of their dead soldiers would survive, and they wouldn't have believed that the dead soldiers would be able to divulge any useful key information, much less that anyone would have checked out their planes, without Five-Four-Seven's information, we would have even thought that these dead soldiers were all from American soil."

"Moreover, normally, even if someone was investigating the sudden appearance of dozens of dead soldiers in the United States, they would never have thought that it was related to a regular cargo plane flying from Sri Lanka to Mexico, much less they would have thought that we could use the seismic information from so many years in the past to pinpoint the approximate location of the dead soldiers and thus narrow the scope a little."

Wan Bajun sighed, "Information is important, but your ability to pull from limited information and keep narrowing it down is the key to finding clues, so it's not for nothing that you are known as the Chinese God Detective!"

Li Yalin smiled humbly, then pointed to the registration number of the cargo plane and the company it belonged to, and said, "By the way, Master Wan, the registration number of this plane starts with 9V, if I remember correctly, this is the registration number of Singapore aircrafts, so this plane must be registered in Singapore, and the company it belongs to is YT-Airlines. Check where this company is registered and the public information of the company, since it is a normally registered company, then the public information should still be relatively easy to find out."

"Good!" Wan Bajun also had a feeling of clearing away the fog and seeing the light of the moon, and could not hide his excitement as he said, "Wait a moment, I'll check it out with the computer!"

After saying that, Wan opened his laptop and searched for the company registered as YT-Airlines on Singapore's corporate information website.

The information showed that the company was registered in Singapore, and was an air logistics company called Yuantai International Express in Chinese.

The company had three shareholders, all Chinese by name, and a total of six registered cargo aircraft, all Boeing 777 ultra-long-range versions.

After finding out this information, Wan Bajun said to Li Yalin, "Inspector Li, if we find these three shareholders, will we be able to dig out the clues of that mysterious organisation?"

Li Yalin said with a grave expression, "I think these three shareholders should all be false identities, such a cautious organisation could not have left any substantial clues related to people in this link, the reason why they must register a company and must register every aircraft is also that they have no choice but to do so, after all, aviation safety is a very important issue to the vast majority of countries around the world. After all, aviation safety is a big issue for most countries around the world, and without complete procedures, their planes simply can't fly."

Wan Xiaojun asked him, "Then what should we do next?"

Li Yalin thought about it and spoke, "I met Young Master Ye before I came here, and both he and I felt that we should not create direct contact with the other side during the investigation for the time being, so as to avoid early exposure, so I'd better report back to him and see what he has in mind!"

Chapter 4960

At this time, Ye Chen had already returned to Providence.

Xiao Churan continued to attend classes on time as usual, while he stayed alone in the hotel's presidential suite, waiting for news from Li Yalin.

Although Ye Chen had saved Li Yalin's life like a saviour, in his heart, he admired Li Yalin.

He admired Li Yalin's meticulous thinking as well as his meticulousness, his ability to look for breakthroughs in places that no one else would have thought of.

It is this ability that has contributed to his reputation as a Chinese sleuth.

And his idea of trying to use the clues from the huge natural disaster to gradually locate where the dead soldiers were stationed did seem extremely practical to Ye Chen, so he believed that it would not take long for Li Yalin to gradually clarify the clues after he met Five-Four-Seven in Syria.

Li Yalin did not let Ye Chen down either, and a phone call to Ye Chen lifted Ye Chen's entire spirit.

When he answered the phone, the first thing Ye Chen asked him was, "Inspector Li, what have you got?"

Li Yalin said, "Young Master Ye, we have analyzed some clues at the moment, but you have to decide what to do afterwards."

With that, Li Yalin gave Ye Chen a detailed report of the situation that he had analysed and investigated together with Five-Four-Seven and Wan Breaking Army.

Ye Chen did not expect that Li Yalin had sorted out so many valuable clues so quickly.

Firstly, it was the location of these dead soldiers in Five Four Seven. At present, it could be determined that the probability was in South Asia, especially the southeast coast of Sri Lanka, and the most probable islands in the sea around Sri Lanka, this range was already considered very precise compared to the whole world, if one really wanted to look within this range, it should not be a difficult task.

Secondly, there is that Far East International Express Company registered in Singapore, in Ye Chen's opinion, the function of this company, the probability is that it is specialized in transporting dead soldiers for this mysterious organization.

Apart from that, there was also a very crucial clue, which was the six Boeing ultra-long-range aircraft registered under the name of Far Thai International Express.

By grasping the registration numbers of these six planes, theoretically, one would grasp the movement of the dead soldiers of this mysterious organisation.

After reporting this, Li Yalin said to Ye Chen, "Young Master Ye, there are two directions to investigate in depth at the moment, one is to search for the dead soldiers' quarters within the currently locked area, then monitor the person in charge of the dead soldiers' quarters, and then follow the vine all the way to find the real core members of the mysterious organisation;"

"The other is to first find out the actual controllers of the Yuantai International Express and monitor them closely;"

"Personally, I feel that this Yuantai Express, just like your sister-in-law who committed suicide by taking poison, is the white glove of this mysterious organization in the outside world, and most probably all are the peripheral members of this mysterious organization, or another kind of dead soldiers which are higher than these dead soldiers of Five Four Seven, from this line of them upwards, we should also be able to find the clues of the organization. "
