

Ye Chen 5041

Chapter 5041

The old man shook his head and said, "The above thought that the Nordic side had premeditated and set a trap in advance, but seeing Your Excellency's strength, and hearing Your Excellency mention the dead soldiers and the Primus Guards, I guessed that it should be related to Your Excellency."

Saying that, the old man added: "Some time ago in New York, dozens of our dead soldiers disappeared, I think it is also related to you, right?"

Ye Chen looked at the old man and said with a raised eyebrow, "You seem to be very smart."

The old man smiled, "I'm not smart, but I've always had doubts about these two incidents, but when I saw you today, I felt a sense of clarity in my heart."

Speaking of this, the old man asked Ye Chen, "Your sudden appearance here, your target should not be my old bones, but the place that I am going to, right?"

Ye Chen also nodded frankly and spoke, "That's right, since you are a wise man, then let's open up the sky and talk, whatever I ask, you answer, don't hold anything back, otherwise, I have ten thousand ways to make your life worse than death."

The old man gnashed his false teeth in his mouth and said with a firm gaze, "I know that you are far above me in strength and want to kill me as easily as a hand, but if you want me to tell the truth, you must promise that you will spare my life, otherwise, I will bite my poisonous teeth and kill myself right now!"

Ye Chen laughed and said playfully, "Biting your fangs? One of your dead soldiers in New York has done that, but even if he bites his fangs, I can still keep him from dying."

The old man laughed and spoke, "Your Excellency also said just now that the poison in my body is different from theirs, and your Excellency was right, it is indeed different, and not only is the poison in my body different, even the venom in my fangs is different, the venom in my mouth, once I bite it, even a great golden immortal cannot save it."

Ye Chen smiled and asked him, "Is it really that powerful?"

The old man said with a torch-like gaze, "If your Excellency doesn't believe me, then feel free to give it a try, but if I die, you won't get any information."

Ye Chen sighed and shook his head, "You old thing, not only are you perverted, you are also overconfident, do you think I don't have another way to make you talk?"

Thinking that he had Ye Chen in his grasp, the old man spoke with a fish out of water stance, "Before you do, I would like to remind you that I am the only envoy on this ship, and if you want to know more about the situation in Cyprus and Turkey, only I can answer for you;"

If I die, the Turkish branch of the organisation will immediately cut off all contact with the Cyprus copper mines and initiate their self-destruction, in which case everyone in the mines will die without a trace! At that time, the trail that you have worked so hard to trace will be completely broken!"

Ye Chen raised his eyebrows and said with a smile, "You really know how to play hard to get."

The old man sneered, "Everything I said is true, if you don't believe me, then try killing me!"

"Fine, let's try it then." After Ye Chen finished speaking, he sneered and an aura struck into the old man's brain from his hand, then he said in a commanding tone, "From now on, your mission is to obey me without any reservations, do you understand?"

The old man looked dull for a moment, and his eyes were a little hollow, but his tone became extremely resolute as he looked at Ye Chen and said, "I understand!"

Chapter 5042

With the old man having been given a psychological hint by Ye Chen, Ye Chen then cut to the chase and questioned offhandedly, "Who is your surname and what is your status in the organisation?"

The old man said with a humble demeanour, "My name is Duan Liye, I work as a special envoy in the Right Army Governor's Office."

"The Right Army Governor's Office?" Ye Chen frowned and asked him, "What kind of institution is this Right Army Capital Governor's Office?"

Duan Liye respectfully replied, "Following the system of the Ming Dynasty, the British Lord established five military capitals, namely the Central Military Governorate, the Left Military Governorate, the Right Military Governorate, the Front Military Governorate and the Rear Military Governorate, which have developed over the centuries to date. For the right, America for the left, Oceania for the front, and Africa, although also on the left flank, was listed as the rear due to its less important strategic significance."

Ye Chen's heart was appalled as he listened, he had expected that this mysterious organisation, would be a powerful behemoth, but after listening to Duan Liye's introduction, he realised that the power of this organisation, had truly achieved global coverage.

The point of global coverage was an ability that none of the top plutocrats were currently known to possess.

The Rothschild family had been working deeply for so many years, but had only consolidated its roots in Europe and North America. As for the other continents, they had at most some capital penetration, and it was difficult for them to extend their power in the true sense to other continents.

As for the Sa'udi royal family, it is even less important to mention that their power is basically concentrated in the Middle East, and they cannot even influence East Asia.

The An Family, ranked third, had a relatively smaller sphere of influence, with almost all of it concentrated in the United States.

Thinking of this, he looked at Duan Liye and asked the question that had been in his mind for a long time: "What is the name of this organisation of yours?"

Duan Liye spoke, "The name of the organization is the Broken Clear Society."

“Broken Clear Society?” Ye Chen couldn’t help but frown: “Is it similar to what the Heaven and Earth Society said in martial arts novels, that is, to oppose the Qing Dynasty and restore the Ming Dynasty?”

“Right.” Duan Liye nodded, “But the history of the Qing Breaking Society is more than ten years older than the Heaven and Earth Society. The Qing Breaking Society was founded in 1644 when the Qing army entered the country, while the real Heaven and Earth Society was only founded around 1660 by Chen Yong Hua, a Ming general, at the behest of Zheng Chenggong, and this Chen Yong Hua is the prototype character of Chen Jin Nan in the later martial arts novels.”

Ye Chen asked curiously, “Since the Qing Breaking Society predates the Tiandi Society, then why have I never heard of this name?”

Duan Liye explained, “That’s because in the first twenty years of its existence, the Qing Breaking Society was just an insignificant folk organisation, and the Qing army was so powerful that until the fall of the Southern Ming Dynasty, the Qing Breaking Society did not develop and grow, but was on the verge of destruction. After the Qing dynasty destroyed the country, the members of the Qing Breaking Society fled to Southeast Asia and developed in secrecy, and only after 400 years of development did they reach their present size.

Saying that, Duan Liye added, “It is said that even the successive British masters felt that the name of the Qing Breaking Society really did not live up to its name, so later even the successive masters themselves rarely mentioned the name, and nowadays, only some relatively core personnel of the Qing Breaking Society know this history.”

Ye Chen had known from Five Four Seven that this organisation was at least two or three hundred years old, and now that he had learnt that it had been established for over four hundred years, he did not feel very surprised, so he asked, “Is your Right Army Governor’s Office located in Turkey?”

“No.” Duan Liye shook his head and said, “To be on the safe side, the capital of the Right Army is rotated among the European countries, changing every three years, and now the capital has been rotated to Italy.”

Chapter 5043

Ye Chen asked again, “Where exactly in Italy, do you know?”

“I don’t know.” Duan Liye shook his head, “Although I am the special envoy of the Right Army Governorate in Turkey, I have been on standby in Turkey for so many years since I left the Huben Battalion.”

Ye Chen asked him, “What is the Huben Battalion?”

Duan Liye explained, “Huben Camp, is a place within the organisation that specialises in training high-ranking martial artists, and only martial artists who have all eight meridians opened up have the opportunity to enter the Huben Camp for further training.”

Ye Chen nodded and said indifferently, “Give me an in-depth introduction to this Huben Camp.”

Duan Liye said, “The Huben camp grades each person according to their strength and qualifications, and there are four levels: A, B, C and D. If they are graded as D, they can stay in the Huben camp for ten

years, and after ten years, they have to leave the camp and accept other appointments. If you could reach Grade A, you could stay forty years or even longer. I was classified as Grade A or C at that time and stayed in the Huben Battalion for a full twenty years.”

Ye Chen asked, “What are the benefits to you of joining the Huben Battalion?”

Duan Liye explained, “There are many benefits to joining the Huben Battalion, firstly, if you join the Huben Battalion, you are a relatively core member of the organisation, and your status is considered medium to high, secondly, if you join the Huben Battalion, you will be taught by an expert of the Transformation Realm himself, and you can get a complete martial arts technique, and again, you can get herbs to enhance your cultivation and strengthen your body.”

“There are some people who have opened all eight meridians, but they will never reach the full level of the Bright Realm in their lifetime, let alone have the chance to enter the Dark Realm, but as long as they join the Huben Camp, even if they are only graded as C, they can still make a breakthrough and become a Dark Realm expert within ten years. I dared not imagine, and the reason why martial artists like me willingly joined the organization was because of such an opportunity.”

Ye Chen did not expect that there were still Transformation Realm experts within this organisation, and he had not known so far just how strong the strength of a Transformation Realm expert was.

Surprised, he then asked Duan Liye, “From what you said, you joined the Broken Clear Society halfway?”

“Yes.” Duan Liye said, “I was originally just a disciple of a small sect, and I was considered to be overly gifted in my master’s sect. Thirty years ago, my master offended an expert of the Qing Breaking Society, and the other party killed my master and a group of brothers and sisters, and because I was more gifted and gave up resistance in the first place, I was appreciated by the other party, so they recruited me into the Qing Breaking Society;”

Ye Chen asked again, “Then what happened to the poison in your body?”

Duan Liye said, “Anyone who wants to join the Qing Breaking Society must voluntarily take the poison. When I first joined, I took the same poison as the dead soldiers and Primus Guards, and had to take the antidote once a week, but when I left the Huben Camp after spending twenty years there, the organisation gave me a new poison, which was more toxic, but the attack time was also extended to once every six months, and it was relatively more free.”

Ye Chen nodded and asked, “As you said, the Huben Camp is a training base for high-level martial artists.”

Duan Liye said, “That’s right, it is.”

Ye Chen asked in a cold voice, “Where is the Huben Camp?”

Chapter 5044

Hearing Ye Chen’s question, Duan Liye shook his head and said, “I don’t know where the Huben Camp is either, when I went to the Huben Camp back then, I was taken there in a comatose state, and when I left, I was also taken out in a comatose state, moreover, the quarters of the Huben Camp, which was no different from the quarters of the dead soldiers, were all underground buildings, and could even be

called an underground city, and we, the I have been in the Huben Battalion for twenty years and have never seen the sun or the moon.”

Ye Chen asked with some horror, “Twenty years without seeing the sun, I can understand that the dead soldiers have no choice, those of you who have a choice, when you arrive there and find it is a dark and sunless life, won’t you resist or flee?”

“How could I?” Duan Liye said without thinking, “The twenty years I spent in the Huben camp were almost a flash of a finger, every minute and every second of my life was incredibly fulfilling, during the twenty years I was there, I broke through from an eight-star martial artist to the full circle of the Bright Realm, and then from the full circle of the Bright Realm to the First Sky of the Dark Realm, followed by the Second Sky and the Third Sky. The twenty years in the Huben camp were the most fulfilling twenty years of my life!”

Ye Chen did not expect that Duan Liye, who looked like he was only in his early sixties, would actually be eighty-five years old.

However, Duan Liye was a Dark Realm expert after all, and the natural lifespan of a Dark Realm expert was above one hundred and twenty to thirty years, so it made sense that he looked younger than his actual age.

At this point, Duan Liye mentioned the Huben Battalion and said with a regretful expression, “I still lament to this day about the speed of my cultivation in the Huben Battalion back then and not being able to reach the Huben Battalion’s promotion standard, if I had been able to break through to the Fourth Sky of the Dark Realm in the twenty years I was there, then I would have been able to stay for another ten years, or even longer ”

It was only then that Ye Chen came to a sudden realization.

Not everyone had the same luck as himself, being able to quickly master the aura and gaining greater strength directly over martial artists.

The vast majority of martial artists, on the other hand, had been cultivating for decades like a day and non-stop in order to be able to achieve refinement in their cultivation.

For such people, the Huben Camp is a perfect opportunity for them, providing them with all kinds of resources and, more importantly, allowing them to train for decades without any distractions, even without being disturbed by the darkness and dawn.

For those martial idiots who had most of their minds on cultivation, to have such an opportunity, not only would they not hate to reject it, but it would be worth a thousand dollars.

Thinking of this, Ye Chen suddenly recalled Li Yalin’s method of using earthquakes to locate the Five-Four-Seven garrison, so he asked Duan Liye, “In the twenty years you were in the Huben Battalion, did you ever experience any earthquakes or tsunamis?”

“Earthquakes? Tsunami?” Duan Liye shook his head, “I don’t have any memory of it In the Huben Camp, the vast majority of our time was spent cultivating, paying little attention to what was going on around us, so we don’t have much memory of it.”

When Ye Chen heard this, he couldn't help but feel a little disappointed in his heart.

Naturally, he was clear that Duan Liye had already been given a mental implication by himself and could never have anything to hide.

And while it was possible that Duan Liye had no impressions about the earthquake and tsunami because it was true that his place had not experienced earthquakes and tsunamis, it was also possible that he had experienced them but he did not remember them.

After all, he was not the same as Five-Four-Seven.

Every day that Five-Four-Seven was in the Deadman's quarters, he was trying to find a way to confirm information about the outside world, or trying to find a way to keep track of time, and there was not a moment when he was not thinking about how to escape.

Chapter 5045

Therefore, Five-Four-Seven would be very sensitive to any wind or movement in their surroundings.

However, Duan Liye had joined the Huben Camp completely voluntarily, and had absolutely no such thoughts of wanting to escape, and he even regretted that he could not stay in the Huben Camp for ten more years. This kind of person who was happy and immersed in enjoying every day, naturally would not pay too much attention to his surroundings.

Helplessly, Ye Chen asked him again, "In the entire Huben Camp, how many martial artists are there like you?"

Duan Liye thought for a moment and said, "During the twenty years I was there, there were more than thirty people one after another, and at most about twenty people during the same period."

Ye Chen frowned and asked, "Then that means that the Huben Battalion has trained at least a few dozen Dark Realm experts."

"Right." Duan Liye nodded, "There were at least forty to fifty of them as well."

Ye Chen was surprised at the powerful reserves of this organization while asking with some surprise, "If the Broken Qing Society has so many Dark Realm experts, then why did none of the people sent on these two missions reach the Dark Realm?"

Duan Liye explained, "Although there are many Dark Realm experts, at least half of them have been integrated into the Divine Machine Battalion and are said to be assigned to serve in the organization's core base. , would also try to keep the Dark Realm experts by their side as personal guards, and would only designate one or two as special envoys to go out on various missions like I did, so overall the Dark Realm experts were not enough."

Hearing this, Ye Chen was already appalled in his heart, knowing that this organisation was very strong, but he didn't expect it to be even stronger than he had imagined.

Then, he settled his mind and asked Duan Liye, "And what is the establishment of the Jin Yiwei?"

Duan Liye said, "Although the Jin Yiwei do not serve beside Lord Ying, they are directly under his command, and after they leave the Huben Battalion, they will be placed around the world in other capacities, but more than that I do not know."

Saying that, Duan Liye added, "As for that time in New York, it was mainly because the target of the assassination was very influential in the United States, and the mission that time was to exterminate the other party's family, once it succeeded, the matter would definitely cause a huge sensation around the world, so in order to avoid exposure, the organization never sent martial arts masters when it came to things like this that would cause global attention, it always send out dead soldiers;"

"Although they are not as strong as the Dark Realm masters, they have their own special tactics due to the development of heat weapons, and they are basically as good as martial arts masters in actual combat. In any case, they won't be associated with martial arts masters, so there's no risk of exposing the organisation."

As for the Scandinavian mission, it was rather sudden.

"Moreover, the information that the organisation got was a bit off, the information was sent by an attendant beside the target, he said in the information that the strongest of them was only at the level of a five-star martial artist, and there was only one of them, the strength of the eight primus guards, even eight five-star martial artists could not be their opponent, plus the enemy was clear and we were dark, there was no way they could fail, so just sent them over, unexpectedly one dead and seven missing"

The first thing you need to do is to think of the ring that Lin Wan'er gave you and ask Duan Liye, "How much do you know about that time in Northern Europe? What exactly is the origin of that Lin Wan'er, do you know?"

Duan Liye shook his head, "I don't know anything about Lin Wan'er, as for the Nordic time, I only know that it was someone named by Lord Ying, this is the first time I've encountered it in all the years I've been with the organization, as for the rest, I'm not sure"

Chapter 5046

Duan Liye's explanation made Ye Chen even more puzzled about Lin Wan'er's identity.

He even regretted it a little.

Regret that he shouldn't have just let Lin Wan'er and her grandfather go.

Although in his opinion, he had already used psychological hints and the grandfather and grandson were definitely not hiding anything from him, but at that time, after all, time was rushed and he did not have enough time and opportunity to ask more questions.

However, it was too late to regret now, he could only ask as much valuable content as possible from this Duan Liye.

So, Ye Chen looked at Duan Liye and continued to interrogate him, "Do you know why your Lord Ying wanted to capture her? Is it for her as a person, or for something in her body?"

Duan Liye shook his head, "I am not sure about this matter, even my superiors in Turkey are not sure, we only know that it was a heavenly opportunity for that mission to be assigned to our Right Army Governorate, and if the mission was successful, the British Lord would have a heavy reward, but unfortunately it ultimately failed."

Ye Chen knew that Duan Liye could not be lying, so he asked him, "Do you know where the headquarters of the entire Broken Qing Society is?"

"I don't know." Duan Liye shook his head and said, "I have never been to the headquarters at all, I have only been to the Huben Camp, but I am not sure where the Huben Camp is."

After saying that, Duan Liye added, "I don't even know the exact location of the Right Army Governor's Office in Italy, the organisation is very strict in isolating information, people at whatever level can only know what they can know, and it's impossible for us to know anything that's slightly higher in secrecy."

Ye Chen couldn't help but feel a little big-headed, it seemed that this Qing Breaking association, the internal organization structure was really too clear, and the internal secrecy system was also too strict.

Duan Liye was already considered to be the middle and senior level of the entire Broken Qing Society, and did not know where the headquarters was, nor did he know where the branch he belonged to was, so if this went on, he did not know when he would be able to trace back to the source.

After a moment of silence, Ye Chen continued to ask him, "What kind of planning and deployment do you have in Turkey?"

Duan Liye replied, "Turkey is a supply chain specifically allotted for the Cyprus base, the purpose is to guarantee the normal operation of the Cyprus base, through the import of copper ore produced by the Cyprus base, to ensure the secrecy of the Cyprus base, and at the same time, through reasonable and legal import channels, to provide Cyprus with the necessary funds for its operation, in addition to that, we will use the shipping of copper ore to covertly provide the Cyprus base with the supplies it needs on a daily basis, there are two thousand tons of supplies on this ship that are to be secretly delivered to the Cyprus base."

Ye Chen asked, "What exactly are the two thousand tons of supplies you mentioned?"

Chapter 5047

Duan Liye replied, "There are almost three hundred tons of various food and drugs, as well as a large amount of weapons and ammunition, clothing and daily necessities, as well as various living materials needed by the dead soldiers, consumables for air and water purification equipment, and in addition to that, there are almost five hundred tons of diesel fuel."

Ye Chen asked him, "Diesel still needs to be transported from Turkey this far?"

Duan Liye explained, "The outside world thinks that there are only a few hundred people working and living in the copper mine, but in fact there are three to four thousand people inside, so not only is the cost of materials huge, but energy consumption is also very large. Once someone with an eye on this data, they will be able to detect it, so the organisation has asked that no base be exposed to any clues."

As he said, Duan Liye added: "Because we have to fill the energy consumption of these three to four thousand people, we have sent them four large diesel generating sets from Turkey, and all of their living electricity is met through diesel power generation, but a copper mine will also make people suspicious if the diesel consumption is too large, so all the diesel they need is provided by us, and after the ships dock, there is a special pipeline connected to the copper mine, and the diesel is directly transported through the pipeline to finish."

Hearing this, Ye Chen also couldn't help but have a little admiration for the meticulousness of this organisation.

Generally speaking, the larger the organisation, the more difficult it was to take care of the details.

However, it was indeed remarkable that the Broken Clear Society, with such a huge scale, managed to handle all sorts of details very well.

Things like energy consumption can easily be seen once someone with an eye on it.

Often, by analysing the electricity consumption data of a residential building, the police find that a particular household consumes several times more electricity than its other neighbours of the same type, and only upon investigation do they discover that they are using high-powered fluorescent lamps to cultivate forbidden plants in their homes.

And that kind of three-bedroom house uses the water and gas consumption of a dozen or two dozen people a month. Once this anomaly is discovered, the odds are that the house is traced back to a pyramid scheme den, a three-bedroom house with 20 or 30 pyramid scheme workers crammed inside.

Therefore, if this copper mine does not want to reveal any clues, then all its energy consumption, publicly purchased materials, and even the waste it emits, must match the size of three hundred people in order for no one to notice the anomaly.

Otherwise, once any of the indicators appeared abnormal, it could be detected by potential enemies.

This also made Ye Chen realise that many of his previous operations were actually quite lacking in similar details, whether it was the Spring Return Pill auction or the Jiu Xuan Pharmaceuticals, which had gained worldwide popularity during this period of time, were actually a bit high-profile, and once they were targeted by the Broken Clear Society, it would only be a matter of time before they were investigated.

At this time, Duan Liye spoke again, "By the way, inside the supplies I carried this time, there is also an antidote for them."

Ye Chen asked him, "Was the antidote produced and made in Turkey?"

Chapter 5048

"No." Duan Liye shook his head, "The antidote was sent to Turkey by the organization, but from where it was sent, I'm not sure."

Ye Chen frowned and asked, "Is there a fixed delivery time for the antidote to arrive in Turkey?"

"No." Duan Liye explained, "The organization gives the antidote at a random time every time, sometimes it is delivered until the day before it is almost consumed, but sometimes it is suddenly

delivered a month or two in advance, it is not at all elusive, nor is there any pattern, it is always suddenly informing us that the antidote has been delivered to a certain place and asking us to go and pick it up ourselves, presumably to prevent us from figuring out the the rules.”

After a pause, Duan Liye added: “In addition, the quantity delivered each time is different, sometimes a month’s worth, sometimes three months’ worth, and when these antidotes are delivered, they come with a special safe, and after they reach us, we have to apply to the organisation to open the safe before we deliver the medicine to the base each time, and we can only open the safe after the organisation authorises us to do so. ”

Ye Chen was surprised and asked, “The safe box is networked?”

“Right.” Duan Liye nodded: “Not only is it networked, but it also has a self-destruct device,, once we open a new safe, the previous one will self-destruct, and once we encounter violent cracking it will also trigger self-destruction, so only after the organisation authorises it, we can take the antidote from it, and the safe has its own identification function, which can record exactly how much antidote we take out, and we each time We can only take a fixed number of antidotes each time, not even one more, otherwise once the organisation realises that things are out of control, it will also immediately activate the self-destruct.”

Once something goes wrong there, the organisation will immediately stop the supply of the antidote and destroy the antidote in the safe, in this way, at most a week, everyone within this base would die.”

Ye Chen asked with some doubts, “If such an important matter is moved to the internet, in case it is hacked, wouldn’t it be all over?”

“No way.” Duan Liye shook his head, “The organization is not using the internet, it’s its own satellite communication network, and it’s not just ordinary civilian communication, it’s a military communication satellite that was bought from a senior Soviet official through a special channel when the Soviet Union collapsed.”

“Military communication satellites?” Ye Chen asked in shock, “Can this be bought as well?”

Duan Liye explained, “Not under normal circumstances, even the wealthiest individuals and enterprises could not buy military satellites, but at that time it was a rather special stage in time, the entire Soviet defence system was in chaos, and the distribution between these countries after the dissolution was also a muddle and a pile of bad debts, a large part of the heavy weapons in Ukraine at that time were sold back, even the Tu In those days, no one would have noticed that a few satellites were missing, and with a little fiddling, no one else would have known that the satellites were still theirs.”

Chapter 5049

The satellite itself has extremely high security and has been reset with the communication code, so even the person who designed it cannot crack the current communication content, the possibility of being cracked is almost non-existent, but it also has certain disadvantages, the biggest disadvantage is that the satellite is a bit old, or the old generation of narrowband mobile communication satellites, the transmission The speed is relatively slow, so only text and byte commands can be transmitted, like monitoring the status of safes around the world, the safes only need to send a few bytes of commands to the satellite at regular intervals under normal conditions, and if there is an abnormality, the

commands are only a few bytes, and the same goes for activating the self-destruct device, this very small data transmission is no problem at all, apart from that, it can satisfy very few users at critical times of users using this system for voice calls, but it cannot satisfy video signal transmission.”

Ye Chen nodded and said, “That is to say, even though Cyprus’ base might have installed monitoring equipment, the organisation would not be able to view it in real time, right?”

“Right.” Duan Liye said, “The surveillance equipment in Cyprus is all stored locally by them, every time I come over, I will bring a copy of the past week’s surveillance footage back, but this data will not be connected to the internet, it will only be kept in Turkey for retention, and every once in a while, all the data will be submitted to the Right Army Governor’s Office, as for whether the Right Army Governor’s Office will then submit this data to the British Lord, I don’t I don’t know.”

Ye Chen couldn’t help but smile, “Seeing that you are so old, I didn’t expect that you knew quite a lot about this.”

Duan Liye respectfully said, “These were all systematically trained during my time at the Huben Battalion.”

Ye Chen asked him with interest, “Then let me ask you, as far as you know, has this self-destruction device of yours ever been activated?”

“Activated.” Duan Liye said without thinking, “Almost twenty years ago, a base had its self-destruct device activated by the organization because of a major failure, and that time the organization was so ruthless that it had delayed until the day before the normal delivery of the medicine, before temporarily informing the envoy that there was no need to deliver the medicine, and at the same time informing the other section envoy that there was a slight accident on the envoy’s side, and telling him to wait for half a day more, and if the next day morning the envoy had not been delivered, the organisation would authorise him to open the safe and activate the stockpile of antidotes.”

“And then what?” Ye Chen asked with a frown, “The organization kept dragging them out with lies until they were about to die of poison, and then activated the self-destruction?”

“Yes!” Duan Liye nodded heavily and said with a horrified expression, “The organization didn’t send anyone to deliver the medicine and destroyed the spare antidote at the last one, and all the 5,000 people at that base, including the sect leader, the primus guards, the dead soldiers and the dead soldiers’ families, all died of poison and none were spared.”

Ye Chen asked him, “How do you know so well?”

Duan Liye explained, “This is information that the organisation declassified internally, the reason why it was declassified at that time was to warn all bases of the consequences of a major failure.”

Ye Chen suddenly thought of something and blurted out, “You just said that that major failure, was twenty years ago?!”

“Yes!” Duan Liye nodded, “It was twenty years ago, I remember it very clearly.”

Ye Chen’s expression was instantly appalled, his parents had been killed in Jinling exactly twenty years ago!

It couldn't be a mere coincidence that the timing matched so well, could it?

Was there any connection between his parents' death and what Duan Liye said?

Chapter 5050

As soon as he thought this, his pupils tightened, Ye Chen immediately pursued Duan Liye: "What exactly happened twenty years ago that could make your Ying Lord, directly execute several thousand people?!"

Duan Liye shook his head in bewilderment, "I don't know exactly what it was for I only know that the British Lord was greatly enraged at their failure at that time, and that's why he killed them"

Ye Chen raised his sword eyebrows and questioned in a cold voice: "Then do you know, where they met their defeat?"

Duan Liye shook his head, "I don't know either"

Ye Chen thought of what Duan Liye had just said about the five military governorates, and thought that the one responsible for Asian affairs within the Qing Breaking Society was the Central Military Governorate, so he asked him, "Which governorate was the one that experienced that defeat in the first place? Was it the Central Military Governorate?"

Duan Liye shook his head and said, "I don't know, but it's basically certain that it wasn't our Right Army Governorate"

Saying that, Duan Liye added: "Actually, I don't know at all how many deadly bases similar to the Cyprus Copper Mine the Broken Qing Society has around the world, I don't even know how many bases there are under my Right Army Capital Office, all this information, internally, is completely isolated, I only know that there is also the Left Army Capital Office, the Middle Army Capital Office, the Front Army Capital Office and the Rear Army The capital governor's office, but I don't know exactly who is in charge of the other four armies' capital governor's offices and what the exact size is"

Hearing these words, Ye Chen's heart sank once again.

He could not be sure if the failure of the Broken Qing Society twenty years ago, as Duan Liye said, was related to the death of his parents.

It seemed that if he wanted to find out more information, he could only hope to find the higher levels of this Qing Breaking Society.

So, Ye Chen asked again, "What Qing-breaking Society structure are you in Turkey?"

Duan Liye replied, "The highest officer of the Right Army Governorate is the Left and Right Governors, and under their command there are four fellow governors, which can be understood as deputy governors, each deputy governor is responsible for a closed-loop system, and this line in Turkey and Cyprus is one of the closed loops."

Ye Chen asked, "Then who is your deputy governor of this closed loop?"

Duan Liye said, "It is Zhang Qianshuo, Zhang's deputy governor."

Ye Chen asked again, "This Zhang Qianshuo, is he a martial artist?"

“Yes.”

“What is his cultivation level?”

“Fifth Sky of the Dark Realm.”

With a slight shock in his heart, Ye Chen frowned and asked, “What other industries do you have in this closed loop, apart from the copper refinery in Turkey, and the copper mines in Cyprus?”

“Many.” Duan Liye replied, “There are also gas companies, large farms and shipyards in Turkey, in addition to that, there are also some garment processing factories, stone processing factories, basically all walks of life, and the overall market value is around eighty billion dollars.”

In Turkey, with a total market capitalisation of US\$80 billion, it can already be fully described as a super business empire, and this is only the industries under the responsibility of one of the deputy governors of one of the five military capitals under the Broken Clear Society.
