

## Ye Chen 5401

### Chapter 5401

Ye Chen took the business card with both hands and spoke, "Thank you, Uncle Feng!"

Feng Zidong waved his hand with a smile, then looked at the time and said, "Ye Chen, it's getting late, I still have to hurry back to Yanjing, so we'll talk here for today, if there's any new news in the future, I'll be sure to tell you first."

Ye Chen bowed slightly and spoke, "Thank you Uncle Feng, if there is anything on my side, I will also be the first to exchange information with you, Uncle Feng."

Feng Zidong nodded his head and said seriously, "When you have time to come to Yanjing, be sure to contact me."

"Good!"

.....

After finishing his conversation with Feng Zidong, Ye Chen had the helicopter parked at the hotel below the mountain re-fly to the villa courtyard and land, and watched Feng Zidong leave by the plane.

Only after the helicopter disappeared on the other side of the mountain did he sigh and, together with Su Ruoli, turned around and went back inside the villa.

Ye Chen did not say a word as he returned to the basement, Su Ruoli also silently followed him, until she returned to the basement, she opened her mouth and asked Ye Chen, "Mr. Ye, just now Uncle Feng said that the Broken Clear would send some kind of Four Counts, are they very powerful?"

Ye Chen shook his head and said truthfully, "I don't know exactly what strength these people are, but since the Huben Battalion are all already Dark Realm experts, then these four beloved members of the Ying Lord of the Broken Qing Society must be much stronger than Dark Realm experts."

Su Ruoli said with a shocked expression, "A Dark Realm expert is already a very rare top-level expert, and if it is much stronger than a Dark Realm expert, wouldn't that be the Realm of Transformation or the Realm of Patriarch? Could there really be martial artists of these two realms?"

Ye Chen said seriously, "There are people outside of people, and there are heavens outside of heaven, and it is possible that these four people are stronger than the so-called Zong Shi realm martial artists."

Ye Chen guessed that these so-called Four Counts must be experts who, like himself, had aura around them.

People who possessed spiritual qi were naturally too much stronger than martial artists.

Moreover, perhaps the strength would even be above his own.

What's more, Ye Chen could not figure out the real intention of these Four Counts. They might be looking for Lin Wan'er and the ring that she had given him, or they might be looking for him who had ruined their good deeds twice in America and Northern Europe, or even both.

Thinking of this, Ye Chen could not help but feel a little worried in his heart.

If one of the Earls of the Broken Clear Society approached him, then he still had the certainty and confidence to be able to deal with it, but if both Earls appeared before him together, he was afraid that he himself would have no chance of winning.

Moreover, as he was sitting in Jinling, if an unscrupulous one really came to his door, he would be able to deal with it with certainty, but if one of the Earls of the Qing Breaking Society found the Wanlong Hall or the deadly base in Cyprus, neither Wan Bajun nor his master Qiu Zhiyuan would have any chance of winning.

Perhaps, they both would be beheaded by the other side straight away!

Moreover, Ye Chen knew one thing very clearly, the group of Primus Guards that had captured Lin Wan'er in the first place had been sent out from that dead soldier base in Cyprus. If the Broken Qing Society really wanted to find out their own clues, there were only two directions, one was to check backwards from the time Lin Wan'er was attacked, and the other was to check forward along the trail of Lin Wan'er's attack.

If we go backwards, we will naturally find out where Lin Wan'er has gone and where we have gone.

#### **Chapter 5402**

To go forward, it was natural to find out where this group of Primus Guards had come from, who they had met and what they had done along the way.

If they only investigated backwards, Ye Chen was not afraid in the slightest, because he had already covered up all the clues related to himself with Helena's help, and it was impossible for them to find him.

But once they started to investigate forward, then their first target would definitely be Cyprus's Deadman Base!

And if they only sent an envoy like Duan Liye, Ye Chen wouldn't worry that they would notice anything unusual.

However, once one of the Four Earls went to Cyprus, then he might find out at once that everyone in the entire Cyprus base had been de-toxified, and then immediately discover the problem!

Therefore, the most urgent task at hand was to find a way to save the lives of those primus inter pares and dead soldiers in Cyprus.

Once they were exposed, then they would definitely die, and even the Ten Thousand Dragons Hall would not be able to protect them!

As soon as he thought this, Ye Chen immediately began to think of a countermeasure.

He felt that although mastering aura would qualitatively increase his strength, it was not so invulnerable and indestructible, so these four earls were not really invincible.

Moreover, Ye Chen firmly believed that on the level of killing power, even the most powerful experts were no match for modern heat weapons.

A martial arts expert could stop an ordinary bullet, but definitely not an artillery shell, while a conventional missile or rocket could kill everything within a range of hundreds or even thousands of metres, regardless of whether you were a Dark Realm expert or a strong person proficient in aura, you would be guaranteed to be turned into ashes when one shot came.

So, as long as the method is right, ordinary people may not be unable to fight with one.

So, he took out his mobile phone and called Wan Bajun, who was far away in Syria.

When the call was answered, Wan Bajun said respectfully, "Mr. Ye, what are your instructions?"

Ye Chen asked him, "Broken Army, can you get the best life detection system, including but not limited to military-grade life detection radar, infrared and thermal imaging equipment?"

Wan Bajun said, "Mr. Ye, infrared detection equipment as well as thermal imaging equipment are standard for all the special soldiers of the Wan Long Temple, as for the life detection system, this is relatively general, I don't quite understand your general needs."

Ye Chen explained, "I don't know much about the military either, but I want you to help me implement a function."

Wan Bajun immediately said, "You speak, Mr. Ye, and my subordinate will first take notes."

Ye Chen spoke, "First of all, I need to have a device that can cover the entire base of your Wan Long Dian, or that copper mine we took down in Cyprus, this device can detect, 24/7, living beings within the entire coverage area, which means I don't care what kind of principle he uses, whether it's infrared or thermal imaging, or other life detection logic or not, what I need is that once a stranger enters his policy area, he will be able to respond immediately and mark the location of the other party in real time!"

Wan Xiaojun said, "Back to Mr. Ye, I'm not too sure if there is such a complete solution at the moment, but I can find a way to inquire about it."

Ye Chen gave a hmph and added: "My second request is that you must find a way to get me a few close defense guns and combine these close defense guns with the system I just mentioned, that is to say, once you find a stranger infiltrating, lock him down with the close defense guns and once he has a problem, chase him to death! Be like a close-in defence missile, firing hundreds of rounds a second and achieving all-round fire coverage!"

### **Chapter 5403**

Wan Breaking Jun exclaimed, "Mr. Ye ..... subordinate dares to remind you ..... close defense gun it is not a machine gun ah ..... it is a machine gun, and it is You can interpret it as an oversized Gatling machine gun that is tens or hundreds of times more powerful, that is a weapon that is used on warships to shoot missiles or on land to shoot fighter jets, if you take this thing to shoot people and blow them to pieces with one shot, would it be too big of a use?"

Ye Chen said seriously, "No! I'm a man with a phobia of insufficient firepower! That's why we must leave plenty of affluence in terms of firepower! Even if a single shell from the close defense guns can shatter a

man, you must still give me hundreds or thousands of shells in one breath! Remember one thing, but any of our targets that still have a piece of debris weighing more than 50 grams after being greeted by this system will be a dereliction of duty on your part, Wan Bajun!”

Ye Chen had witnessed how martial arts masters were slaughtered by modern weapons in New York, not to mention that these masters were very strong, but when the bullets really came in as dense as rain, they could not resist for a few seconds.

Therefore, if the defensive weapons were replaced with close-in defence guns, even those who were even stronger than oneself would definitely die by then!

Moreover, Ye Chen himself knew very well that if he was needed to assassinate a certain martial arts expert, he could also conceal his scent and not be detected by any martial arts expert, but that was only limited to concealing it from the senses of the martial arts expert, and if he were to directly dispense with martial virtues and use high-tech equipment for vigilance, he himself would not be able to conceal it from technology.

Just like the thermal imaging system, as long as something emits heat, whether it is a person or an object, it cannot escape its detection. If one hides inside a thick enough cover there is still a chance of not being detected, but once one wants to actively infiltrate, it is simply impossible to wrap the cover around one’s body, and then even an expert who has mastered aura will definitely be discovered.

Therefore, Ye Chen intended to have Wan Bajun prepare one set of such a big killing weapon in Syria and one in Cyprus, so that in case a certain unscrupulous count really looked for it, he could blow it to dust!

Wan Bajun didn’t know who Ye Chen was going to deal with, but when he heard Ye Chen say so, he knew that there must be a secret enemy, so he hurriedly asked him, “Mr. Ye, is something wrong?”

Ye Chen didn’t hide anything from him and spoke, “I heard a news through a special channel, the top four experts of the Broken Qing Society, have all come out of the mountain now, they might, each one of them is no worse than me, although we don’t know if they will come after us yet, but there is always nothing wrong to prepare in advance.”

Wan Bajun thought about it and replied, “Mr. Ye, getting close defence guns is not a big problem, although my subordinates cannot buy the most advanced close defence guns in the world today, but the former Soviet Union used to have a lot of ak-630 and 30mm close defence guns flowing into the international arms market, although the price is extremely high, but with the current capital reserve of Wan Long Temple, it is easy to buy a few sets back and put Once we use this kind of equipment in Cyprus, I am afraid that the Cypriot officials will immediately intervene, and I am afraid that there will be some trouble then.”

Ye Chen spoke: “You don’t have to think about this, because this defense system, is our last line of defense, once a top expert really kills us, if we don’t counterattack, all the people in the copper mine, there is only one way to die, no one can escape! Therefore, once the other side is looking for us, we must first shoot the other side’s experts, then blow up the copper mine in Cyprus and evacuate everyone to Syria overnight, in this way, not only will we lose one of our top generals, but we will also cut off all clues and make them unable to do anything!”

## Chapter 5404

Ye Chen was not afraid of the Four Counts of the Qing Breaking Society, what he feared was that Cyprus and Syria, two places that he could not reach or take care of, would suddenly be struck by these people one day.

Especially Cyprus.

The fate of those dead soldiers, those primus guards, their families and children was already extremely miserable, and if the Four Counts found out about the abnormality, they would definitely suffer a disaster.

Therefore, Ye Chen needed Wan Bu Jun to prepare for everything in advance, especially Cyprus, if the other side resumed the line of Lin Wan Er, Cyprus must be a destination that the other side would never spare.

According to Ye Chen's idea, Wan Bajun must first take the time to equip Cyprus with close defense guns, and once the other side comes to his door, he will immediately use saturation attack to blow him into ashes, and then immediately start the "overwhelming nest plan" that he had set before.

The plan was to evacuate the entire copper mine in an orderly manner and then blow up the mine completely. Funky Corner

As the copper mine is located right next to the coastline, the best option for evacuating the personnel is to evacuate to the vast ocean.

In this world, it is difficult to cover one's tracks, whether by land or by air, and the sea is the best option to wash away all traces.

Even a 100,000-ton cargo ship is a drop in the ocean, and the tides, which run day and night, leave nothing for the enemy to explore.

You know that 29% of the world is land, while the remaining 71% is all ocean, and, while every piece of land has its own home, two-thirds of the ocean is a public sea not owned by any country.

So, once a ship is out at sea, no one can find it if he doesn't want it to be found.

On top of that, ocean transport accounts for more than two-thirds of the world's international freight, and there are more than forty million containers drifting on sea routes all over the world. Ye Chen only needs to take out forty of these containers to load up everyone in the copper mine, and combined with the resources of the Isu shipping, he can transport these forty containers to any port in this world, pull them out of the Mediterranean Sea, turn them around on the Eurasian route. Even if the Qing Breaking Society brought out all the Great Lohas, they would not be able to find out what was going on.

Therefore, as long as the plan can be executed perfectly, even if the US government comes looking for it, not to mention the Qing Breakers, it will be difficult to find any substantial clues.

When the time comes, the British master of the Qing Breaking Association will definitely encounter the biggest test in his life. A count will vanish into thin air, and so will the entire dead soldiers base, and no matter how much he investigates, he will not be able to find out anything, which will definitely make

him extremely doubtful about his life, and I am afraid he will not be able to sleep for the next few months.

Therefore, when he thought of this, Ye Chen was suddenly full of expectations for the Overwhelming Nest Project.

Whether it was in New York or in Northern Europe, it was only a small blow to the Qing Breakers, but once the Nest Overlap Project was implemented, for the Qing Breakers, it would be like being shot in the dark forest in secret, which would not only bring them serious harm, but also scare them half to death!

At this moment, Wan Bajun also understood Ye Chen's plan, so he immediately said, "Don't worry, Mr. Ye, my subordinates will immediately find a way to procure the close defense cannon, then take it apart and transport it to the copper mine, and then assemble it."

Ye Chen immediately identified the key point from his words and said offhandedly, "Broken Jun, the only clue that could possibly be found out about the whole plan is the close defence cannon! Even if we could destroy the entire copper mine, there is no way we could let the clues related to a few close defense cannons evaporate. Once the close defense cannons are fired, we must retreat quickly, and I am afraid there is not enough time to pull down the close defense cannons, moreover, even if there is time to pull down the close defense cannons, it is useless, hundreds of shells are fired in a second, and it is impossible to clean up those shell fragments, so if the Broken Qing Society comes behind to investigate, they will definitely So if the Qing Breaking Society comes to investigate later, they will definitely find out that their Count died from the close defense cannon, and then they will go to the global arms market to look for clues related to the close defense cannon trade, and perhaps they will be able to find the Ten Thousand Dragon Temple!"

## **Chapter 5405**

Wan Bajun couldn't help but smack his lips and said, "Mr. Ye, what you said makes sense, something like the Close Defense Cannon, we don't have it in our hands, and as far as I know, Commander Hamid doesn't have such a powerful weapon of mass destruction there either, so there is no other way but to go to the arms market to buy it;"

"And this kind of thing, usually only the Russians or those arms dealers in the former Soviet Union member states in Eastern Europe sell, we have to inquire layer by layer, so it is not very realistic to steal a few units or rob a few units, and it is also not realistic to buy them and then silence them, once there is a fish that escapes the net, the whole thing will be exposed, and then we may not even have the close defense gun installed, we will already be scolded by the global arms dealers The painful scolding ....."

The first thing you need to do is to get a good idea of what to do.

Wan Xiaojun asked, "Mr. Ye, what's the best way?"

Ye Chen said, "You can find a few American members from Wan Long Temple, have them disguise themselves as people from the American Blackwater Company, go and look for sellers of close defense guns, once you find them, make a private deal with them in the name of Blackwater Company, say that this equipment is to be shipped to the Middle East to help the United States fight the war, it is rather sensitive, and then make a low-key deal. "

Wan Breaking Jun said offhandedly, "Good idea! Framing Blackwater and having the Broken Clear Society go over to Blackwater to investigate, not only will it divert their attention, it will also cause Blackwater no small amount of trouble! Damn it, we at Ten Thousand Dragons Temple and Blackwater have always been at loggerheads, and with the backing of the United States, they've been tripping us up a lot, and they have dirty hands, so although it's not very honorable for us to do this, it's a perfect opportunity to weaken them!"

Ye Chen asked him, "Does the Hall of Ten Thousand Dragons have gold reserves?"

"Yes." Wan Xiaojun said without thinking, "We have almost a ton and a half of gold reserves, which should translate to around a billion dollars."

"Good." Ye Chen instructed, "Make sure to trade in gold, you can give them 10% more on top of the gold price, but definitely not in cash, let alone in cash remittances!"

"Okay!" Wan Bajun immediately said, "Don't worry, Mr. Ye, my subordinate understands! At that time, all transactions will be made using gold, I will have people refine the gold in advance, when the time comes, we can definitely not find any clues if we start with the gold"

Ye Chen said, "Since you want to do a show, you must do a full set, you first find a way to investigate how many men Blackwater has in the Middle East, then find a way to quietly capture two or three of them, then hide these two or three men, you then select the men from the Hall of Ten Thousand Dragons who are most similar to them in stature and age, have them disguise themselves as these men from Blackwater, take their documents and impersonate them to negotiate business in Eastern Europe, and directly give Blackwater a seat in this black pot!"

Wan Bajun said without thinking, "Mr. Ye, this is easy for you to say! Blackwater also has a lot of mercenaries in Syria, and they've been busy helping the US army transport the oil extracted from Syria recently, so I'll personally go out and kidnap a few people easily!"

Ye Chen immediately said, "Good! It's not too late, you should go and do this today! After the guns are purchased, choose two to three high points in the copper mine that are covered by each other, and on the chosen high points, build glass houses with one-way glass, and place the guns inside the glass houses to ensure that they are in a state of readiness at all times, and once the guns lock on to the enemy, fire directly through the glass!"

As he spoke, Ye Chen muttered to himself, "The shells for the close defence guns will cost a thousand dollars a round on the black market, but if three guns are ready and one gun fires a hundred rounds a second, that's only 300,000 dollars a second. When the time comes, shoot me to death!"

## **Chapter 5406**

Hearing Ye Chen's instruction, Wan Bajun said without thinking, "Don't worry, Mr. Ye, I will do my best to dare to make a good layout before the other party comes, when the time comes, I will personally go to the copper mine and sit in the town, I will make sure that he will not come back!"

"Good!" Ye Chen said, "Right Broken Army, I have one more thing, since the plan to overthrow the nest is on the line, then I suggest that we might as well start the evacuation of personnel earlier."

Saying that, Ye Chen added, "Once the other party suspects that there is something wrong with this base or wants to come to this base to check for clues, they will only make an entry point from the ground, and we won't act with him, we will open fire and finish him off at the first opportunity, so there is no need for the dead soldiers underground and their families to remain underground;"

"I suggest you prepare a cargo ship now and wait for the night to evacuate all the dead soldiers and their families to the ship first, so that the primus guards and their families above ground are also ready to retreat at any time, just like an earthquake drill, and arrange the details of the retreat first;"

"For example, once the retreat starts, who is responsible for covering the families, who is responsible for the headcount, who is responsible for the transfer of important supplies, who is responsible for the final full-scale demolition, everyone divide the work in advance, this will also reduce the pressure of the transfer when the overwhelming nest plan starts, if only the ground manpower is retained, when the time comes, you can let them devote their energy to take down the close defence guns and take them away in time, after all, your Syrian base has to be used as well."

"No problem!" Wan Xiaojun immediately said, "My subordinate will first kidnap Blackwater's men, then I will go to the copper mine and plan it properly with my master, so that he can start working on the preparations immediately!"

Ye Chen urged, "By the way, don't kidnap anyone from Syria, after all, you are in Syria now, if you do kidnap someone, it is possible that you will also be suspected."

I will kidnap them from Iraq and bring them back to Syria quietly."

Ye Chen smiled, "Good! Let's do it!"

.....

At this very moment.

The outskirts of the city of Nordic Bergen.

The farm where Lin Wan'er had lived at first had been tightly sealed off by the police.

The farm, the wooden structure of the cottage, had burnt down to a single frame, but even so, multiple police cordons had been drawn around it.

When the police first found a number of burnt bodies here, and most of them died of gunshot wounds, this was immediately classified as a major criminal case, a rarity in Northern Europe in recent years, and the Nordic police have been racking their brains to investigate, but have not been able to find any clues.

At the moment, all the bodies at the scene have been taken away and disposed of, all the useful physical evidence and clues have been extracted, and all that remains is this ruin where someone once died.

A vintage Porsche 911 with an open top roared down the country road and pulled up to the side of the road where the farm ruins were located.

**Chapter 5407**

Driving the car was a middle-aged Asian man who looked to be in his thirties, while on the passenger side sat a beautiful Asian woman who looked to be in her early thirties and charming.

After the car stopped, the man driving the car looked at the burnt to rubble wreckage and sighed, saying helplessly, "The British Lord's temper is too explosive, if it wasn't for his old man who had to blow up the scout who came to explore the site, this place wouldn't have been burnt to this state. ..."

The beautiful woman on the passenger side bristled, "You've served beside Lord Ying for so many years, you still don't know his old man's temper? By leaving those eight words, Lin Wan'er wasn't just taunting his old man, she was also telling him that the ring was no longer on his person, and that was what Lord Ying was most angry about! What Lord Ying wanted most was that ring, and Lin Wan'er had lost it, which meant that even if he found Lin Wan'er, he might not be able to find that ring!"

"Hey ....." the man had a depressed look on his face, "The clues at the scene are gone, the ring is also unknown, I really don't want to come out and get involved in this mess, can't I just close down and cultivate when I have this time? I can see that Uncle Changsheng's mastery of aura has gone up another level.

The beauty said indifferently, "I don't want to come either, why don't we let Chang Sheng Bo check it out himself, I don't bother to grab any first credit ....."

After saying that, she helplessly said: "But who let Chang Sheng uncle must go to China ..... British Lord recently felt that Lin Wan'er may not really be in China, perhaps in Russia's Far East, or North America's Arctic Circle near, so that is why you and I came to Northern Europe to trace the origin, is considered to give Chang Sheng uncle to check the gaps to fill in the gaps. "

The man stretched his back and sighed, "It's still Uncle Zhongyong who is smart, he said he was going to New York to investigate the failed attack on the An family last time, but in fact, he must have gone to the flowery world of New York to relax, and the two of us have to be miserable to do any investigation."

He said, pointing to the ruins that had burned to ashes, and said dissatisfiedly, "Investigate, investigate, what the hell to investigate, it's in this state, what else is there to investigate."

The woman hugged her shoulders and said, "Since Lord Ying has given the word, you and I must pay some attention."

She sighed and said, "Uncle Jian Gong, there are only two ways to find out how Lin Wan Er left Northern Europe, or how the Primus guards we sent disappeared in Northern Europe, one for each of us, I'll be generous and let you pick first."

The man in the driver's seat was Jian Gong Bo, one of the four earls of the Broken Qing Society, whose real name was Ou Bojun.

Ou Bojun touched the steering wheel and smacked his lips, "Ladies first, it's better for Uncle Ding Yuan to choose first!"

Saying that, he couldn't help but tease, "By the way, if Uncle Ding Yuan can become a Marquis or Duke of Ding Yuan in the future, don't forget about Ou Bo Jun!"

The woman on the passenger side was the Four Great Counts, Uncle Ding Yuan, Yun Ruge.

## Chapter 5408

Although Yun Ruge was a woman, she was very strong and had fought for Lord Ying in his campaigns in earlier years, so she was named Ding Yuan Bo by Lord Ying, and was the only woman among the Four Great Counts.

Originally, the British Lord of the Broken Clear Society established five ranks of titles within the Broken Clear Society, namely, Duke, Marquis, Bo, Son and Male, in accordance with the ancient system in China. Illumination Court

However, since the Dukes and Husbands were important vassals who held high positions in ancient times and ruled over one side of the country, and the Qing Breaking Society has never been divided into titles, these two ranks have only been created but not established within the Qing Breaking Society so far.

Because of this, apart from Lord Ying, there are now four Earls under the Society.

However, Lord Ying had promised that once someone could help him find Lin Wan'er and the ring and get what he wanted, he would immediately make him a marquis.

Once he became a marquis, he would have the opportunity to choose a place in the world as his own fiefdom, and cultivate his own power on the fiefdom.

At this moment, Yun Ruge smiled to herself and spoke, "If I could really find Lin Wan'er and find that ring that Lord Ying wanted, I would never have been made a marquis."

Ou Bojun laughed, "What? You're afraid that you'll be shaken by high merit, aren't you?"

Yun Ruge waved her hand, "I'm just light-hearted, no title is as important as strength. If I really win the first merit, I'll be satisfied if Lord Ying can reward me with a few pills."

Ou Bojun nodded and said with a smile, "Come on Ding Yuan Bo, two directions, you choose one first."

Yun Ru Ge thought for a moment and said, "I'll check the primus guard line, Lin Wan Er is too cunning, I might not be as smart as her."

Ou Bojun was a little disappointed in his heart, but still nodded and said, "Fine, then I'll go with Lin Wan'er's line."

In fact, Ou Bojun preferred the primus line, after all, this line was still relatively promising, if the missing primus could not be traced in Northern Europe, he could still try his luck in Cyprus.

However, Lin Wan'er's line was not really promising.

Lin Wan'er had evaporated from here, and she could have gone anywhere in the world, so it would be difficult to find her.

The reason why he let Yun Ru Ge choose first was because he had always had some thoughts about Lin Ru Ge and wanted to have fun with her as a dual cultivation partner. Although he didn't have any dual cultivation techniques, it was still a good deal to find a woman as strong as Yun Ru Ge.

Because of this, although he did not want to choose the line of Lin Wan'er, but seeing that Yun Ru Ge had chosen another one first, he had no other choice but to accept it.

At that moment, Yun Ru Ge suddenly sighed and said, "Forget it, let's leave the primus guard line to Jian Gong Bo, I'll go check on Lin Wan Er."

Ou Bojun was surprised and asked, "Why has Uncle Jianyuan changed his mind? Lin Wan'er is the worst line of investigation!"

Yun Ru Ge laughed lightly and said casually, "It's not easy to investigate, and there are no clues to go on, but because of this, I can also go to any place I want, just to take my chances.

Ou Bojun was delighted and immediately gave a thumbs up, praising, "High! Uncle Ding Yuan, you are really high! If that's the case, I'll be the one to check out the primus guard line!"

## **Chapter 5409**

He is very clear about Ou Bojun's ways, he talks about ladies first in front of himself every day, but in fact, he is not willing to take any losses in his heart.

Yun Ruge also did not want to pay any attention to him, and did not want to owe him any favors. Since he wanted to investigate the line of primus inter pares, she let him do so, and she did not want to take any first credit, so she might as well take this opportunity to travel around and gain some insight.

So she said to Ou Bojun, "Since Uncle Jian Gong has chosen the primus inter pares, let's say goodbye here and good luck."

With that, she was ready to get out of the car.

Ou Bojun hurriedly said, "Uncle Ding Yuan, there is no village in front of us, why are you getting off here? Why don't we go to Bogan together, then I will go to Bogan airport to look for clues, you can go to the port to look for clues, Lord Ying speculates that Lin Wan Er probably left by boat, you can check along the port, you might get something."

Yun Ruge ignored him, instead she just opened the door and walked down, then stroked her long, charming hair and casually laughed, "What's the difference between going to the port to find out the whereabouts of a ship and going to the port to find out where a fish has swum to? I'd rather not bother with that."

Ou Bojun turned sideways and asked, "Uncle Ding Yuan, so what are your good ideas now?"

Yun Ru Ge smiled, "I don't have any good ideas, I just think that since Lin Wan Er disappeared here, maybe I can find some clues nearby, so I will turn around and find a small hotel nearby for a few days, since Uncle Jian Gong is going to Bogan, then let's hurry up and set off, no need to waste time here."

Ou Bojun had no choice but to say, "Alright, I'll look for clues at the Bergen airport first, the plane took the Primus directly to Bergen airport in the first place, I'm going to trace the origin of the Primus from Bergen airport and see what the Primus went through all the way here, if Uncle Ding Yuan doesn't leave Bergen anytime soon, we can still have a few days of company together. "

Yun Ru Ge said seriously, "I wouldn't advise you to waste too much time in Bergen, why don't you go to Cyprus and ask the families of the Primus first?"

"There's no rush." Ou Bojun knew that Yun Ru Ge probably did not want to have too much contact with himself, but he wanted to take this opportunity to stick to Yun Ru Ge for a few more days, so he said, "I think the primus guards who came to Bergen last time should not have any problems per se, the probability is that they were discovered by the enemy in advance and that's why they were all wiped out, just like in New York, so more clues should still be here, going to Cyprus shouldn't make much sense."

Yun Ru Ge shrugged and thought to herself, "Why do you have to stick to me like a dog's skin when you can have so much free time? Wouldn't it be better if we just left each other and went our separate ways? I was planning to go to Eastern Europe after we parted ways, what do you have to do here?"

Although Yun Ruge was disgusted with Ou Bojun, she could only stay in Northern Europe for the time being as she saw that Ou Bojun did not intend to leave Northern Europe in the next few days. She knew Ou Bojun's character very well, if he knew that she left Northern Europe directly, he might come to the British Lord in the future and accuse her of perfunctory actions.

It would be a great sin in the eyes of the Lord if she did not take action, as opposed to just whining about it.

So she decided to stay in Northern Europe for a few more days, and wait for Obojun to leave Northern Europe before she herself left the place, so as not to fall foul of him.

With that, she said to Ou Bojun, "Suit yourself Uncle Jian Gong, I'll walk around first and take a look, maybe Lin Wan Er left the ring somewhere here when she left."

## **Chapter 5410**

Ou Bojun grunted and shook his head, "Then if that's the case, Uncle Ding Yuan will have picked up a big leak!"

After saying that, he wasted no more time and said to Yun Ru Ge, "I'll go first Uncle Ding Yuan, let's keep in touch at all times!"

.....

A few hours later, night was falling in the Middle East.

The copper mine in Cyprus had already started to quietly evacuate those dead soldiers and their families.

One by one, they were taken by speedboat to the high seas, where a freighter with a new face was waiting.

As the dead soldiers were gradually evacuated, the demolition team executing the nesting plan began to check all the blasting points throughout the copper mine.

Ever since Ye Chen had proposed the Overlord's Nest plan, they had already laid countless blasting points here, each of which had been carefully calculated. Once the order was given, they would install

the strong explosives used in mining in these blasting points, which would blow up the entire underground copper mine in a matter of moments.

As the copper mine had been heavily modified for the life of the dead, its internal space was much larger than that of an ordinary copper mine. Once the bottom of the mine was blasted, it would definitely cause the entire ground to collapse, and the depth of the collapse would be at least a dozen metres, by which time, the dead soldiers' quarters would be completely filled in hundreds of metres deep underground, and the ground buildings would be completely destroyed due to the collapse of the ground.

If it was prudent, Ye Chen could also withdraw all the people from the copper mine silently now and blow up the place directly, giving the Broken Qing Society a hand to the bottom of the barrel.

But that would not be a big enough loss for the Broken Qing Society.

So, Ye Chen wanted to build a different kind of super mausoleum here, for a certain Earl of the Broken Qing Society.

And because of this, he needed the close-in defence guns to be able to be arranged in place in the shortest possible time.

Meanwhile, a convoy of transports was racing down the sandy Syrian road.

The convoy consisted of about forty oil tankers, in addition to a few military Land Cruisers and APCs, which roared across the border into Iraqi territory.

The oil trucks were loaded with oil stolen from Syria, which the Americans were taking to the US bases in Iraq, and more than half of the transporters were Blackwater mercenaries.

As the largest mercenary organisation in the US and the world, Blackwater's biggest client is the US government, which loves to follow the US military around the world to make money.

By the time the convoy was delivered to Iraq, it was already late at night and the US troops who were escorting the convoy went straight to their barracks to rest, while the Blackwater men stayed in a marching tent on the outskirts of the US base.

They had a small base here, about a hundred people in size, and also quite a lot of weapons and equipment with provisions and ammunition. Although they did not set up camp inside the US base, it was almost a wall away from the US base, so they were not too cautious in terms of security.

At this moment, the man in charge of the camp was coordinating his work, and the armed men who had just completed a trip to escort the oil convoy were allowed to rest, while he needed to arrange another small team to return to Syria with the convoy as soon as it had finished unloading the oil, and to escort the oil-laden convoy back tomorrow.

To no one's surprise, Wan Bajun had already sneaked into the camp with Chen Zhonglei and another six-star general.

After sneaking into the camp, they immediately selected three sentries who were on duty. Since no one dared to directly sneak into the US base, their sentries were very perfunctory and did not have any caution and alertness that a sentinel should have. Funky Corner

Soon, the three were knocked unconscious by Wan Bajun and the others, and were taken away from the camp without a sound.

At this point, Ye Chen's plan to overturn the nest was in full swing!
