

## Ye Chen Wade 2371

### Chapter 2371

A desperate Walter was dragged out of the hospital by Richard Chen's men.

After he left, all video surveillance records of him were cleverly and completely erased by Richard Chen's men.

As a result, there was no way for anyone to find video footage of him in Jinling City, and it was even more impossible to find his movements.

After Walter's family discovered his disappearance, they would come back to Jinling to look for him, and would find that he had vanished from the face of the earth.

Before leaving, Ye Chen explained to Richard Chen that he would arrange for professionals to give Walter a little mercury dichloride, which Walter likes to use, and when he falls ill like Wang Dongxue's father, he would immediately put him on dialysis.

This is the so-called "do unto others as you would have them do unto you".

For some devils with extremely corrupt character, this method can bring him real punishment.

Wang Dongxue, on the sidelines, watched Ye Chen decide Walter's fate in such a pleasing way, and was deeply moved.

During this period of time, she witnessed her father's entire process from the onset of illness to further deterioration and then to unconsciousness.

The pain her father suffered was vivid in her mind.

So, after learning that Walter was behind all this, she naturally hated him with a passion.

The company's main business is to provide a wide range of products and services to the public.

The way Ye Chen dealt with him, she wouldn't have dared to think about it, much less be able to realize it.

Therefore, the gratitude in her heart for Ye Chen has risen to an unparalleled level.

So, after Richard Chen led people to leave the ward, Wang Dongxue closed the door, the moment she came back, she immediately knelt in front of Ye Chen, choking: "Young Master, this matter is really thank you so much. If it wasn't for you, I might never know that it was Walter who was behind all of this.

Ye Chen quickly reached out to help her up, serious: "just a hand up, no need to be so polite, this Walter is malicious and vicious, so I'm not just to help you, but also for the people out of harm."

Wang Dongxue sighed, choked: "I really did not expect, so many years of classmates, Walter could still do such a dirty thing to."

She wiped her tears, looked at her mother, who was unconscious on the couch, and asked, "Young Master, is my mother all right?"

Ye Chen smiled slightly and said: "Auntie is only temporarily unconscious, use a cooler wet towel to wipe her face and she should wake up."

Saying that, he also said to Wang Dongxue: "You first wake up the aunt, and then you give uncle medicine, uncle should be able to recover soon after taking the medicine, so you and aunt can be completely relieved."

Wang Dongxue incomparably excited, busy saying: "Okay young master, I'll go."

Just say, Wang Dongxue quickly ran into the bathroom.

Soon, she took a wet towel and ran out of the bathroom.

She ran to the sofa, with a wet towel carefully wiped her mother's cheeks, and a moment later, saw her mother eyelashes slightly moved, then opened her eyes.

"The first thing Sun Yvonne did when she opened her eyes was to ask a furious question: "Where is that Walter? He harmed your father, don't let him go!"

Wang Dongxue took one look at Ye Chen and hurriedly said to Sun Yufang, "Mom, Walter has been arrested and is probably going to spend the rest of his life in prison."

Sun Yufang said with great resentment, "He put your father in this situation, only to have him put in jail is really too cheap for him, if your father can't be saved, he should pay for his life!"

She said, remembering her husband's sufferings and sins, she could no longer control her tears, covering her face and crying.

Wang Dongxue hastily advised, "Mom, you do not have to worry too much, Ye Chen has found an elixir for Dad, take it and it will cure Dad's kidneys."

"What?" Sun Yufang exclaimed, "Can you take medicine to cure your father's kidney? How is this possible? Isn't it medically true that kidney failure is almost irreversible?"

#### Chapter 2372

Ye Chen spoke up at this time, "Auntie, for the vast majority of doctors, kidney failure is indeed irreversible, but our ancestors still left good prescriptions, and it's not very difficult to treat."

"Really?!" Sun Yvonne couldn't hold back her excitement and choked out, "Then Mr. Ye should help me to save my husband. He has never done anything bad in his life."

After saying that, she looked to the side of Wang Dongxue, grasped Wang Dongxue's hand, crying and said: "He spent more than twenty years to raise Dongxue into material, he has not witnessed Dongxue to wear a wedding dress to marry, not to enjoy the family joy of the three generations in the same house if he just left, God is really blind."

Ye Chen nodded his head at this time, and said solemnly: "Auntie, don't worry, as long as uncle takes the medicine I prepared, it will definitely cure the disease."

He said, he hurriedly instructed Wang Dongxue: "Dongxue, it's not too late, you find a cup and pour half a cup of warm water, put the pill I gave you into the warm water to dissolve, and then feed uncle to take it!".

As soon as Wang Dongxue heard this, she hurriedly nodded her head in succession and subconsciously said, "Okay less".

The young master's master word almost came out, Wang Dongxue realized that the mother did not know Ye Chen's real identity, so hastily changed his words: "Well, Ye Chen thank you, I'll go and get it!"

After saying that, Wang Dongxue hurried to the coffee table, boiled a little warm water with an electric kettle, and after reaching half a cup, took out from her pocket the rosewood wooden box that Ye Chen had given her.

As soon as the wooden box was opened, there was an inconspicuous pill placed in it.

However, although the pill was not very impressive, after the box was opened, the refreshing medicinal fragrance overflowed and quickly filled the entire hospital room.

This was the Blood Dispersion Pill that Ye Chen had concocted to save the heart.

Sun Yufang also smelled the medicinal scent, and suddenly felt that her whole body was quite energetic, so she couldn't help exclaiming, "This medicinal scent is too good! It tastes much better than the herbal medicine I usually come across! It's like the whole body smells so much better with it!"

Wang Dongxue also had the same feeling.

Smelling the scent of this medicine, it feels like nasal congestion, when suddenly smelling the strong peppermint brain, the feeling can even be instantly up.

At this moment, Wang Dongxue had already firmly believed that this medicine could definitely save her father.

Then, she followed Ye Chen's instructions and put the pill into the water.

Just when she was about to find a disposable chopstick to stir it, a magical scene happened!

As soon as it was put into the water, it immediately dissolved into the water at an extremely fast speed, and in just a couple of seconds, it completely melted!

Moreover, the melted warm water did not become completely cloudy, but was in a translucent state just like the brown sugar water.

Although the color of the water became a little darker, it was still clear to see that there was no impurity in the water.

This stunned Wang Dongxue, because she had taken many traditional Chinese medicines, especially herbal infusions.

No matter how hot the water is, no matter how hard you stir it, there will be a little bit of fine residue left in the cup at the end of the day.

No matter how hot you use the water, no matter how hard you stir it, at the end of the day, there will be a little bit of dregs left in the glass. However, this medicine, without stirring, instantly dissolves in the water completely.

Surprised, she looked at Ye Chen and asked, "Can you just feed this glass of water to my father?"

Ye Chen nodded, "That's right, Uncle is unconscious, but if you help him up, the water can still be fed in."

"Good!" Wang Dongxue immediately took the cup and went inside the hospital room, and her mother, Sun Yufang, rushed to follow.

Both of them helped the unconscious Wang Chengyuan up, and then Wang Dongxue poured a little bit of the warm water from the cup into his mouth, which had turned into medicine.

Then, a miraculous scene that overturned all knowledge of both mother and daughter occurred

### Chapter 2373

As soon as the liquid was half-fed to Wang Dongxue's father, mother and daughter were shocked to discover that Wang Chengyuan's face, which had been as pale as paper, instantly turned a little red.

This is what Chinese medicine calls the color of qi and blood!

If one's qi and blood are strong enough, one's face will be red and shiny; if one's qi and blood are insufficient, one's face will be white or yellow.

The reason why almost all terminally ill patients have a pale complexion, and even their lips have no blood left, is because the body's qi and blood have already been depleted.

This was the case with Wang Dongxue's father.

The extremely serious kidney failure had already put his life on the line.

The whole person, like a dying plant, was withered to the extreme.

However, right after the liquid was ingested, his body began to undergo a drastic change.

This scene, in the eyes of mother and daughter, was like watching a documentary on TV.

Some documentaries, in order to witness nature's transformation from winter depression to spring revival, deliberately use a camera to shoot time-lapse photography to capture the entire process of a forest from winter to spring blossom, and then speed up the process.

In this way, the viewer can see the whole process of nature's recovery within a few seconds!

At that moment, everyone would be astonished by nature's masterpiece.

The mother and daughter at that moment witnessed one such miracle!

Wang Dongyue's father, Wang Chengyuan, was transformed in a very short period of time.

After his skin became red and lustrous, his breathing became much stronger, and his blood pressure, which had been very low, began to rise rapidly in a short period of time, as seen by the monitor next to him!

A moment later, Wang Chengyuan slowly opened his eyes.

At this moment, mother and daughter burst into tears of excitement!

Wang Dongxue laughed and cried at the same time, asking with concern, "Dad! How are you feeling Dad!"

Sun Yufang, who was on the other side, cried with joy and asked, "Wang, are you feeling better?"

Wang Chengyuan's brain didn't respond at once and hurriedly asked them, "How long have I been sleeping?"

Sun Yufang was busy saying, "What else have you been sleeping for how long ..... You've been in a deep coma for several days!"

"Huh?" Wang Chengyuan exclaimed, "Coma for so long? Why don't I feel anything at all? It just feels like I've been sleeping for a long time ....."

Wang Dongxue, who was on the side, hurriedly asked him, "Dad, are you feeling okay now?"

Wang Chengyuan thought to himself, sat up straight and moved his limbs, and said in surprise, "It feels pretty good! It doesn't seem to hurt at all anymore. Did the hospital find a source of kidney for me?"

"No." Sun Yufang blurted out, "You've been unable to find the source of this kidney, thanks to Winter Snow's friend who brought in a miracle pill to wake you up!"

Wang Chengyuan exclaimed, "A miracle drug?! What miracle drug?"

Sun Yufang didn't know how to explain, so she hurriedly said: "Oh my, you don't have to ask so many questions, you are not Chinese medicine, how can you understand this miracle drug? It's better to thank Mr. Ye first!"

When Wang Chengyuan looked up, he saw Ye Chen standing next to him, and he hurriedly said, "Mr. Ye, thank you very much."

Ye Chen smiled slightly and said: "Uncle Wang don't need to be so polite, I'm good friends with Dongxue, these are all hands."

Sun Yufang could not help but exclaim: "Wang, I see that you are now in good shape, I think there must have been a great improvement in your physical condition, why don't I ask Director Chen to come over and give you a checkup."

Wang Dongxue, who was on the side, hurriedly asked Ye Chen in a low voice, "Is it okay if you let the doctor take a look at it?"

Chapter 2374

Ye Chen nodded and smiled: "It doesn't matter, let the doctor come and do a systematic examination."

Wang Dongxue was busy asking in a low voice, "What should the doctor say if asked about the medicine? After all, in the eyes of the doctors, my dad's kidney failure is almost irreversible ....."

Ye Chen smiled and said, "It doesn't matter, the doctors at the People's Hospital have already seen greater medical miracles."

Last time, Ye Chen's father-in-law, Xiao Changkun, was hit by a car and became a paraplegic in the hospital, and all the doctors declared that he could only lie in bed for the rest of his life, and it was impossible for him to have any sensation below his neck, let alone move freely.

However, he was cured on the spot with a blood-dispersing elixir that allowed him to jump on the spot.

At that time, this was also considered a medical miracle.

However, when he brought out the miracle doctor in the eyes of the public, Shi Tianqi, the old man, basically no one questioned him anymore.

It was not only no one who questioned it, but also Shi Tianqi attracted the trouble of Ichiro Kobayashi, who at that time wanted the prescription for the Blood Dispersion Pill to save his heart.

Soon, Sun Yufang ran over with Director Chen who was on night shift.

As soon as Director Chen entered the door, he found Wang Chengyuan sitting on the hospital bed and was stunned by the red color of his face.

"Professor Wang, how ..... are you sitting up? Why are you sitting up?!"

Wang Chengyuan smiled and said, "Director Chen, my daughter's friend gave me a miracle pill, and I feel so much better, not to mention sitting up, but if it weren't for all the tubes, wires, and monitor clips, I think I could get out of bed and do a set of radio gymnastics."

"Oh my God!" Director Chen blurted out, "How is this possible? Your kidney failure is end-stage and can continue temporarily all on dialysis equipment, so how can it get better all at once?"

With that, he immediately ran over and carefully checked Wang Chengyuan's physical indicators.

It didn't matter what he saw, the more he looked, the more alarmed he became!

He mumbled in amazement, "Heart rate is up, blood pressure is up, and oxygen levels are up ....."

"The EKG is also all normal ....."

He pushed his glasses incredulously, looked at Wang Chengyuan and said, "Professor Wang, let's shake hands, squeeze a little and let me feel the state of your muscles now."

"Good." Wang Chengyuan immediately stretched out his hand and shook it with Director Chen, using a little bit of strength.

"Ouch!" Director Chen felt the strength of Wang Chengyuan's hands and exclaimed in astonishment, "You have muscle strength! It's amazing that you've been bedridden for so many days, lost weight so quickly, and suffered from more severe muscle atrophy, yet you still have so much strength!"

Wang Chengyuan was surprised and said, "Director Chen, is that still a lot of strength?"

Director Chen blurted out, "That's fine! You know a lot of people with end-stage renal failure can't even hold hands as strong as a 5 or 6 year old child."

Wang Chengyuan was surprised for a moment and said with an excited smile, "Director Chen! I just didn't use my full power ....."

"What?!" Director Chen blurted out, "So much strength and yet not full strength? Then you use your full strength and I will feel it."

Director Chen looked shocked at first, but then his expression became a bit ugly.

Then, all of a sudden, he shouted, "All right, all right! It hurts, it hurts!"

Wang Chengyuan quickly withdrew his hand and said with an apologetic face, "Sorry, Director Chen, I didn't receive it ....."

"It's okay, it's okay ....." Director Chen threw his hand away and quickly rubbed it with his other hand, saying offhandedly, "This is really unbelievable of you! I'm still a few years younger than you, and you have a stronger hand than I do! It's a miracle that all your indicators are normal so far."

He said, "Professor Wang, wait a minute, I'll have a nurse come over to draw your blood, and take a blood creatinine test, if the blood creatinine is also normal, then you are really completely healed!"

#### Chapter 2375

Blood creatinine is an important indicator of the degree of kidney damage.

The higher the blood creatinine number, the higher the degree of kidney damage.

In a normal adult, the value of creatinine is generally within 133, and a value above this proves that kidney damage has occurred.

Once the value exceeds 450, it can be assessed as kidney failure, and if it exceeds 700, it is basically a uremia.

Wang Chengyuan's blood monitoring today showed that his blood creatinine index has reached more than 1500!

So, to know whether he is really improving or even recovered, the blood creatinine index is the most important reference standard.

Soon, the nurse rushed over.

The nurse was shocked and speechless when she saw Wang Chengyuan's sudden vitality, and only after a long time did she regain consciousness under Director Chen's reminder, she quickly took Wang Chengyuan's blood.

The blood was urgently sent to the laboratory for testing, and the result would take twenty minutes at the earliest.

While everyone was impatiently waiting for the blood results, Wang Chengyuan covered his stomach and asked his wife, Sun Yufang, embarrassed: "Honey, do you have anything to eat? I suddenly feel so hungry here ..... I'm hungry and my stomach is pumping .....".

Sun Yufang wiped her tears and choked, "You've been in a coma for a few days, and your stomach is showing signs of failure, and the doctor said that even the nasal feeding method of inserting a tube into the esophagus from the nose is not applicable, so it's always been maintained by nutritional fluids, and I didn't prepare anything to eat .....".

Wang Dongxue, who was on the side, hurriedly said: "Dad, what do you want to eat, I'll go and buy it for you now!"

After saying that, he hurriedly asked Director Chen, "Director Chen, is there anything my father needs to avoid right now?"

Dr. Chen said, "Your father hasn't eaten anything in the past few days, and his body is quite depleted, so he should focus on quickly replenishing nutrients and calories, but don't eat spicy food."

Wang Chengyuan said, "Dr. Chen, can I have some roast duck buns? A bowl of duck blood vermicelli would have been great!"

If Jinling people were to choose the ten favorite foods, duck blood vermicelli and roast duck buns would definitely make the list.

Duck blood vermicelli, which is duck blood, duck intestines and duck liver cooked together with vermicelli.

Roast duck buns, on the other hand, are similar to Yanjing roast duck, but with roast duck as the filling in the bun.

Wang Chengyuan is an authentic Jinling native, so he didn't eat for a few days, and when he thought of food, he immediately thought of these two.

After hearing this, Director Chen nodded and smiled, "These are fine, but don't put chili in the duck blood vermicelli."

Wang Dongxue hurriedly said, "Then I'll go buy them."

Ye Chen on the side, then spoke up: "Dongxue, I'll go with you."

Wang Dongxue knew that if he left, Ye Chen left here alone to face Mom and Dad, more or less embarrassed, so he spoke up: "Then let's go together .....".

Just when Ye Chen was ready to leave with Wang Dongxue, Wang Dongxue's mother Sun Yufang hurriedly opened her mouth: "Oh Dongxue, Mr. Ye is a valuable guest, and is a great benefactor of our family, you buy something don't let Mr. Ye follow the back and forth, there is a restaurant across the street, you go directly to buy, let Mr. Ye rest here for a while, just can also accompany your father to chat a couple of sentences. "

Wang Dongxue's heart tensed up at the sight of this situation.

She knew her mother too well.

These two years, their own age is also getting older, mother has been urging herself to find someone to get married and have children.

After all, in their view of these older generations, women over twenty-five years old, you have to hurry to get married, this time, career, studies, are not more important than marriage.

But Wang Dongxue has been busy working these years, before the rapid rise of the Imperial Gate Group, and her full dedication has a lot to do.

Because of the single-minded focus on the career, so although Wang Dongxue has been twenty-eight years old, but the relationship above has not any settlement, which made her parents very anxious.

#### Chapter 2376

The parents had not spared her to find some suitable men, Wang Chengyuan even wanted to introduce to her one of his favorite students, but she did not even give each other a chance to meet and have a meal.

Now, Wang Dongxue found that her mother seemed to have a very good impression of Ye Chen, and now she wanted to keep him, she must want to ask him some personal information, or even want to test her relationship with him, and set him up by the way.

So, she hurriedly said, "Mom ..... Ye Chen is a young man and has a generation gap with you, so you can't talk to each other, so it's better not to make things difficult for him."

Sun Yufang hurriedly said: "Look at what you said, although your father and I are a little older, but we also know a lot about young people's things, OK."

Ye Chen then smiled and said: "It does not matter Dongxue, you first go shopping, do not delay the uncle to eat, I accompany the uncle and aunt to chat for a while."

Wang Dongxue's heart was very difficult, she was afraid that her mother would talk nonsense in front of Ye Chen or nosy, but Ye Chen himself said he wanted to stay with his parents, he could not continue to force.

In desperation, she had no choice but to say to Ye Chen, "Then, please stay here with my parents, I'll be right back."

Saying that, she remembered something and hurriedly asked again, "It's so late, are you in a hurry to go home? It's not too much of a delay for you, is it?"

Ye Chen waved his hand: "It's fine, you quickly go."

Wang Dongxue could only nod her head: "Then I'll go first."

After saying that, she also instructed her mother Sun Yufang: "Mom, you don't want to talk to someone Ye Chen, I'll be right back."

Sun Yufang waved her hand: "Oh my, don't worry, what can mom talk to people about? Just chat a little bit, don't worry about it, just go."

Wang Dongxue had no choice but to leave the hospital room apprehensively.

As soon as Wang Dongxue left, Sun Yufang looked at Ye Chen with a smile on her face and asked, "Mr. Ye, how old are you this year?"

Sun Yufang had a very good impression of Ye Chen.

It is not only because Ye Chen helped his own family a big favor to save his husband, but also because of his appearance, a talent, and looked with his daughter Wang Dongxue's talent, an exceptionally good match, is indeed a suitable candidate for son-in-law.

He said, "I'm going to be 27 years old soon." Ye Chen said, "You don't have to be so polite, just call me Ye Chen or Xiaoye.

Sun Yufang nodded and said with a smile, "Then Auntie won't be so polite to you!"

Saying that, Sun Yufang asked, "Xiao Ye, what do you do for a living?"

"I ....." Ye Chen was really asked by Sun Yufang all of a sudden.

"What kind of work am I really doing here? I used to be a full-time woman who did housework, but now all the housework has been taken over by Lan Ma ....."

"But now that her leg is broken, I still have to help out more or less ....."

"But in the end, I've gotten rid of my status as a full-time housewife, so what kind of job do I have now? Private entrepreneurs?"

"Well ....." It's almost like a private entrepreneur, after all, there's an Emperor Group, and a Jiuxuan Pharmaceutical."

Thinking of this, Ye Chen smiled and said, "Auntie, I now have two small companies of my own, so I'm considered an entrepreneurial individual."

When Sun Yufang heard this, she smiled and said, "Individuals are good too! Individuals may not earn as much, but they are relatively much freer! For you young people, earning a lot of money is not really the most important thing; being happy and free is the key!"

Said, she could not help but sigh, said: "I have always said winter snow, do not be so strong work ethic, more money less money can live a wonderful life, no need to make their daily life so tired, but this child just do not listen ....."

At this point, Sun Yufang looked to Ye Chen, said seriously: "Xiao Ye, in the future, ah, you have to help the aunt to persuade her more, let her take advantage of the young, a good love, full of the world to walk around to stroll around, this is not better than boring money? Don't you think?"

Chapter 2377

Ye Chen didn't get Sun Yufang's point for a while, but just listened to her say so, heart more or less a little embarrassed.

After all, Wang Dongxue is his own employee.

Although the Dihao Group is their own, but the entire Dihao Group's operation, management, development, almost all Wang Dongxue a person in the wheel.

In contrast, he is a hands-off.

If Sun Yufang really said, let Wang Dongxue resigned to fall in love, to travel around the world, that would be tantamount to throwing the Dihao Group to the back of the mind.

From his heart, naturally, he did not want such a situation, after all, who would let his right-hand man quit his job and go out to travel around the world.

However, his heart is also very clear, anyway, is to accompany the parents of Wang Dongxue chat, so go along with their words down the chat is right, accurate.

So, he said with a smile, "Auntie, what you said makes sense, in fact, when you are young, you should go out more to experience the world and enjoy life ....."

As soon as Sun Yufang heard Ye Chen say that, she immediately nodded her head with a smile and said, "Right! It seems that Xiao Ye you and auntie's ideas are the same, turn back, you help auntie persuade more winter snow, anyway, you are also an individual, individual time are more free, when she resigned, or a long vacation, you two can go out for a trip together and so on."

"Me?" Ye Chen was stunned, not accosted by laughing: "Auntie, my time is not as free as you think, there are still usually many things ....."

Sun Yufang waved her hand and said seriously, "You listen to Auntie's advice, at your age, if you don't enjoy your life, when you get married and have children later on, it's really going to be chained to death!"

After saying that, Sun Yufang could not help but lament: "I and winter snow his father from when I was pregnant with winter snow, on all kinds of worry and fatigue, that time thinking that the birth was easy, but did not expect the birth was more tiring ....."

"Later ah, we thought that it would be good to wait for the child to go to kindergarten, but really wait for her to go to kindergarten, found things more troublesome!"

"Not only do I have to pick her up and drop her off every day, but I also have to pay attention to her overall development of morality, intellect, body, mind, and aesthetics, and I have to learn musical instruments, dance, and calligraphy after class, so I ride my bicycle every day and take her all over Jinling to look for teachers for lessons."

"When you get to elementary school, not only do you have to focus on hobbies, but you also have to focus on your child's studies, and then there's elementary school, junior high school, and high school for college ....." There's no time period in which it's really easy ....."

Wang Chengyuan, who was sitting on the hospital bed, also couldn't help but lament, "Yes! From the time I was pregnant with my child, I worked hard until my child went to college, and that's when I really survived, these ten to twenty years, it's been all kinds of hard work."

Sun Yufang also couldn't help but sigh, "So ah, you young people must enjoy life while you're young!"

"The best golden years of a person's life are the ten years between the ages of twenty and thirty!"

"In these ten years, you have a relatively complete worldview, outlook on life and values, as well as the ability to distinguish between right and wrong, and have even achieved a certain degree of economic independence, and have finally begun to break away from parental control and experience the freedom of adults ....."

"If you don't take advantage of and enjoy these ten years, you will definitely regret it in the future!"

Ye Chen nodded his head in agreement. When he was young, he also had many wild fantasies.

His parents' education for him was never to pull out the seedlings or hope that his son would become a dragon.

When he was young, his mother would always tell him that life is short and the world is big, and she wanted him to be a happy person, a person who could travel all over the world and eventually gain happiness and live up to his expectations.

If those accidents don't happen, the Ye family's financial resources are enough to support Ye Chen's financial freedom from childhood to adulthood, and enough to support him to pursue his dreams in his twenties.

Ye Chen has never put money in his eyes, so when he reaches adulthood, he probably won't get involved in family feuds.

In that case, he would probably spend his days traveling around the world.

Chapter 2378

He might have gone to conquer Mount Everest, ski in the Alps, vacation in France, go on an Antarctic expedition or scuba dive in Tahiti.

But it was the accident that changed the course of his life dramatically.

Originally, he was the son of one of the world's top wealthy families, with a population of six or seven billion people, and no more than a hundred people who could reincarnate so well.

However, after the age of eight, he became the most pitiful and miserable orphan.

Compared with other orphans, his life was much harder.

This was because he was not only fatherless and motherless like other orphans, but also had to live in an orphanage like other orphans.

In his young heart, he had to bear the pain of his parents' death, the unmitigated hatred, and the huge gap from heaven to hell.

Nineteen years have passed in a flash.

The little boy who stood in front of the orphanage and cried until he was dead has now grown into a 27-year-old man.

As Sun Yufang said, the best years of life are the ten years between the ages of twenty and thirty, but for Ye Chen, seven years have passed since the golden decade.

Ye Chen couldn't help but ask himself: "In the past seven years, I didn't have much opportunity to enjoy life, but what about the next three years? If my parents' revenge is not avenged in these three years, then my golden ten years will be over ....."

At this thought, Ye Chen's heart was more or less a little lost.

However, he never resented the past nineteen years of his life.

Although these nineteen years, the first fifteen years of loneliness and helplessness, and the last three years suffered from all kinds of cynicism, can be said to have tasted all the bitterness of the world.

Sun Yufang did not expect that after a few words of hers, Ye Chen would appear to be somewhat despondent, and inwardly could not help but ask herself, "Did I accidentally say something wrong just now? Why does this little leaf feel as if he has a heavy heart this moment?"

Just thinking about it, Wang Dongxue came running back panting.

She was carrying two plastic bags in her hands, and her whole body was panting heavily, saying with some difficulty, "Dad ..... Mom ..... I ..... I'm back from buying food, quickly ..... Quickly eat ....."

Sun Yufang saw her daughter puffing out her chest, and hurriedly asked after her: "Dongxue, what's wrong with you?"

Wang Dongyue busy: "It's okay, I just ran a little fast, a little breathless, take a break on it ....."

Wang Chengyuan couldn't help but say in distress: "Oh my, what are you running so fast for? Go slowly, take your time to buy it, it's not very urgent."

Wang Dongxue said somewhat unnaturally, "Dad, aren't you hungry? I haven't eaten for such a long time, I'm also afraid that you are starving ....."

In fact, Wang Dongxue was too embarrassed to tell the truth.

The reason why she ran so fast was that she was afraid that her parents would say something to Ye Chen that they shouldn't. So she purposely ran a little faster, trying to compress the time that her parents spent alone with Ye Chen.

That's why she deliberately ran a little faster to try to compress the time that Mom and Dad spent alone with Ye Chen.

Just at this moment, the little nurse also ran in fast and said out of surprise, "Director Chen! The patient's blood results came back and his creatinine was only 45!"

Chapter 2379

"45?!"

Hearing this value, Director Chen was confused.

This is too amazing, right?

The three members of Wang Dongxue's family are more sensitive to this data.

After all, several years ago, Wang Dongxue's father had already begun to suffer from uremia, this family of three, for such a long time, has been considered a long-term illness into a doctor.

They are very clear about the numerical range of blood creatinine, and each different range, representing the state of the kidneys, is even clearer to them.

The relatively broad normal value of blood creatinine is between 40 and 130.

So when they heard the number 45, a family of three burst into tears of excitement!

Wang Dongxue remembered something, which is why she asked Director Chen: "Hello Director Chen, I seem to remember that the value of 45 is more or less low for normal people?"

Wang Dongxue is right, the value of 45 is almost to the lowest limit, so it is actually a bit low for most normal people.

Generally speaking, the blood creatinine index of adult men is mostly in the range of 70 to 80 to 100.

Director Chen said, "This is actually very normal. Your father has been sick for some time, he lost a lot of weight quickly, his body has become very thin, and there is also a certain degree of malnutrition, in this case, the blood creatinine will definitely be low. "

Wang Dongxue's entire body relaxed and she hurriedly asked, "Director Chen, is my father's condition now considered healed?"

Director Chen nodded and said with conviction, "Healed! It must be healed! It's simply amazing!"

Wang Dongxue was so excited that she turned around and looked at Ye Chen, her eyes red.

She had many words of gratitude she wanted to say, but the words came to her mouth but felt like a stalk in her throat.

This is because, in her opinion, this kind of life-saving kindness is greater than heaven, and if she always thanked others, she would appear to have no sincerity, and even less devotion.[Fastest Update at [www.avracity.com](http://www.avracity.com)]

Sun Yufang knew that her husband should have been cured, but she did not have complete proof before, and now the numerical results of the blood creatinine have come out, completely dispelling all the doubts in her heart, making her entire body burst into tears.

Immediately, she looked at Ye Chen and suddenly knelt down in front of him, saying with great gratitude, "Little Ye ..... Thank you ..... Really thank you so much ....."

When Ye Chen saw this, he rushed forward to help her up and said, "Oh auntie, what are you doing? Get up quickly ....."

Sun Yufang choked at this point: "Auntie is feeling that this kindness of yours is too much for our family, Auntie really doesn't know how to thank you ....."

At this point, Sun Yufang exclaimed, "Xiao Ye, Auntie is not a fool, the medicine you gave us has such a miraculous effect, if it were sold to those top rich people, it would be worth a fortune, not to mention hundreds of millions, even hundreds of millions, to those rich people whose lives are at stake."

Although Sun Yufang was not a university professor, she was also an older generation intellectual.

Chapter 2380

The advantage of an intellectual is that although she may not really know anything about medicine, she has a more accurate perception and judgment of many things than the average person.

Wang Dongxue went forward to support her mother, crying as she said: "Mom, don't worry, Ye Chen saved my father, later I will be an ox or a horse to repay him ....."

Sun Yufang nodded gently and choked, "Little Ye, you will be the great benefactor of our family in the future ....."

Wang Chengyuan, who was in the hospital bed, also couldn't help but have red eyes, and said seriously: "Little Ye, this old life of Uncle is saved by you.[Get more Update at [Avracity.com](http://Avracity.com)]

Ye Chen helplessly smiled, gently shook his head, said seriously: "Aunt and uncle are important words, winter snow is my friend, this is just mutual help between friends, winter snow usually did not seldom help me, I also considered this return her favor."

Wang Dongxue heard these words, heart moved.

She knew the meaning of Ye Chen's words, she must have felt that she helped him manage the Dihao Group without much trouble.

However, she was very clear in her heart: "Taking care of the Emperor Howe Group is completely my own job, it's my part of the job ....."

"I took the young master's salary, I have to serve the Emperor Howe Group, it's natural and righteous, so it doesn't count as me helping the young master at all."

"Moreover, not long after the young master took over the Emperor's Group, he doubled my salary, and I worked hard for him, isn't that the right thing to do? ....."

Just when she was ashamed, Director Chen, who had been silent on the side, plucked up the courage to ask, "This little brother, can I ask you a question?"

Ye Chen nodded and said, "Director Chen, please speak."

Director Chen was busy asking, "I would like to boldly ask, what kind of medicine did you give to Professor Wang? Of course, if it's something confidential and you can't tell me, I understand 100%."

Ye Chen smiled slightly: "It's not a secret, except that I begged this medicine from the divine doctor Shi Tianqi Shi, it is said that the divine doctor Shi is not the creator of this kind of magic medicine, his old man also by chance obtained a small amount of ancient famous doctors inherited medicine, the amount of survival was very small, and now is to eat one less one."

When Director Chen heard this, he suddenly realized and patted his thigh with emotion, "I remember! Last time in our hospital, there was a paraplegic patient who recovered instantly because he ate the miracle medicine brought by Dr. Shi Tianqi Shi. It is said that Dr. Shi used the ancient Chinese medicine pills whose recipe has been lost, but I didn't expect that this medicine was so amazing that it could not only cure paraplegia, but also cure acute kidney failure which is irreversible in the eyes of modern medicine .....

At this point, he couldn't help but feel sorry for himself, and said rather forlornly, "Our ancestors left behind so many miraculous things, but it's a pity that we couldn't preserve them well enough to pass them on, if this kind of miracle medicine can be rediscovered and produced again, it would really be a gospel for people all over the world .....

Ye Chen nodded his head and smiled, and didn't say anything more.

Director Chen looked at the time and spoke, "Oh my, it's almost eleven o'clock, I have to go to the other wards for rounds first, so I won't bother you much."

Wang Dongxue hurriedly sent Director Chen out, and after she came back in, Ye Chen also spoke up and said, "Uncle, auntie, Dongxue, it's really late, I have to go back first."

Sun Yufang hurriedly said: "Oh my little Ye, what's the hurry, sit down for a while longer."

Wang Dongxue, who was afraid that her mother might show too much enthusiasm for Ye Chen, hurriedly said, "Mom, this is a hospital room, not her own home.

After saying that, she hurriedly said: "Besides, Dad's body is now completely healed, let's hurry up to do the discharge procedures to go home, this time the hospital gives me a feeling too depressing, I don't want to stay here for a minute more."

When Sun Yufang heard this, she had to say to Ye Chen with some regret: "Xiao Ye, then Auntie won't keep you today, tomorrow Auntie will cook a big meal at home to thank you, you must be grateful."
