

The Yun Family's Ninth Child is an Imp! Chapter 1343

The wild one-horned bull roared at the water, then lowered its huge head, and the strange fish jumped onto the wild one-horned bull's body, then, it fixed itself on the wild one-horned bull's body with its claws.

After the wild one-horned bull lowered its head and drank the water, it left slowly. The small fish didn't jump back into the water, but were taken away by the wild one-horned bull.

Yun Chujiu was puzzled. What was the meaning of this?

Did the fish not want to live anymore? Did they want to leave the water and become dried fish?

Besides, what was the wild single-horned ox thinking? Was it not afraid that the strange fish would bite it to pieces?

Yun chujiu thought for a while and could not figure it out. She decided not to think about it anymore. She walked in the opposite direction of the wild single-horned ox.

Yun chujiu walked forward while picking spiritual herbs. Although some of the spiritual herbs were not high-level, they were lost. Yun chujiu dug them up and brought them into the great void mystic realm. As for the high-level ones., yun chujiu dug them up and stored them in her storage ring.

After walking for about an hour, Yun chujiu heard the mooing of the bull. Yun Chujiu was stunned. She deliberately chose the opposite direction. Could it be that she met another wild one-horned violent bull?

Yun chujiu did not dare to walk forward. She hid in the bushes again and carefully looked outside.

Not far away, there were two wild one-horned wild bulls lying lazily on the ground. There were some red things on their bodies. They were the strange fish with long claws.

The strange fish used their claws to continuously pull the long hair of the wild one-horned wild bull. From time to time, they would eat something. Yun chujiu suddenly realized that these strange fish were helping the wild one-horned wild bull get rid of the small bugs on its body.

Such things were not rare. Crocodiles had toothpick birds, rhinoceroses had rhinoceroses, and birds. They were all mutually beneficial. It seemed that these fish and the wild one-horned wild bull also had this kind of relationship. They would probably get rid of the bugs in a while, the wild one-horned wild bull would send these strange fish back into the pool.

Sure enough, after a while, the strange fish gathered on the body of a wild one-horned wild bull. The wild one-horned wild bull got up and walked towards the pool.

Yun Chujiu did not intend to provoke the remaining wild one-horned bull, so she carefully prepared to take a detour. However, she did not expect that she accidentally broke a tree branch, the wild one-horned bull immediately rushed towards the bushes.

Yun chujiu ran away and shouted while running, "I'm just passing by. I'm just a bystander. Don't Chase Me! Aren't all your bulls vegetarian? I'm Meat! My body is full of meat!"

The wild single-horned bull was confused when it heard that. It started mooing, and the same mooing came from afar. Obviously, the other wild single-horned bull heard its companion's voice and responded.

F * ck!

The wild single-horned bull wouldn't come back, right? If it came back, it would be even worse! She had to get rid of this one quickly, or else she wouldn't be able to deal with two of them.

Thinking of this, Yun Chujiu stopped in her tracks. "Old Bull, I'm warning you. Leave now and we'll pretend that we've never met. If you continue to chase after me, Don't blame me for being impolite!"

The wild one-horned bull barked in disdain and then rushed towards Yun Chujiu, drooling. Yun Chujiu had now confirmed one thing. It really ate meat!
