

The Yun Family's Ninth Child is an Imp! Chapter 2368

The three of them rested for a while and continued walking forward.

In the past, it was fine if they didn't know that these stones were demonic plants. Now, they felt uneasy as they walked, afraid that these demonic plants would suddenly attack them.

However, the three of them realized that these demonic plants seemed to only change when it rained. Normally, they were no different from stones, so they were more or less relieved.

"Little Jiu, have you noticed? It seems to be getting hotter and hotter!" Jin Zhi said while wiping her sweat.

Yun Chujiu had a flash of inspiration. She remembered!

"Didn't I say something before? Look, these rocks are becoming more and more sparse, and the temperature is getting hotter and hotter. I'm afraid there's a volcano in front of us."

Jin Zhi sat down on the ground. "It's over! Even if that volcano is the end, we can't cross it!"

Xue Wuji looked a little dejected. Yes, if there was a volcano in front of them, they couldn't fly here, and they wouldn't be able to cross it even if they reached the front.

"Don't be discouraged. Let's go over and take a look first." "If it's a volcano formed from fire marrow, I'll get the little flame to collect the fire marrow, and we'll have a way out." "If it's just an ordinary volcano, we'll just return." Yun chujiu had the fire-repelling pearl, she could pass through, but she couldn't leave Jin Zhi and Xue Wuji alone.

Jin Zhi and Xue Wuji nodded and the three of them continued walking.

The weather was getting hotter and hotter. There were almost no strange stones left. Instead, a large desert was in their place.

Yun chujiu gave Xue Wuji and Jin Zhi a few beads of guai Cao. Only then did the two of them feel much better.

After walking for another day, they could see a mountain range that stretched for miles in the distance. It was dark and did not look like a volcanic eruption.

After walking for another three days, the three of them finally arrived at the foot of the mountain.

The ground was filled with rising heat waves. Fortunately, the three of them were cultivators, or else they would have been roasted.

Yun chujiu asked Jin Zhi and Xue Wuji to wait a little further away. She walked to the front of the mountain and looked carefully.

The situation here was somewhat similar to the situation when she found the small flame. She did not know if there was fire marrow here.

When Yun Chujiu was knocking around, the small flame flew out of Yun Chujiu's right palm with a whoosh and jumped into a stone wall.

Yun chujiu was delighted. It seemed like there was a chance!

In less than fifteen minutes, the small flame jumped out. Without waiting for Yun Chujiu to say anything, it jumped into another stone wall.

After another fifteen minutes, the small flame jumped out again and then jumped into another stone wall..

Yun chujia hugged her shoulders and watched the small flame jump around like a hardworking bee. It seemed to have grown bigger. It seemed like there was really fire marrow in it.

However, judging from the time, the fire marrow in it should not be too strong. Otherwise, it would not have been swallowed by the little flame so easily.

Perhaps it was because the fire marrow had been swallowed by the little flame, Yun Chujia felt that the temperature had started to drop.

Yun chujia frowned. This was the barrier of the "Stones". If the fire marrow was swallowed by the little flame, the "Stones" would definitely flood.

Hence, Yun chujia shouted at the little flame, "Alright, that's enough! Leave some, or those stones will break out of prison!"

The little flame acted as if it did not hear her and continued to run around. What a joke. If there was food but not food, could it be that they were left for the New Year? !
