

The Yun Family's Ninth Child is an Imp! Chapter 2486

Yun chujju and the other two strolled around in front, followed by a swaying fire-breathing crow. Yes, it was the kind that was as fat as a ball.

At first, the little black bird was still holding on, but later, it really couldn't hold on anymore. "Wa Wa, master, you'd better put me into the Spirit Beast Bag."

"Didn't you dislike me for not walking you? Why Don't you want to be walked now? Are you playing with me?" Yun chujju asked with a cold smile.

Xiao Heiniaio was terrified. No wonder its black-hearted master was so easy to talk to just now. It was waiting here! Wu Wu, how stupid was it to think that it could negotiate with its black-hearted master.

Yun chujju saw Xiao Heiniaio's drooping head and snorted coldly, putting it into the Spirit Beast Bag.

The five in the spirit beast bag looked at each other. Xiao Heiniaio, who complained, became Xiao Heiniaio's underling. The two claws of the little black bird, who was stirring up trouble, were almost worn out. Suddenly, it had a feeling that they were brothers in distress, they really wanted to hug each other and cry together?

Yun chujju could not be bothered with the five. She looked at the surrounding environment. This was a valley. Occasionally, she could see students who were undergoing trials.

These students mostly formed small groups in groups of three to five. This way, they could take turns to be on guard when they were resting. If they encountered any dangerous situations, they would have more protection.

However, the number of tianluo flowers was really pitiful. Only a few small groups had picked a pitiful few.

Perhaps the Tianluo mystic realm would be looted once every six months. There were almost no high-grade herbs in it, only some herbs below the mystic rank.

Moreover, the level of the demon beasts they encountered was not too high. Yun Chujiu felt that this trial was of little value and could not be of any use at all.

At night, when they camped, everyone consciously made their campsites very close to each other. This was beneficial in guarding against the demon beasts.

Yun chujiu heard a few senior students chatting. "Why do I feel that this trial is different from the previous one?"

“Yeah, I remember that when we came here half a year ago, there were a lot of Tianluo flowers. Moreover, we would occasionally encounter high-level herbs and high-level demon beasts. Why is there nothing this time?” “Didn’t they say that the Tianluo mystic realm has the ability to self-repair?”

“Yeah, it’s said that the area of Tianluo mystic realm is very, very large. What we saw was just the tip of the iceberg. Therefore, even if we come here once every half a year, there will still be new tianluo flowers and high-level herbs appearing.”

..

Yun chujiu could not help but frown when she heard what they said. Could it be that she had been tricked again? This time, Qi Ling was smart, and even these people had been tricked as well?

Yun chujiu felt that it was unlikely. After all, if the Qi Ling targeted other people, there would be karma. It would not be stupid enough to bear the karma just to frame her.

Then, the question came. What exactly was going on? Could it be that they were unlucky and chose a bad direction?

Unexpectedly, from the second day onwards, the situation improved. The Sky Luo Flower started to appear one after another. The level of the medicinal herbs and demon beasts also became higher and higher.

Only then did everyone relax. It seemed that they had not reached the place before.

Yun Chujiu and the other two also found a small cluster of Sky Luo Flowers, about five or six of them.

The Sky Luo Flowers were protected by accompanying demonic insects. They were a type of demonic insects called Sky Luo poisonous bees.

Although the Sky Luo mystic realm forbade flying, these poisonous bees could still fly up to a height of ten feet from the ground. This kind of poisonous wasp was not very poisonous, but after a person was stung, they would feel dizzy and their combat strength would be greatly reduced.

The more worrisome thing was that some demon beasts deliberately hid nearby. Once they found that a person was stung, they would come out to take advantage and attack humans.

Therefore, when the students picked the Tian Luo flowers, they would be careful to avoid being ambushed by the demon beasts in the dark.
