

## The Yun Family's Ninth Child is an Imp! Chapter 2506

Yun chujiu knew that this was not the way to go on. It seemed like there was no way to kill all these monsters. Even if they were tired, they would die from exhaustion. She had to think of a way to end this once and for all.

Even if she could think of a way, it would be good if she could take a breather.

Yun chujiu suddenly remembered the method she had used in the trial tower. This cave could only allow one monster to enter. As long as the monster in front did not die, the monster in the back would not enter. Then, she would let it die half-dead.

When Yun Chujiu thought of this, she did not cut off all the little protrusions on the monster's head. Instead, she only cut off half of it.

Yun chujiu was purely experimenting. She did not know how the monster's little protrusions would look like when half of them were cut off.

After the monster's half-cut protrusions, it seemed to have become silly. Its eyes became dull and listless, and its limbs drooped involuntarily.

How to describe it? It was as if a living person had become a puppet.

A thought flashed through Yun Chujiu's mind, but she could not catch it in the blink of an eye.

Yun chujiu panted, indicating that everyone could take a breather.

Everyone panted heavily. They did not dare to slack off too much, so they took turns to rest. There was always someone pulling the rope on the monster's limbs, afraid that the monster would suddenly explode.

A hissing sound came from outside the cave. Obviously, the other monsters were asking about the situation inside the cave. As the monster inside did not respond, the hissing sound outside became impatient.

Yun Chujiu was secretly happy. No matter how impatient it was, it was useless. Unless it was desperate and dragged the monster out of the cave, it would not be able to come in.

After more than two hours, Yun chujiu saw that everyone had almost recovered. She was afraid that the monster outside the cave would discover something, so she took care of the monster inside the cave.

Then, she did the same thing and cut off half of the small protrusions of the new monsters. Everyone was given another two hours of rest.

Everyone admired Yun Chujiu. She could even think of such a method. She was really smart.

Yun Chujiu felt that although this method could fool them for a while, it was not a long-term solution. Therefore, she summoned a few sky net poisonous bees and let them go out to check how many monsters were outside.

Yun Chujiu felt that things were really illogical. According to the demon beasts, she had never seen these monsters before. It was as if these monsters had appeared out of thin air.

Soon, the sky net poisonous bees flew back and told Yun chujiu what they saw.

Yun Chujiu's expression immediately changed. According to the sky net poisonous bees, there were actually monsters everywhere outside. Moreover, not only did those monsters eat demonic beasts, they even ate some trees and herbs.

Yun chujiu frowned. She remembered that the eight monsters did not eat trees and herbs. Why did these monsters even eat trees and herbs?

Were they too hungry, or were they mutated? They would not eat rocks in the end, right?

Yun Chujiu felt that she could stand shoulder to shoulder with Xiao Heiniaoyao, because just as she thought of this, there was a cracking sound coming from outside. Those monsters actually began to eat rocks.

When everyone heard this creepy sound, their legs immediately went soft!

If these rocks were eaten clean, they would really have no way to survive. No matter how they thought about it, they seemed to only have a dead end.

Yun Chujiu's mind was blank. Now they were like fish on a chopping board, they could only let the monsters slaughter them.
