

The Yun Family's Ninth Child is an Imp! Chapter 2646

Elder Jiang and the other two stopped in their tracks and looked at Yun Chujiu in confusion. "What's the matter?"

"Elders, I've heard that the reproduction of these snow jade silkworms isn't going smoothly every time. They only lay a few dozen eggs. I think that this might be related to the fighting during their mating period. Therefore, I have an idea that might increase their spawning rate. I would like to consult the three elders."

Then, Yun Chujiu told them her idea.

Elder Jiang and the other two frowned. The snow jade silkworms during mating were extremely irritable and could easily attack humans. So for many years, these snow jade silkworms had been mating freely. Was it really possible to interfere with them manually?

"Yun Chujiu, whether your idea is feasible or not is another matter. You should know that the snow jade silkworms during mating are extremely irritable. Aren't you afraid of being attacked by them?" Elder Ding asked.

"I know, but I am willing to take the risk to do my part for the sect," Yun Chujiu said respectfully.

The three elders looked at each other. They did not expect that although this little girl had a sharp tongue, she was still an innocent child. She was willing to take the risk to contribute to the sect. It was really not bad.

"Alright, since you are mentally prepared, then give it a try."

Yun chujiu rubbed her hands and said, "Well, I have a presumptuous request. Can you give us more contribution points?"

The three elders were stunned and then nodded with a smile. "Of course. When the time comes, we will pay you double the contribution points."

Yun chujiu shook her head. "Elders, as the saying goes, you will not be rewarded for doing nothing. If we fail, how can we have the face to ask for contribution points? "How about this, during the normal mating period, they can breed about sixty new silkworms. If we hatch one more, we will be rewarded with five contribution points each. What do you think?"

Elder Jiang and the other two discussed and nodded in agreement. After all, the value of one snow jade silkworm was much higher than five contribution points. Besides, although Yun Chujiu said that there was a nose and an eye, how could those snow jade silkworms listen to her arrangement? Not to mention a few more, it was already good enough to have a lot of them!

Very soon, the snow jade silkworms were still spinning their cocoons.

It was only then that Yun chujiu realized that one silkworm could only spin a cocoon. Her plan of plucking the sheep's wool was ruined!

This fellow felt that she had made a loss in her business and sighed all day long. Jin Zhi and ye Bingyu were speechless and could not be bothered with her.

Five days later, the snow jade silkworms began to break out of their cocoons one after another.

Matchmaker Jiu was online!

Jin Zhi was very busy. Although the snow jade silkworms were anxious, they didn't dare to attack her. They had no choice but to start mating according to her arrangements.

After the three-day mating period, the female silkworms began to lay eggs.

..

Elder Jiang and the other two heard that the young silkworms had hatched and ran over to check.

“Not bad, not bad. There are 70 young silkworms in these two baskets. When the time comes, we will reward each of you with 50 contribution points.”

“Elders, don’t worry, I Still Have More!”Yun chujie took out two more baskets from the silkworm room.

“What? There are 80 new silkworms?”The three elders couldn’t believe their eyes.

“Elders, this is only a part. There are more inside! Don’t worry, we will bring them out now!”

One Basket, two baskets..

Elder Jiang and the other two pinched themselves hard. They felt as if they were in a dream. Was this snow jade silkworm crazy? How could it produce so many little silkworms this time?
