

## The Yun Family's Ninth Child is an Imp! Chapter 2760

Just as the long-eared wind-blade rabbit was trying its best to dig a hole., it heard that evil star casually say, “TSK tsk, your digging skills are really not that good! I heard that a crafty rabbit has three burrows. With a weakling like you, it would probably take you a lifetime to dig three burrows, right?”

The long-eared wind-blade rabbit felt that it had received 10,000 points of damage, but it did not dare to go against Yun Chujiu. It could only desperately dig, DIG, Dig, plop!

Yun Chujiu only heard a plop, and then there was no more movement. She stood up in surprise and was momentarily dumbfounded. What was going on?

Could there be a hole behind this hole?

Yun Chujiu threw a sudden crack talisman into the tunnel that the long-eared wind-blade rabbit had dug earlier. After the explosion, Yun Chujiu found that the inside was actually hollow, with the faint sound of running water.

Yun chujiu immediately understood!

There should be an underground river down there. The unlucky long-eared wind-blade rabbit must have fallen into the underground river, which was why there was a splash.

Yun chujiu took out the luminous pearl and shone it on it. Sure enough, there was an underground river down there, but the flow was very slow, so the sound of the water was not loud.

The unlucky long-eared wind-blade rabbit had climbed up the rock by the side of the underground river, with a look of despair on its face.

Yun chujiu sat on the chopping board and flew down. The long-eared wind-blade rabbit did not move at all. It had already accepted its fate. If it was willing to eat it, then it would eat it!

Yun chujiu walked to the side of the Dark River and looked around. She did not know where this dark river flowed from. If it was discovered, it would definitely be a hidden danger to the origin-killing sect.

Because if someone sneaked into the origin-killing sect from the Dark River, no one would discover it. It would be completely undetectable.

Yun chujiu thought of this and decided to explore along the underground river. Anyway, she did not want to go back and face di Beiming's ugly face now. She might as well swim!

"Rabbit, I want to go down and swim. Come with me?" Yun Chujiu said while holding the long ears of the long-eared wind-blade rabbit.

The long-eared wind-blade rabbit rolled its eyelids and fainted from anger. It was a rabbit, a rabbit, not a fish, okay? Swim my ass!

Yun chujiu could not help but laugh. She put the rabbit into her spirit beast bag and jumped into the Dark River.

The Dark River was deeper than she had imagined. She swam down the river and swam for two hours before she realized that there was light coming in. It seemed like she was going out.

However, when she swam to a place where there was light, she could not help but be a little surprised. In front of her was a stone wall. There were some cracks on the stone wall, and the water in the Dark River flowed out through the cracks.

Only then did this fellow understand why the flow of water was so slow and why the water from the underground river was so deep.

It was because the exit was too narrow, which was why it was like this.

However, this was also good. This way, people with ulterior motives would not be able to use it to sneak into the origin-killing sect. However, this was still not too safe. When there was an opportunity, she would explore what exactly this place was.

Thinking of this, he swam back to the place where he fell. After thinking for a while, he felt that it was still early, so he swam up again to see where the other end of the underground river led to.

Therefore, he started swimming again. After swimming for four hours, she saw a light shining in. To her surprise, the source was only a few narrow stone cracks, and the water was slowly seeping down.

Yun Chujiu touched her chin. She guessed that there was either a spring or a stream. Since there was not much water seeping down, no one would notice it.

As for the water seeping down, it had formed an underground river after many years. It was not formed overnight. It should have been thousands of years or even tens of thousands of years.
