Chapter 301.1: Cultivating First Wood Essence

Just now when these strange liquids contaminated his body, Yang Chen's whole body seemed to have been torn, the intense pain spread directly from his skin to his bone marrow and then reached his mind.

The First Wood Innate Qi, Yang Chen was immediately aware of it the moment he encountered what strange liquid it was, clearly it was the First Wood True Essence.

It was hard to imagine that the quantity of First Wood True Essence here was this large, the form of existence was too horrifying. Originally, it was only the appearance of the First Wood True Essence in the form of the spiritual qi True Essence. It was actually condensed into liquid here, which was not how people would ever dare to believe.

A vein of the First Wood True Essence, Yang Chen finally understood why that fellow at that time at the point of death would use a vein to describe the First Wood True Essence. At that time, Yang Chen was naively thinking that there was First Wood True Essence like the underground spiritual pulse. He didn't expect it to be a lake like this.

However, it was now impossible to guess how this First Wood True Essence was formed. Under the tremendous pressure of the liquid above, it was compressed into this liquid form. The crazy First Wood True Essence rushed in towards the two.

No matter what spiritual power he used, Yang Chen's body was directly pressed back into his Dantian by this rich and unrecognizable First Wood True Essence. The body was like it would be torn at any moment. Every corner was being madly poured into by the First Wood True Essence, just from the contact with the liquid level to the entry into the liquid, Yang Chen's whole person became a property of the First Wood attribute.

If someone used his spiritual awareness to detect this time, he will definitely think that Yang Chen was a pure First Wood cultivator. From the inside out, Yang Chen revealed a strong and unrelenting First Wood aura.

Just touching the First Wood True Essence for a moment would not excite such change. Yang Chen finally understood how the Yuanying realm masters who fell, died.

Taking a bath in this kind of First Wood True Essence Spiritual Solution, let alone the master of the Yuanying realm, even if it was a master of the Dacheng realm, like the wood attributed expert like Hua Wanting, couldn't escape death.

Water could carry a boat and also overturn it. Drinking water was very comfortable, but too much water could drown people. The reason was the same. Although the wood attribute master could absorb the First Wood True Essence, such a large amount could directly detonate him.

The leopard monster that fell with Yang Chen made no sound. He was not a wooden attribute cultivator. The moment it got exposed to such a thick layer of First Wood True Essence Spiritual Solution, he took a hard blow and instantly became a leopard monster with a wooden attribute. Then he detonated into dusty smoke, leaving no traces.

The reason why Yang Chen could continue to the present still was because he benefited from his wooden attributed spirit power. Then again, Yang Chen was also practicing the First Wood spirit power of the Penglai Divine Wood. Even if the pressure was crushing, he could bear it more than the Leopard monster.

However, if Yang Chen had no other way to cope with it, then his end would not be much different from the Leopard's. The only difference was the time.

The fellow who told Yang Chen that there was a First Wood True Essence here. He didn't know if he didn't anticipate this kind of situation, or he had already arranged it himself. He waited for Yang Chen to fall for the trap serving as revenge for the execution. It was just that the person had already perished. Yang Chen was also not likely to know what kind of thought he had.

First Wood True Secret Art, Yang Chen had obtained from a certain group on the Immortal Executioner Stage. However, in the face of such a vast amount of First Wood True Essence Spiritual Solution, it was too late to absorb it all.

Within a moment, Yang Chen's brain flashed through several methods of processing it, but the most reliable was still to use the Penglai Divine Wood in the medicine garden.

The reason why the Penglai Divine Wood was called Divine Wood was because it was the purest kind of First Wood aura spirit wood in addition to the First Wood True Essence. The same Spirit Wood was the most difficult to cultivate.

It was difficult to cultivate because there was not enough First Wood spirit power to make the Penglai Divine Wood mature enough. But now, the First Wood True Essence Spiritual Solution was simply the best thing to cultivate it.

After deciding in an instant, Yang Chen immediately began to control the First Wood True Essence Spiritual Solution that entered his body. He controlled it to directly refine the Penglai Divine Wood forest in the medicine garden.

In the current Penglai Divine Wood forest, there were dozens of thick woods. They have been here since the last Thunder pomegranate absorbed enough thunder to nourish itself. Even such a long time has not matured them much.

With the First Wood True Essence Spiritual Solution, which complemented the roots of Penglai Divine Woods, Yang Chen immediately noticed their sudden spiritual intelligence awakening and feeling of excitement.

Suddenly, the spiritual liquid around Yang Chen seemed to vanish suddenly resulting in a vacuum. In this space, Yang Chen directly took out the First Wood flying sword embryo, his mind worked briskly, and the sword embryo directly restored to the length of the original Penglai Divine Wood trunk plus the main root.

The thickest trunk of the Penglai Divine Wood was full of dozens of branches, and the length of the main root was several times more. This time, it reached the bottom of the lake of First Wood True Essence Spiritual Solution, the height was more than enough. Yang Chen was able to get out of the spirit liquid.

Taking a long breath, Yang Chen's cold sweat came out at this time. If he had delayed for a while, he may have been directly blasted apart by the First Wood True Essence.

Now, the pure First Wood True Essence Spiritual Solution had a buffer due to the First Wood flying sword embryo. So, when it interacted with him, it did not exert that much pressure. There was also the

Penglai Divine Wood in the medicine garden to absorb it, Yang Chen could guarantee his life without worry.

Standing at the top of the sword embryo, Yang Chen's spiritual awareness threads were again issued. It was strange to say that when it came to this place, the pull of the spiritual awareness disappeared without a trace, and Yang Chen could easily explore the surrounding space.

The cavern wasn't very big, basically the size of the upper pool was some dozens of square feet. However, the depth of the First Wood True Essence Spiritual Solution was somewhat terrifying. Standing on the top of the sword embryo, its depth was more than two hundred feet. He could not imagine how much First Wood True Essence Spiritual Solution existed here.

Above was the Ten-thousand Trees Forest, and there must be a formation to bring the essence produced there, bit by bit to this lake. He didn't know how many years had passed since the gathering started.

Since there was such pure First Wood True Essence, Yang Chen would not be able to live with himself if he did not cultivate the First Wood True Secret Art. What was the purpose of coming here, if he didn't absorb the First Wood True Essence to cultivate the First Wood True Secret Art?

Chapter 301.2: Cultivating First Wood Essence

Yang Chen practiced First Wood True Secret Art, and even let go of the casual absorption of the First Wood True Essence. The absorption was only necessary to let him adhere to the spiritual power quantity of one year.

Now, with this vast First Wood True Essence Spiritual Solution lake, even if 18 Great Principle Golden Immortals practiced the First Wood True Secret Art, it could still fully support them.

Penglai Divine Wood needed a lot of First Wood True Essence to irrigate. Was this not a big opportunity?

In addition, the First Wood True Essence was also a rare thing for the medicine garden. In particular, he could take advantage of so many First Wood True Essence and thoroughly sacrificially refine the medicine garden.

Of course, the most important First Wood flying sword embryo also needed further sacrificial refining. However, what was sacrificial refining? Was it not that many True Essences were refined little by little inside the sword embryo? Now Yang Chen wanted to use the sword embryo to absorb the First Wood True Essence. Wasn't it the logical process?

The sword embryo had restored to its original size, and Yang Chen could even sit on the top and practice easily. The huge trunk was an excellent platform for this purpose.

The vast First Wood True Essence Lake, along with the First Wood flying sword embryo, entered Yang Chen's body, and the medicinal garden. The essence was first extracted in a clean bottle and then absorbed by the Penglai Divine Woods.

Also, fortunately it was the Penglai Divine Wood, if replaced by any other kind of First Wood tree species, First Wood True Secret Essence liquid would have destroyed them in the end.

In the process of slowly absorbing the First Wood True Essence, Yang Chen was also distracted to observe the changes in the bottle of the medicine garden. He took care not to accidentally ruin the treasured garden bottle of the medicine garden.

Seeing that the already liquefied First Wood True Essence entered the medicine garden, it was directly sent to the Fifth Earth layer at the foot of the Penglai Divine Wood Forest.

Subsequently, a strain of the Penglai Divine Wood, like a living being, began to grow wildly at the speed visible to the naked eye. It was clear to see as day and night, the Penglai Divine Wood became a layer thicker.

This was the Penglai Divine Wood. When Yang Chen used the Fifth Earth layer to sacrificially refine the medicine garden the last time, he was only able to make the Penglai Divine Wood root more stable. As for growth, it could only be promoted at occasional sacrificial refining of the medicine garden.

Usually, even in the past few decades of Yang Chen's retreat, the Penglai Divine Wood had not changed in the medicine garden, even if there was any, it simply couldn't be perceived.

However, under the irrigated nature of this pure First Wood True Essence, the trunk was clearly thickened by a finger length. Although it seemed that the change was not big, but when normally the Penglai Divine Wood wanted grow this much, a hundred years of effort was not impossible.

The First Wood True Essence also slowly nourished other First Woods in the medicine garden.

The Thunder pomegranate tree, which had stopped growing since a long time ago without the power of thunder, once again begun to grow wildly under the nourishment of this powerful First Wood True Essence.

Almost every day and night, the thunder pomegranate tree would experience a cycle of growth, increasing year over year. More than 20 strains of Thunder Pomegranate also began to slowly become thicker and taller at a visible rate.

For both First Wood flying sword embryo and the garden bottle of the medicine garden, this was not a complete sacrificial refining process but just a simple spirit power polishing process.

The spiritual power of the garden bottle had already been filled up inadvertently, even the Portal that has been looming in the medicine garden had changed a little.

However, Yang Chen did not pay attention to this now. He had been immersed in the pleasure of practicing the First Wood True Secret Art. The main purpose of coming here was to practice it, and to condense the First Wood Dan. Other matters, no matter how many, were extra gains.

Autumn transitioned to winter, Yang Chen had been practicing the whole half of the time on the top of the First Wood True Essence Spiritual Solution lake. There was no day or night here. No light at all, Yang Chen had to judge the time by relying on his biological instinct.

He had already cultivated the Yin-Yang Five Elements Secrets Fifth Earth, Seventh Metal and Tenth Water and now he was cultivating the First Wood True Secret Art, moreover the place of cultivation was in this liquefied First Wood True Essence, even if Yang Chen was a non-wood attributed cultivator, it was still enough to give him a glimpse of the Dao. Not to mention that Yang Chen was the monstrous talent with all complete postnatal attributes.

The completion of the First Wood True Secret Art could only be successful when all the conditions were met. When the whole First Wood True Secret Art finally completed a Heavenly Circulation, Yang Chen finally breathed a sigh of relief.

At this moment, his sea of consciousness had doubled again. Penglai Divine Wood, although still maintaining its original shape, now had the aura of the First Wood True Essence completely.

The towering pillars of the Penglai Divine Woods were now more than a few times thicker than the original ones. The hard-earned Yang Chen's sea of consciousness was up to a hundred feet high. Although the size of the sea of consciousness had not grown, the height was still at least doubled.

The change of wood fire, the Penglai Divine Wood directly triggered the change of the Yin-Yang Burning Heavenly Fire, Two Fire Dragons. After all, this change occurred with the change of the pillars of the First Wood. The length of the two fire dragons was also extended from the original hundred feet to two hundred feet. The flames on the body were raging, but there was no change to the shape.

His spiritual awareness once again began to ascend, until the peak of the early Dacheng stage and stopped there. However, Yang Chen had not had time to feel the change. Then, the First Wood spirit power, which was already at the peak of the foundation stage, began to smoothly enter the early Jiedan stage.

In his body, First Wood spirit power rushed to the Dantian place, and the meridians were instantly empty, but they were quickly filled up by the influx of First Wood True Essence.

Condensation was a process that required a lot of spiritual power, so it took at least half a year to absorb the spiritual power needed to meet the spiritual compression needed for Dan condensation.

But for Yang Chen at this time, could use the inexhaustible lake of First Wood True Essence for spiritual power at any time. With all the absorption, the lake level had not even fallen three points.

The time needed to make Yang Chen absorb the First Wood True Essence spirit power was several times faster. It was like free wind, madly rushing towards Yang Chen. Of course, these essences did not need any effort to make use of.

Originally it took at least half a year for condensing Dan. But with this vast lake of First Wood True Essence Spiritual Solution, it took only one month to complete the process.

Chapter 302.1: The First Wood True Essence Lake

A blue-green coloured Dan was taking shape in the lofty dantian of Yang Chen. Dripping and swaying, exuding a pure First Wood aura.

This was the formation the golden Dan of Yang Chen's Great Yin and Yang Five Elements Secret Art. At this moment, the surrounding space even trembled a bit. A thick layer at the bottom of the First Wood True Essence Spiritual Solution was directly absorbed into the body of Yang Chen and filled into the First Wood Golden Dan.

The First Wood Golden Dan almost instantly absorbed this large quantity of the First Wood True Essence Spiritual Solution, and then swelled like a balloon, quickly surpassing the Third Fire Fourth Fire Golden Dan, becoming the biggest one.

Just this time, it directly made the First Wood spirit power cultivation base surpass Third Fire Fourth Fire, becoming the dominant spiritual power. Yang Chen's body had also begun to change. He was originally a cultivator who was fire attributed. Now, with a glance, it was certain that Yang Chen was a cultivator who was wood attributed.

During this phase of Dan condensation, the sea of consciousness began to change again. This time he was promoted to Golden Dan. Not only did the sea of consciousness not increase, but it narrowed somewhat.

Everything that built the sea of consciousness was directly condensed again, narrowing down a few points and becoming the original four-fifths size. The level of the Spiritual Awareness density was higher than before, the whole structure was also more stable than before.

After shrinking, it seemed that with the increase of Yang Chen's spiritual awareness began to slowly change back to its original size. His spiritual awareness had also climbed to the limit of the peak of the early Dacheng stage. Only a step away from middle Dacheng stage.

After Yang Chen condensed the Dan, the wood attribute dominated and began to spontaneously absorb the First Wood True Essence. Although the speed was not as horrifying, it was several times faster than Dan condensation.

Because Yang Chen's cultivation base had improved, the speed of the First Wood flying sword, Medicine Garden and Penglai Divine Wood absorbing the First Wood True Essence Spiritual Solution also correspondingly doubled. Yang Chen even had an illusion that his own First Wood spirit power had become the First Wood True Essence.

Amid this, Yang Chen had a feeling that he could let these pieces of First Wood True Essence Spiritual Solution suddenly burst and destroy the surrounding land.

All around it was the First Wood True Essence, and Yang Chen seemed to have expanded a lot in this environment. Soon, he was keenly aware that someone was staring at him with hostility.

With Yang Chen's sensitivity to this murderous aura, he understood that the culprit had never existed before, but had just arrived recently.

The Yuanying realm masters were not willing to explore this place with their spiritual awareness. There only was one possibility that it could be discovered by the managers of the entire city.

The city was jointly controlled by two masters of the Monster Race in the Dacheng realm. This city was an Immortal's Cave, which could also be collected by the powerful.

However, Yang Chen could be sure that they did not refine this Immortal's Cave. It was left by an ascended master; without the right technique, it could never be refined. Forcibly refining could only lead to one's end, that is to be destroyed indiscriminately.

The reason why Yang Chen was so sure about this was the First Wood True Essence Spiritual Solution under his foot. In fact, there were so many accumulations of it here that if one was not careful while refining it, the above city would be directly blown into scattered ash by the outbreak of the First Wood True Essence.

If the real Immortal's Cave had been already refined, with so many of the First Wood True Essence Spiritual Solution, it would simply be the greatest treasure of one's life. How could it be so easy for Yang Chen to enter it.

These were the things that came to his mind immediately after noticing the other's presence. Being stared at with hostility by one or two Dacheng stage masters was not a fun thing.

At the foot of Yang Chen, the First Wood Spiritual Solution Lake suddenly began to sway, and the originally stable lake surface seemed to have had an agitation. The turmoil on the surface of the liquid seemed to have something coming up to surface soon.

"Who?"

Yang Chen shouted, but his body shape did not move.

"Little friend don't be alarmed!"

A strange voice suddenly came out, but there was no pressure or huge momentum accompanying it at all. Talking like an ordinary old man, he then said with overwhelming confidence, "we are not malicious."

We? Yang Chen's mind immediately flashed a thought, there were more than one master. It seemed that only the two Dacheng realm masters, who manage the city could appear here.

At the foot of Yang Chen, the First Wood True Essence Spiritual Solution boiled more and more, showing an extremely unstable state. It seemed that the next moment, the huge First Wood True Essence Spiritual Solution lake would suddenly erupt.

Two masters of the Dacheng realm with their spiritual awareness appeared here, to say that they did not envy possessing this First Wood True Essence Spiritual Solution, Yang Chen would never believe it.

"Don't misunderstand!"

With Yang Chen's reaction, the two Dacheng realm city owners suddenly panicked. Once Yang Chen noticed that something was wrong and detonated the entire First Wood True Essence Spiritual Solution lake, perhaps the two masters of the Dacheng realm would be spared. But hundreds of thousands of the Monster Race in the entire city would be directly smouldered, leaving no residue.

The alarmed master was another city lord of the Dacheng realm. At this time, they also refused to take care of this First Wood True Essence Spiritual Solution, to calm down Yang Chen.

"We are not malicious."

Later the city owner said quickly, "we just found that the atmosphere was unusual, so we came to investigate. We have no other meaning. This is your chance, we will never interfere."

"My chance?"

Yang Chen suddenly sneered, "if I still have a magic weapon that can restrict this First Wood True Essence Spiritual Solution, here is my place of burial."

"We know that you were forced to come here. About who chased you, we will give you a thorough confession."

The city owner heard the voice of Yang Chen's resentment and promptly replied.

"Confession?"

Yang Chen was still kind of disdainful and said, "what is a confession? How will it be made?"

"Wait a moment," the big city owner directly dropped a sentence, and then went silent.

However, Yang Chen did not dare to relax. Under the spying of the two masters of the Dacheng realm, he had to maintain absolute caution. At the same time, his heart was also guessing what the two city owners were planning.

With so much First Wood Spiritual Solution, they could only see that they had no ability to collect it. They were also afraid that refining in bulk may cause an explosion. This thus, became leverage for Yang Chen.

Amid thinking, a moment had not passed, and there was a sound of chaos on the top of his head. Yang Chen looked up and subconsciously saw several figures falling like dumplings from the liquid above, falling directly into the lake.

Chapter 302.2: The First Wood True Essence Lake

These figures were very familiar, clearly, they were the few leopards that chased Yang Chen before he jumped in the pool. They were the three Yuanying realm ancestors and the one in the Jiedan realm master.

However, they did not have the ability of Yang Chen, and couldn't sway freely in the First Wood True Essence. As soon as the figures fell into the lake, they made sad and pitiful screams. After a few sounds, they were invaded by the terrifying First Wood True Essence, and could no longer withstand it, eventually detonating.

The flesh and blood of the four leopard head monsters quickly turned into dust that could not be seen again. The voice of the city lord who just spoke, was heard again, "little friend, can you be satisfied with this account?"

He didn't move at all, and the masters who chased him were thrown away by the city manager in front of him. If Yang Chen said that he was not satisfied, then it would be a bit too much.

"Satisfied!"

Yang Chen's face was full of smiles, "very satisfied."

"Being satisfied is good," the voice of the big city lord came again.

"I don't know what the city lord wanted to command me for?"

Yang Chen's voice eased a lot this time, but the First Wood Spiritual Solution at his foot was still in kind of a posture of drawing the bow and not discharging the arrow, he did not dare to relax.

"Commanded? Not at all!"

The big city lord seemed to know that it was impossible to trust Yang Chen at this time. He directly replied, "there is nothing to tell, you are free to practice here. However much of First Wood Spiritual Solution you can absorb, will be based on your skill. When you feel enough, you can come out, we will not hinder you."

"I can absorb it all?"

Yang Chen immediately realized what he was saying and asked loudly.

"You can absorb it."

The voice of the second city lord came from the other side, "It is your chance, you grasp it yourself, if you can do it."

After this, the two city lords made no more sounds, and it seemed that they were no longer there. However, Yang Chen knew that they were always monitoring this place.

From the attitude of the two, Yang Chen guessed that this First Wood True Essence Spiritual Solution Lake should have caused a lot of trouble for them.

Sometimes, delicious food was not just food. When it exceeded a certain amount, it may become poison. Similarly, the same was true for the First Wood True Essence Spiritual Solution.

Perhaps at the beginning, this First Wood True Essence Spiritual Solution was still the most wonderful tonic in the city, but when the amount exceeded a certain limit, it became a disaster for the whole city.

Now the whole city was located on this huge First Wood True Essence Spiritual Solution Lake. Once there was any static explosion in it, the whole city would be turned into flying ashes. It could be said that the city in this tree was in a crisis of facing a cataclysmic explosion at any time.

As the city lords, the two monster cultivators of the Dacheng realm were also helpless. They couldn't think of a way out of it, but even if they were the Wood Type Monster Race with the highest cultivation base, or even a tree demon in the late Yuanying realm, they would inevitably be immersed in the body by the First Wood True Essence Spiritual Solution till detonation. Not to mention the other cultivators of different attributes.

In this regard, the two city lords had always been unable to do anything, but they could not easily move the array here, they could only be brave and secretly frightened while maintaining the city.

Yang Chen's movements alerted them. They suddenly discovered that some people could not care about this First Wood True Essence Spiritual Solution at all and absorbed it without a care in the world. This suddenly made them see hope.

Especially when Yang Chen said that he had a magic weapon that could restrict the First Wood True Essence Spiritual Solution, the two monsters almost started to shake their brains.

If this magic weapon was in their hands, there would have been no need to worry about this scourge? However, Yang Chen was too careful. When he found their aura, he immediately controlled the First Wood True Essence Spiritual Solution to edge of detonation. If there was any movement, everything here would disappear with him.

This was rather a jade and not a complete pie, it stunned the two city lords, and they did not dare to act rashly. Of course, soon they knew how Yang Chen came in. After all, the matter had been publicized extensively, and many people saw it.

In order to calm Yang Chen's anger and comfort him, the two did not hesitate to sacrifice the three Yuanying added Jiedan realm leopard monsters. Compared with solving the scourge, what few masters of the Yuanying realm matter? Disposing of them, not only could stabilize Yang Chen, but also bring good reputation to the city lords. So why not?

Yang Chen was quiet again, but he knew that the two city lords must be staring at him all the time without rest. He did not care and continued to sit on top of the First Wood flying sword, silently absorbing the First Wood True Essence Spiritual Solution.

There was too much First Wood True Essence Spiritual Solution, even after Yang Chen's cultivation base reached the Jiedan stage, speeding up the absorption of such a huge and deep First Wood True Essence Spiritual Solution lake was a futile attempt.

The city lord let Yang Chen absorb it at will, and he certainly would not let such an opportunity pass. However, even if he could try absorbing all of it, how much could he absorb?

Suddenly, a thought appeared in Yang Chen's mind. Since the First Wood True Essence Spiritual Solution had now been condensed into a liquid, then as the wine gourd could hold any liquid, could it also be loaded with this solution?

The gourd was in his hand, but Yang Chen began to hesitate. After all, in the gourd, was a lake of Four Seas Mysterious Coral liquid with a lake of distiller's yeast. For Yang Chen, it could be said to be incomparably precious. If he accidentally damaged the gourd, it would not be worth the loss.

Fortunately, this did not prevent Yang Chen from experimenting with a little bit of First Wood True Essence Spiritual Solution. If he could control the amount, the absorption should be very safe.

Carefully holding the gourd, Yang Chen's consciousness instantly immersed in the gourd and began to control the gourd carefully to gather a little First Wood True Essence Spiritual Solution.

Whiz!

A green shadow flew directly from the First Wood True Essence Spiritual Solution lake, and into the gourd. What made Yang Chen very surprised was that the gourd did not show any hesitation, the solution did not change, and there was no explosion. This fully showed that Yang Chen could easily collect the First Wood True Essence Spiritual Solution completely.

With this understanding, Yang Chen did not rest, and began to control the gourd to absorb the First Wood True Essence Spiritual Solution. A green water chain began to emerge from the First Wood True Essence Spiritual Solution lake, flying fast toward the gourd mouth.

Under this time, the speed of the absorption was almost doubled. In a short period of time, the moisture absorbed by the gourd had reduced the depth of the lake by more than one inch.

In the gourd, another place had opened, like a brand-new deep pit. The deep pit held this dark green First Wood True Essence Spiritual Solution without any unstable aura or explosion.

Seeing this scene, Yang Chen's face once again showed a smile, "So such a vast First Wood True Essence Spiritual Solution Lake is finally my own."

Chapter 303.1: Short Cultivation

With the addition of the gourd, the absorption speed of the First Wood True Essence Spiritual Solution was several times faster. Although the vast lake was hundreds of feet deep, but under the control of Yang Chen, the gourd could gather a zhang worth of depth within a day.

This kind of good thing could be had but not demanded. In the gourd, Yang Chen could use at anytime, anywhere. There was also an old tree demon in the Pure Yang Palace. Next, he will see the little monstrous talent Mu Bai, also Sun Qingxue had wooden attributes. These were unfathomably precious gifts.

However, during the collection process, Yang Chen did not dare to relax his vigilance, and always kept the First Wood True Essence Spiritual Solution on the verge of breaking out. The two Dacheng realm city lords, who though had guaranteed that they were not tempted, if tried to go against their claim and tried to snatch the gourd, he could detonate it at any time.

This was also a shock, one couldn't do anything about it, even if the First Wood True Essence Spiritual Solution was not useful for the two people, this gourd could gather it, and make the city lords have no worries for the future as well. In any case, the two would not let Yang Chen leave like this.

The more than a hundred feet deep First Wood True Essence Spiritual Solution Lake, was gathered in more than 100 days, nearly five months. The deep lake had been reduced inch by inch, till there was only a few feet of depth left.

While the bottle gourd received the First Wood True Essence Spiritual solution, the bottle of the medicine garden did not stop gathering it. The Penglai Divine Woods were maturing every day due to the irrigation of the solution. It appeared as if the absorption would continue endlessly. Every day, the Penglai Divine Woods grew taller and longer, the aura that came out was getting closer and closer to the purest form of First Wood True Essence.

Penglai Divine Wood was the closest to the Essence of the First wood, this First Wood True Essence Spiritual Solution was the best catalyst for its irrigation. In just over half a year, even the worst Penglai Divine Wood was now stronger than the one that Yang Chen used to refine for the First Wood flying sword.

The portal in the medicine garden was also becoming more and more dense and seemed to be able to form quickly.

Of course, the First Wood flying sword, which acted as the medium, had also undergone tremendous changes. However, the change of First Wood flying sword was mainly in its aura, not the shape.

Whether it was Yang Chen condensing Dan or the bottle in the medicine garden absorbing the First Wood True Essence Spiritual Solution, it was necessary to use the First Wood fly-ing sword as a medium. After such a long time, it had thickened after being refined.

Yang Chen's First Wood Golden Dan, these days was not idle, it still madly absorbed the First Wood True Essence. This could be compared to Yang Chen refining a small vial of Fifth Earth, Tenth Water and Seventh Metal True Essences, with their respective Secret Arts and the constant cultivation to enhance these spiritual powers.

In just five months, Yang Chen's First Wood Golden Dan once again inflated to a large circle, and the spiritual power level was directly at the peak of the early Jiedan stage. It seemed that he would soon enter the middle Jiedan stage.

However, Yang Chen did not feel particularly rushed. Although these spiritual powers were purely First Wood True Essence, they were not cultivated by himself. If it wasn't natural, he would lack a natural understanding. Only by constantly consolidating it would he be able to completely use these spiritual powers himself.

Seeing that all the First Wood True Essence Spiritual Solution here must get absorbed by Yang Chen, he also began to ponder how to leave safely.

With so many First Wood True Essence Spiritual Solution, the two city owners would never be willing to watch Yang Chen take it away. In particular, Yang Chen's gourd could gather the First Wood True Essence Spiritual Solution, which could solve the hidden dangers of the city forever, so it was even more difficult for him to leave easily.

Just because Yang Chen was now in control of the First Wood True Essence Spiritual Solution that could explode at any time, the two city lords were so tolerant of him. On the one hand, it could be regarded as a temporary solution to the hidden dangers of the entire city. On the other hand, it was a moment to wait for Yang Chen to put his guard down.

In the moment when all the First Wood True Essence Spiritual Solution was collected by the gourd and Yang Chen put it into his Achievement Ring. Even if someone killed Yang Chen in this world, it was impossible to get the gourd from the Achievement Ring.

However, Yang Chen's body still had an aura of the First Wood True Essence about to erupt. This kind of aura could also stimulate Yang Chen's own spiritual power.

Without the First Wood True Essence Spiritual solution, there was a huge space around it, and a trace of the First Wood True Essence aura was coming from all directions. Yang Chen understood that this place must be where the Immortal left behind the formation to collect the First Wood True Essence. Because it had been so long, there was too much First Wood True Essence accumulated here, and due to the pressure, it became a spiritual liquid.

Yang Chen estimated that this city was discovered too late by the later Monster Race. In the future, if someone could collect the First Wood True Essence that had been gathered in time and prevent the situation of accumulation of a sizeable quantity, all problems would be solved.

There was no light in the day, Yang Chen's spiritual awareness had been explored, and there was nothing else worthy of his hands anymore. He took the First Wood flying sword and directly flew up into that strange liquid.

In the liquid, Yang Chen's spiritual awareness couldn't explore very far, but Yang Chen believed that even the city lord's spiritual awareness was impossible to pass through these liquids.

Yang Chen was hesitating, if he should also gather some of it. But after thinking for a bit, he finally chose to give up.

Everything here was left by the slain Immortal. Yang Chen had already received the First Wood True Essence Spiritual Solution he had left. He had already accepted the reward of the immortal.

If he wanted to forcibly collect these liquids, once the entire city was affected, the Immortal's cave would probably be destroyed. This kind of practice of taking things without leaving room was not Yang Chen's style.

Even if he was to leave a place for the development and reproduction of the Monster Race, Yang Chen was not afraid. The Daoists, Demons, and Monsters were cultivators between heaven and earth. Since even the Heavenly Court had left a place for the Monster Race, Yang Chen did not have heart to do anything about it.

All the way up, the force that could follow the spiritual awareness to pull people down was long gone. Yang Chen went up smoothly and entered the pool.

As the water pool rose again, Yang Chen would soon be out of the water. However, just after going out of the water, Yang Chen saw two old people, one left and one right, standing on both sides of the waterhole, smiling and watching Yang Chen.

At this time, Yang Chen was not afraid that his spiritual awareness would be attracted, and directly let go of his spiritual awareness to explore the movement around. However, under this investigation, Yang Chen was shocked.

Within the scope of Yang Chen's exploration, apart from the two old people in front of him, there were only monster cultivator masters who had formed an encirclement in the distance, no one else.

Chapter 303.2: Short Cultivation

That was to say, during the time when Yang Chen collected the First Wood True Essence Spiritual Solution in the first half of this year, the two city lords actually dismissed the entire city's Monster Race cultivators, leaving only the masters of the Yuanying realm. It seemed that they wanted to seize Yang Chen in one fell swoop.

"Greetings to the two city lords."

Finding this arrangement, Yang Chen did not care. He came out of the pool, took a few steps forward, and then stood in a place where he could see both old men at the same time. Arching his hands to the two, he greeted, "many thanks to the two seniors! This younger generation junior thanks you."

"It may be worthwhile."

The old man on the left smiled.

"Everyone is the same in the Monster Race lineage, and mutual correlation is appropriate."

The old man with a cane on the right followed his companion. He was the second city master.

"This younger generation junior had been practicing here for a while and did not dare bother the two predecessors. So now this younger generation will take his leave."

Yang Chen once again said to the two men and turned to leave.

Yang Chen always kept the First Wood True Essence in an unstable state. The two city lords did not block him at this time. Just pointed at Yang Chen and nodded, standing in the same place, watching him leave.

They waited till Yang Chen went far through the entrance of the city. Those Yuanying realm masters could still be detected by him, but they were all outside a certain distance.

According to the spiritual awareness of the Jiedan realm, it was absolutely impossible for Yang Chen to find these Yuanying realm masters outside. To be on the safe side, those Yuanying realm masters were

even hidden outside the scope of the exploration of the masters of the Yuanying realm, that was how much they were afraid of him.

No one knew, that Yang Chen actually had the spiritual awareness of the Dacheng realm. Even if these Yuanying realm monster cultivators were careful, everything was clear in his mind.

Standing at the exit of the city, Yang Chen turned his head and glanced at the city again, then stepped through the exit. In a flash, Yang Chen's figure appeared above the Ten-thousand Trees Forest.

The First Wood flying sword appeared directly at the foot of Yang Chen. His figure was like an arrow shot from a bow, flying rapidly towards the centre of the Ten-thousand Trees Forest.

After a few breaths, the figures of the two city lords appeared in the place where Yang Chen had just come out. Subsequently, dozens of Yuanying realm ancestors were behind them.

"Escaped?"

The second city owner seemed to be able to sense the direction of Yang Chen's escape. He sneered and asked, "is everything ready?"

"City lord, everything has been arranged properly."

A monster cultivator of the Yuanying realm replied respectfully behind him.

"Good, wait until he leaves the Immortal's cave to get a thousand miles away."

The second city lord said, the people shook and disappeared.

The big city lord just stood there and did not move. The Yuanying realm masters behind him, stared at him while awaiting orders. The big city master was silent for a while, then jerked his head, and the dozens of Yuanying realm masters showed a happy colour on their face.

Brush! Their figures flew around and vanished in a moment.

Seeing the departure of the crowd, the big city lord stood in the same place for a long time, and then slowly turned around. His body shape disappeared, but he did not move to catch up with Yang Chen but returned to the Immortal's Cave.

The two city lords must always oversee the Immortal's Cave. Otherwise, others would take advantage of it. For the Monster Race, it would absolutely be a disaster.

Yang Chen's figure had already entered the Ten-thousand Trees Forest. After the flying sword flew away from the big banyan tree for a hundred miles, the aura of Yang Chen's body suddenly changed and became a scent of the Second Wood aura. Then he sank and disappeared directly under the dense canopy of the forest.

The second city master that had been chasing after Yang Chen did not expect this move from him. He subsequently lost the First Wood spirit power aura. When he hurriedly explored with his spiritual awareness, he discovered that Yang Chen's figure had long been drowned in the forest, even if he tried his best, he could not find the trace.

Letting a descendant of the Jiedan realm get rid of him right under his own eyes, how could the face of the second city master who was a master of the Dacheng realm continue to hang on? He almost went crazy, directly driving his magic weapon into the place where Yang Chen disappeared, and his spiritual awareness went wide open, looking for any trace.

The many Yuanying realm masters had already laid down the Formation in the Ten-thousand Trees forest. When Yang Chen absorbed the First Wood True Essence Spiritual Solution below, the city lords began to arrange it, demobilizing all the residents in the city, and at the same time arranging the formation in the Ten-thousand Trees forest.

The array method had only two functions. First, if there was no specified token on the body, it will appear in the battle formation. And the tokens of such Yuanying realm masters could get guidance and point out the direction of Yang Chen's escape. Another function was to control the explosive power of the First Wood True Essence Spiritual Solution within a range without affecting too large a region.

The second city lord was a little angry out of shame. People disappeared in his surveillance. In the end, they had to rely on the array of the masters of the Yuanying realm to find him. This was simply a shame.

However, no matter how the second city lord let go of his spiritual awareness to search, they could not detect the traces of Yang Chen. He seemed to have turned into a tree or shrub himself, disappearing from the space of all people's vision and exploration.

Fortunately, the well-arranged array method had finally started, which dozens of Yuanying realm masters had spent half a year to arrange the array, which was still very surprising.

The absorption of the First Wood True Essence Spiritual Solution took Yang Chen half-years' time, allowing the two city lords to have enough time to arrange it. In this array, anyone with no token and a cultivation base over Jiedan realm would be displayed precisely.

The direction of Yang Chen was displayed on the token of everyone. Unanimously, the second city master and all the Yuanying realm masters simultaneously rushed in that direction.

The second city master almost chased after him while gnashing his teeth. This time, if Yang Chen was able to flee under this heavy encirclement, the face of this master of the Dacheng realm would definitely be squeaky.

What everyone didn't think of was that they chased and soon saw Yang Chen's figure. However, Yang Chen did not have the panic that they imagined, nor the kind of jade that burned in jade, but stood quietly above a huge canopy over, as if waiting for them to come.

"I don't dare about the city master and all the seniors' hard work, this younger brother is leaving."

Yang Chen's voice came from far away, and it was as clear as one speaks near someone's ear.

Later, everyone saw that Yang Chen's figure began to shoot at a distance. Everyone used all their horsepower to catch up, but only looked at his going farther and farther in vain. No one could catch up.

Looking at the distant Yang Chen gradually fading into a smaller figure, the second city master suddenly bit his lips, his body swayed, suddenly turning into a hundred zhang long goshawk with double wings. He then suddenly followed.

Chapter 304.1: Three Matters

The speed of Yang Chen's shuttle was very fast, and even Luo Yuan in the late Dacheng realm could not catch up. That was still the time when Yang Chen was in the foundation realm. Now Yang Chen had three Golden Dan, and it was not known how much stronger he was than before. The speed of this shuttle was almost 50% faster.

But what Yang Chen didn't think was that the second city lord had such an original appearance, and the speed was even faster than the shuttle. The huge wings of the city lord were swiftly fanned for a few times. The distance begun to decrease rapidly.

Fortunately, when Yang Chen was talking to those people on the edge of his own spiritual awareness, he had gotten up early, at least there was a distance ahead of the second city master. Even if the speed of the second city master was fast, it will not be able to catch up with him for a while.

At this time, Yang Chen suddenly felt that he was somewhat overbearing. Among the predecessors of the Heavenly court, there were also a few Monster Race from the origin of birds, which were characterized by their speed.

Because of the speed of the shuttle, Yang Chen had not even looked at the masters of the Dacheng realm. The second city master started to catch up and let Yang Chen see the impending crisis.

He couldn't say it, if he can't escape this time, he could only use the Immortal Beheading Blade. However, how Yang Chen would ruin the Immortal Beheading Blade like this. He still unwilling from the bottom of his heart, so the first choice was still to run and escape.

His spirit power was pushed to the extreme, Yang Chen let the speed of the shuttle to reach the maximum, to make a crazy escape while planning countermeasures. There was only one threat of second city owner. If he could solve it, then he wouldn't have to worry about it.

This time, Yang Chen did not make the posture to detonate the First Wood True Essence Spiritual Solution. In the middle of the Immortal's cave, they were worried that the Immortal's Cave, where they

cultivated, would be destroyed. But outside, even if Yang Chen detonated the First Wood True Essence Spiritual Solution, only he would be hurt. For the second city master who was flying faster than himself, was almost impossible to damage.

The two men chased like this, and the distance that was originally a hundred miles away was now shrinking. In less than ten days, the two were less than fifty miles away from each other.

Although the second city master was getting closer and closer, the surprise in his heart was also getting stronger and stronger. This little calf had many magic weapons on its body, not only he had a magic weapon capable of collecting the First Wood True Essence Spiritual Solution, but also had such a powerful flying magic weapon.

When this situation fell in his eyes, the first reaction was that Yang Chen must have inherited them from an ancient Immortal's cave, otherwise it was impossible to have so many formidable Magic Weapons. At the thought of this, the heart of the second city lord suddenly heated up. If the magic weapon of Yang Chen could be taken for himself, wouldn't it be a big ticket?

When these thoughts came out, they could no longer be pressed back. The second city lord thought more, if he didn't chase too fast, he would catch up with Yang Chen in the Ten-thousand Trees Forest. Not many things would fall in the eyes of some people, and eventually it would be good. The intention was to make himself the sole owner of the treasures that Yang Chen had.

The second city master would not believe that Yang Chen had only the gourd and the flying magic weapon. Even if these two the big city lords shared it. The big end of the remaining things must be had by the second city lord himself to be reasonable.

Thinking of this, the speed of the second city lord slowed down a little, keeping a little faster than Yang Chen, but before he flew out of the Ten-thousand Trees forest, it was absolutely impossible to catch up. He leisurely swam behind Yang Chen, slowly chasing.

This chase and escape took a month's time. Seeing that Yang Chen had already seen the edge of the Ten-Thousand Trees Forest, his ear heard the voice of the second city master, "this kid, you ran for so long, this old man has given you face! Don't you want to pick it up?"

"Catch up and then let's talk about it, senior!"

Yang Chen did not want to go back directly and continued to fly fast.

However, the other party gave Yang Chen the opportunity to fly out of the Ten-thousand Forest. For Yang Chen, it was excellent news. In addition to the shuttle being able to fly and flee from within the water, Earth Escape was also very outstanding. The wood attribute in the Ten-thousand Trees Forest was too strong. Wood destroys Earth, if Yang Chen even wants to use the Earth Escape, he must consider the risks. What's more, there was a formation to collect the First Wood True Essence of the wood under the forest. Yang Chen did not dare to risk the Earth Escape.

But out of the Ten-thousand Forest, Yang Chen would not care about that. The second city manager's flight was fast, could it be faster than the shuttle on Earth Escape?

As soon as he left the Ten-thousand Trees Forest, the shuttle controlled by Yang Chen was much lower, and was just flying on the ground. The second city lord was only hanging from afar, and he did not know what was in his mind.

Suddenly, Yang Chen paused, his body hung in the air, facing the rear, and the second city master who was 30 miles away. He shook his other hand again, saying "thank you for the personal escort city lord, this younger brother will leave now!"

As soon as the voice fell, the shuttle under the control of Yang Chen drilled into the ground. Looking from afar, it was like a seabird that had already sent prey to fly from the air.

For a moment, the second city master didn't understand Yang Chen's plan but suddenly he became furious. He flapped his huge wings like a fan and rushed towards Yang Chen.

At the same time, the second city master Monster Soul blazed and placed a mark directly on Yang Chen's body. Even if Yang Chen went to the heavens, it was now impossible to escape from his Monster Soul tracking.

This was not counting the fact that whether Yang Chen's body was in the ground. The second city lord had made a group of conglomerate Monster Souls hit Yang Yang's mind.

This kind of Monster Soul attack had the same effect as Luo Yuan's Primordial Spirit attack, but it was not the kind of Luo Yuan's kind, but it was gathered into a group.

However, when the attack power was the strongest, it was the moment when the Monster Soul spirits exploded. With a bang, the Monster Soul of the second city master directly exploded in Yang Chen's sea of consciousness.

Knowing that his sea of consciousness had an explosion, Yang Chen seemed to have not felt it in general. His current understanding of the sea of consciousness was strong, even if it was his previous life in the spiritual world, it had not been so stable. Not to mention the Monster Soul explosion controlled by the second city master in the Dacheng realm, even if it was the Lan Ying (the octopus he met after being chased under the sea) that was ascending, it was impossible to use Monster Souls to hurt Yang Chen now.

His figure indiscriminately broke into the ground, and the second city lord arrived after only a few breaths. Feeling the Monster Soul mark that he planted more and more, the second city lord was almost angry and thunderous.

He was an airborne flying monster cultivator, although he had the ability to escape underground, but if he wanted to be free in the underground like Yang Chen, it was impossible. He could only track the Monster Soul mark on Yang Chen Soul.

Chapter 304.2: Three Matters

Yang Chen drove the shuttle and kept going down, only at a thousand feet deep did he stopped. This depth, even if it was the Monster Soul mark of the second city master, it would still be useless.

Only if the second city lord would also go underground that there was any chance to chase him further. However, under the ground, the second city lord could not guarantee that his speed could keep up with Yang Chen and could only watch him at the edge of his spiritual awareness' reach.

"The second city master, once again sent me away, this younger generation junior is very grateful."

Yang Chen's voice chimed in the mind of the second city master, it passed through his own monster soul mark, clear and incomparable.

“You want to go? Wishful thinking!”

The second city master heard Yang Chen’s voice, and noticed that he had turned his own monster soul mark into a communication bridge with him. Suddenly his waist straightened.

If there was such a monster soul mark, even if Yang Chen was able to escape thousands of miles away, the second city lord could also perceive his direction. Unless Yang Chen had been staying underground and becoming a mouse, as long as he comes out, he would have to face the pursuit of the second city lord.

“This predecessor, this younger generation junior and the original owner of the Immortal’s cave have quite a relationship and can’t bear to not bring down his inheritance.”

The voice of Yang Chen in the mind of the second city suddenly became fierce, “I only ask you to follow three of my instructions; senior, you turn around now, this younger generation junior takes it that this did not happen.”

“Ignorant junior, such big words!”

The second city lord was furious. Yang Chen’s words were clearly threatening to make him turn back. However, with the cultivation base of the second city master, in addition to the big city lord in the Immortal’s Cave, it was impossible for him to agree.

After so many years, how could the second city lord accept Yang Chen’s attitude. Now the second city lord wanted to catch him and directly crush his corpse to relieve his own bad breath.

Boom!

A shuddering aura came through his own monster soul mark, the momentum it carried was simply unheard of in the eyes of the second city master. Even the second city master of the Dacheng realm trembled when he felt it.

This was the aura of the master at the peak Dacheng realm, and it was also the aura of a monster race predecessor. The first reaction of the second city lord was this, but soon realized that he was wrong.

This was not the master of the peak Dacheng stage. It was clearly the aura of the monster race predecessor who had already passed the Wind Tribulation and would soon ascend. This was definitely the Monster Strength's Crystallization that the predecessor had left behind.

Yang Chen, a young Jiedan realm junior, could not have such an imposing aura. Moreover, if Yang Chen was a master who had already overcome the wind tribulation, he should have already ascended, how could he have stayed in the mortal world. This was definitely the Monster Strength's Crystallization of Yang Chen's predecessor which he had gotten from somewhere.

The second city master had reached the peak of the initial stage, and with only one step he could enter the realm of the middle Dacheng stage. If he has this monster power crystal in his hands, then the second city lord was entirely likely to slowly refine this power crystal. At that time, don't talk about the middle Dacheng stage, even if it was the peak of the Dacheng stage, it was still easy as pie.

In an instant, the heart of the second city lord burned again. He thought that was expected of Yang Chen. He said that he had a relationship with the original owner of the Immortal's Cave. Maybe he was the descendant of the original owner of the Immortal's cave. If Yang Chen was killed, wouldn't the things that he passed down in his hands all become his own?

Originally, Yang Chen's original intention was to use this demon power to make the second city master retreat but did not expect that it directly provoked his greed.

"Hand over the monster power crystal, hand over the gourd that you used to gather the First Wood True Essence Spiritual Solution, and I will spare your life!"

The threat of the second city master was directly transmitted to the consciousness of Yang Chen through the monster soul mark, "don't dare to be stubborn, or you will die!"

Yang Chen was silent this time. The second city lord could not detect any movements of Yang Chen for a long time. However, the monster soul mark showed that Yang Chen was still in the same place but did not know what he was doing there.

The second city lord had patience and he was ready. Originally chasing Yang Chen was about saving his own face, but now it was the naked interest. Nothing else, even if it was only for the monster power crystal, the second city lord must use all his power to reign it in.

IF he couldn't catch up with Yang Chen's Earth Escape, couldn't the second city lord still use other tricks? The second city lord trembled all over his body, he sent flying hundreds of feathers on his bodies and which fluttered around in the surrounding.

It was only a moment of effort, the feathers fell on the ground, and the feather handle was inserted into the ground without exception. Each piece of fallen feathers had a corresponding position. When the second city lord other feathers landed, his monster power was stimulated. In a short time, those feathers formed a large array and surrounded hundreds of squares of land.

"Hmm!"

The second city lord mouth shouted loudly, his large monster power landed on the feathers and surrounded the place where the array was covered. Within the scope of the array, all the land had become stronger than steel. Not to mention the Earth Escape, it was already lucky to be able to survive in it.

A pair of claws stretched out in the air and caught on the ground. Bang, like a big hand that opened the mountain, the ground that was dozens of feet deep, was directly caught by a grab, and there were now many openings. The second city lord had already dug down hundreds of feet. A few more times, Yang Chen would be dug up by the second city master.

"There's a road to Heaven yet you don't walk it, hell is without a door, yet you charged into it!"

The movement of the second city lord completely enraged Yang Chen. Originally, he still felt that he had collected the First Wood True Essence Spiritual Solution from others, but he still had to pass on the inheritance. However, the greed of the second city lord made him think otherwise.

"There's someone responsible for every grievance, for every debt there is a debtor. You and I have no past grudges. No recent hatred. This predecessor had tried to take the life of this younger generation junior. This younger generation can only fulfil you." Yang Chen's voice once again rang in the mind of the second city master.

The words to the second city master from Yang Chen were simply turned to a deaf ear. When you look at it, he was striving to get a crystal of monster power from an ascended expert, why would he care for such words. The two claws instead sped up and excavated towards Yang Chen faster.

Just when he felt that he was less than twenty feet away from Yang Chen, the second city master suddenly realized that his monster soul mark seemed to be taken by something and put into another place.

Suddenly, an extremely crazy killing intent directly rushed into his mind. It carried supreme majesty and terror. It instantly broke through the sea of consciousness of the second city lord.

The second city master was looking forward to the glory of getting the crystallized Monster Strength, instead he ate this killing intent. Suddenly his sea of consciousness shook severely, his brain was in chaos. In his boundless fear, the second city lord fell into a deep crater, he fainted directly.

Chapter 305.1: Bountiful Harvest Again!

Yang Chen's figure slowly got out from the hard land. It couldn't be helped but said that the second city lord was powerful, and this set of feathers formation could restrain the art of earth escape. The only downside was that it took time to restrict it and Yang Chen's earth escape was faster and could not be blocked in time.

If Yang Chen had been in the same place, it would have given the advantage to the second city lord, that's why he was not so sure.

However, it was already too late to say anything at the moment. Since Yang Chen decided and said his exclamation of execution, there was no room for relaxation.

In the face of the unconscious second city master, even though he was a master of the Dacheng realm, Yang Chen still had a way to make his death certain. Of course, Yang Chen would not use a simple sword to cut his head, but a relatively gentle way.

The reason why the body of the second city lord was not destroyed yet was still due to his consideration for his master Gao Yue. A full-fledged Dacheng realm monster core and corpse body, for any cultivator, was a precious priceless material.

Although Gao Yue had a praying mantis around her, Yang Chen did not mind adding one more Dacheng realm puppet. Especially the body of the second city lord was a fast flying goshawk, even Yang Chen's current shuttle could not match it. Once his Master was in danger, it would serve as a good escape treasure.

It was not known how many people would beat their chest and stamp their feet in desperation, if they knew Yang Chen intended to use the body of the second city lord like an escape treasure for his master Gao Yue. To recklessly waste natural resources like this! It was the body of a master of the Dacheng realm, ah!

Speaking of it, perhaps the second city master was the quietest person to ever die in his hands, no struggle, no pain, no feeling. He lost his life while being in a coma. (now the author is just mocking him)

However, if the second city lord had a choice, he would never choose such a deadly method. Perhaps he had regretted the moment before the coma, maybe not, who knew?

The body of the second city lord was directly loaded into the medicine garden's bottle. The hundreds of feathers around him lost support of the second city lord's demon power, becoming ordinary feathers. However, each feather was still tough as steel, but light enough to keep fluttering and maintain the characteristics of a common feather.

Yang Chen didn't forget to take them as well. The feathers of the second city lord, a monster of the Dacheng realm, seemed to have been refined and could be regarded as rare and precious treasures to further refine formations. His senior sister would definitely like them.

As a city lord in charge of the Immortal's cave for many years, there were absolutely many good treasures on the second city lord. Yang Chen refused to let the second city lord's Qiankun bag be his anymore.

Because of the actions taken by the second city lord, the terrain has changed greatly. Of course, Yang Chen would not stay here for a long time. After removing all traces, he drove the shuttle to quickly leave this place. He then flew towards the snowy and icy north.

He used the inverted sea jasper to shield himself from the exploration of spiritual awareness. After driving the shuttle at high speed for a few days, he opened the second city master's Qiankun bag to evaluate his harvest.

The first thing he saw were hills of spirit stones, each hill to a specific grade; low, middle and high graded spirit stones, piled up into three hills. After so many years, all the treasures in the Immortal's Cave had to be purchased and rented with many spirit stones. The net worth of the second city lord had made Yang Chen a little jealous.

Although there were many spirit stones, it still did not let Yang Chen lose his sense of proportion. However, what surprised him most was the dozens of top-grade spirit stones. Each piece of spirit stone had a weight of several Jin, much heavier than the top-grade spirit stones that he obtained from the old land.

At the time of being chased by Luo Yuan, Yang Chen had spent five top grade spirit stones in ten years. After giving his master Gao Yue and sister Gongsun Ling two, only another two were left. Good steel should be used on a good blade. Sometimes excessive expense could be avoided. Yang Chen would even use high grade spirit stones instead of a top-grade spirit stone to power the shuttle in a bid to save top grade spirit stones for times of need.

Now these dozens of top-grade spirit stones could be used to power the shuttle. No longer will he worry about the shuttle's requirement anymore. Now he could use them sparingly.

Not to mention the top-grade spirit stones, if the other grades of spirit stones obtained were estimated, the value was more than a thousand jin of top-grade spirit stones. According to calculations, the whole Pure Yang Palace added up, had no more than the second city lord.

It could be said that Yang Chen was now one of the few super-rich people in the mortal world. He couldn't help but think that when the second city lord had such wealth, wouldn't the first city lord be richer?

Of course, this was just a frivolous thought. Even if the temperaments of the monster race were different, Yang Chen had not yet decided to rob others. There was always something between the heavens and the earth, regarded as treasure, destined only to be his. He would never be guilty for taking such a treasure.

No matter who attained such an amount of spirit stones, their mood would not be too bad. Yang Chen was also the same. The collected spirit stones would one day, buy him some needed materials for practice. Next, Yang Chen began to look at the other treasures.

It couldn't be helped but said that the city lords who controlled the cultivation of hundreds of thousands of monster race cultivators, were indeed rich to the extreme. All of those cultivators searched for the spirit stones, almost all the good treasures found in the Monster Beast Plains were sent to them.

A variety of rare materials were piled up like garbage in a corner of the Qiankun Bag, forming a dense hill that was compacted together. These materials collected over a long time had been thrown together randomly, making accounting difficult.

With just a few glances, Yang Chen saw several top refining materials, including fire attributed materials that he needed.

The Bright Ray Sword of Yang Chen could not be left behind. Relatively speaking, the materials used in it were not of particularly advanced nature, resulting in the flying sword's grade not being too high. With these materials and the high-level flying sword that was previously grabbed from Elder Ming's hand, the Bright Ray Sword could achieve a level of an earth attributed flying sword.

The materials of other kinds were also available. At least Yang Chen believed that as long as he found the main materials of various attribute flying swords, his own Yin-Yang five elements flying swords would not need to prepare any auxiliary materials at all. These materials had now fulfilled those criterions.

However, these were still not the most surprising to Yang Chen. When he saw the neatly discharged jade slips among the eight large boxes inside the Qiankun Bag, he almost pulled his eyes out of their sockets.

Chapter 305.2: Bountiful Harvest Again!

Eight boxes, each with at least one thousand pieces of jade slips. Yang Chen picked them up one by one, and after the exploration with his spiritual awareness, he suddenly found out that in this pieces of jade slip, the monsters of a certain race were recorded from the foundation of their cultivation to the advanced and then to the top cultivation law.

A piece of jade was a cultivation method of the monster race. There were at least 8,000 pieces of it here. Was there a cultivation method for more than 8,000 monster races here? After Yang Chen took a few pieces in each box and saw it, it was discovered that there were six boxes with similar things. In other words, there were at least 6,000 monster race cultivation methods.

Among the other two boxes, one box contains the method of the monster race refining. The refiners of the monster race were different from the human cultivators. The cultivators could refine with the aid of various materials, but for monster cultivators the materials were only auxiliary. What was really needed for the refining was some parts of them.

She Kui and Xie Sha was able to make their own fangs and large tails into Life Source Magic Weapons, while the old tree demon was using his own branch. Different monster race have different refining methods.

Although Yang Chen had contact with many monster cultivators in the Spirit World and Immortal World, he also remembers some advanced refining techniques. However, Yang Chen was definitely not so comprehensive in this method of refining of different monsters. There was no such system of low-to-high step-by-step.

In the remaining box, it was the refining technique of some medicinal pills commonly used by the monster race. The medicinal pill of human cultivators and those which were taken by the monster race were different. In addition to the cherished medicinal ingredients, they could also be used as medicines for all kinds of Monster Core and Demon Qi. Even the Jiedan stage masters of the human cultivators could be used as tonics for the monster race.

Although this method of refining was deviant to the human cultivators, in the eyes of the monster race, it was as natural as how the human cultivators used monster cores as elixir. The common law was to see which side of the coin they were at and which side to speak from.

As the former Great Principle Golden Immortal, Yang Chen certainly does not think this way was unacceptable. On the contrary, the real alchemist masters could refine the medicinal pills with the use of human cultivators.

Although Yang Chen already has the most advanced alchemy techniques on the top of the Elderly Lord Pill Scripture», the alchemy techniques and pill recipe of these monster cultivators were absolutely excellent references and collections for Yang Chen. Sometimes, maybe Yang Chen could gather two families and refine new medicinal pills.

From this point of view, the masters of alchemy in the memory of Yang Chen's previous life seem to be only too old, and people have such a realm. Everyone else has its own limitations.

It's just that these eight boxes of jade slips, plus the insights of Yang Chen's past life, were enough to make Yang Chen become the expert in the direction of monster cultivators. Don't mention Xie Sha or even a sly character like the old tree demon and the ruthless Lan Ying. Yang Chen could still give them pointers.

If these things were taken back to the Pure Yang Palace, the Pure Yang Palace could be opened almost immediately to absorb the disciples of the Hall of Eccentrics, and it would become a sacred place for the Monster Race who could fight against the monster cultivators Immortal's Cave of the Ten-thousand Trees Forest as equals.

Not only that, because of the combination of Yang Chen's insights and the experience of the cultivators practice, in some respects, the Pure Yang Palace could even surpass the Banyan tree, which has great significance for the development of the Pure Yang Palace.

Even if it was temporarily open to recruit the monster cultivators disciples, it would be unrealistic, but at least the dozen masters of the Hall of Eccentrics in the Pure Yang Palace already have a systematic cultivation method. If then, a dacheng stage monster cultivator could be roped in. If the monster joins the Hall of Eccentrics, the strength of the Pure Yang Palace would more than double out of thin air.

Anyway, now one sect after another has started to set up a Hall of Eccentrics, and even the Greatest Heaven Sect was no exception. At that time, as long as there was a suitable time, the Pure Yang Palace could become the most popular martial art sect of the monster race, and their future development would be unprecedented.

To put it bluntly, these jade slips were the inheritance of the monster race. Yang Chen was not sure whether the second city lord had all it here. Maybe there was still some with the big city lord, but this does not prevent Yang Chen from getting the inheritance of most of the monster race.

After collecting these jade slips, Yang Chen continued to look for a lot of magic weapons in this Qiankun bag. He didn't know where the second city lord got the magic weapons. It was good that Yang Chen could reserve some for the Pure Yang Palace disciples, the poor ones could be sold and replaced with spirit stones, it always good to make a small amount of money.

However, after cleaning up so many things, Yang Chen did not even see a Spirit Medicine. You must know that no matter whether it was a Monster Cultivator or a Human Cultivator, it was the same regarding the elixir. Since the second city lord had so many advanced materials and spiritual stones, it was obviously not normal to have no elixir.

Even if the second city master was a master of the dacheng stage, it was impossible to eat all the elixir that has been handed over to him. You must know that those jade slips still have the method of alchemy, and the elixir was even better, but after all, it was not better to eat it directly than to make it. The second city lord should know this truth.

The only possibility was that the second city lord has a medicine garden space, and all the elixir were collected in the medicine garden space. Yang Chen's gaze began to search for something that might be a medicine garden.

There were too many magic weapons here, and Yang Chen had to screen them one by one.

The second city lord was dead, and all his spiritual awareness marks were also disappearing. Yang Chen could easily infiltrate his own spiritual awareness into various magic weapons and explore the use of the magic weapons.

Flying swords, weapons, defensive armor, amulets, all kinds of things. After exploring hundreds of magic weapons, Yang Chen did not find the space of the medicine garden. Fortunately, Yang Chen had patience and enough time to see everything.

Hard work pays off, when Yang Chen explored a transparent crystal ball, he finally found what he was looking for.

As soon as his spiritual awareness touched the crystal ball, it entered a huge space. However, the space seems to have a resistance. Yang Chen could only know that there was a big space inside, but he couldn't know what was inside.

For the second city lord, this medicine garden was very important, and it definitely had gone through many sacrificial refining. Yang Chen just got the body, but it hasn't been gathered yet. It was not so easy to control the medicine garden.

Yang Chen's first reaction was to find a way to collect the space of the medicine garden from the Qiankun bag. But soon Yang Chen gave up looking. The second city lord did not think that he would die, and did not want to ascend to leave the medicine garden to future generations. How could he leave the method of gathering it in his own Qiankun bag?

Now, Yang Chen could only violently refine the space of this medicine garden. !!!
