Chapter 336.1: Series Of Incidents

Yang Chen being at the bottom of the sea did not expect it at all that the other party still had such a trick. For so many years, Yang Chen relied on the shuttle he got from the Dragon Palace treasure house to move around unhindered, Guan Yueying and Luo Yuan had been taught a lesson because of the shuttle, Luo Yuan even lost his life because he could not catch up with Yang Chen.

When he drove the shuttle, nobody was able to catch up with Yang Chen. Yang Chen only met such an event once, that was the second city lord whose main body was a Goshawk. The second city lord had a dacheng stage cultivation base and was by itself a flying monster, so his speed was very fast, but catching up to him was very difficult for him.

All of these made Yang Chen and the pure Yang Palace people have an unusual confidence in Yang Chen's shuttle. It seems that as long as Yang Chen has the shuttle in hand, it would be impossible for others to catch up with him.

Everyone thought that it was impossible for others to catch up with Yang Chen in the shuttle and Yang Chen seems to have forgotten that although the shuttle was taken from the Dragon Palace and its grade was very high, the shuttle has not yet reached its limit. It was closely related to Yang Chen's cultivation. The Jiedan stage cultivation base was only able to bring out part of the speed of the shuttle, not all.

Yang Chen, who was speeding along on the bottom of the sea, did not notice that a winged sailboat on the sea was turbulent and that it was catching up with himself at a speed that was nearly double that of the shuttle.

He let the other party follow him in circles for more than a month, just to make the other party unable to determine his destination so that he could set a trap in advance. When they came to the sea, it was basically Yang Chen who had the final say.

"If it wasn't for the old man in the sky, the water dividing wings couldn't be blessed on the ship and we wouldn't have caught up with this little animal." On the sailboat, watching the pointer on the compass swing faster and faster, the owner of the wing sneered again and again "You really thought the sea was your world?"

The several people sitting next to each other also slowly stood up and began to prepare for the next battle. Their goal this time was very clear. They must seize Yang Chen or kill him. They couldn't let Yang Chen return to the Pure Yang Palace.

A few months ago, the Greatest Heaven Sect received some secret news that the Green Jade Immortal Island and the Blue Cloud Sect successively made deals with the Pure Yang Palace, they would provide enormous benefits to the Pure Yang Palace in exchange for dozens of Questioning Inner Heart Pills.

This news shocked the high ranking members of the Greatest Heaven Sect. Under the circumstances that the Greatest Heaven Sect was bombed and their vitality was severely injured, the Green Jade Immortal Island and the Blue Cloud Sect got dozens of Questioning Inner Heart Pills, what could this mean. It was really scary to think about it.

If they let this situation develop, it would take less than a few years, and the name of the number one sect of the Dao Sects would be changed.

For a moment, these high-ranking members in the Greatest Heaven Sect were eager to get a senior alchemist master like Yang Chen. If the fellow who was responsible for picking up the disciples did not throw Yang Chen out of the gate, how good would it be? It was a pity that everything was late now. The news that Yang Lan brought back, Yang Chen was not only unappreciative but he was also scornful of the Greatest Heaven Sect.

It was obviously impossible to let Yang Chen take the initiative to come to them, so the rest was either to capture Yang Chen alive to force him to be their sects alchemist or to kill him, and never suffer from it, but regardless of that, there was a premise. It was for them to do their possible best to get a certain secret manual or alchemy recipes from Yang Chen.

A guy who could refine the Heaven Seizing Pill in the foundation stage could never be born naturally. The only explanation was that Yang Chen had an adventure and got a strong alchemy secret manual, otherwise they could not explain his enchanting performance.

This secret manual was definitely found in the countless miscellaneous books he read, the Greatest Heaven Sect was convinced of this. Yang Chen's habit of reading miscellaneous books has long been known to all. There must be such a book for Yang Chen to have such a level of alchemy talent.

The Greatest Heaven Sect sent a strong lineup this time. Last time, they just randomly dispatched a few of their members in the rogue cultivator's alliance but nothing was left by Yang Chen. This time, the Greatest Heaven Sect attached great importance to it, so all the people they sent were at the Yuanying stage.

For Yang Chen's combat effectiveness, to tell the truth, the Greatest Heaven Sect did not care much about it. Yang Chen was even more powerful. Even if Li Qichen could be killed in the early stage of the foundation realm, it would be just a small fight. Maybe he might use a certain powerful medicinal pill.

A person was even more powerful, but after all it was limited, but Yang Chen's medicinal pills were worthy of dozens of masters. This was the thing that made the Greatest Heaven Sect jealous.

Six Yuanying stage masters to deal with Yang Chen, in the view of the Greatest Heaven Sect elders, was more than enough. Not only that, but there were also two magic weapons that were refined by dacheng stage masters. One was the tracking compass to specifically track the spiritual awareness imprint of a certain person. The other was the sailing boat that everyone was riding.

This was a small and famous magic weapon of the Greatest Heaven Sect, but the reputation was only spread in the sect of the Greatest Heaven Sect and it has not been circulated. Sailboats were just a bit faster and there were no other advantages to it so others would not pay too much attention to it.

However, if the sailboat was coupled with the water dividing wings of the robust man, it would be able to more than double the speed of the sailboat in the sea. This was the trump card of the Greatest Heaven Sect this time.

Initiating the vibration of the spiritual awareness imprint, it was also the fact that these guys knocked on the mountain and took the initiative to let Yang Chen discover that they were tracking him. They had analyzed Yang Chen's several actions. Whether it was killing others or being chased by Luo Yuan, Yang Chen liked to run to the sea. So they knew that Yang Chen would definitely return to the sea.

It was estimated that Yang Chen's plans were not enough. The enemy has already thoroughly studied his behavior, and even his final destination has been counted. Anyway, as long as they got to the sea, Yang Chen's speed that he was proud of could no longer be relied on.

Water subdue fire, Yang Chen's spirit root which was fire could be subdued by the water attribute spiritual roots. With the five Yuanying stage masters, it was estimated that there would be no residue left behind by Yang Chen.

At the beginning, Yang Chen just rushed to the road and planned to find some powerful monsters to use, but he did not think that the enemy's speed would be so fast. As soon as the sailboat entered Yang Chen's detective range, Yang Chen noticed the existence of the sailboat, but could not know how many people were inside the sailboat. This sailing boat was effectively shielded against the exploration of the spiritual awareness.

At this time, Yang Chen was already on the bottom of the sea thousands of miles away. No matter how he fled, it was already too late.

The speed of the other side was far more than the shuttle, the die has been cast. Yang Chen had no possibility of running away.

In less than an hour, the sailboat has already reached the top of Yang Chen. Looking at Yang Chen's futile efforts to escape in all directions, the leading brawny gave a scornful laugh.

"When you get to the sea, nobody can help you." After saying this, the strong man waved his hand and directed at the other five masters

"Set up the formation!"

Chapter 336.2

The five Yuanying stage ancestors were almost like one person with the same movement, they took a flag each and instantly threw it into the sea. With five people simultaneously providing the input of spiritual power, the five-faced flag, in the moment of contact with the sea surface, instantaneously, along a circumference of a hundred miles, was directly surrounded by a dense fog. The original sea with some waves, suddenly became calm and there was no wave tumbling.

Yang Chen, who was looking around for a chance to escape, suddenly felt his speed slow down and his heart became slightly surprised. His spiritual awareness immediately discovered that the surrounding sea water suddenly turned into ice and the entire shuttle was frozen.

Although the shuttle could still maintain a certain speed in the ice, it could no longer reach half of its initial speed. At this point, Yang Chen had no possibility of running away.

Although this method was not very damaging, even if Yang Chen used the sea jasper, it would be impossible to escape from the formation. In order to trap Yang Chen, the Greatest Heaven Sect painstakingly prepared this time around and they even refined this set of sea sealing flag array.

The sudden change made Yang Chen startled, the shuttle was put away and people had already appeared in the middle of the sea. The flame of the yin-yang heaven burning fire instantly wrapped around his whole body and he quickly flew towards the sea level.

Although the current yin-yang heaven burning fire was still very weak, this level of freezing could not compete with the yin-yang heaven burning fire. The other party just cut off the possibility of his escape. The real trump was still the five Yuanying stage ancestors with water attribute spiritual roots.

From the sailboat, Yang Chen discovered the figures of the five Yuanying stage ancestors. The reason why he flew to the surface of the sea was that in the sea, unless he used the long river of blood, he was not an opponent to the five water attribute Yuanying stage ancestors. In the air, maybe there would still be a chance for him in the fight.

Regarding Yang Chen's plan, the Yuanying stage ancestors who pursued did not care. In their opinion, for six of them to deal with one person was already a big advantage for them. It was not that they were looking down on Yang Chen but to deal with a little guy who has just been condensed for twenty or thirty years, there was no possibility of failure.

This time, their calculations were comprehensive. For Yang Chen's combat power and possession of magic weapons, the Greatest Heaven Sect had calculated everything. The shuttle was now abolished. Yang Chen originally had a wood attribute flying sword, which he used to kill the old devil Lin Changhe, but it was not in line with his own attributes so the power would not be too great when used.

Gao Yue also refined a bright ray sword for Yang Chen. This was Yang Chen's best flying sword now but compared to their three life source magic weapons, his weapon was nothing at all.

The reason why there were only three pieces of the magic weapon was that the three of them were lost in the vicinity of the Pure Yang Palace last time and have not yet recovered it. Of course, this account should also be counted on Yang Chen's head.

Apart from this, Yang Chen had no other magic weapon to use, or at least the Greatest Heaven Sect's Yuanying stage ancestors thought so. In other words, Yang Chen's now sturdy and unspoken body was estimated to be caused by some kind of lame refining. What kind of refining technique could make the body change so much?

It's no wonder that Yang Chen's feeling have never been easy. It was necessary to kill people with his hands. Therefore, those who truly understood how powerful an enemy Yang Chen was have already lost their lives. Those who rely on the exact news to judge Yang Chen's magic weapon were destined to make mistakes.

Yang Chen's figure soon reached the surface of the sea. On the sea, the five Yuanying stage ancestors each occupied a direction, surrounding Yang Chen in a group, but they were not in a hurry.

The role of the sea sealing flag array was not just to freeze the ocean. Instead, within the scope of the flag array, the speed of Yang Chen would also be frozen. The clothes of the five Yuanying stage ancestors had countless symbols that could offset the shackles of the flag array. Yang Chen did not have such clothes, so he could only be bound by the formation.

"Yang Chen, I will give you a chance. My sect will give you the chance to join us, as long as you don't put up a fight, we will not kill you." The strong man who was flying in the air on the sailboat watched Yang Chen appear in the encirclement among them and coldly said.

"Speak less nonsense!" Yang Chen screamed, his eyes fixed on the five people around him. It seemed as if he was afraid that they would suddenly start to attack him.

"If you don't accept our good will, then go to hell!" The face of the strong man had not changed. It seemed that he had expected Yang Chen to say something like this in general and he was just making a routine persuasion. He simply did not intend to let Yang Chen live.

The five Yuanying stage ancestors on the sea seemed to have received their orders and their five flying swords were sent and attacked towards Yang Chen in the middle.

Yang Chen did not dare to take the attack head on, his mind moved and the golden bell came out immediately, it condensed outside his body and Yang Chen was strictly guarded in it.

In just a blink of an eye, the five flying swords had already reached the golden bell. Buzz, a heavy bell sound, revealed from the golden bell rang around Yang Chen.

What Yang Chen expected in that situation was that several of the siege men would be shocked and injured by the golden bell did not happen. The five-faced flag trembled at the moment when the bell rang and an invisible barrier directly surrounded the five Yuanying stage ancestors.

The frozen sea at the foot of Yang Chen suddenly turned into ice powder, the thick layer was directly shattered by the bell sound. However, the tremor of the flag was not stopped and the five Yuanying stage ancestors had not been hurt at all, as if all the bell attacks had been redirected to the ice by the flag.

The shuttle and the golden bell, the two magic weapons were all having problems today. It must be said that the other party's preparations were comprehensive and Yang Chen was very surprised.

However, those who were even more surprised was the enemy of Yang Chen. The sealing sea flag array was so powerful that they knew better than anyone else. The array of five Yuanying stage ancestors was almost collapsed unexpectedly by the sound of Yang Chen's bell. If not for everyone immediately stabilizing their positions, they might have been beaten by Yang Chen.

Even the brawny man who have been staying on the sailboat was also surprised. The sailboat itself had the power of protection, but just after the bell rang, he almost couldn't control the sailboat.

What was this golden bell, why was it so powerful? The flying swords of the five Yuanying stage ancestors could not hurt Yang Chen. The brawny mans' eyes showed a greedy glint. Such a magic weapon, if it was his own magic weapon, how good would it be?

This method was really annoying, several times in a row, it let Yang Chen be very dissatisfied with this sealing sea flag array. Immediately without hesitation, it was stimulated by his spirit, and the bell rang again and spread toward the four sides. Yang Chen did not believe that the opponent's formation could be more powerful, that it could resist the attack of several bells?

It was not expected that Yang Chen would have such a powerful attacking means, and the five Yuanying stage ancestors would not be able to attack Yang Chen at all times, while also fully mobilizing their defense.

Although Yang Chen's bell attack was fierce, it consumed spiritual power, with five people working together, even if they were tired, Yang Chen would also be tired.

Chapter 337.1: Breaking Through The Enemy Lines

One could not help but say that this method was very suitable for the besieged. Especially in the ocean, it was still timed by five water attribute spirit roots.

Even if Yang Chen's golden bell was more harmful to the spiritual awareness, almost all of the bell's attacks were absorbed by the array. Within the scope of the formation, there was crushed ice everywhere, but the five Yuanying stage ancestors did not suffer the slightest damage.

From the perspective of spiritual power, the five Yuanying stage ancestor's own has already far exceeded Yang Chen's spiritual power level. What's more, when they talked about the realm, they were also superior to Yang Chen. In this level of confrontation, the formation of five people was firmly having the upper hand.

However, it does not mean that Yang Chen was completely powerless. After all, the golden bell was a weapon that came out of the treasure house of the Dragon Palace. Although the five people blocked the golden bell attack by Yang Chen, they were unable to attack, so the two sides went into a stalemate.

It was not that the five people didn't want to attack, but some of them were slightly distracted and they couldn't immediately gain clarity from the bell sound. Without the little bit of the blessing from the formation, they would have immediately tasted a great sorrow. Who would dare to be distracted?

The array constrained all the attacks of the bell, so the strong man on the sailboat outside the array did not suffer the slightest damage. From the beginning of the attack, he controlled the sailboat to fly into the air. He was the general commander of the attack, but when he saw that the five Yuanying masters and a sea sealing flag array could not take care of Yang Chen, a small Jiedan stage younger generation junior, he could not help but frown.

Being out of the field, the strong man could of course see that the magic weapon that they didn't know where Yang Chen got it and that they didn't know beforehand of had a strong attacking power. Now he was deadlocked with five people, and no one could help him.

Seeing this happening, the brawny man would certainly not tolerate it. The six Yuanying stage ancestors had to deal with a master of the Jiedan stage unexpectedly. Although it was only by the formation that Yang Chen could be trapped and not to let him escape, even if they could kill Yang Chen, they would need to be assisted by the formation and if they could not do it, it would be a shame.

At the moment when his brow wrinkled, there appeared a flying sword around the strong man. During his meditation, the flying sword went silently to Yang Chen in the lineup. Yang Chen was dealing with the siege of five people and could no longer afford to deal with another sudden attack.

The flying sword flew very quickly and went to slam into the head of Yang Chen. However, Yang Chen in the array seems to have already expected this, there appeared a flying sword in his hands. It was the bright ray sword that everyone knew about.

What was strange was that Yang Chen did not have the sword in defense, but he caught the flying sword in his hand. When the flying sword of the strong man approached, Yang Chen waved the sword.

With a soft bang, Yang Chen's sword blocked the strong man flying sword, the sound that came was from Yang Chen attacking the other side's flying sword, and at the same time, his spirits stirred up and knocked the golden bell on his body.

The bell sounded at just the moment when Yang Chen's bright ray sword and the strong man flying sword met. The melodious bell passed directly through the two swords and passed to the ears of the strong man.

If the strong man had been outside the battle, in a short time, Yang Chen wouldn't have been able to do anything to him, but he couldn't wait and attacked on his own initiative.

It was simply an easy thing for his spiritual awareness to know that the sword was within the range of Yang Chen's bell attack. Boom, the brawny only felt the moment when the two swords intersected, and suddenly a huge bomb seems to have exploded in his mind, and there was a blank inside his brain.

When the bell rang, the flying sword lost control and fell directly into the formation. The brawny man on the sailboat seemed to have fallen into a coma. For a time, he could no longer control the sailboat and the wings. The two magic weapons lost their master's control and began to slowly descend from the air.

In the sea sealing flag array, the five Yuanying stage ancestors were shocked. While trying to maintain the battle against Yang Chen's attack, they could not help but become dazed. Under the circumstances that such a number of people were dominant, if they have to intervene at will and not understand the situation, this would be the end.

Although they relied on the power of the array to block the attack of the golden bell, they could only do their best to hold on, and there was no spare power to check on the brawny man. After this judgment error, the brawny man paid a painful price.

However, this attack of the strong man was not without any effect. With Yang Chen's efforts to resist the flying sword of the strong man, the five array flags of the sea sealing flag array had been narrowed to a large circle. The scope of the array has also been reduced by more than half.

When the range of the array became smaller, for the five Yuanying stage ancestors, it meant the increase of power and the reduction of controlling power, but for Yang Chen, it was not so wonderful. The most important thing was that after the defense of the array was enhanced, it was already impossible to start a counterattack.

The attack of the golden bell has been completely bound in the array, and even the ice under his feet could only break in a small area. Now Yang Chen could not depend on the golden bell, he could not effectively improve the attack method of the golden bell, as he only knew this single method.

Fortunately, with the protective body function of the golden bell, even if Yang Chen was attacked in the battle, it could only let Yang Chen retreat for a while, but his body would not be injured. If his control was good, Yang Chen could also use the other side's attack to shock the golden bell to counterattack.

However, the other party quickly discovered this and their attack became awkward. They would never make a move at the same time, to give Yang Chen the biggest counterattack. Everyone was attacking Yang Chen by the counter-attack of the golden bell. The golden bell was fully protective against Yang Chen, and the sound was not as powerful as it was at the beginning.

Seeing this method worked well, the five people suddenly rejoiced, regardless of the sailing boat in the sky slowly falling, they fully controlled the flag, while mobilizing the array to attack Yang Chen, while narrowing the scope of the array.

The array was getting smaller and smaller, and it has been concentrated in in a hundred zhang. The distance between the five people was getting closer and closer, but the power of the array was getting bigger and bigger.

Inadvertently, Yang Chen has also been unable to counterattack, the golden bell was fully capable of coping with the attack of the formation, but it could no longer ring the golden bell to counterattack.

Seeing that Yang Chen has begun to stretch and clenched his hands, the five people finally showed a happy smile. The biggest purpose of this outing could now be completed, maybe they didn't need to kill Yang Chen at first, they could firstly capture him. You must know that capturing him alive would be more rewarding than killing him.

No one cared about the situation of the strong man. He was only stunned by the golden bell and fainted. Anyway, there was the sailing boat protection. There was nothing wrong with landing in the sea. He just had to wait for them to deal with Yang Chen and then he would be healed.

Yang Chen resisted very hard, but it did not help. Soon, the formation was constrained to within 30 feet, and Yang Chen had to struggle to resist their attack.

Chapter 337.2: Breaking Through The Enemy Lines

The five-person array could only trap Yang Chen. If the sixth person did not intervene, it may have only been a deadlock. Although the attack of the strong man led to his own spiritual awareness being severely injured, it also led to a reversal of the stalemate between the two sides, Yang Chen became precarious.

Seeing that the scope of the array was getting smaller and smaller, Yang Chen couldn't make any fierce attack at all. The mood of the five Yuanying stage ancestors were getting better with each passing minute.

In the sea, the water was full of spirit power and as long as they were willing, they could always use it as supplement. Even the loss of spiritual power caused by Yang Chen's attack could be restored after a

short while. In the sea, it was simply the home of these water attribute spiritual roots cultivators, and Yang Chen's ability to have a great day could only be halted here today.

With a sneer from the five masters, Yang Chen has turned into a trapped lamb in the eyes of everyone, and he was no longer able to resist. Such weakness, it seems that apart from his body protecting magic weapon and the flying shuttle, there was no attack method that he could bring out anymore, they didn't know how the genius disciple Li Qingchen was defeated like that previously.

The five masters sent by the Greatest Heaven Sect were not the leopard-headed monster cultivators that Yang Chen met in the banyan cave. They were almost the same as She Kui and Xie Sha in ruthlessness.

The guys in those caves did not experience the instinct of real tempering. They have only reached the Yuanying stage by the abundant spiritual power and systematic cultivation methods in the Immortal's Cave. They didn't have the same instincts as She Kui and Xie Sha.

Such a strong lineup, used to deal with Yang Chen, has already given Yang Chen a lot of face, but it also reflected the determination of the Greatest Heaven Sect. This time, Yang Chen must be put to death, they were merciless.

The array was compressed again, and the five masters had already reached ten zhang from Yang Chen's area. With such a close distance, Yang Chen became even more fierce, he could still not break through the shackles of the sea sealing flag array. A wide range of flag arrays could make the speed of the shuttle drop. At this point, even a few moves were almost a luxury.

The invisible force almost completely blocked the entire space. Not only Yang Chen, but even the five Yuanying stage masters who were in the line, did not dare to have any change. In such a small space, once a random movement caused the formation, there was no strong man to control the sailboat, maybe it would be smashed by Yang Chen.

Fortunately, with the current situation, basically the overall situation has been set, Yang Chen was just waiting to be defeated, under the combined attack of the five Yuanying stage ancestors, how long he would last, was still unknown.

Everything looked perfect, even if the strong man was injured and he was not able to struggle with Yang Chen, there was no perfect ending. When they thought of Yang Chen, whether it was killing him or the bell-shaped magic weapon that could counter the people for so long and would also become their spoils, everyone felt their heart warming.

Of course, the most exciting thing was the medicinal pills that Yang Chen may bring. No one would believe that a person who has refined dozens of questioning inner heart pills will not leave a few on his body. Yang Chen's own master ancestor, Wang Yong, has just recently been promoted to the dacheng stage and the living example was in front of them.

The array has reached this limit and seems to have reached its minimum size and was unlikely to shrink again. The five people control method needed to give everyone a place to go to the flash, the ten-foot radius was already the limit.

Everyone's heart started speeding up, when the result was only a matter of time, Yang Chen's face suddenly showed a smile.

This smile came out of nowhere, suddenly the few Yuanying stage ancestors had a bad feeling, but why they had the bad feeling, they could not pinpoint it for a while.

"I finally waited for you to get close." With the voice of Yang Chen, hundreds of heads of different sizes appeared around the crowd. Everyone had no less than one hundred.

"Thunder...." One of the Yuanying stage ancestors was sharp-eyed and recognized these suspended things on time. But he only had time to call out a word, and the hundreds of things exploded.

Countless thunder, suddenly fell and all the areas were covered, everyone was covered with hundreds of rough, hugs and intense lighting, everyone couldn't open their eyes and couldn't see what happened.

Outside of Yang Chen's body, the shadow of the golden bell appeared suddenly, and Yang Chen's whole body was covered in it, Yang Chen's body refining technique also rushed to the extreme, the refining technique was at the mountain picking realm, the skin mentioned the highest protection.

This was not the only thing, the dome of the temple at this moment also appeared outside Yang Chen's body, wrapped in Yang Chen and the golden bell. After the dome passed through the seventh metal true essence refining, it showed the strongest defense.

In the thunder, not only the five Yuanying stage ancestors, but also the outer periphery of Yang Chen, were also full of thunder. At this moment the dome seemed to have turned into a huge torch, giving off a glaring light.

These head-sized things were clearly the thunder pomegranate that last time Yang Chen used to absorb the Big Dipper Heavenly Thunder Formation.

A thunder pomegranate was enough to absorb more than half of Xu Chengxin's ninth tribulation thunderbolt power. Hundreds of Thunder pomegranates explode at the same time, and the power contained in them were released. The power could be imagined.

In addition to the one who recognized the thunder pomegranate and the other four, even their sounds did not come out. Under the baptism of more than a hundred thunder, they directly turned into powder and disappeared. There was no trace of them anymore.

Even if they have already passed their thunder tribulation before reaching the Yuanying stage, they still had no resistance to the hundreds of ninth tribulation thunderbolts. Even if there was a flag guard, it only slightly delayed the time of the thunderstorm, and it couldn't help.

In a flash, the sea sealing flag array, which had just been closely combined, disappeared from the sea surface, and the frozen sea surface returned to normal at this moment.

In the middle of the dome, as if it had been baptized, it was dark red and braved with hot gas. It seems that this attack has heated the dome to a very high temperature.

Suddenly, the dome sank into the sea, and the sea surface suddenly ignited a transpiration of white gas, covering the surrounding area tightly.

In the air, a low-pitched golden bell sounded again. Buzz, the sea seems to have been hit by a giant hammer, crashing into a big pit, and then slowly returning to normal. However, a huge ripple has swayed into the distance with the waves.

Yang Chen's figure appeared in the middle of the transpiration of white gas. He also held a flying sword in his hand. When he was shaking, he had already come to the front of the sailboat with wings. He jumped gently and boarded the sailboat and stood in front of the stunned strong man.

Chapter 338.1: Only He Knew

In the Greatest Heaven Sect, the sect master held a strange thing in his hand and frowned for a long time. Then he raised his head and asked Elder Zhang, who was opposite to him "Are you sure?"

"Yes, Sect Master." Elder Zhang solemnly nodded and somewhat helplessly said "After the determination of at least six Elders in the sect, plus a few outsiders have confirmed that this is the conclusion. This secret plane was mentioned in the sect's classics."

"This is actually the key to the secret plane of my predecessors?" The sect master of the Greatest Heaven Sect held the key in his hand and sighed. When he arrived in this realm, he saw much better things, and there were not many things that could surprise him.

"This secret plane is different." Elder Zhang saw that the sect master seemed to pay little attention it and hurriedly reminded "The things in the secret plane are very important. According to the records, there are likely to be a lot of resources and magic weapons. For the current situation of sect it will be very helpful."

"Is the location of the secret plane determined?" The sect master nodded. If there were such things, it was really urgent for the current the Greatest Heaven Sect.

"No!" Elder Zhang replied very slyly "The sect has records, but the key position is still recorded in the secret key itself. It is still impossible to determine the location of the secret."

"There are no people who recognized these inscriptions?" The sect master certainly knew what Elder Zhang means when he came to him, but there were still some things to confirm.

“It was at least 10,000 years ago, and now some of the loss is normal.” Elder Zhang heard the complaints in the voice of the sect master, but he could only explain this. Who told the sect not to have no one who recognized these inscriptions, there was a key in their hands, but they could not judge the location of the secret plane, it was simply driving them crazy.

“Who knows these inscriptions among the cultivators?” The sect master nodded slowly, he was more clear about this point than Elder Zhang.

Although the inheritance of the Greatest Heaven Sect has exceeded 10,000 years, but the things of 10,000 years ago have not been fully inherited. A lot of things were developing and changing, even the text was the same. The Greatest Heaven Sect was also a pioneer in promoting this development. But sadly, now the Greatest Heaven Sect couldn't explain what the sect's predecessors left behind.

“It is said that Yang Chen of the Pure Yang Palace may recognize it.” Elder Zhang looked up at the sect master and replied with a slight sigh.

“Yang Chen?” The sect master suddenly frowned. The sect has sent six Yuanying stage ancestors to chase Yang Chen, Elder Zhang knew about, but he choose this time to mention Yang Chen, what does this mean?

“From the population of the Blue Cloud Sect, I learned that a few decades ago, Yang Chen went to explore a secret plane with the Blue Cloud Sect's Snow Fairy. The secret key at the time was won from Jiu Xian.” Elder Zhang nodded explained “The secret plane was said to have been passed down for thousands of years. It led to the killing of Luo Yuan, the master of the late dacheng. This was the reason why the Blue Cloud Sect was very angry. Finally, Yang Chen came back and Luo Yuan did not return.”

“What does this have to do with my sect?” The sect master also knew about this. The Blue Cloud Sect was rushed into the mountain protecting great formation by a master of the dacheng stage. Basically, all other sects knew about this, but specifically because of what, only a few selected people were clear about it, Elder Zhang also used his personal relationships to know the point.

“The secret key, the wine fairy had it on him for a long time, but he didn't know it was the key to a secret plane.” Elder Zhang said quickly “The inscription on the secret key is said to be from a million years ago, but Yang Chen knew it.”

The last sentence was the key, the inscription of the secret key was from tens of thousands years ago, but Yang Chen knew it. Although this does not prove that Yang Chen knew the inscription on the key of the Greatest Heaven Sect, there was at least one possibility.

Yang Chen was the target that the Greatest Heaven Sect's top management has decided to remove. His existence has even affected the strength of the Blue Cloud Sect and the Green Jade Immortal Island. This was a big worry for the Greatest Heaven Sect. If they could not recruit him, they immediately made decisive arrangements to kill him, even the sect has sent six Yuanying stage masters to perform this task.

But now, Yang Chen was the person who was most likely to know these inscriptions. Between the elimination of Yang Chen and the acquisition of the resources of the secret plane, it was really difficult for the sect master to choose.

"Sect Master, if Yang Chen who is just a little Jiedan stage younger generation junior, lives a few more days, it is not something that cannot be tolerated." Elder Zhang also had no way, there was the key in his hand, but he did not know the specific location, which made him very depressed.

Of course, what was even more depressing was that the one who was most likely to know these inscriptions was still a Jiedan stage junior of their own counterparts and he was the one that must be eradicated.

In this case, Elder Zhang could only come to ask the sect master to decide. Let Yang Chen live for a while, let him help them to see what was recorded in the inscription on the inscription, would he still be desperate to eradicate him?

The sect master was also thoughtful, how could he not think of the small secret key, there would be many involved. What was in front of him was the resources left by the ancestral predecessors and the death of Yang Chen, which one was more important.

Obviously, Yang Chen would absolutely die, no matter whether it was the Elders or the sect master, they firmly believed this. Perhaps, they should let him help to see what was in the inscription, and then die, that was what was most in line with the interests of the Greatest Heaven Sect.

"Has Liu Feng begun attacking him?" The sect master sighed and could only choose to let Yang Chen live. Since Yang Chen was needed alive, those who they sent out couldn't do it right away.

“It’s not clear.” Elder Zhang was here for this matter, and naturally understood clearly “However, they sent back news a month ago that they have already caught up with the boy’s trace and were just waiting for him to go out to sea.”

“Well, contact them and let them suspend their hands.” Since the sect master made a decision, he immediately issued an order. A month’s time, there were too many variables, if the message was not timely, maybe Yang Chen would die and the things that the Greatest Heaven Sect wanted would be buried.

“Yes!” Elder Zhang promised, and was about to turn and leave, suddenly he saw a disciple rushing and stumble, waiting for some time on his face: “The sect master is here but you are breaching etiquette, what is so urgent?”

“Sect Master, Elder, there is a big event.” when the disciple was reprimanded by Elder Zhang, he did not dare to answer back. He hurriedly gathered a distressed posture and said quickly.

“What is it? What is making you make all this fuss?” The sect master frowned, it was not a big event that had fallen from the sky. It was so embarrassing in the sect that it seemed to be a whole mess.

“Reporting to the sect master, this disciple is a disciple of the duty hall.” The disciple quickly reported: “Just now, Liu Feng and five other ancestors who have gone out to practice, their life source tablets has been completely broken, confirming their deaths. ”

Chapter 338.2: Only He Knew

What? Listening to this news, the sect master and Elder Zhang stood up and their momentum rose sharply “What did you say?”

“The life source tablets of the six ancestors who have gone out to practice have been broken.” The disciples who came running also knew that things were not good. He said it again and he almost cried out on his face.

This life source tablet was only given after the cultivator was promoted to the Yuanying stage, and it would be left behind in the sect, it would determine the status of the cultivator. When he was dead, the

spirit tablet would be broken. They were usually stored in the main hall of a Sect or in a special room. There were many masters of the Greatest Heaven Sect who were in the Yuanying stage. The transmitting duty hall was the place where the Greatest Heaven Sect specializes in storing the master's life source tablets.

Once the life source tablet was broken, it means that the cultivator was dead. And Liu Fengs' six people, these were the people that the Greatest Heaven Sect sent out to chase Yang Chen and they were all Yuanying stage masters, not only did they bring the sect's flying magic weapon and the sea sealing flag array, but also the tracking compass that was refined by a dacheng stage master, with all of this killing one Jiedan stage junior would simply be a breeze.

They just wanted Elder Zhang to send a message to them, so that they don't proceed for the time being. They couldn't believe that the six people perished in just the blink of an eye.

In the end what happened? They were chasing Yang Chen but was instead killed? This was absolutely impossible. Yang Chen was just a small Jiedan stage younger generation junior. Unless, they had an accident.

"Was it broken at the same time, or was it broken one after the other?" The sect master asked subconsciously and seemed to want to determine what even he himself did not know how he would ask this question.

"Reporting to the sect master, it was at the same time." The disciples had a little recall and gave the answer. In fact, there were still some differences, but the time difference was too short, making it easy for people to misunderstand that it was at the same time.

"Check it out and see what happened!?" The sect master calmed down and shouted loudly. The disciple who just came to report, hurriedly saluted and ran out quickly.

"You go to the Blue Cloud Sect to inquire about when Yang Chen was chased by Luo Yuan, what happened in the end? How could the foundation stage younger generation junior come back but the master of the late dacheng stage disappeared?" The calmer the sect master became the more meticulous his mind was getting.

“What kind of magic weapon can kill six Yuanying stage ancestors at the same time?” The sect master even sent the two people out, but he began to talk to himself “was there any master with him?”

When Yang Chen was chased by the master of the dacheng stage, it was not obvious what happened during the period. Perhaps knowing this would help to determine what Liu Feng’s group has encountered in the end.

There must be secrets that everyone does not know in the ocean, otherwise Yang Chen would not run there anytime there was something wrong. This point was missed when the people of the Greatest Heaven Sect set the plan. They thought that as long as they could trap Yang Chen, it would be easy to eliminate him. Now it seems that it was not so simple.

If the loss of six Yuanying stage ancestors was placed in any sect, it would be a great event. Soon, the elders of the Greatest Heaven Sect were informed and came to discuss about it. Elder Zhang quickly rushed to the Blue Cloud Sect, trying to find out what happened to Yang Chen when he went to the sea.

At present, it was not a question of not killing Yang Chen, but to immediately understand the cause of death of the six Yuanying stage ancestors. Of course, the inscription of the secret key that Elder Zhang said, since Yang Chen was not dead for a while, they should let him look at it anyway.

Yang Chen would not know that there were many things happening in the Greatest Heaven Sect. He was now standing on the sailboat and trying to control this magic weapon.

The former strong man has been cut off by Yang Chen with a sword, and his body was thrown to the blood demon vine to recover its strength. As for the Qiankun bag, of course, he will keep it and examine it slowly.

Now Yang Chen was also starting to learn, after getting a Qiankun bag, he would throw it to Xiao Tian, let it swallow all the things one by one. If there was something like the spiritual awareness imprint on them, it would be digested by Xiao Tian, leaving no traces. It would not be so easy to trace Yang Chen in a similar way again.

This winged sailboat made Yang Chen very surprised. In the memory of his previous life, there was no such thing. Or, in the past life, he did not have the opportunity to see such a powerful thing, so it was normal to have no memory about it.

The quality of the sailboat was very high and it was not something that an ordinary Yuanying stage master could refine. Yang Chen discovered this after the first contact with it. It seems that this sailing boat was a magic weapon for the sect to use for their transportation. Therefore, after the refining, the refiner himself did not use his spiritual awareness to sacrificially refine it, he turned it into a public magic weapon.

This was like the flying shuttle that Yang Chen got from the treasure house of the Dragon Palace. The master has not been recognized, as long as he marked it with his spiritual awareness, he could use it at any time. The original spiritual awareness imprint of the strong man disappeared with the death of the strong man and Yang Chen was naturally having it easy.

The sailboat could also fly, but the speed was slower than the shuttle. In the water, although it couldn't enter the water raft like the shuttle, it could become a high-speed sailboat floating on the water.

Most importantly, the sailing boat's protective ability was very good. If it was not that the strong man fainted and could not control it, Yang Chen would have to spend a lot of time trying to board the sailboat.

This kind of natural protection plus the flying magic weapon, Yang Chen directly arranged the attribution. His Senior apprentice sister Gongsun Ling does not have a good transportation device, he would just give it to her as a little tribute.

Until this time that Yang Chen discovered that the sailing boat and the wings were actually two different magic weapons. The wings were strong, and there was no spiritual awareness imprint on it. It was easy for Yang Chen to keep it.

After learning about the use of water-dividing wings, Yang Chen could not help but become surprised. Although the water-dividing wings had great limitations and were not available in the air, they could double the speed of the shuttle or sailboat in the water. Just this was enough to make Yang Chen happy to the extreme.

How fast would the speed of the shuttle be if it doubled in the water? Even if the second city master turned into his real form and flapped his wings furiously, it would be impossible to catch up with Yang Chen in the water.

Yang Chen's shuttle with water-spraying dividing wings means that Yang Chen has directly given himself an insurance in the water, and no one could catch up with him. Even if there was a flying magic weapon that was faster than Yang Chen's shuttle, it was impossible to have such a powerful speed in the water.

He directly marked the water dividing wing first with his spiritual awareness, after simply recognizing him as the master, Yang Chen picked up the compass of the strong man on the deck of the sailboat.

With the input of his spiritual power, the compass's pointer immediately moved. Immediately, Yang Chen noticed that the spiritual awareness imprint in his own sea of consciousness trembled. This compass was the magic weapon used to track Yang Chen.

It was just that Yang Chen's doubt was who the master of this spiritual awareness seal was? How could he still control this in his own sea of consciousness? Curious, Yang Chen was not even willing to drive out the spiritual awareness imprint. He wanted to know who this guy was.

Chapter 339.1: Pressure

In the previous battle, the scope of the sea sealing flag array arranged by the other party was too large so that Yang Chen's sword array that was released from the dome could not shroud it.

Yang Chen could only find a way to lure them into a small area. However, the strength of the six Yuanying stage ancestors plus the array, even the sword array of the dome hall was not necessarily able to insure their defeat. Finally, Yang Chen chose to use the Thunder pomegranate to blow them up.

Although the sword array was powerful, in Yang Chen's memory, which was the cost of cultivating a few Yuanying stage masters, was violently cracked by the sect of his previous life.

Although Yang Chen couldn't remember a few Yuanying stage ancestors for the time being, the six Yuanying stage masters on the scene, and as wealthy Greatest Heaven Sect disciples, it was possible that all of them have life source magic weapons, compared to the sects of his previous life, they were a lot stronger. With the sword array of the dome, it was likely that it would not match up.

This time, Yang Chen, who was smashed by the thunder when he broke the big dipper heavenly thunder formation, acquired all the thunder pomegranates filled with the power of thunder.

However, although the cost was huge, the harvest was extremely rich. Not to mention the two magical weapons which was the sailing boat and water dividing wings, the life of the six Yuanying stage ancestors was much more precious than a few hundred thunder pomegranates, at least in Yang Chen's eyes.

Even if the Greatest Heaven Sect was too strong and filthy rich and did not put human life into their eyes, the life of the six Yuanying stage ancestors, it was not something that they could give up. Presumably, when the six Yuanying stage ancestors died, the Greatest Heaven Sect would definitely feel the pain in their heart.

The five-water attribute Yuanying stage ancestors directly turned into glutinous rice powder and the same was true of their Qiankun bag. Yang Chen could only search the body of this strong man.

The people of the Greatest Heaven Sect were worthy of being rich, except for the sailboat, even if there was only one Yuanying stage ancestor's Qiankun bag, Yang Chen has actually gotten a lot of good things.

The most obvious thing inside the Qiankun bag was a jade plate with different colors on both sides. The top was clear green, but the bottom was white and flawless. Yang Chen first picked up this jade plate.

As soon as the jade plate arrived in his hand, his spiritual power and spiritual awareness penetrated into it and Yang Chen knew the origin of the jade plate. This was actually a medicinal garden, similar to Yang Chen's own medicinal garden, but its medicinal herbs were still a lot worse than the medicinal herbs in Yang Chen's garden. The best herb was just a few millenniums old.

This was the second medicinal garden that Yang Chen got after he killed someone. It must have been from the time he started cultivating that he cultivated this garden. Now, all were cheaper for Yang Chen to gain.

For things like the medicine garden, the more Yang Chen got the better it would be, it would never be too much. Now his own medicine garden has opened the second layer and could also swallow other medical garden spaces. The more there is, that is, enriches the output of his own medicine gardens and expands the scale of his own medicine garden.

He directly threw this jade plate medicine garden into the net bottle medicine garden. Naturally, the two tool spirits A'Zhu and A'Bi would slowly help the garden to swallow it. Without the owner in the medicine garden, there would be no external spiritual power support, and the result of being swallowed cannot be done in a short period of time.

Yang Chen was now not lacking in medicinal materials, and he was not rushing to swallow the jade plate medicine garden, so he allowed A'Zhu and A'Bi to control it themselves. He did not need to waste too much of his spiritual power at all.

Moreover, he was already at sea. Since he came to the sea, Yang Chen was more likely to go to the Dragon Palace. There were countless spiritual pulses on the huge nautical chart and there was no shortage of spiritual power needed to be swallowed by the medicine garden.

The strong man was beheaded by Yang Chen when in a coma and he was likely to leave behind a life source magic weapon. Of course, Yang Chen used his methods, otherwise the life source magic weapon of the perished person was really not easy to get. But with Xiao Tian, everything became simple, as long as he first forced the life source flying sword out of the other side's sea of consciousness. The person who could still keep their flying sword under the influence of Yang Chen's sea of consciousness has not yet been seen.

The quality of the flying sword was good, it was really worthy of the Greatest Heaven Sect. The sect was willing to give better asset to the Yuanying stage ancestors and it would not be necessary cheaper than what a certain loyal disciple in the Pure Yang Palace would get.

There were dozens of jade slips in the Qiankun bag, which records some of the cultivation experience and cultivation methods of the strong man. When Yang Chen's spiritual awareness scanned it, he received one side first as he would have the chance to see it later.

A pile of spirit stones, these were directly thrown into the pile of his own spirit stone. There were also a lot of materials for various alchemy refining instruments. These were not part of the refining flying swords in Yang Chen's eyes. They were part of the spirit stones, and all of them were accepted.

In addition, there were a few bottles of spirit pills, he opened to see, they were some for healing and for spiritual power supplement, they were very common.

There were dozens of magic weapons for attack and defense. Everything Yang Chen turned over he understood their role. He felt that he couldn't use it for the time being. He had all received in his own bag.

These magic weapons seem to be somewhat miscellaneous. Except for the two high-quality protection treasures, the other ones were not refined himself. The only explanation was that these things were all obtained from others.

The identity of the strong man Yang Chen was not very clear about, this guy does not seem to be good at refining, not good at alchemy, his life source flying sword was very sharp, all the medicines on his body were for healing and supplementing spiritual power, the only explanation was that this guy was simply a thug of the Greatest Heaven Sect, specializing in combat.

The big sect has the benefits of a big sect, their division of labor was detailed, and even the strengths of each person could be fully utilized. At this point, the Pure Yang Palace couldn't do it for the time being. There were only a few ancestors of in the Yuanying stage and it was impossible to distinguish which one was dedicated to fighting and which one was specialized in logistics, they must be on the same team.

Putting out these spoils, Yang Chen directly put the water-dividing wings on the shuttle. For a long time, the speed of the shuttle speed increased rapidly and flew toward the depths of the ocean.

Yang Chen's spiritual awareness threads were wrapped up in the imprint, but they were still unable to avoid the tracking of the other's compass, indicating that this guy who left the spiritual awareness imprint identity was somewhat strange. It was very easy for Yang Chen to ruin him. As long as he throws the spiritual awareness imprint into the blood river from time to time, the other party would absolutely be dead, but Yang Chen does not intend to do so.

First, Yang Chen was also curious about the identity of this guy. Secondly, when he keeps this spiritual awareness imprint. He could also let the other party's attention concentrate on himself from time to time. It was also to relieve some pressure on his sect and the people around him from attention, in order for them to develop silently.

More importantly, Yang Chen still maintained a strong interest in this way of making money. As long as the other party could trace him, they would naturally try to chase after him. The six Yuanying stage masters had already died. It was definitely not the end of the two sides. Even if it was not done openly, it would be done in the dark.

For the current Yang Chen, it was another kind of pressure and motivation to urge him to improve his cultivation base.

Chapter 339.2: Pressure

With the memories of his past life, Yang Chen could subconsciously avoid some risks and resolve some of the big events that could bring danger to his sect and the people around him constantly.

It was in human nature to shun evil and avoid disaster and there was nothing wrong with it. Of course, in this way, a lot of dangers would be gone, but it also means that there would not be enough experience to gain from it. In many times, a real master was not cultivated, but was born from life and death situations.

Not only the people around Yang Chen, but even Yang Chen himself was subconsciously doing this. This would also lead to another consequence, that was, from the beginning to the end, Yang Chen would not encounter a real life and death threat. Luo Yuan was one, and the second city lord was also one, but they have been easily put to death and they had not forced Yang Chen's cards.

This was of course a good thing for safety, but it also gives Yang Chen an invisible relaxation. Even if Yang Chen knew that this kind of relaxation was fatal in his heart, there was no external factor to force himself. It was impossible for Yang Chen to take the initiative to force himself to the limit.

Without reaching his limits, there would be no breakthroughs, this was common sense. At this time, the Greatest Heaven Sect actually began to secretly plan to assassinate Yang Chen, which definitely gave Yang Chen an excellent opportunity to temper himself.

What Yang Chen had to do was to use this opportunity to force himself to a tense state, which was the best catalyst for spirit power cultivation.

Keeping the imprint of the spiritual awareness was to keep the lighthouse guiding the direction of the other side and also to give himself a chance to face a strong enemy.

However, since it was at sea, Yang Chen was certainly not willing to run again. Anyway, he was already on the road, Why not go to the Dragon Palace treasure house first?

The original plan was to go to the treasure chest, and see if he could get a few magic weapons, and the other was to collect the tenth water true essence as much as possible, so that his own spirit power could also be condensed, which certainly was a not bad plan. The change to the plan was the order of getting the seventh metal true essence and tenth water true essence.

Fortunately, the Greatest Heaven Sect choose such a time to chase after him, otherwise Yang Chen may not know that the spiritual awareness imprint that he has wrapped up in his sea of consciousness could be so powerful to point out his own direction under the circumstances. If Yang Chen was accidentally followed when he went to the Dragon Palace Treasures, won't he reveal the location of the treasure house?

With this lesson, Yang Chen was of course cautious when he went to the treasure house. The inverted sea jasper could isolate the spiritual awareness and even Luo Yuan was unable to find the trace of Yang Chen in the distance, not to mention a small tracking method. What's more, collecting the tenth water true essence was also one of the functions of the sea jasper.

Directly wrapping the shuttle with the inverted sea jasper, Yang Chen went all the way to turn a few directions, then confidently and boldly marched to the Dragon Palace.

With the strong speed of water dividing wings, this time he rushed to the Dragon Palace treasure house, although the distance was more than doubled, the time did not last too long, it took just a few less days than before.

Two months later, Yang Chen had already arrived at the sea above the Dragon Palace. When the shuttle and the water dividing wings were kept, Yang Chen quickly sneaked into the bottom of the sea and entered the treasure house.

In fact, even if Yang Chen exposed the location of the Dragon Palace treasure house, people from the Greatest Heaven Sect could not find it. The treasure house itself was now a huge sea rock and there was no unique way to enter.

Even if the other party knew that Yang Chen was inside, wanting to go in was not a possible thing. The protection of the Dragon Palace treasure house was almost inconsequential. As for using brute force to consume its spiritual power, it was even a joke.

On the huge nautical chart on the treasure trove, the whole spirit power of the East China Sea was wiped out. Even if it was the power of all the disciples of the Greatest Heaven Sect, it was impossible to compete with the spirit power of the entire East China Sea. Even if they were worked to death, it would be impossible to open a corner of the Dragon Palace.

The tenth water true essence collected along the way, although it was not large in quantity, but Yang Chen didn't waste it at all, he directly sent it into the gourd.

This gourd, which was obtained from the Dragon Palace Treasure, only showed its powerful function at this time. When the tenth water true essence entered the gourd, it was immediately condensed into droplets, which were stored separately in a small corner. Even without any constraints, there was no trace of it.

What made Yang Chen more pleasant was that when it was put together, the sea jasper seems to fully exert its strongest effect to consolidate the tenth water true essence.

In the past few months, he was able to consolidate a few drops. Now, within a day, there was more of the tenth water true essence that he have received in the past few months. The place where it was stored in the gourd has become a small puddle the size of a rice bowl. It was still dripping into it, which was condensed into droplets every day, filling the future lake all the time.

The ten thousand trees forest was only a few thousand miles in circumference. But in just a short period of 10,000 years, it has produced a huge amount of first wood true essence spiritual liquid in a lake. The area of the entire East China Sea would be several times larger than the ten thousand trees forest.

This was not counting, a few oceans were interoperable, even if the sea that Yang Chen was last chased by Luo Yuan in, which its straight line distance was more than a few million miles.

It was almost endless to condense the tenth water true essence in the sea. With the gourd and the sea jasper, Yang Chen doesn't even have to do it himself. He just put the gourd and the sea jasper on the nautical chart and it would collect by itself.

Without controlling the sea jasper, Yang Chen was of course happy and he followed Xiao Tian and rushed directly into the hall where the magic weapon was stored.

Yang Chen released Xiao Tian from the time he entered the treasure house. The most favorite position of Xiao Tian was that it keeps flying around the huge dragon ball, but it was always rejected by an invisible force and couldn't approach it.

Obviously, this time the roaring sky was still unable to collect this dragon beard, but the dragon qi around it dispersed and Xiao Tian was so happy.

Looking at this scene, Yang Chen shook his head and went straight to the inside with Xiao Tian. He began to ponder over the remaining pieces of the jade case.

He has gotten the shuttle, the gourd, the sea jasper, and the golden bell. On the other jade case, there were four things that Yang Chen did not get the last time, a rope-like thing, a small tower, two branches, and a drawing axis.

To do this thing, Xiao Tian was already familiar with it, he had to absorb the dragon qi in the four arrays. He devoured the spiritual awareness of the 16 life source magic weapons. One of them was the flying sword of a dacheng stage master so Xiao Tian has become stronger than the last time.

With his small mouth, Xiao Tian began to swallow the dragon qi around the drawing axis. Seeing the invisible dragon qi turned into a thin smoke and entered the mouth of Xiao Tian, the array around the jade case began to become weaker and weaker.

Chapter 340.1: Precious Materials

It takes a lot of time to devour a dragon's formation strength so Xiao Tian required a lot of time, Yang Chen was setting up the gourd and the sea jasper, after placing his medicine garden on a certain spiritual pulse, the only thing left was to wait.

Yang Chen waited patiently. In fact, at this point, he had nothing to do but to wait. Of course, his cultivation could be done without interruption.

The profound spirit furnace had absorbed a large number of fire seeds and at the same time, it had also saved a large number of fire seeds for the yin-yang heaven burning fire. During the time that Yang Chen

was waiting, he could control the yin-yang heaven burning fire to absorb one or several kinds of fire seeds.

Now Yang Chen's first and second grade fire seeds have been completely absorbed, so he had to start from the third grade fire seeds. Hundreds of third grade fire seeds were waiting for Yang Chen's yin-yang heaven burning fire, even if nothing was done, it would take a long time to wait for these fire seeds to be adsorbed and fused.

This time, would at least it last for decades. After all, the yin-yang heaven burning fire was still only a prototype and the strongest flame that it has merged with was just at the third grade. Every time he absorbed a third-grade fire seed, it would take at least six to ten months.

While going by the order of daily cultivation, the body refining technique, yin-yang five elements secrets arts and three purities secret art cultivation methods were all practiced. Yang Chen controlled the yin-yang heaven burning fire to absorb a third-grade fire seed.

The absorption process was an automatic process. As long as Yang Chen controls the absorption, he could stop paying attention to it, he just had to be careful not to have any accidents.

The yin-yang heaven burning fire has already merged with several kinds of fire seeds. At this point, it was not easy to have an accident while absorbing the third-grade fire seeds. Unless Yang Chen was attacked and seriously injured during the absorption process, even if Yang Chen was in combat nothing would happen to it.

The remaining four jade cases also had the most rigorous of array protections. With the ability of Xiao Tian, it has been swallowing up the dragon qi for half a year and still has not opened this axis yet.

In the eighth month, Yang Chen had successfully absorbed the third grade fire seed and the Yin-Yang heaven burning fire became more and more strong and its colour became deeper and darker.

After the fusion of the fire seed, Yang Chen temporarily stopped absorbing the fire seeds, he was waiting for Xiao Tian to break the formation of the axis. It has been going on for so long and even the rest of the formation was already crumbling. If Yang Chen was not afraid that the axis of the painting inside would be damaged, he might have used violence to break it at this point.

However Yang Chen did not do that in the end but waited patiently. A month later, the array outside the drawing axis finally disappeared, all the dragon qi was swallowed up by Xiao Tian.

At the first time when the formation disappeared, Yang Chen reached out and grabbed the axis of the painting. He quickly moved away from the jade case and reached the center of the hall. When he made sure that he has completely got the drawing axis, Yang Chen began to slowly look up at it.

The drawing axes was rolled together and he didn't know what was drawn inside. However, the axial material of the drawing axis was very rare, it was a kind of sea heart jade that would be produced in the deep sea. This kind of sea heart jade, for Yang Chen, even in the Heavenly Court, he has only seen it once on a certain picture of the Jade Emperor, so its preciousness could be imagined.

Two small dragon heads were found on both sides of the circular axis, which was very lifelike. He didn't know what material the four dragon eyes was made up of for the time being, there was a restrained glitter of light that was easy to ignore in the eyes. If Yang Chen was not staring at it, it was almost impossible to detect it.

The material of the shaft was so rare that the material of the shaft had surprised Yang Chen. When his hand touched it, Yang Chen's first reaction was that it was a kind of animal skin, but what kind of animal skin it was, Yang Chen could not be sure.

However, when the painting axis was slightly opened and the air was released, Yang Chen already understood what it was. ...,

It was dragon skin, the material used in this painting axis turned out to be dragon skin! Other than that, there was no other possibility.

Not to mention the dragon aura that was emitted was similar to the aura of the dragon beard in the entire treasure house. It was enough to let the East China Sea Dragon King solemnly save these things here, which has fully explained this point. Apart from the dragon skin, what kind of monster skin was worthy of being placed in the treasure house of the Dragon Palace?

The entire drawing axis was opened, it was a long roll with a length of five feet and a width of two feet. On the long white snow skin, except for a small black spots in the center, all the other parts were blank, nothing was on it.

Yang Chen's spiritual awareness easily entered the axis of the painting, a message quickly entered the mind of Yang Chen and let Yang Chen instantly understand the role of the axis.

The name of the drawing axis was called the mountain river geographic map, it was an array map. The small point in the center of the array, where it was just a black dot was clearly the complete geographical map of the entire East China Sea. When his spiritual awareness explored it, the little point almost became the entire East China Sea and Yang Chen's spiritual awareness could not even easily find the edge.

This was a geographical map of the mountains and rivers that has not yet been completed. Only the geographical map of the East China Sea was drawn. According to Yang Chen's understanding, this mountain river geographic map could be supplemented without restrictions.

The supplementary method was to bring this magic weapon through the place where it was not drawn. This magic weapon would automatically draw the place where the magic weapon owner passed.

At any time, as long as the owner of the magic weapon was willing, he could find the terrain of any place and have it drawn through the mountain river map. No matter how complex the terrain was, it could be clearly marked on the map.

Of course, this was only the most basic role of the mountain river geographic map. For an array, it was not just a matter of recording the terrain.

The most powerful part of this mountain river geographic map was that as long as the owner of the map launches the map, he could directly trap his opponent in the map already marked by the mountain river geographic map and anything that would happen was left to the owner of the map. Unless that person cultivation base was higher than his by a lot or he knew how to break the formation, even if the map couldn't kill the opponent, he could be trapped for a long time and would not be released.

What was especially important was that the more complete the geographical map of the mountain river was, the greater the power of the array would become. If he could draw those famous natural danger spots, he could use those danger spots to attack his opponent directly and the power would be devastating.

This was not counting that this map actually has several levels. In this way, not only the mortal world, but even in the spiritual world, he could completely map out the geographical map. This magic weapon could even be used directly in the Heavenly Court.

The Dragon Clans most precious treasures, dragon skin used to produce array maps with powerful formation, these was not counting that the whole picture axis was actually of the earth attribute, if these things were combined, it would simply be the most suitable life source magic weapon for his senior sister Gongsun Ling.

Chapter 340.2: Precious Materials

This was an absolutely unexpected surprise, even Yang Chen did not think that this mountain river geographical map would be so suitable for Gongsun Ling's cultivation. He has been worried before, Gongsun Ling was not a sword cultivator so giving her a life source flying sword would not be appropriate, now there would be no such problem.

In his surprise, Yang Chen collected the geographical map and his eyes began to look at the next jade case. What was that roll of rope-like thing? Could it be a magic weapon like a bundle of a fairy rope?

Looking forward to it, Yang Chen directly ordered Xiao Tian to begin to devour the dragon qi around the jade case. This jade case was placed in the same row as the mountain river geographical map so the outer array should be of the same power and Xiao Tian could fully cope with it.

While waiting, Yang Chen was still constant with his cultivation, fusing the fire seeds, this time he replaced with a third grade fire seed, Yang Chen deliberately controlled it when absorbing, carefully maintaining the balance of the yin-yang heaven burning fire, which promotes the yin-yang heaven burning fire.

Of course, the wait was not completely boring, at least Yang Chen found that with the growing number of tenth water true essence in the gourd, it seems that the speed of the tenth water true essence was getting faster and faster.

The small tenth water true essence that was in the gourd was really not the size of a rice bowl anymore, but has become the size of a washbasin. It was originally only one finger thick and now it has become as thick as a fist.

So much tenth water true essence and it was still condensing into tenth water true essence spiritual solution, it was really enough to support Yang Chen for a long time. You must know that Yang Chen has nothing in his hands that could absorb the tenth water true essence liquid without restriction like the Penglai divine wood did for the first wood true essence spiritual solution, it was absolutely a difficult process to absorb it by himself.

Even if there was a fusion of the third grade fire seed, Yang Chen did not care and started to absorb the tenth water true essence. With the control of the gourd, the speed of Yang Chen's absorption could be adjusted at will. Yang Chen could control the spiritual powers in the yin-yang five elements secrets arts at the same time, naturally he would not care about such a small distraction.

The spirit power of the tenth water was used for the cultivation of the tenth water true essence secret arts. All the spirit power of the tenth water has been converted into the tenth water true essence. The absorption of this tenth water true essence liquid was very smooth. It was only limited by the fact that the spirit power of the tenth water has not yet been able to condense its Dan, so it cannot be absorbed quickly. It could only restrict those tenth water spiritual solution into a trace. It was drilled from Yang Chen's palm and slowly absorbed by Yang Chen.

The process of condensing Dan was originally a process in which the spirit power grows to the limit and then a qualitative change occurs. However if there was no external force and relying on Yang Chen's own methods to find the added spirit power, if he wanted to reach the point of condensing Dan, with Yang Chen's own estimation, if he was fully operational, it would take at least five years' time.

Now with the same source of the tenth water true essence, it was naturally less trouble. As long as Yang Chen absorbs the fusion of these homologous spirit powers, he could improve his own cultivation.

This was what the essence spirit power of the tenth water true essence and first wood true essence could do. Any other spiritual power couldn't do this. Even if Yang Chen uses a large amount of heavenly treasures, it still needed a process of transformation and absorption. The efficiency cannot be compared with the direct absorption of the tenth water true essence.

However for this method, Yang Chen could only use it in his breakthrough, the usual cultivation was the real foundation, not to add some spiritual power to replace it.

The speed of the inverted sea jasper cup condensing the tenth water true essence was faster than Yang Chen's absorbing speed so Yang Chen did not have to worry about anything, he could cultivate freely in the treasure house.

Time passed quickly and the time of half a year passed by. The third grade fire seed was easily absorbed by Yang Chen's yin-yang heaven burning fire and Yang Chen even changed to another fire seed to continue the process.

The devouring speed of Xiao Tian was still as always, neither fast nor slow and the dragon qi around the jade case was becoming less and less. According to the experience of the previous jade case, Yang Chen estimated that it would take several months to complete. ...,

The continuous cultivation lasted for another three months. When Yang Chen completed a cultivation cycle and entered the hall again, he immediately noticed that the dragon qi around the second jade case had been completely absorbed by Xiao Tian.

The seemingly inconspicuous rope on the jade case was placed on it at random. Yang Chen took a step and took it in his hands.

Yang Chen started to notice the difference. The rope was clearly a kind of magic weapon that had been strengthened to the extreme.

Fortunately, this magic weapon was now completely undefended against Yang Chen, so Yang Chen could easily enter it with his spiritual awareness and spirit powers. Later, Yang Chen immediately understood the purpose of the rope.

This was a long cable made of five kinds of dragon tendons. The five kinds of dragon tendons belong to the five elements. After the combination, it was refined and it became a long cable and its length could be controlled at will.

The two ends of the long cable were five sets of sheaths at one end, which could be large or small and belonged to the five elements. The other end was a hook-like thing, it consisted of five small hooks, which were also divided into five rows, it was made from the bones of a special part of the five dragons.

This sheaths, obviously, could make five row high gloves on the wrist and control the hook of the other head and could grab everything from the air. Plus, with the strength of the long cable in the middle, it was a natural tool to extend his arm. In some places that he couldn't explore, if there was such a tool that was powerful enough to do it he would do so.

The five elements rope obviously needed the five elements masters to control them, but for Yang Chen, he could control it alone. What made Yang Chen happy was that this was not only a tool for grabbing, but also a good thing to take away at any time on certain occasions.

And this hook directly reminded Yang Chen of a scene of a sensational magical weapon that was born a few hundred years later that caused a stir in the cultivation world. It looks like such a thing, you needed a long cable tool like this, from a place that ordinary people couldn't reach to take it.

Could it be that the Heavens wanted Yang Chen to get this hook in order to let him join the battle of the latter generation? And also deliberately set aside such a long time, was it just to let himself complete this hook? Thinking of that opportunity, even Yang Chen could not help but be moved.

Forced to suppress this thought, Yang Chen and Xiao Tian once again communicated, indicating that Xiao Tian continue to swallow the dragon qi of the next jade case. Now Xiao Tian was still capable, maybe this time he could get three magic weapons.

Surprisingly, Yang Chen suddenly noticed that his own medicine garden had some changes. Although the medicine garden has been placed on the outside nautical chart, the tool spirit has always been connected with Yang Chen.

When he perceived the changes in the medicine garden, Yang Chen hurriedly withdrew from the hall and came to the chart and went into the medicine garden.
