

Zhanxian 341

Chapter 341

Yang Chen appeared in the first layer of the medicine garden and saw A'Zhu and A'Bi. When the two met Yang Chen, of course, they greeted him.

When his senses moved around, Yang Chen understood the changes in the medicine garden. The jade plate medicine garden obtained from the strong man had been swallowed up and the space of the first and second layer was increased by a lot.

It was not so easy to devour a space in a medicine garden. The last time Yang Chen controlled the medicinal garden to devour the crystal ball medicinal garden of the second city lord, it was because there was a large amount of first wood true essence spiritual solution, which resulted in him achieving success in such a short period of time. Within a day, the crystal ball medicine garden was swallowed up successfully.

This time, Yang Chen did not use the first wood true essence spiritual solution, but even so, he placed the medicine garden on a spiritual pulse. The enormous spirit power supply was almost never interrupted, with the simultaneous control of both A'Zhu and A'Bi, there was a constant supply of spiritual power. Even if the spiritual power was not as high as that of the first wood true essence spiritual solution, in the two years, it was still successful to completely devour the jade plate medicine garden.

The medicinal materials in the jade plate medicine garden have all been planted in the first layer of his garden space. Those medicinal herbs were too short and could only grow in the first layer.

The ten thousand spirit medicines that Yang Chen got before, he didn't know when it was transplanted into the second layer by A'Zhu and A'Bi. Now there was no ten thousand spirit medicines in the first layer.

After entering the second layer portal, it seemed that with the absorption of the jade plate medicine garden, it could let Yang Chen's mind control it completely, if he wanted to display something, he could show it, if he wanted to hide it then he could hide it. And, as the master, he was able to enter any place in the medicine garden anytime and anywhere.

This remarkable change did not make much sense for Yang Chen. But it also allowed Yang Chen to bring some intimate people into the space of the medicine garden and not show something that would surprise them.

Of course, this was for just an intimate person around Yang Chen. Otherwise, even hundreds of thousands of profound yang fruit was enough to cause huge greed in others.

The size of the space was almost doubled. Although the quality of the jade plate garden was not very high, there was one point to it, it had a huge space which was several times larger than the net bottle medicine garden before Yang Chen got it. As a result, the current space naturally had a lot more space.

“Master, this servant has a request!” Yang Chen did not want to use these open spaces, A’Zhu and A’Bi have rushed and stumbled in front of Yang Chen.

Because there was a large amount of spirit power nourishment, the bodies of the two tool spirits were becoming more and more solid. When they waited for the new owner in the Yang Mountain, they were at best able to absorb the spiritual power of the hundred miles around them and barely maintained the need for the growth of the elixir in the medicine garden. But wherever there was Yang Chen, they almost never lacked spiritual power.

Especially after the appearance of the two women, Yang Chen used the first wood true essence spiritual solution to supplement the body of A’Zhu and even her bones were changed. Before, the two women did not dare to absorb the spiritual power condensed from within the medicine garden fearing that they would be reprimanded by Yang Chen, but on that nautical chart, the spiritual power was almost endless, even if they were only controlling the medicinal garden to swallow it, they still got a lot of benefits.

One of the benefits was that their body became more solid. Now the two women looked like two real people and when they kneeled in front of Yang Chen, it was quite a touching scene.

However, Yang Chen did not care about their form, but it was strange that the two tool spirits actually had a favour to ask for themselves. Curiously he asked, “What is it?”

“This servant feels that the surrounding water is full of tenth water spirit power, we must be far in the sea.” A’Bi looked up and said respectfully “Please, we also want to ask master to collect some sea water

into the medicine garden. If possible, please take some seabed spirit medicines to be added to the medicine garden so that this servant can study it.”

The two tool spirits were now tied to the medicine garden. Their only fun before was to take care of the medicine in the space of the medicine garden. Watching their strong growth, their years getting more and more mature, gave them a sense of satisfaction.

But after being changed by Yang Chen, the two women found that there was still a lot of fun to be had. For example, upgrading the medicine garden and using various sources of spiritual power to refine the medicine garden to make qualitative changes.

After using the tenth water spirit power to refine the garden, the change occurred was the presence of more oceans in the medicine garden. This was a huge change and it also made the two women more eager to know what kind of elixirs there was in the ocean.

However, although Yang Chen’s refining system has caused it to emerge, it was not real sea water. If they wanted to make the elixir in the ocean grow, they needed real seawater to infuse into it. Then, after the transformation of the tenth water true essence, it would become an environment suitable for the growth of marine herbs.

As the tool spirits A’Zhu and A’Bi knew more about the medicinal garden than Yang Chen on this point, it was hard for Yang Chen to match.

“How difficult is this?” They only asked for such a request, of course, Yang Chen would not refuse. Here was the depths of the sea. Wasn’t it possible to get some sea water?

Anyways, now the sea jasper cup was condensing the tenth water true essence and Xiao Tian needed more time to devour the dragon qi around the jade case, so he could just go out and transfer some seawater and collect some submarine herbs into the medicine garden.

Xiao Tian already had a master-servant relationship with Yang Chen so he does not have to worry about the safety of Xiao Tian in the treasure house. He directly left Xiao Tian in the treasure house and he brought the medicine garden and the gourd with the sea jasper out of the treasure house.

It was too easy to collect the sea water. After leaving the treasure house for some distance, Yang Chen picked up a spiritual pulse vein near the sea, opened the medicine garden and began collecting sea water.

A large amount of sea water rushed into the medicine garden and quickly filled the place around the medicine garden. This was where A'Zhu and A'Bi had already planned and considered the growth of some deep-sea plants, they had deliberately made a depth of several thousand feet.

The space of hundreds of miles, plus with such depth, the sea water needed was not a little bit. In order to prevent the elixir in the medicine garden from being affected, Yang Chen had to control the speed of collecting the sea water.

In this case, after spending almost half a month, there were two more vast oceans in the medicine garden. The first layer and the second layer each had one piece. The blue water was very clear and with the control of A'Zhu and A'Bi, there was even a tidal change, it was a beautiful ocean scenery.

"Master, you still need some soil on the seabed." A'Zhu reminded "The seabed mud that has been soaked in seawater for thousands of years is slightly different from those in the medicine garden that have just been soaked."

The medicine garden was his own thing and Yang Chen certainly would not dislike it if the space inside became better. Since A'Zhu said this, she must have her reason and it sounded really reasonable. Yang Chen didn't say anything and started collecting mud from the sea into the medicine garden.

The world under the sea was completely different from the land. Yang Chen not only collected the sea mud, but he even collected some of the coral shellfish that grew on the seafloor.

This was also the wish of A'Zhu. After all, the growth cycle of the submarine medicine needed a circle, it was not just water and soil. It was like the elixir on land, it also needed some small living organisms to balance it.

In fact, the medicine garden space was a complete ecosystem but there were no creatures above the food chain at the higher end of the elixir. The same was true for the ocean, this environment was also needed.

Of course, Yang Chen was picking at those places where there was plenty of spiritual power. As for what creatures were suitable for it and what kind of creatures were not suitable, they have to be judged by A'Zhu and A'Bi, Yang Chen does not have to concern himself with it.

Although Yang Chen was already an alchemy master and has memories of his past lives, Yang Chen still had a lack of understanding about some elixirs in the ocean. A'Zhu and A'Bi wanted him to collect some of the ocean's elixir, but expect for some famous ones such as the four seas mysterious coral liquid, Yang Chen really does not know which things were considered elixirs in the ocean.

Whether it was in the mortal world, spiritual world or the immortal world, there were huge oceans which have rich marine life. However, he didn't know what the reason was, but a only few alchemists would identify and use the elixirs within the ocean. In this respect, Yang Chen's experience was not much.

Perhaps it was because the ocean was full of all kinds of dangers and variables, even if it was in the immortal world, those Great Principle Golden Immortals have not fully explored the reason. Naturally, there were all kinds of concerns about things that people didn't understand.

After all, except for those sea monsters, most of the immortals and demons were living on land, so it was also very normal to not fully understand the interior of the ocean. It was estimated that this was one of the reasons why alchemists rarely use marine medicine.

However, seldom usage does not mean that no one was using it. At least those sects close to the ocean have a lot of research on this side. For example, the Green Jade Immortal Island was near the sea.

Speaking of it, Yang Chen has not been to the Green Jade Immortal Island in a long time, nor has he been to see Shi Shanshan. He was just at sea and he also wanted to look at the records of the Green Jade Immortal Island in this aspect, so Yang Chen could only run a trip to see Shi Shanshan.

After finding out the direction, Yang Chen began collecting seabed mud along the way, and also collected some kinds of seabed plants passing by. Anyway, the space was large enough that he did not need to hold back.

At the bottom of the sea, there was the monster strength's crystallization left by Lan Ying and the shuttle, so Yang Chen was almost unimpeded. There were no monsters who dared to appear in front of

Yang Chen. Wherever Yang Chen went, they would avoid him far away. No matter what Yang Chen does, there would be no trouble.

Coincidentally, when Yang Chen passed by the bottom of the sea, he discovered a thousand years mysterious coral. After this kind of thing reaches a millennium of maturity, a drop of purple liquid was secreted every year, which was the four seas mysterious coral liquid.

Although there was countless four seas mysterious coral liquid in Yang Chen's gourd, Yang Chen did not hesitate to receive this thousand-year-old mysterious coral into the medicine garden. Later, if someone asked about the source of his own four seas mysterious coral liquid, it could be explained with this.

There was no obstacle along the way, and it took only a short time to collect the seabed mud. After six months, Yang Chen took enough sea mud to lay a layer of thick seabed in the medicine garden before rushing to the Green Jade Immortal Island.

Yang Chen was now a celebrity, especially in the Green Jade Immortal Island, so he was treated as an esteemed guest who was greeted with super courtesy from top to bottom. When Yang Chen went to the mountain gate of the Green Jade Immortal Island, he just reported his name according to the rules. He did not give any explanation, but he was directly sent to Shi Shanshan's residence.

In the eyes of the Green Jade Immortal Island members, Yang Chen was now the son-in-law of the Green Jade Immortal Island. Whenever he came to the Green Jade Immortal Island and he doesn't need to visit other places, he would be sent directly to Shi Shanshan. Anyways, the disciples who received Yang Chen would never ask what were the requirements of Yang Chen, directly looking for Shi Shanshan.

Of course, Yang Chen's arrival would definitely be reported to the senior officials of the sect. As for why Yang Chen visited, it was Yang Chen's own business.

Originally he thought that when he came unanswered, Shi Shanshan would not necessarily be in the Green Jade Immortal Island, but what made Yang Chen surprised was that not only was Shi Shanshan there, but she also has stayed in the sect for a long time.

In the past, unless Yang Chen said that he would be coming in advance, most of the time, Shi Shanshan would be cultivating outside. Unless it was for a major breakthrough, that would be when she would be

in seclusion in the sect. This time, Yang Chen didn't ask for it, but he could actually meet Shi Shanshan in the sect. It was also the fate of the two.

However, this time, it seemed that Shi Shanshan had come across some trouble. When Yang Chen saw Shi Shanshan's look, he found that there was a trace of exhaustion in Shi Shanshan's eyes and her body shape was awkward.

The cold plum fairy maiden had such a pathological condition, which surprised Yang Chen. You must know that Shi Shanshan was a master of the Jiedan stage. Even when she just started cultivation, she was moved to Jiedan stage because of Yang Chen's little instructions. She had a strong cultivation base, a good aptitude which was rare in the cultivation world, how could she be in such a state?

Yang Chen was shocked, he did not wait for Shi Shanshan to open her mouth, he reached out and grabbed the wrist of Shi Shanshan and felt it silently.

Shi Shanshan's delicate hand was caught by Yang Chen and she was very surprised, But there was no struggle, she allowed Yang Chen to seize her own wrist.

The female disciple who led Yang Chen there upon seeing this scene, smiled a little and didn't say anything, she turned and left. She has already brought Yang Chen here and other things have nothing to do with her. What she should do now was to go back and report to the higher ups.

"It doesn't look like you are sick." After checking her pulse, Yang Chen frowned and stared at Shi Shanshan's face for a while that Shi Shanshan became a little shy, then he asked, "What happened?"

"Nothing big." Shi Shanshan gently pulled back her wrist and turned to make a gesture to invite him, no matter whether Yang Chen followed up or not, she just went straight back. Yang Chen said nothing and directly followed up, he kept pace with Shi Shanshan.

"In the past few months, there was a sudden lack of peace in my mind, so my cultivation base became stagnant and stopped improving." Shi Shanshan said as they walked "I was cultivating for too long and I might have developed a little heart devil!"

Chapter 342.1: You Thought Too Highly Of Yourself

Heart devil? When Yang Chen heard Shi Shanshan say so, he became relieved. Although the heart devil was terrible for cultivators to encounter, since Shi Shanshan was neither in battle nor in the process of crossing a tribulation, it was not a big deal.

Not all heart devil would kill you. In the process of cultivation, the average person would encounter several or even dozens of heart devils.

There was also many reasons for the heart devil to appear. Sometimes it was because some things have not been figured out, sometimes it was because there were some deviations during cultivation. There were many reasons, and all kinds of people were not clear about it all.

However, everyone knew that as long as it was not because of a heart oath, there was a possibility that it could be overcome, even if it was in the middle of crossing a tribulation, it was entirely based on the cultivation base and mood of each person.

Since it was a matter of a heart devil, Yang Chen was not too anxious. Anyways, with Shi Shanshan's state now, there would be no need to worry, it would just have a little impact on the speed of her cultivation and there was no need to make a fuss about.

In general, the best way to solve the heart devil was to figure out the cause. It was hard to say at this time how long it would last, sometimes it was very long, sometimes it may be short and so it may be different.

Soon, the two people sat face to face in Shi Shanshan's fine house. In the middle of the two there was an exquisite wooden table with a set of exquisite tea sets. Next to the table, there was a small stove that was humming and boiling a pot of water.

"Try this, it is mature enough." Shi Shanshan was about to brew the tea that Yang Chen gave her the last time, but Yang Chen took out another jade bottle, it was the new tea that Yang Chen made on the road.

Because of the huge changes in recent times in the pure bottle medicine garden, the new tea had more maturity and more spiritual power. After Yang Chen specialized in quenching it with the seventh metal true essence, it would not be a general taste for Shi Shanshan. If a cup of the tea goes down, maybe it would be worth at least a week of cultivation.

After coming in, Shi Shanshan's face always had a faint glamorous look. Only when she heard the words of Yang Chen did she recover a little peace. There was a hint of surprise and anticipation in her eyes, she took the jade bottle and carefully opened it. She used a jade spoon to pour a little of the new tea into the teapot.

He didn't wait for Shi Shanshan to reach out and hold the kettle, Yang Chen had already reached out and grabbed it. The fire flashed in his hand and the flame rushed directly into the kettle, which instantly boiled the water of the kettle, but did not let the water evaporate.

With a slight tilt, Yang Chen poured the boiling water in the teapot and slowly raised the teapot, he then asked in a relaxed tone "What happened? Why did you suddenly encounter the heart devil?"

This tone was like the kind of chat that two friends who knew each other very well and were undefended against each other would use. In fact, after the past, these two people together with the common hobby of drinking tea, were already good friends. At least in the eyes of Shi Shanshan, there were no friends outside the sect who were closer to her than Yang Chen.

Perhaps Yang Chen's casual tone made Shi Shanshan's momentary relaxed, Perhaps the time for Yang Chen's speech was too good. It's just the time when Shi Shanshan intended to fully enjoy it. Anyway, when Yang Chen asked, Shi Shanshan didn't even think about it and answered.

"I recently wanted to break through the middle Jiedan stage, but I have been stuck in this realm. I can't break through and feel that I am bringing shame to my master's sect." Shi Shanshan said it in one breath and suddenly realized that she even unconsciously told everything to Yang Chen and her face turned red.

With this kind of mood, for Shi Shanshan, even if her master did not mention it, since she felt that she was bringing shame to her master, how could she speak about this with her master. However, in front of Yang Chen, it was so casual, even Shi Shanshan felt that her heart jumped, did she really like Yang Chen?

About Yang Chen, Shi Shanshan was somewhat annoyed at first. Of course, it was because of Li Qingchen's misinformation. Later, she used Yang Chen and was awkward. But then, she was surprised and was shocked by Yang Chen's shocking things again and again.

However, these were once experienced together with Yang Chen. After discovering that they had a common hobby, Shi Shanshan had a good impression of Yang Chen. The things that Yang Chen did, after Shi Shanshan heard about it, were also very appreciated. Unconsciously, the good feelings have become deeper and deeper.

Only now did Shi Shanshan suddenly discover that many things could not be said to the elders of her sect and they could not be talked about with her close friends in the sect, but she could express these feelings in front of Yang Chen. It must be said that this was a very surprising change. In particular, these changes still occurred in silence and even Shi Shanshan did not realize when she had such closeness to Yang Chen.

"I understand, it's normal!" Yang Chen opened the lid of the teapot and poured the hot water into the teapot that had been warmed up, he covered the lid and waited for a while. After that he picked up the teapot and poured the tea into the fragrant cup.

Yang Chen's tea was cooked with the yin-yang heaven burning fire, what kind of impurities and dust could not be contaminated in the tea, so there was no need to take the step of washing the tea leaves. And this tea was just enough to completely leave the essence of the tea.

After saying this, Yang Chen had already finished a set of movements in his hand and reached out to make a gesture of action, indicating for Shi Shanshan to taste it.

Shi Shanshan listened to Yang Chen's words and did not feel that there was anything strange. Everyone would have a heart devil at one point, so why would Yang Chen not say that? There was no need to block him, she just stuck out her delicate hands and used a skilled movement to hold the cup, then she picked it up and brought it in front of her nose slowly sniffing the unique fragrance.

"The type of peerless genius that is difficult to appear even in thousands of years, their qualifications of cultivation are rare, and it is even rare in the cultivation world." Yang Chen did the same thing, but he did not stop talking at all, he continued "The previous cultivation, all the way if the situation is as ruined, even if there is a slight bottleneck, it will be broken through in a short period of time. These outstanding disciples are of course the pride of their sect. Once their cultivation is suddenly unable to break through, they naturally become the laughing stock in the eyes of others. The genius disciple of the Green Jade Immortal Island is no different."

Yang Chen's words, let Shi Shanshan suddenly stopped the action in her hand and looked at Yang Chen with some surprise. She did not expect that Yang Chen actually said what was in her current state of

mind. It was extremely shocking, it directly made Shi Shanshan, the strong a Jiedan stage expert, stunned and sat in the same place, she could no longer say anything.

“However, Shi Shanshan!” Yang Chen’s voice suddenly grew bigger and more serious “Cold Plum Fairy Maiden, did you think too highly of yourself?”

Chapter 342.2: You Thought Too Highly Of Yourself

Suddenly talking about Shi Shanshan’s thoughts, in the state of Shi Shanshan’s shock, Yang Chen almost immediately angered Shi Shanshan.

“What are you talking about?” Shi Shanshan’s angry voice came out directly and in front of Yang Chen there appeared a frosty flying sword. It seemed that as long as she wished, in the next moment this flying sword could pass through Yang Chen’s head.

Yang Chen did not seem to see this flying sword. The movements of his hands were not deformed, he was calm, then he picked up the teacup to taste the tea with his small mouth and faced the beautiful fairy who was so angry that she was shivering opposite of him with an innocent look.

After drinking a small cup of tea, Yang Chen added another cup to his cup and looked up at Shi Shanshan. Shi Shanshan was glamorous and unparalleled. At this moment, she was full of frost, with a charm that could only be imagined.

“If you don’t drink your tea it will become cold!” Yang Chen reminded her, he began to pick up the kettle again and began to boil the water.

Shi Shanshan’s teeth bite her lower lip tightly, but she did not say a word. The flying sword in her hand still did not move. She stared in Yang Chen’s eyes and almost burst out of fire from her eyes.

“What’s wrong? Are you not convinced?” Yang Chen’s eyelids lifted and looked at the beautiful woman who was angry in front of him.

“The Green Jade Immortal Island is in the mortal world and is listed as a first-grade sect along with several major sects. Their expectations are like clouds. They have stood for thousands of years and must not be disrespected. They must have the vast majority of credit from the cold plum fairy.” His hands

kept on but his mouth did not stop and his words were not urgent but slowly said, his words directly made the opposite Shi Shanshan forget her anger and she began crying and laughing.

“That is the credit of the predecessors, what is the relationship with me?” This time, Shi Shanshan no longer stretched out but retorted.

“Oh? It doesn’t matter to you, I thought it was your credit!” Yang Chen suddenly had an enlightened appearance and it looked particularly abominable in the eyes of Shi Shanshan.

“That said, with so many predecessors, there must be some who were better than Shi Shanshan in qualifications, they must have cultivated to excellence, this has made the name of the Green Jade Immortal Island so prestigious.” Yang Chen’s words turned and then redirected back to the relationship between the Green Jade Immortal and Shi Shanshan.

“No” Not waiting for Shi Shanshan to refute, Yang Chen has taken care of it himself “ Cold plum fairy maiden Shi Shanshan, isn’t she a peerless genius that has been seen for thousands of years? How could there be so many predecessors like her?.”

Looking at Yang Chen’s self-directed and self-speaking words, Shi Shanshan’s heart seems to have no idea what Yang Chen was going to do, but her hand that was holding the sword has been slightly trembling.

“The things of the predecessors have nothing to do with fairy Shi, Now how could the prestige of the Green Jade Immortal Island be related to fairy Shi.” Yang Chen has picked up the tea cup again and gently sipped a bit. After having a taste, he said, “ If the cold plum fairy has an accident, it will definitely be a disaster for the Green Jade Immortal Island, Isn’t that the case?”

“You are talking nonsense!” Even if Shi Shanshan was proud, it was impossible for her to have such a state of mind. The Green Jade Immortal Island would never be built on the accomplishments of her alone.

“Isn’t that the case?” Yang Chen looked at Shi Shanshan’s trembling delicate body, posing an inexplicable posture and shrugging his shoulders, He suddenly asked “Then when I said that you think too highly of yourself, it seems that I was not wrong! You thought that without you the Green Jade Immortal Island would be wiped out? Wake up little girl, you are not that important!”

Yang Chen's words seem to have hit the most proud part of Shi Shanshan's heart and Shi Shanshan's disguised bones have been broken, her petite body shook and the flying sword in her hand began to sway excitedly.

"In this world, no one is the same. Without you fairy Shi, maybe there would be another fairy in the Green Jade Immortal Island." Yang Chen's words were like poisonous snakes which directly drilled into the ear of Shi Shanshan "Little girl, you can't represent the Green Jade Immortal Island alone, the Green Jade Immortal Island is not relying on you to raise it up. If your cultivation is excellent, it adds brilliance to the sect. If your cultivation is poor, you will not let the sect lose face. Which martial art sect has not had a few unfilial disciples, are you saying that these martial art sects could not lift their heads."

Shi Shanshan finally put down the flying sword in her hand and her eyes began to show a trace of confusion. Maybe she did not understand the last point and it was still bothering her.

"Think about it, did the sect ask you for anything?" Yang Chen sighed slightly and continued "has the sect asked you when you have to achieve what you have done? Have you said that you can't reach it? What will happen?"

"You have already fought a lot for the sect. At least until I appeared, the record of the Heavenly Stairs was still maintained by you and in less than two hundred years, you have hit the threshold of the middle Jiedan stage and there is no one who has done it before. For the sect, it is already the biggest dignity." He has already scolded her, so Yang Chen certainly had to say something good, lest Shi Shanshan run away.

"In the end, you just felt that you have a good qualification cultivation so you should have such smooth sailing, you never thought that you would encounter a bottleneck, that's why you have such a heart devil." Yang Chen finally came to a concluding speech "Your true heart devil is not that you are afraid to bring shame to your master's sect, but rather you just can't overcome your own pride."

This was the real heart of Shi Shanshan, it made Shi Shanshan have a correct understanding of her own heart demons. Shi Shanshan, who was sitting opposite him, finally completely took away the flying sword and her face also showed a serious thought.

“Well, don’t think so much!” Yang Chen directly interrupted Shi Shanshan’s thoughts. It seems that she was immersed in a world of reflection “I made a new tea specially made for you, if you don’t taste well it will be a pity.”

Shi Shanshan was awakened, and after a glimpse, she immediately showed a look. She was a very intelligent person and immediately realized the purpose of Yang Chen, he did not want her to entangle on this issue.

The famous cold plum fairy of course, could also afford to put down her characters and soon realized what her problem was, now she was no longer tangled, her slender jade hand took the cup and the fresh tea that has been slightly cooled was sent into her mouth.

Tasting the wonderful taste of the seventh metal spirit power tea, Shi Shanshan had a long-lasting look after her eyes closed. When she opened her eyes, she saw that Yang Chen was waiting for her evaluation. A frosty and mischievous look flashed in her eyes, suddenly she said “the tea is cold!”

Chapter 343.1: Green Jade Immortal Island’s Condition

Now she knew the root of the problem. In fact, for a master like Shi Shanshan, if there was no such thing as a heart devil, Shi Shanshan relaxed in an instant, she had a peace of mind with no more eagerness from before.

The man in front of her gave her a huge surprise again. Shi Shanshan looked at Yang Chen and her gaze was full of appreciation. If the two were not familiar with each other, this gaze would be appreciative, but the two now clearly had a relationship like Dao Companions to outsiders. If the outsider saw it, it would be a loving scene.

It had been a long time for Shi Shanshan to enjoy such a rare and wonderful tea taste. After drinking, you would soon feel the thrill of your own body, as if you were about to breakthrough.

“The Questioning Inner Heart Pills you gave the Blue Cloud Sect this time, it seems that the quality is very good!” When Shi Shanshan calmed down, the content of their conversation began to shift from herself to the sect “The island master and several elders feel... very bad!”

“This can’t be blamed on me!” Yang Chen smiled and didn’t seem to care about this matter at all, His mouth explained very casually: “You also know that practice makes perfect, after refining the same kind

of medicinal pills over and over again, my technique will also improve so for the quality to improve, isn't it normal?"

"My sect has also recently established a hall of eccentrics." Shi Shanshan did not entangle this issue. In fact, Yang Chen's explanation did not have any flaws. As the topic turned, Shi Shanshan changed to another issue "The Pure Yang Palace seems to be in front of everyone in this department, but the Greatest Heaven Sect's big hand, intends to directly recruit the appropriate monster race to join their sect to expand the strength of their sect. "

"It's normal, the strength of the Greatest Heaven Sect was greatly damaged some time ago and if they do not replenish as soon as possible, it will be squeezed by several major sects." Yang Chen liked chatting with Shi Shanshan, Their tone was natural "Now don't mention the monster race, even if the demon race promise to join the Greatest Heaven Sect to be honest and obedient, the Greatest Heaven Sect would most likely accept it."

"Are you so sure?" A voice suddenly came in without any signs before, It was the voice of the island master.

"Greetings island master!" When Shi Shanshan heard the voice, she hurried to get up to greet her. Yang Chen was also not too slow, he stood up and saluted.

"Sit, you are welcome." The leader of the Green Jade Immortal Island looked at Yang Chen and Shi Shanshan having tea, showing a very happy look, she sat in the original position of the head and looked up and said to the two people "What good tea, let this old body come to have a taste of this first grade tea."

Shi Shanshan quickly prepared a pair of tea sets and then dumped the tea that had been soaked before. After changing to a new batch of tea, the tea was soaked and handed to the island master respectfully.

The island master was also impolite, she reached out and took a cup skillfully. She smelled the tea cup for a while and her eyes showed a look of surprise. Then she picked up the cup and took a sip, the moment the tea entered her mouth she felt the differences. The smell of tea did not have the qi of the seventh metal, but the taste of the tea couldn't hide it from the island master.

“You have made a great tea.” Even the island master also admired Yang Chen’s fried tea techniques and praised it. However, in the main discourse of the island master, there was another meaning hidden in it, perhaps because of the extra enthusiasm.

“Yang Chen, why do you think that the Greatest Heaven Sect will recruit the monster race so wantonly?” The island master praised the tea and immediately asked very curiously.

“Because the monster race sometimes is more reliable than people.” Yang Chen facing the question of the island master, didn’t have any stage fright. There was no restraint caused by the huge gap between the two sides, so he answered with confidence “When the monster race joins their sect, they can let them swear with their monster soul to never betray the sect, But the introduction of the cultivator is very risky as there are few such practices, so they are more reliable than people.”

The Pure Yang Palace was the first sect to accept the monster race. The hall of eccentrics was something that the Pure Yang Palace had made, so the Pure Sun Palace was the most knowledgeable about it. Although other sects have accepted the setting of the hall of eccentrics and they were also looking for suitable candidates, but this suitable monsters could not be found in a moment. To put it bluntly, the Pure Yang Palace had the most understanding of the monster race.

Yang Chen’s words also made the island master sign with emotion. As a sect master, she knew how hard it was to manage a large martial art sect more than anyone else. If all the disciples were as simple as the monster race, maybe it would be less troublesome. It was a pity that it was counterproductive. Not everyone would put the interests of sect before their individual interests.

“The monster race sometimes has a simple mind, but it is better managed than a cultivator.” Although their understanding of the monster race was not deep enough, the Island Master believed that Yang Chen would not lie to her at this point and she sighed with emotion while speaking “Yang Chen, do you know? In fact, the cooperation between the Pure Yang Palace and the Green Jade Immortal Island, in the sect, there are still many people opposed to it.”

“Since the island master has cooperated with the Pure Yang Palace, I think these problems are no longer a problem!” Yang Chen responded with a smile. The Island master and he talked about these things, in fact, their identities were not equal and it should be said to the head of the palace.

“The opponents, after seeing the questioning inner heart pills, there is no reason for opposition.” The island master said with a smile, the expression on her face was very relaxed “Now they can’t wait for more cooperation.”

After getting the batch of Questioning Inner Heart Pills from Yang Chen, the power of the island master in the sect grew more. The Questioning Inner Heart Pills were so powerful, no one was unclear now about it, especially in this batch of Questioning Inner Heart Pills, there were still a few second grade pills, which was even more dazzling.

How to assign each Questioning Inner Heart Pill was decided by the island master and several elders who agreed to cooperate at that time. Most elders opposed to it, including Elder Li, now they have to temporarily lower their heads, otherwise they would not have their share.

No one would like to cultivate themselves at a low-end difference, the Questioning Inner Heart Pills could promote their cultivation base which has halted to the next level. This has been proven by many people. The most recent example was Wang Yong. If they were elders that did not have their own Questioning Inner Heart Pill because of their opposition, won't they die off extreme anger?

With this huge trump card, the days of the island master were much better and she was even more grateful to Yang Chen. Therefore, as soon as Yang Chen came over, the Island Master rushed directly to Shi Shanshan's residence, she did not even have to go to Yang Chen. Anyway, she could pretend to be concerned about the nephew of the younger generation, and no one could say any words.

"I heard that you have refined a kind of medicinal pill of the monster race?" The island master asked with a smile "This Inner Sensing Pill, can you let this old body experience it?"

Chapter 343.2: Green Jade Immortal Island's Condition

"What is the difficulty of this!" Yang Chen took out two first grade Inner Sensing Pills directly in front of the faces of the Island master and Shi Shanshan. One was placed in front of each of the two "Taste it and see the monster race flavour, it tastes good."

When he spoke it out, it directly made the island master and Shi Shanshan smile. They were to taste the medicinal pill, it was clearly being regarded by him like a local snack and it made people not know whether to cry or laugh.

However, both women knew that this Inner Sensing Pill was considered as a very precious thing, they very casually picked up one each and sent it into their mouth.

The Island master was okay, She was already a master of the Yuanying stage. The effect of the inner sensing pill on her was not so significant. But Shi Shanshan was completely different.

Shi Shanshan was trapped in the middle Jiedan stage bottleneck and could not break through for a long time. Just now, she was able to figure out something under the combination of Yang Chen's questioning and scolding. Through it, she had a faint overcoming of her own demons. Now she immediately took an Inner Sensing Pill and she entered the realm of observing herself.

Her whole body's qi and blood's powerful operation suddenly appeared in Shi Shanshan's mind. She had never experienced this kind of internal investigation of her own internal situation before. A medicinal pill was taken, and the advantages and disadvantages of her cultivation were clearly understood immediately.

"So that's how it is!" After Shi Shanshan took it for a long time, she recovered to normal, but she couldn't help but recollect the clear feeling. From time to time, she looked at the changes in her body and gained a lot.

"So that's how it is!" The island master was also the first to eat the inner sensing pill that Yang Chen refined. Although it was of little use to her, the effects that the pill would have on the masters below the Yuanying stage, she immediately had an intuitive understanding.

Although the Green Jade Immortal Island has already obtained the pill recipe of the Inner Sensing Pill, after all, not every alchemy master was Yang Chen. The new medicinal pill of this monster race not only required hundreds of years of medicinal materials, but also, its refining was also related to some of the practice habits of the monster race and it could not be refined in a moment.

Even if it was refined, it could only be regarded as a semi-finished product. It was completely incomparable with Yang Chen's perfect one. The island master had tried the Inner Sensing Pill refined by the sect alchemists, compared with Yang Chen's, it was simply heaven and earth. It seems that if their sect wanted to successfully refine the Inner Sensing Pill, there was still a long way to go.

"A first grade Inner Sensing Pill has such an effect, how about the second grade Inner Sensing Pill?" The island master immediately realized the greatness of the second grade Inner Sensing Pill. For a lot of things, if you don't experience it yourself, you couldn't understand the real thing by legend alone.

Although she had already heard that Xu Chengxin relied on the second grade pill to break through the peak of the Jiedan stage, the island master was still going to make a discount on this rumor. Moreover, the Green Jade Immortal Island cannot be held by a second-rate sect, as it was better to be self-sufficient.

But now the Island master was stunned by the medicinal pill made by Yang Chen. The same pill recipe, the same medicinal material, what was different was the alchemist master, yet the effect of the pill was so much worse. This was only the first grade Inner Sensing Pill, if they wanted to refine the second-grade pill, she didn't know how long it would take.

It seems that in alchemy, the Pure Yang Palace was always leading from time to time. Every time it was faster than a few large sects, the several major sects had to follow behind them.

This feeling was very frustrating. In the end, was the Green Jade Immortal Island, Blue Cloud Sect, Greatest Heaven Sect and the Five Elements Sect the first-class martial art sects or was it the Pure Yang Palace? But if their disciples were not powerful, it couldn't be blamed on anyone.

"Maybe for this Inner Sensing Pill, we can also cooperate again." The island master immediately made a decision. Since they were now an ally of the Pure Yang Palace, it was necessary to play the greatest value of allies. If there was such a precious thing, they couldn't cheaply standby.

"The younger generation junior has no problem, the island master can discuss with the head of the palace at any time." Yang Chen certainly would not refuse, this was one of the reasons why he took out these medicinal pills, it was for the Pure Yang Palace to gain more allies, while consolidating their present alliances.

Yang Chen's attitude was very satisfying to the island master. After tasting a cup of tea, she asked Yang Chen's intentions.

"You want to know about the elixir in the sea?" When the island master heard this request, she couldn't help but secretly nod.

It's no wonder that Yang Chen's alchemy was so outstanding. There were not many people studying the spirit medicines in the ocean. Even if the Green Jade Immortal Island has been situated on the sea, the

disciples that were really studying the elixir in the ocean were only a few people. Most people were still in the process of inheriting the ready-made alchemy knowledge and striving for breakthroughs.

Yang Chen was still only in the Jiedan realm yet he has already begun to study the elixir in the ocean. This kind of vision was much higher than many people.

However, even if many people understood that the elixirs in the ocean had a lot of research space, compared with the dangers in the ocean, most people choose to give up when they faced it.

After all, most alchemists had the fire attribute spiritual roots and looking for elixir in the ocean was not what they were good at. Although the water attribute spiritual roots cultivators were relatively free in the ocean, they cannot refine the medicinal pills, which was one of the reasons for the lack of research on marine elixir.

But no matter what, Yang Chen's small request could still be satisfied. Although there were not many people studying the spirit medicines in the Green Jade Immortal Island, there have been deep researches on it after years of accumulation.

"These things are my sect's secrets." Although the island master was not so difficult on Yang Chen, but some words still have to be said in the first place "You can see it, but you cannot bring it out of the sect."

"This younger generation junior will obey!" This request was too reasonable. Yang Chen did not intend to take away the information of others. But as long as they let him see it, he could remember it.

"If in the future my sects need a favour from you, you can't refuse too fast." The island master followed with a second request.

In fact, this could not be said to be a requirement. It was quite normal to hire a senior alchemist. As long as the price of the two sides were close together, there was no question of refusing it. Unless they were big enemies of life and death, like Yang Chen and the Greatest Heaven Sect, it was impossible to promise. The relationship between the Green Jade Immortal Island and Yang Chen was irrelevant, there should be no such problem.

“There is a lot of information. If you are happy with it wait here with Shanshan. I will send someone to bring it to you.” The island master smiled and got up and said the last request “If there is a time my ancestral disciples come to ask for advice. If it does don’t violate the rules of the Pure Yang Palace, you should try to give out some pointers to them!”

Chapter 344.1: Clues

Relatively speaking, these conditions were not harsh. After all, Yang Chen was asking for the accumulation of the Green Jade Immortal Island in the past. With paying a little price, Yang Chen had no objection and no reason to oppose it.

Shi Shanshan did not seem to change anything, but when they first met, her temperament was different. It seemed that after chatting with Yang Chen while drinking tea, she completely solved the knot and overcame her heart devil.

The movement of the island master was very fast. In less than two hours, several disciples brought thousands of pieces of jade slips. They were handed over to Yang Chen one by one.

Although there were few people studying this aspect, their achievements have been enormous after thousands of years of accumulation. The thousands of jade slips were not so exaggerated.

When Shi Shanshan saw so many jade slips, she said nothing and directly told her servant to pick out a quiet room for Yang Chen to settle down, so that Yang Chen could read with a peace of mind.

As of now, it was not known how many people hated Yang Chen to the bone, although the relationship between Yang Chen and Shi Shanshan was already widely spread, after all, it was only with them having a simple contact with each other. However, Yang Chen living directly in Shi Shanshan’s courtyard has never happened before.

Even if Yang Chen only stayed in the courtyard of Shi Shanshan, he would be misunderstood. If the island master of the Green Jade Immortal Island was not already strict and commanded that everybody must not harass Yang Chen, there would be many young disciples from the Green Jade Immortal Island to come to their door and fight Yang Chen to the death.

Yang Chen knew that Shi Shanshan’s heart had just calmed down and he did not want to disturb her, so he took out a second grade Questioning Inner Heart Pill for her to eat.

Shi Shanshan certainly would not suspect that Yang Chen would harm her. Although Yang Chen made her swallow a medicinal pill very awkwardly, she still did not refuse. In front of Yang Chen's eyes, she took the pill.

Soon, Shi Shanshan noticed that something was not right. When she regained her consciousness, Yang Chen smiled and signaled for her to retreat. Shi Shanshan wanted to talk to Yang Chen clearly, but the second grade questioning inner heart pill was really too precious. After Yang Chen said the name of the pill, Shi Shanshan no longer cared about the other things and quickly entered the state of seclusion.

Yang Chen looked at the jade slips one by one in the quiet room arranged by Shi Shanshan.

Because the research on marine elixir was not very systematic, these jade slips records were also very complicated. The seafloor was different from the ground, because the influence of the ocean currents was much more than that on the ground. Moreover, most of the oceans were dominated by water attributes and the research direction was somewhat biased.

These were the things that some of the predecessors of the Green Jade Immortal had spent a lot of time accumulating. Yang Chen couldn't ignore it at all. Every piece of jade slip was very carefully scanned.

Although the things recorded on the jade were comprehensive, the content was not a lot, but Yang Chen always took a long time to study it. He had to connect with himself on the bottom of the sea and think for a long time.

Many of these marine medicines were unconfirmed. For some things, Yang Chen couldn't be sure whether it was right or wrong. It could only be verified one by one in the future.

Every time he read, Yang Chen discovered the elixir that he had seen or had already collected, he would study it with A'Zhu and A'Bi. The two women also carefully observed the elixir in the medicine garden. It was as recorded on these jade slips; the days were very fulfilling.

There were two disciples of the Green Jade Immortal Island who have always been with Yang Chen. Every time Yang Chen reads a piece of jade slip, they would take back one piece and then always report to someone.

What made Yang Chen most satisfied was that every piece of jade slip that Yang Chen wanted to see and the elixir that was recorded on, when Yang Chen begins to read, these two disciples would always bring him the physical objects. Those elixirs which Yang Chen has not gotten yet would also be sent to him.

Yang Chen did not resist such an arrangement. The so-called consultation in the last words of the Island master would still be on these marine medicines. The things that Yang Chen knew before wasn't a lot, but she believed that after a certain period of time, when Yang Chen has enough things, someone would come to discuss with him.

This was no wonder, after all the Green Jade Immortal Island was at sea with ready-made submarine medicine, it would certainly not be wasted. It was a pity that there were fewer people who were really good at alchemy, so the speed of the research would be very slow. But with Yang Chen, a senior alchemist master, he may soon be able to add several new medicinal pills to the Green Jade Immortal Island.

With the real thing, Yang Chen knew more intuitively. And after confirming that these elixir were non-toxic, Yang Chen would personally taste some and try the medicinal essence.

This issue, many jade slips have records of it, but Yang Chen does not dare to believe it easily, it always has to be confirmed personally. He also found several things that were different from the records on the jade slips.

When Shi Shanshan was retreating, the island master has been there once again. It was when Yang Chen had seen most of the jade slips, when she saw the state of Shi Shanshan, she guessed what had happened. She was full of kindness and smiled and looked at Yang Chen for a long time, she was satisfied before leaving.

Subsequently, Yang Chen ushered in several alchemist masters in the Green Jade Immortal Island. In these alchemist masters, there were men and women, old and young, there were Yuanying stage masters, there were also Jiedan stage masters, as well as foundation stage disciples and so on. However, everyone was very respectful to Yang Chen, they were not scornful because his cultivation base was not high.

The person who could refine the second grade questioning inner heart pill, in the mind of the alchemist masters, let alone being a master of the Jiedan stage, even if he was only a foundation stage disciple or a

qi refining stage disciple, he would be a respected senior alchemist master who several alchemist masters respected and seek advice from. They often discussed with Yang Chen on the understanding of certain marine medicines.

They have all studied these marine medicines and some things were very familiar to them. However, in terms of understanding of medicinal properties, they were much worse than Yang Chen.

Every time there was a dispute, Yang Chen always inadvertently used one or several kinds of elixirs that could be taken on land. They were all similar medicine. The attributes of the five elements were slightly different. At this time, Yang Chen could find that one or several alchemists would secretly record these conclusions of Yang Chen as a treasure.

This situation lasted for almost a year. Yang Chen had already read all the jade slips and also for many of them, they have been passed with these alchemist masters and even Yang Chen used several of them to refine water attribute qi replenishing pills and cultivating yuan pills to prove his point of view, this kind of weightlifting posture made it so that several alchemist masters all admire him.

Chapter 344.2: Clues

It was unknown if the news that Yang Chen was studying underwater spirit medicines in the Green Jade Immortal Island was revealed by the sect intentionally or unintentionally.

On the one hand, this was not a secret matter, so there was no need to be sneaky about it. On the other hand, some of the people who disliked Yang Chen in the Green Jade Immortal Island seemed to have no obligation to keep this secret. After a comprehensive balance, the island master actively spread the news.

For those who were in the Pure Yang Palace, they would be assured of Yang Chen's safety when they heard that Yang Chen was in the Green Jade Immortal Island. However, if they let them know from other sources rather than from the Green Jade Immortal Island side, they may have some other ideas. This was also one of the factors considered by the island master.

This news seemed to have aroused a strong interest from the outside world. Everyone knew that there were abundant resources in the sea, but apart from a big sect like the Green Jade Immortal Island, they were several large rogue cultivators alliances and they were still far from the Central Plains.

Cultivators have always expected to fully utilize the rich resources of the sea, but there has been no good way, so what was the meaning of Yang Chen's high-profile exercise in the ocean at this time?

Those who understood Yang Chen's personality believed that he was indeed only studying marine medicine. Those who did not understand Yang Chen began to wonder if Yang Chen had obtained some secrets and was able to use these marine medicines.

Reminiscent of the fact that Yang Chen liked to read some miscellaneous books, many people became interested in Yang Chen again, not knowing which kind of miscellaneous book he has benefited from. Who would think that the request was made by the two medicinal garden spirit tools of Yang Chen?

Some people immediately began to plan how to get benefits from it and more greedy guys began to plan how to get these things that Yang Chen got as their own.

Yang Chen who was in the Green Jade Immortal Island certainly does not care about the thoughts of these people. The reason why he stayed in the Green Jade Immortal Island so long was that he was waiting for Shi Shanshan to complete her seclusion.

After a year, Shi Shanshan finally woke up from the retreat. As soon as she opened her eyes, there was a glimpse of a glimmer of light in Shi Shanshan's eyes.

Before Yang Chen saw it, the slightest embarrassment and worries immediately went away, Instead, it was replaced by Shi Shanshan's confident and strong gaze.

Don't mention the second grade questioning inner heart pill, even a first grade questioning inner heart pill could easily allow an expert to pass their bottleneck, not to mention that Shi Shanshan was only in the middle Jiedan stage.

After Yang Chen persuaded Shi Shanshan, she had almost no psychological pressure. Even if she didn't take the questioning inner heart pill, the breakthrough was only a matter of time and it would not last more than five years. Now with the help of the second grade questioning inner heart pill, it took just a short period of one year, Shi Shanshan directly skipped the previous bottleneck and completely entered the late Jiedan realm.

It could be said that Shi Shanshan's cultivation aptitude was simply rare in the world. After entering the Jiedan stage for less than 20 years, she has broken through the thresholds of the middle Jiedan stage and entered the late Jiedan stage. This cultivation speed was quick, even a little faster than Gongsun Ling in his previous life.

About the second grade questioning inner heart pill, he believed that Shi Shanshan would not disclose it, the island master also seemed to want to determine what it was, but she would never think that it was the second grade questioning inner heart pill, at most she thought it was a first grade questioning inner heart pill.

Yang Chen has not left, just waiting for Shi Shanshan to wake up. Of course, this was only part of the reason, the other part was to wait for some unscrupulous guys.

In fact, in the later period, the people who came here to ask Yang Chen questions were more than a few alchemists, some curious Green Jade Immortal Island disciples also came.

Yang Chen promised to the island master that as long as it was not against the rules of the Pure Yang Palace, other aspects should also be as convenient as possible. These people had a wide range of problems, most of which were related to alchemy. However, on several occasions, Yang Chen received several very strange requests.

The other party held some different ancient scriptures and all the characters were words from over 10,000 years ago. They asked for advice in front of Yang Chen, if Yang Chen could recognise it.

These ancient writings, Yang Chen recognized a large part of it. In order to not expose their true intentions, the people who asked for it worked hard. Several junior disciples brought a few different jade slips to ask for advice. Every piece of jade were real antiquities.

The things left by the immortals on the Immortal Executioner Stage were also tens of thousands of years old. Therefore, Yang Chen has indeed worked hard in this respect. The inheritance of the Blue Vault Mountain Immortal's Cave also made Yang Chen more familiar with the mastery of ancient Chinese characters.

Take the jade slip that Yang Chen pointed out, it did not record anything too important. A very old cultivation method, which has now been improved, a pill recipe, it was no longer meaningful and

another one was something like a story book. Three jade slips, three language, each of which was different.

When Yang Chen was very accurate about telling the disciples who came to ask for the contents of several pieces of jade slips, the disciples showed considerable disappointment.

This seemed very normal. Everyone wanted to get some good things from the ancient jade slips. When they found that they were just a bunch of meaningless methods, they would have such disappointment.

However, this behavior was what made Yang Chen puzzled. Few people would study this ancient scripture, except for Yang Chen, who has received the inheritance of the Blue Vault Mountain Immortal's Cave. But how could some of the junior disciples of the Green Jade Immortal Island have such opportunities? Were they also studying Yang Chen and reading through various books?

Now because of Yang Chen's heaven defying achievements, every sect was consciously investing a lot of manpower in some miscellaneous books and expecting to be like Yang Chen, so that they could find some major secrets. Especially like the Blue Cloud Sect, which has already benefited, it has spared no effort to promote it.

But this kind of thing, how could they get Yang Chen to ask for advice, it was somewhat puzzling. The performance of those disciples seemed normal, but Yang Chen believed that they just want to confirm whether Yang Chen knew the ancient writings.

After trying to understand this, Yang Chen did not care. These people were at most the errand boys, they were not the real mastermind. They were not worth his time.

He was waiting for Shi Shanshan to wake up, just to let her handle this matter. These disciples, if they were inspired by the Green Jade Immortal Island, it would be fine, but if they were doing things for other sects, it would not be such a wonderful thing for the Green Jade Immortal Island.

Yang Chen also firmly believed that those people must be the latter. The Green Jade Immortal Island seemed to have the tragedy of rebellious disciples.

Chapter 345.1: Li Junyu's Pursuit

When Shi Shanshan woke up, of course she complained, but this complaint also made her feel sweet in her heart, she just felt that Yang Chen should not use that precious pills for herself.

Yang Chen was not surprised by this. After Shi Shanshan drunk tea again, Yang Chen told the performance of those people to Shi Shanshan.

Yang Chen was only skeptical. As a disciple of the Pure Yang Palace, he was not in the domain of Green Jade Immortal Island. Of course, he couldn't question the disciples of the Green Jade Immortal Island. He just told Shi Shanshan about his doubts.

Shi Shanshan did not say anything but she directly met the island master and told her about Yang Chen's suspicion. After listening to Shi Shanshan's retelling, the island master began to ponder over it.

The ancient script were very common, the cultivation methods and pill recipes have been improved and they were not much significance in them. Few people will pay attention to this aspect. However, since the various sects began to pay attention to those miscellaneous books, many of these were discovered, and many of them have begun special research into it.

However, no matter how they studied, there was no such person as Yang Chen, who once faced the ancient characters directly. In his previous life in the Heavenly Court, Yang Chen had been exposed to a lot of old antiques. Those people have also taught Yang Chen a lot of things in this regard so Yang Chen was definitely an authority.

This was not worth much suspicion. However, these disciples got these jade slips of ancient scriptures. Instead of asking the sect disciples to study these, they went to Yang Chen, an outsider. This was too doubtful.

In the second half of the year of Yang Chen's consultation, more than a thousand people communicated with Yang Chen. However, the island master have long arranged and the questions that everyone has asked have been recorded by special disciples. So the disciples who had consulted him about the ancient texts could be found by them.

They would not notice that the two disciples who have been accompanying Yang Chen have actually played such a role in the dark. Everyone thought that the two disciples were supervising Yang Chen as they were afraid that he would bring out the sect ancient scriptures, so no one was too prepared.

A sect of disciple, who got an ancient jade slip but did not ask the people in the sect first, but went to find someone outside the sect. There must be problems in it.

Soon, the island master knew the identity of these disciples. They also learned from the disciples who specialized in the ancient scriptures that these guys had never consulted them about their content.

This had a bit of a meaning, when they got the ancient jade slips, they directly went to Yang Chen to identify them. Although they were still some insignificant things, but they involve several ancient scriptures, so the island master should also carefully check them.

As the Green Jade Immortal Island was an ally, Yang Chen certainly hopes that their ally was now as strong as possible. Yang Chen had a kind of hunch that those people must be people from the Greatest Heaven Sect. He didn't know if they found an ancient inheritance and they don't know the ancient characters, so they came to test Yang Chen.

The reason for this suspicion was because after killing the six Yuanying stage masters, until now, the spiritual awareness imprint did not vibrate, only to explain that the other party temporarily gave up the pursuit. In combination with the ancient text, it seems that the reason was coming out.

In any case, the fact that he knew the ancient scriptures has already been passed out by those people. Yang Chen now seems to be waiting for someone to come to the sect for him.

After a year of entanglement in the Green Jade Immortal Island, Shi Shanshan has now solved her own troubles. The Green Jade Immortal Island's information on marine elixir has already been seen by Yang Chen and it was time to leave.

In the eyes of Shi Shanshan, Yang Chen was also considered to be in a hurry. It was as if he knew that she had a heart devil, so he came over and give her guidance. As for the moment when the second grade questioning inner heart pill was given to her, Shi Shanshan did not know what to say. It was only in the bottom of her heart that she knew that Yang Chen had her firmly in his mind.

It seems that the two people still felt that kind of faint connection, but they were more tacit. When Yang Chen mentioned about leaving, Shi Shanshan just sighed and did not say anything, she calmly sent him to leave the Green Jade Immortal Island and he did not know what she was thinking.

Leaving from the Green Jade Immortal Island, Yang Chen did not plunged into the water. After all, it was polite to leave not to escape, nor to be too rude.

From the mountain gate of the Green Jade Immortal Island, Shi Shanshan bid him farewell and Yang Chen slowly sat on the sailboat formed by the flying shuttle. After driving out for a hundred miles, his hands turned over and a sword appeared in his hand.

Along with the bell sound that suddenly appeared on Yang Chen, the green flying sword directly cut through and penetrated into the sea. Under the influence of the bell sound, the calm sea surface instantly evoked countless huge waves, spreading toward the surroundings crazily.

A figure emerged from the sea like a ghost, and rushed toward Yang Chen. Yang Chen's flying sword speed seems to be a difference, just rubbing the other's feet and flying past, while the other's flying sword directly turned into a wild goose, flying to Yang Chen's chest.

"Elder Li, have you been well since our last meeting?" Yang Chen's sword struck the emptiness, but it was not unexpected. The first wood flying sword was not known for its flying speed. The other party was also a Yuanying stage master who could hide very naturally. However, the other party could ignore the bell sound of the golden bell, which made Yang Chen somewhat puzzled.

The person who appeared was the old acquaintance of Yang Chen, Elder Li Junyu of the Green Jade Immortal Island. Li Qingchen was the descendant of her later generation, who did obeisance in the Greatest Heaven Sect. Because he competed with Yang Chen for Shi Shanshan, he was eventually killed by Yang Chen in the duel of life and death, so the two sides also formed an enmity.

Although the Pure Yang Palace and the Green Jade Immortal Island were allied together, Yang Chen does not feel that this kind of grudge could be resolved easily. Perhaps the two sides would not have an open battle in the territory of the Green Jade Immortal Island, but when they were only two people, it would definitely be a life and death match.

"Kid, don't think that if you refine a few medicinal pills, you will not put the cultivation world's masters in your eyes." Li Junyu did not hide the killing intent for Yang Chen and said evilly "Today will be your death!"

As soon as the voice fell, her flying sword fell on Yang Chen's chest. Buzz, a dull bell rang and it resounded again. Yang Chen's body did not move at all. Instead, Li Junyu's flying sword stood on Yang Chen's body, but his body didn't cut open, instead it was popped up by Yang Chen's body.

"So you rely on a body protection magic weapon?" Li Junyu snorted and suddenly swayed and quickly flew away from the place.

Under the sea around Yang Chen, dozens of tenth water divine thunder suddenly appeared, it was not known when a batch was suspended in the air. There were at least a dozen underwater. Yang Chen's body was already full of the tenth water divine thunder.

Li Junyu, who had already left, showed a smirk on her face. She saw that Yang Chen was still standing in the same place. During her movement, dozens of tenth water divine thunder exploded at the same time and Yang Chen was suddenly drowned in it.

Chapter 345.2: Li Junyu's Pursuit

Li Junyu was a water attribute Yuanying stage master, the last time Li Qingchen and Yang Chen were in a life and death duel, Li Junyu gave Li Qingchen a refined tenth water divine thunder, in order to find opportunities to kill Yang Chen.

Now it was with Li Junyu's own hands, she has done a lot of homework on Yang Chen. Because of Li Qingchen's relationship with her, Li Junyu also had a group of friends who knew each other in the Greatest Heaven Sect, so she knew that Yang Chen was not easy to cope with.

Before the start, Li Junyu refined a group tenth water divine thunder. Refining this batch of tenth water divine thunder had taken Li Junyu almost ten years. In order to directly give Yang Chen a look at such a situation.

Yang Chen's fight before against the Greatest Heaven Sect's Liu Wei was a similar situation, but it was not with tenth water divine thunder, but thunder pomegranates.

In order to kill him, Li Junyu racked her brains, It was not easy to find Yang Chen and get the chance to attack him. She didn't expect Yang Chen to take the initiative to come to her sect. He stayed in the Green Jade Immortal Island for a whole year, which made Li Junyu able to arrange everything and catch up with Yang Chen.

There were dozens of tenth water divine thunder in the air and there were more than a dozen in the water. No matter whether Yang Chen was in the sky or in the sea, there were enough divine thunder to affect him. These tenth water divine thunders were all condensed by Li Junyu who was a Yuanying stage master, the power of almost every one could rival those which blew the Pure Yang Palace gate in the past.

Even if he was replaced by a master of the Yuanying stage, it was enough to be killed several times in the face of such an attack. Yang Chen was just a small early Jiedan stage master. Even if there was a strong body protection magic weapon on him, it was impossible to escape a dead end.

At the moment of the thunder explosion, on the face of Elder Li Junyu, you could not see her usual gentle expression, only a fierce face with a creepy smile.

“Snort, Senior sister, you think that as long as you are surrounded by this kid, can your island master position be fixed?” Li Junyu looked at the sea with almost nothing and the look on her face finally eased, sneering while saying to herself “Now we will that without this kid, how many people will support you!”

Hanging above the sea, Li Junyu slowly flew to the position where Yang Chen was and her spiritual awareness scanned wide, trying to find the body of Yang Chen.

However, Li Junyu herself knew that this seems to be a luxury. Under dozens of divine thunders explosion, even a steel would be turned into powder, Yang Chen, a little Jiedan stage cultivator, could still leave traces, which was simply impossible.

Not to mention the body, even Yang Chen’s flying sword and his powerful body protection magic weapon did not seem to leave a trace. It seems that Yang Chen did not appear in this world at all.

Li Junyu was still not assured. Within a few dozen miles, she was still looking for it carefully. She must confirm the death of Yang Chen. Otherwise, it would not be easy to explain whether it was the Blue Cloud Sect or the Greatest Heaven Sect.

Within this sea area, Li Junyu has already arranged a large-scale warning array. As long as there was a cultivator or a monster, she would know it instantly. If Yang Chen escapes from here, she must have had an induction.

But what made Li Junyu feel strange was that she did not feel any signs from the formation. This gave Li Junyu a bad feeling. Was the array of her own arrangements also destroyed by the tenth water divine thunder? However, the scope of the explosion of the dozens tenth water divine thunder should not affect the array.

Flying fast to control her flying sword, Li Junyu flew to the edge of the formation she arranged. It was a few dozen miles away, she could get there without a fragrant time.

Li Junyu's heart quickly sank, the array of her own arrangements, she did not know when it has disappeared without a trace. If it was not destroyed by the tenth water divine thunder, then there was only one possibility, which was that it was destroyed by Yang Chen.

Suddenly, Li Junyu suddenly discovered the aura of Yang Chen. A glimpse of the weak and faint spiritual awareness was escaping into the distance. The speed was not fast, but it was just a little faster than Li Junyu's own flying sword.

With a sigh of relief, Li Junyu rushed with full force and chased up Yang Chen. Such a weak spiritual awareness could only explain that Yang Chen has been seriously injured.

This was reasonable. Under the simultaneous explosion of dozen tenth water divine thunders, it was impossible for a small Jiedan stage cultivator to be safe and sound and so the serious injuries were normal.

She didn't know what Yang Chen used to break the warning array that she personally arranged. While his means was brilliant however, the means were even more sophisticated. Today, it was impossible for him to escape death. He was seriously injured, how could Li Junyu leave Yang Chen with a chance to recover from his injury?

If she didn't do it, she was afraid to leave behind any troubles. Li Junyu dared to do it in the hundred miles outside the mountain gate of the Green Jade Immortal Island and it was with this idea. Even if the island master knew, these was nothing she could do about it.

When Yang Chen died, the Green Jade Immortal Island and the Pure Yang Palace would inevitably become enemies of life and death. Anyone could guess this, Yang Chen was so important to the Pure

Yang Palace Committee that even no matter who moves against Yang Chen, they would become the target of the Pure Yang Palace. Luo Yuan, who last offended Yang Chen was an example.

Thinking of Luo Yuan, Li Junyu's heart suddenly faltered. Luo Yuan was in the late dacheng stage and Yang Chen who he was chasing was in the foundation stage, but he did not catch up to him. It seems that Yang Chen had a magic weapon that was very fast. If Yang Chen uses it, it was estimated that Li Junyu herself could do nothing about it.

Fortunately, it seems that the magic weapon has been damaged. At least Yang Chen's weak consciousness was not moving fast, only a little faster than her. She just had to keep up with a little effort and when Yang Chen's spirit power was exhausted, he would naturally slow down. A seriously injured Jiedan stage younger generation junior and a Yuanying stage master who has no consumption and was in prime condition, he was only able to survive and endure.

And if she let him live for some time more, she could also enjoy some of the process of chasing Yang Chen. In front of Li Junyu, it seems that Yang Chen was finally trying to escape after he had been desperately trying to run. He was finally chased by herself, he was desperate but he could not do anything but to die.

Thinking of this, Li Junyu suddenly felt very satisfied and looked at the direction of Yang Chen's escape, driving her flying sword, she was following Yang Chen's aura and chasing it up.

Perhaps this was a typical cat and mouse game! The more Li Junyu thought about it the prouder she became, even the speed of her flying sword also became a lot faster because of her thoughts.
