Chapter 366.1: Seventh Metal Golden Dan

As soon as he entered the hole and fell down, Yang Chen released the golden bell, covering himself and Gongsun ling.

The few magic weapons that Yang Chen received in the treasure house of the Dragon Palace were very interesting. Among the nine magic weapons, there was a complete set of the five elements magic weapons.

Gongsun ling's mountain river geographic map was the magic weapon of the earth attribute and the two dragon horns that Yang Chen gave to his master, one was of the water attribute and the other was of the fire attribute. Among the rest, Yang Chen studied it carefully. The gourd, which could hold various liquids, was a magic weapon of the wood attributes, while the golden bell was a pure metal magic weapon.

Originally, Yang Chen also prepared a metal attribute flying sword, but between the rush, the material was not top-level, and it could not even be compared with the dome hall.

At one time, Yang Chen was also preparing to use the dome as a tool to collect the seventh metal true essence, but after carefully studying the golden bell, Yang Chen chose the golden bell.

The magic weapon of the Dragon clan, although Yang Chen was only acknowledged as the master after the first layer was sacrificially refined, but the strength of the golden bell was that Yang Chen felt that it was rare even in the spiritual world, and it was better able to cope with the seventh metal true essence.

Gongsun ling definitely did not have a magic weapon to protect her body, so Yang Chen also protected her. Once there was any danger, he would be able to send her immediately into the medicine garden. However, this kind of big scene, it would be a pity that if Gongsun ling could not see it, so Yang Chen was still adventurous to drop dwelling with Gongsun Ling.

He didn't let go of his spiritual awareness before, because he was afraid that he would be dragged in. Now that he have taken the initiative, he would not hold back and he released his spiritual awareness. After both of them entered the entrance he completely released his spiritual awareness and explored everything in the cave.

It was said to be a cave, but using a deep well to describe it was more appropriate. After Yang Chen and Gongsun ling jumped in, they have not even landed yet, but Yang Chen and Gongsun ling have been able to explore the bottom of the deep well.

This deep well was thousands of feet deep. With that gravitation, the speed of the two drops was extremely fast. Soon, the two entered into a liquid.

Yang Chen knew that this liquid was the same as the first wood true essence spiritual solution. It was used as a cushion, so after falling in, he did not panic.

Under the comfort of Yang Chen, Gongsun ling also entered the liquid safely. In fact, Gongsun ling has been in Yang Chen's arms all along, he was holding her hands tightly in his arms so she was not nervous, but it was still a little scary to suddenly enter this place where they didn't know it's roots.

"It's okay!" Being close to Gongsun ling, Yang Chen could of course be aware of the tension in his arms when they entered the hole, so he whispered comforting words, and then the two fell into a huge space. A pure aura of the seventh metal, suddenly came face to face with them.

The white bone ancestor and the several Yuanying stage masters who had fallen before were still dying, they were not pure metal attribute cultivators. In this huge seventh metal true essence solution, they couldn't support themselves for a long time.

Just in front of Yang Chen and Gongsun ling, first, a few Yuanying stage masters were bombarded by the seventh metal true essence and just under the watchful eyes of Yang Chen and Gongsun ling, they became a pile of flesh and blood debris, and then disappeared without a trace.

After the white bone old demon and Madam Fenghua attacked Ye Zhenxiong of the Limitless Demon Sect, they both disappeared and gave a posture of being afraid of the revenge of the Limitless Demon Sect. No one knew that the old devil in the blink of an eye began to stare at the movements of Yang Chen and Gongsun ling.

Shao Fanghua entered the small town in the mining area. After entering, there was not many who knew her true identity. Those in the city only knew that Shao Fanghua was not easily provoked.

However, the old devil was very familiar with Fanghua. What Yang Chen and Shao Fanghua did in the small town did not escape the ears of the old devil. When Shao Fanghua was acting very strange, how could the white bone old demon not care about it?

When Yang Chen and Gongsun ling were looking for the seventh metal true essence, the white bone old demon took a peek at them in the dark, thinking that with his Yuanying stage cultivation base, Yang Chen and Gongsun ling could not find him.

In the demonic domain, the white bone old demon, did not think that he would meet such an end. The death of the body can not be said, but also the end of a broken bones, even the use of broken bones are not enough to describe, can be expressed with the bones and ash.

Of course, Yang Chen would not care of what would happen to the white bone old demon. After entering here, if a person does not have the metal attribute spiritual root or a powerful magic weapon and a powerful cultivation base to protect themselves, they would basically be no exception in their fate. Perhaps a master of the dacheng stage could escape, but the white bone old demon was obviously not in this range.

The space in which the two entered now was very large, it was much larger than the space for storing the first wood true essence spiritual solution under the banyan tree immediately cave. It was full of pure seventh metal true essence aura, in a moment, there were countless aura which infiltrated into the golden bell and at the same time, it also infiltrated Yang Chen and Gongsun ling.

Yang Chen did not dare to neglect it, immediately urging the golden bell, he began to resist this crazy seventh metal aura. At the same time, he didn't forget to tell Gongsun ling: "A'Ling, once I feel that some is wrong with the aura, I will send you to the medicine garden immediately."

Gongsun ling certainly felt this crazy aura and naturally knows how dangerous it was. Fortunately, there was Yang Chen around, she did not panic because of fear, but even so, her small face was a burst of white. Anyone who looked at dozens of Yuanying masters who were more than a whole realm higher than themselves were turned into a powder in front of them, they would inevitably be scared.

Until now, Yang Chen has not explored the edge of this space. It was really that spiritual awareness does not extend too far in this viscous seventh metal true essence solution.

It was said that it was the seventh metal true essence liquid, but it was not like a flowing liquid, but a thick one, such that it was almost solid, only occasionally under the action of an external force would a little deformation occur, then It would be restored to its original state.

This kind of seventh metal true essence liquid was even thicker than the amount of first wood true essence spiritual solution collected by Yang Chen in the past. The seventh metal true essence contained in it was pure and concise to the extreme, only with a little effort, it was estimated that these seventh metal true liquid would almost condensed into a gemstone.

Fortunately, it was still in a liquid state, Yang Chen was not sure whether the gourd could collect it smoothly in this state, and now he could only try it.

Before the gathering, Yang Chen first looked at the state of Gongsun ling. What surprised Yang Chen was that Gongsun ling had no embarrassment at the moment, but she was very relaxed.

“The mountain river geographical map is automatically absorbing these aura.” Seeing Yang Chen look over, Gongsun ling immediately noticed it and said quickly.

This discovery made Yang Chen somewhat surprised. Gongsun ling’s geographical map, even during the quenching of the life source magic weapon, it could still display some basic uses. For example, depicting the geography of the mountains that have been recorded.

Chapter 366.2: Seventh Metal Golden Dan

Not long ago, the mountain river geographical map also absorbed the seventh metal qi in those mines. Now it was here and it was still able to absorb the seventh metal true essence. It really was a dragon clan’s treasure, it was strong enough.

With the strength of the mountain river geographical map as a guarantee, at least Yang Chen and Gongsun Ling’s lives were no longer in danger. Originally, Yang Chen also planned to help Gongsun Ling with some troubles ahead, but now it seemed completely unnecessary.

Next, Yang Chen naturally took out the gourd and began to try to absorb the seventh metal true essence solution. The seventh metal true essence was a liquid that was viscous to the extreme. Even if it had some liquid properties, gathering it into the gourd was not so smooth.

Fortunately, only the collection speed was much slower and it was not completely uncollectible. After discovering this, Yang Chen also completely relaxed in his heart, everything was under control.

The strong protection of the golden bell was enough, but the seventh metal true essence solution that entered the body of Yang Chen through the golden bell was still somewhat strong. At least, Yang Chen's current cultivation base was still unable to control it. It was not known how many times this seventh metal true essence solution was thicker than the first wood true essence spiritual solution and the spiritual power was stronger.

When he got a sudden inspiration, Yang Chen put out the dome hall and the golden bell was also set outside. The hall was inside and served as a buffer for the second layer. The dome was also a magic weapon of the seventh metal attribute, which could also be tempered by this seventh metal true essence solution.

After the secondary filtration of the dome, the seventh metal true essence which entered Yang Chen began to become controllable. Yang Chen simply let Gongsun Ling practice freely and he himself began to rush into the process of condensing his seventh metal spirit power dan.

The seventh metal spirit power dan was the ultimate goal of Yang Chen's for finding the seventh metal true essence solution. Gongsun Ling also knew Yang Chen's plan on the road so she did not bother Yang Chen, she stayed on the edge of the dome and used the medicine garden's spirit power to cultivate.

The dome and the medicine garden were two-in-one. No matter which one absorbs the spiritual power, it would supplement the spiritual power of the medicine garden. The net bottle of the medicine garden would naturally transform all kinds of spiritual power into the spiritual power required by various living creatures in the medicine garden. Although Gongsun Ling was an earth attribute cultivator, it would not be harmful to her.

The seventh metal true secret art was running fast, absorbing the huge and incomparable seventh metal true essence, the seventh metal true essence in Yang Chen's body had also begun to grow rapidly.

Originally, the remaining spiritual power of Yang Chen had reached the peak of the foundation stage, only the last step was left for it to be able to condense. So with this incomparably abundant seventh metal true essence, the process of condensing Dan began in less than four months.

Boom, it was as if a thunder pomegranate exploded in Yang Chen's body, countless spiritual powers spewed out along the meridians and then it was immediately attracted to the position of the dantian.

The seventh metal true essence began to condense into a small golden dan, this time, the color of the seventh metal true essence dan was really golden, the real piece of Jiedan.

Showing a grain of gold and then with the influx of spiritual power, the Jiedan began to grow and it slowly turned into the size of peanuts, almonds, and finally turned into a longan-sized golden dan, it was round and sparkling with golden light.

With the seventh metal true essence dan, there have been five kinds of spiritual power to have condensed dan in Yang Chen's body, third fire, fourth fire, first wood, seventh metal and tenth water, before the seventh metal condensed, other spiritual power did not have the slightest movement. However, the moment the seventh metal true essence condensed dan, the five spiritual powers of Yang Chen's, began to rotate at a rapid speed.

The fifth earth and the ninth water had not yet condensed dan, the abnormal speed of the operation at this moment, in the dome, a countless amount of spiritual power was absorbed into the body of Yang Chen at an extraordinary speed.

Almost in the time for half a column of incense to burn after the seventh metal true essence condensed dan, the two small Jiedans began to condense, the two spirit powers of the fifth earth and the ninth water, at this moment, Yang Chen took advantage of the situation to condense all his spirit powers.

Gongsun Ling was shocked by the powerful spiritual power radiated by Yang Chen. She didn't know what happened. She just thought that Yang Chen's seventh metal spirit power has already condensed, but she didn't want to think about it too much. Yang Chen's seventh metal spirit power dan, how could it bring such a huge shock of spiritual power.

The five golden dans of Yang Chen formed a complete pattern of five elements and began to rotate wildly in Yang Chen's Dantian.

After a while, the five golden dans that were rotating seemed to be unsatisfied to stay in the dantian, they kept rotating and slowly began to rise along the vein until they stopped at the chest. Instead of spinning fast, it changed to a slow rotation in the direction of the five elements.

In his sea of consciousness, once again, changes had taken place. There was a thunder like explosion in Yang Chen's mind, his sea of consciousness had already reached 244 acres, but it had now crazily expanded to a radius of 300 acres and the height was doubled directly.

The thickness of the seventh metal layer was extraordinary, even if it was hidden under the layer of the fifth earth, it still faintly radiated a golden light. The fifth earth layer had also undergone a change on the land, it was no longer a plain, but a variety of forms like mountains, hills, valleys, plains, deserts and everything had formed.

Not only that, but with the ninth water spirit power condensing dan, there were now two large rivers across the fifth earth, which originated from the highest mountaintop and were divided into two directions, each flowing to the surrounding ocean.

His spiritual awareness was even more crazy, it had already reached the middle Dacheng stage. Now it had climbed all the way, it climbed to the peak middle Dacheng stage then it stopped. Although it was no longer possible to break through in this realm immediately, there was still a lot of remaining spirit power and it was starting to be madly concise in this realm until it could no longer be concise.

Only until now was Yang Chen able to return to normal from the state of cultivation. Immediately, he noticed the surprise and worry of Gongsun Ling so he quickly explained "Senior sister, I am fine, my seventh metal spirit power has already condensed."

Gongsun Ling suddenly rejoiced, when Yang Chen's ten spiritual powers reached the foundation stage, Gao Yue and Gongsun Ling knew that Yang Chen had several spiritual powers and they were also clear on what he wanted to do.

Without giving any input, Yang Chen's thoughts were all whimsical. How could you have all your spirit powers condense dan? It was totally different to build the foundation and to condense the Dan.

However, Gao Yue and Gongsun Ling never doubted what Yang Chen could do. When she heard Yang Chen telling her that he had condensed it, Gongsun Ling still showed a happy smile.

Chapter 367.1: Magic Weapon Upgrade

The seventh metal spirit power dan took all the spiritual powers of Yang Chen to complete. After completion, Yang Chen immediately noticed the difference.

The spiritual power in his body was almost breaking out of his body, it felt like the signs that would happen when he was about to form his Nascent soul in his previous life. But at that time, it would only be felt when he was at the peak Jiedan stage. Now Yang Chen's most powerful spiritual power was only in the early Jiedan stage and it had reached such a point already.

The seventh metal true essence was now more comfortable to control and the seventh metal true essence that came in from outside the golden bell was not so unacceptable. Even without the filtering of the dome, he could now withstand it.

However, there was too much seventh metal true essence liquid outside, even if Yang Chen kept constantly gathering it into the gourd for a full four months, he could only collect the seventh metal true essence as much as the first wood true essence spiritual solution in the past.

Yang Chen used his spiritual awareness which had just had a breakthrough and quickly explored the margins of this place. This space was a full hundreds of square feet and the depth was also hundreds of feet. Compared to the first wood true essence spiritual solution under the banyan tree, he didn't know how many times it was bigger by.

After absorbing so much seventh metal true essence liquid, the gourd had formed a small lake of seventh metal true essence liquid. Even if it was added to the mountain river geographical map, it would only be a small part in the space.

After all, the mountain river geographical map was not a real metal attribute magic weapon. It was only to enhance the power of the mountain river geographical map, it could not truly refine the seventh metal true essence. All in all, Yang Chen was still needed to handle it.

As Yang Chen continued to control the golden bell with the seventh metal spirit power dan, the golden bell seemed to have upgraded a rank. In the heat of the moment, Yang Chen began to use the seventh metal true essence to sacrificially refine the golden bell.

At the time when Yang Chen was in the treasure house of the Dragon Palace. With the vast spirit power of the East China Sea, he was only able to be recognised as the master of the golden bell. It was impossible to talk about him sacrificially refining it there. However, when he was acknowledged as the Lord, Yang Chen used a huge spiritual power to light one of the nine dragons imprints.

It was precisely because of this lit dragon pattern that the golden bell had the power to shake the soul and send a person into shock. When the bell rang, people who did not have a strong enough sea of consciousness would almost faint immediately.

Now there was a much larger seventh metal true essence liquid on hand and Yang Chen's seventh metal spirit power dan has already been condensed, so it was more controllable for him. He immediately began to sacrificially refine it according to the method recorded by the golden bell at that time.

The seventh metal true essence liquid outside, suddenly seemed to be swallowed by a whale and it quickly rushed toward the golden bell. That speed was simply not the same as before.

The Dragon clan's refining method of the golden bell did not disappoint Yang Chen. The horrible speed of absorbing the seventh metal true essence did not cause any problems for the golden bell. Yang Chen felt that when the speed of absorption was accelerated, the Golden Bell seemed to have a feeling of cheering up.

This was by no means a figment of Yang Chen's imagination. It was true that there was such a feeling. Yang Chen knew that this was not a bad phenomenon. If something could make the magic weapon produce feelings. There was only one reason for it, that was, the existence of a tool spirit.

Right now Yang Chen couldn't communicate with the tool spirit of the golden bell, he could only vaguely perceive the existence of the tool spirit. But this had already made Yang Chen happy again. Even if it was a rotten magic weapon, as long as it had a tool spirit, it was enough to ascend to a very high level. What's more, the golden bell was not a tattered thing, but a good thing that was collected by the Dragon King in the treasure house of the Dragon Palace.

The Golden Bell was like a big stomach king who had been hungry for many years. No matter how much seventh metal true essence liquid entered, it seemed that there was no way to fill its appetite.

While sacrificially refining the Golden Bell, Yang Chen did not forget to gather some of the seventh metal true essence into the gourd. The gourd had been opened to the maximum, and the dome had been placed aside, letting Gongsun Ling live inside, but he was only gathering it under the protection of the golden bell. The speed was more than ten times faster than before.

With the almost inexhaustible seventh metal true essence liquid entering the Golden Bell, the second dragon pattern on the golden bell finally began to change faintly and slowly became clear.

Yang Chen knew that once this second dragon pattern was truly clear, the golden bell would be upgraded to another level and would have another powerful function unlocked.

The nine dragons body protection, which compared to the shield that the golden bell provided now, it was not known how many times stronger it would be. The nine dragons imprint, which was completely composed of seventh metal true essence liquid and condensed into a gemstone, would always linger around Yang Chen. No matter how many spirit power attacks came, as long as they could not break the nine dragons in one attack, these attacks would be absorbed by the spirit dragon and slowly transformed into the power of protection.

Of course, it was only limited to spirit power attacks. Once there was a magic weapon and the like, it would still have to be accepted by the Golden Bell and Yang Chen himself. Although it seemed that the protection was not comprehensive enough, Yang Chen was still ecstatic.

Pure spirit power protection, there was no one in the mortal world that could hurt him with spiritual power. This was true even if several masters of the Dacheng stage joined hands. This was equivalent to giving Yang Chen a life insurance, how could it not make Yang Chen ecstatic.

However, to form the spirit dragon composed of nine gemstones, the amount of seventh metal true essence liquid needed was simply massive. If it weren't for the seventh metal true essence here that Li Changgeng began to accumulate hundreds of thousands of years ago or even earlier, he could not meet such a need.

If everything was to follow the normal cultivation of Yang Chen, maybe he would at least have to reach the spiritual world or even the Immortal world, before this dragon would appear. Yang Chen was now only in the Jiedan realm and he was able to have the spirit dragon body protection. It was simply a super good luck that could not be possessed easily.

This alone was enough to make Yang Chen have enough surprises for collecting Li Changgeng's pulse of seventh metal true essence. This was not because of the seventh metal spirit power dan, but he also got a lot of seventh metal true essence liquid, this could only be described as satisfactory.

However, in addition to ecstasy, Yang Chen could not help but feel fortunate. Fortunately, he had to collect so many good things and opportunities before he could collect this seventh metal true essence liquid. If he came when he had just built a foundation or even earlier and hoped to challenge Li Changgeng, this seventh metal true essence maybe would not have left even a piece of him, he would have ended up like the white bone old demon and his companions.

It seemed that when Li Changgeng left this pulse on the Immortals execution stage to him. It was not entirely well intentioned, there may have been plans for revenge involved.

But now, everything seemed to be completely unimportant. What's important was that Yang Chen didn't die and he also used the pulse of seventh metal true essence to complete so many good things that Yang Chen himself felt lucky. In any case, Yang Chen would like to thank the old man for this surprise.

Chapter 367.2: Magic Weapon Upgrade

This sacrificial refining took a year. Gongsun Ling didn't know what Yang Chen was doing, but she saw that Yang Chen was very focused. She also knew that Yang Chen had important things to busy himself with so she did not disturb him. She just quietly cultivated on the side and by the way, she also acted as Yang Chen's protector.

Of course, in this place except for Yang Chen and Gongsun ling, there was nothing remaining of the other people who fell in the pool. So there was really nothing for Gongsun Ling to protect him from.

Yang Chen's full-hearted commitment was not only to refine the golden bell, but also to improve his cultivation base. In the course of one year, under the encirclement of the vast and remarkable seventh metal true essence liquid, the cultivation base of the seventh metal true essence was also raised to the peak of the early Jiedan stage and it basically had the same strength as the others.

The second dragon on the golden bell finally brightened up. With the low bell sound of the golden bell, the two spirit dragons flew down from the golden bell and were hovering and flying around it.

Two? Yang Chen couldn't help but be amazed. How could there be only two? Wasn't it the nine dragon body protection? Could it be that something went wrong during the sacrificial refining process?

This scene surprised Yang Chen. If it was a mistake, it would really be a waste of time and resources. Such a heaven defying magic weapon would be destroyed by himself.

Yang Chen was anxious, quickly recalling the information that was passed to himself when the golden bell recognized him as its master, to see if something went wrong or if his memory was wrong.

There was too much information passed to Yang Chen on the golden bell and Yang Chen had to organize it for a while. After he understood everything, he took a long breath and relaxed.

This was not a self-cultivation error, but an understanding error. The nine dragons body protection was a nine dragons body protection. It would also appear when the second dragon pattern was lit. However, it was not that the nine dragons would appear at once, but each time a dragon was lit up. Now only two of the dragon patterns lit up, naturally there were only two dragons, everything was normal.

Although not to the level of protection of the nine dragons body protection, but the two spirit dragons, it really surprised Yang Chen. After the two dragons circled outside the golden bell for a long time, they disappeared from the surface of the golden bell. Only when he was attacked would the dragons appear, but the enemy would not be able to see it, only Yang Chen could see them himself.

Now Gongsun Ling, next to Yang Chen was completely unaware of the emergence of the spirit dragons. On the contrary, the mountain river geographical map had shivered a few times. In the view of Gongsun Ling, it was only a small accident in the process of absorbing the seventh metal true essence so she did not care much about it.

Full of joy and watching the spirit dragons disappear on the golden bell, Yang Chen did not stop the Golden Bell's sacrificial refining. The golden bell was still madly absorbing the seventh metal true essence liquid, as if there was still improvement to be made.

This made Yang Chen even more pleased. If he could light up the third dragon imprint, it would not only add a dragon to the body protection, but also stimulate the third function of the golden bell.

The next sacrificial refining was another long and boring process. Fortunately, whether it was Yang Chen or Gongsun Ling, they were long accustomed to such a situation. Cultivation was long and boring, If they couldn't stand the loneliness, then they wouldn't be able to find a way to proceed on the path of cultivation.

However, Yang Chen was destined to be disappointed. In the next year's sacrificial refining, the golden bell absorbed almost twice the amount of the seventh metal true essence liquid it absorbed in the previous year, but never lit the third dragon. Also worse, only one step was remaining, but no matter how hard Yang Chen tried, he couldn't cross it.

Yang Chen knew that this was the limitation of his own cultivation and he may have to wait until his cultivation base was promoted again. But even so, the third dragon pattern was half finished and the dragon pattern was looming, just waiting for the last step to breakthrough. The previous sacrificial refining was not in vain, which was enough to make Yang Chen happy.

In cultivation, Yang Chen was never greedy. If he was able to achieve it, Yang Chen tried to reach it. If he could not reach it, Yang Chen would not be depressed. Maintaining a good attitude was the foundation of cultivation.

No matter how fast the Golden Bell absorbed, it was still much worse than the gourd. The golden bell needed to absorb the seventh metal true essence liquid for sacrificial refining, and the gourd just needed to store it, their speeds were naturally not the same.

In two years, the gourd had already collected almost two-thirds of the seventh metal true essence liquid. Except for about one-tenth of the amount absorbed by the golden bell, all the rest went into the gourd. At the moment, there was a seventh metal true essence lake with a radius of dozens of miles, compared with the first wood true essence solution, he didn't know how many times it differed.

As for the rest of the seventh metal true essence liquid, Yang Chen certainly did not intend to leave it here for the demonic cultivators to find, all of it had to be collected clean. The only thing that made Yang Chen feel strange was why the golden star Li Changgeng would leave this pulse on the land of the

demonic cultivators. Could it be because the nine secluded iron ore mine was the most suitable metal ore mine for producing the seventh metal true essence?

The golden bell could no longer be sacrificially refined, but Yang Chen also had the dome. The golden bell still acted as a buffer for the seventh metal true essence liquid in the periphery, Yang Chen began to refine the dome in it.

The dome had already experienced the heavenly spirit treasure refining secret art third layer and earth fiend sacrificial formation secret art sixth layer sacrificial refining. Now Yang Chen's seventh metal spirit power dan was enough to carry out further refining.

Under the circumstance that there was no need to worry about the lack of spiritual power, the most pure seventh metal true essence liquid had already washed the dome for two and a half years. Now the dome had a seventh metal true essence aura from the inside out.

The heavenly spirit treasure refining secret art fourth layer was completed easily and Yang Chen did not stop. He immediately carried out the earth fiend sacrificial formation secret art sevenfold with eighth layer sacrificial refining.

Perhaps because Yang Chen's cultivation was enough and the seventh metal true essence liquid here was infinitely endless. The earth fiend sacrificial formation secret art eighth layer was almost completed without any effort. After the eighth layer was completed, Yang Chen stopped and carefully observed it.

The entire dome seemed to be completely different from the beginning. Originally it was just a golden hall, and now it was turned into pure gold. Yang Chen didn't even know the actual experiment. The protective power of the dome was at least twice as strong as when he first got it.

Even if it was a master of the Yuanying stage, he would not necessarily be able to break the protection of the dome. This was not counting the seven steps inside. After such a refining, the swords inside had undergone a radical change. Their power was greater than ever, more than twice as much.

If he was to add the power of the array, the current formation, even if it was a master of the early Dacheng stage who came in, he would not necessarily be able to retreat. If Yuanying masters came in they would die, there would be no accidents.

Chapter 368.1: Demons Slaughtering Gods Formation

With the golden bell and the dome, even if Yang Chen could not use the bloody river, it could be said that he would be safe and sound in the mortal world, there would be no more life threatening situation for him.

In this way, the quenching time of the knives could be longer. As the life source magic weapon, the longer the tempering time, the closer it was to his spiritual awareness and the more control he would have, the more convenient it would be.

After the completion of the refining of the Dome, Yang Chen calculated the time. He and Gongsun ling had been in this space for three years.

In the past three years, Gongsun ling has been closely guarding Yang Chen and Yang Chen has not even said a few words with Gongsun ling, this made Yang Chen feel somewhat guilty.

There was still a small part of the seventh metal true essence liquid left, it was estimated that it would be fully gathered in a few months. Yang Chen had no other cultivating plan for the time being so he simply pulled Gongsun ling and began to have double cultivation with her.

Gongsun ling would not refuse any request from Yang Chen. In fact, when Gongsun ling was posing as Yang Chen's concubine, she had already placed herself as a woman of Yang Chen. Even the most shameful thing, Gongsun ling, has never refused, let alone having a double cultivation with him.

Yang Chen's spiritual awareness was greatly advanced because of all of Yang Chen's five elements reaching the level of the peak dacheng stage. It must be known that Yang Chen's improvement in his spiritual awareness was not as easy as the early Jiedan stage promotion to the middle Jiedan stage. From the mid middle dacheng stage to the peak middle dacheng stage has definitely exceeded the promotion from the early Yuanying stage to the peak Yuanying stage.

Gongsun ling was the first to feel this kind of terrifying improvement. Her spiritual awareness, after the double cultivation with Yang Chen had once again raised a small level and reached the level of middle Yuanying stage. At the same time, the conciseness of the sea of consciousness was so shocking to Gongsun ling, the mysterious cultivation of her beloved was even more surprising.

Of course, the smart Gongsun ling would not ask anything else and she would not even ask where these seventh metal true essence liquids were from. She only knew that this time, not only has Yang Chen, but even she has received huge benefits, Yang Chen would certainly not short change his own people, which was enough for her.

Originally, according to Yang Chen's plan, after collecting the remaining seventh metal true essence liquids, he would take Gongsun ling back to the Pure Yang Palace and plan how to weaken the Greatest Heaven Sect in secret. However, after all the seventh metal true essence liquids were collected by the gourd, Yang Chen's subconscious mind swept around and suddenly his eyes froze in the air and he could no longer remove his eyes.

Gongsun ling also hoped to follow Yang Chen for them to depart when she saw Yang Chen's appearance. She didn't know what happened, she looked down at Yang Chen's gaze. It's like he turned into a fool, hanging in the air, not moving.

Below this space, after all the seventh metal true essence liquid has been collected, it did not appear to be a level, but became a hard ground all over the various corners. The most striking thing was that the so-called angular corners were simply crystal stones that exuded an incomparably pure seventh metal true essence aura.

Under the seventh metal true essence solution, there were seventh metal crystal stones. Even though Yang Chen's past life memories contain countless extraordinary scenes, Yang Chen still has not been able to completely control his emotions after watching so many seventh metal crystal stones.

His spiritual awareness penetrated the crystal stones and soon found the bottom. The seventh metal crystal stones were much less than seventh metal true essence liquid, the total height was just over twenty feet.

This was the gradual accumulation of the seventh metal true essence liquid here, after it became more and more concise more viscous, finally it could not continue to remain liquid, so the seventh metal true essence liquid under pressure began to consolidate into the crystal stones.

A seventh metal crystal stone, which contains the seventh metal true essence, was almost 100 times the same volume of seventh metal true essence. So these many seventh metal crystal stones were almost more than all the seventh metal true essence solution collected by Yang Chen.

This time, Yang Chen certainly would not leave. Good things could never be left to the demonic sects, Yang Chen was just having the same feeling as Gongsun ling, they cheered together, quickly landed on the crystal stones, and began to quickly gather the crystal stones in their storage ring.

The spar-like seventh metal crystal stone was more stable than the seventh metal true essence solution and it was well stored, there was also a benefit. It was not like the seventh metal true essence liquid that exudes the fierce seventh metal aura that would crush people who were having slightly lower cultivation base. The seventh metal crystal stone does not have this problem at all and it could be gathered easily.

Yang Chen even thought about what his seventh metal flying sword would be. The Blade, which was the original universal sword, was essentially a metal attribute one. After the knives were quenched by the bloody river, they would be soaked in the most pure seventh metal true essence liquid, plus some four seas mysterious coral liquid for depositing all the impurities, it would become a pure seventh metal true essence.

The original sword was only made by a Jiedan stage refiner. Although the technique was ingenious and it had unlimited growth, the material was slightly insufficient and the skill of quenching was not enough to remove all the impurities.

When Yang Chen disassembles the material of the dome hall and then blends it into the scented knives to sacrificially refine it, it could be a high-quality seventh metal flying sword. Even if there were still impurities, it would not be too much trouble.

Now with these seventh metal crystal stones and seventh metal true essence liquid, he would not care about these problems. He believed that if it was a piece of iron, after the quenching of the seventh metal true essence liquid and after polishing it with the seventh metal crystal stones, it could also become the most original seventh metal material. Inadvertently, this trip had even solved one of the Yin-Yang five elements flying swords of Yang Chen, how could he not be delighted?

Yang Chen and Gongsun ling's spiritual awareness double cultivation lasted for about three or two months, they also gathered the crystal stones which also lasted another three or two months, now they have wiped out this huge space clean.

Of course, all the arrays were not destroyed by Yang Chen. Here, there would be a huge collection of the seventh metal true essence in the huge nine iron mines. It would slowly form to such a scale, but that may be a long time. These have been going on for 100,000 years or more.

There was no longer something left for Yang Chen to stay here. After a careful investigation, Yang Chen took hold of Gongsun ling's waist and flew up, he also made the same secret technique as before. The square hole was once again on the top of their head, Yang Chen and Gongsun ling rushed directly into the buffer liquid at the beginning.

It's exactly the opposite of when they come in, except that the hole opens from the bottom. Every time he opened one, Yang Chen and Gongsun ling rose into a space. After one day and one night, the figures of the two returned to the ground above.

Chapter 368.2: Demons Slaughtering Gods Formation

As soon as they got out of the hole, Yang Chen and Gongsun ling noticed that there was something different. The mountain where the hole was located has been firmly blocked in a huge array. When the two got out of the hole, they disturbed a restriction and launched the formation.

Bang, an overwhelming attack, unrelentingly attacked Yang Chen and Gongsun ling and there was no plan to show mercy. It seemed that the plan was to kill Yang Chen and Gongsun Ling.

"The demons slaughtering gods formation?" Yang Chen's mind immediately flashed the name of a formation.

This demons slaughtering gods formation was one of the most powerful demonic arrays in the mortal world. It had a powerful attack and was rare in the mortal world. However, it was not so easy to arrange this formation. If nothing else was mentioned, the material needed for the formation was enough to make a medium-sized sect bankrupt.

This was not to mention the masters to be dispatched during the process of deployment. If you wanted to successfully arrange such a formation, you need to cooperate with at least twelve Yuanying stage masters. The arrangement of several key points required uniform action and unified spirit power control. If it was not well-trained masters, it could never be completed.

Not only that, in the process of launching, it was necessary to cooperate with these 12 Yuanying stage masters to control the trend of the battle. Once someone brake the rhythm of the formation, the result was that the whole formation would unleash a backlash and perhaps the controllers of the array could survive, but the formation would soon collapse because of its uncontrollability.

Even with these materials and masters, it would take at least a year to complete the entire formation. This formation was known to have a powerful attack, but there was a fatal flaw, that was, it could only attack the enemy within a dozen square feet of the center of the array. If the enemy escapes from within this range, all attacks would fail.

It was for this reason that the powerful demons slaughtering gods formation, to a large extent was just a chicken-like array and few people would use them in actual combat.

However, the situation of Yang Chen and Gongsun ling was different. When they entered the hole from here, they must have been seen. They knew that they would not come out in a moment and those people arranged the array outside, as long as they open the hole, it would trigger a restriction and launch the formation.

Yang Chen did not expect it at all that the other party would use this level of formation to attack himself and Gongsun ling. How much hatred does this person have to think about killing him to the point where there would be no residue left?

Now Yang Chen had no time to consider what the motive of the person was. Yang Chen brought out the golden bell out and covered himself and Gongsun ling almost immediately.

In the heat of the moment, Yang Chen's second action was an instant, Gongsun ling was sent into the medicine garden and then he opened the dome hall, at the same time he launched his body refining technique, quickly upgraded his body to the extreme.

When his figure was doing all this, there was no slight stop and he rushed toward the direction in any direction. As only a dozen or so squares was the attacking range of the demons slaughtering god formation, as long as they rush out of this range, they could break away from the attack of the formation.

Numerous rays of light came to Yang Chen, who was flying in the air. Yang Chen was moving very fast and could not escape this carefully prepared attack.

Bang, Yang Chen's body was wrapped in countless rays, the center of the whole array exploded like an atomic bomb. In a flash, the top of the area was flattened. Yang Chen's figure disappeared directly into the dazzling light and the overwhelming smoke.

Far away in a corner of the formation, Shao Fanghua's shape quietly appeared, followed by two little gimmicks, almost silently watching the movement here.

"He finally came out." Madam Fanghua spit out these words in her mouth and then she seemed to have lost something she loved, she sighed slightly "Unfortunately!"

It was a pity that the two words have just been spoken and the situation there has suddenly changed dramatically. A dull bell rang suddenly and then dozens of ray of light flashed, especially in the smoke in the sky.

"What is that?" Madam Fanghua's eyes turned into a surprise and there was a little more trembling in her tone. The two little girls were close to her so they could see her body and it seemed to be shuddering.

When the light was approaching the golden bell, the figures of the two dragons suddenly flashed into appearance and quickly hovered in the air blocking the light.

Among the brilliance of the sky, there were also dozens of sharp flying swords, almost indiscriminately squatting on the golden bell.

In the bang, the spirit dragons could not intercept all the light, a small part broke through the defense of the golden bell and rushed to the periphery of the dome.

Puff, like the sound of a sharp weapon piercing into a tofu, after a series of sounds, on the outer wall of the dome, there were countless small pits. Dozens of rays passed through the four portals of the dome and they flew toward Yang Chen in the center.

Bang, Yang Chen's body was finally attacked directly and a clear sound like a metal striking against metal was heard. More than the steel on the skin, there are dozens of blood spots in an instant. In his meridians, dozens of subtle spirit power spears rushed in and began to destroy Yang Chen's body.

The five elements golden dan, plus two in the dantian, seven golden dans were spinning wildly and dozens of the spirit power spears were scattered in the seven golden dans, each Jiedan, but with only a few revolving, all the spirit power spikes slowly disappeared under a laborious rotation.

Even so, Yang Chen could not fully withstand this horrifying blow. A blood spurted out of his mouth and his internal organs were injured. Although all the attacks were taken, his whole body was like a sieve at the moment, it was full of holes.

Compared with these spirit power attacks, the attacks of more than a dozen flying swords mixed in it were simply weak and messy and were directly blocked by the golden bell.

Fortunately, Yang Chen's flying figure has not been affected. It was only during this time of the attack that Yang Chen has already left the attack range of the formation.

It was not the style of Yang Chen to be idle when he was attacked. When he left the area, Yang Chen puts out the seven-step illusion of the dome's hall, and the flying swords. The swords that have been smelted have been flying around. At the same time, the attack of the other flying swords was absorbed by the golden bell and a dull bell rang out, spreading toward the surrounding.

Chapter 369.1: Escaping Together

The demons slaughtering gods formation was a pure attacking formation. For those who controlled the array, if they were unsuccessful, they must face the enemy's crazy counterattack. However, there were very few cases in which the enemy has a counterattack after attacking the enemy. At least so far, there has not been such a precedent.

The formation was not only having the attacking strength of the twelve Yuanying stage masters, but the hundreds of top grade spirit stones used in the array, which added up to the consumption of a few pounds of the top grade spirit stones. With such a huge spirit power attack, the twelve Yuanying stage masters were only the target of controlling the attack.

From the news that was obtained before, among the people who entered the cave, the one with the highest cultivation base was the white bone old devil, his level was at the peak Yuanying stage. The others were not Yuanying stage masters, they were Jiedan stage masters. It seemed that Yang Chen and Gongsun ling had the lowest cultivation base among them.

Even if these people work together, it was impossible to take a blow from the formation. From the disappearance of them to their re-emergence in the past three years, even if the white bone old demon with the highest cultivation base had any fortuitous encounter and he was promoted to the dacheng stage, it was impossible to take this attack, not to mention that there has never been a yin fire tribulation which has appeared around, so the white bone old demon could not have entered the dacheng stage.

Because the distance was close, the masters of the array was very clear. The two people who came out, all of whom were known, were the ones with the lowest cultivation base, Yang Chen and Gongsun ling.

The twelve Yuanying stage masters could even take them down as long as they collectively come forward. However, the restrictions on the formation was launched so it was beyond their control, they could only control the formation to land the attack on Yang Chen and Gongsun ling.

Yang Chen's reaction was fast enough to step forward and get out of the attack, but this was impossible. The twelve Yuanying stage masters watched the spirit power attack of the formation falling on Yang Chen's body. All of them had a feeling of killing a chicken with an oxen knife. It was a waste of the strike of the formation, now they had to add more spirit stones, to attack the next master who came out.

No one would have thought that a little guy in the early Jiedan stage could still survive this attacks. It was precisely because of this mentality that they did not even believe in the reaction of the flying sword that was attacked.

A flying Sword certainly couldn't break the defense of the golden bell, but no one cared. Yang Chen was a descendant of a big family master. It was normal to have some powerful protective weapons. It was very common for it to be able to stop flying swords attack. But no matter what the magic weapon was, it was impossible to block the attack of the formation.

No one would have thought that there would be such a perverted thing as the golden bell left by the dragon clan in the mortal world and no one would have thought that Yang Chen, in addition to the golden bell, had a metal attribute dome that could be used as the second layer of protection. Of course, the most unlikely thing was that there would be a cultivation method of the Immortal world in the mortal world. The heaven defying body refining technique also appeared on Yang Chen's body.

All this unexpectedly led to a very serious consequence. When the bell rang, everyone did not have any precautions, including Madam Fanghua, who was far away.

With just a low bell sound, the twelve Yuanying stage masters who controlled the array, without any reaction, were stunned by the bell. When they have not yet fallen to the ground, they were greeted with seven hundred and forty-nine golden flying swords.

At the moment of being killed, Yang Chen also saw the true faces of the twelve Yuanying masters. What surprised Yang Chen was that these masters turned out to be the female dancers who showed Yang Chen and Gongsun ling the performance of the heavenly demon's alluring dance that day, just like ordinary people.

That day, Yang Chen was faced with twelve Yuanying stage masters. Once they attacked, Yang Chen and Gongsun ling were likely to become two dead bodies in an instant.

These twelve people also let Yang Chen know who was behind the scenes of this formation. Except for Madam Fanghua, there seemed to be no one else.

Speaking of it, Madam Fanghua was also the deepest hidden one. On that day, even the white bone old demon could not hold back and hurried his appearance, but Madam Fanghua had been tolerating to the end, and did not even use a trace of her spiritual awareness to explore the situation.

Perhaps Madam Fanghua knew that the last person who laughed was the real winner, so she has been patiently waiting outside, waiting for the people entering the hole to appear. The purpose of arranging the formation was that no matter which person came out, they must be killed by her, and the things they got would belong to her.

The abacus played out well, but no one would have expected that Yang Chen would not be defeated by the formation, but instead he had the means to counterattack.

When the golden sword light in the sky began to fly, Masam Fanghua, who was far away looking at it, fled without hesitation and even the two little girls behind her couldn't take the lead. As for the others, it was even more so. At this time, how far could they escape?

He could withstand the demons slaughtering gods formation and even counterattack, instantly killing her twelve Yuanying stage female apprentices, no matter who he was, he was not someone she could take on. Even in her own heyday, facing the twelve Yuanying stage sisters, it would be impossible to kill them in such a simple way. So apart from running away, Madam Fanghua did not have any other ideas.

Far away, Madam Fanghua did not see which master appeared. The most likely thing was that there was a super master here and Yang Chen went down to get help to save him. When the master escaped from the seal, he was attacked and under anger, he attacked and killed.

Apart from this explanation, Madam Fanghua could not think of any other possibilities. If there was anything else possible, she saw two figures at the time, maybe there were two masters, the difference was nothing more.

When she run away with her life, Madam Fanghua in the next decade, no longer dared to show her face, no one knew where she went, it was not even known if she was alive.

Everyone had only one guess. After Madam Fanghua and the white bone old demon have teamed up to attack Ye Zhenxiong of the Limitless Demon Sect, they were afraid of the revenge of the Limitless Demon Sect, so they were completely hiding, but no one knew exactly what the truth was.

When Madam Fanghua fled, would there be other people who dared to stay in the same place, the time, the people who were originally arranged, fled in an instant, the wolf rushed, the disappearance was clean, except for the twelve beautiful Yuanying stage masters dead bodies, there were no other things remaining.

Yang Chen endured the pain and issued this attack. Then his whole body seemed to be emptied and there was no strength left in him. Using his remaining will to release Gongsun ling, he only said one sentence "Escape!" before he directly fainted.

When Gongsun ling appeared, she saw the surrounding scene. Yang Chen's whole body was the appearance of blood, Gongsun ling was frightened to her soul.

Chapter 369.2: Escaping Together

Fortunately, Gongsun ling was a cultivation genius. Similarly, she was also a good observer. When she came out, she found that Yang Chen was seriously injured. She was about to run away according to Yang Chen's instructions, but her eyes swept around and she found the strangeness around her.

Everyone was at large and there was a pile of corpses on the ground. From the degraded beautiful 'females' heads, she could also recognize that it was the female dancers who performed the heavenly demon's alluring dance and Gongsun ling immediately knew the identity of the opposite. At the same time, there was one more judgment made by her on the situation at hand.

Gongsun ling did not know what kind of attack Yang Chen faced, but she also knew that Yang Chen's injury was not from an ordinary attack. The role of the golden bell when Yang Chen and her were having spiritual awareness double cultivation, it introduced through her mind, but they could break through the protection of the golden bell and even hurt Yang Chen. It was definitely a powerful means of attack.

This formation did not kill her beloved, but her beloved killed the 12 masters, the other side desperately fleeing was a normal phenomenon.

If Madam Fanghua knew that Yang Chen only had the strength to attack once, she would definitely regret why she ran so fast and couldn't wait until the result appeared.

Since it was such a situation, Gongsun ling was not so anxious to escape, but first she had to check on Yang Chen's injury and provide him with some medicinal pills, then she quickly kpet the twelve masters in her Qiankun bag, the things on the ground that were valuable in the formation was also taken, then she summoned the ship and left with Yang Chen.

For a long time, the top of the five-peak mountain meeting became a destination for many people to explore. Countless people used a variety of methods to try to find the square 'hole' that once appeared, but no matter how hard they tried, they couldn't find a trace of it.

Some masters broke into the ground for thousands of feet, but they still didn't find anything. In the end, they could only leave. However, there were still many people who didn't give up. They spent a long time squatting around, waiting and mining, finally forming a small town and a square city here, which was very lively.

Yang Chen certainly didn't know about this. Although he was still muddle headed, his aura was not weak. After taking the medicinal pills, his wounds healed slowly. Seeing this scene, Gongsun ling relaxed a lot and she controlled the ship, she ignited the fastest speed and quickly flew in the direction of going home.

The ship also referred to the same design as the shuttle. As long as a spirit stone was inlaid into the middle of a certain array, it could automatically extract the spirit power in the spirit stone for flight, without the attention of Gongsun ling.

Gongsun ling's concentration at the moment was all on Yang Chen's body. The wound was carefully cleaned and then bandaged. Then Gongsun ling began to carefully examine Yang Chen's internal organs.

When her spirit power penetrated into Yang Chen's body, Gongsun ling was shocked. In the body of Yang Chen, almost everywhere was wounded. Fortunately, the injury was slowly recovering under his powerful body, Yang Chen was only affected by the impact of the injury and he fainted because of the injury, the problem was not big.

After waiting for a while, when the healing of the medicinal pill was almost completed, Gongsun ling once again gave a medicinal pill to Yang Chen. This time, shortly after Yang Chen took it, he quickly woke up.

With the help of Gongsun ling, Yang Chen sat up and then understood the situation of the two. In this regard, Yang Chen was temporarily unable to change anything, now the most important thing was to heal his injuries immediately.

Fortunately, although Yang Chen's body injury looked very serious, most of them were only skin wounds. The spirit power spikes that actually invade his internal organs have been absorbed and refined by the seven golden dans. The internal organs injuries looked scary, but it was not very serious.

In this regard, Yang Chen has the best healing medicinal pill'. After Gongsun ling found a hidden place to stop, Yang Chen only needed a month and he would be able to completely cure the wound in his body.

Gongsun ling finally knew what kind of terrifying attack Yang Yang was facing at the time, especially after listening to Yang Chen's narrative and then seeing the attacked pitted dome, she felt even more

fear. She almost cried out with Yang Chen, it took her half a day to return to normal under Yang Chen's soft voice.

When Yang Chen recovered, he naturally had no fear, the two directly took Yang Chen's shuttle and flew in the direction of Pure Yang Palace. In order to add some content to the mountain river geographical map, Yang Chen deliberately chose a completely different route from the time of their coming. It was a large circle around, but it could add a lot of geography to the map.

But in any case, this trip was an unforgettable experience for Gongsun ling. Especially the disguise of being Yang Chen's concubine and Madam Fanghua's wits and bravery, made Gongsun ling's memory still fresh. Every time she thought about it, she always had a red face, she was still infatuated with Yang Chen's affectionate actions. The feeling, sometimes she felt like huddling in Yang Chen's arms, to have a long dream and never to wake up.

This experience has made Gongsun ling more open-minded and found her many shortcomings. The more infatuated she was with Yang Chen, the more clear minded Gongsun ling was, the stronger she must become, otherwise she would not be able to keep up with the pace of Yang Chen's advancement, so her will became firmer.

As for the escaped Madam Fanghua and her sect the Yin-Yang Demon Sect, they quietly boarded the killing list of Gongsun ling in her heart, especially Madam Fanghua. Perhaps now she would not be able to kill Madam Fanghua, but Gongsun ling has vowed that one day, she must kill Madam Fanghua who gave Yang Chen and herself a bad time.

From the Pure Yang Palace to this side, when they came, they spent 'a full six months' time and they went back to a big circle, but it took three months.

Yang Chen chose this route, there was not much danger on the way. After Yang Chen again condensed dan, Yang Chen's cultivation base was once again upgraded and the shuttle was also faster, enough to throw any threat away behind him.

Of course, on the way back, Yang Chen and Gongsun ling were not idle. Gongsun ling was more energetic to cultivate, Yang Chen was no exception. Yang Chen started to fuse some of his fire seeds.

After they returned to the domain of the Dao Sects, Yang Chen stopped after he absorbed two kinds of fire seeds, and began to ponder what kind of method could be used to make the Greatest Heaven Sect to swallow the bait, while also allowing the Blue Cloud Sect's master and the Green Jade Immortal Island's master to clear the masters who did not listen to their instructions in the sect.

As they got closer and closer to the sect, Gongsun ling's performance with Yang Chen seemed more and more distant, she seems to be afraid of others seeing something, her face became serious as if she was cultivating diligently, which made Yang Chen look a bit worried.

In any case, he had to first return to the 'sect' to see his Master.

Chapter 370.1: Sect Conditioning

The return of Yang Chen and Gongsun ling really made Gao Yue happy a lot. Especially after Gao Yue learned that Yang Chen had condensed another spirit power, she was even more happy, as if Yang Chen's realm promotion was better than her own promotion.

However, when Gao Yue looked at Gongsun ling, there was always a trace of an elusive feeling about her. As if she hasn't seen Gongsun ling in general, she was very focused on watching her for a while and after seeing the red face of Gongsun ling, she laughed and took Gong Sunling away. Yang Chen didn't know what the two women were going to discuss.

After coming back to the sect, Yang Chen, of course, went to see his master ancestor immediately after he finished with his master. Wang Yong has been busy preparing for the refining of the dragon's horn flying sword with Gao Yue and all the materials were in preparation. This was not something that could be done in three or five years. Even with the output of the hundred thousand mountains, some things could not be made available overnight.

Fortunately, the most important material, the dragon's horn, was already in place. All the accessories that were needed, even if it was precious, it could be purchased with spirit stones. For the current Pure Yang Palace, the problem that could be solved with spirit stones was not a problem.

What Gao Yue was going to do now was to use her own spiritual awareness and spirit power to wash on the two dragon horns, and put on her own imprint in it as much as possible. After all, Gao Yue's cultivation base was only in the Jiedan stage. In the face of the high-grade material such as the dragon's horn, it was also a bit of a force. It could only be slowly refined with this kind of patient and persistent work.

Fortunately, this method not only does not delay cultivation, but also has great benefits for cultivation. Constantly scouring the dragon's horn means that Gao Yue has to keep her spirit power running constantly and her spiritual awareness had to flow also. This was an almost sleepless cultivation.

When Wang Yong saw Yang Chen, at a glance he saw that his cultivation had an improvement. In front of his own master ancestors, Yang Chen was undefended and he did not think about deliberately concealing his cultivation.

"Good job, continue to work hard!" Wang Yong said to Yang Chen, it could almost be described as a satisfactory one. Looking at Yang Chen's promotion, he made a short compliment.

Yang Chen also had to pay a visit to the palace master, this was the routine homework after each return. However, compared with before, this time it seemed that Yang Chen did not do anything earth-shattering, but it was very strange to the palace master.

Every time Yang Chen goes out and came back, there would always be some shocking news. This time, there was no such thing. It was not strange for the palace master thinking like this.

Yang Chen and Gongsun ling agreed on the road. This time, for the time being, except for Gao Yue, they would not tell anyone about the events. Gongsun ling was enjoyed about the feeling of having a common secret with Yang Chen, of course, she agreed and nodded.

More than three years after the two left, some arrangements of Pure Yang Palace have already entered the right track. In particular, the plan to develop their power in the secular world has now been implemented.

Every country in the secular world has already had the peripheral forces of the Pure Yang Palace operating in them. In each country, there were two or three families that were originally developed by the servants of the Pure Yang Palace. With the support of the Pure Yang Palace, these families have successfully opened the situation and stood on the heels.

They didn't show too much of their rich side, although they could do it easily. On the surface, they only had a certain influence on the land of management, and they did not show their silent development.

In the past few years, the Pure Yang Palace has received a lot of talented disciples. Some disciples were definitely found in the crowd that the former cultivators would have never thought of, such as beggars, slaves, businessmen, officials and so on. The spiritual roots of these disciples were almost all over 70. Compared with the previous ones, as long as they could surpass 40, they were forced to enter the sect.

When they thought of the other sects, no matter whether it was the Greatest Heaven Sect, Blue Cloud Sect or the Green Jade Immortal Island, the disciples they recruited were all left in their own ancestral halls, the feeling was not normal. Although the master of the palace also knew that these large sects must have their own channels for recruiting disciples, some disciples with excellent qualifications were willing to go to these large sects, but this does not prevent him from being happy in secret.

The hundred thousand mountain was getting on the right track. After decades of operation, the forces of the Blue Cloud Sect, Green Jade Immortal Island, Pure Yang Palace and the Beast Taming Sect Baguio have been rock solid, and no other forces of all sizes could be inserted. Every year, the huge benefits brought by the hundred thousand mountains have made the head of the palace very happy.

The blue vault mountain Immortal's cave has always been under the control of the master of the palace. So far, there have been thousands of loyal disciples who have been tested in the Immortal's cave. There was Yang Chen's inner sensing pills and a lot of other medicinal pills. The cultivation of these disciples was improved thousand miles everyday and the strength of the Pure Yang Palace was also flourishing.

This was not considering that the Pure Yang Palace had cultivators promoted to the Yuanying stage, they also recruited eight Yuanying stage monster cultivators to join the hall of eccentrics in the Immortal's cave and Wang Yong also crossed his tribulation into the dacheng realm, the status of the Pure Yang Palace almost already could be said to be as stable as Mount Tai.

It should be known that there were many monster cultivators from the beginning of the qi refining stage to the dacheng stage in the blue vault mountain Immortal's cave, and the Pure Yang Palace now has a systematic cultivation method of the monster race, which has drawn many monster cultivators. Now, they were just waiting for the Greatest Heaven Sect to solve the troubles of those rumors. When they were recruiting the monster race, the Pure Yang Palace could slowly expose the power of these monster cultivators.

Wang Yong and the old tree demon, was behind the portal of the master of the dacheng stage in Immortal's cave. It was said that the one of the monster cultivators dacheng stage master was in persuasion to join the sect. After such a long time, the three masters stopped. There has been some

sorrowful taste, and it would not take long for the Pure Yang Palace to have the third master of the dacheng stage.

Externally, their relationship with the Blue Cloud Sect and the Green Jade Immortal Island was getting closer and closer and the cooperation between the two sides was getting a more and more tacit understanding. Even if the Greatest Heaven Sect was now determined to desperately want to wipe out the Pure Yang Palace, it would not be so easy. Even if the relationship between the two major sects with them was not considered, the strength of Pure Yang Palace could make the Greatest Heaven Sect pay a painful price.

Everything happened during the short period of more than a hundred years during the period when the head of the palace was in charge. Seeing that the sect was getting stronger every day, this great sense of accomplishment was even better for the palace master than promoting his own cultivation base.

After Yang Chen reported to the head of the palace what happened to him, he said a congratulatory message to the head of the palace. Because Yang Chen has already seen it, the head of the palace was in the middle Yuanying stage previously, but now he was in the late Yuanying stage.

Chapter 370.2: Sect Conditioning

Regarding Yang Chen's vision, the palace master has always been very admiring off. Therefore, when Yang Chen congratulated himself, he was in charge of the accident.

When he thought about the moment he broke through, the palace master still felt very emotional. He thought that his cultivation in this life would stop here, but he didn't think that there would be a breakthrough for him unexpectedly.

Even more so, the palace master was somewhat secretly happy, Yang Chen had given him a beautiful double cultivation partner, she was very obedient so that he could improve every time while he was cultivating, she also had a high quality body and he could enjoy himself.

Here, the master of the palace could not help but sigh at the might of the double cultivation method that Yang Chen left for him. Not only was he able to breakthrough, but even his own double cultivation dao companion Wan Qian who was actually in a passive cultivation state, was also able to breakthrough, she also entered the late Yuanying stage,

This also meant that the combat power of the master of the palace has also doubled. Except for Yang Chen, no one knew that there was a female puppet with him who was quite similar to him in cultivation base. Once he was to make a move, in addition to the master of the palace having a praying mantis puppet, even if he meets a master of the dacheng stage, he would be able to put up a fight.

“When do you plan to deal with the banyan tree Immortal’s cave?” After the palace master and Yang Chen chatted about the effects of a few double cultivation, they transferred the topic to the banyan tree Immortal’s cave.

Even if the double cultivation method was given by Yang Chen, the double cultivation dao companion was also given by Yang Chen, but as an elder and Yang Chen was the younger generation, talking about these topics, the palace master was still awkward, so the topic was quickly changed.

The reason why the palace master asked Yang Chen about the plan was because only Yang Chen has been there and only Yang Chen understood how to deal with it, there was also another reason, that was, Yang Chen was now the young palace master that he and the elders agreed on. Naturally, he also had to bear some of the responsibility of the sect.

“There is no plan yet.” Yang Chen honestly answered and then explained “After the Greatest Heaven Sect’s problem is solved and When other sects follow the trend, when recruiting the monster race, it will take at least ten years or more, when the time comes we will look at the specific situation!”

Although there was already a general direction, but Yang Chen did not have a specific plan. The palace master nodded and approved Yang Chen’s explanation after he heard it. Now the monster cultivators in the blue vault mountain Immortal’s cave have not yet settled. If the Pure Yang Palace was inflated once again, let alone the Greatest Heaven Sect, it was estimated that even the Blue Cloud Sect and the Green Jade Immortal Island would be somewhat cautious.

It was a good thing to think about revitalizing the sect, but the truth was that haste brings no success. The entire Pure Yang Palace was taken into account, this disciple who had this foresight made him more satisfied.

After he said goodbye to the head of the palace, Yang Chen once again returned to his Master Gao Yue. His own four slaves have become inner disciples. For a long time, Yang Chen has not recruited new slaves, although there were countless people waiting for him to pick from. So Yang Chen came to his master and let his master’s servant help him.

Gao Yue and Gongsun ling seem to have talked a lot. Gongsun ling kept her head down and her face was red. When she looked up at Yang Chen occasionally, there was always a complicated and unspeakable shame on her face and then she quickly bowed her head again. And with Gao Yue there was another kind of strangeness that couldn't be said clearly, so Yang Chen was very guilty.

In the external experience, Yang Chen's performance on Gongsun ling also made Gao Yue very happy. Even from her heart, Gao Yue seems to have a little bit of envy of Gongsun ling. At least she could be ashamed but sweetly pretend to be Yang Chen's concubine and be in his arms for a long time.

"In the key moments you also know to protect Ling'er, you know how to be good!" Gao Yue lightly reprimanded Yang Chen and then asked Yang Chen what plans he had next.

About his plans for the Greatest Heaven Sect, Yang Chen would certainly not tell his master and the apprentice sister to let them worry. Yang Chen's answer to his master's question was naturally about his cultivation.

Yang Chen now knew that all his Yang five elements has achieved golden dan because of the three spirit powers which reached golden dan. The Yin five elements now has two kinds of spirit power to reach golden dan, so as long as there was another kind of spirit power to reach that stage, Yang Chen could complete the yin five elements.

Although there would be no other fortuitous encounters in a short period of time, there would not be another discoveries of true essence, but if Yang Chen was to spend a few years, specializing in a kind of spirit power, he could condense Dan.

This was the plan that Yang Chen told his master, when she heard that Yang Chen could complete his full attribute condensation, even Gao Yue could not help but be amazed. When she was shocked, she still felt a little unbelievable.

This was the result of Yang Chen not fully telling his master the full truth. Everyone knew that all Yang Chen's spirit power has reached the foundation stage and they thought that it was only the five basic elements, no one would think that Yang Chen was actually talking about the entire Yin-Yang elements. If people knew that Yang Chen was cultivating the full attributes of Yin-Yang, he does not know how many people will be shocked.

Yang Chen would be in the sect for a while and Gao Yue was of course happy. Every time Yang Chen went out, Gao Yue was fearful, but there was no reason to stop him from going out. Staying in the sect would provide him with security and also improve his cultivation, which made Gao Yue very satisfied.

Now what Gao Yue wanted was very simple, as long as Yang Chen could be safe and he was still in front of her own eyes, then it would be better. Anyway, it was better than to go out and be attacked by the demons slaughtering gods formation again.

In the sect, Yang Chen also relaxed for a few days and then directly went to look for Shangguan Feng. Nowadays, the shop operated by Shangguan Feng was not like the previous shop, but a big shop that could compete with the thousand autumn pavilion in the market.

The cultivation of Shangguan Feng also entered the late Yuanying stage, and it seemed that it would not be a problem to breakthrough into the peak Yuanying stage in a few decades. With the help of Yang Chen, within a hundred years, he has reached this level. Compared with the previous decades of suffering during the qi refining stage, Shangguan Feng could now be said to be no worse than those with good aptitudes.

After finding Shangguan Feng, the first thing Yang Chen did was to double the reward for the Greatest Heaven Sect's Yang Lan. Up to now, no one has come to receive the reward. Naturally, no one has succeeded, but he was afraid that it would be related to Yang Lan's stay in the Greatest Heaven Sect. Every day reminding the daring of fear of others assassination, Yang Lan was also estimated to be tasting the same bitterness as Yang Chen in his previous life.

By doubling the rewards, there would be more people who would naturally be tempted and Yang Lan was likely to live in more horror. This gradual increase in fear was the beginning of Yang Chen's revenge. For the time being, Yang Lan would not worry about the people in his sect, but when the reward came to a new height, even if there was a sect rule that they couldn't kill each other, maybe someone would take the risk.

At that time, it would be the beginning of Yang Lan's real fear.
