Chapter 416.1: Sea Of No Return

“Here is the sea of no return?” Gongsun Ling looked at the endlessly calm sea, it was impossible to associate this tranquil sea with the dangerous name of the sea of no return.

Hou Yun frowned, staring closely at the bottom of the water, as if a ferocious beast would suddenly jump up.

Under the calm sea, there were countless dangerous creatures. Gongsun Ling cannot find them for the time being, but it does not mean that Hou Yun couldn't find it either.

This was just the outermost part of the sea of no return, in fact, they have not yet reached the sea area. Although the sea of no return was only a part of the South China Sea, it also covered a sea area of tens of thousands of miles. They were just now touching the edge.

“Let's be apart here!” Looking at the calm sea, Yang Chen turned his head and looked at Gongsun Ling and Hou Yun and slowly said.

After Hou Yun had completed the 300,000 jin Strength of the body refining technique, Yang Chen and Gongsun Ling Hou Yun stated their intentions, and the three had to act separately. He would go to the depths of the sea of no return to explore by himself and Gongsun Ling and Hou Yun would hunt sea beasts outside.

After hearing Yang Chen's intentions at the beginning, Gongsun Ling's first reaction was to disagree. She meant to die together with him, to go in together. But soon, with Yang Chen's persuasion she agreed with Yang Chen's plan.

There were many things he wanted to say but Hou Yun was here, so Yang Chen didn't say too much, the sea of no return here was definitely related to the Dragon clan, even if it was dangerous, but he believed that he has obtained so many good things from the treasure house of the Dragon Palace, plus there was also a Xiao Tian, so there should not be any problems.

But, if he were to take Gongsun Ling. Yang Chen might not be able to protect her by himself, maybe he would take care of her poorly. It was possible to let Gongsun Ling and Hou Yun stay in his own medicine garden or dome hall, but he didn't know why, Yang Chen always had a bad feeling about it. So this method was abandoned.

For Gongsun Ling and Hou Yun, this expedition to the sea of no return was unnecessary, so Yang Chen didn't want to get them involved.

Originally this was not the adventure planned by Yang Chen, but because of Xiao Tian's sake, Yang Chen had to come to see it anyway. And the closer to the sea of no return they got, the more intense the reaction of Xiao Tian in the medicine garden became, it seems that there was something inside that strongly attracts Xiao Tian to go to the depths of the sea of no return, It was imperative.

Hou Yun was a water attribute cultivator and there was no problem with Gongsun Ling. Originally, Yang Chen planned to give the shuttle to Gongsun Ling, but Gongsun Ling refused. She knew Yang Chen's ability and speed in the water. With the shuttle, Yang Chen's grasp of safety in the sea of no return would be greater.

The two sides parted ways, Yang Chen drove the shuttle and rushed to the depths of the sea. To prevent any entanglement of sea beasts, while Yang Chen was in flight he took out the magic crystal left by Lan Ying.

The dacheng stage crystal. In the ocean, it was a pass-like existence. No sea beast dared to shoot at Yang Chen. The power level that was deeply imprinted in their instinct. The shiver that scared the sea beasts along the road, let alone attack Yang Chen, they did not even dare to show up.

The unimpeded flight along the way was still above the sea at first. But after flying for two days, a huge suction faintly came from below the sea surface, taking Yang Chen with the shuttle and inhaling it into the sea water.

Entering the water, even through the shuttle, Yang Chen could feel the power of the terrifying ocean currents underwater. The horrific ocean current formed for no reason, carrying a force to shred everything and wrap everything, rolled up the shuttle and dragged it to the unknown ocean floor.

With the strong suction in the ocean currents, Yang Chen was drawn into the sea even in the air, barely able to control a few directions, but it was an extremely labor-intensive task.

The Dragon clan's magic weapon was powerful, especially the magic weapon stored solemnly in the Dragon clan's treasure house. Although the shuttle was not a magic weapon for body protection, it was not comparable to the protection of the golden ball. However, when in the water, the shuttle was like a swimming fish. With the state of balance, Yang Chen couldn't feel a bit of dislocation.

The shuttle's performance calmed Yang Chen's heart and confirmed his previous guess. The sea of no return, it was definitely related to the Dragon clan. This was undoubtedly, the dragon clan magic weapon that Yang Chen guessed could also pass through here, which has also been confirmed by him.

The ocean current has a certain law. It seems to flow in a certain direction. Yang Chen tried to control the shuttle and changed it in several different directions and he determined this. In the end, he simply gave up controlling the shuttle and allowed the current to take him in a certain direction.

Even in such a terrifying ocean current, Yang Chen detected the existence of countless powerful sea beasts. The more extreme the environment, the easier it was to create some tough guys. This was true of Mu Bia and so was the old tree demon. The same was true of the guys Yang Chen saw before him.

In such an ocean current that could shatter ordinary Yuanying stage masters, these powerful sea beasts lived in peace and tranquility. Perhaps they have been in such an environment since they were born and they have already adapted. This has also led to the existence of monsters here, each of which could be compared to the peak Yuanying and even dacheng stage masters.

Fortunately, Lan Ying's demon power was crystallized and in the ocean, it was an absolute token of power. Those fierce sea beasts, even if they were sometimes caught by ocean currents not far from the shuttle, would try to avoid them.

However, Yang Chen still noticed that although these sea beasts lived very freely here, their trajectory was intentionally or unintentionally moving away from the current. Even if they sometimes drift along the ocean for a while, they would swim in the opposite direction soon, as if the destination of the ocean current has something terrible.

Everything seemed to indicate the danger of Yang Chen's destination, but Yang Chen was looking forward to it more and more. Xiao Tian couldn't help but started flying up and down, it seemed that he was very close to the target.

He didn't know what's emitting the dragon qi here, Yang Chen even guessed that there would be a living dragon here? In his past life, Yang Chen has never seen a dragon anywhere except in the Immortal world. As early as hundreds of thousands of years, millions of years, and even earlier, the dragons have all reached the immortal realm, leaving no one in the mortal world and the spiritual realm.

Only a few creatures with a trace of faint dragon clan bloodline were passed down and Xiao Tian was one of them. But if it wasn't for the bloodline and blood essence of the Howling Celestial Dog, Xiao Tian would now be nothing more than a dirt dog.

Chapter 416.2: Sea Of No Return

In less than half an hour, the shuttle was driven by the high speed of the horrific ocean current and came into a huge vortex. This huge vortex on the ocean floor was the source of all ocean currents and the source of that super strong suction.

The shuttle once again showed the flexibility in the ocean that was totally incompatible with Yang Chen's cultivation base. In the process of swirling with the vortex, it still maintained a stable balance and did not make Yang Chen feel dizzy and bloated.

The bottom of the sea where this vortex was located was a complete huge slab of unknown material, almost hundreds of miles square. Outside the vortex, there were some unique creatures attached to the sea floor, but on this slate, there was nothing, it was bare and even when you touch with your Spiritual Awareness, you could even feel that delicate and smooth surface.

It was not known how many years this slate has been washed by this powerful vortex. Even if it was a stubborn iron, it was estimated that it would have been ground into powder by now, but this slate still appeared so complete. The quality of the material was stunning, it would definitely be an excellent material for refining flying sword magic weapons.

Coming here, not to mention anything, as long as he could knock down a small piece from this huge slab, it was already worth the risk. Of course, the premise was that he would have the ability to stay here, and he could also cut away a piece of the slate that has been here for tens of thousands of years in the vortex that could almost tear up the dacheng stage masters.

Now Yang Chen has found that the shuttle was balanced and not torn in the vortex, not because the shuttle's protective ability was strong, but because the shuttle could effectively use or even decompose the force of the water to maintain the present situation. Sometimes it was not only brute force that could cope with the scene.

With the rotation of the vortex, the shuttle was slowly sucked towards the center of the vortex. The pressure on the outside was growing and the shuttle began to tremble slightly.

This was a very dangerous sign, it meant that the power of the shuttle has reached its limit. If he went inward, it was likely that he would not be able to counter the pressure of the vortex and it would break directly.

At this moment, Yang Chen didn't want anything else anymore and he offered the Sea Pouring Jasper Cup to the sea directly, wrapping the shuttle. Since this Sea Pouring Jasper Cup dared to be called by such a name, if the vortex cannot be coped with, would the Dragon cka have given it such a powerful name?

Sure enough, as Yang Chen expected. As soon as the Sea Pouring Jasper Cup came down, even though he was still in the whirlpool, it was calm within a foot of the Sea Pouring Jasper Cup periphery. As if the vortex has lost all its power. One foot away, it was still so surging.

The shuttle and the Sea Pouring Jasper Cup in the sea, two magic weapons produced in the treasure house of the dragon clan, have proved all the guesses of Yang Chen, as long as these magic weapons were in his hand. Yang Chen would never go wrong.

Because of the power of the Sea Pouring Jasper Cup, Yang Chen could go into the center of the vortex slowly and gradually from the periphery, instead of following the current, in this crazy vortex.

Of course, Yang Chen couldn't help but control the sea jasper to fall on the huge intact stone, with Yang Chen's eyesight he didn't even know what material the stone was.

It should have been possible to rely on the strength of Xiao Tian to cut off a piece with a flying sword. However, Yang Chen was afraid of any catastrophic consequences after the integrity of the stone was

destroyed, so he did not take any action. If he had a chance to get it later, he would get it. He first wanted to see what secrets was here.

In the middle of the stone, there was a huge, bottomless black hole. The original shape of the hole has a diameter of several squares. Before he got closer, he could feel the horrible suction from it.

Before falling into the hole, the Sea Pouring Jasper Cup could maintain calmness within a foot range, but within a hundred feet of the cave entrance, there was only an inch of range, outside this range, it was a trembling force.

This black hole was obviously the secret place of everything. Yang Chen moved forward fifty or sixty feet, and the distance from the entrance to the hole was thirty to forty feet. The protective scope of the Sea Pouring Jasper Cup has been reduced to a few points, and it was almost necessary to keep close at the periphery of the Sea Pouring Jasper Cup.

Yang Chen was hesitant to enter the black hole. However, before Yang Chen made a decision, Xiao Tian had rushed out of the medicine garden, quickly drilled out of the Sea Pouring Jasper Cup and rushed into the black hole.

At this point, Yang Chen no longer thought about it, rushing forward, he followed Xiao Tian. However, when rushing into the black hole, Yang Chen's spiritual awareness suddenly found that there were five buckles on the edge of the hole, evenly distributed in the five directions of the circular hole and he didn't know what to do.

In the speed of light, Yang Chen's heart moved, and he took out the five-element cable hook, he set it on his wrist, the five-element spiritual power was sent into it, the five-element cable hook time was as if it was living.

With Yang Chen's command, the five hooks of the five elements have each hooked a buckle. Then Yang Chen's figure entered the black hole.

The suction was getting stronger and stronger, and Yang Chen's figure falling in the hole was getting faster and faster, but the effort in his breath had exceeded the limit that the spiritual force could control, no matter how Yang Chen called his spiritual power to make himself fly, it was to no avail.

If he wanted to use a flying sword to fly, the Flying Sword cannot be controlled at all, the situation was completely out of control. When Yang Chen felt that the speed could no longer be controlled, his wrist tightened, followed by severe pain. The five-element cable hook pulled Yang Chen's wrist stiffly, alleviating Yang Chen's rapid fall.

Such a high-speed state suddenly pulled his body by the strength of the wrist. If it wasn't for Yang Chen's practice of the body refining technique, which had passed the state of Mountain Picking Strength, this time would be enough to pull Yang Chen's arm off .

Even so, Yang Chen's wrist felt extremely painful, as if it was about to break. Finally, after the speed slowly eased down, Yang Chen was able to use his spiritual power to relieve the pain, which made him feel better.

However, Yang Chen's body was pulled by a cable hook, but Wan Qian's five female apprentices, Yang Chen's five puppets, who had been staying in Yang Chen's dome hall, were directly under this powerful pull. They rushed out of the dome hall, maintaining the speed from now, they disappeared out of the scope of Yang Chen's spiritual awareness.

This time, Yang Chen's soul was almost scared out of his body, but fortunately he had an ominous premonition and he didn't let Gongsun Ling to follow him. Otherwise, if Gongsun Ling falls down like the five puppets, without the protection of the Sea jasper, it would definitely make Yang Chen regret his whole life.

At this moment, Yang Chen even began to have doubts about his actions as he rushed down with Xiao Tian.

Chapter 417.1: Disruption

The long rope of the five element hook was made of dragon tendons. The five strands were twisted into one strand, which was extremely tough and could be long or short. At the moment, under the control of Yang Chen, it slowly grew at a constant speed, like it was hanging with Yang Chen down.

Slowly descending all the way, Yang Chen was afraid. Fortunately, Gongsun Ling and Hou Yun did not come together with him, otherwise from this position, even if Hou Yun fell, it was estimated that his body would be broken into pieces. Fortunately, the Penglai divine wood tree monsters were rooted in the medicine garden and had not fallen out. It was fortunate.

Another fear was that, fortunately, when he entered the entrance of the cave, he was apprehensive and he hooked the five elements to the five buckles. If this was not the case, even if he was protected by the sea jasper, it was probably inevitable that he would die.

The kind of fear of dying again was the most frightening moment for Yang Chen after his rebirth. Even if he was chased and killed by Master Luo Yuan in the late dacheng stage, Yang Chen had never had such a fear.

Luo Yuan's pursuit of Yang Chen was just unwilling to give up his long-destined flying sword, so he refused to use the Scarlet River for life and death. Even if he was caught up, he could actually be said to be under Yang Chen's control.

But this time, it was clearly out of Yang Chen's control. In Yang Chen's memory, there was never any news about it and it never appeared.

Before the death of the old dragon king, he told himself the treasure house of the dragon clan, but did not say anything about this. However, everything here shows that this absolutely has an unbreakable relationship with the treasure trove of the dragons.

Either the shuttle or the sea jasper, or the five elements of the hook, all reflect this. Without these things, coming here was definitely seeking death, there was no other possibility. The power of the Dragons was by no means conceivable by human cultivators.

During the uniform descent, Yang Chen also felt a little struggling. The five-element cable hook was originally designed for five people with different attributes. Now Yang Chen controls it by himself, which was naturally more difficult than five people.

However, it was precisely because Yang Chen only needed one person to control, eliminating the need for five people to synchronize to control. Compared with five people, the control was more flexible and consistent, but there was not much danger. The mid dacheng stage spiritual awareness was enough to control the five elements hook.

The only thing to note was that Yang Chen must maintain sufficient spiritual power input. This was even more irrelevant, not to mention the huge amount of First Wood Spiritual Solution and Seventh Metal

Spiritual Solution in the gourd. In the medicine garden alone, there were countless precious things that could be used to supplement spiritual power at any time.

With the five-element hook, Yang Chen was able to calculate how much height he had dropped, ten thousand feet, two thousand feet, until almost one hundred thousand feet, Yang Chen's eyes suddenly flashed, his feet trembled, he stepped on something from above.

Sure enough, it was indeed a magic weapon made of dragon tendons. The long rope of the five elements was hooked at this moment, but it was thin and weak, but it was tough and abnormal. Under the huge suction, there was no sign of breaking.

At this point, the huge suction suddenly disappeared without a trace, and the power able to tear everything away also disappeared. Suddenly, being in a bright place which was completely different from the darkness on the bottom of the sea. When viewed from above, there was no light at all.

Withdrawing the sea jasper, Yang Chen began to look around carefully. This was a huge space, surrounded by dozens of huge stone pillars up to hundreds of feet, at first glance, it looked like a huge palace.

The atmosphere here was very similar to that in the treasure house of the Dragon Palace, this was definitely the writing of the Dragons. However, what made Yang Chen strange was that compared with the treasure house of the Dragon Palace, there seems to be a sense of decline here, which was very puzzling.

Immediately after, Yang Chen found that he was not standing on the ground, but was above a small hill about a hundred feet high. Taking a closer look at the hill bag, he was shocked and jumped down from it.

Where was this hill pack from? It was simply the body of countless powerful monsters in the sea. Falling from such a high hole, under the action of the huge suction, it was impossible to control the speed. Even for the masters of the dacheng stage, their only end after falling was to turn into a broken meat.

The hundred-foot-high hills were piled together like countless meatloaves. It has long been unclear what type of sea beast's body it was. The only thing that was certain was that at least they were dacheng

stage monsters, even if they didn't wait to reach the interior of the vortex, they would be twisted into pieces in the marginal area.

No matter how powerful the cultivators were, under this arrangement of the Dragon clan, there was nothing that could be obtained from the treasure house of the Dragon Palace. The sea of no return, this was why the sea was called by such a name.

Just where Yang Chen settled was a few beaches of fresh meat. No need to ask, it was Wan Qian's five female apprentices who fell from the top. Perhaps they were the ones with the lowest cultivation base among the meat hills.

Yang Chen didn't see Xiao Tian's figure, but he could feel the existence of Xiao Tian, it was alive, and there was almost nothing, he really didn't know how it survived such a terrible fall. Perhaps, everything here was designed for the Dragon clan. As a dragon's defendant, Xiao Tian had a dragon's aura, so it's safe and sound.

Knowing that Xiao Tian was safe, Yang Chen was relieved and began to look around. The huge palace was clearly matched with the dragon's huge body, which was not a palace inhabited by humans at all.

Could this be the legendary Dragon Palace? Yang Chen was not sure. No one has ever seen the Dragon Palace, he only heard that the Dragon Palace has always been rich and beautiful, and there were cherished treasures everywhere, but except for the guys who lived in the Dragon Palace at the time, no one knew.

Except for these huge pillars and empty palaces, there was only that flesh hill. It was not known where Xiao Tian was, it seems that he has to absorb the remaining dragon qi here.

Yang Chen doesn't care about Xiao Tian, here, Xiao Tian would definitely be safer than himself. After making a circle around, Yang Chen returned to the hill in front of the pile of bones.

It must be known that in this pile of hills, except for Wan Qian's five female apprentices in the peaks Jiedan stage, the rest were all the bones of masters of the dacheng stage. This pile of hills was definitely the blood demon vine sword and the medicine garden best tonic in the recovery period.

When he came here, how could he return empty-handed. Unexpectedly, Yang Chen brought the blood demon flying sword and controlled the flying sword, he sent it into the pile of master bones and began to absorb it.

Chapter 417.2: Disruption

No one could enter here except these peerless masters and even these peerless masters have already died, the corpses have even fallen into mud, but the corpses have not decayed and even the blood remains liquid. It was gathered in a large pit on the ground below the hill.

The pool of blood gathered from the blood of the masters of the dacheng stage, for the blood demon vine flying sword it was the most delicious meal. One plunged into the blood pool at the bottom of the mountain, the blood demon vine flying sword began to absorb the blood frantically.

Yang Chen and the blood demon vine flying sword were in close communication with each other. At this moment, he could even detect the kind of joy felt by the flying sword.

And the corpse hill, Yang Chen did not waste it, he quickly began to collect it into the medicine garden, he stacked it under the blood demon vine plant. The blood demon vine whose main root has been intercepted has not fully recovered until now, but Yang Chen believed that there was such a large amount of master bones. When the blood demon vine completely absorbed it, the main root would regrow and the period of recovery was not far away.

To carry these bones, he didn't even need to do it himself, as long as he controlled the blood demon vine to stretch out its vines and roll them in, Yang Chen himself could stand there without even moving his feet.

Even so, it took Yang Chen a whole day to completely evacuate a hill as high as a hundred feet. And within this time, the blood demon vine flying sword has completely drained the blood pool below the hill, as if eating. Yang Chen directly received the blood demon vine in his sea of consciousness and it was tempered like other life source magic weapons.

Now there were many flying swords on Yang Chen, the Yin Yang five elements flying swords already had the First Wood flying sword(Penglai Divine Wood flying sword), Second Wood flying sword(Blood Phantom Vine flying sword), Third Fire flying sword(Bright Ray Sword which was refined by Gao Yue), the Fourth Fire sword embryo, Fifth Earth flying sword(which he seized from Ming Guangruo), Seventh

Metal flying sword(Immortal Beheading Blade). The remaining four flying swords have not been refined or found by Yang Chen.

In his sea of consciousness, there was the Immortal Beheading Blade, Fifth Earth flying sword, Bright Ray Sword.

Now he added the Blood Demon Vine Sword. However, unlike the Immortal Beheading Blade his absolute life source magic weapon, the other nine swords in the Great Yin Yang Five Elements Sword were used as swords. It doesn't need to be tempered deep and uninterrupted for hundreds or thousands of years, as long as the sword had just shallow tempering it could be used.

When needed, Yang Chen could take out these flying swords at any time. He used the bright ray sword the last time and then returned it to his sea of consciousness. The same was true of the First Wood flying sword. After being quenched by his sea of consciousness, the quality has been improved qualitatively.

Now after the blood demon vine flying sword drank the master's blood. It has also reached the point where it could be further tempered with spiritual awareness. When a flying sword was needed, Yang Chen still had the newly refined Fourth Fire flying sword's sword embryo, which was enough to use. Besides, except the Fourth Fire flying sword, Yang Chen also has at least thousands of other flying swords, each one was the same, for Yang Chen, there was not much difference.

After clearing the bones and blood of a master in the hill, Yang Chen found that the ground had been fragmented by numerous collisions. Although the masters also fell into their death, before they died, their last madness in which they were able to restore the use of spiritual power here also completely destroyed a large area of the ground.

Even if the ground set by the Dragon clan here was extremely hard, it would not help. A dacheng stage masters' mortal counterattack was by no means something that no one could control and repair.

What surprised Yang Chen was that after clearing these up, it was discovered that the large area on the ground turned out to be a complete nau-ti-cal chart.

This chart was a large area distributed separately. Above this area was the hole and there were no markings on the chart.

Like the charts in the treasure house of the Dragon Palace, here were the charts of the South China Sea. Unfortunately, the charts have been completely broken because of numerous impacts. Even if Yang Chen leaned on the mark of the spiritual vein, he could not get any spiritual power from the chart.

It's really a pity that such a good treasure was even placed in this place by the Dragon clan and suffered the crazy impact of those dacheng stage masters, which finally led to its fragmentation.

Perhaps, the original intention of putting the chart here was to rely on the chart to absorb the spiritual power of the South China Sea spiritual veins to repair it by itself, but did not expect that some of the impacts were too great to connect the South China Sea chart. They were all cracked. Once the chart breaks, the ability to absorb spiritual power was suddenly lost, and in the end it could only be more and more broken and it has become what it is now.

After Yang Chen cleaned up all the exposed charts, Xiao Tian's figure, which he didn't know where it came from, flew frequently above the chart as if he wanted to cross the chart to the ground.

Yang Chen's heart moved, and he collected the fragments of the chart into the merit ring. Such a large chart also needs to maintain the position of each other. In addition to the virtues and ceremonies, the ordinary Qiankun bag or the medicine garden, it was impossible to do so.

Immediately after the chart was collected, a huge hollow suddenly appeared and there was an aura that Yang Chen was very familiar with. His spiritual awareness just made an inquiry and immediately he was pulled into the hollow.

This was not the first time that Yang Chen has experienced such a situation. In the air, he hastily called up the sea jasper and the gourd and fell easily into the huge lake below.

In the hollow, there was a huge lake of tenth water spiritual solution. Because it was so large Yang Chen's spiritual awareness couldn't reach the edge. He didn't know how many years of Tenth Water True Essence accumulated over the years, Yang Chen suspected that the entire South China Sea Tenth Water True Essence was gathered here.

As the magic weapon for condensing the Tenth Water True Essence, the sea jasper was a buffer. There was no difficulty for Yang Chen to collect these Tenth Water True Essence with the gourd. It was just a

matter of time. It was not known how many years of Tenth Water True Essence had been accumulated here by the Dragon clan, now it was so easy for Yang Chen to take cheaply.

Now Xiao Tian has the shape of a giant python and he could easily wrap Yang Chen around a dozen times. When receiving the Tenth Water True Essence Liquid, Xiao Tian hurriedly surrounded Yang Chen's side, hovering and dancing in a hurry.

The strange shape of Xiao Tian also made Yang Chen look forward to it. Could it be that there was a good treasure under the Tenth Water True Essence lake?

Was this Tenth Water True Essence Lake a natural insurance that prevents cultivators from entering the real Dragon Palace?

Chapter 418.1: Tenth Water Flying Sword Raw Material

This was the easiest time for Yang Chen to control the gourd to absorb the spiritual fluid. He does not need to condense any Dan when it was absorbed and he does not need to worry about whether the magic weapon used would be cracked.

He just let go of the speed to absorb it completely.

The combination of the sea jasper and gourd were indeed the fastest combination to absorb the deciduous spirit fluid. The huge lake surface was decreasing at a speed that was visible to the naked eye. In the gourd, a lake that was forming faster than and it was not known how many times larger it was than the First Wood Spiritual Solution lake appeared.

The rate of the absorbing was already very fast in Yang Chen's eyes, but the Tenth Water Spiritual Solution which still has been accumulated for many years still seems to be overwhelmed. The speed was too slow.

The crazy absorption lasted for almost a few months, and during this time, Xiao Tian was the most anxious, it coiled around Yang Chen's head all day, not even entering the Dragon Tower.

After absorbing for almost five months, Yang Chen suddenly noticed some changes in the gourd, and then quickly understood what the changes were.

Speaking of which, this gourd was actually the same as the mountain river geographical map, but the geographical map was to be enriched by the geography of mountains and rivers to enhance its power, and this gourd needs to be enriched with a lot of spiritual fluid to be able to upgrade.

As long as it was a liquid with a strong spiritual power, it was everything that the gourd needed to upgrade. The First Wood Spiritual Solution, Seventh Metal Spiritual Solution, in addition to the present Tenth Water Spiritual Solution were clearly the most original First Wood True Essence, Seventh Metal True Essence and Tenth Water True Essence, which were the most pure spirit power Liquid.

Yang Chen controlled each absorption by the gourd, which was equivalent to Yang Chen sacrificially refining the gourd, after a lot of refining with the First Wood Spiritual Solution, after the Seventh Metal Spiritual Solution and Tenth Water Spiritual Solution. Finally it reached a state of qualitative change for a power upgrade.

The most obvious change was the shape. What used to be a very ordinary crooked mouth dry gourd has now become a delicate gourd with a radiant green light on the surface. The size has been reduced by half compared to the previous, and it was half the size of a piece of jade carving gourd for a long time.

If Yang Chen did not pour out the liquid in the gourd, this would be a beautiful jade carving gourd handle. There was no overflow of spiritual power, even if someone else uses their spiritual awareness to investigate closely. They would just think that it was an ordinary jade carving.

Unless you have it in your hand, you wouldn't understand that this was a container. But only one of the liquids in this container was Yang Chen willing to let others know. As for what could be poured out of it, it was within Yang Chen's control anytime, anywhere.

In such a large amount of spiritual fluid scouring and sacrificially refining, the jade gourd has already stamped Yang Chen's spiritual awareness mark firmly and thoroughly in every place. Even if the gourd was obtained by others, if their cultivation base was not higher than Yang Chen and if they did not have twice as much amount of spiritual fluid absorbed by Yang Chen, they would never completely dispel Yang Chen's spiritual awareness mark.

The gourd body has become smaller, but the space inside has not become smaller, but has become even larger. At least Yang Chen had the feeling of being able to easily fit the world sea into it.

Of course, purely, Yang Chen couldn't do that. Such a beautiful gourd filled with various spiritual fluids, and to fill ordinary water, was definitely a waste. Yang Chen would rather it be empty, he won't do such boring things.

After the jade gourd was upgraded, the speed of absorbing spiritual fluid increased again by several times. Yang Chen originally thought that this piece of Tenth Water Spiritual Solution could be absorbed in a few months at most, but he did not expect that this absorption took a whole year.

The huge sea of Tenth Water Spiritual Solution finally bottomed out, revealing the situation below. He didn't wait for Yang Chen to completely absorb it and see what's below, but Xiao Tian had already shouted aloud, flew out, and rushed in a certain direction.

Yang Chen quietly waited until all the Tenth Water Spiritual Solution had been absorbed completely, and then there was no waste at all, then he began to explore the surrounding environment.

Just like the Seventh Metal Spiritual Solution Lake, after all the spirit liquid disappeared, below was the tenth water crystal stone that has been condensed under the strong pressure. It was not known how many layers were paved thickly.

Anyway, there would be nothing wrong with Xiao Tian here and so Yang Chen doesn't want to do anything else, but first scoops all the crystal stones into the merit ring. This kind of precious thing could be met but not demanded and it was a crime to not gather it when you encounter it. Yang Chen was a good person who obeys the law and abides by the law, so he carefully searched out all the tenth water crystal stones and did not intend to leave any at all.

There was no need to ask, there must be a formation here that condenses the tenth water true essence. Even if Yang Chen searched for it, as long as the array was not destroyed, the tenth water true essence would slowly accumulate in the future, and slowly form the Tenth Water Spiritual Solution, this kind of temporary ownerless thing, Yang Chen took no psychological burden.

There were no dragons in the mortal world, so Xiao Tian was the most qualified to accept the wealth of these dragons and there was no difference between Xiao Tian and Yang Chen.

After removing all the Tenth Water Spiritual Solution, this was a huge space again. Xiao Tian had already gone to a certain place first, and was dancing anxiously, as if he was urging Yang Chen to hurry to it, and let him remove the tenth water crystal stones.

Yang Chen quickly collected those crystal stones. After arriving at the place where Xiao Tian was dancing, he did not let Xiao Tian wait for a long time and immediately began to collect the crystal stones in that area. However, after just gathering it for a few times, Yang Chen stopped his hand and looked at the crystal stones below inconceivably, as if he couldn't believe his eyes at all.

Among the tenth water crystal stones almost connected into one piece, there was actually a complete skeleton, as if embedded in it, which makes people feel so incredible.

This was a skeleton like a python. At the beginning, Yang Chen thought it was a complete Dragon Bone, but seeing Xiao Tian's mind was not on this bone at all, Yang Chen knew it was not.

As he carefully cleared out the crystal stones around him, the complete skeleton finally showed its true face. After Yang Chen collected part of the crystal stones, Xiao Tian yelled and rushed in one direction. And Yang Chen was stunned looking at the complete skeleton, full of joy.

The body, hundreds of feet long, looks like a python. The huge skull looks similar to a dragon head. The only difference was that it has no horns.

Judging by the shape of the skull, the bone was not broken off, but was born without horns. This body, this shape, Yang Chen immediately had a preliminary judgment in his mind, this was a complete flood dragon skeleton.

He just didn't know why this flood dragon died here. This was not a problem that Yang Chen wanted to care about. Yang Chen only wanted to know now why the flood dragon stuck out of the crystal crystal stone, and even the flesh was decayed but his skeleton survived?

Chapter 418.2: Tenth Water Flying Sword Raw Material

No matter what kind of expert it was, if he couldn't withstand the power of the huge spiritual fluid, then there was only one consequence of entering the spiritual fluid, and it was exploding. It was a comminuted burst of the whole body without leaving any traces.

This has been proven by Yang Chen with the lives of countless demon cultivators and monster cultivators in the First Wood Spiritual Solution lake and Seventh Metal Spiritual Solution lake. The only and inevitable end to those people falling into the lake was their explosion. Even the most powerful monsters and demon cultivators were useless in it. There was no magic weapon that could withstand the power of the spiritual solution.

But the flood dragon's skeleton in front of him clearly violated this rule. Although the flood dragon was not a pure dragon, it still had ties with the dragon clan. There was no sign of injury on the bones. The possible explanation was that it could only retain the Dragon skeleton in the tenth water spiritual solution.

For Yang Chen, no matter how the flood dragon died and no matter why it died and the bones remained after it died, why it was here and so on. It was not important. The important thing was that the flood dragon had a complete skeleton.

This dragon skeleton was completely preserved in the tenth water spiritual solution and it has not been damaged in any way after it has been condensed into a tenth water crystal stone. This was absolutely exciting.

Yang Chen stretched out his hand and gently squeezed the bones. The hard bones did not change at all. As Yang Chen gradually increased his strength, the bones just bent slightly and returned to their original shape.

Hard but full of toughness and it was not known for many years it has been in the crystal crystal stone. Was there any better material than this complete skeleton that was more suitable for Yang Chen's Tenth Water flying sword?

He carefully inspected the flood dragon's bones from beginning to end, and confirmed that no small bones were left behind. Yang Chen carefully collected all the bones in their original state, just like those broken charts and received it in the merit ring.

After doing this, Yang Chen only continued to collect those crystal stones on the ground. These tenth water crystal stones were known to be hundreds of feet thick, even if Yang Chen used the merit ring to gather it regardless, it still took a lot of time.

It took Yang Chen almost one month to collect these crystal stones only to collect them completely. Fortunately, the space for the merit ring was large enough, otherwise, Yang Chen's ordinary Qiankun bag would not be able to hold so many crystal stones.

After clearing up, Yang Chen discovered that the ground was also a complete and integrated slate of hundreds of miles. He didn't know what kind of hard work the Dragon clan spent at that time to get such huge and complete materials.

There were countless exquisite patterns on the slate, forming a huge array of hundreds of miles. But at this moment, in the center of the map, Xiao Tian was flying up and down anxiously, but he was never allowed to enter.

Yang Chen suddenly found out that the location of Xiao Tian at this moment should be the location of the head of that flood dragon's body. In that position, a semi-circular pit was left on the slate, it was not known what it was used for.

Yang Chen flew into the air, staring from the highest point, it became clear that the entire slate was a prototype slate. All the patterns form a huge complicated circle that cannot be added, and the center of the circle was on that pit.

Landing next to the pit, Yang Chen just stood still and Xiao Tian twined around, his huge head flying up and down, it seemed that he wanted Yang Chen to find a way inside.

Looking at the semi-circular pit, Yang Chen could not understand the role of the pit. After analyzing the pattern of the array in his mind, he still couldn't figure it out.

No one could understand the secret method of the Dragon clan. Even if Yang Chen has the memory of a Great Principle Golden Immortal, Yang Chen does not know. In the memory of his previous lives, no creature in the world can ever touch the secret method of the Dragon race.

When the East Sea Dragon King died, he only talked about the treasure trove, but didn't mention anything about it. However, everything here was closely related to the stuff in the treasure house of the Dragon race.

The sea jasper jade cup, shuttle, hooks of the five elements, and gourd were all things in the treasure house. So what was the situation here related to which Dragon Treasure?

Looking at the semi-circular dimple, Yang Chen's heart suddenly moved, and roughly estimated the size of the pit. In his mind, the huge dragon ball in the treasure house of the Dragon Palace suddenly appeared.

Was it possible to put that Dragon Bead in this place for it to be activated? Did the formation here need the Dragon bead to trigger? Yang Chen stared at the pit and couldn't help but sweat a bit.

How precious was such a big dragon bead, was it just a key to trigger the formation here? Or as long as something could provide a huge spiritual energy it would work?

After thinking about it, Yang Chen still decided to give it a try first. He has already worked so hard here and he would not be reconciled without trying. Was he still waiting for Xiao Tian to grow and then take off that dragon bead?

He took out a tenth water crystal stone and the Fourth Fire flying sword quickly carved the crystal into a complete sphere. The size was similar to that of the semi-circular pit, and then Yang Chen put the crystal stone on the pit.

Strange to say, it was originally completely covered with Tenth Water Spiritual Solution and this array did not show any response. However, as soon as the crystal stone was put on, it suddenly began to glow.

Starting from the pit, the lines were lit up. With the crystal stone as the center, the bright lines expanded towards the surroundings. The light up was very fast and in a blink of an eye, it spread in a dozen square feet.

There was a smile on Yang Chen's face for a moment, it seemed that he was right. This was a general hub that provides spiritual power, not for the dragon bead. As long as it could provide enough spiritual power to light up the entire formation, the formation would naturally start.

Even if it was the Dragon clan, they wouldn't use a Dragon bead to trigger a guarding formation, right? It must be known that a dragon bead was the life of a dragon clan and the dragon clan hasn't thrived to the point where the clan's life was not put in their eyes?

Xiao Tian has begun to dance again happily, he could enter another secret place of the Dragon clan shortly. Xiao Tian's urgent mood was even more eager than Yang Chen, only because he couldn't speak in this way.

However, the happiness of Xiao Tian and Yang Chen only lasted for a short time. Before half a column of incense, the lines on the slate were only a few miles away, and the crystal crystal stone ball had been drained. All spiritual power disappeared without trace.

Those bright parts, after maintaining for a few breaths, were not supplemented by follow-up spiritual power, and soon faded again, it eventually recovered as if nothing had happened.

Chapter 419.1: Dragon Tomb

A piece of tenth water crystal stone contains hundreds of times the spiritual power of the same volume of tenth water spirit liquid and a drop of Tenth Water Spiritual Solution contains hundreds of times the spiritual power of a drop of Tenth Water True Essence. Such a large tenth water crystal stone, which contains spiritual power which was enough to be on par with a master of the peak Yuanying stage. It was unexpected that even one tenth of the formation was not lit by it.

There were many top grade spirit stones on him, but at most they were about the same level as the tenth water crystal stone, it was not worth wasting.

The huge amount of spiritual power required by this formation was heinous. The most hateful thing was that the key was not the amount of spiritual power, but the amount of spiritual power that could be provided within the size of that crystal stone.

Yang Chen tried other methods, such as sculpting only the lower half of the tenth water crystal into a semi-circular shape, which matched with the pit, leaving a few more parts on it. As a result, it seems that this array method could still judge the shape of the crystal stone and refused to start.

It was not known how the formation does this. Yang Chen has no choice for a while. Was it really necessary to use that Dragon Bead? It seems that in this mortal world, only the Dragon Bead could have such a huge supply of spiritual power.

Xiao Tian has been watching Yang Chen doing experiments quietly. He was still waiting with enthusiasm, but now he was more anxious and started to rush.

After much deliberation, Yang Chen still couldn't figure out a way. Was there anything that contains more spiritual power than the tenth water crystal stone? At the urging of Xiao Tian, Yang Chen had to rack his brains to think.

After thinking about it for a while, Yang Chen still felt that he should look at what was on his body. He has received too many things in the recent period. Maybe there was something strange that could provide a huge spiritual power.

In the Qiankun bag, there were things that Yang Chen doesn't pay much attention to. Looking back, there was nothing special. As a result, Yang Chen began to look inside the merit ring.

Turning around in the same way, Yang Chen suddenly found something and with a movement in his heart, he took out the thing that was placed in the corner of the merit ring.

It was a walnut-sized orb, glowing blue light all over the body, which contained a strong spiritual power. Before rushing back to the sea of no return, Yang Chen used this kind of thing many times to drive away some powerful sea beasts, so as not to delay his journey.

This bead was the crystal of the magical power left before Lan Ying ascended. In the final analysis, this was also a crystallization of spiritual power.

The spiritual power contained in it was incredible, and it would automatically release powerful coercion, no sea beast dared to face up to it.

The old tree demon has studied the crystal which contained demon power and Hou Yun has also studied it. However, after all, they were not ocean monsters. Unlike their routines, they could only give limited help. Yang Chen used it only as a sea pass.

It was embarrassing that Lan Ying's demon crystal could only be applied to the sea clan. After arriving on land, it has become the object that many demon clans wanted to snatch. At that time, the Banyan tree Immortal's cave second city lord forced the pursuit of Yang Chen because of this demon power crystal.

Except for its improper size, it seems that this demon power crystal fully meets the requirements of providing immense spiritual power. Yang Chen thought for a while and he took out a piece of tenth water crystal stone and carved it into a sphere, but hollowed out the center of the sphere, leaving a channel, he plugged the magic crystal into it, and blocked the channel with another suitable crystal, then the Tenth Water True Secret Art was launched to glue the gap between the two tenth water crystal stones.

Before Lan Ying ascended, she not only cultivated Yang Chen's Transformation Secret Art, but also absorbed the Tenth Water True Essence given by Yang Chen. In the demon crystals left behind, there was a strong aura of Tenth Water True Essence. This was exactly why Yang Chen has dealt with it like this.

Holding this forged crystal stone, Yang Chen carefully put it on the semi-circular pit again. After putting it in place, Yang Chen pushed away a few steps, and together with Xiao Tian, carefully watched the change of the crystal stone.

After a while, it seemed that the crystal stone did not respond and the lines on the slate showed no signs of lighting.

Looking at this situation, Yang Chen couldn't help but sigh in his heart. It seemed that cheating was not so easy, and people did not recognize it at all.

He couldn't help but admit that the formation left by the Dragon clan was really powerful, it could still judge the shape of the source of the spiritual power. This was something that Yang Chen has not even touched in the Immortal world. It seems that the Dragon clan could always be powerful and it was not unreasonable, just look at these unique formations.

Since the method of cheating was not working, Yang Chen could only sigh secretly. It's a pity that he has reached the point where he was blocked outside the door.

But at present, there was no good way. It was estimated that there was only that Dragon bead that could meet the requirements of this spiritual power source.

Just before stepping forward to take back the crystal stone, the crystal stone flickered suddenly and then the lines on the slate began to light up again.

Yang Chen's eyes suddenly followed these lines to light up. The crystal stone that had been made up actually worked. He flew to the sky and watched the bright areas of the patterns.

Xiao Tian was also surprised, but this time there was no flying, but he directly focused on Yang Chen's body. With Yang Chen's eyes, he stared at those bright patterns.

After a while of work, the pattern has been illuminated to the range of the last stop, but this time, instead of stopping here, it continued to expand outward.

In Yang Chen's heart, there was a moment of nervousness about the situation, it was clear that the blue crystal's magic power played a role. However, it was not known how much stronger this demon crystal was than the crystal crystal stone. Yang Chen was not afraid of it losing magical powers. He was afraid of losing power when he was about to succeed. The frustration of failure was the enemy of spiritual power cultivators.

Under Yang Chen's worries, the patterns on the slate lit all the way, 20%, 30%, 50%, 80%, 90%, until all the patterns were lit, without any faint patterns remaining. And the tenth water crystal stone ball still kept the original size and was quietly placed on the pit.

It finally became lit, Yang Chen's heart finally let loose. The crystal stone has not disappeared, which means that there was still a surplus of magic crystals, so that they would not be used up.

Lighting the pattern was only the first step, the formation would need to be launched, but he didn't know if the crystal stone magic power could hold up.

Chapter 419.2: Dragon Tomb

You couldn't help but say that Yang Chen was concerned needlessly. The memory of his previous ascending may be too long, so long that he has forgotten what kind of situation the spiritual power quality would be after the tribulation.

The main reason why the old tree demon and Hou Yun could not have more understanding on the demon power crystal was that after the baptism of the Wind Tribulation, the spiritual power would undergo qualitative changes. How could it be possible to understand the strengths of two completely different levels without going through the experience of the Wind Tribulation?

All the patterns were lighting up, the formation started and a white light burst out from the circular formation below, covering the whole space, including Yang Chen and Xiao Tian, all were covered by the light, no trace was visible from the outside.

All the lights flickered out after clashing for a while, and no one existed in the huge space, even the crystal stone placed in the semicircular pit disappeared without a trace.

Yang Chen and Xiao Tian's bodies flickered, and they suddenly appeared in another empty space. As soon as he appeared, Yang Chen felt an unparalleled immense dragon qi that filled the entire space, carrying an irresistible majesty and naturally caused a shock of impulses.

They were in the air, as soon as Yang Chen bowed his head, he saw a shocking scene. On the ground under his feet and Xiao Tian, there were dozens of dragons lying side by side. However, this space was really too big. The huge dragon body like hills were just like dozens of small earthworms in Yang Chen's eyes.

Dragons, powerful dragons, there were actually dragons in the mortal world. This discovery made Yang Chen hardly believe his eyes.

From the mouth of the Dragon clan that he had contacted in previous lives, Yang Chen knew that the Dragon clan had already left the mortal world and had never left anyone behind. But how does he explain the existence of these dragons?

Xiao Tian has already rushed down, but Yang Chen was still deeply shocked. He couldn't believe his common sense was overthrown. How could this be possible?

The shocked Yang Chen soon discovered that the dragons below had lost their breath of life. This discovery made Yang Chen's shock a little smaller. If it was only the body of a dragon, it would be more acceptable to Yang Chen.

However, after discovering this, Yang Chen this time was overjoyed. Gao Yue just got two dragon horns, which was already a treasure. The mountain river geographical map was only made of dragon skin, and the five-element cable hooks were dragon tendons, all of which were just part of the dragon's body.

But below, there were dozens of complete dragon corpses. The skeleton of the dragon outside was completely scum compared to these, and no one picks up the junk.

Immediately, Yang Chen couldn't help but be excited and rushed down towards the dragon's bodies. If he didn't cherish this kind of good thing, he would be struck by a thunderstorm.

However, Yang Chen only rushed halfway down in excitement and saw a sight that made his heart hurt.

Xiao Tian has actually approached the dragon corpses, and facing these dragon corpses that should be regarded as his elders, Xiao Tian also seems to have a little scruples, and gently clicked on a dragon's body.

Booming, as if whistling at this point, was a signal, which triggered a series of changes. The bodies of those dragons, like the bones of ordinary people which has weathered for many years, instantly became powder. Those powders had been blown away by a wind that they did not know where it had come from.

The dragon's body disappeared so thoroughly that even Yang Chen's hope of collecting a little powder was lost. He was still in the air, but Yang Chen's heart seems to have been hollowed out.

Such precious treasures disappeared so easily giving Yang Chen an unreal feeling. He hoped that the scene just now was just a fantasy dream, not a reality!

Unfortunately, until Yang Chen landed on the ground, everything in front of him has not changed, what has happened has happened and it could never be changed again.

Perhaps they should not have appeared in the mortal world at all. Yang Chen adjusted his state of mind in an instant. It was already a miracle among miracles that he could see it with his own eyes. He didn't expect too much, gains and losses were not something that should sway a Great Principle Golden Immortal.

Here, Xiao Tian seems to be in heaven. Each breath contains a strong dragon qi. Xiao Tian was overjoyed and even the joy was transmitted to Yang Chen.

After hovering in the air for a while, Xiao Tian seemed to feel something. He slowly flew to a position and stopped. After watching it for a while, he flew to Yang Chen's side.

This time, Xiao Tian rolled up Yang Chen directly, then took him to that position and then began to fly and dance on top.

Yang Chen was very puzzled. Was there anything special here? After looking down carefully, he found that there was a complete octagonal trace on the ground here. It was an imprint that he didn't know what left it behind and even a groove was left on the ground. The groove was very shallow, but it was very clear.

Just thinking for a moment, Yang Chen knew what to do. Since everything here has something to do with the treasure house of the Dragon Palace, this one must be no exception. The octagonal thing was nothing but the base of the dragon tower.

He quickly summoned the dragon tower from the medicine garden, Yang Chen pinpointed the octagonal trace and accurately set the base of the dragon tower up.

This action was like a key unlocking, which fully activated all the arrangements here. Suddenly, all the dragon qi that permeated the whole space was directly transformed into white mist visible to the naked eye, and quickly condensed towards the dragon tower.

The white mist gathered from all sides, the dragon tower seemed to have infinite suction, and the white dragon gas was completely absorbed. After a while, there was no trace of dragon qi all around, all were absorbed by the dragon tower.

Xiao Tian cheered and rushed into the dragon tower, and the gate of the dragon tower closed again. The entire interior of the dragon tower has been filled with white thick liquid-like dragon qi. Cultivating in it was almost like being in the heavenly court.

As soon as the gate of the dragon tower was closed, a beautiful palace group appeared out of thin air and it complemented the dragon tower. The dragon tower seemed to be directly integrated into the palace group and became a complete set of buildings.

To describe it with grandeur, splendor, and so on, all seem to perfectly express the feeling of the palace. So that even Yang Chen, who was a Great Principle Golden Immortal who has seen the heavenly court, cannot think of any suitable words to describe it for a moment.

Facing such a group of palaces, Yang Chen only felt one kind of emotion, which was beauty and comfort.

Chapter 420.1: Breakthrough

Just looking at it, he had such a feeling. If he really stayed in it, what kind of enjoyment would it be? The palace emperor of the Jade Emperor, would it be like this?

The luxury of the Dragon clan simply made him speechless. He didn't know what this scene would look like if those guys in the heavenly courts saw it.

While sighing, Yang Chen suddenly found that his body was flying towards somewhere involuntarily. The most incredible thing was that he was flying using his own power, that was, he has been completely controlled by something without knowing it.

Soon Yang Chen realized that it was not that he was controlled, but that there was an intangible request that he could not refuse. This moment made Yang Chen suddenly startled. What kind of power could make him so, even though his heart was alarmed and shocked, his body did not resist the other's request.

In shock, Yang Chen had come to the side of a square pool, and below was a pool of white liquid, exuding bursts of fragrance. Yang Chen's body was no longer under his control at this moment, and he stepped into the pool in one step.

Suddenly wet with white liquid, Yang Chen suddenly understood everything. It turned out that Xiao Tian had directed him into this pool.

After entering the Dragon Tower and the palace appeared, Xiao Tian, a descendant of the Dragon clan, took control of everything here. The Dragon Tower was the main hub for controlling everything, so Xiao Tian understood all the arrangements here.

The white liquid in this pool was the Dragon Yuan left by the Dragon clan. This was a kind of fluid secreted by the dragon, which was unique to the dragon family, for dragon descendants such as dragons and Xiao Tian. It does not have much effect, but it has indescribable benefits for human cultivators.

The most obvious benefit was that as soon as Yang Chen entered it, he seemed to be contaminated by the dragon clan aura. Xiao Tian could no longer control Yang Chen and Yang Chen instantly understood all the thoughts of Xiao Tian, it was even clearer than the spiritual connection between a master and his pet.

In the past, Yang Chen could only direct Xiao Tian through spiritual awareness. He could see everything Xiao Tian saw through his eyes, but he could not clearly feel the emotion of Xiao Tian. Now, Yang Chen seems to know the mind of Xiao Tian easily.

Once contaminated by foreigners, this kind of dragon yuan would disappear quickly in a short time. Such an opportunity was rare, Yang Chen also did not care about communicating with Xiao Tian, he quickly began cultivating in the Dragon Yuan.

The Dragon Yuan had a strong amplification effect on all of Yang Chen's cultivation methods. Practicing in the Dragon Yuan was hundreds of times faster than practicing on ordinary spirit veins.

Yang Chen would never miss such a once-in-a-lifetime opportunity and he simply started to practice the cultivation methods he was currently cultivating one by one.

At present Yang Chen was practicing the most powerful cultivation method, the

Three Purities Secret Art.

This Spiritual Awareness cultivation method, passed directly from Grand Supreme Elderly Lord, has not been promoted after entering the third level and he had to enter the realm of spiritual awareness division twice in a row. Both have been used by Yang Chen as double cultivation with Gao Yue and Gongsun Ling separately.

His spiritual awareness splitting in this realm. For Yang Chen, there was not much benefit. But at this moment in the rare Dragon Yuan, he doesn't care much about it.

As soon as the Three Purities Secret Art started running, Yang Chen felt the Dragon Yuan's powerful amplification function. Even the Three Purities Secret Art, which has been staying in the third layer for a long time without a breakthrough, he has just cultivated for a while and it vaguely reached the edge of breakthrough.

The fast increase in spiritual awareness made Yang Chen feel scared. Peak middle dacheng stage, late dacheng stage, peak late dacheng stage, peak dacheng stage, the peak dacheng stage was the complete stage, until the person reached the human immortal first grade, this was the only stage.

The crazy growth of the spiritual awareness directly allowed Yang Chen to cross the limit of the dacheng stage and enter the realm of the human immortal first grade that could only be reached in the spiritual realm after ascending. In this world, no one dares to say that their consciousness was stronger than Yang Chen.

What was weird was that in this crazy ascension, Yang Chen's spiritual awareness showed no signs of splitting, which was what made Yang Chen satisfied.

However, this was not the reason why Yang Chen was most satisfied. What was most satisfying to Yang Chen was that the Three Purities Secret Art has been raised to the fourth level. Actually, in the absence of his spiritual awareness splitting, he rose to the fourth level.

The fourth layer of the Three Purities Secret Art was another concept. The growth rate of the spiritual awareness was not mentioned, and the condensing degrees were not mentioned. At the fourth level, his spiritual awareness could hurt people. This was not the kind of simple hypnosis or concussion, but the damage that could be directly targeted at the opposite spiritual awareness.

However, Yang Chen's spiritual awareness has finally reached the edge of division. As long as he was ascending a little, he has to split to form a second spiritual awareness.

There has been an earth-shaking change in his sea of consciousness. The biggest change was the addition of a white dragon. The dragon has the power of the formidable dragon clan. Release it a little and you would have a feeling of looking up and facing a peerless expert.

It's completely different from the Long Bloody River killing intent. Killing intents could make people collapse, but a Dragon's Prestige could make people feel humble and even dare not be an enemy at all.

Although this Dragon's Prestige has not yet become as powerful as a killing intent, it was worthy of worship, but already owning a white dragon was equivalent to burying the seeds of the Dragon's Prestige and it has the possibility of unlimited growth in the future.

The white dragon climbed directly over the bloody river, covering all the blood strictly. The external temperament of Yang Chen himself seems to have undergone earth-shaking changes.

Originally, when Yang Chen was angry and murderous, the timid person would be frightened and collapse. But now when Yang Chen was angry, he showed a majestic majesty that showed contempt to all beings, others couldn't help but be affected.

Even if the enemy was even stronger, his combat power would naturally decrease by a little. Basically, Yang Chen was already invincible as long as he could grasp the Dragon's Prestige and killing intent.

Of course, this was just a superficial phenomenon. If Yang Chen really wanted to kill people it was just Yang Chen's choice between the killing intent and the mighty Dragon's Prestige.

The frequent use of killing intent would make people think that he was a demon, but the Dragon's Prestige would only make people feel convinced and it would only have more benefits for Yang Chen.

In addition, his sea of consciousness directly expanded by more than three times, reaching 2,000 acres. Condensation has reached a dazzling realm, let alone, in this world, no one could damage Yang Chen's sea of consciousness, not even the master who was about to ascend after crossing the raging wind tribulation.

After the Three Purities Secret Art cultivation was completed, Yang Chen immediately turned to his body refining technique.

Chapter 420.2: Breakthrough

Originally his body refining technique was already at the peak of the mountain picking strength, and would soon enter the next realm of river turning strength.

Under the action of the Dragon Yuan, the body refining technique directly absorbed almost half of the Dragon Yuan into Yang Chen's body, and began to temper Yang Chen's body by the power of the Dragon Yuan. Under the influence of the body refining technique, Yang Chen's body shape began to change significantly again.

The original robust body, as if deflated, began to shrink slowly. But Yang Chen's physical strength has become stronger and stronger with the change of his body.

With one hand punch, even if he didn't use spiritual power, the power of the physical body alone, a peak Yuanying stage masters couldn't bear. Once he added spiritual power, there was no need to say more.

His figure has gradually recovered to its original length. Although it has not completely recovered, the robust body characteristics were completely missing. It's just a little bigger than it was when he had not started cultivating the body refining technique and it looks a bit more sturdy, but it was not freaky in the eyes of others.

The mere protection of his body has completely improved by a large level. The flying swords of the ordinary foundation and Jiedan stage cultivators could not pierce Yang Chen's skin at all. Without the golden ball, Yang Chen could also resist ordinary injuries.

Being able to cultivate the body refining technique to the realm of river turning strength in the mortal world, Yang Chen was fully confident that he could cultivate the body refining technique to the heaven raising strength after reaching the spiritual realm. This was something that has never happened before, even in the heavenly court. Yang Chen doesn't even know how powerful he could be when he reached that level.

The most difficult to cultivate three purities secret art and the body refining technique cultivation methods have both elevated to a new realm and the remaining Dragon Yuans were few. Yang Chen seized the time to cultivate the Yin-Yang five elements secret art

With the stimulation of the Dragon Yuan, the speed of the growth of his spiritual power of the five elements were staggering. Yang Chen, who was a Great Principle Golden Immortal before he was reborn, never lacked the state of mind, but at the same time as the spiritual power was upgraded step by step, the quality of spiritual power was also improved. While retaining the quality of spiritual power, it was already difficult for Yang Chen to improve with geniuses like Gao Yue and Gongsun Ling.

Ten spiritual power cultivation at the same time, and the additional spiritual power of Yin-Yang-Five-elements coexist and they need to go through a spiritual condensing process of the Yin-Yang five elements to overcome each other. In terms of the quality of spiritual power alone, Yang Chen does not know how many times he was higher than the equivalent.

This was why Yang Chen was only in the early Jiedan stage, but the measuring ruler indicates a value of more than 3,000 degrees, which was directly comparable to the master of the Yuanying stage.

But now driven by the Dragon Yuan, the growth rate has reached an incredible level. The Dragon Yuan dissipated quickly, but it wasn't a short time either. It took one month for the three purities secret art and the body refining technique, the Yin-Yang five elements secret art took three months.

Later, the Dragon Yuan became fewer and at the same time, the efficiency of the Dragon Yuan could only be used slowly. However, even so, Yang Chen was extremely satisfied.

In three months, Yang Chen was directly upgraded from the middle Jiedan stage to the late Jiedan stage. Even if Yang Chen was well-informed, he was taken aback by this crazy speed.

Fortunately, the Dragon Yuan produced by the Dragon clan has only been this way for thousands of years and when it encounters cultivators other than the Dragon clan, it would start to disappear, otherwise if the Dragon clan would always keep it in the mortal world, how many masters could it quickly create?

With the help of the Dragon Yuan, in the four month cultivation, Yang Chen's three purities secret art and the body refining technique promoted by a great realm, his spirit power cultivation base was also promoted.

These four months was already equivalent to the effect of a century of cultivation under ordinary conditions. It was the key to the promotion of his spiritual power, there purities secret art and body refining technique The two most difficult cultivation methods to improve were the most profitable in this cultivation.

This trip was really worth it. Although the danger was there, the gain was enough to make anyone who knew jealous. Of course, Yang Chen would not make such a mistake and tell others, that was only a fool's behavior.

As a matter of fact, Xiao Tian was the one who has gained the most. As a descendant of the Dragon clan, it not only swept the dragon qi here, but also gained control of the dragon palace. Most importantly, it has inherited the complete Dragon clan heritage, which was incomparable to any substantial benefit.

If it wasn't for Yang Chen's cultivation in the Dragon Yuan, Xiao Tian could even leave here. As a descendant of the Dragon clan, it could receive the benefits much faster than Yang Chen.

After receiving the inheritance of the Dragon clan, Xiao Tian generously gave all the palaces to Yang Chen, leaving only the dragon tower for itself.

Under the control of Xiao Tian, the palace complex of the Dragon Palace has directly turned into a small model that could be placed in the palm of the hand and received in the merit ring by Yang Chen.

This was the Dragon Palace, besides the efficiency of cultivating inside was definitely many times better than outside. At the same time, Yang Chen also had a plan of refining the shuttle that was also from the dragon clan, if possible, plus the golden ball, to become a super magic weapon with excellent defense and fast speed.

Basically, apart from these, there was not much left in the original Dragon Palace. There was an array that collects tenth water true essence, an array that protects the Dragon Palace from the whirlpool of the sea of no return and a powerful slate that carries the array.

Looking at Xiao Tian's face, Yang Chen would not move these things. Anyway, all the things were in the Dragon Palace, there was no need to uproot the Dragon Palace.

This trip to explore the sea of no return, the harvest was far more than Yang Chen imagined. Just in the interior of the sea of no return, they spent a year and five months before coming here. Gongsun Ling and Hou Yun must have been waiting in the periphery of the sea of no return.

Yang Chen was afraid that they would look for him regardless of the danger, but that would be bad and they would simply be in danger. Fortunately, it has been said that the time would not be too short when they were separated. He hoped that Gongsun Ling would not be too worried.

He took the Dragon Palace, then they returned to the side of the pit and remove the crystal stone from the pit. Yang Chen discovered that the monster strength's crystal that Lan Ying left behind also had only half power remaining, it was a small surprise.

The immediate priority was to meet Gongsun Ling and Hou Yun quickly and then quickly rush back to the Central Plains.

This time, Yang Chen with the strength of the Dragon Yuan, desperately promoted the three purities secret art's realm and his spiritual awareness was already on the verge of division. Gao Yue and Yang Chen have both cultivated Yang Chen's double cultivation method and they have also shared a lot of Yang Chen's spiritual awareness, so she could not share much for Yang Chen.

Yang Chen needs to consider whether to find Sun Qingxue and Shi Shanshan, his two nominal fiancées, to cultivate the highest mystery yin-yang heart sutra together.
