

## Zhanxian 531

### Chapter 531.1: Theft

These guys have been waiting for the opportunity. Li Cheng has the magic weapon containing the attack of the wind tribulation, they dare not act rashly in front of him. The four women have always acted together, there was a tortoise shield to protect them, and there was probably no chance. The only chance was when Yang Chen was separated from Li Cheng and the four women.

Yang Chen would definitely not be the first to enter the portal, who knows what's inside. At this time, it must be Li Cheng with a strong offensive power. Then Sun Qingxue with a tortoise shield was the second, followed by the others, Yang Chen would definitely be the last, and would not put his own women in a dangerous place.

They were very accurate, Yang Chen and the others entered the portal in this order, and when Shi Shanshan, the last of the four women, disappeared at the portal entrance, a dozen old demons had already vaguely surrounded Yang Chen.

When Yang Chen was in the portal, these old guys all saw clearly, it seemed that all the credit was on the black flying sword, and Yang Chen almost didn't do anything at all. Greed blinded their judgment, these people completely forgot the leisurely performance when Yang Chen used his fingers to test the strength of the demonic qi at first.

Everyone felt that Yang Chen's black flying sword was the key to purifying demonic qi, so they all started to play with the idea of getting the flying sword. There was such a strong demonic qi on this portal, who knows if there was any inside. If they could get this sword, even if they are the last to enter, there may be a considerable chance for them.

Choosing the right time, Yang Chen really fell into the trap, and no one came to rescue him. A lot of old demon heads felt hot in their hearts. Except for that black flying sword, Yang Chen has a lot of good things on his body. If they could catch them all in one go, the benefits would be no less than a trip to the Heart Demon Sect ruins.

Although someone had sworn the heart demon oath before not to deal with Yang Chen, it was before the door was opened. No matter what they do now, it would not break the oath. This was a godsend opportunity, they could only blame themselves if they don't take advantage.

“Black flying sword? Do you mean this one?” Yang Chen didn’t feel surprised at all, but took out the nine nether flying sword obediently and swung it slightly and asked the old guy who was directly opposite him.

“Yes, this is the one, put down the flying sword and nothing will happen to you!” The old demon on the opposite side sneered, completely devoid of the expectation that Yang Chen could open the door. On the contrary, he stared at the nine nether flying sword closely, as if he was looking at some peerless beauty.

After brushing, Yang Chen directly raised his hand and threw the flying sword in front of the old demon. The flying sword circled several times in the air, the tip of the sword rushed down, and it was directly inserted more than two feet in front of the old demon’s position. The hilt was still shaking tremblingly and the black body of the sword was indescribably dazzled.

Unexpectedly, Yang Chen would abandon his sword so simply. This could only be explained by one thing, that was, Yang Chen now has no life-saving materials to save him. More than a dozen dacheng stage masters bullied an early Yuanying stage junior, if they can’t get what they wanted, it would be too unreasonable.

Yang Chen was very cooperative, this made them feel very comfortable. Previously, Yang Chen and Li Cheng relied on their magic weapon for body protection plus the magic weapon of the wind tribulation, which caused everyone in the valley to lose face, and now they finally took the face back in their hands.

The old demon on the opposite side laughed and said to Yang Chen: “As long as you cooperate, I will spare your life!” In the smug laughter, he stepped forward slightly and reached out and grabbed the hilt of the nine nether flying sword.

Swipe, the flying sword was easily pulled up by the old demon, and he got it in front of his eyes. The old demon was about to investigate carefully. Suddenly, there was an aura that made him horrified. Under his shock, he was about to throw the nine nether flying sword far away, but suddenly realized that he was completely unable to perform the action.

His whole body seemed to have been frozen, and even the smallest muscle could not tremble. Not only that, but he even seemed to be in a strange space, where he could see nothing, hear nothing, the silence was terrifying.

There was a burst of unspeakable irritation in his mind. He wanted to shout, but he couldn't say anything. Under his depression, his body could finally act.

But the first action after he was able to move was to squirt out a mouthful of blood, and his whole face was constantly changing with various expressions, but the blood in his mouth was squirted out one after another, for a while, the ground was completely red.

The other old monsters around were shocked. The posture in front of them was obviously that they had miscalculated the situation. At this time, the first reaction in everyone's mind was to escape immediately.

It's just that it was too late to think of escape at this time. With a bang, the entire nine nether flying sword exploded, forming a large cloud of black fog covering the sky and the sun, covering everyone including Yang Chen.

Once engulfed in the black mist, everyone could no longer see anything, nor could they hear any sound, and even their spiritual awareness could not reach far, only two feet of things around their body could be detected.

Small black dust penetrated through their mouth, nose, eyes and ears, causing unbelievable tremors. The body seemed to have been cut by thousands of swords, the flesh and blood on the body flew up and fell from the air, the whole scene was like a blood sea slaughterhouse. If someone could see the situation in the black mist, they would definitely be frightened.

After a while, the black mist gradually faded, and all of it condensed in one direction, and soon returned to the appearance of a black flying sword. Except for Yang Chen, no one could be seen around. The dozen old guys just disappeared without a trace.

"I can't help it!" Yang Chen put away the nine nether flying sword, shook his head, and walked into the ruins portal like an okay person and his figure disappeared from the portal very quickly.

"All resolved?" Stepping out of the door, Yang Chen heard Gao Yue's familiar voice, and a smile appeared on Yang Chen's face for a while.

The four women and Li Cheng were both in the air. Yang Chen jumped up and floated to everyone's side, and then smiled and answered Gao Yue's question.

"It's resolved, it's okay." After giving the four women a smile, Yang Chen began to look around.

The boundary where everyone was now was the center of a huge plain. The plain was thousands of miles in radius, and at the far end of the plain was a circle of undulating mountains. The plains and mountains were densely covered with jungles. Standing on the ground, you can't see the surrounding scene at all, they were all blocked by the jungle.

They don't know why, in this space, there was no trace of demonic qi, which was very weird.

Chapter 531.2: Theft

"The demonic qi was absorbed and condensed by the formation on the stone slate of the site's portal, and it will not permeate here at all." Li Cheng saw Yang Chen's doubts and quickly explained.

Yang Chen only then understood, after looking around again, he found that there were only a few of them here. The old demons who had already come in were nowhere to be seen, no one else was around.

"The technique that can control the heart demon is very interesting and worth seeing." Li Cheng said as he looked around, judging the direction to go.

From the naked eye, nothing could be seen at all. This must be the gate of the Inner Demon Sect, but where was the specific main hall? After so many years, it has been surrounded and covered by these dense jungles.

It was estimated that after the old demons came in, they just chose a random direction and tried their luck. No one knows where the good things were, so they could only use this method.

There was no better way for Li Cheng. After all, it was a place that no one has been to. It was the first time to open it in tens of thousands of years or even longer. It was normal that no way could be found.

In all directions around, there was a spiritual power distribution, but it was very uneven. Moreover, it looks desolate here, and they don't know how long the protective formations inside have been ineffective. At least the place where the portal comes in was already surrounded by jungle plants, giving a feeling of vicissitudes of life.

"A'Ling, take a closer look at which direction we should go in" It's obviously not a good idea for everyone to find this way. Yang Chen turned to Gongsun Ling and asked her the line of passage everyone should explore.

Naturally, Gongsun Ling, who has the geographical map of mountains and rivers, was most suitable for such things in the ruins. As long as she walked around this area, basically all the terrain would be formed in the mountain river geographical map. As the owner of the mountain river geographical map, Gongsun Ling could easily find any suspicious locations.

Following Gongsun Ling's guidance, the group of people sat in the shuttle and circled fast on the plain in less than half a day. These tens of thousands of miles of rivers and mountains have been formed in the mountain river geographical map, and Gongsun Ling soon discovered an unusual place.

"There are a lot of architectural ruins on the surrounding mountains in four directions, but they are all dilapidated, and you can't see what buildings they are." Gongsun Ling pointed in four directions one by one, and said to Yang Chen.

Yang Chen's spiritual awareness has reached its maximum, and now he has explored the mountains thousands of miles away. His spiritual awareness threads felt the silhouettes of the old demons scattered in various directions, analyzing which direction the old guys had taken the most.

"Where are the traces of the formations?" Yang Chen asked again, after thinking about it, he added "The traces of the strongest protective formation. Also, the location where the spiritual veins are most concentrated."

The best things were definitely the best protected. Therefore, the strongest defense formation was definitely the thing that was most needed to protect. Spiritual vein was the foundation of a sect, as long as you find these two things, you don't have to worry about finding precious materials.

In the direction where the old demons have the most people, it seems to be the biggest spiritual vein. However, if something like a spiritual vein was opened to protect the best thing, it must be the one that consumes the most. The spiritual vein with the strongest spiritual power now may not necessarily be the spiritual vein with the strongest spiritual power back then, after tens of thousands of years or even longer consumption, who knows what would change.

Gongsun Ling herself was a formation cultivator, so her sensitivity to formation was not comparable to others. In particular, she had something heaven defying like the mountain river geographical map. After careful analysis and comparison, two places were identified.

The two places were basically in the same direction, all of which are in line with these two characteristics, there are traces of formations, and there are exhausted spiritual veins around, and some not too strong spiritual power has just been brewing.

In fact, there were more than 20 places that meet these two characteristics, but the formations in these two places were quite special. One has the largest range, which encloses a huge building complex, while the other has the smallest formation range and only protects a room the size of it.

The formations in both places have failed, but they were the most doubtful. Others don't have Gongsun Ling's means, so they could only find the spiritual veins that seem to have the strongest spiritual power now. They don't know that those spiritual veins are strong because they have never been consumed and have been gestating.

Finding the old demons over there, although they dare not say that there was no gain, it was certainly not the biggest winner. At least Yang Chen had discovered that the twenty-odd places with traces of formation were basically the first group of old monsters who were looking for them. After all, three days in advance, the area of ??tens of thousands of miles was enough for them to eliminate some impossible places first.

However, for the remaining twenty or so places, no one could tell which one it was, and could only occupy one place for a while and look for it carefully. This was a job of luck, and naturally it was also the eyesight and opportunity of everyone.

In this direction where Yang Chen and others rushed, there were two old demons, but the two old guys were all concentrated on the trace of the formation in the area. There was a large group of buildings there, and it takes time to find something suitable.

This area was almost four to five hundred miles in radius, and the two old demons each occupied one direction to check carefully. In other directions, there were already a few sporadic figures looking for the places with traces of the formation. It was estimated that they are the second batch of cultivators to come in.

The area was so large that not a few people could control it. Seeing this, Yang Chen simply went to the smallest place first. The size of the room does not take long to search.

Gongsun Ling pointed the way, and Yang Chen drove the shuttle, wrapped in the sea jasper lamp, quietly bypassing the large building complex from the ground, and went straight to the small protected area.

When they arrived at the ground, everyone came out of the flying shuttle, looking at the small ruins covered by various plants in front of them, they couldn't help but sigh. No matter how powerful the protective formation was, it seems that it can't compete with the years.

The formation has been completely invalidated. The original stone room should be protected. But now the stone room was also rooted by various jungle plants. In this corner, there was still a corner of some stone sculptures exposed.

"Let's search around!" Li Cheng said, and everyone began to look carefully here.

The place was really small, everyone was a Yuanying stage master, who could easily dig three feet into the ground. Soon, Shi Shanshan found a piece of jade slip from the ground that looked a little incomplete.

Chapter 532.1: The Origin Of The Heart Demon Sect

"What have you got there, can you show it to this old man?" While Shi Shanshan was holding the jade slip and using his spiritual awareness to probe, an abrupt voice suddenly came over.

The master of the voice thought that his sudden voice would surely make these juniors jump in shock. But his voice has been on the ground for a long time, but the few people have not even the most basic surprise, as if they have already known that he has followed them.

“It’s just a piece of broken jade slip, wait until we finish reading it.” Yang Chen said smoothly without even turning his head, not taking the guy who followed him seriously.

The old demon who made the sound was also considered a dexterous generation. He didn’t come in the first few batches, but in the middle and back order, probably half a day earlier than Yang Chen and the others.

The old man thought about it after he came in, because the time he came in was almost two and a half days, so in any case he couldn’t keep up with the old guys who came in the first time. But he was not reconciled to get nothing, so he thought about it. He felt that Yang Chen and the little guys were a bit mysterious, and maybe they could gain something.

So, the old demon guarded near the gate, waiting for Yang Chen and the others to come in. Sure enough, as expected by the old demon, when Yang Chen and the others came in, they looked for a different direction from the others, which made the old demon surprised and happy, and finally decided to quietly follow Yang Chen’s group.

However, Yang Chen’s shuttle was too fast for the old demon to catch up. But he was not afraid of losing them, because the old demon has a magical cloud sable pet, which could track the smell of people thousands of miles away. Before Yang Chen and the others came in, the old devil had already let his pet remember the smell of Yang Chen and the others, so even though Yang Chen and others were fast, the old demon was still far behind.

The reason why Yang Chen wanted to sneak around those old guys was not because he was afraid of them, but because he was buying time and being afraid of being disturbed. After all, there are so many destinations to choose from, and if the target you choose was known to others, it would be troublesome, so there was no big fight on the road.

After coming over and starting to search, Yang Chen and Li Cheng soon found the old guy who was sneaking over. However, the old demon didn’t care who was there alone, so he didn’t reveal it aloud and looked for it himself.

Now the old demon jumped out by himself, and no one paid much attention either. What everyone cares about is what was recorded on the broken jade slip that Shi Shanshan found.

“Boy, don’t you want to give me any face!” Listening to Yang Chen’s words that made him wait without care, the old guy suddenly became furious. When did the dacheng stage demon cultivator feel so angry with the younger generation?.

“Want to die?” Li Cheng was even more annoyed. He turned his head and stared at the old guy and asked.

In Li Cheng’s hand, there was a magic weapon containing the power of the wind tribulation. A cultivator who was more powerful than the old guy also turned into ash under one blow. This was what he saw with his own eyes. Even if there was only one blow left, it was not something he could bear. He was alone in front of him, so it was better not to suffer the immediate loss.

Looking at the old demon who suddenly became honest and well-behaved, Sun Qingxue next to him couldn’t help but laugh.

Sun Qingxue’s laughter made the old demon blush for a while, but the old demon, who was next to Li Cheng, did not dare to express anything but stared at Sun Qingxue fiercely with a hateful look, and then turned his head away.

Shi Shanshan had quickly read the records on the jade slip, and then handed the jade slip to Yang Chen as usual. Yang Chen took it and swept away his spiritual awareness, but the content was not much, and Yang Chen quickly understood it.

After that, Yang Chen gave the jade slip to Li Cheng, and Li Cheng gave it to Sun Qingxue. After turning around in the hands of Gao Yue and Gongsun Ling, it finally returned to Yang Chen’s hands.

“Look again to see what’s there.” Yang Chen, who got the jade slip, didn’t mean to show it to the old demon, and put it directly into his qiankun bag.

This scene caused the seven orifices of the old demon standing beside him to breathe fire. Looking at this posture, these young people didn’t take him seriously at all, as if they hadn’t seen him. What else could make him angry more like this naked neglect? He almost couldn’t help but be violent, but in the end he was overwhelmed by Li Cheng and didn’t dare to speak rashly.

What was recorded on the broken jade slips was not about a precious pill recipe, but a brief introduction to the Heart Demon Sect. How the heart demon sect was formed, how many years it has been here, how the ancestors established the sect by relying on a ray of demonic qi to achieve the dao, etc and so on.

This jade slip, if they put it in the old demon, it was estimated that it was taken directly and thrown away. But before the old demon saw it, he thought it was a terrific record, and he was itching to look at the contents of it in almost every possible way.

Others searched for more clues among the ruins, but Yang Chen stood by and starred in a daze. This jade slip should summarize the details of the record, especially how the ancestors of the Heart Demon Sect used a ray of demonic qi to achieve the dao, and the story was lifelike. There was even a record of when the demonic qi appeared.

According to this record, the demonic qi was not born in the Demon Continent, but suddenly appeared on a certain day. According to the ancestors of the Heart Demon Sect, it may be that a certain point of the Demon Continent suddenly communicated with another realm, and these demonic qi oozed out.

The demonic qi was not strong at the beginning, only faint strands. The ancestors of the heart demon sect were invaded by the demonic qi, and then in the process of fighting the demonic qi, they discovered the benefits of the demonic qi for tempering the heart. So it took almost a few hundred years to research and master the demonic qi. The way of cultivation, and the creation of the heart demon sect.

So much was recorded on this broken jade slip. While Yang Chen was thinking about it, Gongsun Ling yelled happily and found another piece of jade slip, which was also broken.

The old demon next to her was overjoyed, and immediately felt a look that made people feel stressed. Taking a look at Li Cheng, Li Cheng stared at him with a smile that was not a smile. The old demon's heart felt cold, and he shrank his neck obediently and he didn't dare to move.

"It's still a story, it's boring." Gongsun Ling grumbled after scanning it, and handed the jade slip to Yang Chen.

“This is the real treasure!” Yang Chen took it over and swept it with his spiritual awareness, and then the smile on his face became even brighter, and he said casually.

#### Chapter 532.2: The Origin Of The Heart Demon Sect

“The real treasure?” The old demon who was listening next to him trembled in his heart, and finally couldn’t help it and started to take action.

Yang Chen’s hand shook violently, grabbing a green light that flew to his hand. The green light stopped and returned to a small green mink, which was being pinched by the neck, struggling non-stop.

The old demon had already sacrificed his flying sword, but seeing this scene, he was suddenly alarmed, he could no longer attack Yang Chen and he quickly retreated wanting to escape.

The little green mink was the cloud mink he used to track the whereabouts of Yang Chen and others. Its speed was extremely fast, and when it was dispatched, it was silent. Even if the old demon himself didn’t have a relationship with the flying sword, he would not be able to find the flying sword’s trace. The old demon had secretly used it on several cultivators who were having even higher cultivation bases than him, and no one survived.

Just now, the old demon ordered the cloud mink to snatch the jade slips in Yang Chen’s hands. Yang Chen was able to catch the cloud mink at such a speed, the speed and accuracy alone was superior to anything else. The cloud mink used to be able to figure out dacheng stage masters, but now it was caught by Yang Chen. If he doesn’t run at this time, when will he escape?

It’s a pity that the old demon’s calculations were still somewhat wrong. The pressure Li Cheng put on him was so great that even Gongsun Ling had already set up her formation and didn’t notice it. He fled out dozens of feet as soon as he shook his figure.

After running for a while, the old demon realized that something was wrong, it seemed that no one was chasing him. Turning his head, he didn’t see anyone’s figure, and his spiritual awareness couldn’t detect the existence of anyone.

How could this be? Just now Yang Chen and the six of them were still there, why was it empty now? The old demon didn’t believe his eyes, so he took courage and turned back.

What excited the old demon was that there was really no one in the ruins, Yang Chen and Li Cheng didn't know where they had gone. The old demon was overjoyed, a god-given opportunity. He could also see what the real treasure Yang Chen mentioned was, he quickly made up his mind and began to look for it carefully by himself.

Gongsun Ling put away the mountain river geographical map, her small face full of smiles. With the addition of a dacheng stage master, the mountain river geographical map was getting better and better.

After handing the jade slip to Li Cheng, Yang Chen began to ponder again. This piece of jade slip records the reason why the sect closed and left.

The demonic qi was getting stronger and stronger, the center point of the demonic qi could no longer be approached, the surrounding demon beasts were all demonized, and their strength had been improved.

Most of the disciples of the Heart Demon Sect couldn't bear this degree of demonic qi. Although the formations left by the sect could effectively shield the demonic qi, it was not a long-term solution after all.

Groups of demonic fiends began to attack the Heart Demon Sect. Countless disciples who had gone out to cultivate were slaughtered, and the demonic qi was madly infiltrated. It was no longer possible to stay here, and the sect could only choose to leave.

However, people leave, but these foundations left by the sect cannot be lost, especially some of the pure heart magic treasures left by the ancestors that rely on demonic qi to refine, have not been completed, as a last resort, the sect could only seal the mountain gate. The seal was left to be opened by the descendants of the sect.

If they want to completely solve the problem of the demonic qi, they need to destroy the center point that oozes the demonic qi. The trouble was that the ancestor of the Heart Demon Sect, who had the highest cultivation base back then, could not do anything about the exudation point.

According to the speculation of the ancestors of the sect and later masters, that point was a point that crossed the two realms that they did not know how it appeared. To destroy it, one must have the power

to cut the space. It was almost impossible to have this ability, unless they could get another magic weapon that could cross the two realms.

Gongsun Ling may only see the history of the Heart Demon Sect and the reason for leaving from this, but Yang Chen saw more.

The reason why they came in was to be able to get some cultivation methods. Regardless of whether it was a dao path, the demon path, or the monster race, this method of heart demon cultivation was a treasure. No one could hide from heart demons, even Yang Chen was no exception. But if you can use the inner demons as a boost to your own cultivation, the efficiency of your cultivation would be doubled.

Although the two jade slips did not record any cultivation techniques of the heart demon, Yang Chen could probably guess some clues based on the origin of the heart demon sect.

Since the ancestors of the Heart Demon Sect relied on a wisp of demonic qi to trigger the Heart Demon, and after overcoming the Heart Demon, they were able to start a sect. What was the difference between this process and Yang Chen leading the four women to use the Nine Nether Flying Sword to cultivate the Heart Demon? Even if Yang Chen and the four women were allowed, they could also use this method to find a way to cultivate the heart demon.

Perhaps the only difference that needs to be said was that with the ancestors of the heart demon sect, the demonic qi was not fierce, but now that the demonic qi was rich, it wasn't known how many times it was and the difficulty of cultivation was higher.

In this way, it would not make much sense for Yang Chen and the four women to find any cultivation techniques of the heart demon sect. As for Li Cheng, Yang Chen even doubted whether Li Cheng had already mastered this method, as he had never been troubled by demonic qi.

What worries Yang Chen was the record in the jade slip that the demonic fiends had attacked the heart demon sect in groups, which was really beyond Yang Chen's expectation.

He knew that the demonic fiends were eroded by demonic qi and turned into monsters with only instinct but no thinking. Could it be that they could be commanded a long time ago?

If this was the case, then the Demon Continent was likely to brew a huge disaster, once the strength of the demonized demon fiends breaks through the outer sealed circle, then the mortal world would suffer a catastrophe.

It was known that the demonic qi could increase the strength of demonic fiends. Now both demonic qi and demonic fiends were trapped in the demon continent. Once it spreads to the sea outside, and then reaches the territory of the dao sects, it would be absolutely a disaster of extinction.

The problem was that no matter how good the sealing formation was, it was also vulnerable to a single blow in the face of the long river of time. This could be seen from the ruins of this heart demon sect.

Now the sealing circle of the Demon Continent could still seal the demonic qi, but what about thousands and tens of thousands of years later? Does the day when the spiritual power runs out, does it mean that the mortal world would become a demon realm?

Yang Chen was not a saint, but in the face of this kind of thing, he would also do his part. Destroying that demonic qi oozing point was a great merit in itself. If there was a chance, Yang Chen doesn't mind making a point of merit.

Of course, these were all speculations, and no one could confirm them. Moreover, it was not that a disaster would happen soon, and it was impossible to say whether the demonic qi would automatically shut down in the future. Yang Chen was thinking about this now, it was not realistic.

While thinking, Gao Yue found another piece of jade slip. On this piece of jade slip, there was a method of fusion and use to cut off the space of two realms, which was speculated by a master of the heart demon sect.

It's just that this method requires another spatial awareness that could cross the two realms to be successful, but in this ordinary time, where does the spatial awareness that crosses the two realms come from? This was not the space of the qiankun bag, it was just a spell of the universe in the sleeve, and the difference between the two realms was not the same.

Crossing the space of two realms, this was not a spatial spiritual awareness communication, allowing the spiritual awareness to enter another realm. Just thinking of the spatial spiritual awareness cultivation method, Yang Chen suddenly vibrated and thought of a space that crossed two realms.

## Chapter 533.1: Dream

The immortal executioner stage, this was another magic weapon that Yang Chen remembered that could cross two realms, and it could be regarded as the only space that could cross the two realms. The immortal realm could send the prisoners to be executed into the immortal executioner stage, but the executioner enters from the mortal world, which was absolutely crossing the two realms.

What was recorded on this jade slip was simply a method of directly refining the space. It was just a guess, and it had never been tested.

The guy who came up with this method probably didn't have the opportunity or the ability to test the place where the demonic qi erupted, and it was definitely not something that ordinary people could bear. This could be seen from the fact that the entire heart demon sect was forced to move and sealed the sect.

Others did not have the experience of Yang Chen, and naturally they would not have thought that there would be something like the immortal executioner stage. But in Yang Chen's eyes, this was simply a mouth-watering meal.

It's just that Yang Chen won't rush this idea at this time. Not to mention the usefulness of the method in this conjecture, Yang Chen was not sure if he could find the entrance again just because of the illusory location of the immortal executioner stage.

Li Cheng didn't say anything. It was estimated that in his eyes, he has only seen some of the origin of the heart demon sect and the ability to cultivate with demonic qi, which was of no significance to him.

But in the eyes of the four women, these three pieces of jade slips were quite different, anything that could make Yang Chen say that they are treasures, they were definitely good things. The head of their family dare not say anything else, his vision was definitely first-class, and he has never lost sight of what he was after.

The four girls, while continuing to search for anything worth seeing, wondered in their hearts.

In fact, Yang Chen had already hinted enough that the Heart Demon Sect was able to cultivate with demonic qi. What was the difference between this situation and the practice of using the nine nether flying sword with the help of Yang Chen before? It's just that the predecessors of the Heart Demon Sect have summed up a set of systematic cultivation methods in hundreds of years.

These four wives of Yang Chen, whoever took them out, were all talented geniuses, and they could naturally understand such hints. What's more, besides the introduction, the content on the jade slip also briefly summarized some methods of using demonic qi.

These were enough, enough for the four women to combine their actual conditions to sum up a set of effective cultivation methods.

What kind of cultivation method was more suitable for you than the one tailor-made according to your own situation? If you are a mediocre person, these words were naturally a lie, but these problems do not exist for the four women, especially if you have Yang Chen and Li Cheng next to them, they don't need to worry.

After searching carefully, there was no other thing worth checking. In this room, it seems that there are only three pieces of jade slips left. There were also some wooden spirit positions, which have long been decayed, and only a few pieces of spirit card fragments made of some special materials could make people recognize what these are.

This place was obviously the ancestral hall of the heart demon sect, no wonder the heart demon sect uses a spiritual vein to protect it. It's a pity that time flies, even with the support of the spiritual veins, it would not escape the decaying fate in the end, only these unweathered jade slips were left.

With these three jade slips, there was no need to think about other things at all. There was no need for the cultivation method, if it was a magic weapon, to be honest, everyone was from a sect, so there was really no need for [suppression] of the demons. Those things, at best, are the icing on the cake, and they could never be the icing on the cake.

That being the case, there was no need to quarrel with those old guys who were looking for things. It's better to find a safe place to figure out how to use the demonic qi.

The purpose of coming to the Demon Continent was to gain experience, except for the experience of killing, the rest was the influence of demonic qi. Now that there was a method guide from the predecessors of the heart demon sect, it was a rare opportunity for everyone.

The four women talked about their plans, Yang Chen and Li Cheng had no objections. They know what Li Cheng was thinking, but Yang Chen also planned to try that piece of method about refining the connection between the two realms.

As for the choice of location, everyone gathered together and decided to choose near the portal of the Heart Demon Sect. If they want to leave from here, they have to go to the door.

Isn't it a pity that so many dacheng stage masters of the magic path let them take their things and leave? For one, they didn't get any experience from them. For another, Gongsun Ling's mountain river geographical map was more powerful than the cultivators, and it would never be too many.

When it comes to the realm of cultivation, Gongsun Ling was now the highest. Because of the support of the mountain river geographical map, and a group of masters in the Yuanying and dacheng stage unconsciously helping Gongsun Ling to refine her life source magic weapon, Gongsun Ling's cultivation base has been improved all the way, and the turtle head was monopolized among the four girls. She was now in the middle Yuanying stage close to the late Yuanying stage.

Next was Shi Shanshan. It must be said that Shi Shanshan's combat awareness was definitely the strongest among the four women. She has not even dabbled in refining alchemy, focusing on cultivation and flying swords. Under these circumstances, her will was tough, her cultivation base was pure, plus her original cultivation time was longer than the others, her realm was second only to Gongsun Ling, and she has also reached the peak middle Yuanying stage.

Then there was Gao Yue, because she was a water and fire dual cultivator, combined with the support of the water and fire dragon horn flying sword, and the help of the purple heart heavenly fire prepared by Yang Chen, although she has not been able to absorb and refine the purple heart heavenly fire, she was still very diligent. She has broken through the early Yuanying stage and has reached the middle Yuanying stage.

The worst was Sun Qingxue. Despite her outstanding aptitude, because of the abolition of her cultivation base at the beginning and the doting of Hua Wanting for a while, Sun Qingxue started a little later than the other girls. But even so, she was already at the peak early Yuanying stage, and it was only a millimeter difference compared to Gao Yue.

Regarding the realm, it was Yang Chen, the husband, who was the worst among them. In these days when he came to the Demon Continent, Yang Chen spent most of his time practicing with the heart demon, with few killings. In addition, the ten spiritual powers of the Yin-Yang five element secret arts were improved, which was much slower than that of the females.

However, when it comes to combat effectiveness, Yang Chen was not afraid of anyone except Li Cheng. The four wives know this, and no one would compete with Yang Chen on this.

Li Cheng didn't seem to have changed anything else. In the early Yuanying stage, it seemed that he was not very diligent, but Yang Chen couldn't see through him all the time. Fortunately, he was now a friend and not an enemy, otherwise Yang Chen really doesn't know how to get along with Li Cheng.

Soon everyone rushed to the entrance gate. When they were here, Gongsun Ling directly unfolded the mountain river geographical map, covering all the surrounding area of more than ten miles under the coverage of the mountain river geographical map.

Chapter 533.2: Dream

Gongsun Ling was now in the middle Yuanying stage, and she had more control over the mountain river geographical map. She believes that even if someone comes here, without the perverted strength of Yang Chen and Li Cheng, they would not be able to find that they are already in the mountain river geographical map. In the formation. ..

Once trapped in the formation, in addition to being trapped by the formation, they would also be attacked by the masters in the mountain river geographical map and they would not be able to escape.

This was definitely a once-and-for-all method, anyway these people always have to leave, as long as they come near here, with a low cultivation base and low defense, they would be directly sent to the mountain river geographical map.

As for those defensive guys, they would eventually be attacked by a group of four women. As long as those guys were not teamed up, no one could resist the combined attack of the four women alone.

The mountain river geographical map plus the four women, not to mention the pressure from Yang Chen and Li Cheng, could definitely take a lot of advantage here. It could be said that Gongsun Ling's mountain river geographical map would be even more powerful.

It's a bit insidious to say, but it's not a place of morality in this demon continent. Those guys haven't paid attention to Yang Chen and others until now, because they were still searching for good things. When they vacated their hands, the first one to deal with was Yang Chen and the others.

The method of purifying the demonic qi was the reason for those people to take action. Who doesn't know the benefits of demon orbs? Yang Chen could completely purify it, how could they compare with his own complete purification? This method must be in his own hands, even if Yang Chen refuses to hand it over, this person must also control it. On the Demon Continent, there was no reason, but strength was the reason.

Li Cheng was very relieved, he sat directly on the ground. Silently retreat and cultivate, without any precautions. Next was Yang Chen, followed by the four women.

Gongsun Ling was the last one and she was also responsible for everyone's safety and security. However, with the support of the mountain river geographical map, everyone was confident and bold in cultivating, even if there was any danger, there was no need to worry.

The four girls were all comprehending the method of fighting against the inner demons, but Yang Chen began to carefully study refining space.

He doesn't know how the ancestors of this heart demon sect imagined it, crossing the two realms in space. Even thinking about refining it for personal use. But this was not wishful thinking, but a very reasonable speculation.

At least based on Yang Chen's experience, this method has absolute operability, and it also has unique insights into the connection between the two realms. If it weren't for Yang Chen's previous life and he had been to the spiritual realm, he also has detailed memories of flying across space, then maybe he can't understand some of the statements inside.

But Yang Chen was not tempted, a highly maneuverable technique, plus the entrance of the immortal executioner stage, if it could be refined by Yang Chen and integrated into the immortal beheading blade,

the immortal beheading blade would immediately have the power to cut space. This was a terrifying power that cannot be possessed even with the blessing of Xiao Tian. At that time, who would be Yang Chen's opponent?

Just studying the methods, Yang Chen spent half a year comprehending word by word. Combining his own memory, carefully pondering the mystery and understanding the mystery of space. After half a year, Yang Chen finally breathed a sigh of relief, completely deciphering this technique.

It must be said that the ancestor of the Heart Demon Sect was indeed powerful, and it was possible to deduct this method to this point by relying on imagination alone. Although there are some, but also because of the flaws caused by the inability to actually operate, Yang Chen could completely rely on his own experience to make up for it.

The rest was for it to be tested at the entrance of the immortal executioner stage. But at this moment, Yang Chen hesitated a little. For one thing, he hadn't thought about it for a long time, and he didn't know if he could reach the entrance. Secondly, if he refines the entrance of the immortal executioner stage, if the immortal world has trouble again in the future, he won't know how to solve it.

But Yang Chen soon let go of these worries. If he could find the entrance to the immortal executioner stage, he will just have to try to find out, he doesn't need to worry at all.

As for future troubles, because he left the immortal executioner stage, the executioner was not dead, and it was impossible to replace another executioner in the mortal world. After refining the entrance, maybe he could still get in and out at any time. Isn't it the way to solve the problem?

The only trouble was that Yang Chen hoped to refine the entrance of the immortal executioner stage and the immortal beheading blade together, and now that the Immortal beheading blade has reached the final stage of refining as his life source magic, it would take some time to complete. It may not be possible at this time and it needs to be postponed.

Regardless of these, Yang Chen still has to try if he could find the entrance to the immortal executioner stage. The last time he entered the immortal executioner stage, it was through a dream, but Yang Chen knew that it was the immortal realm that used great strength to summon him, and it took so many masters' cultivation bases.

Now he wants to find the entrance to the immortal executioner stage by himself, but it may not be that easy. Yang Chen has not slept and dreamed for many years, it was not so easy to relive it once again.

The first was to sleep. Yang Chen's cultivation base does not allow him to fall asleep naturally. He can't guarantee that he can still dream with the help of drugs or other means, this was the problem.

"What's the difficulty?" When he finished explaining the method and talking to everyone, the girls were a little puzzled about Yang Chen's requirements for dreaming, but Li Cheng said in a big way "As long as you are tired, won't it work?. Isn't it easy to go to sleep to recover from your work? If you fall asleep, you might be able to dream."

Speaking of which, Yang Chen has forgotten the feeling of ordinary people because of his long cultivation journey. As long as you are tired, you will naturally sleep. When you fall asleep, dreaming is possible.

The way was the way, but for Yang Chen, it was a troublesome thing. It was by no means so easy to let the current Yang Chen with his cultivation base become exhausted. Even if it was something that could consume energy, Yang Chen couldn't help it to recover quickly on his own.

"Try your best to attack and defend!" Seeing Yang Chen's embarrassment, Li Cheng smiled and said, "It just so happens. I want to try my skills too. Let's play a game, how about?"

Before Yang Chen had time to answer Li Cheng's proposal, the four women had already applauded. They have already seen Yang Chen's skill, but Yang Chen has improved again and the girls were not very clear about his strength. As for Li Cheng, he was even more mysterious. Now that he was actively trying to compete with Yang Chen, how could it not make the four girls happy?

"The fight might shock those people, why don't we go to the mountain river geographical map to fight?" Li Cheng looked at Yang Chen and said slightly provocatively.

"Okay, let's do it!" Yang Chen also deliberately weighed Li Cheng's fictitiousness and reality. This proposal was right in his arms, and he immediately agreed.

Chapter 534.1: Battle

Yang Chen fought with all his strength, and no one had seen him do so, including Yang Chen himself. In the mortal world, it seems that there has not yet been an opponent who Yang Chen needed to use his full strength against. But now, there was one.

Li Cheng was able to kill the great elder of the Greatest Heaven Sect with a single sword strike. This strength has surpassed the strongest in the mortal world. With such an opponent, Yang Chen couldn't help but get excited.

Everyone was in the mountain river geographical map, even Gongsun Ling was no exception, no one wants to miss this rare competition.

"Don't hold back!" Li Cheng stared at Yang Chen with the same excitement in his eyes "I know you are strong, but don't worry about hurting me."

These words were simply arrogant, Yang Chen's spiritual awareness had reached the third grade human immortal realm, the level of the Yellow Turban warrior's refining technique had reached the river turning strength, it was not something an ordinary master could take on. Even if he was replaced by the ascended Elder Wu Xiongwu, he did not dare to say that Yang Chen could not hurt him.

But when Li Cheng said so, Yang Chen didn't doubt it at all. This was not Yang Chen knowing Li Cheng's details, but pure intuition, the kind of intuition of facing peerless masters.

Since Li Cheng said that, Yang Chen hadn't planned to keep his hands, so naturally he was going to fight with all his strength. He yelled at Li Cheng "Brother, be careful!" and he rushed directly at Li Cheng.

In the beginning, Yang Chen did not use magic weapons, but purely attacked with his fists. He wanted to know the gap between himself and Li Cheng in all aspects. In the memory of his previous lives, there was no concept of such a peerless master as Li Cheng and Yang Chen was also eager to know some details about Li Cheng.

"Good come!" Li Cheng's eyes were equally excited. The same bare-handed greeted him, and blasted out with a punch.

Bang, the two fists slammed into each other firmly and Li Cheng snorted, his body flew backward like a kite with a broken line.

The river turning strength was definitely not something that everyone could bear. You know, this was a technique that could only be cultivated by those yellow-turbaned masters in the immortal world, and he has cultivated it to this point. Even the ordinary immortals can't compete, let alone the mortal world?

Even if Yang Chen hadn't experienced various baptisms of the heavenly tribulation and his body hadn't been as powerful as a real yellow turban warrior, after all, the realm of his physical training had reached there, Li Cheng and Yang Chen compared with physical strength, Li Cheng was definitely not his opponent.

Under this situation, Yang Chen once survived the tribulation. His body would be strongly transformed, it could be said that every time the tribulation was passed, the strength of his body would be more than ten times higher than the original.

Li Cheng's body flew far away. But he immediately controlled his figure in the air, laughed and yelled, and after a little adjustment, he rushed towards Yang Chen again.

With a punch, Li Cheng took advantage of the force to fly out, but his body was not damaged in the slightest. This strength has already impressed Yang Chen. In Yang Chen's imagination, even if he was as strong as Hou Yun, he might not be able to block his punch. Even if he takes advantage of it again, he will always be hurt by his fist. Li Cheng's performance was beyond his imagination.

Seeing Li Cheng coming, Yang Chen was naturally unwilling to show weakness and threw his fist to meet again, and the two fought like this.

This time, Yang Chen didn't just fight Li Cheng with his fists, but applied the attacking techniques that he had trained in the Demon Continent, which was simple, straightforward, and fierce. Not only that, but Yang Chen's body style has also become ghostly, swift, and angled. In an instant, Yang Chen was surrounded by Li Cheng.

Or to be more precise, in Li Cheng's eyes, apart from Yang Chen's fist, there was nothing else around him.

It's just that Li Cheng was so irritable, he laughed long, and immediately waved his fists and started a counterattack.

The sound of banging was endless, but the four women around could no longer see the trajectory of the two people's attacks, only two vague shadows moving at a very fast speed could be seen.

The spiritual awareness of the four women firmly locked Yang Chen and Li Cheng. This level of battle could definitely benefit them a lot.

On Li Cheng's body, they don't know how many punches Yang Chen had landed. This time Li Cheng didn't use his strength to fly out, and Yang Chen didn't give Li Cheng a chance to fly out. He had just received a punch in the front of the chest, and there was no movement in his body, so he received another punch in the back, so fast. Even with the help of the absorption outline, it can't be done.

It seems that Li Cheng also knows that Yang Chen was great, and he didn't evade at all. At the same time, he was watching Yang Chen's flaws and constantly swinging his fists to counterattack. The fist hit Yang Chen's body, causing a dull voice.

Both of them were people who could find the opponent's attack position in an instant, and their fighting consciousness was almost equal. Often when Yang Chen hits Li Cheng, he will also be heavily attacked by Li Cheng.

It has to be said that Li Cheng's toughness was beyond Yang Chen's expectations. Even in the simple comparison of strength, Li Cheng was not as good as Yang Chen, but the difference was limited.

The power of each punch was almost able to shake the tough skin that Yang Chen has tempered by the Yellow Turban Warrior Body Refining Technique, and the force reaches the internal organs. Fortunately, after all the power had experienced the buffer of the flesh and blood of the epidermis, it was no longer so lethal, just shocking the internal organs.

If Li Cheng's strength was stronger, Yang Chen knew that he would be violently shaken and injured. But even so, Yang Chen's internal organs have to withstand a tremendous force of shock, which was also mixed with great pain for Yang Chen, who has not been able to synchronize the power of physical cultivation to the internal organs in the high section of the river turning strength.

However, the opponent Li Cheng was also uncomfortable. How could Yang Chen's strength be easy to handle for ordinary people? With a punch, almost the whole body was shaken, and wherever he punches, it often ends with broken muscles and bones. Fortunately, Li Cheng's recovery ability was more terrifying than it seems, between the intervals between the two punches, the places that were injured by the punches could be restored as before.

What was particularly scary was that after each recovery, that part of Li Cheng's body seems to be a bit tougher than before. Although Yang Chen's boxing power was great, at this moment, it seemed that he was helping Li Cheng temper his body.

In the same way, Yang Chen's internal organs were the same. After each punch shakes it, Yang Chen would quickly call the yellow turban warrior body refining technique to quickly recover. After hundreds of punches come down, he would not see any movement in the internal organs for a long time. There was also some looseness, and Li Cheng's fists began to slowly begin to temper him.

The more they fought, the more enjoyable they became, and they had forgotten their original intention at the beginning, and were immersed in this process that they could both vent and take the opportunity to experience.

#### Chapter 534.2: Battle

The four women watching from the periphery couldn't feel the changes in their bodies, but the combat experience they used made the four women like a treasure, indulged in them, and could no longer extricate themselves.

The attacking enemy must use speed, strength, angle, and timing. Although Yang Chen and Li Cheng just clashed fists together, the fighting consciousness that came out was unprecedented, and it was so wonderful that the four girls were even more excited. They didn't dare to slack off a little, for fear of missing any small battle scenes.

Unknowingly, just this brute force duel has lasted a whole day. Yang Chen hit Li Cheng with a fist, and he could already feel the stronger counter-shock force. In the same way, Li Cheng's boxing power seemed to have no effect on Yang Chen's internal organs.

"More!" Li Cheng became more and more addicted, yelling at the booming popularity, and then, before Yang Chen had any means, his spiritual awareness had already pierced Yang Chen like an invisible sharp sword.

Yang Chen's sea of consciousness, before being stabbed by Li Cheng's spiritual awareness, had already begun to churn. Almost at the same time, Yang Chen's counterattack had already begun.

The two spiritual awareness met in the air, making a loud noise out of thin air, shocking the four women around. The escaped spiritual awareness residue even forced the four women to retreat a few tens of feet outwards, which was unconsciously oppressive.

This kind of sight shocked all the four women. Yang Chen's spiritual awareness was strong, and the four women had long been psychologically prepared, but they didn't expect Li Cheng to be so terrifying. They don't know what kind of secrets Li Cheng's family has, in order to produce such a heaven defying young master.

The degree of surprise to Yang Chen was even stronger than that of the four women. Yang Chen was now cultivating the three purities secret art handed down by the grand supreme elderly lord; it was a heaven defying cultivation method from the immortal realm, but Li Cheng could actually fight him to a stand still. Among them, Yang Chen was equal to each other, and Yang Chen couldn't help but admire it.

Li Cheng's spiritual awareness was pure and condensed, with an awe-inspiring aura. Compared with Yang Chen's current third grade human immortal realm spiritual awareness, he did not lose out. Even in some respects, it was even better, why would it not make Yang Chen extremely confused?

But now was not the time to investigate how high Li Cheng's spiritual awareness cultivation base was, because what could be such a realm. The two were fighting, and they were a little distracted. They didn't dare to say that they were on the line of life and death, but they were indispensable for being sturdy. Even though Yang Chen's internal organ tempering has improved a lot, he still doesn't want to be beaten a few times for no reason.

In the mountain river geographical map, just like outside, time passes, the sun rises and the sunset was almost indistinguishable. This battle between the two of them engulfed the attack of spiritual awareness. Once again, it lasted almost two days and two nights.

In his previous life, Yang Chen didn't make a lot of achievements in spiritual awareness cultivation. In this life, he has only gained some advantages in spiritual awareness under the extensive and profound guidance of three purities secret art. Compared with his knowledge of refining and fire seeds control, he was not even better.

But in the battle with Li Cheng, Yang Chen's eyes were opened firmly. Li Cheng's spiritual awareness attack definitely made Yang Chen feel overwhelmed. Even in the previous day and a half, Yang Chen was almost pressured and taught by Li Cheng, and occasionally fought back several times.

This was definitely an experience that was impossible to ask for. Was there a more appropriate way to understand and master these spiritual awareness attacks than in actual combat?

Yang Chen's spiritual awareness also became more and more understood in this uninterrupted battle. Most of the things that were known before but did not know why were also made clear in this battle, this alone has benefited Yang Chen.

Both of them felt tired, if it's just the squandering of spirit power, it will not make the two of them tired to such a degree, but the attack of the spiritual awareness and the constant tension of the nerves, coping with the opponent's attack and counterattack were the most costly process of mental effort.

However, the more they fought, the more they had no intention of stopping, instead they became more energetic and attacked more fiercely.

The four women who were watching were unable to keep up with the speed of the two people's movements. It was often that they just wanted to understand the mystery of a previous attack, but when they came back to their senses, they found that the two had already fought at least ten more moves.

But despite this, the four women have gained a lot. Watching Yang Chen and Li Cheng's three-day battle, it seems that they have benefited a lot more than they had been surrounded by hordes of demonic fiends outside for several months.

"Plus spirit power!" Li Cheng shouted again, his voice full of excitement. With the shout, a surging wave of spirit power was mixed in the fist, and it smashed down towards Yang Chen.

Of course, Yang Chen was not to be outdone. The Yin-Yang five elements secret art moved to the extreme in an instant. The positive Yin-Yang five elements spiritual power was directly arranged into two formations of Yin-Yang five elements array. Eighty lines of spiritual strength directly hit Li Cheng's chest.

At the same time, the five elements array spread out on his body, ready to meet Li Cheng's spirit power bombardment.

Boom, almost at the same time that the two punches met, a huge sonic boom spread far away. Both of them shook their bodies severely, then gritted their teeth and bombarded each other regardless.

Now every blow of the two of them carried a force of heaven and earth, and the momentum was so great that even the four women who were on the sidelines were somewhat appalled and worried. If such an attack fell on their body, it would be impossible to withstand for any of them. Unless they used the mountain river geographical map or the tortoise shield, there would be a serious injury or even death.

Yang Chen and Li Cheng, who were in the battle, both unanimously admired their opponents. Yang Chen's current Yin Yang Five Elements Formation attack has at least twice the enhanced attack effect. Even if Yang Chen has not gathered the Great Yin Yang Five Elements secret art, his attack power should not be underestimated.

But Li Cheng was able to take it over completely, this was not using any magic weapon, just relying on strong physical and spiritual defenses, it must be said that Li Cheng's strength was beyond Yang Chen's expectations.

Li Cheng on the other side was also full of surprises. Yang Chen's performance was beyond Li Cheng's expectations. He originally thought it was just a positive and negative attack on the five elements of Yin and Yang, but unexpectedly, there was also a large array to boost.

Until now, the two talents finally had a real feeling of awe for each other.

Chapter 535.1: Everyone Has An Advantage

After joining the spiritual power, the power of the attack once again increased a lot. Especially Yang Chen, whose spirit power was directly mixed with the Yin-Yang five elements formation and the heavenly spirit earthly fiend, directly increased Yang Chen's attack power by several times. With the spirit power shown by Li Cheng, the next thing was really reluctantly.

However, Li Cheng was not so friendly. He used his whole body to stop Yang Chen's attack with a great deal of strength, and he even had room to counterattack.

However, when encountering Yang Chen's five element spiritual power, the power of the attack was like entering a big grinding wheel, and after nine out of ten of them was consumed before acting on Yang Chen's body, Yang Chen was quite relaxed to block these attacks.

It's just that Li Cheng was far more powerful than that. Whether it was his current spirit power or spiritual awareness sum up, the characteristics were just one word, pure. It was so pure that it made people disheartened, and even the spirit power of Yang Chen's three purities secret art and the spirit power of the Yin Yang five elements secret art were not Li Cheng's opponents at this point.

If Yang Chen's spiritual awareness was 80% pure, then Li Cheng's was at least 95% pure. If Yang Chen had 60% spirit power, Li Cheng also reached more than 90%.

This kind of purity was far from what Yang Chen could achieve with simple refining. It was an effect that could only be achieved after a thousand tempering and hard work, and an indescribable refinement. With Yang Chen's current cultivation base, he was far from comparable.

As for other people, it was even more unimaginable. People thought that their spirit power was already very pure, but at least 40% of the messy spirit power in it was invisible to the cultivators at this stage. Everyone thinks that the purified demon orbs have no side effects, and that's why.

Insufficient cultivation base has led to insufficient insights. Many of the shortcomings in cultivation were such that they had accumulated a little bit in the spirit world and the immortal world before they erupt, so that by that time, it would take many times or even dozens of times more energy than the current stage to make up.

One effect of the pure spirit power was the exceptional ease of control, and the unparalleled amplification effect in certain effects. Regardless of attack or defense, Yang Chen could not be able to stand by. If it were not for the Yin-Yang five elements formation and the heavenly spirit earthly fiend formation, Yang Chen could keep up with Li Cheng.

While Yang Chen was amazed, Li Cheng on the opposite side couldn't help being surprised. Never had he thought that Yang Chen had such a skill. The simultaneous cultivation of spirit power, Yin and Yang, and the five elements was already unexpected, and it was even more shocking to have the effect of the heavenly spirit earthly fiend formation.

If it weren't for surpassing Yang Chen in purity, and after saying that the attack effect of spiritual power could not be added, Li Cheng would be embarrassed. Even so, the attack from Yang Chen was very uncomfortable, and Li Cheng always suffered from every blow.

But the more so, the happier Li Cheng was, the same was true for Yang Chen. A well-matched opponent was definitely the best whetstone in their cultivation. The more tempered, the more beneficial it would be for their own cultivation.

It was just a few days of confrontation. Yang Chen felt that his yellow turban warrior's body refining technique had already reached a step in the internal tempering of the river turning strength. If he went through it a few more times, he could just rely on this kind of confrontation and enter the realm of the peak sea pouring strength.

Every blow of Li Cheng was like the best hammer. He punches out the impurities in his body and makes his whole body more symmetrical. Such an opponent, such an opportunity, was simply a gift from heaven.

He didn't know if Li Cheng felt the same way, but Yang Chen could feel Li Cheng's changes from Li Cheng's back shock, it seemed he thought the same way in his heart.

In this situation, although the two became more tired as they fought, they were happier in their hearts as they fought. Under the excitement, the strength of the two people seemed to have improved again, and they continued to confront each other, it seemed that no one wanted to stop first.

The physical, spirit power and the full confrontation of the spiritual awareness continued for almost half a month. The strength of the two finally became smaller and smaller, and their speed became slower and slower. In the end, it simply became a confrontation of will. It depends on who will fall off first.

Finally, Yang Chen and Li Cheng had no more energy. After hitting each other once with soft hands, they both lay on the ground exhausted, never wanting to move half of their fingers.

Their spirit power has been exhausted, and their spiritual awareness has almost been exhausted. The physical body does not even have the strength to support the two of them standing. As soon as they lay down, they closed their eyes, and there was no more movement.

However, the two were still different. Under this situation, Li Cheng still had difficulty slowly absorbing spirit power and began to recover from the fight, while Yang Chen closed his eyes and fell asleep sweetly.

Originally, the purpose of this confrontation was to make Yang Chen tired and then fall asleep, everyone understood this. Anyway, this was inside the mountain river geographical map, and there were the four women watching, so there was no need to worry about safety.

The four women have been immersed in the wonderful fighting confrontation between the two, until both of them have stopped for a long time, and then they woke up one after another.

It was Shi Shanshan who woke up first, then Gao Yue, then Gongsun Ling, and finally Sun Qingxue. All of the four women have gained a lot from this observation, and their faces were filled with joy that can't be concealed.

Seeing the situation of the two, Gongsun Ling's heart moved, and the place where Li Cheng and Yang Chen lay suddenly changed. Li Cheng quickly condensed a small spirit gathering formation, the mountain river geographical map absorbed countless spiritual power, and began to provide for Li Cheng to recover.

On the other side of Yang Chen, it became a comfortable bedroom. Yang Chen lay on the soft and comfortable wooden couch, sleeping like a dead pig.

The four girls woke up without any extra actions, but after watching Gongsun Ling finish the operation, everyone started discussing with each other in another place where they did not interfere with them. The content of the discussion was naturally the gains and benefits of the battle between Yang Chen and Li Cheng.

This was a habit that everyone has cultivated on the way to the Demon Continent. After dealing with the sea beasts, they would make a small summary. The four women were all geniuses with excellent comprehension. The combined wisdom of the four people could make everyone gain something every time.

The battle between their own husband and brother allowed the four women to see many things they had never thought of before. The four women expressed their feelings one after another, and none of them hid themselves. The more they discussed, the more excited everyone was. Just discussing the summary of the battle lasted almost four or five days.

Then, the four women also began to retreat one after the other, continuing to digest these combat experiences.

Chapter 535.2: Everyone Has An Advantage

Li Cheng resumed his cultivation this time, and it lasted a long time.

In fact, Li Cheng was not only recovering, but his time for spirit power recovery was very fast. With the spirit power support of the mountain river geographical map, Li Cheng's spirit power was restored in two days. As soon as the spirit power was restored, it naturally led to the recovery of his spiritual awareness and the physical body.

But these were not important, the important thing was that Li Cheng discovered that his physical cultivation had finally entered the territory. Under the bombardment by Yang Chen tens of thousands of times, it was like kneading dough, naturally.

Now it was a natural process, Li Cheng would of course seize this opportunity to improve his cultivation level as soon as possible. Of course, Li Cheng did not forget that while cultivating, he sighed at Yang Chen's abnormality.

Yang Chen, who was asleep, didn't know Li Cheng's thoughts at all, and even Gongsun Ling had changed the surrounding situation for him without him noticing it. Now his consciousness was standing at the entrance of the immortal executioner stage.

When Yang Chen came here, his body did not change in the slightest. He really doesn't know how this immortal executioner stage was refined, not to mention crossing the two realms, and even using a dream to let the mortal executioner enter.

As expected by Yang Chen, as long as he entered the dream, Yang Chen would stand at the entrance. It turned out that there were still a few heavenly guards here, but now he didn't know where they went. The entrance was empty, without a single figure.

Seeing the door he walked out of, Yang Chen couldn't help feeling a little sorrowful. Here, he personally waved the immortal beheading blade and cut away immortals including the Jade Emperor's Empress and the Grand Supreme Elderly Lord. Those famous big figures could not escape the death of the immortal executioner, which always made people feel the awe of heaven.

However, Yang Chen had no plans to go in. Who knows if he could come out after he enters? Now that everything was on the right track, Yang Chen doesn't want to fall short here.

After adding Yang Chen's comprehension and modification, the cultivation method of the Heat Demon Sect has already possessed extremely strong operability. Yang Chen was just outside the entrance, and he could also try whether the cultivation method was feasible in the end.

Yang Chen didn't know how long he would sleep this time, so he just sighed for a while, and began to follow the steps to try to refine the entrance to the immortal executioner stage.

Once he got started, Yang Chen was ecstatic. Following the normal steps, it seemed that there was no accident. Perhaps, it was also because Yang Chen was the only executioner in the immortal executioner stage, so it had no resistance to Yang Chen. It made Yang Chen easily touch the point that crosses the two realms.

The entrance was at this point. After completing this step, Yang Chen's confidence greatly increased, and he began to carefully refine the entrance according to the guidance of that cultivation method.

Before refining, Yang Chen still found that his spirit power was consumed cleanly. This should be caused by the previous confrontation, even in a dream, it was not completely restored.

Yang Chen didn't worry, just like Li Cheng, he first began to restore his spirit power and then began to refine the entrance.

It's simple to say, but it's not so easy to do. Don't even think that the entrance to the immortal executioner stage was just a point across the two realms, but it was not something that could be accomplished overnight if he really wanted to refine it.

It's normal to think about it. Yang Chen must be able to enter the immortal world in the normal way. The mortal world was connected to the immortal world, in fact, at least it crosses the three realms. If it could be easily refined by a cultivator in the Yuanying stage, that would be a joke.

Fortunately, Yang Chen was not a simple Yuanying stage cultivator. With the passage of time, his spiritual awareness has been completely restored, and the progress of refining has accelerated a little.

To fully refine this entrance, at least four complicated processes were required. Yang Chen was now taking the first and easiest step, which was to fix this space point so that he could contact it anytime and anywhere.

The speculative technique was still a bit unrealistic, and Yang Chen only discovered it after he got it. Of course, this was also because Yang Chen doesn't understand it, so there was such a problem. Fortunately, the process of the first step was not too complicated and dangerous. Yang Chen was able to adjust carefully during the refining process, so that no accidents would occur.

This process alone took Yang Chen half a year, and when Yang Chen finally finished repairing the stumbling block, ten months had passed outside.

Brushing, Yang Chen sat up and finally woke up from his sleep. When he opened his eyes, he saw Gongsun Ling's smiling face.

In the mountain river geographical map, Gongsun Ling would know any movement of Yang Chen. As soon as he sat up, he alarmed Gongsun Ling and she appeared in front of Yang Chen quickly.

"You're awake!" Gongsun Ling was purely happy, with an uncontrollable smile on her face.

Although she doesn't know why Yang Chen has to sleep, she supports any decision made by Yang Chen. It's just that Yang Chen slept for ten months, and it couldn't help but worry the girls. Had Li Cheng not repeatedly said that Yang Chen was fine, Gongsun Ling would have been tempted to wake Yang Chen.

Soon, Gao Yue, Shi Shanshan, and Sun Qingxue also appeared in front of Yang Chen one after another, as did Li Cheng. Seeing Yang Chen, he gave Yang Chen a punch first.

“You really hide yourself very well!” Li Cheng teased Yang Chen, and said with a smile on his face “I almost made a fool of myself.”

“Brother, let’s not tease each other!” Yang Chen responded with a smile, his face also filled with uncontrollable happiness.

After completing the first step of refining, Yang Chen will no longer have to enter the dream to reach the entrance of the immortal executioner stage. As long as he wants to, he could enter the immortal executioner stage anytime, anywhere. Of course, Yang Chen has no plans to go in yet.

What made him happy was that in the battle with Li Cheng, he learned a lot of spiritual awareness applications, as well as the benefits of the pure and condensed spiritual awareness and spirit power for himself, which couldn’t be understood from anywhere.

Everyone knows that the more refined spiritual awareness and spirit power were, the better, but how much better it could be, even in Yang Chen’s previous life, there was no specific concept. Even if Yang Chen had reached the realm of great golden immortal in his previous life, he had never condensed his spiritual awareness and spirit power to the realm of Li Cheng, at best, he was better than his current self.

It was only after seeing Li Cheng’s purity that Yang Chen truly understood what kind of terrifying power it was, and it also gave Yang Chen a more specific aspect of the direction of his future cultivation.

“Those guys outside, what’s the situation now?” After everyone’s greetings, Yang Chen couldn’t help but ask about the treasure hunters.
