Chapter 536.1: After Thought

“Some people are still looking for precious materials, and some people are already fighting.” Gongsun Ling, who has the mountain river geographical map in her hand, was the best person to inquire about the news and immediately replied.

This was normal, those old guys didn't work together. After opening the door, it meant that everyone had to fight on their own.

Few people pay attention to the people on the entrance portal. Some people didn't find it at all, and some people found it and felt that it was not worth working on them. The few little guys who have to rely on the formation to cover, plan to fish in troubled waters, what could they do if they stay at the door?

The four women have made progress again, and even Sun Qingxue, who has the worst cultivation base, has entered the middle Yuanying stage. Yang Chen originally thought that he and Li Cheng were the two with the lowest realm, but when he checked it carefully, he found that only himself was left in the early Yuanying stage now.

It was not known when Li Cheng quietly entered the middle Yuanying stage. The self-cultivation of the body becomes more and more unpredictable.

“Only you have the lowest cultivation base.” Li Cheng seemed to see through Yang Chen's thoughts and said with a teasing smile “If you don't step up, you will have to lose face in front of us.”

This was just a joke, but Yang Chen also had to pay attention to this problem. It's not that he wants a face, it's that because he refines and cuts the entrance of the immortal executioner stage, and all his physical and spiritual cultivation have fallen a lot.

In the dream, he couldn't sense the specific conditions of his body. Yang Chen realized in reality that his body had reached a bottleneck, and he was in a state of urgent need to break through.

Among other things, the yellow turban warrior body refining technique suffered many heavy blows during the battle with Li Cheng, his skin and flesh were much stronger than before. Even the internal organs, which had been weak, were under tens of thousands of internal organs shocks. Unconsciously tempered by physical cultivation, entered into a situation to break through.

If he didn't seize this opportunity, Yang Chen would be a great fool. After he hurriedly greeted Li Cheng and the four girls, Yang Chen quickly entered a state of retreat.

The main purpose of the retreat this time was the yellow turban warrior's body refining technique. With the tempering of fighting Li Cheng, it was even more effective than Yang Chen's boring cultivation of body training for decades.

In a rush, in less than half a year, the yellow turban warrior body refining technique rushed to the peak river turning strength. The flesh, bones and internal organs of his whole body have undergone a reborn change, which was at least twice as powerful as the original middle section.

No matter from the strength, or from the physical endurance, as well as the density of the bones, there was at least twice the increase.

This state of pure physical power was no longer imaginable by ordinary people. Even the real yellow turban warriors in the immortal world can't reach them.

This physical strength was beyond many ordinary magic weapons. Even ordinary flying swords can't harm him all, even the skin cannot be pierced. Even if Yang Chen didn't use the dragon clan golden bell and he was just trying to reach the peak river turning strength. It was also enough to withstand at least the powerful attacks of the late dacheng stage.

As he reached the advanced level of physical cultivation, Yang Chen's body seemed to be more fortunate. It turned out that the simple power conference had some influence on speed. After entering the peak river turning strength, the reaction speed of the muscles has almost doubled. He believes that if he fights against Li Cheng, Li Cheng would definitely feel that kind of terrifying attack speed.

This benefit alone made Yang Chen smile from ear to ear. If those yellow-turbaned warriors in the immortal world wanted to cultivate from the high section of the river turning strength to the peak

without hundreds of years of hard work, it was absolutely impossible. The immortal body was as powerful as the immortal body, but in terms of transformation, the difficulty was turned upside down.

The improvement of the yellow turban warrior's body refining technique has directly affected his spirit power cultivation. The physical changes would be very intuitively reflected in spirit power cultivation. Yang Chen's stagnant state in the early Yuanying stage finally loosened. With Yang Chen's single-handed efforts, he finally broke through the bottleneck and entered the next stage.

At the moment of breaking through to the middle Yuanying stage, Yang Chen suddenly realized something again. Li Cheng's pure and powerful spirit power and spiritual awareness would be the direction for Yang Chen's next cultivation.

In the past, he was only considering the improvement of his cultivation base, although he was also refining his spirit power and spiritual awareness, it was not the main direction. From Li Cheng's body, Yang Chen saw the huge benefits after purification and condensing, and it was not too late to make timely adjustments.

You know, as the cultivation base gets higher and higher, if you want to refine your spirit power and spiritual awareness, you will spend at least ten times or even dozens of times more energy than when the cultivation base was lower the better it would be and the less time it would take.

This point was the same as the cultivation of the yellow turban warrior's body refining technique. The more he has gone through, the stronger the body, the more difficult it would be to change in the future. Spirit power and spiritual awareness were also the same, so it's best to take advantage of now to realize the remedy.

Yang Chen originally planned to use the true essence spirit power cultivation method in his hand when he was hitting the bottleneck, but now it seems that it was unnecessary.

During the battle with Li Cheng, Yang Chen also discovered that although his spirit power attack was strong, there were several types of spirit power that were not the true essence spirit power, and could not compete with Li Cheng's spirit power. It was the non essence spirit powers that collapsed first when resisting.

Now that he realized this, Yang Chen didn't keep it anymore. Once the retreat was over, Yang Chen called the four women in front of him.

The four girls have all cultivated a kind of true essence spirit power, which was in line with their own attributes. Gao Yue cultivated the tenth water true secret art, Shi Shanshan was the seventh metal true secret art, Sun Qingxue was the first wood true secret art and Gongsun Ling was the fifth earth true secret art.

In Yang Chen's hands, he now had all the other techniques except the third fire true secret art, and his true essence spiritual solutions were still missing the second wood true essence. Speaking of it, except for Sun Qingxue's second wood true essence, the other three women already have the conditions to cultivate the second true essence spirit power.

Gao Yue got the ninth water true secret art and ninth water true essence spiritual solution first, and Shi Shanshan got the eighth metal true secret art and eighth metal spiritual solution. But Gongsun Ling and Sun Qingxue didn't have the second wood true essence and sixth earth true essence.

Relatively speaking, the sixth earth true secret art was not a big problem, as Yang Chen had cultivated it, if he and Gongsun Ling entered through double cultivation, it was enough for Gongsun Ling to cultivate it. The last time, the fifth earth true secret art was cultivated in this way.

The only one who was somewhat lost was the youngest Sun Qingxue. She was the one with the lowest cultivation base now, and she was unable to cultivate the second wood true secret art because of the lack of second wood true essence. Everyone had them, but she didn't and she seemed a little depressed.

Chapter 536.2: After Thought

"Little Xue, it's not that your husband is partial, but that I really didn't find it." Yang Chen could only comfort Sun Qingxue by himself. There was no other way, whether it was the memory of the past life or in the immortal executioner stage, there was no news of the second wood true essence.

"It's okay, husband!" Sun Qingxue was not that kind of petty person, otherwise she would not be accepted by Shi Shanshan. As a cultivator, she naturally knows that some things cannot be compelled, so she just lost it for a while before she recovered.

Speaking of which, Yang Chen was also in a bad mood. He had always treated the four women in a relatively balanced manner, but this would make Sun Qingxue regret because he did not find the second wood true essence.

“I have already cultivated the first wood true secret art, and I can’t be so greedy.” Sun Qingxue leaned in Yang Chen’s arms and comforted Yang Chen in turn. She could also see that Yang Chen seemed to be a little bit worried because he could not find the second wood true secret art “husband, don’t care about it.”

Sun Qingxue could think about it. If it weren’t for Yang Chen, she could only rely on that great calamity of demonic art to abolish her cultivation base and cultivate again. It could only be those wood attribute techniques of the Blue Cloud Sect, it was absolutely impossible to come into contact with the first wood true secret art. Sun Qingxue already felt very satisfied with the first wood true secret art now.

“Don’t worry, I will definitely find the second wood true essence.” Yang Chen held Sun Qingxue’s arms tightly and gave her a promise “Even if I don’t think about you, I still need it to complete my Great Yin-Yang five elements secret art.”

“Great Yin-Yang five elements secret art, what is that?” Sun Qingxue was aroused by curiosity and asked involuntarily.

Not only Sun Qingxue, but Gao Yue, Shi Shanshan and Gongsun Ling were equally curious. Several pairs of wonderful eyes came over at the same time, waiting for Yang Chen to explain.

Li Cheng was not far away, of course he heard Yang Chen’s words. He suddenly realized something and he looked at Yang Chen with an incredible look “you want to complete the true essence spirit power cultivation, right?”

Li Cheng’s words made all the women want to understand the meaning of this Great Yin-Yang five elements secret art. They couldn’t help being surprised, all looked at Yang Chen in shock.

Everyone knows that Yang Chen built his foundation with all-attribute spirit power, and everyone understands that all-attribute spiritual power condenses his golden core. However, the girls only thought that Yang Chen had cultivated five kinds of spirit power, although they had both cultivated one attribute spiritual power with Yang Chen during the double cultivation. But the women only thought

that the attributes of the five elements were all, but they didn't expect it. It turned out to be full of Yin-Yang five elements.

Concurrent cultivation of the five elements of Yin-Yang. Those are two completely different concepts, and similarly, there are two completely different levels of difficulty. This doesn't even need any explanation, while cultivating the five spirit powers at the same time keeps the beginning and the ten spiritual powers, the difference could be imagined in terms of quantity alone.

Double the number, at least ten times the difficulty. They thought that Yang Chen turned out to be cultivating both Yin and Yang and the Five Elements, and his spirit power cultivation base was still similar to everyone's. Just a little behind, the girls couldn't help but have an urge to hit the wall.

Except for Gao Yue. Shi Shanshan, Sun Qingxue and Gongsun Ling were all recognized geniuses of cultivation by their respective sects, but they are also only majoring in a kind of spirit power of the five elements.

In this situation, they were only a little bit ahead of Yang Chen, especially Shi Shanshan. When she met Yang Chen, he had already begun to condense his golden core, at least a hundred years of cultivation base, but now, not only was Gongsun Ling overtaken, but also Yang Chen was overtaken.

Fortunately for Gongsun Ling, the characteristics of the mountain river geographical map were equivalent to countless masters helping Gongsun Ling in her cultivation. Shi Shanshan still doesn't feel discouraged by being overtaken by Gongsun Ling. But Yang Chen cultivated a hundred years less than her and still cultivated ten spirit powers at the same time. At this speed, if Shi Shanshan was a genius who has been rare in a thousand years, then what was Yang Chen? A devil?

In the past, when Shi Shanshan was alone through Yang Chen to decline those young handsome men, It wasn't known how many people were persuading Shi Shanshan not to be dragged down by a mediocre person like Yang Chen. Thinking about it now, how funny those people are. If Yang Chen was considered mediocre, then what are those people? Pigs?

Fortunately, now Yang Chen was Shi Shanshan's husband, and before that, Yang Chen has used an absolute way to subdue Shi Shanshan, Shi Shanshan does not have much dissatisfaction, just thinking of this fact made her feel satisfied.

"I have this plan." Yang Chen answered Li Cheng's question with affirmative words, and also frankly said to Li Cheng "For the time being, there is still a lack of third fire true secret art and second wood true essence. If you can find these two, basically, you can complete the Yin-Yang five elements secret art."

In response, Li Cheng directly extended his right hand, and then raised a big thumb. After holding it in front of Yang Chen for a while, he said to Yang Chen very contemptuous "Pig brain!"

Yang Chen hadn't reacted yet, but the four women had already raised their eyebrows. Although they were talking about their husband's eldest brother, it did not prevent them from looking at Li Cheng coldly. Their husband was so amazing, and he was even said to be a pig's brain. What does it mean?

"Does the elder brother think that the true essence and spirit power can't be simultaneously cultivated?" Yang Chen admired Li Cheng's cultivation level very much, and he didn't know what method he used to refine his spiritual power to that point. Since Li Cheng said so, there must be a reason, Yang Chen decisively ignored Li Cheng's words of scolding himself and humbly asked for advice.

"Can the true essence and spirit power be simultaneously cultivated? This is not a problem." Unexpectedly, Li Cheng didn't say much about this issue "Since you have cultivated it, there is no trouble, there will be no problem."

"Then what did big brother mean..." Yang Chen didn't understand, Li Cheng scolded himself as a pig brain. What does this mean?

"You don't use your pig's brain, because you have already collected so much true essence spiritual power." Li Cheng again sternly scolded "Look around you carefully, and use your pig's brain to think about it. In such a big place, why does the earth's vein spirit power dry up?"

As soon as Li Cheng said this question, Yang Chen seemed to have caught something in time. Without saying anything, he flew up and began to observe carefully in the air. After the four women were unwilling, they all rushed to Yang Chen's side in the air to observe.

Almost all the places sealed by the Heart Demon Sect were surrounded by various plants. Before, everyone focused on the treasures of the Heart Demon Sect, but ignored these ordinary plants. Now everyone has discovered that among these plants, there were very few big trees to which the first wood belonged. Almost all of them were vines and herbs of second wood.

Since the formation method of sealing the Heart Demon Sect has not failed, it means that the spiritual power of the earth veins was enough to use, how can the spiritual veins in it be exhausted?

Could it be that this invisible underground has a large array similar to collecting various spiritual liquids, used to collect the second wood spiritual solution?

Chapter 537.1: Search

This huge area has all the conditions for the generation of the second wood true essence. The area was large enough, second wood belonged to enough, and it was full of spirit power.

Speaking of abundance of spirit power, although those depleted spiritual veins seem a bit abnormal, but on the other hand, why not concentrate spirit power on the second wood true essence?

Whether it was the first wood true essence or the second wood true essence, those monsters that have become spirits and have opened their minds will not produce them. Only the natural growth of first wood and second wood will form such a trace in a long time. If you want to collect, you must use a certain collection formation.

This area, because of being sealed, was not attacked by demonic qi, nor did the second wood monster beast itself, which fully met the conditions.

The more Yang Chen observes, the more inclined to this point in his mind he was. However, the tendency was still not certain, but if you add Li Cheng, he was basically 90% sure.

If this was the case, then no matter what kind of cultivation method or magic weapons those guys have worked so hard to find, they are purely buying caskets and returning beads. The real treasure, one was the origin history of the Heart Demon Sect that Yang Chen and the others have found, and the other was the hidden second wood true essence.

As for the practice of refining the spatial point, it was only a speculative method. For the time being, it could only prove that the first half was useful, and the latter has yet to be confirmed by time, it was impossible to judge whether it was a big benefit.

“Brother, please give me some advice.” After Yang Chen was reborn, he had a characteristic of being humble and would never fail to pretend to understand. So when he couldn’t judge the specific position, Yang Chen never hesitated to ask someone who understands.

The four women had not yet figured out what Li Cheng was talking about. But they all followed Yang Chen down and surrounded Yang Chen and Li Cheng, waiting for Li Cheng’s guidance.

“This area is very likely to hide a large formation collecting second wood true essence.” Li Cheng also said straightforwardly without waiting.

As soon as these words were spoken, the women suddenly exclaimed. Especially Sun Qingxue, she was surprised and didn’t know what to do. Now everyone understands why Yang Chen was scolded by Li Cheng as a pig’s brain when he was comforting Sun Qingxue.

If it were not for Li Cheng’s sensitivity, maybe everyone would easily let go of this most cherished benefit.

But it’s not too late. All the women were not in the urgency to cultivate, all of them were waiting eagerly for Li Cheng, waiting for him to point out the possible collection of formations.

According to Yang Chen’s judgment, if this formation was to exist. It must be underground, as the situation on the ground was almost clear at a glance, and there was no trace of the formation at all. The spirit power was exhausted, it was definitely not like the second wood true essence.

But the underground was so big, and there was no trace of spiritual power escaping, how to find this possible second wood true essence?

Li Cheng couldn’t help it, he just judged that the second wood true essence might exist based on the situation here, but he didn’t know exactly where it was.

The four women were a little discouraged when they heard what Li Cheng and Yang Chen said. Was there anything more depressing than knowing that there was a treasure but not being able to find it?

“We are not in a hurry, we will look for it slowly.” Yang Chen didn’t have that kind of impatience. One person counts the shortcomings and the others counts the lengths. They can’t find them, don’t they still have a lot of helpers?

“So many masters, digging three feet in the ground, are you afraid you can’t find it?” Yang Chen hurriedly pointed in several directions, and all the women understood.

Don’t those masters who enter the Heart Demon Sect just want to find magic weapons? However, could those things still be comparable to the second wood true essence?

This exhausted many spiritual veins. After being sealed for tens of thousands of years, how much of the true essence spiritual power should be accumulated? Yang Chen couldn’t imagine it, those guys wouldn’t be tempted when they knew it.

Spreading news was very easy, as long as a few people put on a unique search look. First, find a random direction to explore, let the old demon know that they are looking around in some places where there was no relic of the Heart Demon Sect. It would soon be able to attract the attention of those old monsters.

“What are you looking for?” Just as everyone pretended to be immersed in searching, a very gentle and attractive voice came in.

This person’s voice was very comfortable. There was a sense of trust involuntarily, as if the natural tone of homely tone, it was easy to be unguarded.

“Second wood true essence.” Yang Chen almost blurted out, but immediately realized something, and quickly covered his mouth, Li Cheng and the girls quickly gathered together, and then put on a guarded posture.

“Is the second wood true essence here?” As the gentle voice uttered again, at least ten old demon heads appeared around, distributed in various directions, surrounding everyone.

Sun Qingxue immediately activated the tortoise shield to protect everyone in it. The two sides once again formed a confrontation.

Needless to say, as long as they said that they were looking for the second wood true essence, these old demons were all knowledgeable people, and it was easy to reason from the many traces shown in this sealed land. Before, everyone just didn't think in this direction, now Yang Chen and the others immediately made them feel that it made sense.

Those who really found the magic weapons and cultivation method were the dozen or so most advanced old demon heads, and most of the others were picking up rags. Although many materials or magic weapons that have been passed down to this day have been found, none of them has much to do with controlling the inner demons.

These old guys have been staying here all the time, on the one hand to try their luck, to see if there are any fish slipping through the net, on the other hand, they are also planning to look for some opportunities to seize from others. Besides, there was no demonic qi attack here, and everyone uses this place to cultivate without any interference and consolidate their own cultivation.

Now they suddenly discovered that there was probably the existence of the true essence spiritual power like the second wood true essence. Suddenly the old guys no longer intend to cultivate, and they started to look for it. Even Yang Chen and the others were ignored.

No one was a fool, especially these treacherous and ghost-like old demons who don't know how many years they have lived. This place was sealed for tens of thousands of years, who knows how many second wood true essence was left behind? But one thing for sure was that even if you give them a lot of little guys, they won't lose their weight.

At the beginning, more than a dozen old monsters knew about it, but within a few days, more and more old monsters knew about it, and finally all the old guys knew that the second wood true essence might be hidden here, so a large group of the old demon began the process of vigorously digging the ground to find the second wood true essence.

Yang Chen and the others, in this army, were actually inconspicuous at all.

Chapter 537.2: Search

Who doesn't covet the true essence spirit power? Even if it wasn't a cultivator with wood attributes, he couldn't hold back the preciousness of this second wood true essence. Among other things, even if it

was used to exchange spirit stones, one drop of second wood true essence was enough to exchange for tens of kilograms of high-grade spirit stones. How many drops would be accumulated in these tens of thousands of years?

The wealth was touching, especially these old monsters who are already very greedy. Who was not tempted by the news of the second wood true essence? Even the old guys who had already obtained magic weapons and cultivation methods temporarily stopped thinking and looked for the second wood true essence instead.

The cultivation method could be cultivated at any time, but second wood true essence doesn't have this shop after he has passed this village. Said that he didn't care about the interference of Yang Chen and the little guys, but in fact, he still couldn't help but put on the tortoise shield. But for this true essence, none of these old monsters were willing to share with others.

Some guys who found certain records of the Heart Demon Sect began to search through the records carefully to see if there was any explanation about the second wood true essence, and more people were beginning to infer where this second wood true essence should be.

It can't help but be said that these old guys have a high enough cultivation base and wide enough knowledge. Soon after, several old demons, based on the topography of the mountains and rivers, plus the distribution of plants, roughly calculated where they would be if they were to collect the second wood true essence by themselves.

This was the first to determine the old demon in a few locations; there were four monster race cultivators with wood attributes, and seven dao and demonic cultivators with wood attributes. They are wood attributes themselves, and they have a deeper understanding of second wood true essence than others, so they could judge the possible locations first.

Purposeful inquiry was completely different from the luck of a blind man riding a blind horse, they don't know that there are precious things underground. It turns out that those seventh metal spiritual solution have existed underground in the heart demon sect mining area for many years and no one cares about them. Now that they know there was the second wood true essence, it was 10,000 times easier to find it.

The old devils were guarding each other, and no one wants to let others know what they have found. However, no one thought that Yang Chen's spiritual awareness was watching their every move.

The sealed Heart Demon Sect was too big, tens of thousands of miles, thousands of old demon were scattered, like a drop of water into the sea and immediately disappeared without a trace.

However, Yang Chen had a definite target. He didn't look for anyone else, but specifically for the monster masters with wood attributes. Sure enough, this small group of old monsters quickly discovered something.

The places where these eleven old demons found were scattered in a valley with a radius of tens of miles. From this point of view, it could basically be concluded that the second wood true essence was distributed here. It's just that the specific location was slightly different.

For Yang Chen and others, these dozen old demons were simply their pioneers. Hidden within the inverted sea jasper lamp, Yang Chen and the others quietly hid in a hidden corner hundreds of miles away, carefully observing the movements of the dozen old demons and no one would notice.

Since everyone was concentrated in this valley, there seemed to be a tacit understanding of the dozens of old monsters, and none of them made a public statement. They simply discussed with each other and found a location to search in detail.

Everyone understands that this second wood true essence couldn't be hidden by them. In such a small area, no matter who finds anything, it would alarm others. Unless these guys have such a magic weapon like the sea jade lamp, it was impossible to hide it from others.

However, the benefits were limited to these eleven. The other old devils were hitting great fortunes without thinking. If the second wood true essence could be found in that way, then it would be too simple to imagine.

The old devils thought they had a good plan, but they didn't expect that they aren't the only smart people. It was easier for people who know the attributes of wood to find the second wood true essence. Besides Yang Chen and the others, there are others who were eyeing them.

Covering the figure and shielding the spiritual awareness was not something that only the sea jasper lamp could achieve, at least Yang Chen has a lot of fibers found from the demonized demon vine, which

could also be used. And similar methods, among those thousands of old demon, at least hundreds of people have completely different methods.

At about the same time, in four directions, four openings were opened with violence, among these four openings, all of them have the aura of the second wood true essence.

When the second wood true essence appeared, as if the fuse was suddenly ignited, and then the whole situation exploded. The four old monsters who opened the paths before they had time to explore further, they were besieged by guys hiding in the dark, swarming from all directions.

The guys who have been in the Demon Continent for hundreds of years, which one was a fuel-efficient lamp? Even those wood-attribute old devils who were looking for the second wood true essence were always on guard. When someone attacked, they immediately counterattacked without even thinking about it.

In the valley of tens of miles, hundreds of dacheng stage masters made a move at the same time, and the aftermath of the spirit power directly razed the valley to the ground. The huge momentum caused all the masters who were distributed in a radius of tens of thousands of miles to be alarmed, and they rushed in this direction without exception.

What else could cause such a dynamic fight at this time? Apart from the discovery of the second wood true essence, there was no other explanation.

The tacit understanding between the old demons who guarded the ruins for hundreds of years was broken with the discovery of the second wood true essence. The entire valley has become the arena where the old devils fight to the death, and no one could stay out of it.

With the participation of old demons in all directions around, the scale of the battle has further expanded. Everyone except himself was an enemy, and everyone was trying to suppress the bottom of the box, and regardless of his disregard, he launched a killer move against everyone except himself.

During the melee, no one could notice that there were several old devils with serious injuries. After being blown away, they disappeared into the void strangely, as if they had never appeared before. In the eyes of everyone, only the second wood true essence existed.

With hundreds of dacheng stage masters fighting, the entire valley was turned upside down. A dozen miles away, the four openings that were originally opened were now almost all connected together. This shows what? It means that the amount of second wood true essence below was maddening.

Having moved their hands, these old guys who had tolerated each other for hundreds of years had no plans to suppress themselves anymore. Even if so much second wood true essence was enough for them to divide equally, each will become the richest among the rich, but how could the anger that has been provoked be easily suppressed?

Of course, what's more important was that the wisps of demonic qi, before everyone knows it, have already permeated everyone around them, and it seems to affect everyone's emotions.

Chapter 538.1: Collecting The True Essence Spiritual Solution

The masters of the dacheng stage were the masters of the dacheng stage. When Yang Chen was collecting various true essence spiritual solutions, the cultivators who met, as long as their spiritual awareness penetrated into the true essence spiritual solutions, they would all be dragged into the source spiritual solution and burst into death.

However, there were exceptions. Under normal circumstances, dacheng stage masters will not have this situation. At that time, the big city lord of the banyan tree immortal cave, the second city lord, could easily reach the first wood spiritual solution and was safe, but they had no good way to collect the first wood spiritual solution.

Now this group of dacheng stage elders were the same, fighting over the true essence spiritual solution, but they were not affected by the second wood true essence in the slightest.

However, those guys who were injured and accidentally fell into the spiritual solution were not so lucky. They were already injured, once attacked by the second wood true essence, they couldn't control their body for a while. Although they didn't explode like the Yuanying stage masters, they could only leave the power to protect themselves, but could no longer act.

The aftermath of the above attack directly swept through these poor guys mercilessly. They were unable to move and were deeply penetrated into the second wood spiritual solution, and never appeared again.

The old devils have endured for hundreds of years, everyone has carefully guarded against each other for such a long time. Now that they have been provoked by the beginning of the struggle, and have been conspired by the invisible demonic qi, no one could suppress this emotion to vent, and the fighting went on.

Within a few days, the old demons of almost the entire sealed land rushed over. As soon as everyone came in, they joined the battle group like crazy, and no one wanted to give away the exposed second wood true.

As long as there was such a little thought, under the magnification of the demonic qi, it becomes the effect of melee. This was the first time everyone in the mortal world has seen such a battle scene of thousands of dacheng stage masters. The scene was magnificent and the effect was amazing.

“Your flying sword seems to be getting better and better.” Of course Li Cheng understood who was behind the scenes, watching Yang Chen release the nine nether flying sword little by little to affect the old demons, he couldn’t help sighing.

“One of the benefits of going to that valley.” Yang Chen did not hide it from Li Cheng, after fighting Li Cheng for a while, the relationship between the two seemed to be closer.

Killing the demonized demon vine, the nine nether flying sword was indeed one of the benefits, and the other advantage was that the yellow turban warrior’s body refining technique has risen from the middle stage to the late stage, and he has obtained a huge demon orb.

The re-refined nine nether flying sword, because of the addition of those mysterious fibers, has the effect of shielding the six senses. That’s why he showed great power on this occasion, but no old demon could find the clue.

Gongsun Ling was happily picking up bargains on the periphery. As long as there was a single injured master, Yang Chen and Li Cheng would always secretly put him in a coma and then Gongsun Ling happily left these poor guys leave their storage bag behind and received them in the mountain river geographical map.

In just three or two days, there were more than twenty dacheng stage old demons in Gongsun Ling’s mountain river geographical map, and they were still unconscious of the situation.

Seeing those who were beaten into the second wood true essence sink into the spiritual solution, and Yang Chen had experienced collecting the first wood spiritual solution together, of course she knew the fate of those people, which was a pity. If these dead guys could be received into the mountain river geographical map, wasn't it more exciting?

Gongsun Ling's thought was naturally seen by Yang Chen. Of course, the mountain river geographical map has as many masters as possible. However, the current mountain river geographical map still lacks a very necessary function, that was to refine and condense spirit power.

After the battle with Li Cheng, Yang Chen thoroughly understood how powerful his pure spirit power and spiritual awareness were. Gongsun Ling's current cultivation base was the highest, but it was because the masters in the mountain river geographical map have continuously provided her with spirit power.

If Gongsun Ling was a dragon, even a dragon like Xiao Tian, Yang Chen didn't have to worry. But now, Yang Chen must worry about Gongsun Ling. Having absorbed so many different spirit powers, of course the spirit power cultivation base will be very high, but after ascending, if she want to purify these spirit powers, it would take a lot of effort.

The best way was to re-refine the mountain river geographical map to increase the function of purifying spirit power. At the same time, Gongsun Ling should also refine and condense her current spiritual power as much as possible, this was the right way. Those masters outside were beating their lives and beating to death, so he took this time to ask Li Cheng for advice.

"Big brother, A'Ling's spirit power is a bit mixed, is there any way to make those spiritual powers more refined in the mountain river geographical map?" With Li Cheng, a great master with pure spiritual power by his side, how could Yang Chen let it go? Naturally, he put on a posture of humbly asking for advice and asked Li Cheng for advice.

"You don't have to ask, I'll talk about it afterwards." Li Cheng had been preparing for a while, and Yang Chen was answered immediately when he asked him. When it was related to herself, Gongsun Ling also turned her head and listened carefully.

"A'Ling, your current spiritual power is a bit confusing and impure. Although your cultivation base is high, your real combat power is not as good as Shanshan." Yang Chen was not afraid that Gongsun Ling

would be sad and directly said the problem “Of course, I’m to blame for this, I didn’t tell you how to cultivate the mountain river geographical map well.”

Gongsun Ling was in the Demon Continent these days, and there was a geographical map of mountains and rivers nearby, which could almost be said to be unprofitable. But in front of his husband and his husband’s elder brother, she was very submissive. Especially when Yang Chen said that her spiritual power was impure, even Li Cheng nodded in agreement, there must be some problems.

“In your situation, it’s like eating the demon orb. It will take a lot of energy to adjust in the future.” Li Cheng said from the side “The gain is not worth the loss, it is better to eradicate the troubles from now on.”

“Big Brother, please give me some advice!” Gongsun Ling also called Big Brother Li Cheng after Yang Chen. Li Cheng said so, obviously to help, Gongsun Ling hurriedly gave salutes.

“There is two ways.” Li Cheng was not polite, and directly stretched out two fingers and said “First, refining the mountain river geographical map. The spiritual power that the mountain river geographical map will provide you in the future will be the purified spiritual power. I have a refining method here, which is most suitable for your situation, but it will take at least two to three hundred years.”

“It will take two to three hundred years to re-refine the mountain river geographical map, it’s worth it!” Yang Chen directly answered next to him. Any of the methods in his memory would take hundreds to thousands of years, but now it only takes two hundred years, it’s really worth it.

“Second, from now on, you, including everyone, must condense and purify your spiritual power.” Li Cheng was not at all polite, included everyone in “I can add a heavenly spirit earthly fiend formation your family, combining your husband Yin-Yang five elements secret art, it relies on pure spiritual power.”

Chapter 538.2: Collecting The True Essence Spiritual Solution

the slightest hidden selfishness on this, it was simply selfless guidance. However, how to condense and purify spiritual power, he did not continue to say. Each sect has a similar method, and each cultivation method has a different method.

As long as you give directions, everyone will naturally be able to pay attention to their cultivation. If you do not seek for quickness, but for perfection, and your future achievements would definitely be different.

Here Li Cheng had already handed over the refining method to Gongsun Ling, and instructed her to start refining her own magic weapon.

Because it has been tempered as her life source magic weapon, the mountain river geographical map could be used at any time. With this refining method, Gongsun Ling could even use the masters in the mountain river geographical map to complete this process.

After temporarily solving Gongsun Ling's hidden dangers, everyone became happier, watching the masters outside fighting each other, still taking the action to collect one or two guys who were alone, waiting for the final result.

After being immersed in the demonic qi of the Demon Continent for a long time, after experiencing the frenzied cannibalism at the beginning, some people finally realized that something was wrong and sensed the existence of the demonic qi. Those who have obtained the cultivation method and magic weapons were the first to wake up. After discovering that something was wrong, they were shocked. The separated ones woke up the guys who had fallen into the eruption of the heart demon.

As a result, the battle group finally separated, and all that could be awakened were awakened, and the ones that could not be awakened were first hit hard and lost their ability to move. In the end, everyone was divided into several different groups.

Counting the number of people, in this melee alone, hundreds of dacheng stage masters were lost, and more than a hundred trapped in the heart demon were heavily wounded and guarded. Among the remaining people, more than half were wounded and intact, that was, they were in their early 100s.

Yang Chen had already retracted the nine nether flying sword, the group of six people, under the double cover of the sea jade lamp and the mountain river geographical map, no one could find their tracks. They hide on the side, waiting to see what happens next.

“There are so many second wood true essence, enough for everyone to share, why should it be cheaper for the guys who fish in troubled waters?” The one who said this was one of the first dozen old monsters to come in.

In fact, several groups were headed by these old monsters, and everyone nodded and agreed. The previous madness to kill each other was simply unreasonable, they could endure it for hundreds of years, but they lost their defense at this time.

The second wood true essence was not that easy to collect, and all the people present were knowledgeable. All understand this truth, except for those wood monster race, it was estimated that other people can't directly collect the refined second wood spiritual solution at all. Finding the second wood true essence was just the beginning, they needed to find a way to collect it before they could succeed.

“Everyone retreat, each occupying a position, how about collecting according to our own skills?” Someone immediately suggested that this muddled killing seemed to scare everyone. Each gathering according to their ability, no one could interfere, this was the best way.

In each group, there were actually people who know how to collect the second wood true essence, but it has become a spiritual solution, which was a little more difficult. As long as you give everyone a chance to do something, you can always receive a lot. As the old demon said at the beginning, so much spiritual solution could always be collected.

Several groups have equal numbers, after discussing with others, the leaders agreed to this approach. With so many second wood spiritual solution why would they fight to death, how if they collect it, even if they couldn't, they can grab it from the opponent, which was more beneficial than doing it like this.

Those who were trapped in the heart demon and can't wake up were something that several groups have to fight for. After all, there are more than one hundred people, no matter which group they join, they are powerful forces. But when everyone hit their ideas on those people, they were shocked to find that those seriously injured and unconscious guys disappeared without a trace.

This discovery made the old monsters suddenly startled, these people disappeared under their noses. How could this be possible? What kind of cultivation base does it take to do it?

Everyone raised their spiritual awareness, and carefully watched the surroundings. They just let them investigate, and they couldn't find anyone who did it.

Everyone was shocked and frightened, guarding each other, and distributed in several directions according to the previous agreement. Until some of them tried to collect the second wood true essence, nothing happened. This made them a little relieved, and then several groups sent people to alert while sending people to collect them.

After Yang Chen, the six people, unconsciously received the one hundred injured guys in the mountain river geographical map, they quietly hid them in the geographical map of the mountains and rivers on the edge where several forces hadn't noticed them. Entering the second wood true essence, they quickly drilled to the bottom.

Yang Chen now knows a lot about the true essence spiritual solutions. In such a situation, it is not surprising that there will be second wood true essence crystals below. They would collect those first, and then it will not be too late to collect the second wood true essence spiritual solutions. They can't leave precious materials to these old monsters.

The old demon supervised each other, but couldn't detect the movement in the second wood true essence spiritual solution. There was no way, there was a force of suction when the spiritual awareness penetrated it. Although they can contend, it was wishful thinking to know the movement in the spiritual solution.

The mountain river geographical map protected everyone from diving to the bottom of second wood true essence spiritual solution. Sure enough, a large piece of second wood true essence crystal was found, good things are welcome, Li Cheng made a move and directly salvaged all of them piece by piece, and then the two divided it, and the Yang Chen family and Li Cheng divided it equally.

Next, it was to collect the second wood true essence spiritual solution, and neither Li Cheng nor Yang Chen was polite. Yang Chen held the gourd, Li Cheng held the bottle, and took the mountain river geographical map and collected them frantically. The level of the second wood true essence spiritual solution began to slowly drop.

Of course, Yang Chen wouldn't just use such an opportunity to only collect the spiritual solution. The blood phantom vine flying sword was originally the second wood flying sword, and it was precisely this opportunity that the second wood true essence spiritual solution could be used to refine it.

In the same way, the body of the medicine garden tool spirit A'Bi, the current jasper blood phantom vine was also a powerful fifth grade, also infused with a large amount of second wood true essence spiritual solution for A'Bi to absorb. A'Bi even started to flush the space barriers of the medicine garden of Greatest Heaven Sect with this powerful second wood true essence spiritual solution, trying to complete the final integration process.

Outside the spiritual solution, the old demons suddenly found that the level of the second wood true essence spiritual solution was slowly falling, and they were all taken aback. It was thought that a certain or a few forces have a method to quickly collect the second wood true essence spiritual solution. Everyone has also accelerated the collection, and at the same time secretly guessed which force has such a powerful collection method, and what should they plan after receiving it?

Chapter 539.1: Final Outcome

After all, it was the true essence spiritual solution. Even if Yang Chen and Li Cheng collected it at the same time, the impact on the lake surface accumulated by the spiritual liquid in a radius of more than ten miles was very small.

After a hard day and night, the liquid level of the lake dropped by more than a foot. But this speed has already made those old demons horrified.

Every faction has the means to collect the spiritual liquid, but compared to the two people gathering it almost like pouring water into a gourd and a jade bottle, their speed was much slower.

However, even so, those old demons gathered a jade bottle or two, and they continued. There was no other way, no one knew that such a heaven-defying thing would appear here and as soon as it was discovered, it attracted everyone's attention, and there was no time to fully prepare.

Now there was a certain power that could quickly collect the true essence, the old demons could only do their best to collect some, and then stare at the other powers to see which power was behaving abnormally, and then wait to make plans after the collection was complete.

Everyone has the same mind, if everyone collects such good things slowly, one or two could be tolerated. But once one guy can gather a lot, it will inevitably cause imbalances among the others. In this way, contradictions were slowly bred without being scarce and unbalanced.

Yang Chen and Li Cheng were busy collecting the spiritual solution. Except for Gongsun Ling, all of the four women began to cultivate their second true essence spirit power in the mountain river geographical map. Gao Yue's ninth water true secret art, Shi Shanshan eighth metal true secret art, as well as Sun Qingxue second wood true secret art.

There were so many second wood true essence spiritual solution. It was enough for Sun Qingxue to cultivate the second wood true secret art easily. The only thing missing was the sixth earth true essence that Gongsun Ling needed, but now Gongsun Ling's main task was not to cultivate, but to re-refine the mountain river geographical map.

It must be said that Li Cheng's refining method was indeed extremely powerful, it can re-refine the mountain river geographical map that has become the life source magic weapon without affecting the use of the mountain river geographical map.

The purpose of this sacrificial refining was mainly to achieve spiritual power purification on the geographical map of mountains and rivers. In the future, the spiritual power provided by the masters in the geographical map of mountains and rivers could be easily absorbed by Gongsun Ling without worrying about too many side effects.

This was a long-term process, even Li Cheng said it would take two to three hundred years. Gongsun Ling was not in a hurry, but the initial cultivation was quite troublesome and Gongsun Ling could only work hard.

More than one hundred seriously injured old demons were collected into the geographical map of mountains and rivers, and were easily distributed by Gongsun Ling within the huge area of the geographical map of mountains and rivers, without enemies, there was no demonic qi disturbance either, the old demons awakened one after another.

Spiritual power was abundant, but all the magic weapons at their disposal have disappeared. Their qiankun bag was completely searched by Gongsun Ling, and they could only recover their injuries first, and then try to figure out where they were. What no one knows was that every time they cultivated, it was equivalent to helping Gongsun Ling refine the geographical map of mountains and rivers and provide Gongsun Ling with a steady stream of spiritual power.

Collecting the second wood true essence spiritual solution was a long-term process, and there were a lot of spiritual solution here. Yang Chen and Li Cheng let go of their gourd and bottle, only to absorb one foot of liquid a day. It will take a long time to absorb all these tens of feet deep spiritual liquid.

Yang Chen never thought about it, he followed Li Cheng here and participated in this matter, and he was able to get so many benefits. With that said, Li Cheng's luck were so profound that it can't be explained.

A large amount of second wood true essence spiritual solution was obtained, and A'Bi's body, the jasper blood phantom vine, grew extremely strong. In the medicine garden, a space was specially opened to hold the second wood true essence spiritual solution. If someone enters Yang Chen's medicinal garden at this moment, they will be able to find two huge ponds, one containing the first wood spiritual solution and the other with the second wood true essence spiritual solution. No matter what kind of spiritual medicine, it can be managed by A'Zhu and A'Bi with extraordinary vitality.

The scouring of a large amount of the second wood true essence spiritual solution triggered a change in the space barrier. The one hundred thousand-year-old medicine garden space handed over by the Greatest Heaven Sect finally began to merge with Yang Chen's medicine garden.

However, this time the space between the two parties was too different, and the fusion was complete, but a new one was formed instead of directly fusing with the original space.

In this way, the medicine garden has three levels of space, the first level is the thousand-year-old spirit medicine, the second level is the ten thousand-year level spirit medicine, and the third is the one-hundred-thousand year level spirit medicine.

A'Zhu and A'Bi moved their bodies into the third dimension for the first time. The spiritual power there was more abundant, and with the watering of the first wood spiritual solution and second wood true essence spiritual solution, the medicinal materials there appeared to be more lush.

The green gourd in Yang Chen's hand became more and more emerald green, it had become pure emerald green. Holding it in his hand, it was like a translucent jade gourd, indescribably cute.

"Those old worms were willing to pay for the cost." Li Cheng seemed to be a little unbalanced about the magic weapon refined by the dragon clan, watching the changes in the gourd in Yang Chen's hand, he muttered.

Yang Chen, who got the bargain, obviously didn't mean to be obedient, but quietly holding the gourd and controlling the absorption of the second wood true essence spiritual solution, without showing off at all. Li Cheng murmured a few words, and when no one answered, he calmed down, distracting himself with cultivation.

Yang Chen didn't relax his cultivation either, but what he was doing now was to absorb those newly received demonic fire seeds. There were many first grade fire seeds, second grade and third grade in the demonic fire seeds. For Yang Chen, it was not difficult to absorb, almost at a rate of one a day, he quickly absorbed it into the profound spirit furnace, and then it was absorbed by Yang Chen to merge into the Yin-Yang heaven burning fire.

Suddenly so many basic fire seeds were added to the two fire dragons of the Yin-Yang heaven burning fire, and their shape became more and more realistic. Although it has not yet reached the point of lifelike, some horns and scales could already be displayed on the fire dragons. He believes that in time, after being able to absorb and fuse higher-level fire seeds, the details of the fire dragons would become more detailed.

While absorbing the fire seeds, Yang Chen paid attention to the situation of the three women who were cultivating the true essence secret art. Because they had cultivated a true essence secret art before, so with the second cultivation, the three women were all familiar with the process and there were almost no obstacles.

Half a year passed quickly, and the three women opened their eyes from the closed-door cultivation almost at the same time, everyone had an aura of the true essence spiritual power and their cultivation had also improved again.

Chapter 539.2: Final Outcome

Sun Qingxue, with the worst cultivation base, was now in the middle Yuanying stage, while Shi Shanshan, the strongest of the three girls, has directly reached the peak middle Yuanying stage.

After all, it was two kinds of spiritual power, but the same attribute, after the yin and yang were reconciled, the spirit power of the five element attributes was more than twice as powerful as that of a single type.

At this time, the spirit power of the three women's cultivation base had all been converted to the original Yin-Yang spiritual power, and there was nothing more pure than their cultivation base.

Of course, the purification and condensing of spirit power still requires a constant process to proceed, both Yang Chen and Li Cheng emphasized the content of this aspect. In fact, there are records of how to purify their spiritual power in each method. As long as the girls cultivate carefully, they could naturally achieve their goals.

Because of Yang Chen and Li Cheng's dissuasion and explanation, the four girls now did not pursue the level of spiritual power at all, but began to pursue the quality of spiritual power. No matter how high the realm was, you could only serve as a foil when you encounter people like Yang Chen and Li Cheng, it was better to try Li Cheng's method.

Everything was proceeding step by step, and the level of the second wood true essence spiritual solution also began to slowly bottom out. The old demons of the several surrounding forces each collected the second wood true essence that they had collected, carefully guarding the surroundings, collecting the last second wood true essence while waiting for the final eruption.

One or several forces forcibly collected more than ninety-nine percent or more of the second wood true essence. They ate meat and left a little soup base for others. They didn't even plan to leave any soup, so it naturally aroused outrage.

Everyone was waiting for the moment of the outbreak. The magic weapons at the bottom of their respective storage bags were prepared in advance. This time, some guys would be smashed into meat paste.

As the spiritual solution level lowered, the forces in several directions became closer, and finally they were held together.

A small friction was enough to trigger all disputes. When everyone was ready with red eyes, an abrupt cough directly detonated these dacheng stage masters.

Boom, all the flying swords and magic weapons flew out, and countless various thunderballs exploded madly. This time, they didn't ask for anything else, they only attacked to grab that massive amount of second wood true essence from the opponent's hand.

All the old monsters were desperate to kill their opponents. No one meant to be merciful. Under this scene, everyone understands, kill the other one. There would be more second wood true essence on his side. People die for money, so everyone was caught in a frantic attack.

The fight this time was much more tragic than the last time. Last time most people were controlled by the heart demon, but this time it was an active fight, and the attack was unprecedented.

For the massive amount of the second wood true essence spiritual solution, everyone put down their disguise and beheaded their opponents mercilessly. Several forces fought, but no party voluntarily withdrew.

In this scene, there was no room for a guy to withdraw wisely, who would quit now. Whoever has the biggest suspicion will definitely be attacked by groups. No one dared to make such a move and no one wanted to let anyone go.

There were a few guys who were clever and wanted to escape first, but they were killed in the blink of a second. After the melee that lasted for more than half a month, only more than a hundred old demons were left to fight.

The other guys were either dead or seriously injured and unable to move. Even the rest of them were all scared and exhausted.

What's more terrifying was that these remaining guys suddenly discovered that they were actually trapped in a formation unknowingly during the battle. Who arranged this formation, no one even understood.

Everyone stopped their hands, looked at each other, and then watched the seriously injured companions disappear inexplicably before everyone's eyes. Which horrible force was this that has made a stance of fighting it all?

Among the remaining old demons, the dozens of old demons who were the first to enter the site of the Heart Demon Sect were all listed. With just a dozen of them, they killed at least a hundred opponents.

“Which expert is it, show yourself?” Someone finally asked out loud. They were not afraid to be plotted against, but it was a shame to be plotted against so quietly.

This time, Yang Chen and the others did not disappoint these old demons, and showed up directly. When the six figures appeared in front of everyone, those old demons were all dumbfounded and shocked.

“It’s you?” Several people screamed out loud on the spot.

Everyone was not surprised. Yang Chen Li Cheng and the six of them, when they first met, there were only two in the middle Yuanying stage, and the others were in the early Yuanying stage. If they hadn’t used Yang Chen to purify the demonic qi to open the portal entrance, they would have killed them easily.

Because of the strong tortoise shell protection, no one could do anything to them, but no one thought that the culprit that made them kill each other so much turned out to be these six weak little guys.

All the old demons were exhausted now. Not to mention the six Yuanying stage masters, even six Jiedan stage masters could dominate their life and death.

After all, they have never trusted each other, otherwise, how could they kill each other so easily and be taken advantage of by Yang Chen and others?

“Fine, I’ll not wait until I die, all the things I get here belong to you.” Someone immediately responded: “Just let me leave, and I will surely offer it with both hands.”

“If you change to yourself, will you let us go?” Yang Chen was noncommittal, but asked back.

Everyone’s heart sank, knowing that this time they couldn’t be kind, Yang Chen was right. If they were replaced by them, they would never leave anyone alive and let them retaliate in the future.

“Attack!” They are all experts, after so many years of experience in the Demon Continent, no one has the habit of talking nonsense. Seeing that there was little hope, they immediately started to attack.

After all, an old demon was also a master of the dacheng stage. A lean camel was bigger than a horse, and with all their best efforts, they may be able to kill six Yuanying stage masters and fly far away.

It's just that the wishes are beautiful, but the reality is cruel. As soon as everyone rushed out, a flower bloomed in front of them. When their vision became clearer, everyone was stunned to find that they no longer knew where they were, and around, there was not even a single figure.

"A'Ling, this time you have gained a lot!" Yang Chen looked at Gongsun Ling who put away the geographical map of the mountains and rivers with joy, and couldn't help but exhorted "You can't stop the refining method given to you by your eldest brother."

In just this last fight, Gongsun Ling has added more than a hundred dacheng stage masters, and her spiritual power will only become more and more complicated in the future. Of course Gongsun Ling knew what was good or bad, so she agreed repeatedly.

At this point, the thousands of dacheng stage old demons who had planned to hit the heart of the Heart Demon Sect ruins have been wiped out, and there was no one left.

Chapter 540.1: Extreme Cultivation

So many dacheng stage masters were all killed in just a few years, and they were still concentrated a few times. Such a thing was unimaginable before. So many masters of the dacheng stage, it was not good to say that, if they directly kill a few big sects, even if the big sects have their final trump card, it was estimated that their vitality will be greatly injured.

The whole process was exceptionally smooth, and there were not even a few people who really wanted everyone to do it. It was all because of the greed and mistrust of these guys.

Otherwise, if they wanted to deal with thousands of dacheng stage masters, even Yang Chen and Li Cheng are also going to die. If it's really that simple, Yang Chen will kill the Greatest Heaven Sect directly for revenge, why arrange so many twists and turns, and come to the Demon Continent to cultivate.

In any case, the result was satisfactory. There were more than 1,000 dacheng stage masters, and in the end, more than 200 close to 300 old demons were trapped in the geographical map of mountains and

rivers, and all the rest were killed, or died by their opponents, or died in the second wood true essence spiritual solution.

Although this caused the spiritual power of the mountain river geographical map to be more complicated, it also doubled the power of the mountain and river geographical map. Moreover, when Gongsun Ling refined it, the difficulty was slightly reduced due to the increase of masters in the map.

This was a very contradictory process, because there were many masters, so the spiritual power was mixed, but just because there are more masters, there are many people who contribute, and it was easier to refine. According to this principle, it should be to find more masters, but Gongsun Ling could not do this.

The more masters there are in the geographical map of mountains and rivers, the more difficult it will be for Gongsun Ling to control. Now it was basically close to Gongsun Ling's limit. After this battle, Gongsun Ling could no longer have to find a master to fill in the geographical map of the mountains and rivers for a long period of time, otherwise it may be out of control, and the gain will not be worth the loss.

Dragons could refine various spiritual powers by themselves, purify and refine by themselves. Therefore, when the geographical map of mountains and rivers was first made, there was no need to refine spiritual power. Now Gongsun Ling had to spend hundreds of years to refine it again.

However, this also highlights the refining technique of Li Cheng. The geographical map of mountains and rivers that can be placed in the treasure house of the dragons must be the dragon masters who do not know how long and how much energy it took to successfully refine it. It takes only a few hundred years to fill this important function, which could be described as incredible. They really don't know how brilliant Li Cheng's family was, that they could actually pass down such a peerless technique.

Regardless of the cultivation methods or magic weapons that the old devils found, they were all gotten by Yang Chen and the others. Holding the jade slips and looking at them one by one, Yang Chen easily understood the principles of those cultivation methods, and he could be regarded as mastering this kind of cultivation method for refining inner demons, collectively known as the heart demons cultivation method.

Simply put, this heart demon cultivation method of the Heart Demon Sect was more similar to a method of self-psychological guidance, and it cannot completely refine the heart demon. The so-called direct refining of the inner demon to benefit from it was even more ridiculous, but it was after all the heart

demon cultivation method. It's true that the mental state cultivation base could be improved a little from it.

Moreover, the heart demon was the heart demon after all, and the heart demon cannot be completely eradicated. Under the effect of the strong demonic qi, it can still be triggered. Otherwise, the Heart Demon Sect does not need to seal the gate on a large scale and cite their migration.

Some of the magic weapons obtained were similar to the tranquility of the black obsidian futon. When they reached this level of cultivation, they were actually not very useful. Rather, Li Cheng suggested that these magic weapons can be smelted together to form a large cultivation room. Whoever retreats in the future will have a lot of benefits.

The matter of the Heart Demon Sect was brought to an end with the collection of the second wood true essence spiritual solution and the destruction of the old demons. When Yang Chen and his party came out of that portal, they didn't see anyone else.

"Since the matter here is finished, I will look around again. One day, we will meet at the dao sect domain!" Li Cheng and Yang Chen reunited, also because of the heart demon sect ruins. Now that the matter was over, naturally he will no longer stay, so he directly said goodbye.

Although Yang Chen was a little bit reluctant, he also knew that he would follow fate, and took his four wives to salute the eldest brother Li Cheng, and watched him leave.

"Husband, we also want to have more experience here." When Li Cheng left, Gao Yue and Shi Shanshan seemed to have an idea, still wanting to leave Yang Chen's side to gain experience.

"This place is full of demonic fiends, you can experience it, but you can't travel alone." Yang Chen thought for a while, shook his head slightly "You two should be in a group, and you must pay attention to safety."

A group of two was actually Gao Yue and Gongsun Ling's group, Shi Shanshan and Sun Qingxue's group. One of the two groups has the geographical map of mountains and rivers, and the other has the tortoise shield, both of which are top-level protection magic weapons. In the depths of this demon continent, they can be considered to be able to protect themselves.

Everyone agreed on the time and place for the next meeting, and the four women left Yang Chen again, looking for the experience of demonized monsters fighting, Yang Chen once again became a loner, bare-headed commander.

At this stage of Yang Chen, it doesn't make much sense to search for some ordinary demonized monsters to gain experience. In the Demon Continent, it was a pity that it was not experienced, so Yang Chen naturally targeted the demonized demon vine.

When slaying the second demonized demon vine, Yang Chen discovered a strange phenomenon. After nine nether flying sword absorbed the demonic qi of the demonized demon vine, it seemed that the induction of the demonic qi took a step up. Faintly, in the other direction, something seemed to be attracting the nine nether flying sword.

Before, because he wanted to solve the matter of the ruins of the Heart Demon Sect, he didn't care about exploring, and now Yang Chen had time, and regardless of other things, he flew directly in that direction. He wanted to see what exactly was in that direction that could attract the nine nether flying sword.

Hundreds of low-grade demonic fire seeds have been absorbed, and basically all those below the third grade have been completed. On the way, Yang Chen didn't waste time either, rushing on the way while absorbing the third-grade demonic fire seeds.

Compared to the current profound spirit furnace or the Yin Yang heaven burning fire, the third-rank demonic fire seeds were not enough, and it was easy to absorb, it only took Yang Chen a day or two more.

This time Yang Chen hurried along, he was walking in a straight line, regardless of what kind of tough guys he would encounter on the road. The nine nether flying sword was like a fish in the water here, the demonic fiends encountered along the way cannot withstand the blow of the nine nether flying sword, even the monsters of the dacheng stage. A strong monster who has no mind and only instinct was still easy to deal with after all.

It only took a few months before Yang Chen arrived at the area that attracted the nine nether flying sword. Seeing the situation, Yang Chen couldn't help but smile.

Chapter 540.2: Extreme Cultivation

Here was another valley, and likewise, there was another demonized vine. However, it was slightly weaker than the second one that Yang Chen killed.

It seems that the artifact spirit of the nine nether flying sword instinctively seeks out the same kind. This discovery made Yang Chen very happy. In this way, there was no need to worry about the demon orbs.

This time, Yang Chen's yellow turban warrior body refinement technique has been raised to a small level, his spiritual power has also improved, and his strength has greatly increased, so it will be much easier to deal with a slightly weaker demonized demon vine.

In about half a year, Yang Chen had another demon orb with a diameter of less than two feet in his hand, and the nine nether flying sword absorbed the demonic qi and phantom of the demonized demon vine, and the tool spirit became even more powerful and a lot more flexible.

Now, even Yang Chen was struggling to deal with the demonic qi of the nine nether flying sword. It's time to calm down again and refine it carefully.

After making a decision, Yang Chen went straight to the better gathering point without saying a word. This was the inner edge of the Demon Continent. There are only two or three gathering points. It took almost another three months before Yang Chen arrived at the gathering point.

As soon as he entered the gathering point, Yang Chen attracted countless eyes. Those who can come to this gathering point were all masters of the dacheng stage. Yang Chen was the only one who dared to rush here in the middle Yuanying stage.

All the people at the gathering point were a little surprised by Yang Chen's arrival. They don't know whether to say whether this young man was too lucky or too daring to be arrogant. However, since he could come to the gathering point, it seems that the former was more true.

There were not many people in the gathering point, including those who have opened stores, there are only a few dozen in total. However, the one with the lowest cultivation base here was also in the middle dacheng stage, and the one with the highest cultivation base was already surpassing the peak of dacheng stage and catching up with the cultivation base of the supreme elders.

The supreme elder of the Greatest Heaven Sect last time, if he was here, he would never dare to break the rules so blatantly. He just doesn't know why these masters have been wandering in the mortal world and not ascending.

After thinking about it, Yang Chen could only speculate that the purpose of these people should be the same as Yang Chen. It was to use the demonic qi to hone themselves. There are demonic cultivators and monster cultivators among them. Perhaps they want to greatly improve their state of mind here to make up for their lack of aptitude, so that they can ascend to the spiritual world in the future not too far away.

Yang Chen did not directly find a place to practice, but first strolled around this small gathering point. It must be said that the closer you are to the depths of the Demon Continent, the stronger the demonized beast, and the bigger and bigger the demon orbs that everyone can get.

The third-grade demon orb was common here. Second-rank ones were not uncommon, but Yang Chen has not seen first-rank ones. The most advanced one was a second-rank demon bead with four black lines on it.

With such a big demon orb, few demon orb refiners could purify it to a higher level. Yang Chen found a room and started retreating.

Said to be a retreat, in fact, it was a pretense. After quickly using the nine nether flying sword to absorb all the demonic qi on ten demonic orbs he just bought, Yang Chen continued to use the demonic qi to temper himself.

The demonic orb was to cover the demonic qi on the nine nether flying sword. Although Yang Chen could control the nine nether flying sword so as not to emit too much demonic qi, he still lacks control so some of it will escape eventually.

The nine nether flying sword, which concentrated the three demonized demon vines with demonic qi and phantom, was already somewhat resistant to Yang Chen's control. Every time the demonic qi triggers the inner demon. It was always like a violent storm, a thunderous wave, a wave after wave of demonic qi rushed to Yang Chen's heart.

Referring to the methods of the Heart Demon Sect, coupled with Yang Chen's own state of mind, Yang Chen's mind, like a mainstay, remains motionless. No matter how crazy these demonic qi attacks were, they always came to block the water and cover up the ground, reducing the demonic qi a little bit. The steel-like toughness tempered by his will.

After almost a year, Yang Chen finally completely suppressed and refined the trace of resistance in the nine nether flying sword, and only then did he leave seclusion.

As soon as Yang Chen exited the seclusion, he soon caused a frenzy at the gathering point. There was no other reason, five pure golden demon orbs appeared directly in the auction list of the small auction house.

Boom, the gathering point seemed to be detonated, and all the figures went straight to the auction. Why do so many masters continue to bear the power of the demonic qi in the demon continent, isn't it just to be able to swallow one or a few high-grade demon orbs, so that the cultivation base will be greatly improved, and then they will survive the tribulation?

Compared with the people who cultivate peacefully outside, the people who have experienced the Demon Continent were much more hostile. Under such circumstances, passing the tribulation was many times more difficult than the ordinary cultivator. This requires that they must have enough cultivation base to resist the tribulation, otherwise they can only end up dying.

A high-quality demon orb, even the best demon orb refiner, can only purify it to the fourth level, leaving four black lines. Only the master's state of mind can handle it.

It was not that there was no other way to eliminate the hostility, as long as you leave the Demon Continent, leave this place full of slaughtering demons, spend hundreds of years cultivating your mind, the hostility will naturally disappear. However, instead of spending hundreds of years on self-cultivation, it was better to practice here for hundreds of years, there is an 80% certainty that they can withstand stronger inner demons. They can also gain more training, and everyone understands which choice was better.

In fact, sometimes these masters just can't let go, they just can't figure it out when they are in the game. At this time, no one knows better than these masters what it means for a pure golden third-grade demon orb to appear.

This gathering place was too small, and there were only a few people, so the slightest movement cannot be concealed from anyone in the gathering point.

Yang Chen, a super-advanced demon orb refiner, suddenly became a favorite and those five demon orbs were purchased at a high price for the first time, and it took only half a day for the auction to end.

“If you have a demon orb that needs to be purified, you can come and find me.” Yang Chen casually left a message on the auction floor: “Anything can be used to pay for it, as long as you can provide. In addition, when purifying the demon orb, I need a safe place to stay.”

This last requirement was met almost immediately. The best room in the gathering point, with several restrictions placed around it, even if the people outside were shaking the sky, it will not disturb the people inside.

Everyone in this gathering point was eagerly waiting for Yang Chen to help them purify their demon orbs.
