

## Zhanxian 541

### Chapter 541.1: True Essence Spirit Power Cultivation

What Yang Chen wanted was a quiet and secure environment. The refining of the nine nether flying sword has come to an end, and Yang Chen now also needs to cultivate the remaining several true essence cultivation methods.

In addition to the third fire true secret art, all other true essence cultivation techniques have already been cultivated, and the great Yin-Yang five elements secret art was about to be completed. Of course, Yang Chen must first complete the cultivation of these true essence cultivation methods.

The first thing to start was the sixth earth true secret art. The sixth earth true essence was the least, and it was obtained from the Greatest Heaven Sect, which was only enough for one person to cultivate. In order not to delay Gongsun Ling's cultivation, Yang Chen needed to complete his cultivation first, and then double-cultivate with Gongsun Ling to give Gongsun Ling the sixth earth true essence for her to cultivate.

The last time, he used this method for the fifth earth true secret art. Speaking of which, it seems that the true essence spiritual power of the earth attribute was very rare, far from other spiritual powers, and there are many formations that masters stay and collect, accumulating a lot.

A group of experts were waiting at the gathering point, and no one dared to disturb Yang Chen easily. Originally, they were waiting for the greatest assurance. Now that Yang Chen is here, the pure golden high-grade demon orb can fully meet their requirements. There are even a few who have never ascended, just waiting for this opportunity, no matter what will not be damaged by others.

For Yang Chen, who has cultivated several kinds of true essence secret arts, the sixth earth true secret art and sixth earth true essence was not difficult to cultivate.

In less than half a year, the sixth earth true secret art had been completed, and the sixth earth spiritual power in the Yin-Yang five elements secret art had also been replaced by sixth earth true essence.

At the moment when the cultivation of the sixth earth true secret art was successful, his sea of consciousness changed again. There was a lot of black flying dust in the air. It looks like the appearance of the nine nether flying sword, but the attributes were pure sixth earth attributes.

Because of these black flying dust, other than Yang Chen, outsiders who enter Yang Chen's sea of consciousness can only see a black piece, and can't see anything else.

These flying dust from the earth not only obscured the line of sight, but also vaguely refined the entire sea of consciousness into one. Although it looks loose, the degree of solidification of the spiritual awareness has increased by more than several times. Even if others attack with the same level of spiritual awareness, Yang Chen's spiritual awareness could also remain unbreakable.

The roar of the golden bell has no effect on Yang Chen now. The bell that could instantly dissipate people's consciousness, even if it was strengthened several times, it cannot shake Yang Chen's consciousness.

The only regret was, now there was no further breakthrough in his spiritual awareness cultivation base. Although it has increased a lot, it has not yet reached the level of the fifth grade human immortal realm.

The spiritual power of the earth attribute was much more condensed than the spiritual power of other attributes because of the combination of Yin-Yang. This was also a small surprise, at least it saved Yang Chen a lot of time for condensing.

Another small surprise was that the internal organs enhanced by the sixth earth true secret art have also led to a slight improvement in the yellow turban warrior's body refining technique. Taking a big step forward to the peak river turning strength, it seems that there was only a slight difference to be able to have a breakthrough.

When he ended the retreat, Yang Chen went out, and then took out a second grade demon orb. This was entrusted to Yang Chen to purify by a master at the peak dacheng stage. This master at the peak dacheng stage has been waiting obediently outside for half a year.

When he got the pure golden demon orb, the owner of the orb was in a burst of ecstasy, and no matter how many people were watching, he directly put the demon orb into his mouth.

The demon orb in the second grade was not small, but it was completely placed in his mouth, and they are not lightly supported, but who cares about this little incident in this season, they were all anxiously waiting for the result.

In fact, Yang Chen's reputation in the past was outside, he just got here not long ago. Everyone only thought that he could purify the low-grade demon orbs. It was not until they saw the pure golden demon orb of the third grade that they knew how powerful Yang Chen was.

The master who swallowed the demon orb sat down and started refining. No one dared to disturb him, everyone wanted to see the effect of the demon orb with their own eyes.

Less than an hour, he had completely refined this demon orb, and the aura around him was surging. Tribulation clouds have slowly begun to appear in the sky.

The people present were all experienced experts, and it was clear what it was. Looking at this scene, everyone was full of surprises, holding their aura, waiting to see the process of the ascension.

The cultivator flew away from the gathering point, it was the rule that they were not allowed to attempt their tribulation at the gathering point. Under such circumstances, no one will interfere when facing tribulation. No one was willing to use their own lives to bear the tribulation for others. Even those demonized monsters will instinctively avoid the place where the tribulation clouds gather.

It was a rare experience for everyone watching to face tribulation and ascend. In addition to verifying the efficacy of the demon orb, someone was facing the tribulation at this time. For everyone, it was killing two birds with one stone.

The wind tribulation descended silently, and within a few dozen feet of the cultivator, no matter what it was, it turned into powder.

This time, the wind tribulation was different from what Yang Chen had seen several times. Different from Elder Wu Xiong's wind tribulation, and also different from Lan Ying's wind tribulation, it seems to be a lot more violent, perhaps because of the serious malice due to his experience on the Demon Continent.

The reason why many people dare not face the tribulation easily was also because of this. Everyone stared at the cultivator who was facing the tribulation with wide eyes, watching him easily pass the first, the second... all the way to the ninth.

All the onlookers were several miles away from the cultivator, but when it came to the eighth tribulation, everyone had to step back madly again, so as not to be involved in the tribulation that fell from the sky.

When the ninth path was reached, the scope of the wind tribulation expanded a lot. When the wind fell, a group of masters frantically retreated again and again, and retreated three or four miles before stopping. At this time, the wind tribulation had already spread to the gathering point.

Boom, as soon as the wind tribulation landed on the gathering point, a flash of light appeared around the gathering point. However, the gathering point was ignored at all, and it just bounced back the wind tribulation instantly.

However, the number of wind tribulations that bounced back did not disappear, but was superimposed on the cultivator who was facing the tribulation after being enhanced.

No one expected such a situation to occur. Everyone had no experience in facing the tribulation, and it was impossible to calculate the distance. At this time, it was impossible to stop. The cultivator had no choice but to burst out the strength of his whole body and directly meet the last strongest wind.

Suddenly, the silent wind blew the robe of the cultivator into powder. After the protective armor that had been refined for an unknown period of time, it turned into dust after just resisting it. There was not an inch on the cultivator's body, and even all the hair on his body was blown clean.

Chapter 541.2: True Essence Spirit Power Cultivation

No one will laugh at him at this time, even if he has become naked. What everyone cares about is whether he can withstand the final blow.

Ah ah ah! Among the frantic cries of the cultivator, the last gust of wind blew from head to toe, but the voice of the cultivator continued until the gust of wind disappeared.

Boom, the bystanders suddenly boiled. The cry of the cultivator has always been there, and now it has been replaced by the sound of laughing, and the tribulation cloud has begun to dissipate. It was obvious that the cultivator had successfully passed the tribulation.

At the position of the cultivator in the sky, at this moment, was a group of extremely bright light, wrapping the cultivator in it, exuding a power that makes people feel awe from the heart. There was no need to ask, this was definitely the process of the transformation of the body after successfully crossing the tribulation.

After less than the time it would take half a column of incense to burn, the light group dissipated, and the figure of the cultivator appeared. He was already dressed in robes, but his head was still bald. The original middle-aged face had turned into a very young look.

When the person was in the air, the other party threw his hands and bowed at Yang Chen, and his voice came from a distance "Thank you, Grandmaster!"

Just after saying this sentence, the light flashed, and the cultivator disappeared without a trace. A vast and unparalleled aura spread out into the distance like a water wave, and then there was no movement.

The people who gathered at the gathering point were fortunate enough to witness the process of a cultivator ascension through tribulation, and also saw with their own eyes that he had such an effect only after consuming the demon orb purified by Yang Chen, they immediately looked at Yang Chen and their eyes became much more intense.

Not to mention other things, the last tribulation was definitely several times the power of the previous tribulation, but the cultivator could easily withstand it. They can't help but say that this was because of swallowing the demon orb.

"Grandmaster, I still have a second grade demon orb here..."

"Grandmaster, please help..."

"Grandmaster, I have a seventh-grade fire seed, please make a move..."

...

When the wind tribulation aura completely disappeared, and after a brief period of silence, a large number of experts quickly gathered around Yang Chen. Everyone was scrambling to ask Yang Chen to help.

“Come one by one!” As soon as Yang Chen opened his mouth, everyone became quiet “You arrange the order by yourself. Then come to the room to find me.” After speaking, Yang Chen separated from everyone and returned to the room on his own.

After a while, someone came to the door and asked Yang Chen to refine a second grade demonic orb. After discussing the remuneration with Yang Chen, he walked out of the door, sat cross-legged outside the restraint of the door, and personally protected Yang Chen.

Yang Chen easily used the nine nether flying sword to purify the second grade demon orb again. Then next, he started cultivating the second wood true secret art.

The moment when the cultivation of the second wood true secret art was completed, Yang Chen’s sea of consciousness began to change again. The phantom of the blood demon vine has become like a real body, and its volume has also expanded a lot.

His spiritual awareness finally broke through the fourth stage of the Human Immortal realm and he entered the fifth stage. In the instant of the breakthrough, the people in the entire gathering point felt that there was some kind of misunderstanding, they almost thought that someone was ascending up in the moment just now.

The yellow turban warrior’s body refinement technique was also rushed to the edge of a breakthrough, it was only one step away from entering the realm of sea pouring strength. The joints all over his body rattled and Yang Chen only felt full of strength.

The wood attribute spirit power was also directly condensed due to the combination of Yin-Yang, and the total amount of spirit power was also slightly reduced. Just looking at the amount of spirit power, maybe everyone will misunderstand that Yang Chen was still in the early Yuanying stage.

The next step was to come out of seclusion, after delivering the demon orb, the expert at the door was replaced by another one and Yang Chen also had a second grade demon orb in his hand.

It was still the same process, after purifying the demonic orb, Yang Chen began to cultivate the eighth metal true secret art, after there was the ninth water true secret art.

After completing the cultivation of these two true essence spirit power, Yang Chen's spiritual awareness rose directly to the sixth grade human immortal realm, his spirit power was madly condensed, and the yellow turban warrior's body refinement technique finally broke through the peak river turning strength and entered the realm of sea pouring strength.

As soon as he entered the realm of sea pouring strength, Yang Chen's body began to expand again, but this time was different from the last time, not as exaggerated as the last time, but all his muscles seemed to be stronger than normal. It was no longer the slender and well-proportioned figure, but has become a sturdy figure.

The tenfold increase in strength made Yang Chen even a little uncomfortable. When he got up, he directly smashed through the roof and flew out. After landing, he stepped on the hard ground under his feet and stomped out two big pits.

The people who gathered were all experts. At a glance, they could see that Yang Chen's body was different than before, and knew that he must have cultivated a unique body refining technique, which caused his body to feel uncomfortable. This was not surprising, many people have had this situation, as long as the body adapts to it after a period of time, it will become normal.

What was strange to everyone was that Yang Chen has gone through the process of purifying the demon orb several times, and it seems that his cultivation has regressed a little, from the middle Yuanying stage to the early Yuanying stage.

Metal and water properties combine in the Yin-Yang, causing the spirit power of the whole body to be condensed almost doubled. From the outside, it seems that the cultivation base was going backwards, and there was no other explanation.

Could it be that purifying demon orbs will cost the cultivation base to regress? This was quite possible, otherwise it would be impossible to purify it so thoroughly. Everyone doesn't care too much, anyway, as long as Yang Chen could continue to purify the demon orbs, it's not their own cultivation base, so what were they worried about?

Only a few top experts would occasionally look at Yang Chen with a fleeting sense of fear, but it was only for a moment and it would disappear immediately. This was also because Yang Chen couldn't get used to the slight leakage of the power from his spiritual awareness.

Next, Yang Chen began to cultivate the fourth fire true secret art, fire attribute was Yang Chen's innate attribute, especially with the influence of the Yin-Yang heaven burning fire, Yang Chen deliberately made it the last one he would cultivate.

Having cultivated eight kinds of true essence spiritual power, the fourth fire true secret art was really not difficult at all. Sure enough, it was an innate attribute, the moment it was completed, his spiritual awareness directly soared to the seventh stage human Immortal realm. Even those guys who have risen through tribulation will be overwhelmed by Yang Chen's momentum when they meet Yang Chen.

There was a fourth fire true essence in the Yin-Yang heaven burning fire, and the Yin fire became as pure as colored glass, only showing a pure cyan color. But in the sea of consciousness, the Yin fire dragon was half longer than the Yang fire dragon. For the first time, the Yin-Yang heaven burning fire has become a little unbalanced.

The Great Yin-Yang five elements secret art was now only missing the third fire true secret art, it also needed a chance. Before he could get it all together, what Yang Chen had to do was to condense his spiritual power, and then sacrificially refine some magic weapons.

Chapter 542.1: Everlasting Universe Origin Suppression Great Formation

Counting back and forth, it has been four years since the cultivation of these true essence secret arts, plus the previous journey, the distance and the separation with the four women.

The agreement with the four women was that they would meet in ten years, there was still enough time, so he just took the opportunity to refine some flying swords.

Of course, during the interval of cultivation, Yang Chen did not forget to keep in touch with Li Liheng, and often pointed out some of Li Liheng's small problems.

However, before Yang Chen refined those magic weapons, Yang Chen decided to give the Greatest Heaven Sect a big surprise. Naturally, it was also a huge trap.

Li Liheng was very active in revitalizing the Greatest Heaven Sect. Yang Chen suspected that this was also shown to sect master Li and the others. Every time he crossed the boundary and contacted senior Fengzi, he always had to ask some similar questions.

Of course, Li Liheng's own cultivation was what he asked the most. On this point, Yang Chen declined to comment and always used haste to prevaricate every time. On the contrary, he would patiently answer the questions about the cultivation that other the elders or the sect master entrusted to Li Liheng to ask.

Fortunately, Yang Chen already had the cultivation base and spiritual awareness of a great Lou golden immortal in his previous life. Combined with the experience of cultivating the Yin-Yang five elements in this life, Yang Chen could not be troubled by general cultivation problems.

However, Yang Chen would never disclose such a method of condensing his spiritual power from the very beginning. The disciple of the Greatest Heaven Sect, if he has the chance to recognize it, then he cultivates by himself, if he does not recognize it, it has nothing to do with Yang Chen. Anyway, Yang Chen has already pointed out the way for everyone to solve their bottleneck and quickly improve their spiritual power. In any case, they can't blame Yang Chen for any problems?

Yang Chen was very contemptuous of this. As the largest dao sect, he has to revitalize it. Will he give other sects a way to survive? However, the Greatest Heaven Sect's desire to be improved gave Yang Chen an opportunity.

"There is a formation, and the current Greatest Heaven Sect may still be able to use it." After Li Liheng asked for more than a dozen times, Liu Fengzi finally pondered and gave an answer "You can try whether you can set it up in the mortal world."

Hearing that Senior Liu Fengzi finally answered, Li Liheng was overjoyed, he thanked him in a hurry and then listened respectfully.

"This formation is called Everlasting Universe Origin Suppression Great Formation." Yang Chen first said the name of the formation that sounded very mysterious, and then began to give careful instructions.

This so-called Everlasting Universe Origin Suppression Great Formation was not fabricated by Yang Chen, but this formation really existed in the spiritual world, and it was also designed by the masters of the Profound Heaven Sect. From this point of view, Yang Chen passed on the formation to Li Liheng.

The Everlasting Universe Origin Suppression Great Formation was a huge formation. It was even arranged for thousands of miles, enough to cover the entire Greatest Heaven Sect.

The reason why it was called the Everlasting Universe Origin Suppression Great Formation was because it was essentially a formation that collected spirit power. This was naturally the spiritual power of heaven and earth.

The principle of the formation was to slowly gather the spiritual power of heaven and earth under the ground covered by the whole formation to a radius of almost a thousand miles. This makes this thousands of miles around, become a holy place for spirit power cultivation.

Of course, that's a bit more general, to be more precise it was to gather those idle spiritual powers of heaven and earth that are not used very often within the range of the formation to the eye of the formation.

This gathering of heaven and earth spiritual power was still very particular. The formation could cover the entire sect, and the spiritual veins of other sects cannot be forcibly plundered, right? This was something that's going to cause a big mess.

The magic lies in this idle spiritual power. As long as other formations were used, the spiritual power in that area will not be collected by this Everlasting Universe Origin Suppression Great Formation. After the formation was arranged in this way, it will not arouse the dissatisfaction of other sects.

Anyway, it is an idle spiritual power that no one uses, and no one absorbs it. These spiritual powers will also be dissipated and wasted in vain. Moreover, these spiritual powers will not be evacuated in an instant, but will be wispy strands, accumulating more and more to the formation eye, unless at least a master formation expert of at least the sixth grade can detect it.

Now the highest in the mortal world was only a fourth grade formation master. It was impossible for anyone to find out, and there was no need to worry about being criticized by other sects.

Although the spiritual power of each place was only 1 or 2%, it does not seem to be much, but if the idle spiritual power in the entire Greatest Heaven Sect was gathered to the eye of the formation, the eye of the formation will change directly. It will become a huge spiritual vein with unbelievable spiritual power.

With such a spiritual meridian given to the disciples of the Greatest Heaven Sect, why would the disciples of the Greatest Heaven Sect not improve their cultivation? Was their cultivation not fast enough?

If the scope of this formation could be further expanded, and the domain of the monster race and the demon sect can be encircled, the effect will be improved several times. Anyway, this formation was the bigger the site, the stronger the power.

It was also for this purpose that the experts of the Profound Heaven Sect in the spiritual world studied this formation. It can be said that the starting point was good, but it was a little selfish. But since those spiritual powers are wasted in vain, why not make full use of them?

The starting point was good, but something went wrong during the test. Speaking of which, it was not that the functions of the formation were insufficient, but some of the effects were too good.

The formation eye has indeed become a good spiritual vein. The problem was that someone who presides over the formation accidentally discovered that as long as he occupies a special position in the formation at a special time period if he controls the formation, this Everlasting Universe Origin Suppression Great Formation could even forcefully extract those non-idle spirit power.

The people who researched this formation forgot to study the human heart. This special formation eye, because it can gather the spiritual power of the entire formation, and to put it bluntly, it can gather the spiritual power of almost the whole world, when someone was cultivating on it, the speed of the cultivation was like a rocket.

Just like some experts in the Demon Continent, after taking the demon orb, their cultivation base skyrocketed. Even if their state of mind cultivation base was insufficient, they could successfully overcome their tribulation and ascend. The same was true after arriving in the spiritual world. Someone discovered this special eye formation, and then used it, and his cultivation base skyrocketed.

The effect of this special formation eye enhancing cultivation was astounding. It could almost be said that in just a few days, an ordinary first grade human Immortal realm expert could be directly promoted to first grade heaven Immortal realm. It directly crossed the two realms of Human Immortal and Earth Immortal.

The price for a sect to quickly cultivate its own masters was that within a few days, almost 10% of all the spiritual power within the range of the formation will be extracted by the Everlasting Universe Origin Suppression Great Formation.

The spiritual veins of other sects will also be extracted with spiritual power, which was simply a direct provocation. Fortunately, when studying the formation, this formation was only tested within the scope of the sect, otherwise the Profound Heaven Sect would have committed public anger and be surrounded and suppressed by all other sects.

#### Chapter 542.2: Everlasting Universe Origin Suppression Great Formation

As soon as this problem was discovered, the Profound Heaven Sect immediately put the formation on the shelf. The Profound Heaven Sect was already the leader of the dao sects, so there was no need to risk offending all the sects to arrange this formation.

If it was only arranged within the scope of one's own sect, then what was the difference between the formation eye created by this formation and the spiritual vein of the sect? Therefore, the formation was announced, and it was publicized as a result of formation research, but it was never put into practice.

Since all the sects in the spiritual world know this formation, then everyone has nothing to say. The public thinks whether there was such a formation, as long as the formation cultivator can see it, but they are not dissatisfied with the Profound Heaven Sect. The only function of this formation was to use it for research when everyone communicates with the formation.

Yang Chen also knew about the formation at that time, but now he explained the formation to Li Liheng in detail.

Li Liheng was not a formation cultivator, so he didn't understand the reasoning. He just kept the content explained by Liu Fengzi in his heart. As for the arrangement of the formation, naturally there are people from the sect who would take care of it.

The previous part was explaining the formation, but next, Yang Chen also explained the part of the special formation in this formation.

As soon as he heard that the Everlasting Universe Origin Suppression Great Formatio still has such a powerful effect, Li Liheng was in a hurry and wished he could arrange the formation immediately, and then go to the eye of the formation to cultivate.

“No one can use this formation eye to cultivate.” How could Senior Liu Fengzi not know the little thought in Li Liheng’s heart. He said righteously, “You have to make an oath to never use the formation eye to cultivate.”

Li Liheng was reluctant before, but under the pressure of Liu Fengzi, he could only make a big oath against his will, that he would never cultivate in that special place.

There was no other way, once the pressure of Liu Fengzi was too strong, Li Liheng didn’t dare to resist at all. Liu Fengzi said that it takes a special time to be able to use it, he still doesn’t know when this special time was. Looking at Senior Liu Fengzi’s posture, he would never reveal it if he didn’t swear the oath.

After making the oath, Senior Liu Fengzi’s complexion improved a little. After directly telling him that even if he was a high-level member of the Greatest Heaven Sect, he must not use the special formation eye before continuing to explain.

“It is not good for you to forcibly improve your cultivation if you are not in a good mood.” Senior Liu Fengzi can be said to be sincere “You are the young sect master of the Greatest Heaven Sect. In the future, you will have a long way to go, and if you cultivate step by step, you can go further. There is no reason to ruin your future because of hundreds of years of cultivation time.”

Li Liheng, who was the young sect master of the Greatest Heaven Sect, still has this insight. Hearing Senior Liu Fengzi think about himself like this, he couldn’t help but feel grateful. The unhappiness of being forced to make an oath also dissipated a lot.

After the Everlasting Universe Origin Suppression Great Formatio was set up, the first three hundred years were basically used to slowly accumulate spiritual power. After three hundred years, every fifty years, a special formation eye can improve a person’s cultivation base substantially.

A large formation that can cover the entire sect, consumption was naturally expensive, and it would take a long time. Yang Chen believed that this kind of formation was definitely not something that the high-level officials of the Greatest Heaven Sect could resist. This is a feat that can make them immortal, and they can't help it.

Even if the forces of the Greatest Heaven Sect have human and material resources, it will take at least a hundred years to arrange this formation, and it will take thousands of masters. The various materials consumed were even more incalculable, which was definitely not something that a few small sects could afford.

Even if it was the Greatest Heaven Sect, they believe it will be hollowed out. But this was worth a thousand dollars compared to the income. A place with a radius of thousands of miles was at least ten times richer in spiritual power than the core area of the Greatest Heaven Sect Mountain Gate, which can definitely make the Greatest Heaven Sect dominate the mortal world.

What was meant by sharpening a knife without accidentally chopping wood? This was it! With this big weapon, the cultivation of the core disciples could be accelerated several times and experts would emerge one after another. Would they be afraid that they can't outshine the other major sects and stand out?

As for the special eye formation, as long as it was not used, there would be no trouble. Of the mortal world formation masters, who can see it? There is no way in the spiritual world, but there was no trouble in the mortal world to be seen through.

Of course, Liu Fengzi still insisted that they must not use the special formation eye, otherwise, the Greatest Heaven Sect would become the target of public criticism. He believed that as long as the core high-level leaders of the Greatest Heaven Sect are not mindless, they will definitely understand this truth.

"Senior, does this formation really have such a powerful effect?" After Li Liheng was excited, he was a little skeptical. Such a good thing sounds a little unreal, so he couldn't help but ask.

"This old man swears by my inner demon, the Everlasting Universe Origin Suppression Great Formation will definitely have such an effect." Senior Liu Fengzi sneered, and directly sworn by his inner demon and then snorted coldly "if you little boy dare to do this to my old man again in the future, you will suffer."

Li Liheng hurriedly apologized, he didn't really doubt Senior Liu Fengzi, but the formation was too magical, and he didn't understand it, so he asked a question subconsciously. But since Senior Liu Fengzi swears by his inner demon, it was naturally true. Even Li Liheng, a layman, knows that this was absolutely amazing.

Because it took a long time to explain the formation this time, Li Liheng had already taken more than a dozen spirit congealing pills. At this point, Li Liheng had received a lot of information, which he couldn't understand and had to memorize, after some tossing, Li Liheng was already very tired.

It was a mentally consuming thing, and under Yang Chen's deliberate pressure, his mind quickly fell into a trance.

"When you're having fun in the future, you'll accidentally leak the special formation eye position to Yang Lan." Taking advantage of Li Liheng's state, Yang Chen secretly sent this instruction to Li Liheng's heart.

In a daze, Li Liheng had no idea that he had been hypnotized. He made an oath that he would never use the special eye, but it was not that he would not disclose it. This hypnotic instruction, along with Li Liheng's coma, lurked in the deepest part of Li Liheng's mind.

In the Greatest Heaven Sect, Li Liheng finally fell into a coma. This time, several elders watched him eat more than a dozen spirit congealing pills and still didn't stop. This time was unprecedentedly long, they don't know what Senior Liu Fengzi told him to take so much time.

Chapter 543.1 - Luck

Li Liheng was in a coma, but Sect Master Li and a group of core elders had already gathered in his room. After taking so many spirit congealing pills and having continued for such a long time, it was obvious that he had contacted Senior Liu Fengzi again, and there was something important happening, otherwise it would not be the case.

Everyone was anxiously waiting, but no one used any secret method to wake Li Liheng up. Li Liheng was now the treasure of the sect, and there must be no mistakes.

Seeing the exhaustion that Li Liheng could clearly show without waking up, Sect Master Li frowned quietly. It seems that he should also think about using that demon sect method to properly improve Li

Liheng's strength. Otherwise, it's really not a long-term solution to use the spirit congealing pills every time.

Everyone waited anxiously for two whole days before Li Liheng woke up. The first thing he did when he woke up was not to report what happened immediately, but to find a few blank jade slips as quickly as possible, and record the details of the Everlasting Universe Origin Suppression Great Formation in his mind.

After doing all this, Li Liheng realized that he was being rude and apologized to the sect master and the elders.

"Have you contacted Senior Liu Fengzi again?" Sect Master Li asked in a gentle tone, not thinking about it at all.

"Yes, Sect Master." Li Liheng replied hurriedly, and then respectfully handed the jade slips in his hands "This is a formation passed down by Senior Liu Fengzi."

Next, Li Liheng directly placed a restriction first, and then asked the several elders to place several restrictions at the same time. His small courtyard was tightly surrounded, and all the servants were driven to a distance to ensure that no one could hear their words, and then he began to report to the core elders.

The characteristics of the Everlasting Universe Origin Suppression Great Formation made the high-level officials stunned, such characteristics were simply unbelievable.

"Is this true?" Sect Master Li asked in disbelief while holding the jade slips in his hands. His hand has unconsciously used strength and he almost crushed the jade slip. An elder next to him was quick-witted and hurriedly grabbed it from the sect master, thus avoiding the ruined ending.

"Senior Liu Fengzi swears by his inner demon, the formation indeed has such an effect." Li Liheng replied hurriedly.

Sect Master Li couldn't help but be unmoved. If this formation was really like what Senior Liu Fengzi said, no one else could see it at all, but it could create such a wonderful spiritual meridian for the sect. It was simply that the heavens had let the Greatest Heaven Sect dominate the mortal world.

"The heart demon oath? What's going on?" When he heard that even Senior Liu Fengzi had to swear by the heart demon, Sect Master Li's face suddenly sank, how could it be so?

Li Liheng did not dare to hide it and quickly passed all the information. Of course, he swore that he would never use that special eye, and he didn't hide it at all. In the end, he didn't believe it a little bit, which made the senior unhappy, and he had to make a heart oath.

"If you dare to be disrespectful to your seniors in the future, you will go to the cold deep pool to retreat for three years." The elders immediately understood the situation at that time. This senior Liu Fengzi was really angry, otherwise why would he make an oath in front of a junior?

"Is it the formation that the senior took the initiative to mention, or did you beg for it?" Sect Master Li looked at Li Liheng and asked another key question.

"It was the disciple who begged so hard." Li Liheng also winked, he hurriedly knelt on the ground and replied, "The disciple sees that the sect master and the elders are working hard every day for the development of the sect, so I asked Senior Liu Fengzi for advice."

He begged so hard that Senior Liu Fengzi reluctantly explained this formation, and in the end he was suspected by Li Liheng, no wonder this senior was so angry. If it was just a few of them, Li Liheng might be ignored at this point. This is still light, and the grumpy can even make him suffer enough on the spot.

Among the core elder, there was an elder named Zhang who happened to be a formation cultivator, and the jade slips at this moment fell into the hands of Elder Zhang. What everyone wanted was for Elder Zhang to see whether this formation is feasible or not. If it was arranged, how much will it cost them and let them make an assessment.

But after getting the jade slip, Elder Zhang sat there without saying a word, as if he had turned into a clay sculpture. Familiar people immediately knew that this was Elder Zhang who was immersed in the study of the formation and couldn't extricate himself.

Things are good things, but in this season, it seems to be a bit of a priority. However, Elder Zhang was immersed in it, and no one dared to wake him up easily, everyone understood how rare this opportunity was, and they could only wait patiently.

This wait was half a month, for half a month, everyone gathered in Li Liheng's room to discuss how the sect should deal with this formation if it was really feasible.

He can't help but say that Yang Chen was sure that the high-level officials of the Greatest Heaven Sect would be tempted. In his previous life, they spared no effort in expanding, suppressing other sects, and expanding their strength. Now that there was such an opportunity, would they let it go easily, this was definitely not their style of doing things.

To be able to use all the idle spirit power within the range of dao sects, how big was this? If nothing else, this pride alone can kill all other sects in seconds. What Blue Cloud Sect, Green Jade Immortal Island, what Five Elements Sect, Qiankun Sect, which one dares to think? Who can think?

After half a month, Elder Zhang finally let out a long breath, opened his eyes, his eyes were full of excitement, and he sighed happily and contentedly "So that's how it is!" Elder Zhang's realm has increased a little.

Everlasting Universe Origin Suppression Great Formation, this was a great formation researched by a group of masters in the spiritual world. In the eyes of Elder Zhang, it was a peerless treasure. Although a large part of the principle has not been clear, the part that he can understand alone has made Elder Zhang amazed.

Just getting to know a little about it, Elder Zhang felt that his research on the formation technique had reached a new level. If they really gave him time to thoroughly study this Everlasting Universe Origin Suppression Great Formation, maybe Elder Zhang could still understand it.

"How is the formation?" Sect Master Li asked eagerly, not giving Elder Zhang more time to express his emotions. In fact, this was what other elders want to know, which determines whether the sect can complete such a formation.

“It’s brilliant to the extreme.” Elder Zhang’s evaluation of the Everlasting Universe Origin Suppression Great Formation was absolutely high. This formation was by no means something that mortal people can study. “But if you want to arrange it, the cost is also very huge.”

Chapter 543.2: Luck

Of course, Elder Zhang knew what Sect Master Li meant by asking this question. As the core elder of the Greatest Heaven Sect, Elder Zhang probably knew how many treasures the Greatest Heaven Sect had.

Once the Everlasting Universe Origin Suppression Great Formation was to be arranged, even if the Greatest Heaven Sect has a lot of wealth, he has to consider whether it was worth it.

“What’s the effect?” Another elder interjected and asked.

“It may be several times better than the effect described by senior Liu Fengzi.” Elder Zhang replied without hesitation “Senior Liu Fengzi is in the spiritual world, the spiritual power of the spiritual world has been used to the extreme, and the idle spiritual power has already reached its peak there is not much. But in the mortal world, there is still a lot of idle spiritual power that can be absorbed.”

“Senior Liu Fengzi estimated that we can create a spiritual power environment ten times better than that of the sect’s spiritual veins, but this old man estimated that it may be more than this multiple.” Elder Zhang can’t figure out the core principle, but he has already figured out some, so this conclusion can still be drawn “According to this old man’s estimate, the minimum can be fifteen to twenty times.”

The Greatest Heaven Sect has already occupied almost the best territory of dao sects, and it was full of spiritual power. Now the Everlasting Universe Origin Suppression Great Formation can create a place where the spiritual power was more than ten times stronger than here. What was this kind of concept?

Basically, as long as it was not an elm knot, even a tree, placed in such an environment, can gain a spirit after thousands of years. Not to mention the disciples of the Greatest Heaven Sect, who are all the best talents in the mortal world. Wouldn’t it be more efficient to cultivate like this?

Thinking that the Greatest Heaven Sect’s disciples will far exceed the cultivation speed of other sect disciples in the future. Countless masters will continue to emerge, and the momentum of the Greatest Heaven Sect would be at its peak, the sect master and several core elders felt excited.

Next, they began to decide whether to arrange this large formation. If they were to arrange it, whether it would be within the dao sect's domain or to accommodate the domains of the monster race and the demon sect, and how to coordinate before and after a series of things. These are not simple things and require long planning.

After Yang Chen threw the seed of the Everlasting Universe Origin Suppression Great Formation to Li Liheng, he just didn't care about their business. After receiving two more second grade demon orbs, Yang Chen continued to retreat, and at the same time began to sacrificially refine his own magic weapon.

Li Cheng gave Yang Chen ten kilograms of living soil previously. These living soils can just strengthen the fifth earth flying sword that Yang Chen grabbed from Ming Guangruo.

In the original flying sword, there was only a few grams of living soil, which has been regarded as a treasure by Ming Guangruo. When this life source magic weapon has been tempered for thousands of years. The foundation was good, so Yang Chen also chose this flying sword to become one of the great Yin-Yang five elements flying swords.

Smelting the living soil was not that easy to refine, but fortunately, there was the fifth earth true essence participating in the sacrificial refining.

This time, the sacrificial refining was purely using the fifth earth true essence, the Yin-Yang heaven burning fire was not used at all. The advantage of doing this was that, this flying sword will become a complete fifth earth attribute, without the slightest fire attribute.

The biggest feature of the living soil was that it can grow, although the speed was very slow, it will never stop. It also means, after this flying sword was successful, even if there is any damage, it will automatically recover. Even without other methods, it can be automatically upgraded over time. Other flying swords were different, for example, the original blood demon vine flying sword needs to constantly suck blood to upgrade.

As a trace of living soil was integrated into the flying sword, the living soil flying sword became more and more heavy and solid. Don't look at the fact that the living soil was only ten kilograms, but if it was actually refined into a magic weapon, that was an incredible weight. If nothing else, just relying on the weight of the flying sword could crush people to death.

This was not something that can be achieved overnight. Even with Yang Chen's strength, after half a year of retreat, he could only integrate a few grams into it. To be completely successful, it will take years and years of hard work.

Every half a year, Yang Chen would go out of seclusion and deliver a purified demon orb. This gathering point has once again become the focus of the Demon Continent. The news spread, and everyone knows that the world-famous Grandmaster Yang has come to this gathering point.

However, some people with insufficient cultivation need not think about it. This was already in the depths of the Demon Continent, not the central area, but also the edge of the central area. Even if one is a master of the dacheng stage, not everyone has this kind of cultivation and courage.

There were more and more masters at the gathering point, and the demon orbs were getting higher and higher, even the shadow of a first-grade demon orb appeared. The masters who arrived at the center of the Demon Continent were basically in the late dacheng stage and above.

Most of these cultivators were rogue cultivators, and there are very few cultivators from the major sects. In a sect with rich resources, unless it was necessary, the disciples under the sect do not need to risk their lives to come here to gain experience. If the rogue cultivators here appear outside at the same time, it is estimated that many forces will reshuffle.

Of course, it wasn't just the dao sect's domain, there were also many hidden families and continents that Yang Chen had never been to. This mortal world was not the only area of the dao sects. No matter how powerful the Greatest Heaven Sect was, if they dared to come here to show off their power, they would definitely end up with no dead scum left.

It was a pity that these cultivators cannot form a group. Even if they reach the spiritual world and immortal world, they can dominate one side, but after all, they are not the opponents of those organized sects. After all, the talented disciples of those major sects were endless.

His days were spent in this cultivation and retreat. The refining speed of the living soil flying sword was also getting faster and faster. In about half a year, it could be merged with a kilogram or two kilograms.

After all the living soil had been integrated into the living soil flying sword, the living soil flying sword had reached the fifteenth level of heavenly spirit and the level thirty of the earthly fiend. It was the highest level of all Yang Chen's magic weapons.

The completion of the living soil flying sword also came on the day when the four girls and Yang Chen made an appointment to meet. Under the astonished gaze of the masters of the dacheng stage, four women in the middle Yuanying stage in twos, came to the gathering point together.

Originally, these four beautiful women would definitely be coveted by cultivators in the Demon Continent. There were a few old guys in the gathering point and they almost couldn't help but want to make a move. But after all, they still understand that it is not easy to come here, so they decided to take a look first.

After seeing the four women and Yang Chen meeting up, all the guys who had a bad thought in their hearts all secretly broke out in a cold sweat. Grandmaster Yang's women, whoever dares to make a move, even without Grandmaster Yang's orders, there will naturally be someone who will use their heads as a gift to befriend Grandmaster Yang.

Chapter 544.1: Ultimate Objective

No matter where or when, people who have mastered the skills that others urgently need and cannot be replaced by others will naturally be valued and given preferential treatment.

This was especially true when there was competition from others, and it was impossible for them to master the method or control that person through some inferior methods.

Yang Chen was in such a situation now. Regardless of the fact that there are many masters of the late dacheng stage in the gathering point, none of them really dared to do anything to Yang Chen.

First of all, it was forbidden to do anything in the gathering point. Second, other masters who were waiting to purify their demon orbs will never allow one or two people to break the rules.

The gathering point of the Demon Continent has been stable for so many years, it was because of the existence of such invisible rules that no one dares to break it.

The four girls have been cultivating for ten years, and they are still in the place where the strength of the demonized monsters surpasses them by a lot. Even if there are protective magic weapons on both sides, they have not suffered less.

Yang Chen's instructions on the sea and the previous experience in the periphery have benefited the four girls a lot. With the quickest judgment and basic response, the four girls were able to cope with the hardships of the past ten years.

However, the hard work pays off and the rewards were great. They were in the middle Yuanying stage, perhaps the four women could leapfrog against the masters of the late Yuanying stage and even the peak Yuanying stage, but now they could fight against opponents at least in the early dacheng stage, their strength has skyrocketed.

The four women were also very happy to see Yang Chen. By Yang Chen's side, it was the only place where they could rest assured without worrying about any danger and it was also where their hearts belonged.

Actually to this point, it has been almost ten or twenty years since they came to the Demon Continent, and the purpose of the four girls' experience has been initially achieved. Even if they turn around and leave the Demon Continent now, the four women will definitely be better than their previous lives when they return.

However, Yang Chen was still a little selfish and wanted to stay here for a while longer. If nothing else, those demon orbs alone are worth Yang Chen's temptation.

The nine nether flying sword not only has the aura of a demonized demon vine, but also a similar demonized demon vine phantom. There are at least a dozen other plants, and they are no smaller than the weak demonized demon vine outside the Heart Demon Sect domain. In Yang Chen's eyes, these powerful monsters are the supplements of the nine nether flying sword, as well as the huge super-grade demon orbs.

When he thought that after leaving the Demon Continent, the nine nether flying sword would basically not be able to be replenished, Yang Chen had the urge to uproot these demonized demon vines.

There was another thing that made Yang Chen even more tempted. That was the spatial connection point where the demonic qi escapes from.

After the preliminary refining of the entrance to the immortal executioner stage, Yang Chen has confirmed that the refining method left by the Heart Demon Sect was basically correct. In that case, how could Yang Chen easily let go of the only two spatial connection points in the mortal world?

The history of the Demon Continent can no longer be tested, but Yang Chen was also very clear that this demonic qi was by no means a good thing. It is still sealed within the Demon Continent, once the demonic qi escapes, the more difficult it will be to deal with it in the future. One day, the demonic qi will break through the seal, then invade the entire mortal world.

How could Yang Chen allow such a thing to happen? In his previous life, Yang Chen didn't know about it. Secondly, he had no ability to organize, and there was no need to accumulate merit for stopping it, but now it was different. Since he has the methods and abilities and it is still beneficial to him, why not do it?

The purpose of accumulating the demonic qi of the nine nether flying sword was to be able to adapt to the most concentrated demonic qi in the center of the Demon Continent as soon as possible, so as to be able to approach the spatial connection point.

He did not know how many thousands of years of tempering had passed in the immortal executioner stage, and it was by no means easy to refine that entrance. Yang Chen had even made a decision that when he left the Demon Continent, he would at least spend decades or hundreds of years on this matter. At least before ascending, the entrance of the immortal executioner stage must be refined.

Relatively speaking, it was just a simple connection point between two spaces, and the demonic qi escape point in the Demon Continent was much simpler. It has not been refined by cultivators, it was just a simple spatial connection, so it takes a lot less effort.

As long as it can be initially refined like the entrance to the immortal executioner stage, and then it can be touched at any time, the goal will be achieved. In the future, he can slowly spend time refining it.

After the refining was completed, the benefits would be even more numerous. First, Yang Chen was likely to have the power to cut through space and secondly, that point can continuously provide demonic qi to nourish the nine nether flying sword.

A series of arrangements needed to be made to achieve this purpose. Of course, there was a premise that before reaching that point, Yang Chen must still be alive.

With the realm of the Yellow Turban Warrior's body refining technique, coupled with the protection of the dragon clan's golden bell, there should be no problem in terms of safety. He was afraid that the demonic qi was too strong for him. Therefore, whether it was to purify the demon orbs or to kill the demonized demon vine in the future, it was all serving this purpose.

The efficiency of absorbing the demonic qi from the air was really too low. Only absorbing these condensed demonic qi was the right way.

Needless to say, the four women had to accompany Yang Chen to cultivate on this demon continent for decades, until Yang Chen refined that spatial connection point. Of course, the longer the experience, the greater the benefits to the four girls.

After summarizing the experience with the four women, Yang Chen and the four women began to cultivate. Now Gao Yue, Shi Shanshan, and Sun Qingxue have all cultivated the spiritual power of Yin-Yang and only Gongsun Ling was left, as there was still no way to cultivate the sixth earth true secret art.

In the same way as last time, Yang Chen hugged Gongsun Ling and put the true essence of his own cultivation base into her body, allowing her to refine it and cultivate the sixth earth true secret art. This is equivalent to Yang Chen losing a part of his cultivation.

Gongsun Ling has been condensing her spiritual power these days. Although her cultivation realm has not improved, the quality of her spiritual power has skyrocketed, so she could cope with her cultivation without any pressure. Coupled with Yang Chen's support, there was no obstacle in the cultivation of the sixth earth true secret art. In less than half a year, she had successfully cultivated it.

Next, Yang Chen once again took the four women to experience the inner demons. The nine nether flying sword became more and more powerful. Even after ten years of cultivation, the four girls still

could not fully withstand the power of the nine nether flying sword. Every time their emotion erupts, it always takes a more difficult experience than killing.

Of course, Yang Chen didn't forget to increase his reputation, when he cultivated with the four women, he didn't forget to refine demon orbs for the other cultivators. Originally, it was collected once every six months, but now it has been changed to purify one a month, and the efficiency has greatly increased.

This kind of effect made the experienced cultivators who were anxiously waiting at the gathering point even more happy.

#### Chapter 544.2: Ultimate Objective

These cultivators were people with extraordinary strength. Although they have stayed in the Demon Continent for a long time, they have no valuables from the outside, but some good materials obtained on the Demon Continent were all available on them.

Because of the demonic qi contamination, the value of these materials was extremely low, basically unattended. But in Yang Chen's eyes, these magicals were not worthless. These have arrived in Yang Chen's possession for the price of cabbage, it was enough to let Yang Chen dream to smile.

As Yang Chen's name was getting bigger and bigger, a large number of cultivators heard the news. In just a few short years, there have been as many as 20 or 30 cultivators who have ascended after taking the demon orb at this gathering point, and they have all succeeded without exception.

At this time, they could see the strength of the high-grade demon orbs. The huge demon orbs contains an unimaginable cultivation base, after it was absorbed by one person, adding hundreds of years of skill, even if the heart is repaired, it is resistant to the spiritual force to repair the hard resistance.

Some people have successfully ascended, so these people were basically grateful to Yang Chen. Originally, they didn't know how many years it would take, and how much risk they would take to swallow the unpurified demon orbs.

With Yang Chen, they were no longer so scared, and they could safely rise through the tribulation, who wouldn't like it? Moreover, Yang Chen's willingness to use those useless materials as a reward can be regarded as giving them a great deal of face. Every time they get the purified demon orbs, they will swear an oath that the favor will be returned in the spiritual world.

Unconsciously, Yang Chen also received a lot of people. After four or five years, the four women also gradually began to adapt to the power of the nine nether flying sword, and it was time to go out to kill and vent the irritability accumulated over the years.

Yang Chen simply collected hundreds of demon orbs at one time, wiped out the stocks of the masters in the gathering point, and purified them all at once.

Two months later, in the gathering point there was a great number dacheng stage masters attempting their raging wind tribulation causing a remarkable scene.

The tribulation in the sky was like the fireworks of the lantern festival. Various degrees of turbulent winds were endless, and the human immortal aura of successful ascension has plowed through this area again and again.

Within a radius of a 100,000 miles, all the experienced cultivators were shocked. What kind of scale does it take to face this kind of tribulation?

The gathering point was almost emptied, Yang Chen and the four women also set foot on the way. The four women were still separated into two groups and Yang Chen himself went to hunt down the demonized demon vine alone.

When they left, each of the four women had an extra piece of underwear woven and refined from the remaining mysterious fibers that were incinerated with demonized demon vines. These underwear, to a large extent, could isolate the spiritual awareness, and can even block 90% of the attack of at least half of Yang Chen's spiritual awareness. In this dangerous land of demonic fiends, the safety of the four women were a little more secured.

Twenty years passed in a blink of an eye. Almost in these years, Yang Chen's footprints have almost joined the demon continent. Except for the two or three places in the center that have not been visited, the locations of the demonic demon vines sensed by the nine nether flying sword have all been visited once.

In twenty years, in Yang Chen's qiankun bag, there were more than 30 huge demon orbs. The smallest one was 50% larger than the one Yang Chen got for the first time, the largest one was three feet in circumference.

The nine nether flying sword has become more and more powerful, and when it was deployed, it was like a black curtain that covered the sky and the sun. Even if a master at the peak dacheng stage falls into it, their six senses will be sealed within three feet of their whole body and can no longer be broken through.

Once Yang Chen launches a demonic qi attack, he believes that even the person who has cultivated the longest in the Demon Continent will not be able to withstand it. Experts who have not experienced the experience of demonic qi, even if they are experts at the level of the human immortal realm, if they are hit, it is enough to lose their minds for a moment and be slaughtered by others.

When he net the four women in the most central gathering point, he went back to

purging the demon orbs. This Gathering Point expert was even more powerful, the worst demon orbs that they took out were first grades, and there were many which surpassed the first grade. Although they did not have the exaggeration like the ones in Yang Chen's hands, they should not be underestimated.

It can be said that Yang Chen and the others have now come into contact with the most core part of the Demon Continent. The purpose of the experience has been fully achieved, and only Yang Chen's ultimate goal was left.

This time, Yang Chen still triggered a queue-in-quarantined frenzy in the most central gathering point. The cultivators here were even more powerful, so their raging wind tribulation was at least twice as powerful as that of an ordinary raging wind Tribulation, which opened the eyes of Yang Chen and the four women.

Not to mention, the experience of experiencing the tribulation at close range was enough for Yang Chen and the four women to have multiple tribulations to refer to when they face their own tribulation in the future. Which one of the amenities was impossible to have this experience with?

However, although their experience has increased a lot, the cultivation base of Yang Chen and the four women has not improved, and even relatively speaking, some have fallen.

During these years, everyone has concentrated on purifying and condensing their spirit power for future plans. Naturally, the condensed spirit power cannot be compared with the true essence spirit power that was not pure enough, so it was natural for their realm to fall.

Fortunately, it was still maintained at the level of the middle Yuanying stage, and it has not dropped too much. It will just make some people who know them have misunderstandings, as if they have been regressed.

The low-quality demon orbs were completely reduced to becoming the jelly beans of Xiao Tian. Yang Chen bought them in large quantities, and then purified them in a unified manner, just to increase Xiao Tian's power rapidly.

The dragon clan was completely comfortable with the spiritual power of any property, and it was also possible to quickly translate it into the spirit power they need. This was their innate skill, and it couldn't be learned. The mountain river geographical map does not have the function of purifying spirit power, which was because of this reason.

However, there was one thing that couldn't be done. The natural lifespan of the dragon clan was too long. Although their strength was very strong at the beginning, it grew too slowly. This was the only way to make Xiao Tian rapidly in a short period of time.

In the demon continent, after Xiao Tian was done eating all day, it drilled into the dragon tower, and now it has cultivated to the fifth pattern of the third floor of the dragon tower. According to the thoughts that Xiao Tian gave to Yang Chen, these five patterns originally required Xiao Tian to cultivate for five hundred years to achieve.

Anyway, this truth of the demon continent has been harvested. There was only the last target left, the spatial connection point of the demonic qi.

Chapter 545.1: Different Demon Vine

After a series of cultivators had their ascension, there were not many people left at this gathering point. In addition to a few shops, there are only three or five left.

To be able to go from the edge of the Demon Continent to the deepest part of the Demon Continent in just 40 years, Yang Chen's family was indeed the first.

Others come here to gain experience, if they start from the Yuanying stage, they will be able to enter the inner circle after at least one or two hundred years of outer travel, and then they will be promoted to the dacheng stage in one fell swoop. It will take at least a few hundred years for the cultivation base to become higher and higher until it reaches the peak.

The Yang Chen family was completely different. Each of them was a genius of cultivation, with amazing comprehension and a wealth of experience. Similar to the geographical map of mountains and rivers and the xuanwu shield, there were powerful protective magic weapons that even the masters of the dacheng stage cannot break. He was an expert at attacking sharply, which was why he has accomplished this journey that no one else can believe.

Strictly speaking, it was absolutely impossible for each of the four women to come here alone. Even if Gongsun Ling had the geographical map of mountains and rivers, Sun Qingxue would not have a xuanwu shield.

The powerful demonized monsters are enough to deal with masters who are several times their current cultivation base. Even if there was a protective magic weapon, in the case of insufficient spiritual power, they could abruptly grind them to death.

When two people work together, the situation was very different, there was enough protection and everyone can make time to recover, plus the support of Yang Chen's massive medical pills and spiritual power regardless of cost, it was enough to make them relatively safe but very hard in this dangerous place.

This kind of experience exceeds their own limits, there were huge benefits for the four girls. They can't see it now, but when they encounter an enemy in the future, they can find the difference before and after the experience.

Although there wasn't enough time, it was enough for geniuses like the four girls. Now the four girls' experience was mainly in the inner demons and tribulation. The nine nether flying sword keeps triggering the inner demons of the four girls, and then the four girls overcome it. The cycle happening over and over was more exhausting than killing.

“Wait for me here, wait for me to see the place where the demonic qi overflows.” Yang Chen’s plan was never hidden from the four women. Before leaving, Yang Chen said goodbye to the four girls and told them his destination.

This destination was very dangerous, and at this level, the demonic qi has already reached the very peak. When it comes to the place where the real demonic qi escapes, it must be even more dangerous.

But the four girls did not stop Yang Chen’s work, he has always had his own opinion. No matter how dangerous it was, the girls never saw Yang Chen flinch.

“Be careful, husband!” Everyone said the same thing, but the four women’s eyes were full of worry.

“Don’t worry, I will run even if things go bad. You all know the speed of the shuttle.” Yang Chen smiled and said goodbye to the four girls and left the gathering point.

He certainly did not directly to the spatial rift. Instead, he went to the two places where the demonized demon vines were entrenched. The demonized demon vines within this range were already much stronger than the cultivators who have ascended through the tribulation. At least it has reached the level of the third-grade human immortal realm. In front of these demonized demon vines, the experts of the great elder level can only be tortured and have no room for resistance.

The only thing that can be fortunate is that these demonized demon vines still have no sense of sanity, and only have the instinct to grab their prey. Any living thing that passes through its sphere of influence was its prey.

Similar demonized demon vines, Yang Chen has killed more than 30 plants, but in fact, it is not that Yang Chen’s strength exceeds these demonized demon vines, but Yang Chen’s protective power was sufficient and the Yin-Yang heaven burning fire took care of it. The power of the Yin-Yang heaven burning fire was so strong that it burnt the demonized demon vines to death.

If it was true that pure strength was not a foreign thing, then Yang Chen would not be the opponent of these demonized demon vines. As soon as the two vines attacked, Yang Chen had to run. There are not so many ifs in this world, so now, there are more than 30 huge demon orbs in Yang Chen’s qiankun bag and Yang Chen was still standing here.

The more powerful the demonic vines Yang Chen encountered in the past, the bigger the body, and even covered valleys with a radius of hundreds of miles but the one he encountered this time was not like that at all. At best, the main body was only a dozen miles in size, compared with the one he encountered before, he didn't know how many times smaller it was.

But Yang Chen didn't mean to take it lightly. In the center of the eruption of demonic qi, any demonized beast was many times stronger than those outside. The body was so small, and more and more there was a strange aura.

Yang Chen just approached some vines, and those vines seemed to notice a little bit, and quickly retreated a lot towards the main body.

Seeing this situation, Yang Chen was taken aback for a moment. He has never encountered such demonized demon vines. When countless vines swarmed up, after being burned by the Yin-Yang heaven burning fire, they cut off some of the vines and retreated but this time, the retreated when Yang Chen had done nothing.

After being stunned, Yang Chen suddenly thought of a possibility. He had killed more than 30 demonized demon vines by himself, so he had a murderous aura against demonized demon vines? Could it be that only the demonized demon vine could feel it?

In fact, if he kills more of the same species, there always seems to be such a mysterious feeling. But as far as Yang Chen knows, those are the feelings that only animals have. Could this demonized demon vine already have animal-like intuition?

If this was the case, this demonized demon vine was not the kind without sanity, but a spirit. This was the first time Yang Chen has encountered a demonized demon vine with active consciousness, which was really rare in this demon continent.

However, this was only Yang Chen's guess. Whether this was the case requires further verification by Yang Chen.

Having arrived here, of course, he did it. Yang Chen put aside the distracting thoughts in his mind and directly took out the nine nether flying sword and slashed towards the vines.

As soon as the nine nether flying sword came out, the curled vines seemed to have changed a bit. After hesitating for a while, they suddenly transformed into thousands, and countless vines rolled up, burying Yang Chen in an instant.

Upon contact, Yang Chen couldn't help but feel a little shocked. These vines were many times thinner than the strongest demonized demon vines they have encountered, but they were unexpectedly strong and powerful, and the power contained in them was even a hundred times greater than others. Moreover, the flexibility of the vines far exceeded Yang Chen's imagination, and the speed was almost the same as that of a normal dacheng stage master.

Yang Chen, who was trying his best to guard against the vines, suddenly changed his face, and his figure flew out from a large group of vines. From the ground where he was just now, a large piece of sharp wood thorns suddenly appeared and the speed was so fast that it was hard to prevent.

Chapter 545.2: Different Demon Vine

He was still in the air and those vines had been drawn one after another, the method was the same. The thickest vines were thicker than Yang Chen's waist at the thinnest. If they rolled up, if a few people hugged the thick and thin tree, they could be directly twisted into pieces.

The series of vine whippings were like a series of tricks. If one vine failed, the others adjusted one after another, covering almost all of Yang Chen's dodging space.

As a last resort, Yang Chen could only choose a few vines that were not in the right direction and took the initiative to attack them. The dragon clan's golden bell was fully employed, and the yellow turban warrior's body refining technique was fully opened, protecting his body tightly.

Bang bang bang bang, continuous noise sounded, Yang Chen took the first blow, and the following attacks followed one after another, it was a hundred and ten consecutive blows, forcibly ramming Yang Chen's body into the ground.

This was not to mention, countless sharp thorns from underground, like sharp knives, stabbed Yang Chen's body wildly. If it weren't for Yang Chen's strong protection, these few strokes would have directly killed Yang Chen.

It seems that this kind of attack has no effect on Yang Chen. The underground space where Yang Chen was located was completely empty. Then, a large group of black gas sprayed violently towards Yang Chen from all directions, instantly drowning Yang Chen in it.

Yang Chen threw out an ordinary flying sword. As soon as the flying sword was stained with black flesh, it made a sour hissing sound, and within a few breaths, it turned into mottled waste, and after a while, it disappeared into the black flesh.

This demonized demon vine was really different, not only was the vine powerful. Even the underground root system was so powerful, even the distribution of the root system was almost the same as that of the previous demonized demon vines. Speaking of which, considering the root system, this body was no worse than the demonized demon vines that he encountered before.

With just a few simple strokes, Yang Chen could already see many differences. Spiritual power exploded outside his body, forcing the black gas out of his body, and even the golden bell did not dare to come in contact with that gas. Who knows if it will corrode the golden bell, it was better to be safe.

The Yin-Yang heaven burning fire finally came out through his body and pounced on those gas. Surprisingly, the black gas actually blocked the momentum of the Yin-Yang heaven burning fire. Although black gas was steamed out, the gas still wrapped around Yang Chen.

The two sides were deadlocked in this underground space. The vines did not dare to come over to attack, and neither did the roots. Only the black gas secreted by the roots remained. Speaking of which, it seems that the attacking methods of this demonized demon vine have also been exhausted.

Yang Chen couldn't help but feel fortunate at this time. Fortunately, his eldest brother Li Cheng let him absorb the two kinds of karmic fire seeds. Otherwise, looking at this posture, he may not be able to resist the black gas.

The current situation was that the demonized demon vine cannot kill Yang Chen and Yang Chen seems to be quite afraid of these black gasses in a short period of time, so he doesn't dare to touch it easily. The Yin-Yang heaven burning fire did not burn any part of the opponent and it could only consume the opponent's strength bit by bit, then try to burn the body.

He wanted to break through, but there were bursts of pressure from above. The vines kept pressing down on Yang Chen, and the spikes also prevented Yang Chen from escaping. It could be said that Yang Chen was trapped in this big ball of black gas.

It can't go on like this, the demonized demon vine takes root here, and it can be replenished anytime and anywhere, the black gas can be said to be endless. If the consumption continues like this, even if the time can be stretched for a long time, it will be calculated in a hundred thousand years, but in the end Yang Chen will be the one who would exhaust his spiritual power.

Fortunately, the demonized demon vine has no further means of attacking. If Yang Chen only maintains the Yin-Yang heaven burning fire, he still has spare power.

Blocking Yang Chen was also heart-wrenching, since the two sides were so exhausted, Yang Chen couldn't believe it. Could it be that the more powerful Yin-Yang heaven burning fire really can't take care of this mere black gas?

Now that the Yin-Yang heaven burning fire can only compete with the black gas, Yang Chen immediately brought out the profound spirit furnace and began to integrate and absorb the most familiar true sun fire from his previous life.

The true sun fire was also a fifth-grade fire seed, the life source fire seed of Yang Chen's previous life. It was precisely because of the existence of the true sun fire that Yang Chen was able to finally become a great lou golden immortal.

Tens of thousands of years of manipulation have made Yang Chen so familiar with the true sun fire that he can no longer be more familiar with it. In addition, he has already integrated two kinds of fifth-grade fire seeds. When he started to absorb it, it was easier than absorbing the red lotus fire seed and the peach blossom fire seed.

The true sun fire was added to the Yin-Yang heaven burning fire, and the power of the Yin-Yang heaven burning fire began to increase. After Yang Chen finally merged the true sun fire into the Yin-Yang heaven burning fire, the demonized demon vine seemed to have a bad premonition.

The speed of the black gas evaporation was dozens of times faster, and the roots of the demonized demon vine were spraying wildly, and some couldn't keep up with the speed of evaporation. However, Yang Chen did not directly attack like this, but began to merge and absorb the true moon fire seed.

The two types of five-grade fire seeds, the true sun fire and the true moon fire, were one type of third fire and one type of fourth fire. Yang Chen has a thorough understanding of the true sun fire. Relatively, he also knows more about the true moon fire than the average person. It was a little difficult to absorb and fuse, but it was still not as difficult as the red lotus karmic fire seed at the beginning.

After absorbing the true moon fire, the Yin-Yang heaven burning fire has completely broken free from the cage of the black gas. The powerful flame instantly evaporated the black gas around it, and then swept a large area of roots and vines.

Squeak, in Yang Chen's mind, an indescribable and unpleasant scream suddenly sounded, the voice seemed to come from the soul, straight into the sea of consciousness. It's just that Yang Chen's spiritual awareness was too powerful now, and he was not shaken in the slightest. When the sound disappeared, Yang Chen realized that the demonized vine had begun to flee.

That's right, it was really fleeing, all the roots were concentrated, and then pulled out from the ground, floated in the air out of thin air, and fled wildly in the other direction. The speed was even comparable to a cheetah that was desperately fleeing.

What was this situation, Yang Chen was stunned for a second on the spot. The demonized demon vine that this plant belongs to can still escape, has it really become a monster cultivator?

In a blink of an eye, the demonized demon vine has escaped far away. After fluttering a few times in the air, the body with a radius of more than ten miles curled up into a ball and plunged into the ground. Yang Chen could clearly feel that the underground demon vine was flying at a speed no lower than when in the air.

Looking at the direction in which the demonized demon vines fled, Yang Chen couldn't help showing a sneer. Wasn't that direction where the other demonized demon vine closest to the center of the continent was located? Yang Chen's next target was originally that demonized demon vine.
