Chapter 546.1: The Birth Of The Immortal Slaying Sword

In dealing with this demonized demon vine, the nine nether flying sword was not of much use. The nine nether flying sword was not originally a flying sword, it was just a magic weapon refined from the nine nether flying dust. Apart from the inner demon attack and the shielding of the six senses, it did not have many powerful attack capabilities.

If it was to deal with cultivators, this nine nether flying sword was indeed a sharp weapon. But to deal with this demonized demon vine, it was not enough. The demonized demon vine was in the place where the demonic qi was most intense, and it was not afraid of demonic qi at all. Moreover, there was fiber refining of the demonized demon vine in the nine nether flying sword itself, and shielding the six senses was meaningless for the demonized demon vine.

The only function of the nine nether flying sword is to compete with the demonized demon vine for demonic qi. However, this place has been battling to and fro, the demonized demon vine was not much less, and the effect was not very good. It's just that during this period of confrontation, the nine nether flying sword did absorb a lot of demonic qi, and it was a little more powerful, that's all.

His spiritual awareness firmly locked on the fleeing demonized demon vine, and Yang Chen followed behind. Although there are fibers in the body of the demonized demon vine that shield the spiritual awareness, this does not prevent Yang Chen from locating its existence. In fact, it was very simple, as long as he looked for a target that cannot be locked by spiritual awareness, it was basically the demonized demon vine.

Seeing that this demonized demon vine escaped to the last one, Yang Chen did not intend to kill it directly. It's not that Yang Chen was compassionate and kind, but that he was deliberately increasing his difficulty.

The center of the Demon Continent should be the place with the most demonic qi, and it was believed to be the most dangerous place. Yang Chen was still not sure what he would encounter there. Could he bear it or not, so try to test it as much as possible first.

The two demonized demon vines came together, maybe it will bring more pressure to Yang Chen, and let Yang Chen feel the possible danger in advance. He believes that as long as he pays attention, he will be able to deal with it.

However, when the escaped demonized demon vine escaped to the ground. What happened still made Yang Chen unbelievable.

As soon as the roots of the two demonized demon vines touched, they seemed to be fused with each other, and quickly fused together. Immediately afterwards, the vines and the trunk, all slowly merged. In the end, the demonized demon vine that escaped was completely integrated into the demonized demon vine that was originally here, and the two became one and were no longer separate from each other.

Watching this happen with his own eyes, Yang Chen couldn't help but be speechless. Was that okay? Are these two main bodies, or one main body and one split? In other words, all the demonized demon vines in this demon continent should actually be one, but they just know how to spread them around.

In the midst of doubts, the demonized vine that merged together seemed to solve Yang Chen's confusion, showing a strange behavior.

In the demon vine in the center, suddenly a hollow tube-like thing appeared and after a while, the tube began to thicken, as if something agitated inside. With a loud bang, a black ball flew towards the outer ring at a high speed.

How could Yang Chen allow this ball to leave? The flying shuttle caught up with the black ball in the air almost at the speed of light. After a little observation, the nine nether flying sword turned into a black mist, wrapped around the black ball, and started crazily to absorb the demonic qi in it.

This black ball was a mature seed. After the demonized demon vine does not know what conditions are met, it will sprout a seed like this in a certain direction. Presumably the demonized demon vine distributed everywhere, this is how it propagates and spreads.

The nine nether flying sword's current ability was no trivial matter. A mere seed with no strength to struggle was quickly absorbed by the nine nether flying sword and turned into a pure seed.

After thinking about it, Yang Chen threw the seed directly into the bottle medicine garden, and at the same time passed a thought to A'Bi. The seeds of this demon vine, A'Bi can absorb and fuse after planting, or directly fuse. In short, A'Bi can do whatever she thinks is best.

Since the blue jade jasper vine can fuse the blood demon vine to become the blue jade jasper blood demon vine, it can naturally absorb and fuse the purified demonized demon vine. Such a powerful species, he believes A'Bi will be stronger after fusion.

After absorbing the previous demonized demon vine, the power reflected by the current one far exceeds the performance of the previous one. However, the strange thing was that although it seems to have swallowed a demonized demon vine, the overall size of this plant seems to be smaller than the previous one.

Or this was the realm of returning to the basics, just like Yang Chen's Yellow Turban warrior's body refining technique. At the low level, the body was full of swollen muscles, but at the high level, the body shape was evenly reduced, presumably on this demonized demon vine, the same was true.

In any case, this strain will be more dangerous, there was no doubt about it. Yang Chen also raised his vigilance facing this fierce demonized demon vine.

For thousands of miles around, no other demonized monsters appeared at all, and even if they appeared, it was estimated that they would become fertilizer for the demonized demon vines. The strength of this demonized demon vine was outrageous. Presumably, those experts who have already ascended must have encountered these demonized demon vines once, but they were unable to deal with them and no one found that there were huge demon orbs in the demon vines.

The most difficult thing was the demonic qi. If Yang Chen didn't care about this, he would be invincible. Then, possessing the Yin-Yang heaven burning fire was also a necessary condition for Yang Chen to restrain the demonized demon vine. Even if other people have a fifth-grade fire seed, it will not help, unless they have a sixth-grade or higher fire seed. The question was, do people who have a sixth-grade fire seed still need to come to the Demon Continent to fight for their lives?

At the beginning of the battle, the nine nether flying sword first absorbed the demonic qi, and then Yang Chen surrounded himself with the Yin-Yang heaven burning fire. But this time, Yang Chen clearly saw the proof that this demonized demon vine possesses wisdom.

The demonized demon vines actually separated from all directions and attacked Yang Chen. At the same time, all kinds of attack methods were used, such as whipping, strangulation, thorns, venom, and even spiritual awareness attacks.

The sharp and unpleasant hissing sound, he didn't know where it came from, his ear can't hear it, but the sea of consciousness caused a burst of shock. If it was an ordinary person, it would be as if he had been attacked by the golden bell for a long time.

But Yang Chen's spiritual awareness was now as high as the seventh grade human immortal realm, and the firmness of his sea of consciousness can't be shaken by such a level of spiritual awareness attack. Standing still, Yang Chen simply ignored this attack.

As soon as the spiritual awareness attack failed, the demonized demon vine immediately changed to an unimaginable way. It actually learned from the nine nether flying sword and directly turned a part of its body into fine dust, wrapping Yang Chen's entire body in it.

Chapter 546.2: The Birth Of The Immortal Slaying Sword

How terrifying this kind of dust was, Yang Chen didn't know, the only thing he did was to let the two fire dragons of the Yin-Yang heaven burning fire to form an airtight fire cover to protect himself.

The dust was boundless, and it was countless times more than the black mist of the nine nether flying sword. Amidst the rolling black mist, a condensed demonic qi as if it was a substance suddenly rushed towards Yang Chen's fire cover, and like a whip, it slapped Yang Chen heavily.

It looked like it was drawn on Yang Chen's body, but it was actually an attack against the consciousness. In Yang Chen's Sea of Consciousness, there was suddenly a huge black whip with a length of several hundred meters and a thickness of several meters.

In an instant, countless complicated thoughts flooded into Yang Chen's heart. All kinds of emotions poured in, and for a moment, Yang Chen didn't even know whether he wanted to cry or laugh, whether he was happy or sad.

The tragic memory of his previous life, the hatred for the Greatest Heaven Sect suddenly magnified countless times, and the monstrous anger even triggered the blood river below the white dragon. The originally calm blood-colored river boiled frantically, frothed indiscriminately and exuded bursts of murderous aura.

Under the oppression of Yang Chen's only sense of reason, the white dragon pressed the blood river extremely heavily, preventing the blood river from rebelling. But the long whip seemed to have found an opportunity and found Yang Chen's weakness, with a few heavy blows, it was directly drawn into the river of blood.

The violent killing intent was not even able to resist the long whip condensed by the demonic qi. The part of the black long whip that was drawn into the blood river quickly turned into a dark red blood color. The blood color did not stop and began to spread upward.

This time, the long whip seemed to be restrained by the blood river, and the end that penetrated into the blood river could no longer move, as if it was bitten by the blood river.

The nine nether flying dust in his sea of consciousness, this time finally found the opportunity to fight back. The flying dust scattered all around, the demonic qi escaping from the long whip of the absorber that started to go crazy, the entire sea of consciousness was filled with bursts of hissing sounds.

Although the blood river quelled a part of the demonic long whip. But the long whip of demonic qi also caused more impact on the blood river. The whole blood river was bubbling blood everywhere, and at the same time as the rumbling sound, something seemed to be surging out of the blood river. It even caused his sea of consciousness to vibrate.

Yang Chen suddenly realized that at this juncture, the flying sword, which he had tempered since he was at foundation stage, had finally been tempered for hundreds of years and the quenching process was about to be completed.

Resisting the excitement mixed with all kinds of emotions, Yang Chen's sea of consciousness and flying dust firmly trapped the demonic qi whip, and the scope of the whip became smaller and smaller. The amplitude of the swing was also getting lower and lower, and it gradually returned to being calm.

Just when Yang Chen thought that he had suppressed the long whip of demonic qi, his mind relaxed a little. The long whip of demonic qi suddenly rioted and became suddenly tense after relaxing but it wasn't that easy. Seeing that Yang Chen was about to be aroused by deep hatred, he couldn't help himself.

A scarlet light flashed in the blood river, the light and shadow directly cut through the demonic qi whip, and then flickered a few times. The long whip of demonic qi, which had just returned to the height of its demonic flame, suddenly stopped in the sea of consciousness, motionless, extremely strange.

In the center of the black whip, there was a flash of blood red, and then the blood red became more and more, and the black whip was directly divided into two halves.

Next, there were traces of blood red everywhere in the black demonic qi whip, and the blood red became more and more, gradually dividing the entire whip into countless small grids.

In the end, the large and small red grids flashed, and the black demonic qi long whip completely turned into pieces and fell down. The flying dust in the sea of consciousness quickly wrapped these fragments, spread them evenly, and then quickly began to absorb them.

The red light that flashed in the river of blood began to slowly rise, and finally floated to the center of the sea of consciousness.

Familiar appearance, familiar aura, except for the different colors, other parts were exactly the same as the Immortal Slaying Sword. As soon as the Immortal Slaying Sword appeared, it quickly became larger, occupying most of the range of the sea of consciousness. Under the shock of the murderous aura carried on the blade, those black demonic qi fragments were even more shattered by the shock.

As soon as the Immortal Slaying Sword left the blood river, the blood river seemed to have been emptied of its spirit and no longer gave off any aura. On the contrary, the body of the Immortal Slaying Sword exudes a terrifying killing intent.

Compared with the blood river of the past, the killing intent exuded by the Immortal Slaying Sword today was restrained and deep, but concentrated on the Immortal Slaying Sword and not a trace of it escaped.

The blood-red blade would make people involuntarily have a creepy sense of fear, which brings huge psychological pressure. Just looking at this blade, they would have this feeling, not to mention how utterly dissipated after being slashed.

As soon as the Immortal Slaying Sword came out, all emotions were instantly suppressed, leaving only this cold and restrained killing intent. But then, a pure excitement came from the bottom of Yang Chen's heart, and quickly permeated Yang Chen's body.

With a shake of his right hand, the Immortal Slaying Saber suddenly appeared in Yang Chen's hand. The feeling that was so familiar to him made Yang Chen indescribably happy.

After hundreds of years of tempering, the Immortal Slaying Sword and Yang Chen have a tacit understanding of flesh and blood, as if this was a part of his body, he felt like it could breathe.

The killing intent immediately caught Xiao Tian's attention. This kind of murderous blade was Xiao Tian's favorite and without waiting for Yang Chen's orders, he quickly showed up, took a big bite at the hilt of the immortal sword and will never let go. The huge body has shrunk countless times, and was directly wrapped around Yang Chen's hand, connecting Yang Chen and the Immortal Slaying Sword into one.

This was the first time Xiao Tian has voluntarily dedicated himself since he arrived in the Demon Continent. Even the purified demon orbs have not allowed Xiao Tian to perform like this before.

With the Immortal Slaying Sword in his mouth, Xiao Tian's mouth also uttered a series of low dragon roars, which sounded like the sound of a blade swiping across. The excitement that came from the bottom of his heart could not be concealed from Yang Chen, the master, no matter what.

At this time, Yang Chen was even more excited than Xiao Tian. Holding the Sword of Immortal Slaying, it felt like an extension of his arm, and he could do whatever he wanted, suddenly a feeling of pride rose in his heart that he would slash down with one blade and split one into two sections.

In fact, Yang Chen did exactly that. The Immortal Slaying Sword was raised high, without even the process of accumulating power, and no matter what was in front of it, he just cut it down with one slash.

The huge space in front seemed to be suddenly separated by this blade, and the blade aura that permeated the ground drew a long thin line that continued for dozens of miles away.

Chapter 547.1: Dangers In The Core Region

With a single slash, Yang Chen felt an indescribable relief in his chest. It seemed that the outburst of inner demons that had hardly stopped for decades was also released.

After the blade passed, Yang Chen didn't even have the mood to watch the killing effect. He just held the Immortal beheading blade, closed his eyes, stroked his fingers gently over it, he felt the lines of the Immortal beheading blade, and felt the joy of this life-source magic weapon. He didn't even care about the enemy now.

Although the Immortal beheading blade still looks like the Immortal beheading blade, its temperament was quite different, and it was no longer sharp-edged. Except for the blood-red blade that makes people terrified at first glance, there was no outlier in other places.

Even the monstrous killing intent was completely hidden in the restrained blade. The people who are killed by the Immortal beheading blade will be instantly destroyed by the killing intent. At least in the mortal world, Yang Chen doesn't believe that there are people who can fight against the Immortal beheading blade.

Now holding the Immortal beheading blade, he will no longer be regarded as a murderous madman when it appears, and it will not be an excuse for others to eliminate demons and defend the way. Next, it should be a great opportunity for the Immortal beheading blade to make a big profit in the city.

Of course, Yang Chen wasn't arrogant enough to wield the Immortal beheading blade to fight against the Greatest Heaven Sect alone. The heritage of the sect that has been inherited for hundreds of thousands of years or even longer was by no means something that a disciple of a small sect can imagine in Yang Chen. Even the great elders were only the tip of the iceberg of the hidden strength of the Greatest Heaven Sect.

If he wanted to really destroy the Greatest Heaven Sect, it was impossible to rely on Yang Chen and the Pure Yang Palace alone. Yang Chen has now set a trap for the Greatest Heaven Sect, he was waiting for the day when they become the public enemy of all cultivators in the mortal world.

After a while, Yang Chen's excited mood gradually calmed down, and he let go of Xiao Tian, and Xiao Tian suddenly twisted in the air happily, not forgetting to still hold the Immortal beheading blade in his mouth.

He just remembered now to see how the effect of the slash was. After making no movement for such a long time, Yang Chen almost forgot that he was fighting with the most powerful demonized demon vine.

The scene in front of him made Yang Chen a little unbelievable. The guy that fused and devoured another demonized demon vine, and now the body has all appeared. The huge body was directly divided into two halves, it was cut in half by the Immortal beheading blade.

The vitality of the demonized demon vine was extremely powerful, and it can live so nourishing in this demonic qi place. The body that was divided into two halves did not die directly, but still had signs of life.

However, the current demonized demon vines no longer had the energy to attack Yang Chen, although it was still alive, but both parts of the body were shaking uncontrollably, and all the vines have shrunk into a ball, sometimes curling and sometimes stretching, never stopping.

Yang Chen shook his head slightly, this demonized demon vine must be sane. However, if he was wise, he would know to be afraid. The strongest demonic vine in the mortal world can't compete with the killing intent of the Immortal beheading blade.

The nine nether flying sword easily took control of the demonic qi. In this area, he doesn't know how many years the demonized demon vine has condensed the demonic qi as if it were real. It was quickly absorbed by the nine nether flying sword.

The demonic qi of the two was quite different before, but after this period of absorption, it seems to have balanced a lot.

Yang Chen's thoughts moved and Xiao Tian, who was flying in the air, appeared in Yang Chen's hands again with the Immortal Beheading Blade. Xiao Tian automatically turned into a hilt, wrapping Yang Chen's right hand, even if it was a great golden immortal, he couldn't take the Immortal Beheading Blade from Yang Chen's hand at this moment.

After finding the core of the demonized demon vine, Yang Chen just stabbed it twice, and the countless vines on the ground stopped shaking completely, all of them drooped down softly and there was no movement.

The nine nether flying sword has been expanded to its largest size, wrapping both parts of the demonized demon vine in it. In the black fog, there was a rustling sound of absorption of demonic qi, and together with it, the consciousness of the dead body of the demonized demon vine was absorbed into the nine nether flying sword.

This absorption alone took Yang Chen's efforts. When it was completely absorbed, Yang Chen had another demon orb in his hand, or it should be called a demon orb.

This demon orb, he doesn't know how much cultivation it contains, even if there was no demonic qi in it, he believes that no one dares to swallow it, even Xiao Tian may not be able to bear it.

Taking the ordinary pure golden demon orb can improve the cultivation base, but it is true that the cultivation base can be improved by taking this big ball, but the cultivator himself will definitely be blown up.

In his qiankun bag, there were a total of more than 30 demon orb, the size of the smallest was like a human head. It seems a pity to feed all of these things to Xiao Tian. After leaving the Demon Continent, Yang Chen still has to think about how to use it.

The nine nether flying sword became darker and deeper, and it seemed that after absorbing this demonized demon vine, it had a taste of returning to its original state. The concentration of demonic qi even exceeds that of the demonized demon vine. You must know that the body of the nine nether flying sword was much smaller than the demonized demon vine.

It was believed that with the nine nether flying sword at this time, to launch a casual spiritual awareness attack, few cultivators in the mortal world can withstand it. According to Yang Chen's estimation, the current four girls are definitely not good, Li Cheng is definitely able, as for the others, Yang Chen can't think of a cultivator who can take this blow.

It's a pity that nine nether flying sword can't keep the demonic qi inside, as long as it is used, it will look like a lot of demonic qi. It doesn't matter how he uses it on the Demon Continent, once he leaves, he will definitely be regarded as a demonic cultivator. It can only be used in the safest situation or the most critical situation in the future, it must be said that it was a small defect.

It was impossible to say that Yang Chen will also work hard on the Immortal Beheading Blade. Since the Immortal Beheading Blade can even restrain its killing intent, it may also be able to contain the demonic qi, which was also a development direction of the Immortal Beheading Blade in the future.

The thought of the great Yin-Yang five elements flying swords being gathered together, not to mention, just the blood demon vine sword plus the nine nether flying sword, blood-sucking, a heart demon attack and shielding the six senses, was enough to drive countless people crazy. This was not to mention the Penglai Divine Wood flying sword, Living Soil flying sword, flood dragon bone flying sword and so on.

Relatively speaking, Yang Chen's innate fire attribute flying sword was a bit unworthy of mention. Especially the bright ray flying sword, which was Yang Chen's most memorable flying sword. However, with the supplement of the Yin-Yang heaven burning fire, it will never be worse than any other flying sword.

With the Immortal beheading blade, Yang Chen's confidence was immediately bursting, he no longer cared about anything else, and walked directly towards the core of the Demon Continent without fear. That kind of arrogance and no turning back, there is quite a kind of posture that he has in the world to kill immortals.

Chapter 547.2: Dangers In The Core Region

The area where the demonized demon vine was located was already the core area of the demon continent. Yang Chen has been able to sense the location where the demonic qi was most concentrated. That direction should be the location of the spatial connection point.

This was the most dangerous area, not to mention Yang Chen, even those great masters who have experienced hundreds of thousands of years in the Demon Continent have never dared to go so deep.

If nothing else, the demonized demon vine alone was enough to devour all the experts who come in, and treat those experts as nourishing fertilizer for its strong growth.

He doesn't know how this demonic vine grows, it was possible to forcefully use demonic qi. Fortunately, the demonized demonic vine does not multiply very quickly, and it has only been more than 30 plants for so many years. If it grows all over the mountains and plains, maybe one day this powerful species will occupy the entire Demon Continent.

Here, Yang Chen didn't use the shuttle, let alone a flying sword, he walked by himself, for fear of any accident. In this core area of demonic qi, no amount of caution can be overstated.

Along the way, Yang Chen was a little surprised. There were also a lot of plants in this area, all kinds of big trees, all kinds of shrubs and vines, all of which are the kind that can absorb demonic qi and grow extremely strong. However, there was nothing like the demonized demon vine here.

In this area, demonic fiends were relatively rare. Yang Chen thought that because of the demonized demon vine, it killed all the demonized beasts around a hundred miles, but it was obviously not the case.

After walking thousands of miles to the core area, Yang Chen finally discovered the traces of a demonized monster. However, the demonized monsters here were not the kind of monsters that only rely on their instincts to be particularly ferocious after being attacked by demonic qi, but another form.

Using the words in Yang Chen's mind to describe it, it can be called a beast, a monster for breeding.

All kinds of demonized monsters that Yang Chen had never seen before, almost all of them could be seen along the way. Every tens of miles around, there were several pairs, both male and female. These monsters seem to be able to survive just by absorbing demonic qi. They don't need predation, the only purpose of their existence was to reproduce.

No matter what kind of monster, their speed of reproduction was very amazing. The first demonic leopard that Yang Chen met, in a few breaths, gave birth to the next little leopard.

As soon as the little leopard was born, it was immediately attacked by demonic qi, and then grew rapidly. In just one day, the little leopard has grown to the point of the late Yuanying stage. Then the little leopard started to run wildly towards the periphery of the Demon Continent, as if it could no longer bear the pressure of the demonic qi here.

Running past Yang Chen, the demonized leopard didn't even look at Yang Chen. It seems that getting out of here quickly and getting to the area where it can adapt was its initial instinct. After arriving at those places, it will think about its killing instinct.

Different leopards have different aptitudes and different final achievements. The more they are able to withstand the demonic qi, the higher the cultivation realm, and the closer the place to stay was to the central area. Just relying on this simple method, the entire demon continent was filled with various demonized monsters of different strengths, and the strong and weak were naturally separated.

No wonder Yang Chen often sees weak demonized monsters appearing in the depths of the Demon Continent. Many experienced people have disdain to kill those demonized monsters that are much worse than their own realm, otherwise these monsters will not become strong enough to provide cultivators with experience. When have you seen a cultivator kill an ant to gain experience?

Those beasts, their cultivation base even made Yang Chen feel incredible. With the experience of his previous life, Yang Chen can easily see that the realm of those beasts was almost close to the level of Earth Immortal. If they wanted to, they could easily kill Yang Chen in seconds.

Fortunately, these breeders don't seem to have any desires other than reproduction. The first species of beast he encountered was the demonized leopard. They saw Yang Chen's aura and glanced at Yang Chen, but Yang Chen always wore the nine nether flying sword as a robe, and the other party seemed to feel no less than the concentration of demonic qi of the demonized demon vine, so it didn't take it seriously, it waved its tail lazily and continued to produce.

Here, it was the first time Yang Chen felt the pressure of facing the true death. Fortunately, with the cover of the demonic qi, the other party didn't do anything, otherwise Yang Chen really wouldn't know how he would die.

After realizing that as long as there is an extremely strong cover of demonic qi, he can be safe and sound, Yang Chen continued to move forward cautiously. The territories of several powerful beasts he has passed along the way all illustrate this point.

There were even two kinds of monsters, which are natural enemies themselves, and they produced by themselves at a distance of a hundred miles, regardless of the existence of the other.

This made Yang Chen more and more certain that this was the place where the demonic fiends were born. Although these beasts are powerful, they all exist as beasts, only breed, and don't care about other things. As long as he doesn't provoke them, he will be fine.

Surrounded by menacing beings that could kill him in seconds, but the demonic qi of that spatial connection point made Yang Chen decide to risk his life to explore. Once he can refine that space connection point, the Immortal beheading blade can have the ability to cut through space, and the nine nether flying sword will also have an endless source of demonic qi, which was more beneficial than anything and worth the risk.

Anyway, he only needs to initially refine the space connection points in a short time, and he doesn't need to refine all of them at all. As long as the first step was completed, it would be like cutting the entrance to the immortal executioner stage, and he can continue refining anytime, anywhere. These species of beasts will not let it be done easily, there is an 80% success rate.

From here to the center, there are still thousands of miles away. Yang Chen's journey was like walking on a tightrope, passing by the extremely powerful beasts, the feeling that there was no attack but his life hanging by a thread. Even more than the killing experience outside, Yang Chen can appreciate the benefits of this experience even more.

Being in between life and death all the time, this was the original intention of coming to the demon continent to gain experience. Previously, Yang Chen's protective magic weapon was strong and would not be life-threatening, so although he also sharpened his attack methods, his real state of mind could only be improved through the experience of inner demons, which was far less dangerous than the current one.

What kind of emotional outburst could better enable Yang Chen to achieve the purpose of his experience than knowing that he would be killed if he made a slight mistake? Although the previous journey only covered two or three thousand miles, it benefited Yang Chen more than the hundreds of thousands of miles from the edge of the Demon Continent to the center.

Along the way, Yang Chen even had some vague expectations in his heart, hoping that this road would never come to an end, which was very contradictory.

Chapter 548.1: Treat Of Death

This feeling of being under real threat of death all the time was really uncomfortable. The courage in his heart was much stronger, but after all, he was still on the verge of life and death, and it was always a bit uncomfortable.

Strangely, all the beasts turned a blind eye to Yang Chen's appearance. Even the demonized beasts that were madly sprinting towards the periphery didn't even look at Yang Chen, and ran directly past him.

The abnormal situation made Yang Chen wonder if these seemingly powerful beasts actually only have the ability to reproduce and no longer have combat effectiveness?

It's just that this guess no longer existed after a chance encounter. When a dizzy demonized monster rushed out from the inside, it was probably because the pressure of the demonic qi was too great, and it didn't know the way, and rushed straight to a breeding beast.

This was a demonized monster of at least the middle dacheng stage, and its strength was stronger than that of most cultivators who have come to gain experience in the demon continent. However, this demonized beast, which looked very ferocious to ordinary experienced masters, rushed in front of the beast. The beast just raised its head and roared at the demonized beast and then ignored it.

The demonized monster that rushed over stopped abruptly at a distance of about twenty feet in front of the beast. After standing silently for a while, all of a sudden its whole body exploded and with a bang, a rain of blood blew out to the sky.

The shredded flesh and blood that flew out of the air continued to explode continuously in the air, bursting into smaller fragments, and in just a few breaths, a dacheng stage demonized beast turned into a pile of shredded pieces that could not be recognized.

This was just the might of a roar from a distance of a few dozen feet from the beast. If it was done with all its strength, it can be imagined how terrifying the beast was.

The roar of the beast was very precisely controlled, and the power was only concentrated on the demonized beast that was rushing around. No other place was affected, even the trees around the demonized beast were not damaged in the slightest.

The beasts at this distance, Yang Chen estimates, at least already have the cultivation base of the seventh grade human immortal realm. A master of this cultivation base can absolutely ignore Yang Chen's dragon clan golden bell and yellow turban warrior's body refining technique, and directly slap Yang Chen into a meat paste.

Although the Yellow Turban warrior's body refining technique was a cultivation method in the immortal world, Yang Chen has also cultivated to the realm of sea pouring strength, but after all, his body was still a mortal body that has not undergone a series of baptisms of the heavenly tribulations, it was far from being compared with the immortal body of the immortal world.

However, if Yang Chen ascended through the tribulation, after the baptism of the three tribulations, let alone the seventh grade human immortal realm or the eighth grade ninth grade master, even the masters of the earth immortal realm, might not be able to handle Yang Chen.

It's a pity that these are things that will happen in the future. Now Yang Chen, no matter how strong his cultivation base was, he was still in the mortal world, and he can still be easily killed by these beasts.

Fortunately, Yang Chen used his demonic qi and the nine nether flying sword to pretend to be a demonic beast, completely deceiving these beasts with unclear minds, and no beast had ever attacked Yang Chen.

The danger has always been there, and the deeper he goes, the more dangerous it becomes. However, he was already four or five thousand miles away from the place where he saw the first beast and even if he turned around immediately, he would not be able to get out of this danger quickly.

Now that he has come here, and these beasts will not attack at will, Yang Chen was of course reluctant to leave. The ultimate goal in his heart was still at the center.

The Demon Continent was the first place where Yang Chen had no specific situation in his memory after his rebirth, and it was also a place where he could not control his own destiny, but this unpredictable situation was what Yang Chen needed most. If everything was in his plan, it can't bring many benefits to Yang Chen.

The deeper he went, the more powerful the beasts became. It took Yang Chen carefully about a year to advance five or six thousand miles again, and finally came to a position close to the core.

Those species of beasts on the road were already at the ninth grade immortal realm, which were infinitely close to the level of earth immortals. When passing these beasts, Yang Chen was walking on a tightrope with his head down, as a small movement could bring him utter disaster.

Any kind of beast, as long as it sneezed gently, Yang Chen would be injured or even more serious. Based on such conditions, when Yang Chen avoided the demonized beasts who were fleeing, he was careful not to emit any aura that could disturb these beasts, he was extremely careful.

The strange thing was that Yang Chen has seen countless species of beasts along the way. Yang Chen has basically seen the demonized monsters bred by these beasts. However, until now, Yang Chen has not seen a demonized demon vine. The species of beasts, or the existence of the mother body, he really doesn't know where these demonized demon vines come from.

You must know that the location of the last demonized demon vine was the closest to the edge of this region. According to experience, the parent body of the demonized demon vine was definitely an extremely powerful beast, and he has not seen it yet.

Would it be deeper in the core region?

This question has been lingering in Yang Chen's mind, constantly. He had a hunch that his ultimate goal might have something to do with the demonized demon vine.

There was no proof for the unprovoked hunch, but Yang Chen thinks so. Although he didn't see anything to do with the demonized demon vine along the way, the anxiety in Yang Chen's heart was getting worse and worse.

A few hundred miles ahead, it should be the center point of the Demon Continent, the space point that connects the two worlds. The demonic qi in this area was already too strong. If Yang Chen had not been influenced by the demonic qi of the nine nether flying sword, if he had not cultivated it, even if he had the state of mind of a great lou golden immortal, he would still be invaded by the demonic qi.

At this distance, the distribution of species of beasts was already very sparse, and there were only one species in hundreds of miles. The body of the beasts were getting smaller and smaller, becoming about the size of the most common monster, but the strength was doubled. The smaller the beast, the stronger it was.

After carefully passing through the territory of several Earth Immortal-level beasts, Yang Chen finally came to the core of the Demon Continent. A hundred miles ahead should be the location of the spatial connection point.

Yang Chen's hunch finally became a reality. After walking to a place more than ten miles away from the space connection point, Yang Chen glanced at the core area and saw the figure of the demonized demon vine.

A demonized demon vine that was only within a small radius took root in the place where Yang Chen felt the strongest demonic qi, and tightly wrapped that place.

All the demonic qi seems to be emanating from the body of this demonized demon vine, and every waving vine was condensed with demonic qi that was as real as terrifying black snakes, extremely hideous.

Chapter 548.2: Treat Of Death

This demonized demon vine was a hundred times smaller than the strongest one Yang Chen has seen. Whether it was a vine or a leaf, it looked similar to some ordinary vines, and it was not scary at all, but the level of strength is beyond the reach of that one.

The one that Yang Chen killed was just beyond the second grade human immortal realm. Yang Chen relied on his powerful protective magic weapon and Yin-Yang heaven burning fire to burn it to death.

But now that Yang Chen saw this ultimate demonized demon vine, Yang Chen's visual judgment alone already told him that it had the cultivation base of the second-grade Earth Immortal realm. It was much more powerful than the most powerful cultivator Yang Chen had ever seen in this mortal world.

To put it mildly, if this ultimate demonized demon vine was really intentional, it alone could kill all creatures in this mortal world.

Second grade earth Immortal realm, this was two more powerful realms than the dacheng stage, it was still a huge gap beyond the first realm.

The cultivators who have just ascended through the tribulation, have experienced the transformation of the heavens and entered the spiritual world, and have also undergone the transformation of the spiritual world, were only mere human grade immortals. To meet this demonized demon vine, even if tens of thousands of them go together, they would just become its food.

The gap between the middle Yuanying stage and Earth Immortal realm seems to be only the dacheng stage, Human Immortal realm, Earth Immortal realm, three great realms. However, the Yuanying stage and qi refining stage who have just started to cultivate were only separated by three major realms: the foundation establishment stage, Jiedan stage and Yuanying stage, but the gap between these three great realms cannot be filled even with millions of human lives.

That spatial connection point was under the main root of this demonized demon vine. The rhizomes spread by this demonized demon vine were sturdy. The demonic qi kept escaping from the spatial connection point, absorbed by the demonized demon vine first, and then released, infesting the entire demonic continent.

How should Yang Chen deal with such a formidable opponent? If he wants to refine the spatial connection point, he must break through the protection of this demonized demon vine and enter next to the main root.

In the middle Yuanying stage, he was to face a second grade earth immortal, Yang Chen's heart sank to the bottom in an instant. He was too greedy, so greedy for that spatial connection point, and he actually came to this kind of terrifying entity.

Yang Chen was purely based on the concentration of demonic qi to identify the direction. With his spiritual awareness, he didn't dare to easily probe any place around a large number of beasts above the seventh grade human immortal realm, for fear of triggering a counterattack from those beasts. It was only after reaching this position that the existence of the demonized demon vine was discovered.

What's even more frightening was that the demonized demon vine seems to have discovered Yang Chen's figure, and two black vines were like two long tentacles approaching Yang Chen's side.

There was no way to hide, in front of such a powerful demon, any concealment was futile. So that the inverted sea jasper lamp can't play the role of shielding him, the huge gap in cultivation makes all external tools seem so futile.

The reason was very simple, just as some modern stealth aircraft can avoid the scanning of ordinary radars, but they cannot avoid the more powerful synthetic aperture radars, the gap in the realm cannot be made up anyway.

The killing intent of the Immortal beheading blade may be able to quell this guy, but it was only a possibility. There was another possibility, which was that it would completely anger the demonized demon vine. A master who has reached the realm of Earth Immortal, it was impossible to generalize with these masters in the mortal world, when angered, the only result was that there would be no bones left of him.

At this moment, Yang Chen thought of countless methods in his mind. Countless magic weapons, countless formations, but none of them could help Yang Chen get out of his predicament at this time.

The most likely possibility was to use the shuttle to quickly escape from this area with the continuous support of spiritual power provided by Yang Chen. But escaping would definitely be the result of being madly attacked by those species of beasts, and besides, whether it was possible to escape this demonized demon vine, or not.

At the speed of light, the two vines had already rolled up to Yang Chen's side. To be precise, it was wrapped around the nine nether flying sword that had been posing as demonic qi outside of Yang Chen's body.

The speed of the vines was unimaginable by Yang Chen. It only took a blink of an eye to see the vines roll over to actually roll up his body. Yang Chen's method in his mind was caught before he could make a decision.

The vines did not directly strangle Yang Chen, but gently wrapped him, making Yang Chen stunned for a while.

Yang Chen had no doubts that this only seemed to be a vine as thin as an arm, but it could easily cut himself and the dragon golden bell into two pieces, and it was still under the circumstance that he had used the Yellow turban warrior's body refining technique to the extreme.

The moment the vines were entangled, Yang Chen even felt a sense of despair. In this life, although he has been more successful after his rebirth than in his previous life, he still has many unfulfilled wishes, especially the matter of seeking revenge against the Greatest Heaven Sect.

The only happy things were that his master was not like in the previous life, and the same was true for his senior apprentice sister.

Apart from these, there seems to be nothing else that would allow Yang Chen to die without regrets. This kind of desperate mood was urged by the almost substantive demonic qi in the center of the demonic qi, his whole person had an emotional explosion of despair and regret that could no longer be added, and could no longer lift any spirits.

The emotional outburst this time was even more terrifying than all the previous episodes combined. Yang Chen was almost on the verge of losing control. He was only one step away from becoming a demon, attacked by demonic qi, and turned into a completely demonized Yang Chen.

At a critical moment, the immortal body that was far away in the sea of no return and was stored in the Dragon Palace by Yang Chen suddenly opened his eyes at this moment, but only opened it for a while, then closed it again immediately, and restored the state like hibernation.

Just opening and closing his eyes, Yang Chen, who had almost lost his mind, suddenly seemed to be injected with vitality, his mind regained his shrewdness in an instant, and his despair was stopped abruptly, and his mind began to work again, looking for that silver lining that probably doesn't exist.

The abnormal performance of the vines made Yang Chen keenly aware of it immediately. As soon as his heart moved, he established a deep connection with the tool spirit of the nine nether flying sword.

The nine nether flying sword was originally refined by Yang Chen as a quasi life source magic weapon, so it was not unusual to do this. Soon Yang Chen was pleasantly surprised to find that a vague emotion came from the vines. This emotion was not hatred and killing intent, but kindness.

Chapter 549.1: Joy After Sorrow

The feeling conveyed by the demonized demon vine made Yang Chen a little puzzled, but he immediately understood. The nine nether flying sword has always absorbed the demonic qi in the demonized demon vine, and even the tool spirit of the flying sword was a ghostly shadow of the demonized demon vine.

Yang Chen even had some doubts that this demonized demon vine should be the mother of the demonized demon vines outside. It was only natural that the descendants of the original inheritance have this kind of intimacy.

The following actions of the vines further confirmed Yang Chen's guess. The vines that wrapped the nine nether flying sword did not strangle too hard, but gently rolled up Yang Chen wrapped in it, and then slowly retracted.

From the beginning to the present, Yang Chen has never felt any killing intent. On the contrary, there was an emotional transmission similar to the feeling of mutual admiration, which made Yang Chen very unaccustomed. This ultimate demonized demon vine that has been invaded and contaminated by demonic qi still maintains its sanity and could keep its emotion?

Soon, Yang Chen and the nine nether flying sword were brought back to the mother body by the vines of the ultimate demonized demon vine. This was not the end, the main root at the center of the mother suddenly cracked a big hole, the vines kept shrinking inward, and took Yang Chen and the nine nether flying sword directly into the body.

Next, it was pitch black in front of Yang Chen's eyes, and he couldn't see anything anymore. Moreover, there were more mysterious fibers in the body of the ultimate demonized demon vine, and the effect was stronger. Even Yang Chen's spiritual awareness could not reveal much.

In addition, under such circumstances, Yang Chen didn't dare to release his spiritual awareness to provoke the ultimate demonized demon vine, so he didn't dare to use his spiritual awareness to probe. Once the demonized demon vine was aware that something was wrong, Yang Chen wouldn't even have a chance to escape.

At the same time, Yang Chen was also very fortunate. From the very beginning, when he made the nine nether flying sword, he used the demonized demon vine as the core, and even those mysterious fibers were refined into it. The original intention was to enhance the power of the nine nether flying sword, but inadvertently, it made the nine nether flying sword closer to the entity of the demonized demon vine.

Because of this, the ultimate demonized demon vine could not detect that there was still a Yang Chen inside the nine nether flying sword through those fibers. Otherwise, he might turn his face on the spot.

Suddenly, Yang Chen and the nine nether flying sword were released by the vines, and then fell into a sticky mass. As soon as he came into contact with liquid, Yang Chen secretly screamed badly.

It was completely different from the black blood secreted from the roots of the demonized demon vines that Yang Chen has experienced before. Although it was also highly poisonous and corrosive, it was definitely more than the black blood he had seen before, it was a thousand times more terrifying.

The nine nether flying sword was originally the property of the sixth earth, the property of earth and water, and the properties of heaven and earth. After adding the mysterious fiber and silk mixing and refining, it was very close to the demonized demon vine. These liquid contaminations have no effect at all.

But Yang Chen was a little frightened, this is in the body of the ultimate demonized demon vine, Yang Chen was determined not to use the Yin-Yang heaven burning fire to fight. But for Yang Chen himself there was no such strong corrosion resistance. It's fine for a short time, but once you are exposed to these liquids for a long time, even if you don't die, it would peel off the skin.

In desperation, Yang Chen was almost at a loss. But soon Yang Chen thought of a way, since the nine nether flying sword can resist it, so can the earth attribute living soil flying sword. Even the flying sword contains the living soil, which was more able to resist the invasion of this kind of liquid.

The living soil flying sword appeared silently beside Yang Chen and then the steel seemed to turn his fingers softly, wrapping Yang Chen as much as possible.

He can't help but say that the living soil was indeed a legendary earth-attribute material. When it came into contact with the black liquid, there was no movement at all, as if the black liquid was an ordinary water droplet, and it was completely unaffected.

Fortunately, Li Cheng gave Yang Chen ten pounds of living soil before, so at this time, Yang Chen could easily resist the invasion of the black liquid. He doesn't know if this was really a coincidence, a mistake or a divine arrangement.

Up to now, Yang Chen was still safe from danger, and temporarily resolved the danger, but he still hasn't alerted the ultimate demonized demon vine. He just doesn't know what the ultimate demonized demon vine wants to do when the nine nether flying sword was drawn into its body.

While in doubt, the ultimate demonized demon vine took action. The black liquid that had just infiltrated, suddenly seemed to be under some pressure, and madly poured into the nine nether flying sword. The black liquid with crazy demonic qi quickly occupied the space between Yang Chen's body and the nine nether flying sword.

Yang Chen almost couldn't help but resist, but he still held back abruptly. This black liquid kept pouring in, without knowing what the purpose was, it made the nine nether flying sword a lot bigger. Inside the nine nether flying sword, the black liquid kept rushing left and right, as if looking for something, it was strange.

This black liquid clashed in all directions, as if it had aroused the vigilance of the ultimate demonized demon vine, and Yang Chen suddenly felt a warning in his heart, could it be that something has changed?

There was a sudden clearness in his mind, and at the speed of light, Yang Chen suddenly took out the largest demon orb from the qiankun bag and put it beside him.

As soon as the demon orb appeared, the black liquid rushed over frantically and quickly wrapped the demon orb. The crazy conflict just now no longer existed and has subsided.

The strong suction came from the black liquid, as if to suck out all the essence contained in the demon orb. It's just that no matter how hard the black liquid was, it couldn't get any supplements from the demon orb.

That strong suction even terrified Yang Chen who was beside the demon orb. Fortunately, it was only aimed at the demon orb. Yang Chen was protected by the flying sword and did not suffer any damage.

After working hard for a while, the black liquid finally stopped in vain. Next, before Yang Chen realized what had happened, more black liquid poured in continuously.

At the same time, a not very clear thought came from the ultimate demonized demon vine to the nine nether flying sword. The meaning of the transmission was very obscure. Yang Chen, who was seen as the tool spirit of the nine nether flying sword, could only guess a few simple meanings, acceptance, inheritance, and more.

What happened next was simply beyond Yang Chen's expectations. A huge spiritual awareness force mixed with unimaginable strong demonic qi directly broke through the outer layer of the nine nether flying sword, and then passed through the black liquid and quickly entered the demon orb.

Right next to Yang Chen, the demon orb, which was already huge enough to make Yang Chen speechless, began to grow like an inflatable gas. At the same time, the demonic qi that had been purified by Yang Chen also infected the pure golden demon orb into pure black again.

Chapter 549.2: Joy After Sorrow

Yang Chen couldn't see it, but he could feel it. This process really made Yang Chen feel unbelievable, now he vaguely understands what this so-called acceptance means.

It turned out that this ultimate demonized demon vine was cultivating the fake demonized demon vine simulated by the nine nether flying sword. Come to think of it, inheritance was to let the nine nether flying sword inherit the race of the demonized demon vine.

He literally understood it means this, but Yang Chen couldn't guess the purpose of the demonized demon vine. Speaking of which, shouldn't this ultimate demonized demon vine be the parent of the demonized demon vine? Why pass the heavy responsibility of inheritance to the nine nether flying sword?

Under what circumstances would the ultimate demonized demon vine make such a choice? Yang Chen couldn't help but start to ponder.

To save others with oneself and replace it with oneself, under what circumstances would one pass on the mantle to one's descendants? After thinking about it, it seems that there are only a few situations, either because it wants to survive the tribulation and ascend, or because it no longer has such ability.

It was impossible to rise through the tribulation as the cultivation base of the second grade earth immortal realm must have been solid a long time ago. Under the influence of demonic qi, it seems that it was impossible to even face the tribulation. Then under what circumstances was it incapable of overcoming? Was it seriously injured or disabled, or on the verge of dying.

As soon as this guess rang out in Yang Chen's mind, it was a little unstoppable. The crazy suction that just came from the black liquid seemed to want to suck the essence of the demon orb clean, he just doesn't know why it didn't work.

Why does the ultimate demonized demon vine madly suck the essence of its younger generation? There seems to be no other possibility except to save itself. In other words, this ultimate demonized demon vine was far less terrifying than Yang Chen had guessed. Either it was seriously injured or it was about to die for other reasons.

The possibility was so high that Yang Chen couldn't help but get excited. At this time, he carefully used the nine nether flying sword to sense the situation of the ultimate demonized demon vine. He seemed to be able to vaguely perceive a trace of death aura that has been well concealed.

A few wisps of death aura that barely existed. This made Yang Chen more and more determined that this demonized demon vine was indeed dying soon. He doesn't know what kind of accident happened to make such a powerful demon vine that occupies the outlet of demonic qi in such a situation. But anyway, this was beneficial to Yang Chen.

Now, Yang Chen finally figured out what happened just now. For some unknown reason, this ultimate demonized demon vine was seriously injured and was on the verge of death. Suddenly it found its younger generation appeared, so it immediately grabbed the younger generation into its body, trying to use the younger generation's life essence to heal itself.

But in the case of finding that his efforts were fruitless, the ultimate demonized demon vine made a decisive decision to pass on his essence to this younger generation, and let it pass on the demonized demon vine race instead of itself. So there was a crazy process of filling the demon orb.

Yang Chen, who understood the situation in front of him, didn't know whether he should be glad that his luck was too strong, or should he be afraid that he almost became the tonic of the ultimate demonized demon vine. The only thing he could confirm was that it seems that if he wants to refine the space connection point where the demonic qi overflows, it was not so far away, it was within reach and it was likely to be realized.

However, the current situation was not up to Yang Chen to call the shots. Everything was dominated by the ultimate demonized demon vine.

Yang Chen didn't know how long this process would last, but it was certain. For the time being, it should be very safe to stay in the body of the ultimate demonized demon vine.

Outside the body of the ultimate demonized demon vine that Yang Chen could not see, the ultimate demonized demon vine that had been trapped in his own territory was completely different from before. The vines were wide open and stretched out frantically towards the surroundings.

The beasts that were not far from the ultimate demonized demon vine seem to realize that the crisis was coming and they were about to get up and flee, but it was too late. The vines that attacked like ghosts have already entangled the surrounding beasts with lightning speed, and they have begun to strangle them frantically.

Countless black barbs grew on the vines, piercing deeply into the beasts that were caught up. Don't look at these beasts that also have the cultivation of the earth Immortal realm, but they are still quite different from the demonized monsters, and they have almost no resistance.

The black barbs were like countless blood-sucking mouths, madly absorbing the life essence of these beasts, and then continuously transmitted to the body of the demonized demon vine. Because these life essences could no longer be used by the ultimate demonized demon vine, they were transferred to the demon orb beside Yang Chen.

In a short span of less than two hours, the demon orb with a square radius of 3 feet swelled to more than 20 feet, and it continued to expand.

Within a few hundred kilometers outside, almost all of the beasts were entangled and strangled by the vines of the demonized demon vine. The countless vines were all constantly absorbing the essence of these beasts, and they were continuously transporting these essences to the mother's body, and then the mother's body sent it into the demon orb.

Under such circumstances, Yang Chen doesn't need to do anything else at all. As long as he waits patiently, this ultimate demonized demon vine will inject all of its essence into the fake demonized demon vine, the nine nether flying sword, and then die. Yang Chen only needs to protect himself from being hurt by demonic qi and those black liquids.

Such a situation was simply unbelievable, who could have predicted that the process of nine-death life would turn out to be such a result? The ups and downs of the process make it impossible to believe that all this was real, but not a dream.

After thinking about it, Yang Chen could only sigh, it may be that after his rebirth, the fortune was too much behind him, so that things like falling pie from the sky can happen again and again. The falling pie was not only a golden pie, but it fell directly into Yang Chen's mouth by accident, saving Yang Chen the effort to pick it up.

That being the case, what else could Yang Chen hesitate to do? Heaven and did not take, but took the blame, and immediately controlled the nine nether flying sword to madly absorb the incomparably rich demonic qi.

While absorbing the demonic qi, Yang Chen sighed at the beauty of life, but soon, Yang Chen realized that he seemed to have overlooked a little bit, and almost let a lot of treasures pass him by.

These highly toxic and corrosive black liquids were also a kind of material, and they are also top-level materials that Yang Chen can't find anywhere. Among the great Yin-Yang five elements flying swords, there was still a shortage of the eighth metal flying sword and ninth water flying sword.

He does not know where to find materials to refine the eighth metal flying sword, but were these black liquids not the most suitable materials for the ninth water attribute?

If the black liquor was refined into the ninth water flying sword, which was naturally toxic and corrosive, what kind of nightmare would it be for the opponent?

Chapter 550.1: Fortune

Everything has to wait until the current situation is over, otherwise Yang Chen will not be able to take any action. Even if the ultimate demonized demon vine was seriously injured and on the verge of death, before it died, it was still at the second grade earth Immortal realm, and it would be effortless to kill Yang Chen in seconds.

The thin dead camel was bigger than the horse, which was determined by their realm. If you really think that the ultimate demonized demon vine was dead, and you want to show your bravery, then you are a fool, and there will be no scum left to die.

How nice it was now, it was safe, he won't risk his life, he will just wait. Even if Yang Chen and the ultimate demonized demon vine were evenly matched, wouldn't it take time to kill it, anyway, it's time-consuming, why not wait for it to die?

These black liquids were secreted by the ultimate demonized demon vine. They should have experienced the edification of demonic qi for an unknown number of years, and absorbed how much poison. This time, if they were evaporated to dryness by a fire, then it's a waste of material.

After being slightly contaminated with a little black liquid, Yang Chen's fingers immediately became violently paralyzed. You must know that Yang Chen's body was a powerful body that has cultivated the Yellow turban warrior's body refining technique, but it can't resist this terrifying black liquid. If he was replaced by other cultivators, it would definitely be a fatal blow.

The blue jasper blood demon vine appeared silently, plunged into Yang Chen's hand, and quickly absorbed and purified the poisonous liquid that had affected Yang Chen's arm.

The original blue jasper blood demon vine might not have such a powerful purification ability, but not long ago, Yang Chen gave A'Bi a seed of the demon vine. After being absorbed and fused by A'Bi, it has a certain resistance to the venom that was essentially secreted from the root of the demonized demon vine.

Yang Chen had very little exposure to the black liquid, plus his own strength and strong resistance, but for this reason, the blue jasper blood demon vine still took half a column of incense time to purify the poisonous liquid. If there were more contacts, he was afraid it will not be so easy.

From this point of view, the body protection of the living soil flying sword is really a life-saving way for Yang Chen to be prepared by Li Cheng by mistake. If there was a chance in the future, he must thank this righteous brother.

However, Yang Chen soon became worried. He didn't know how to use such a terrifying black liquid. If nothing else, just collecting it was a hassle.

Of course, it was only an imagination now, and it was impossible to put it into practice. The ultimate demonized demon vine was still painstakingly cultivating the nine nether flying sword, a fake demonized

demon vine, so that it has the strength of inheritance. At this time, any disturbance could lead to disaster.

If it wasn't for the ultimate demonized demon vine, Yang Chen would have been exposed by now.

Speaking of which, it was really a blessing. Yang Chen has used the word luck to sign many times, and he was also sighing that the word fortune was indeed an indispensable magic weapon for cultivators.

The things on Yang Chen's body were almost the same, and almost all had completely different results. He can't help but say that this demonized demon vine was arranged by the heavens to be subdued by Yang Chen.

Yang Chen didn't know how much the life essence of the countless earth immortal realm and beasts close to the earth immortal realm added up, and he couldn't calculate it. If nothing else, it took a few months for the ultimate demonized demon vine to plan for his younger generation before he died.

Perhaps the ultimate demonized demon vine has another purpose, that was, while strengthening his younger generation, he also kills the surrounding competitors. The instinct of living beings makes choices subconsciously.

The point where the demonic qi escapes has created the most powerful strength of the ultimate demonized demon vine, and it has also created countless coveted competitors. Other species of beasts were contaminated by demonic qi, leaving only the instinct of survival and reproduction, but also the desire to madly compete for the best resources.

Without killing the surrounding beasts, it was impossible to stop the joint strangulation of other beasts by relying on the young nine nether flying sword who has received the attention of his own life essence. At the last moment of the ultimate demonized demon vine, it was still instinctive to clear the surrounding area.

The demon orb beside Yang Chen was already more than ten feet in diameter, it was a huge demon orb. No matter how it was called, it wouldn't change the size of the huge sphere.

How many years of cultivation can be improved by swallowing this demon orb? Yang Chen could no longer calculate. Perhaps, if you don't consider the improvement of your mood, this demon orb can make people directly improve from the Qi refining stage to the Earth Immortal realm.

However, Yang Chen was very skeptical, who could swallow such a large demon orb completely. Maybe only those huge monsters are possible, it was impossible for any cultivator to do it.

Yang Chen didn't think about what such a demon orb would be used for. Maybe there would be a chance in the future, all the demon orbs in hand can be refined into medicinal pills that can improve the cultivation of cultivators, it was the best choice to prepare it for one's own sect.

Not everyone has the aptitudes of Gao Yue, Gongsun Ling, Shi Shanshan and Sun Qingxue, and not everyone can cultivate to the peak of their own without the help of external objects like Yang Chen and Li Cheng. When necessary, some can improve through the help of medicinal pills.

Yang Chen was not a pedantic person, he could not take the demon orb himself, nor let his wives take the demon orb, that was because they didn't need it. But for other people who are close but not very talented, he doesn't mind using this method to improve their cultivation.

Yang Chen would choose the latter without hesitation, between the lack of cultivation was death now, and the longevity of the cultivation base after taking the demon orb, the lifespan would increase but it would take longer to eliminate the influence of the demon orb.

The ultimate demonized demon vine was still constantly being filled with life essence, and the demon orb was getting bigger and bigger, but the speed has slowed down a lot. Yang Chen also felt the death aura of the ultimate demonized demon vine more and more through the nine nether flying sword.

It was a desperately ill and incurable depression, and it was also a sign that a powerful master was slowly dying. Yang Chen didn't know what happened to this ultimate demonic vine before he arrived, but he couldn't help but say, no matter what happened, this demonic vine really died well, it died wonderfully.

Everything seems to have been deliberately arranged by God, and it is completely serving Yang Chen's goals. This series of changes could not be described as an exaggeration at all.

Finally, after holding on for a few more months, the ultimate demonized demon vine finally killed the beasts within hundreds of miles around, absorbed all their life essence, and injected them all into the body of the younger generation nine nether flying sword and the demonized demon vine itself finally became a dead thing.

Chapter 550.2: Fortune

The aura of the ultimate demonized demon vine dissipated, after waiting for several months, Yang Chen could finally start his plan.

The first task at present was of course to collect these powerful ninth water black liquid. In the beginning, Yang Chen refined several large jade bottles and wanted to hold the black liquid in it, but as soon as the black liquid was loaded, the jade bottle made a hissing sound of corrosion that made one's teeth sour, and it soon became riddled with holes.

Using a blank medicine garden space, the surrounding soil and black liquid were sent in, but after only a few days, the entire medicine garden space was destroyed, it was impossible to resist the strong corrosiveness of black liquid.

In desperation, Yang Chen had to use the living soil flying sword to form a big ball, wrap all the black liquid, and send it into his storage bag. The only thing that can resist the corrosion of black liquid now seems to be the living soil flying sword.

As for refining the ninth water flying sword, that could only be done after thinking of a way in the future. The most important thing at the moment was not to refine the ninth water flying sword, but to refine the connection point of the space.

As soon as the ultimate demonized demon vine died, the spatial connection point that Yang Chen couldn't find anywhere was easily located by Yang Chen. It's not far from where Yang Chen was now, but it's just going deeper into the ground.

Naturally, Yang Chen will not give up the good things on the ultimate demonized demon vine. No matter what, he first put the entire body of the ultimate demonized demon vine into a blank storage bag, together with the unbelievably huge demon orb, they were wrapped by the nine nether flying sword and packed together in the qiankun bag.

The demonic qi on it was so strong that it almost became a substance, and it can only be purified in the future. The most urgent task now was to take advantage of the gap period when there are no beasts in the surrounding hundreds of miles, and refine the space connection point first.

Everything around was only discovered after Yang Chen collected the body of the ultimate demonized demon vine. He was shocked on the spot, and quickly guessed what happened.

This was a rare opportunity. If Yang Chen didn't hurry up, he would be noticed by the beasts farther away. Once they rushed over to seize the territory, a hundred Yang Chen would not be enough to resist. Even if it was thousands of miles away, the weakest beast was in the ninth grade human immortal realm, and it was definitely more than enough to kill Yang Chen in seconds.

After confirming the location of the spatial connection point, Yang Chen appeared beside the spatial connection point with a single escape.

This spatial connection point was about a square foot and the transformation of space can be felt next to it. The connection point was full of demonic qi, and in just a short while, the surrounding land was completely infested.

When there was the ultimate demonized demon vine, all the demonic qi was absorbed by the demonized demon vine first and then released. Now that there was no such barrier, the speed of emergence was even faster. Moreover, with this level of demonic qi, even Yang Chen had the urge to be emotionally detonated, and he almost couldn't control himself.

Under vigilance, Yang Chen had to take out all the demon orbs, including the largest demon orb that had just been put into the qiankun bag, and distribute them around the space point.

At the same time, several nested formation flags that had been prepared for a long time were also placed around by Yang Chen. They were refined by Yang Chen before setting off, and they used what was obtained from those old demons to be considered as cohesion. The formation of demonic qi, after adding a few reinforcement effects, was used to temporarily shield the demonic qi.

Immediately, Yang Chen saw the effect. Those demon orbs that had been purified by Yang Chen instantly turned black, and then began to actively absorb the demon orb. With the biggest one on top, the demonic qi still couldn't be vented immediately.

The formation also fully exerted its effect, quickly absorbing the demonic qi and gathering most of the demonic qi between the formation flags. For the time being, it looks like the scene before the ultimate demonized demon vine died.

Presumably this situation can be concealed for a while, but it was absolutely impossible to conceal it for a long time. Yang Chen knew the preciousness of time, so he resisted the discomfort of the demonic qi attack. He launched the refining method and began to refine it against the clock.

The size of this spatial connection point was much smaller than the entrance to the immortal executioner stage. Moreover, there was no need for virtual refining like in the dream world, so the natural speed was much faster than refining the entrance of the immortal executioner stage. Just because of the interference of demonic qi, Yang Chen's refining process was a little stumbling, and it was not smooth.

Fortunately, what Yang Chen needed was only preliminary refining. As long as he can establish contact with this spatial connection point anytime and anywhere in the future, the effect of further refining at any time will be good, no matter how rough the process was, after four months, Yang Chen still struggled to complete this initial step.

Although there were demon orbs that absorb and filter most of the demonic qi, but more demonic qi escaped, the situation here must have aroused the suspicion of the beasts around. It's just that based on the instinct of survival and the fear of the strong, those beasts have not dared to enter the central area. It's just that the form was already imminent and extremely dangerous.

As soon as the preliminary refining was completed, Yang Chen no longer had any worries, and quickly received all the demon orbs into the qiankun bag. He didn't even care to check if they had changed. The nine nether flying sword wrapped around him and he rushed towards the direction from which he came.

Yang Chen did not collect the formation flags, as they could last a little longer and give Yang Chen more chances to escape. However, without the absorption of the demon orbs, the demonic qi was too much, so when it was less than half a column of incense time, the formation flag could no longer be supported, the whole area exploded.

Almost at the moment when the formation flag exploded, the demonic qi spewed out, hundreds of times stronger. This was simply an explosion of demonic qi. As soon as the formation was broken, the demonic qi spread out at an astonishing speed.

The flags bought Yang Chen a little bit of time, Yang Chen's shuttle was only a small step faster. Just after rushing through thousands of miles away, the demonic qi swept in at a high speed, quickly surpassing Yang Chen.

The remaining beasts in the innermost circle have long noticed that there was an abnormality in the demonic qi, but there has never been such a drastic change as today. The explosion of demonic qi was like a signal. Those beasts no longer cared about multiplying their offspring. With a roar, they rushed towards the center where the demonic qi escaped.

All the beasts began to run wildly towards the central area, and no matter what was blocking the way, they were all crushed by the most savage method. Some demonized monsters that have just grown up were charging outward. When they encountered these beasts, they were all knocked into piles of meat sauce.

Yang Chen's flying shuttle didn't care about what was happening, and flew directly into the sky. Under the slightly thin demonic qi, no beast would give Yang Chen a second glance. Everyone just rushed to the center and left, giving Yang Chen a fluke escape.
