Chapter 731: : Second Danger Zone

After the sound and light lasted for a while, there was a sharp wind coming from that direction, mixed with a very dreadful aura in the wind, and it stopped after blowing continuously for half a stick of incense.

With the red light just now, when Yang Chen's family looked in the direction of the ancestral hall, the mountain was no longer visible. Although they had already left hundreds of miles away, theoretically, they should still be able to see some of such a high mountain, but looking at that side at this time, it seemed that there was nothing there.

Needless to say, everyone knew that there must be an accident in the Patriarch Hall, otherwise there would be no such movement. Just by looking at the sharp wind just now, one knew that the dozen or so cultivators were already in danger. Even Tao Junqi was deeply afraid of the aura in the wind, it was still hundreds of miles away, if she was put on the scene, what kind of horror would it be?

"Let's go!" Yang Chen raised his head and looked in that direction for a while, then said to the girls, and everyone started on the road one after another.

"Husband, how did you know that something would happen there?" It was still Sun Qingxue, with a curious expression on her face, even though everyone felt a little heavy after watching what just happened, she still asked unwillingly. In fact, all the girls have the same question, but they don't know how to ask it.

"If the Patriarch Hall of a sect is destroyed by someone, it means that the sect is really destroyed." Yang Chen shook his head, said these words, and then explained "Those people must have gone in, while we were so disciplined, I think that there must be some powerful restrictions in the Patriarch Hall, as long as the portrait of the Patriarch tablet is destroyed, it will be triggered."

Everyone understands the truth, but when they think that their family just came out of that place, all the girls felt a wave of fear. Fortunately, Yang Chen only said to put incense on those tablets and portraits, and did nothing else, otherwise, the ones who were wiped out by those restrictions would be their family.

Apart from fear, everyone was also a little excited. Going in the same way, when others go in, it triggers a seal, but when their family went in, they saw a secret map. This was the difference.

The big commotion over there was seen by almost everyone in the entire space, and they believe that a large number of people will gather there soon. Apart from the two guides who died there, there should be at least a few people who knew that it was one of the three great danger zones. If they thought about it again, they would easily guess that it was Yang Chen and the others. Even if Yang Chen didn't do that, it definitely has something to do with Yang Chen's family.

"Let's go to the next danger zone." Sooner or later someone would come to the door, and Yang Chen didn't hesitate, the shuttle immediately found the right direction and flew towards the second danger zone.

Yang Chen remembered that secret map, and it has been engraved on several pieces of jade slips. Gongsun Ling and the Murong sisters were studying one piece each. Now everyone has been able to confirm that it was an array, but they still don't know what kind of array it was, and further research is needed.

Along the way, Yang Chen covered the whereabouts of the flying shuttle with the jasper lamp from the sea, and flew towards the destination silently.

Sure enough, as Yang Chen expected, countless people were disturbed by the movement from the Patriarch Hall, and gathered in that direction. Just within a hundred feet of the shuttle, there were four along the way. This was still close, and there were countless figures in other directions.

The second danger zone was also a mountain, but relatively speaking, it can only be called a small mountain bag, and it cannot be compared with the big mountain in the Patriarch Hall. It was bare, there was nothing but stones.

The entrance of the danger zone was a doorway-like thing surrounded by two curved stones. The curved stones are like two brackets, one on each side, connected at the top and separated at the bottom, making the doorway look very weird. It was not like the architectural style of other places in this place.

There are few corpses near the entrance of this danger zone, but don't think that no one has died here. In fact, the number of deaths in this danger zone was definitely not lower than that of any danger zone.

The dead bodies were not seen because the dead bodies had disappeared without a trace, that's all. Otherwise, people would not collectively refer to this place and another place as the three great danger zones.

Standing outside this doorway, everyone felt a very awkward feeling. It seems that this place is not like a place with formations at all, there was no fluctuation of spiritual power, no traces of seals, and there was nothing surprising about the detection of spiritual awareness. Even the mountain bag seems to be solid, this place, will there be anything here?

Everyone was suspicious and puzzled, the doorway was not deep, and spiritual awareness could easily penetrate to the bottom, but the inside was also bare, with nothing. After the end, there was neither a passage, nor any camouflage such as formations. What was inside?

Everyone of the seven guides who consulted at that time mentioned this place. When everyone said this, they all said the same thing, basically the same as what Yang Chen and the others felt. It doesn't look like a place with anything at all, but as soon as anyone walks into the passage, they will disappear without a trace, and no one knows where they went.

What's even more strange is that the people who went in never came out, not only did they not come out from here, but also among the people who went out from Langya Well, they just disappeared, which was very puzzling.

Weird is weird, but there are more than one or two bold people. The more treacherous it is, the more it attracts people's attention. There will always be people that are not afraid of death and want to search themselves. After stepping in, they will disappear from then on.

Standing at the door, Yang Chen also felt a very strange feeling. However, he felt differently from the other women. He seemed to have experienced this feeling somewhere. It was so subtle that it was almost undetectable, but it was so familiar. If it wasn't for the fact that Yang Chen's spiritual awareness had already reached the tenth grade human Immortal realm, it would have been impossible to detect it.

"No way, it's that simple?" Yang Chen himself couldn't believe that he would have such good luck, he sighed in his heart, took the profound spirit furnace out of the merit ring, and held it in his hand. Suddenly, a burst of spiritual power rushed in, awakening the sleeping dragon spirit who had just become a weapon spirit.

“What’s the matter?” It didn’t know how many years it had been since it fell asleep comfortably with countless flames in its arms. It doesn’t have to worry about being backlashed by the eclipsing dragon fire, and it doesn’t have to worry about the spirit body dissipating. Long Ling’s sleep was really comfortable. Yang Chen disturbed his dream, which made Long Ling very dissatisfied.

However, this dissatisfaction didn’t last. In a blink of an eye, Long Ling regained his energy, and a pleasantly surprised voice came to Yang Chen’s mind through the profound spirit furnace “My dragon scale, have you found it?”

Chapter 732: : Dragon Scales

No one could have imagined that the two curved stones forming the doorway were actually two dragon scales. It is estimated that it fell during the battle, and then embedded in this small rock mountain, forming such a unique shape.

The battle at that time may have been very fierce. After the two dragon scales fell to the ground, they even melted the surrounding rocks, wrapping the dragon scales tightly, but the exposed part still retained such a magical arc, which made people mistakenly believe that here was a portal.

Of course, the dragon scale still carries some of the dragon scale’s original spirit-corroding dragon fire. This kind of fire is so silent that even Yang Chen, the great master of controlling fire, couldn’t find it in time, let alone other people.

This so-called doorway does not lead anywhere, just like the external manifestations that people use their spiritual awareness to detect. But once a cultivator approached the so-called door opening between the two dragon scales, his upper body would be silently burned by the spirit-eroding dragon fire, and the cultivator himself would not even notice when it was burnt.

Contaminated with the seventh-grade fire, and still under the unprepared situation, except for Yang Chen who can use the merit to use a lot of merit to save himself and collect the fire, when other people encounter it, there is only one dead end. No matter how powerful the fire attribute master is, they can’t escape this catastrophe, and they will die if they touch it.

The cultivators who go in will disappear, because they will be burned completely by the fire of the eclipsing spirit dragon. There is no weak water here to relieve the firepower and maintain the body, and the pure spirit corroding dragon fire will not leave people with the slightest dregs.

He don't know how many cultivators thought that this mysterious disappearance was transferred to another space through an unknown mysterious advanced formation, and no one thought of such a simple result. This also led to batch after batch of guys who entered the Langya Well and boarded the Langya Crystal Ship to start exploring the secrets of this so-called danger zone one after another.

After all, the dragon scales are just dragon scales, without the coordination of the dragon spirit, and without other physical supplements, all the spirit-eroding dragon fire is only concentrated in the most central part of the two dragon scales, and it cannot be felt from the outside at all. It was Yang Chen who had this keen sense and discovered this secret.

Here, Long Ling was excited that he had found his dragon scale, that it was hopeful to strengthen the profound spirit Furnace, and that he could survive the catastrophe, but Yang Chen was smiling wryly. The three great danger zones that deceive people, one is the Patriarch Hall, the other is basically two pieces of dragon scales from outside, who knows what kind of place the third is. Thanks to so many people who came in, none of them solved the secret.

But no matter what, if you find the dragon scale, you should be happy. Fortunately, no one in the past knew this secret, otherwise Yang Chen would not be able to take advantage of it now. As for the fact that two-thirds of the three great danger zones are quite deceiving, it was someone else who is deceived, and has nothing to do with Yang Chen. They can't blame anyone for their poor vision!

The girls looked at Yang Chen standing in front of the door with a wry smile, and even took out the Profound Spirit Furnace. Everyone was puzzled, and they were still worried that Yang Chen would go in desperately.

"Husband, what are you laughing at?" Shi Wushuang, who stood the closest, was also the most inexplicable, and asked in a timely manner.

"How many people I laugh at are fools!" Yang Chen replied, and then asked Long Ling in his heart: "How do I collect your dragon scales?"

“For others, it may be quite troublesome.” Long Ling quickly replied: “For you, it is very simple, just pick it up and put it in the profound spirit Furnace.”

Yang Chen was startled, then shook his head and smiled wryly. What Long Ling said was that for others, it is necessary to be afraid of the power of the erosion spirit dragon fire, but for Yang Chen, there was no need at all. The corroding spirit dragon fire was already a kind of fire in the profound spirit Furnace, and Yang Chen has the body protection of the merit so it can't hurt Yang Chen at all, so what do you care about? Yang Chen was also a fan of the authorities, that's why he asked this question.

Everyone was puzzled when they heard Yang Chen's words, who is the fool? Yang Chen didn't explain, he took a step forward, and punched heavily on the edge of the doorway.

The so-called door openings are nothing more than a layer of stones wrapped around the dragon scales. When Yang Chen smashed them, the stones shattered one after another, revealing the contents inside – two red flakes one finger thick.

“What is this?” The dragon scale has been there for a long time, and there was no trace of dragon aura, or there was no aura at all, it just keeps its shape. Shi Wushuang saw it in her eyes and asked in surprise.

“This is what we are looking for temporarily.” Yang Chen explained, and began to clean up the surrounding stones “Dragon scales.”

The girls were stunned for a while. This second danger zone was actually where the dragon scale was. The result simply made them speechless. Everyone had heard Yang Chen's previous narration, and quickly figured out why this place became a danger zone, and also understood what Yang Chen meant when he said that many people were fools, and all of them couldn't help but have wry smiles.

“You don't want to move, there is still the spirit-corroding dragon fire.” Yang Chen stopped everyone from helping, even Tao Junqi, who was a fire attribute cultivator. The corroding spirit dragon fire is quite powerful, even if Tao Junqi who is already at the peak Dacheng stage, without sufficient preparation, it was impossible to touch it without getting hurt.

In fact, even if Tao Junqi was fully prepared, it will be difficult to collect the spirit-corroding dragon fire, the seventh grade fire seed, it was not easy to collect as long as the cultivation base reaches the peak Dacheng stage, otherwise, the life source fire of countless cultivators should be seventh grade fire

seeds. As a matter of fact, there are very few people who can really collect the seventh-grade fire seed like the Pure Yang True Fire.

As Long Ling said, for Yang Chen, the collection process is very simple. After breaking apart the surrounding rocks with ease, two dragon scales with a radius of several feet appeared before everyone's eyes. The dragon scales are so big, one can imagine how huge Long Ling's body was when it was still there.

The profound spirit Furnace grew rapidly, and two dragon scales were directly thrown into it. Without Yang Chen's control, countless flames began to burst out around, burning the dragon scales.

For the next thing, there was no need for Yang Chen to intervene too much for the time being. He believe that Long Ling will do his best to manage the refining and fusion for the benefit of being able to survive the tribulation.

"This is the second danger zone?" When Gao Yue asked this sentence, all the girls felt absurd in their hearts. Just because of two places like this, the people who came in front died countless times to achieve the name of danger zone. But the truth is so simple, so absurd, so many people feel ashamed.

"This is the second danger zone." Yang Chen replied affirmatively, stretched out his hand to hold Gao Yue's hand and comforted her, "Others' danger zone is our blessing, that's all, don't think too much about it."

Chapter 733: : Critical Situation

When flying to the third danger zone, the women's words were obviously much less. Gongsun Ling and the Murong sisters were immersed in the jade slips and studied the formation diagram with great concentration, not caring about the external affairs at all. The rest were sitting with Yang Chen, enjoying Shi Shanshan's fragrant tea, and thinking about their own affairs.

"Actually, sometimes it's like this. Things are originally very simple, but many people make things complicated by themselves." Yang Chen waited until three cups of tea had passed before opening his mouth to gather everyone's attention.

“Langya Well was originally the location of a sect that was exterminated, and it can be said with certainty that it was exterminated by Long Ling at that time.” Yang Chen glanced at the several beautiful faces in front of him, and hugged Shi Shanshan who was closest to him. In his arms, after taking another sip of the fourth brewed tea from her hand, he continued: “The sudden massacre, how can anyone have time to arrange so many puzzles, some things, the simpler you think, the closer they are to the truth.”

All the girls nodded slightly, everyone was misled by the legend of Langya Well and the difficulty of boarding the Langya Crystal Ship, but forgot to analyze this most basic truth. In this way, those who died before and achieved the reputation of the danger zones, the death was really not worth it.

“The way is simple, especially when cultivating. Some things are not that complicated.” Yang Chen suddenly changed the topic to cultivation, and as he spoke, Yang Chen also turned his head to Tao Junqi: “Junqi, you don’t rely on alchemy to make a living, why do you have to learn from me and cultivate those small fire controlling techniques?”

Tao Junqi was taken aback, she didn’t expect Yang Chen to directly talk about herself. But after listening to Yang Chen’s words, Tao Junqi couldn’t help but start thinking.

“The direction of your cultivation before is not wrong, there is no need to learn from me.” Yang Chen’s words continued to penetrate into Tao Junqi’s ears, every word seemed to carry a magical power. Let her be immersed in it involuntarily: “You have somewhat forgotten the purpose of your cultivation.”

Influenced by Yang Chen these years, almost ninety-nine percent of the alchemists who knew the secret of Yang Chen’s alchemy began to learn how to cultivate fire like Yang Chen. Even among the fire cultivators who are not alchemists, almost half of them are imitating him, and Tao Junqi is one of them.

With Tao Junqi’s cultivation aptitude in the fire attribute and her current cultivation level, it is of course easy to practice the kind of fire control technique that even a person at the foundation stage like He Lian can practice perfectly. During the cultivation, Tao Junqi also deeply learned some principles of fire control, her ability to resist the fire has gone a step further.

It’s just that in Yang Chen’s view, there is nothing wrong with Tao Junqi’s study of fire control techniques, but it is a bit of a waste of time to keep studying in depth. The foundation of cultivation is still the origin of the Dao, not some small trick. Some things, when the state has been reached, will naturally be understood.

Just like junior high school students learning parabolic functions, it takes a long time to derive the formula for the maximum or minimum value, and finally memorize this formula by rote, and apply it flexibly. But after learning calculus, it is only a simple calculation of the extreme value, and the calculation only needs one step, and there is not much difficulty. When you reach the realm, you will naturally understand, the reason is the same.

Tao Junqi has just entered the peak Dacheng stage from the late Dacheng stage. She was still in the stage of consolidating her cultivation base, but recently she has forgotten that her cultivation is to improve her realm and ascend through tribulations, not to hone her ability to resist fire. Any cultivation should work towards that general direction, and should not be entangled in a certain small area.

As Yang Chen said. Tao Junqi doesn't rely on alchemy to earn a living, so there is really no need to be entangled in that delicate technique of controlling fire at this time. She should carry on with her own style, this is the right way to cultivate indomitably.

Cultivation should be very simple, but Tao Junqi made it complicated, so this happened. Taking this opportunity, Yang Chen stopped by and woke up Tao Junqi. She is his own concubine, so he can't just watch her cultivation deviate.

The matter of the two danger zones is just a good time. Simple things are complicated by people, resulting in the three danger zones. Now that the danger zones have been cracked one by one, everyone knows that the truth is so simple. Tao Junqi is also an intelligent person, and immediately realized her previous problems.

"Thank you, husband!" Tao Junqi stood up, and respectfully gave a bow to Yang Chen. If Yang Chen hadn't woken her up in time, she might have been confused for a long time before she could find her original path. This time, at least she saved decades of cultivation time.

After saluting to Yang Chen, Tao Junqi spoke again: "Husband, all senior sisters and junior sisters, Junqi has realized something and needs to retreat for a while, please help take care of husband in my absence."

The other girls congratulated Tao Junqi for a while, she believed that when she finished her retreat, it would be the time when her peak Dacheng stage would be firmly consolidated. This was a great event and certainly deserves congratulations.

Without further ado, Yang Chen handed over a bottle of pills, and then took Tao Junqi into the Dragon Palace. There is plenty of spiritual power there, and no one will disturb her, it was the best place for retreat.

After the peak Dacheng stage is consolidated, in fact, there is only a thin line between the ascension from the tribulation. The difference is only a certain opportunity or a certain epiphany, which can trigger the tribulation. With Yang Chen here, are they afraid that such an opportunity will not appear?

It can be said that it is a certainty that Tao Junqi will survive the tribulation in a short period of time, and there will never be any mistakes. It is estimated that Yang Chen's family will stay in Langya Well for at least a hundred years. Either Tao Junqi will survive the tribulation in Langya Well, or immediately after going out. Anyway, there are some things that Tao Junqi is destined not to see or experience.

This is Yang Chen's protection of Tao Junqi, and it also avoids Tao Junqi's dilemma when she faces the sect and righteousness. The Greatest Heaven Sect in the mortal world is doomed to be destroyed, and Yang Chen doesn't want Tao Junqi to see this scene with her own eyes, let alone experience it personally.

The third danger zone was just ahead, and when they reached the destination, Yang Chen put away the shuttle and put the girls down. Everyone began to observe the third danger zone carefully.

They don't know if this last danger zone is as simple as the first two but artificially complicated, and they don't know if there is the pure yin true fire that Yang Chen is looking for, everything can only wait until everyone cracks this danger zone, they will talk about the secret later.

There is indeed a formation here, very obvious, it seems that the formation is very sharp, and there are many dead bodies. Yang Chen's family was very cautious, standing outside and watching carefully.

"Isn't this the formation map of the Patriarch Hall?" Gongsun Ling said suddenly after looking at it for a while.

Chapter 734: : Refining The Dragon Scales

Surprises always come inadvertently. At first, Yang Chen only thought that the third danger zone was a simple place complicated by others, but now it seems that it was far from that.

This place, which is heavily protected by a powerful formation, is the real treasure of that ancient sect, otherwise its formation map would not appear in the Patriarch Hall, existing in such an unimaginable way.

In any case, it is always exciting to find such a hidden treasure and Yang Chen had a premonition that the pure yin true fire he wanted to find might be preserved in this danger zone.

The formation map was recognized, but it was not a matter of a day or two to figure out the principle of the formation. This kind of ancient array diagram differs from the current knowledge system by tens of thousands of years or even longer. If you want to interpret it in detail, it will take a lot of time for Gongsun Ling and the Murong sisters.

The last danger zone formation was definitely a powerful formation, which can be seen from the corpses all over the area inside the formation. It's still not completely rotten, and some of the fresh ones can be seen through the light released by Yang Chen and the others.

They are all non-believers, and they always feel that they are destined to belong to them, their fortunes are overwhelming, gods and ghosts are changed, and all good things deserve to be obtained by themselves. If these people hadn't had such thoughts, how could they still rush in after discovering that there was a corpse as a warning?

Money touches people's hearts, which is usually said for secular people, but after seeing so many corpses, it seems that it should also work for cultivators.

Now that it is determined that the formation of this formation is the pattern formed by the smoke in the Patriarch hall, there was no need for Yang Chen's family to stay at the door of this danger zone to actively attract the attention of others. If they want to study the array, there are some hidden places.

The movement at the Patriarch Hall attracted most people to rush over to see what happened. They believe that the disappearance of the second danger zone will soon be seen by people. The guides who Yang Chen was asking for directions at that time must have thought of Yang Chen, and it is very likely that they will come to the third danger zone to sit and wait.

Everyone only saw the explosion in the Patriarchal Hall, but they didn't know that Yang Chen's family got nothing but a formation, and they didn't know that there were probably a dozen or so guys who came in to look for the treasure. The only thing that came to mind was that Yang Chen's family might have gotten some mouth-watering goodies from the Patriarch Hall and the second danger zone.

"Alright!" Yang Chen said inexplicably after wanting to understand the situation.

Yang Chen's words were heard in the ears of all the girls, making them look at him very strangely. Yang Chen smiled, and expressed his thoughts, but the girls were still at a loss. Why is this the case? Would it be good if Yang Chen would say it?

"A'Yue, A'Ling, Shanshan and Little Xue have both gone to the Demon Continent to cultivate. You guys didn't have this opportunity, and you lacked some opportunities to deal with crazy killings." Yang Chen explained with a smile: "Now is a good opportunity. We are the target of the public, everyone wants to get some benefits from us, and it happens to let you guys get some exercise."

"Is that ok?" When they heard that he wanted to use all the other people here as imaginary enemies, Shi Wushuang and the Murong sisters were born in a great sect, and they belonged to that kind of righteous sect, so those who used killing to hone themselves were obviously somewhat repulsive to them.

"If they don't look for us, we won't do it, right?" Yang Chen dispelled all the girls' concerns with one sentence: "There is nothing in the world, and nothing is disturbing. If they are not deceived by greed, we won't either. The reason for the action is all decided by them, and no one is forcing them. It is up to them to decide whether to live or die."

Although the mouth said so, but before deciphering the map, Yang Chen still didn't want to carry out some meaningless killings. He just asked Gongsun Ling to find a relatively hidden corner, opened up the geographical map of mountains and rivers, and took everyone in.

The geographical map of mountains and rivers is absolutely safe at this stage. Even if someone rushed in, they would definitely not be an opponent of hundreds of Dacheng stage masters in the geographical map of mountains and rivers. Besides, as long as they rush in, everything is not up to them, it is up to Gongsun Ling to decide.

Gongsun Ling and Murong sisters are interpreting the formation diagram, while the others were cultivating respectively. In addition to paying attention to the matter of refining the core of the Demon Continent that he has been carrying out, Yang Chen has been paying attention, he was just waiting for the profound spirit Furnace to refine and fuse those dragon scales. Yang Chen didn't need to do it himself, as long as he continued to input spiritual power, the dragon would naturally control the appropriate flames for refining.

The dragon scales have been placed for an unknown number of years, and there is not much spiritual power left in them except for a little pitting spirit dragon fire that can continue to burn with the supplements of those cultivators. This refining process saved a lot of effort.

In addition, the dragon scale was originally a part of the body of the dragon spirit who is now the tool spirit of the profound spirit Furnace, so there is no question of whether it fits or not. The dragon scales began to soften slowly, turning into red flesh.

It was so smooth, thanks to the various types of fire in the profound spirit Furnace. Although there is only one kind of the seventh grade fire seed, and only two kinds of the sixth grade fire seeds, the kind of fire below the sixth grade covers almost all the flames in the mortal world, and the fire dragon can find almost any flame they want to use.

Under Yang Chen's control, the melted dragon scales slowly merged into the furnace body of the profound spirit Furnace. The body of the furnace, which had been supplemented with a lot of cyan crystal and black gold and looked a bit blue, began to slowly turn into lavender, and the style also changed a little. The dragon pattern was lifelike, as if it will burst out of the furnace in the next moment.

This change was just the beginning. The moment the profound spirit Furnace re-formed, Yang Chen felt a strong suction from the profound spirit Furnace, grabbing the spiritual power from his body crazily. In a short while, the true essences in Yang Chen's body were almost completely absorbed.

Yang Chen had already prepared for it. To survive the tribulation, the dragon spirit must need a lot of spiritual power. The several true essence spiritual liquids in the gourd have already been prepared enough. Finding something different, Yang Chen immediately took out the gourd and began to absorb it crazily.

The Great Yin-Yang Five Elements secret art showed enough strength at this time. It can transform the five elements anytime and anywhere, convert other spiritual power into fire-attribute spiritual power, and at the same time supplement from the outside at all times, and control the absorption speed of the dragon spirit. It was before the profound spirit Furnace drained its fire-attributed spiritual power, it maintained its uninterrupted supply of spiritual power.

“It’s actually the true essence spiritual power, that’s great!” Long Ling also noticed the difference in the spiritual power he had absorbed, and after making a joyful cry, he began to absorb it vigorously.

Chapter 735: : Tribulation Of The Profound Spirit Furnace

Yang Chen still underestimated the kind of spiritual power a dragon spirit needs to survive the tribulation. Fortunately, the various true essence spiritual powers in the gourd were sufficient, so Yang Chen was not sucked dry by that damn dragon spirit.

But even so, it took Yang Chen almost a few months before he finally realized that the profound spirit Furnace was no longer absorbing his spiritual power. After letting go of the furnace, the profound spirit Furnace automatically hung in the air and began to grow slowly, almost reaching the limit, and then stopped.

At this moment, the profound spirit Furnace was almost the size of a small room. After incorporating the dragon scales, it seems to have grown a lot in size. The lavender furnace body rotated slowly in the air, and strands of flames burst out from time to time, which looked very mysterious.

“A Ling, send us out, the profound spirit Furnace is going to face its tribulation.” Yang Chen gave Gongsun Ling an order, and then took his medicine garden in his hand.

In the blink of an eye, Yang Chen realized that he seemed to have changed places. Yang Chen knew that this was returning to the real world from the geographical map of mountains and rivers. Among the people present, perhaps only Yang Chen and Gongsun Ling could feel this change, the others, even Gao Yue, Shi Shanshan and Sun Qingxue who had reached the second grade human Immortal realm could not detect it.

“The profound spirit Furnace is going to face a tribulation?” All the girls who heard this were a little surprised. They had only heard that some legendary magic weapons would survive the tribulation, but they had never imagined that it would happen in front of their own eyes. Everyone cheered up and waited for the miracle to happen.

“A Ling, protect everyone.” After Yang Chen told Gongsun Ling, he temporarily stopped caring about his wives and concubines. Right now the magic weapon was important, he would explain everything later.

“AZhu and Abi, you should take a look at the artifact spirit of the profound spirit Furnace.” The purpose of Yang Chen taking out the medicine garden bottle is to allow A’Zhu and Abi to observe the dragon spirit’s actions, they were all summoned.

The girls were once again surprised to see the phantoms of the two young girls appearing beside Yang Chen, standing quietly waiting to watch the scene of the dragon spirit passing through the tribulation. These two girls have never been seen by others, even by Gao Yue, as for where they came from, no one knows. It’s just that this time is really not the time to care about this, and the girls were also suppressing their curiosity. They wanted to wait for the profound spirit Furnace to pass the tribulation first.

The tribulation cloud began to condense, but in this dark space, no one could see this scene at all. But the aura of the tribulation could not be hidden from others, and everyone looked in this direction suspiciously. There was a shockingly powerful aura that began to condense.

Click, click, the thick thunder light mercilessly struck the profound spirit Furnace, and the thunder light illuminated the surrounding environment brightly. People from far away saw this scene and realized that someone was going through the tribulation. It’s just strange that the people who came in were all masters of the Yuanying and Dacheng stage so how could anyone face the thunder tribulation?

That’s right, some master must have brought in the juniors at the peak Jiedan stage, and it was time for a breakthrough, so it triggered a tribulation. Everyone thought of this in their hearts, and they felt relieved for a while, this was not worth much attention.

The only thing that was a little bit different from the normal tribulation is that the thunder was very thick, almost comparable to that of Yang Chen when he was going through the tribulation back then. It’s a pity that no matter how against the heavens, the thunder tribulation was nothing more than thunder tribulation. It still can’t make many Yuanying and Dacheng stage masters bother.

Yang Chen's heart was clear, the profound spirit Furnace was like the heaven seizing pill to overcome the tribulation, starting with the thunder tribulation, and then going through the Yin fire tribulation and the raging wind tribulation step by step.

The furnace body of the profound spirit Furnace shone extremely brightly in the thunder light, and at the same time, everyone could clearly see that the furnace body became smaller after being baptized by each thunder light. Everyone understands that this is the same as a cultivator going through a tribulation and tempering his body through the tribulation.

After a while, the nine frenzied thunder tribulations ended, and the clouds of thunder tribulation dispersed, and then, the tribulation clouds of Yin fire tribulation began to condense.

Everyone in the space was surprised to find that the tribulation cloud of Yin fire tribulation had appeared, someone was about to go through the Yin fire tribulation. This time, it's not that no one cares, at least half of the people started to pay attention to this direction, and the ones who were close had already started to rush towards this direction.

No matter what, it can't stop the fall of Yin fire tribulation, the profound spirit Furnace began the baptism of Yin fire tribulation amidst the cheerful dragon chant of Long Ling. For the time being, only Yang Chen can hear Long Ling's voice, it's a pity that he can't share it with the people around him so that they can hear it too.

On the contrary, A'Zhu and A'bi have been by Yang Chen's side, staring intently at the scene of Long Ling's salvation, frantically absorbing experience. Today's Long Ling is the future of them, so they can't help but be tempted.

Before Yang Chen found the Blood Demon Vine, or even the First Wood Spiritual Liquid and the Second Wood Spiritual Liquid, A'Zhu and Abi would not be able to reach the realm of transcending the tribulation at all. At best, they are at the level of the Yuanying stage, and they cannot attract the tribulation at all. This was why the owner of the medicine garden left them in the mortal world in the end.

If a weapon spirit cannot grow together with the owner, then bringing it to the spirit world is also a disaster for the weapon spirit, and it is better to have a magic weapon without the weapon spirit. At that time, the owner of the medicine garden was greedy for the convenience of weapon spirit to take care of the medicinal herbs, so he refined the two girls into weapon spirits, but in the end he could only leave the medicine garden in the mortal world, which made Yang Chen get it cheaply.

With the irrigation of a large amount of First Wood Spiritual Liquid and Second Wood Spiritual Liquid, plus the fusion of the Blood Demon Vine, Demonized Demon Vine and Immortal Peach Tree, A'Zhu and Abi finally grew to the point where they could survive the tribulation. It's just that the two of them don't have a clear understanding of their own realm like Long Ling, knowing that they should survive the tribulation, so the two women have always been in chaos.

Yang Chen himself also ignored this issue, and it wasn't until Long Ling proposed to go through the tribulation that Yang Chen realized that A'Zhu and Abi were probably on the verge of going through the tribulation. It just so happened that Long Ling's passing the tribulation could give them both a living demonstration, such an opportunity was simply a gift from heaven.

Under the close observation of Yang Chen's family, under the concentrated experience of A'Zhu and A'bi, and under the bewildered attention of countless people around, the Yin fire tribulation started quietly.

The profound spirit Furnace was originally a magic weapon of the fire attribute. It was fused with cyan crystal black gold, fused with dragon scales, and all of them are materials of the fire attribute. In addition, it has absorbed thousands kinds of fire seeds, for the profound spirit Furnace, it was simply a great tonic.

Relying on the control of the dragon spirit, at the beginning of each yin fire tribulation, the profound spirit Furnace will use the power of the yin fire to temper itself, and at the same time quietly absorb a ray of yin fire, it absorbed nine wisps of subtle yin fire.

Chapter 736: : Tribulations Completed

Everything was controlled by the artifact spirit of the profound spirit Furnace. Yang Chen doesn't know what happened during the tribulation. He only knows that the profound spirit Furnace has successfully passed the Yin fire tribulation and is preparing for the arrival of the next tribulation.

The aura in the sky was already very obvious, the raging wind tribulation is not comparable to the thunder tribulation and the Yin fire tribulation. In this space of tens of thousands of miles, even if you hide in the deepest hole, others can still clearly feel the aura of the tribulation.

Every cultivator who has successfully ascended through the tribulation can be known by many people because of the wide range of influence of the raging wind tribulation. But now, countless people have rushed to the vicinity, and saw all this through the continuous flashing thunder in the sky.

No one dared to use their spiritual awareness to investigate at this time, because they felt uncomfortable, and if their spiritual awareness invaded the range of the master's tribulation, which was an active provocation of the heavenly tribulation, and they would definitely be affected. Everyone can only be the first to witness this grand occasion with a little bit of flickering light outside the safe range.

Today is destined to be a day that countless people will remember forever. Under the witness of at least hundreds of people, a lavender alchemy furnace, which is about ten meters high, floats in the air and begins its process of overcoming the tribulation. The wind blowing through it one after another made its body shrink and condense again and again, and finally turned into a pill furnace more than one foot high.

The raging wind tribulation dissipated, but the lavender pill furnace slowly fell into the hands of Yang Chen not far away. This scene fell into the eyes of all those who watched the tribulation.

“what is that?”

“My God! No way! A magic weapon has overcome the tribulation”

“The alchemy furnace passed the tribulation, how is it possible?”

... The masters who witnessed all this could hardly believe their eyes. No one dared to make a sound when the profound spirit Furnace passed the tribulation. After the tribulation was over, all kinds of startled questions were involuntarily heard from the mouths of the crowd.

If weren't for the people around all talking like this, so many masters would have doubted whether everyone had fallen into the illusion collectively, otherwise how could it be possible to see that legendary scene?

The magic weapon survives the tribulation, this kind of scene that only exists in legends, actually happened in front of their own eyes. They can't blame everyone for being surprised. This scene, whether it's the people watching the ceremony or what happened, was really an example of rare and strange things.

No wonder it took a while to feel the tribulation of thunder, yin fire, and raging wind. It turned out to be a magic weapon that faced the tribulation, the previous weirdness was immediately explained.

This trip to Langya Well was definitely not in vain, even if they didn't get anything, just being able to see this scene was already a worthwhile trip. When they return to the outside in the future, this experience will definitely be a proud experience that countless people will follow.

After the amazement, many people had another thought. How good would it be if the alchemy furnace that passed the tribulation was their own? As soon as this idea popped up, countless people couldn't control their thoughts and their eyes turned blood red.

What kind of concept is the magic weapon that passed the tribulation? It is not an exaggeration to describe it as earth-shattering. Such a magic weapon is at the top in the mortal world and cannot be improved. Even if it is placed in the spirit world and the Immortal world, it is probably the treasure that countless masters dream of.

What is everyone coming to Langya Well for? After all, isn't it just to get rich, to find the treasure buried deep in the legendary Langya Well? However, what kind of treasure can be compared with the magic weapon that everyone has seen with their own eyes?

Some people recognized Yang Chen's identity, but in this dark environment, even with using their spiritual awareness to investigate, there were still more people who did not recognize Yang Chen. Everyone only knows that someone has obtained the magic weapon after the tribulation. This kind of magic weapon should be lived by the virtuous, and that is enough.

What is a virtuous person? In the world of cultivators, people who have not only cultivated to a high level are also virtuous. Everyone began to have their own thoughts, thinking about how to find the owner of the magic weapon, and snatch the pill furnace that passed the tribulation in their hands.

Those who recognized Yang Chen's identity were also tempted. What is Yang Chen most famous for these years? Isn't he having the identity of a fifth-rank alchemist? That alchemy furnace belonged to Yang Chen. With such a powerful alchemy furnace, it was not impossible to say that Yang Chen became a fifth-rank alchemy master because of this magical alchemy furnace.

Not everyone is qualified to know the cultivation secrets of the fifth-grade alchemist that Yang Chen sold. Of those sects who bought at a high price, which ones were not carefully hidden, and then secretly cultivated the most core disciples of their own sect? Those who entered Langya Well to try their luck, how could they have the opportunity to know this.

What ignorance brings is more guesses. The cultivators who have witnessed the alchemy furnace have turned their guesses to an explanation that they think is the most reasonable. An alchemy furnace that can survive the tribulation, doesn't that explain everything?

While outsiders were using their brains, Yang Chen didn't care at all. Holding the profound spirit Furnace after crossing the tribulation, Yang Chen has already fallen into ecstasy. This is still his first magic weapon to pass the tribulation, this alone is enough to make Yang Chen uncontrollably happy. If you don't study it immediately when you get it, when will you wait for?

Both A'Zhu and A'bi have been sent back to the medicine garden in time, and he believes that after witnessing the extinction of the profound spirit Furnace, they will definitely understand something. At this time, he let them absorb and digest what they saw.

All the girls were equally happy, but seeing Yang Chen's overjoyed appearance, no one disturbed him. Even Gao Yue, who wanted to know the identities of A'Zhu and A'bi just now, stood aside, looked at Yang Chen with a smile, and waited for Yang Chen to wake up from that state.

Yang Chen couldn't care about other things anymore, the first thing he did after getting the pill furnace was to use his spiritual awareness to check what happened to the pill furnace. As soon as the spiritual awareness penetrated into the profound spirit Furnace, it was connected with Long Ling's spiritual awareness.

After experiencing the baptism of the heavenly tribulation, and with the profound spirit Furnace as his body, Long Ling's state is many times better than before, and he is no longer that weak. As soon as he came into contact with Yang Chen's spiritual awareness, Long Ling released a powerful aura, at least at the level of a fourth grade human Immortal realm, mixed with an invisible power in the aura, as if he wanted to give Yang Chen a blow.

This level of coercion still can't make Yang Chen feel anything. Yang Chen just accepted the coercion from Long Ling as if nothing had happened, and then began to explore the changes in the profound spirit Furnace.

Yang Chen's performance made Long Ling feel a little bit shocked. He thought that after going through the tribulation, he would be able to suppress Yang Chen and take revenge on him for threatening me with the sky, but he didn't expect that it was all useless.

"You're lucky to have the dragon yuan body protection." After realizing that he couldn't do anything to Yang Chen, Long Ling could only murmur helplessly.

Chapter 737: : Your Husband Craftsmanship Is Good

Yang Chen just smiled and didn't intend to argue with Long Ling. Anyway, Long Ling has already promised him to be the tool spirit of his profound spirit Furnace before he finds a body to occupy. This small vent of dissatisfaction can be completely ignored, as long as he does his best to make alchemy for him during the period of being the tool spirit.

Because of the addition of dragon scales in the material, the biggest change is that the profound spirit Furnace seems to have life and feeling, and every part of the furnace body has a feeling of a living body. When the medicinal materials entered the profound spirit Furnace, it was as if Yang Chen's hand was caressing them. At the same time, there seemed to be an indescribable visual change. When the medicinal liquid changed during alchemy, it would be more vividly and clearly conveyed to Yang Chen.

The profound spirit Furnace also seems to be easier to control. Especially with so many kinds of fire seeds, Long Ling arranged them together in a more efficient way, making it more convenient to use.

This change alone can greatly improve the efficiency of alchemy for Yang Chen. In the past, it took a year to refine a successful pill, but now it may only take eleven months to complete. Of course, this is purely Yang Chen's own estimation. If he wants to know how long it will really take, he still needs to master it in actual alchemy.

Another most powerful change is to increase the level of pills. Yang Chen knew before that the profound spirit Furnace can increase the level of pills. Ordinary pills, as long as they are refined in the profound spirit Furnace, can automatically increase their grade. For a long time, Yang Chen has only produced second-grade pills, it is because of this reason.

In the past, the upgrade level was limited to ordinary pills, and the difficult pills like the questioning inner heart pills could only be raised by half a level at most. However, now Yang Chen can clearly know that no matter what kind of pill it is, the profound spirit Furnace can upgrade it by a level. Even if the heaven seizing pill arrives in the profound spirit Furnace, the second-grade heaven seizing pill will come out directly.

This was a remarkable change, and it also means that Yang Chen can take out a fourth or fifth grade pill at any time and anywhere. You must know that in the past refining of the questioning inner heart pills, Yang Chen could only get the second grade at most, and the third grade might be barely enough, but the fourth grade is definitely not sure.

The second-grade questioning inner heart pills has already attracted countless people, one can imagine what kind of madness it would be if the fourth-grade or fifth-grade questioning inner heart pills was born. Those cultivators who have enough cultivation but lack confidence may not need to spend any pills or hide in the demon-sealing formation to cultivate. A fourth grade questioning inner heart pill will absolutely guarantee ascension.

Everything was estimated by Yang Chen. Now that the alchemy furnace is in his hand, how could Yang Chen hold back, he immediately told his wives and concubines "A'Ling, protect me, I want to make alchemy!" Then he said nothing, directly entered the geographical map of mountains and rivers and started the alchemy.

None of the girls would interfere with Yang Chen at this time, they even wanted to know more than Yang Chen what happened after the profound spirit Furnace survived the tribulation. Yang Chen was about to make alchemy, and he was also about to test it. The girls immediately became busy, followed Yang Chen into the mountains and rivers, and began to protect the surroundings.

Of course, he had to refine the highest-grade elixirs. Yang Chen directly found a large pile of elixirs hundreds of thousands of years old from the third layer of the medicine garden space, all of which were the medicinal materials needed for the questioning inner heart pills. After careful refining, Yang Chen began to throw these elixirs into the profound spirit Furnace one by one.

Soon Yang Chen discovered that it was unnecessary for him to refine it outside in advance. After the profound spirit Furnace has the tool spirit, it will automatically refine the medicinal materials. Because of the aura of dragon scales and dragon essence, the refined medicinal materials are more effective than Yang Chen doing it himself. After more refining outside, it will be a little bit better.

Immersed in alchemy, Yang Chen had already forgotten the passage of time. All he knew was that he had easily completed the first round of refining the questioning inner heart pills, and then completed the second round of refining relatively easily, and completed the third round of refining with confidence, completely sure of success.

Even so, under Yang Chen's careful control, with Long Ling's cooperation, and Yang Chen's spiritual awareness, after several mistakes that could not be regarded as accidents in the fourth grade refining process, finally, there was no surprise.

Next, Yang Chen didn't continue, it would be a waste of things to continue refining at the fifth grade. The elixir of hundreds of thousands of years was not chinese cabbage, it can't be wasted casually.

He shut down the furnace, collected the alchemy, Yang Chen used a series of skillful techniques to draw a perfect end to this experiment of alchemy. With one batch of materials, a total of 66 questioning inner heart pills were successfully refined.

There was such a good thing as the nourishing medicine gourd, the pills refined by Yang Chen must be put in it. After collecting the pills, Yang Chen picked up one in his hand and began to observe carefully.

The round pill has a smooth and round appearance, like a delicate jade surface. On the white pill, five slender and clear dragon-shaped pill patterns were evenly distributed, and the five dragon heads converge at a certain position of the pill, leaving a small white circular area, like five dragons playing with beads, the scene added a beauty to the pill.

"It's so beautiful!" Sun Qingxue's admiration came from the side, Yang Chen didn't even think about it, he turned around and stuffed the pill into Sun Qingxue's hands. Then he looked at the smiling wives and concubines around him, one for each, and no one was left behind. Except for Tao Junqi who was still in retreat, everyone has one.

“What kind of pill is this?” The medicinal energy was perfectly locked in the pill, and no one has seen this kind of dragon pattern pill, so no one knows what kind of pill it is. On behalf of everyone, Gao Yue asked directly. While asking, she placed the pill in front of her eyes and observed it carefully.

“Fifth grade questioning inner heart pills, your husband’s craftsmanship is not bad!” Yang Chen looked at the joyful looks of the girls, and replied joyfully in his heart. Refining at the fourth, what you get is a fifth grade pill, even for the questioning inner heart pills, Yang Chen couldn’t help being unhappy.

Murong Yan, who was appreciating the beauty of the pill, almost trembled and threw the pill in her hand, and the other girls were not much better, they were all startled, and then clenched their hands involuntarily. Fortunately, everyone responded in a timely manner, otherwise the pills would definitely be crushed.

The questioning inner heart pill is already a monstrosity, and everyone usually takes the second-grade questioning inner heart pill for ordinary retreat and cultivation, which makes people feel that they are really reckless. Now they suddenly held a fifth-grade questioning inner heart pill in their hands, even if their mood is as stable as Gao Yue and Shi Shanshan, they can’t help but feel agitated in their hearts.

After being excited, all the girls reacted in the same way. They cautiously put the pill, which can be said to be the most precious in the world, into their best jade bottle, and carefully put it in the qiankun bag and looked at their husband.

Chapter 738: : Entering The Medicinal Garden

“Who were those two girls beside you when the alchemy furnace passed the tribulation?” Just as Yang Chen was waiting for the girls to praise him with admiration, Gao Yue’s question almost made Yang Chen laugh bitterly. Without him, the tone of his master and wife is full of an indescribable taste.

“Are you talking about them?” Yang Chen’s heart moved, and he called A’Zhu and A’bi out again. Yang Chen didn’t calculate how long he had been refining alchemy, the two women had already completed the process of absorbing the experience of the profound spirit Furnace.

As soon as the two women appeared, they were faced with some unkind eyes from the wives and concubines. Yang Chen is now considered a veteran of the flowers, so of course he understands what

this gaze means. Gao Yue's gaze was especially unkind, not only towards A'Zhu and A'bi, but also towards Shi Wushuang and the Murong sisters. You know, Gao Yueke told them a long time ago that she was not optimistic about their husband, and as a result, two young women appeared beside Yang Chen inexplicably.

"Greetings mistress!" A'Zhu and A'bi already knew Gao Yue and the others' identities, so of course they bowed without thinking. The address of the mistress made Gao Yue and all the girls looked at each other, and looked at Yang Chen suspiciously.

"Follow me!" Yang Chen waved his hand and brought all the girls into the medicine garden.

Everyone knows that Yang Chen has a medicine garden, but no one has ever entered it. As soon as the girls came in, they saw the densely packed profound Yang fruit field, where hundreds of thousands of thousand-year-old profound Yang fruits were nakedly presented in front of the girls.

Accustomed to seeing a lot of wealth appearing in front of them, the girls were not surprised by such a scene. But seeing Yang Chen casually picked one, peeled it open, and ate one like a piece of fruit, they still had a very weird feeling.

There were rare medicinal materials that can be sold for a lot of money outside here. This posture, this scene, and the large ginseng field not far away, where is it ginseng? It was clearly a "crop".

"Don't look at me, everyone have some for yourself!" Yang Chen smiled at everyone, waved his hand and said, "profound Yang fruit is still delicious after peeling, remember!"

"Don't try to change the subject." Gao Yue had already eaten many profound Yang fruits, she was not surprised at all, and kept staring at the question at hand.

"Here, that's their real bodies." Yang Chen pointed at the backs of the girls, all the girls turned their heads, and then saw a huge peach tree and a lush vine.

"A'Zhu and A'Bi are the tool spirits of my medicine garden." Following Yang Chen's words, the peach tree turned into A'Zhu, the rattan turned into A'Bi, and the two girls once again stood in front of the girls.

After knowing the identities of A'Zhu and A'bi, when the girls looked at them again, there was a lot of sympathy in their eyes. Even if they are monsters, it is not something to be happy to know that they were refined into tool spirits by living people.

They looked at A'Zhu and Abi with sympathetic eyes, and when they turned to look at Yang Chen, there was a little more blame in the eyes of the girls. This method of refining living beings into tool spirits can be said to be harmful to nature, and it does not succeed every time. It is unknown how many lives it would take to complete every magic weapon with a spirit, and it is not taken by lightly by dao cultivators.

It's just that Yang Chen is the husband of all the girls, and they can't directly blame him, they can only use this kind of gaze to express their attitude.

"When I got the medicine garden, they were already tool spirits." Yang Chen shook his head and explained. In fact, he doesn't like this method either. If the spirit is not voluntary, even if it becomes a spirit, it will not be of much help to the master, so it is better not to have one.

It was because Long Ling reached an agreement with Yang Chen and voluntarily became a tool spirit, that's why the profound spirit Furnace survived the tribulation. A'Zhu and Abi probably refused to cooperate with their original masters at that time, so they were abandoned in the mortal world. Fortunately, Yang Chen provided them with blood demon vines and Immortal peach trees, allowing them to merge and advance proudly, and also won the approval of the two women, so they truly recognized him as their master.

After understanding this reason, the girls no longer looked at Yang Chen that way. At the same time, they also understood why Yang Chen would let A'zhu and Abi appear to observe the ceremony when the profound spirit Furnace was going through the tribulation. It was clearly to prepare for the medicine garden to also go through the tribulation.

Now that they has entered the medicine garden, it is of course necessary to take a closer look and find out about their family background. Yang Chen didn't mind either, and let them observe at will. Soon, except for Gao Yue and Gongsun Ling, the other girls were attracted by the dozens of thunder pomegranate trees that were thousands of years old.

“Is this Thunder Pomegranate?” Shi Wushuang couldn’t help asking, looking at the pomegranate fruits on the tree that were bigger than a human head.

In fact, she just couldn’t believe it. How could such a well-informed expert fail to recognize Thunder Pomegranate? It’s just that everyone has never heard of anyone who has successfully grown thunder pomegranates, and seeing this scene before them, they couldn’t help being a little surprised. Back then, Yang Chen’s jokes on the ladder could not have been widely spread. After so many years, who would have noticed what a little guy in the Qi refining period said at that time?

There are so many thunder pomegranates, each of which is enough to help a cultivator at the peak Jiedan stage to survive the tribulation. Based on this calculation, if Yang Chen was willing to take out all these thunder pomegranates, he will definitely be able to help the Pure Yang Palace in a short time to create a large number of Yuanying stage masters.

The girls don’t need Thunder Pomegranate, so they didn’t pay attention to these on normally. No one would know that in the past few hundred years, almost all the thunder pomegranates on the market came from Yang Chen, and through the release of the ten thousand treasure house and wine Immortal house, he really earned a lot of spirit stones.

As for the Yuanying stage masters that everyone imagines, Yang Chen doesn’t quite support that. Yang Chen would only let the other party use Thunder Pomegranate unless the limit of their aptitude was approaching and they had made contributions to the sect. Otherwise, it will be harmful and not beneficial to the user, it basically cuts off the road to further improvement in the future, and can only die in the Yuanying stage.

The thunder pomegranate is just a small episode, the women have seen a lot of things that are a hundred times more precious than this. At most they were a little surprised here, and then when they thought that this was their husband’s medicine garden, they immediately felt that it should be taken for granted.

After all the girls walked around the medicine garden, they left the medicine garden contentedly. However, after this trip, the girls knew some of Yang Chen’s family background, and Yang Chen didn’t hide anything from them. Psychologically, everyone felt closer to Yang Chen. Of course, the key is to know that A’Zhu and A’bi will never pose any threat, this was the key point.

The most important thing is that Yang Chen already has another magic weapon that can pass the tribulation at any time. They just saw the fifth grade questioning inner heart pills not long ago, it seems that their husband was constantly creating miracles.

Chapter 739: : Not In Vain

Of course, the fifth grade questioning inner heart pill was given more attention by the girls again. Everyone happily asked about the changes after Yang Chen's profound spirit Furnace passed through the tribulation.

"Husband, we have already researched that formation, when shall we go to the third danger zone to have a look?" Seeing that everyone was quiet, Gongsun Ling brought up a topic that surprised Yang Chen.

Speaking of which, Gongsun Ling and the Murong sisters have been researching that formation for several years, Yang Chen didn't calculate it himself, it took him six years to refine the fifth-grade questioning inner heart pills. During these years, Gongsun Ling and the others have figured out the formation map, but they have been waiting for Yang Chen to complete alchemy and go to explore the third danger zone together.

This formation was actually more complicated than the Demon Sealing Formation, and it didn't take Gongsun Ling so long to set up the formation according to the Demon Sealing Formation. Of course, this is not to say that Gongsun Ling's level is not enough, but that the two are somewhat different.

Arranging the demon sealing formation is just equivalent to constructing according to the blueprint, you don't need to worry about the principle or how to break the array, you just set up the array. The current formation diagram is for Gongsun Ling and the others to figure out how to safely enter the activated formation or simply break the formation, the difficulty was naturally different.

Fortunately, Gongsun Ling's attainment in the formation is really not low. After all these years, with the help of the Murong sisters, she found a safe passage into the formation in the formation map. When Yang Chen woke up, they would enter the danger zone to explore.

“Then what are you waiting for? Let’s hurry up!” Yang Chen regained his spirits immediately, good things happened one after another, and now he is eager to know if there is the pure yin true fire he is looking for in the third danger zone.

When Yang Chen was refining alchemy, Gongsun Ling had already taken everyone outside the third danger zone, from the geographical map of mountains and rivers to the real world, they were standing not far in front of the danger zone.

During the past few years when Yang Chen’s family “disappeared”, the space under Langya Well was not peaceful at all. Since the discovery of a magic weapon that passed the tribulation, many people have been trying their best to find the whereabouts of the magic weapon. During this period, they don’t know how many disputes occurred and how many people were killed or injured.

Over the past few years, the whereabouts of Yang Chen’s family have not been found. It is really not worth the candle to kill each other without a real treasure. After discovering this, everyone finally calmed down a bit, each found their own opportunities. Those formations that have not been opened have become their targets.

However, a danger zone is still a danger zone after all, and dozens of people did not give up and rushed in desperately to become corpses. It also stunned those who came later, knowing that they had no chance, and everyone didn’t try their luck here. Now there is no one here in the danger zone.

Yang Chen’s family appeared here, basically a dozen or so members of their family, nothing else. But Yang Chen immediately discovered that someone was watching this place with spiritual awareness from a distance. There are still people who didn’t give up.

Yang Chen didn’t bother to pay attention to these guys, now he was most concerned about whether there was the pure yin true fire in it, not anything else. Those people could watch as much as they wanted, since they didn’t dare to enter the formation anyway. After exhorting everyone, Gongsun Ling took the lead and rushed into the formation of the third danger zone.

Among the people who have been relentlessly watching in the distance, there are a few guides who pointed out Yang Chen the three great danger zones, and they absolutely know that Yang Chen is the one who owns the alchemy furnace. They have been waiting, the hard work paid off, and they finally made them wait until Yang Chen’s family.

The disappearance of the two great danger zones, the Patriarch Hall and the Dragon Scale danger zone. It made several guides suspect that it had something to do with Yang Chen's family, especially after they recognized that the alchemy furnace belonged to Yang Chen, they became more determined. It didn't pass the tribulation early, didn't pass the tribulation late, but only survived the tribulation at the Langya Well. If it wasn't for getting some good things here, then they wouldn't believe it.

Ordinary places certainly don't have such great opportunities, and good things definitely come from among the three great danger zones. The destruction of two consecutive danger zones fully illustrates this point. Especially after Yang Chen inquired about the three danger zones, two danger zones had accidents in succession. If it wasn't Yang Chen's family, who else could it be?

Now they finally waited until Yang Chen's family appeared in front of the third danger zone, and they didn't seem to hesitate, and walked directly into the formation of the danger zone. Everyone can't wait to rush forward, unscrupulously using their spiritual awareness to probe, they all waited to see the result after Yang Chen's family entered the formation.

According to common sense, a person who enters only takes twenty steps at most, and the formation will attack and cause death. The power of the formation is so strong that even the masters of the Dacheng stage cannot retreat from these mere twenty steps, and can only fall into the formation.

However, Yang Chen's family has been in for a long time. Calculated from the distance, it is definitely more than 50 steps, but there is no formation attack. What does this mean?

The people who were watching secretly rushed to the front of the danger zone almost impatiently, trying to find out what happened. Even the people rushing in have made light without any scruples, trying to see the situation here clearly.

Sure enough, nothing happened to Yang Chen's family. This is the truth that more than a dozen people saw with their own eyes. Right in front of their eyes, Yang Chen's family passed through the formation with ease, and then disappeared into the danger zone, but they could only watch helplessly, not daring to go one step further. That formation is a natural barrier, keeping them out.

"Wait! They will always come out!" There were not many people rushing over, only a dozen or so. Of course, the secret is that the fewer people know, the better. Seeing that Yang Chen's family has entered the danger zone, it was impossible not to envy them, but there is nothing they can do, they can only wait. At the same time, everyone also made up their minds, even if Yang Chen's alchemy furnace that

survived the tribulation was not mentioned, just the harvest of the three danger zones, it was worth their hands.

Yang Chen's family, who had already entered the danger zone, did not pay any attention to the mood of the people outside. They were happy with the scene they saw, so they didn't care about anything else.

The third danger zone was indeed related to the Patriarch Hall, or in other words, to that ancient sect. This is basically a place similar to the sect secret pavilion. The location everyone is in was a relatively small space, only a hundred miles in radius, but it was full of precious materials everywhere.

You can find any magic weapon or material with just a search with your spiritual awareness. Most of the collections of that ancient sect are here.

A smile also appeared on Yang Chen's face. The unique feeling of the powerful fire coming from a certain direction in the danger zone made him completely relieved. This trip was not in vain. ()

Chapter 740: : Pure Yin True Fire

"Whatever you like, whatever you find, you can take it yourself." Yang Chen said to his women with a smile, and then immediately added: "The fire seed is mine, and no one will snatch it from me!"

Yang Chen's words caused all the girls to laugh wantonly. Sometimes, their husband can always make them laugh. In practice, there are not many opportunities to laugh happily.

This is of course a joke, who would compete with Yang Chen? Even if you want to grab the fire seed, you must have that ability, right? Not everyone can touch the seventh-grade fire seed, not to mention others, Yang Chen's master Gao Yue is still waiting to collect the purple heart profound fire after the Yin fire tribulation, that is the sixth-grade fire seed. As for Tao Junqi, who is also a fire cultivator, her life source fire is only a sixth-grade fire seed, and she dare not even touch a seventh-grade fire seed.

Except for Yang Chen, it is estimated that none of these people in the entire Langya Well would dare to touch the seventh-grade fire seed casually. The reason why the second danger zone is a danger zone is

that the two dragon scales still carry a little bit of the seventh-grade fire seed, the eroding dragon fire. If it weren't for Yang Chen, it might still be a danger zone now.

Even Yang Chen had this ability by relying on the merit and expending a lot of merit to protect his body. Otherwise, he would have died in the weak water under the Langya crystal boat.

There is another reason for the girls to be happy, that is, there are many good things in the secret pavilion left by this ancient sect, and it is not a small fortune to distribute to everyone. Although their husband can be said to be the richest in the world, no one would think there are too many good things, right? What's more, this is the reward of this treasure hunt game. Among other things, this process alone is worthy of everyone's happiness.

Another point is that everyone is together these days, and there seems to be a layer of familiarity between wives and concubines, and it feels more like a family of sisters. They are all cultivators, and they don't have so much drive to fight for favor and jealousy. Now that they have the opportunity to share the spoils together, their relationship will become more and more harmonious in the future.

The secret pavilion of this ancient sect is completely different from the secret pavilion of the Pure Yang Palace. The things in the secret pavilion of the Pure Yang Palace are scattered randomly in the whole area. After the disciples enter, they rely on their own opportunities and choices to find suitable items. In this secret pavilion, everything is concentrated in one big palace.

Yang Chen's family stood a hundred feet away in front of the palace, looking at the palace filled with many things from a distance, but they couldn't take a step forward. Around him, within a radius of one hundred feet, everything was burning flames.

Looking at the burning blue flames and feeling the pure yin fire aura, Yang Chen finally confirmed in his heart that what Li Cheng said was right, there is indeed the pure yin true fire here.

He doesn't know how Li Cheng knew that there would be the pure yin true fire here, maybe there are records about this ancient sect in their family's classics, and maybe they knew that there was a pure yin true fire in the sect. It doesn't matter what the real reason is, what is important is that there is the pure yin true fire here, and it was right in front of Yang Chen.

The huge palace has a radius of several miles, and the surrounding hundreds of feet are covered with burning pure yin true fire. Not to mention other people, even Yang Chen can only obediently stand on the outer circle of the flames, not daring to take a step further. Before these pure yin true fires are resolved, even if they fly to the sky, it is impossible to bypass them. Forcibly passing through has only one end, being burned by the pure Yin true fire. That's right, it is burned to dry instead of coke, this is the effect after being burnt by a seventh-grade fire .

No matter how good the merit is, the merit that Yang Chen can use at one time is limited. Using the merit can protect a part of one's body against the eroding dragon fire, but it cannot protect one's whole body under this level of pure yin true fire.

"Husband, what should we do?" Sun Qingxue asked pitifully, shaking Yang Chen's arm, pouting. Among the wives and concubines, only Sun Qingxue and Shi Wushuang would act coquettishly in front of Yang Chen. Of course, when Sun Qingxue was around, Shi Wushuang was also very disciplined.

"I'll think of a way." Yang Chen sighed, it's really not as good, who knew that such a thing would happen. He was still happy about having the pure yin true fire before, but soon he was annoyed because there were too many flames.

"Relax!" Letting the expecting girls back first, Yang Chen took out the profound spirit Furnace, approached the Pure Yin True Fire, and at the same time sent out a spiritual awareness to Long Ling, signaling him to absorb the Pure Yin True Fire.

As the tool spirit of the profound spirit Furnace, Long Ling certainly understands that the more fire seeds his body absorbs, the higher the grade will be, especially high-level fire seeds, the more the better. At this moment, Yang Chen didn't need to say anything, he immediately started working, carefully absorbing the pure yin true fire.

Although Long Ling was originally a fire dragon, a great expert in controlling fire, he was also cautious when facing this kind of pure yin true fire of the seventh grade. This is not his own life source fire, if one is not done well, the spirit body will suffer huge damage. Especially this level of fire seed, if you encounter it, you will be seriously injured, and you will never run away.

Fortunately, the profound spirit Furnace replaced his original body. Although it wasn't a dragon's body, some dragon scales were refined in it after all, which was ten thousand times better than his original spirit body state. There will never be such a thing that the life source fire will eat back at itself.

Yang Chen was right next to him, nervously staring at the profound spirit Furnace absorbing the pure yin true fire, ready to help at any moment. After observing for a while, Yang Chen also began to feel at ease. The dragon spirit is the dragon spirit, even if it is only a spirit body, its ability to control flames is no worse than that of a person who has the memory of Great Luo Golden Immortal at this stage.

How to get rid of so many pure yin true fires is something to think about later, let's keep the fire seeds first, and then upgrade the profound spirit Furnace. This is the main purpose of coming to Langya Well, and they cannot forget this just because they saw a hall full of things. The same goes for cultivation, the most taboo is to discard the basics and pursue the last. Of course Yang Chen would not make this mistake.

None of the girls interfered with Yang Chen at this time. They all understood Yang Chen's emphasis on fire. Although no one knew the existence of the Yin-Yang Heaven Burning Fire, they all saw Yang Chen's pursuit of fire all the time. Especially for the pure yin true fire in front of them, it has been named and asked for in several transactions, and the degree of attention can be imagined. Even Sun Qingxue, who likes to act like a baby in front of Yang Chen the most, obediently protected him from behind, not saying a word, for fear of disturbing Yang Chen.

The profound spirit Furnace has been able to spontaneously absorb the fire seed, Yang Chen was relieved, but also began to think about how to clear such a large area of pure yin true fire. They were all here, they can't just look at a palace full of good things and then turn around and leave, right?
