Chapter 762: Extraordinary Yin Fire Tribulation

After having the insight from last time, Tao Junqi can be said to be able to attract the Heavenly Tribulation to ascend at any time without the burden of her heart.

The reason why it has been delayed until now is that apart from spending more time with Yang Chen and Tao Junqi having more experience, there is another reason.

It wasn't just one person who ascended with Tao Junqi. The Iron Wing Flying Eagle monster pet has long been at the peak Dacheng stage, as long as the master ascends, it will participate in the tribulation at any time. In addition, there are the twelve Penglai devine woods.

The Penglai devine woods can be said to have the most pure First Wood attribute physique in the world, and it is not enough to describe it with a full First Wood spiritual root. Yang Chen, Sun Qingxue, Murong Nan, these geniuses with the full value of the first wood attribute and postnatal spiritual roots, compared to Penglai devine woods cultivation talent in the first wood attribute, they can be described as trash.

Yang Chen's foundation building time was ten years, and the time for reaching the Jiedan stage was about eighty years. Of course, this is because of the need to consolidate his cultivation base. However, the Penglai devine wood's spiritual wisdom is the cultivation base in the middle foundation establishment stage, and it took only ten years to reach the Jiedan stage. Hundreds of thousands of years before the emergence of spiritual wisdom, they have already accumulated enough accumulation, and their cultivation was simply smooth sailing.

Even so, Yang Chen forced the Penglai devine woods to suppress their cultivation, so as not to rush too fast and not be stable enough. At the peak Jiedan stage, the Penglai devine woods suppressed dozens of tribulations. After entering the Yuanying stage, the Penglai devine wood who practiced the Transformation secret art, Clone body secret art and first wood true secret art passed down by Yang Chen have long since entered the Yuanying stage. They have reached the peak Yuanying stage and even surpassed it.

Over the years, almost every year, a group of Penglai devine wood monsters will forcibly suppress their own cultivation, lest the tribulation will come. Counting them carefully, they have suppressed hundreds of Yin fire tribulations, and their accumulation was so deep that it makes people envious.

There is no other way, a large amount of first wood spiritual liquid is a terrible thing for others. For the Penglai devine woods, it is a good nourishing product that can be drunk as water. Every drop of first wood spiritual liquid can directly improve the Penglai devine woods cultivation by one point. You know, that is direct absorption, rather than the process of refining and condensing, the efficiency was so high that it was a mess.

Tao Junqi's ascension can completely bring the Penglai devine wood to the former Zhao Family Manor and the current Yang Family Manor. Isn't there such a saying, one person attains enlightenment, chicken and dog ascend to heaven. This is another way to ascend.

It is not a last resort, and most people will not be willing to use such a method. This way of ascension to the spiritual world, the status is surprisingly low, even worse than that of Mu Mingyuan who ascended with a lack of spiritual awareness. It can be said that he is directly at the bottom of the spiritual world. Unless there is some good luck, otherwise, he can only be like this forever.

Of course Yang Chen would not waste the aptitude of powerful helpers like the Penglai devine woods. If Tao Junqi ascended, they must naturally ascend at the same time.

Right in front of Yang Chen's family, under the dual protection of Yang Chen's golden bell and Gongsun Ling's geographical map of mountains and rivers, all the Penglai Devine woods simultaneously triggered a yin fire tribulation. All of a sudden, the entire danger zone seemed to be within the scope of the Yin fire tribulation.

So many yin fire tribulations superimposed. It is not comparable to a single Yin fire tribulation at all, and even the superimposed power was far more than twenty-four times that of a single Yin fire tribulation. It was a geometric progression, and the power of the tribulation directly burned the entire danger zone space into a large piece of complete colored glaze.

Looking at the terrifying power of the Yin fire Tribulation, even Tao Junqi, Shi Wushuang and the Murong sisters who have already survived the tribulation were all pale. If the Yin fire Tribulation they had to go through was like this, they would have died countless times without leaving any bones.

On the contrary, Gao Yue, Gongsun Ling, Shi Shanshan, Sun Qingxue and the others who were about to go through the Yin Fire tribulations were not too surprised by this, but concentrated on observing and

feeling the power of the Yin Fire tribulation. The anticipation on their faces made Tao Junqi's group feel a little ashamed in their eyes.

Everyone understands, the four women are by no means ignorant and fearless, because they have not experienced it so they can see the Yin Fire tribulation clearly, but because they have strong confidence in themselves to survive the tribulation. From this point of view, Tao Junqi's group may lag behind Gao Yue and the others at this starting point. If they don't cultivate hard in the future, they will definitely be caught up by the four women.

The twenty-four Penglai devine woods happened to be a large formation, which suppressed hundreds of Yin fire tribulations. They were not a threat at all in front of the Penglai devine woods. Instead, they were a brand new challenge, which made them even more excited, their fighting spirit was vigorous.

The process of working together to fight against the tribulation is also the process of the Penglai devine wood cultivating cooperation. A series of Yin fires were generated from the body and burned wildly. Under the strong resistance of the Penglai devine woods, they were extinguished one after another. Their bodies were also undergoing further refining, becoming a more pure and impurity-free first wood.

This can be said to be the largest Yin fire tribulation that the girls have ever seen. The combined power is even comparable to the power of an ordinary raging wind tribulation. Tao Junqi's group were extremely shocked, but Gao Yue's group felt relatively normal.

It's not that Gao Yue and the others have high vision, but that they have seen the situation when their husband survived the thunder tribulation. Even an ordinary thunder tribulation can shake the earth like that. They believe that when their husband survives the Yin fire tribulation, it will definitely make countless people's jaws drop.

It took the Penglai devine woods a full day to complete the entire process of the Yin fire tribulation. This time, the heavenly tribulation lasted so long and was so powerful that no other Yin fire tribulation could match it. Yang Chen was also able to collect a lot of Yin fire tribulation's aura, which was used to refine the seven emotions pills.

In the next few days, the Penglai devine woods shocked all the girls. The Penglai devine wood monsters who had just passed the Yin fire tribulation, which should be in the early Dacheng stage, showed a monster-like improvement speed, and in just ten days, they had already rushed to the middle Dacheng stage.

The fastest cultivator in the world does not have such a frightening speed of cultivation. But these Penglai devine wood monsters behaved so naturally and logically. The profound background of forcing hundreds of times of Yin fire tribulation, so that they don't have to worry about the problem of an unstable realm, and their cultivation reached the peak Dacheng stage.

Within a dozen days after Tao Junqi took the last fire to refine the fourth fire devine thunder, the Penglai devine wood monsters had grown to the peak Dacheng stage. If they hadn't been suppressed all the time, they could invite a tribulation at any time.

This time, none of the girls expressed surprise. Their husband is already monstrous enough, but they didn't expect that some of the servants around him were also so monstrous. They don't know how many people who used to be known as cultivation geniuses would feel ashamed when they saw the powerful performance of the Penglai devine woods.
