

NATIONAL TRANSFER: NECROMANCER! I AM A DISASTER

Chapter 19 The First Time To Kill, Do It Simply

Not only the three of them were stunned, but Ning Yiyi was also stunned.

With wide eyes and small mouth open, I couldn't believe it.

It looked really cute.

She had seen Lin Moyu's skeleton warrior today.

The skeleton warrior who is only level 10 still has many cracks all over his body, and the weapons in his hands are also dilapidated.

It looks like it is vulnerable.

How could it be so strong.

The mage's level 20 skills can't even hurt it.

Neither the archer's three consecutive balls nor the knight's charge can cause damage to it.

Is this really a level 10 summon? Strong is a bit too much.

And quantity. . .

Groups of flames lit up in the dark night, and skeleton warriors appeared silently, surrounding them.

Lin Moyu didn't talk much, he walked back to Ning Yiyi with killing intent in his eyes.

"kill!"

With a thought, the skeleton warrior immediately started.

The mage's face changed drastically, his staff shook, and a shield appeared on his body.

Energy Shield.

Mage's signature skill.

The higher the level of the mage, the stronger the skills, and the stronger the energy shield.

It is said that those god-level mages are safe and sound under the strike of the forbidden spell with their shields.

Mages have low agility and slow movement speed, so they cannot be as flexible as archers.

And now surrounded by skeleton warriors, there is no room for him to dodge.

The skeleton warrior raised his knife and dropped it, and the energy shield suddenly twisted violently.

The mage's face changed drastically, and his energy shield was almost broken with just one blow.

What are the attributes of these skeletons, and their attack power is so terrifying.

There was no time for him to think about it, and the knife of the second skeleton warrior also fell.

The energy shield shattered at the sound, turning into thousands of stars and dissipating.

Resist the Ring of Fire!

The mage released a skill again, and a huge ring of fire erupted, and several nearby skeletons were pushed more than ten meters away by the ring of fire.

Before he could be happy for a second, his eyes went dark, and two skeletons had jumped to the top of his head.

He was never given a chance to use his skills again.

The knife flashed, and the mage's head shot up into the sky.

In less than two seconds, the mage died.

The archer was also being chased by the skeleton warrior at this time, very embarrassed.

Witnessing the mage being killed with his own eyes, his eyes were full of fear.

He is much more flexible than a mage, but he is still much worse than a skeleton warrior whose agility is as high as 3000 points.

He kept using his evasion skills, trying to get out of the siege of the skeleton warriors.

It's a pity that the hard work time and time again has finally come to naught.

As the skeleton warrior pressed closer, the space for him to maneuver became smaller and smaller.

Compared with the dead mage and the dying archer, the situation of the knight is much better.

The knight glowed like a light bulb, launching his charging skills again and again and running towards the distance.

This layer of light is stronger than the mage's energy shield, protecting him firmly.

Even if the skeleton warrior's knife fell on him, it couldn't hurt him.

"It's extreme defense. I didn't expect this knight to master this skill."

Lin Moyu thought of the knowledge of this skill.

This is one of the core skills of a knight.

Once activated, the defense will become extremely strong for a short time.

I don't know exactly how strong it is, but someone has tried it. A level 20 knight can withstand the attack of a level 40 mage while using his ultimate defense.

Although it can only be tolerated, it is enough to show how strong the ultimate defense skills are.

A knight who has mastered ultimate defense and a knight who has not mastered extreme defense are like two professions.

However, extreme defense is not such an easy skill to learn. There is no corresponding skill book, so you can only learn it with skill scrolls.

There is a lot of randomness.

The knight fled frantically against the limit defense.

There was a scream behind him, and he knew that the archer was also dead.

The mage and the archer died together, and he was completely frightened.

How could these skeleton warriors be so terrifying.

If I had known earlier, he wouldn't have come. It's not worth losing my life for an intermediate skill scroll.

"Use skills!"

"Block him, don't let him escape."

Lin Moyu gave the order.

It is impossible for him to let the knight escape. Since he killed him, he will kill him clean.

A red light appeared from the skeleton warrior's knife at the same time.

Furious blow!

Deals 200% damage to the target.

Skeleton warriors with a strength of 3000 points doubled their damage immediately after using their skills.

"Also use skills!"

The ghosts of the knights and the skeleton warriors are scary enough, but they can still use skills, which is against the sky.

The broadsword flashing red fell on the knight.

The white light on the knight suddenly dimmed a lot.

Then the second time, the third time.

The ultimate defense lasts for 1 minute, which is when there is no attack.

The more intense the attack is, the shorter the duration of Ultimate Defense will be.

Skeleton warriors desperately came up to activate their skills, and the duration of the ultimate defense was shortening sharply.

Moreover, more skeleton warriors had surrounded them, cutting off the knight's retreat.

very hopeless.

Ten seconds later, the knight was dismembered by the skeleton warrior with unwillingness.

Either don't do it, and don't be soft-handed if you do it.

This is what Lin Mohan told Lin Moyu, and Lin Moyu did the same.

"They're all dead?"

Ning Yiyi has not reacted yet.

From the beginning to the end of the battle, it took about 20 seconds before and after.

All three have been killed.

But the instigator didn't even move, just stood here.

Lin Moyu nodded, Ning Yiyi was right, they were all dead.

The skeleton warrior ran back, holding a lot of things.

After the professional dies, the things in the storage space will fall out.

The skeleton warrior picked them all up.
