Chapter 224: True Successor Xi Xi Receives the Temple God's Teachings, Seven Treasures Relic Ruyi Golden Tower

The thick Divinity spread all around, and Li Che felt the [Pure Heart] Dao Fruit in his chest pulsate, as if it had seen something extremely delicious.

It was like when he was outside Fei Lei City, staring at the [Three-Eyed Fierce True Lord Lingying Statue] in the Mysterious Temple.

The lingering Temple God Divinity filled the air with an extremely sweet scent.

The two Dao Fruits seemed to open their mouths, like great beasts waiting to devour.

Li Che took a deep breath. [Hanging Thought-Exorcising Thunderbolt Vajra Statue], a Seven-Yuan Level statue of the deity!

"No... it's not a Temple God..."

Li Che's eyes flickered, full of regret.

Although the statue gave him an extremely strong stimulus, like the temptation of a temple god in the Mysterious Temple, after a careful observation, Li Che found out...

This statue was not a Temple God!

It was a Divine Wood Carving!

His hands hidden in his sleeves were already itching to touch and stroke its head... alas.

"A Seven-Yuan Level Divine Wood Carving!"

However, after a moment of regret, Li Che was thrilled.

It meant that the carver of this statue was a Seven Elements Divine Carver!

Li Qingshan felt Li Che's arrival as well, his eyes gradually opened, and he slowly stood up, appearing as if a deity rose from his meditation mat.

The Divinity between heaven and earth boiled as if someone emerged from a pool, with water rushing down on either side, producing a roaring crash!

"You've come?"

Li Qingshan turned around, his physical body actually separated from the great Divine Phase void shadow, like a Jiao Long shedding its skin.

With the rise and fall of his chest, each breath he took pulled the air streams of the world with it, along with the Divinity, which he inhaled and exhaled through his mouth and nose.

It was like a true dragon breathing out, every inch of skin quivering with power, tyrannical and terrifying, as if his entire being had transformed into a Jiao Long.

True Intent!

This was Grandmaster True Intent, the True Intent of a mastered Ultimate Study, like the essence of the Divine Vein melting into the Transformation Realm, infused in every movement of the flesh.

"Huff!"

Li Qingshan's eyes were brilliant, like two radiant shooting stars in the night sky, and with the movement of his body, steam rose and his Qi and blood burned fiercely. ㄟ

"Grandmaster True Intent means to practice an Ultimate Study to its extreme, to integrate it into one's daily actions, walking, lying down, and sitting, merging the essence of the Ultimate Study with man and with the divine."

"The Ultimate Study I practice comes from the Golden Light Sub-sect of the Qian Yuan Divine Sect, the Body Refining Grandmaster's Ultimate Study [Eight Flood Dragons River Overturning Skill], one Jiao

represents one surge of True Intent. If I can bring forth eight Jiaos at once, I can rival a Master of Divine Gang!"

Li Qingshan's foot lightly touched the ground, sliding and dragging, his hands curling inward like Dragon Claws, his spine arching as he bent down low.

Roar!

Li Che felt what was coming at him like an evil Jiao in the river, staring at him with rage-filled eyes.

It was as though his blood might freeze, that if he made any sudden movements, it would pounce in an instant, tearing him apart with its sharp teeth, spilling his blood into the great river!

Li Che's hairs stood on end, the [Dragon Elephant Vajra] Dao Fruit was almost automatically activated.

With a "hum bang," his body swelled up, his Qi and blood became hazy, surrounding his body like a mist.

Nine major tendons on his back coiled like angry dragons, muscles winding like serpentine dragons.

However, Li Che did not fully activate the Dragon Elephant Vajra Dao Fruit into the Angry Vajra State; it was merely a slight stimulus that caused his body to swell.

Li Qingshan also converged his Qi and blood, returning to his stooped appearance, taking a squinted glance at the inflated body of Li Che.

"Good lad, you've hidden your strength well. This intensity of Qi and blood... you must have reached the Mysterious Vein, haven't you?"

"Not bad at all, since that's the case..."

In Li Qingshan's mind, Li Che's Qi and Blood Cultivation should still be at the initial stage of Channel Opening, just starting to form Qi Channels.

How long had it been, and now he's stepped into the Mysterious Vein realm.

Li Qingshan took out a booklet from his Qiankun Jade and handed it to Li Che.

"This is the Ultimate Study of the Golden Light Sub-sect of the Qian Yuan Divine Sect, [Eight Flood Dragons River Overturning Skill], which I will pass on to you now that you have joined Zheng Lei Peak."

Li Che also retracted his Qi and blood, his body returning to normal, and upon hearing this, he was surprised, taking it respectfully.

"Thank you, senior, for bestowing this technique!"

Li Qingshan was one of the few who knew his true strength, but... he didn't know everything.

Putting aside his Divine Cultivation, even just his Qi and Blood Cultivation was inaccurately known.

Now that he saw Li Che had Mysterious Vein Cultivation, he gifted an Ultimate Study, indeed showing great appreciation for him and beginning to prepare him for a leap towards Grandmaster.

"Is this where you practice Divine Observation?"

Li Che put away the Ultimate Study and turned the conversation back to the Thunder Exorcism statue.

Li Qingshan shook his robe, nodding, "That's right, I do not intend to cultivate a Void Aspect, I plan to directly step into the Divine Phase Realm in one go."

"Divine Observation is an extremely important step from Divine Base Perfection to stepping into the Divine Phase Realm. The Void Aspect... is just a transition, and the step of the Void Aspect can actually be directly bypassed."

"Only those who lack self-confidence, the mediocre ones, cultivate a Void Aspect!"

Li Qingshan led Li Che to the simple wooden house located not far beside the Guan Shen Temple, about a hundred meters away, and they sat down inside.

The wooden house was very simple, with one bed, one table, and two chairs, nothing more.

Li Qingshan took out a charcoal stove and a packet of tea leaves from his Qiankun Jade, boiled water with his Qi and blood, sprinkled in the tea leaves, and then took out the teaware.

After making the tea, he pushed a cup of green tea towards Li Che with two fingers pinched together.

"I have been practicing Divine Observation for two and a half years, my Inner Scenery Divine Foundation has long since metamorphosed into a Divine Shape; I am only one step away from merging my God's Intent with it and leaping directly over the Void Aspect to achieve Divine Phase Perfection," Li Qingshan said boastfully after drinking a sip of tea and exhaling hot air.

Li Che's eyebrows twitched; to directly leap over the Void Aspect and step into the Divine Phase?

Only the mediocre cultivate a Void Aspect!
