

Ability 281

Chapter 281: The First Thing to Do Back Home: Review!

Click!

A loud explosion!

The entire room went dark!

Even all the lights in this building of the security bureau went out instantly!

Only the emergency lights in the corridor were still on!

"What's going on?"

"What's happening!?"

Song Xiangdong looked bewildered and immediately barked, "Get someone to check it out!!"

After saying that, he hurriedly opened the door and walked towards the assessment room next door where Lin Beichen was. At this moment, he most hoped nothing went wrong.

He pushed the door open and found Lin Beichen standing still. Song Xiangdong immediately turned on his flashlight, examined him, and confirmed that his eyes were moving and he was unharmed!

Then, he checked the room and found a hole in the wall!

The bricks around the hole seemed to have been heavily impacted, or perhaps burned, blackened and charred!

"What is this??"

"This room has been specially reinforced!!"

Shock was written all over Song Xiangdong's face; this power really exceeded the limits of what this assessment room could withstand!

"I'm sorry, Director Song, I didn't control the distance well just now. If I had, it wouldn't have hit the wall!"

Lin Beichen scratched the back of his head a bit awkwardly. He had been too eager to test his limit power and failed to withdraw his elemental power in time after releasing a palm strike, resulting in the wall being hit.

"No, it's alright. It's a good thing that your strength has improved!"

After saying this, Song Xiangdong forced a smile, patted Lin Beichen on the shoulder, and then hurried out, heading to the other room behind the wall that was hit.

Song Xiangdong wiped the sweat off his forehead, pushed open the door to that room, and shone his flashlight inside. However, seeing what was in front of him, he gasped and felt a chill down his spine!

On the desk in this room were various trophies and medals of honor that he had placed, even the urn of a fallen comrade, which also stood on the desk!

Now, the desk was in disarray, the trophies fallen to the ground, several corners chipped!!

Looking at the urn, Song Xiangdong hurriedly approached to check it out and found it undamaged, only then did he breathe a sigh of relief.

At the same time, he felt greatly shocked that this youngster's strength had increased significantly in such a short time!

At this rate of growth, this assessment room would eventually be inadequate to contain him!

Just as Song Xiangdong was pondering, the lights in the building finally came back on, and the entire floor was illuminated again.

As for the culprit responsible for the power outage in the security bureau, it was undoubtedly Lin Beichen. The measuring instruments on the wall might have caused a short circuit, leading to the trip.

Song Xiangdong returned to the observation room and rearranged the setup in that room, reinstalling the damaged sensors.

All devices were restored to their original state as quickly as possible, and Lin Beichen's assessment resumed officially. Song Xiangdong and a group of experts gathered, all waiting for the final number on the screen.

In the assessment room, learning from the previous lesson, Lin Beichen planned how to control the distance, aiming for a full-power strike while keeping the distance in check.

After some thought, Lin Beichen's hand ignited a fierce fireball again, accompanied by lightning, crackling in the air.

Then, in his liver, heart, and lungs, elemental power gathered continuously while the air still contained a trace amount of elements!

Lin Beichen didn't neglect any of them. After a while of condensing, the fireball in his hand became dazzling, leaving no one able to look directly!

In an instant, he struck out, a red beam shot from Lin Beichen's hand, making the surrounding air sizzle!

It seemed as if the intense heat burned through the air.

Simultaneously, the power of lightning produced a heavy thunderous sound in the air.

Fire Element and Electric Element intertwined, and a spherical light burst forth in the assessment room!

Learning from the previous experience, Lin Beichen didn't shoot the ball of lightning too far, the mix of lightning and fire exploded mid-air, sending a violent wave of air!

This phenomenon didn't occur in the previous two attempts!

It could even produce a phenomenon, and the explosion's ripples far exceeded the previous two!

In the adjacent observation room, everyone held their breath, enduring the intense light's sting on their eyes, witnessing this scene without blinking!

Everyone present couldn't help but feel once again they witnessed a miracle!

Such power, if continuing to develop, could it be like in the novels, creating worlds from chaos!

Casually striking down a star, destroying a continent?

Everyone fell deep into thought, as if they saw the future through Lin Beichen.

The future Immortal Dao Realm's scene, everyone flying with their swords!

Living for thousands of years, perhaps even immortality!

As they immersed in contemplation, the values on the screen continuously rose, and Lin Beichen was also observing everything attentively.

Seeing what values could be achieved without using the Thunder Tribulation Sword.

998....

999.....

1000.....

1001.....

"Still rising!?"

In the room, Song Xiangdong stared at the numbers on the screen in astonishment.

This number had already topped the chart, far exceeding the highest value humans could achieve without using weapons!

To him, this was no different from testing the power of explosive grenades, C4, and some high explosives!

But, this came from a human body!

Finally, the numbers on the screen stopped at 1101.

This test concluded.

Then Lin Beichen proceeded with the next tests for his spiritual power, reflex, and other instinctive response values through brainwave stimulation.

Chapter 282: The First Thing Upon Returning to the Country: Evaluation!_2

...

After finishing this series of tests on bodily reflexes, it was time for the test Lin Beichen was most concerned about—testing his body strength!

This time, unlike the previous test, the CT scanner's power was greatly increased, more than three times the previous amount, generally used to test the strength of certain weapon installations.

Or the strength of certain safes, locks, etc.

As the onsite personnel adjusted the instrument, Lin Beichen stood on the testing platform, and as the personnel pressed the start button, the instrument's shield dropped and began to rotate.

The steps were no different from before. As soon as the machine began scanning, Lin Beichen summoned a crimson light screen formed after the Fire Element breakthrough.

This light screen used to be golden when the Gold Element broke through to the Third Realm. As the Fire Element followed suit, the golden light screen seemed to undergo a remarkable change, turning into a crimson color!

Compared to before, it was much more solid and appeared clearer.

This time, the machine scan lasted nearly an hour, double the duration of the last time!

But this was expected. Whenever Lin Beichen's physical condition improved, the measurement time would also extend!

Yet, people still felt a bit shocked; the machine's power was increased by three times!

The time didn't shorten!

Only Lin Beichen knew the specific reason: his heart underwent refinement through Fire Element, breaking through to the Third Realm. Due to the heart's unique attributes, its enhancement seemed to uplift all internal pathways to a certain extent!

The heart is the most vital organ in the human body, responsible for pumping blood to the limbs and other organs. Now its beating was vibrant and powerful, bursting with endless vitality, and the body could store more elements as a result!

Then the screen flashed a numeric value, an astounding 701!!

The previous 589 was already very impressive, comparable to thick steel plates, even surpassing them!

But now, it was beyond what a steel plate could match; it reached a special material level of strength, comparable to safes and similar protective gear!

After all these tests, Lin Beichen walked out of the evaluation room and came to the observation room, directing his gaze on the large screen that was crunching numbers.

It took a long time for the computer to finally produce the value!

[Rating Database Update: Cultivator, Rating: B-level!]

"Damn, B-level?"

"This is actually a level achievable by humans!"

One of the experts present adjusted his glasses in shock, having personally calibrated these instruments.

Typically, only the power ratings of various weapons reached B-level, but today, someone emerged from the evaluation room!

This person, B-level!

As Lin Beichen's latest levels updated on the large screen, data simultaneously synchronized with the national database!

On that same day, the national database refreshed.

The news immediately sparked widespread discussion across police institutions nationwide.

Especially among colleagues in the weapon development department, this news caused a major stir within their research circles!

Again witnessing a cultivator level-up!

This was the third time seeing coded: Cultivator's secret message file!

Initially, folks thought the code was merely interesting; later, during the second time, it attracted much attention.

Until the third time, those who had previously seen this message started suspecting it wasn't just a simple weapon update or iteration.

Later, they realized something was off. A weapon's development typically couldn't elevate values by such a large leap within such a short period.

"How long has it been, suddenly leapfrogging from C-level to B-level!"

"It's that Cultivator again!"

"Which lab developed this secret weapon that enhanced combat power so fast?"

"Did our country produce another amazing scientist?"

"Could it be certain materials broke through limits, maintaining strict confidentiality, requiring higher authorization to inquire detailed info?"

"Hope it comes to market soon, everyone can have one!"

"It might not even be a weapon! If it's explosives, do you want one to spice things up?"

In police department intranet systems today, only the Cultivator rating displayed, not specifics, leading to speculation about secret weapon development.

No one would imagine this was one person's achievement!

This news stirred not just police nationwide but also security bureaus, becoming today's hot topic—as if a major event occurred!

Normal level ups would transition from C to C-, then C+. But this Cultivator suddenly leapfrogged from C to B-level!

This indeed became today's hottest topic within investigative units and caused a major tremor in research and development centers.

Those without access speculated quietly, while authorized personnel were shocked but couldn't disclose due to high confidentiality.

In the observation room, they were most astonished, knowing this wasn't a secret weapon, but a person, who stood beside them!

Witnessing the entire process firsthand—a person created a miracle, achieving B-level power!

A true Cultivator!

Song Xiangdong looked at Lin Beichen with immense joy, holding him like a treasure, unable to let go for a long time!

Chapter 283: The First Thing After Returning to the Country: Review!_3

"Beichen, I am truly happy for your improvement!"

"The extent of your future achievements is beyond my current ability to predict!"

As Song Xiangdong spoke, he suddenly thought of those warriors from before!

"By the way, the batch of warriors you were guiding earlier have made significant progress!"

"Do you want to take a look?"

Lin Beichen nodded in agreement, just as he wanted to see how the previous batch of warriors selected by the Security Bureau had developed according to his taught Heart Method after all this time.

Arriving at a spacious training ground of the Security Bureau, the resonant sound could be heard from a great distance, majestic and overwhelming!

The floors underfoot were trembling with intensity!

From a distance, it was clear that a squad was diligently practicing Ancient Martial Arts techniques, their movements uniformly synchronized, exuding immense power!

As he got closer, he could see that each person was already drenched in sweat.

There were puddles of sweat collected beneath their feet!

Amidst this group, there were ten new figures whose movements still appeared somewhat unfamiliar.

Lin Beichen naturally recognized these few; they were the ten instructors transferred from the destroyer, now also part of the squad, training together.

These ten instructors appeared to be struggling slightly, seemingly unable to keep up with the sixty warriors who had started practicing Martial Extreme techniques earlier.

But this was only natural.

Martial Extreme was a cultivation technique created by Lin Beichen himself, combining Traditional Martial Arts and Ancient Martial Arts, also imbued with Elemental Power. Even Lin Beichen himself advanced rapidly only with Elemental Power as his driving force!

For ordinary people, practicing the techniques would naturally be very strenuous, and being able to perform them continuously was already impressive!

The more than sixty warriors stopped immediately upon seeing Lin Beichen approach, using the most standard gesture to respectfully salute Lin Beichen!

On their faces, there was immense reverence for Lin Beichen!

Following Lin Beichen's methods over these days, each of them could feel their bodies strengthening at a visibly remarkable pace!

This was not something ordinary martial arts could achieve!

Because human physical ability has its limits, while Lin Beichen's Martial Extreme seemed to help them break through this limit, guiding them toward greater strength!

Now, the more than sixty warriors could be considered as completely transformed!

The ten instructors who had just joined the team experienced this most profoundly!

Here, they were nothing but insignificant!

The pride they once had could only result in getting utterly defeated here!

Any one of these warriors could easily knock them down!

And everyone present had immense respect for Lin Beichen!

The ten instructors felt extremely ashamed at this moment, for their initial rudeness, as even the stronger ones now showed such respect to him, they felt a severe loss of face.

"Very good, warriors, your physical constitution is visibly improving!"

"But it's not enough!"

"Steadiness!"

"Understanding the power of the elements requires not just physical enhancement but also working on your steadiness and mindfulness. Understanding nature needs extremely strong self-control!"

"Martial Extreme techniques require element power to temper the body, to bring forth rapid growth!"

"Of course, even without understanding Elemental Power, consistent practice of the same set of movements will still enhance your physical constitution!"

Lin Beichen shared his latest insights with everyone present.

The group of warriors before him, diligently practicing Martial Extreme techniques, reminded him somewhat of himself.

When he used to practice Ancient Martial Arts, it was only with the aid of Electric Element and Gold Element that he could reach perfection in the shortest time.

Yet even so, practicing a traditional martial art technique would still leave him drenched in sweat.

The current warriors hadn't yet glimpsed the potential of Elemental Power, yet through sheer physical strength and willpower, they had heightened their martial arts proficiency significantly.

The group listened intently to Lin Beichen's shared experience, not wanting to miss a single word!

Chapter 284: My Roommate Can Perform Sword Flight!

Nowadays, many people have more or less doubts in their hearts!

For example, is this daily repetitive training cultivating immortality or practicing martial arts!

Why is it that they still can't perceive the existence of the element that Lin Beichen mentioned!

Lin Beichen's words seemed to awaken them; practicing martial arts and comprehending elemental power are complementary.

If one cannot perceive the existence of elements, they should first strengthen their physique by practicing Martial Extreme. Ultimately, one day, with a strong physique, if they perceive the existence of elements, it will come naturally!

As Lin Beichen's words fell, some people in the field were eager to try, wanting to verify their Martial Extreme progress but hesitated due to respect for Lin Beichen and didn't directly speak up.

However, the ten instructors who had just joined the team became their targets!

"We heard about your backgrounds, instructors from the destroyer, quite reputable!"

"How about a match?"

Immediately, some people wanting to verify their learning surrounded the eight male instructors, with the female instructors not included in this challenge.

Of course, before they approached, they looked at Lin Beichen's expression, received tacit approval, and then proceeded.

Following the lead of a few, more joined in, with over sixty warriors eager to try.

This scene scared the eight newly joined instructors, urging their small steps to retreat, not daring to accept the challenge!

The eyes ahead were filled with combativeness, combined with their well-defined muscles!

Their well-developed physiques made the eight instructors secretly sigh and feel ashamed!

Having been beaten by Lin Beichen, they no longer dared to underestimate the so-called immortality cultivators.

"Alright, alright, that's enough! Continue practicing!"

Song Xiangdong saw the situation was not right and hurriedly stopped it.

If they really fought, regardless of the outcome, life would not be easy in the future!

He had reasons to believe that sooner or later, they would complain to Old Guo, saying that Song Xiangdong was abusing his soldiers.

Sixty soldiers almost pushed the eight instructors into a corner, without any response from them. Plus, Song Xiangdong spoke up, and everyone retreated back to the field and stood in formation again.

Then Lin Beichen taught meditation again!

Sixty soldiers, along with the ten new instructors, sat cross-legged in a meditative posture.

"Meditation is the best way to comprehend elements!"

"Only in meditation, reaching selflessness, immersing in the exploration of enlightenment, feeling nature, savoring everything, and slowly trying to enter the Visualization Realm!"

"Elements are divided into five main categories!"

"Gold, Wood, Water, Fire, Earth, and Lightning!"

"Choosing a place rich in elements makes it easier to feel their presence!"

"Imagine yourself in a vast ocean, with countless water elements filling the surrounding air. With each breath, you absorb the elements into your body!"

....

Lin Beichen explained a lot, combining his latest insights, simplified, and orderly conveyed to them.

Song Xiangdong listened attentively, almost joining the meditation team, but was called away midway by a messenger.

After he left, the entire hall, sixty to seventy people, sat cross-legged, eyes closed, immersed in meditation, silent, with a soothing atmosphere.

Time flew by, unknowingly a whole day had passed.

The ten instructors first emerged from meditation, discovering that entering the meditative state and following Lin Beichen's words to comprehend elements' existence consumed their energy greatly!

They were already drenched in sweat, nearly exhausted!

It was not a physical exhaustion but a mental fatigue!

Lin Beichen was not surprised by this, as he initially felt very strenuous too. Although just sitting without doing anything, he was particularly tired.

Then he agreed to let them retreat for food and rest, while Lin Beichen continued to enter enlightenment with the remaining sixty warriors.

Song Xiangdong frequently came to inspect the situation, only to find everyone in the hall sitting motionlessly, like monks in meditation!

Anyone who didn't know would think they had come to some religious sanctum, but this was the Security Bureau!

Spreading this scene would probably shock the entire nation, fortunately, the security measures were impeccable.

Otherwise, Song Xiangdong would really fear this scene being leaked.

After several visits and finding them unmoved, he finally went back to his tasks.

It wasn't until the afternoon of the second day that some couldn't hold on, nearly collapsing, and everyone gradually woke up from their enlightenment.

"How was it? Did you perceive the so-called elements?"

Lin Beichen asked immediately upon seeing them awake.

He was keen to know if other people, without exceptional enlightenment, could compensate through diligence and perceive the existence of elements.

And he was particularly curious about the extent of their training, what power they could cultivate!

Everyone shook their heads, indicating they gained nothing.

However, they had a renewed understanding of the ultimate moves of Martial Extreme, as if the moves had been carved into their minds during enlightenment, forming instinctive reactions!

It also felt like they perceived the emptiness and ethereal nature of the great outdoors!

Although they didn't perceive elemental power, they experienced significant improvements!

In terms of concentration and understanding of Martial Extreme, they saw noticeable enhancements!

It indeed seemed as Lin Beichen said, relying solely on willpower to forcefully practice martial arts would only enhance physique laboriously and slowly!

Chapter 285: My Roommate Can Perform Sword Flight!_2

Through appropriate meditation, enter the Visualization Realm, perceive everything about yourself, understand your strengths and weaknesses, and then practice and simulate enlightenment!

This is the true essence of the Visualization Realm!

A lightning ball appeared in Lin Beichen's palm, mixed with fiery red flames, complementing and blending with each other.

Fire within the lightning, lightning within the fire!

These two originally unrelated elements fused together under Lin Beichen's forceful fusion.

The entire training ground was illuminated brilliantly by this lightning ball!

Everyone widened their eyes, staring intently at the lightning ball in Lin Beichen's palm, with eyes full of yearning!

Every person present trained hard, hoping that one day they could follow Lin Beichen's path to immortality!

"That's it for today, remember, meditation and visualization are just as important as martial arts training!"

After showing the lightning ball, Lin Beichen ended this round of visualization.

He personally had no issues and could continue meditating.

But the warriors might not be able to sustain it any longer.

Lin Beichen calculated, it had been a long time since he left Imperial Capital University!

From setting off to Divine Light Country and then returning to Great Xia Kingdom, he had experienced a lot, and it was time to go back, after all, he was still a university student.

Before leaving, Lin Beichen rearranged the shifts of the sixty or seventy warriors training in immortality, extending the duration of meditation and visualization training.

This visit showed significantly more progress than the first day, Lin Beichen felt that if this continued, they might really perceive the existence of elements.

When Song Xiangdong learned that Lin Beichen was returning to Imperial Capital University, he did not try to retain him. Calculating the time, Principal Hao Jianhua would also be bringing other students back soon.

So, he arranged personnel to escort him.

Initially, it was decided that twenty police cars would escort, with a convoy leading the way, making it a very solemn scene!

Lin Beichen firmly refused. Such a scene could easily be mistaken for a state leader's travel!

It would draw too much attention, and he might be surrounded by reporters as soon as he reached the campus gate.

Later, under Song Xiangdong's insistence, the twenty police cars and convoy were replaced with one bulletproof car and seven escort cars, taking Lin Beichen back to Imperial Capital University.

...

...

Imperial Capital University.

Outside the school gate, people were coming and going, birds were singing, flowers were blooming, and the place was filled with the scent of books.

Eight black cars stopped outside the academy gate, and dozens of men in plain clothes neatly got out of the cars and stood in line to welcome Lin Beichen out of the car.

They couldn't help but attract attention, causing many passing students to stop and watch.

Lin Beichen got out of the car and saw this lineup, shook his head helplessly.

With his strength, he didn't need this protection. If there was a real threat, these people wouldn't be able to protect him.

However, he had heard that Song Xiangdong had placed undercover groups around and even inside the academy, monitoring potential threats.

Lin Beichen found this quite useful, as it could detect danger early and thwart criminal attempts.

Lin Beichen waved his hand, indicating they could leave.

He then walked alone towards the Imperial Capital University dormitory.

At this moment, the 207 dormitory was very lively with discussions!

Just as he reached the door, Lin Beichen heard the familiar voices of Han Yuan, Liang Dong, and Wu You!

"With my brilliance, I deduced there is only one truth!"

"The figure on Jingli Mountain's volcano must be Beichen!"

"He's always talking about immortality, and finally, he succeeded!"

"A red glow emanates from his body, protecting his fragile physical form!"

"Then! He withstands the volcano!"

"Surviving such a catastrophe! Now flying back to our Imperial Capital University on a sword!"

Han Yuan passionately stated his guess, gesturing like Conan the detective.

While speaking, he patted his chest, assuring that his guess couldn't be wrong.

This made Liang Dong and Wu You laugh so hard they clutched their stomachs and fell to the ground!

"That's too far-fetched!"

"Sword flight!?"

"Do you know how far Divine Light Country is from Great Xia Kingdom?"

"Not to mention, even if he could fly on a sword, wouldn't the air-defense missiles of the Divine Light Country shoot him down!"

"And in the airspace of Great Xia Kingdom, wouldn't the air defense identification network deploy fighter jets seeing an unidentified flying object!"

"Hello, you have entered the airspace of Great Xia Kingdom, please identify yourself!"

Wu You and Liang Dong pointed out the flaws in Han Yuan's guess one by one.

Han Yuan was still not convinced, scratching his head as he continued to analyze:

"Then he must have succeeded in immortality!"

"Captured by the military of Divine Light Country, taken to the dissection room!"

"By now, Beichen might have been dissected into eight pieces!"

As he spoke, Liang Dong and Wu You, who had been mocking him, suddenly froze and stared intently at something behind Han Yuan.

Han Yuan was puzzled, just about to turn around when a hand naturally landed on his shoulder.

It was Lin Beichen, having listened to Han Yuan's analysis of his own dire situation from outside the door, he couldn't bear to listen any longer and walked right in.

"Can't you wish me well for once!"

"Beichen!!!!!"

Han Yuan turned around at the sound and was momentarily stunned, then he hugged Lin Beichen tightly, unwilling to let go!

"It's Beichen!"

"You're back!"

Wu You and Liang Dong also came forward to pat Lin Beichen on the shoulder, their faces filled with joyful smiles!

"Damn, you brat!"

"Come on, tell us, was that silhouette on Jingli Mountain really you!"

"Yes, yes, Han Yuan and I made a bet, that that person was you!"

"We all called you, why didn't you answer!"

"Yeah, you had us worried sick!"

"We almost divided up your belongings!"

...

"You wanted to divide my stuff?!"

Lin Beichen immediately grabbed Han Yuan by the neck, pinning him against the bed, and tickled him relentlessly!

Han Yuan, laughing out loud, his face turned red!

"Wrong, wrong, let me go, Brother Lin!" freewebnovel.com

"No, sing Conquer!"

"Just like this, conquered by you~~"

In the end, Han Yuan was completely subdued, and gave up the idea of dividing Lin Beichen's belongings.

Wu You and Liang Dong laughed so hard on the bed that they nearly passed out!

Only after Han Yuan sang "Conquer" did Lin Beichen let him go, and then he began to recount his experiences on Jingli Mountain.

Of course, he couldn't admit that the figure was him, otherwise, there would be an uproar at Imperial Capital University!

"That was me!"

"I flew back to Great Xia Kingdom and landed at dorm 207 on a sword!"

Lin Beichen's explanation made all three of them laugh for a long time, especially Han Yuan.

It was his guess, and hearing it from Lin Beichen made him realize how foolish he had been!

"See, see, you still care about it!"

"I was wrong, I will stop making wild guesses!"

Han Yuan nearly knelt, begging to let this topic go.

Then Lin Beichen said seriously, "What are you thinking, that couldn't have been me!"

"I came back long ago!"

"I evacuated with the crowd when the volcano first became active, fortuitously hitching a ride with a tour group of retired cadres, to the consulate Great Xia set up within Divine Light Country."

"I returned home a few days ago, then went back to my hometown, where the signal is poor."

This all sounded very reasonable, a story Lin Beichen had planned before returning.

The response was as expected, his whereabouts were convincingly explained.

Though the three felt somewhat disappointed that their guess wasn't confirmed by Lin Beichen.

"Do you know, that figure was amazing!"

"If only it was you, wow, as your roommates, we could bask in your glory!"

"We even thought about calling you on a global live broadcast, the anticipation was thrilling!"

"Then we could tell everyone, our roommate is an Immortal! Our roommate can fly on a sword!"

"You and your sword flight!"

With that, Lin Beichen, Wu You, and Liang Dong chased Han Yuan out of the dormitory, heading to the campus food street for a celebratory meal.

Chapter 286: Is This What You Call Dealing with People?

"To express my apology, this time, dinner is on me!"

Han Yuan declared confidently, pounding his chest.

The group, from casual banter to arm-in-arm camaraderie, found a hotpot restaurant in the Imperial Capital.

...

...

Meanwhile, in the Volcano Research Institute's conference hall in Divine Light Country.

"Director, up to now, we have received 16 condemnation letters from various countries!"

"There have been 12 calls condemning us!"

"Among them, statements from five major countries have condemned our poor control measures!"

"Public opinion on major global forums is also extremely unfavorable towards us!"

Yano Yamakawa stood despondently in front of the hall, eyes fixed on the Emperor's portrait, listening to Gota Taiman's report.

"Furthermore, neighboring countries have stated that if control is inadequate, they will sever diplomatic ties!"

"Also....."

Gota Taiman's words were cut short by Yano Yamakawa, who had heard enough to give him a headache.

"How are the domestic reactions?"

This was Yano Yamakawa's most urgent concern; internal unrest is the most terrifying of all!

"The citizens' emotions are high, initiating multiple rounds of riots, also condemning our inefficiency....."

Gota Taiman swallowed his words because he noticed Yano Yamakawa's face had turned extremely grim.

"But fortunately, the cabinet has stepped in to pacify the situation!"

This was the only piece of good news Gota Taiman could offer.

Yano Yamakawa clutched his forehead, feeling a heavy pressure in his chest and acute headaches.

Recent news of uncontrollable magma in Jingli Mountain had placed a heavy burden on the Volcano Research Institute's director.

The cabinet was already impatient, assigning people to constantly pressure him for a swift solution.

At this moment, Yano Yamakawa wished to fall ill, but the responsibilities were immense, affecting several cities near Jingli Mountain.

If the chemical fuels in the chemical plant exploded, it would endanger the entire Divine Light Country!

Who could have thought that the dormant Jingli Mountain would erupt today!

Historically, Jingli Mountain had never endangered surrounding cities!

Moreover, the chemical plant's size is massive, with chemical fuels three times that of other countries!

Other countries dispersed their constructions, but Divine Light Country's compact territory forced chemical industries to concentrate.

If such a vast volume leaked, it would inevitably impact the entire Pacific ecological environment!

Once the magma reaches, it's game over!

"Is there really no other way?"

Yano Yamakawa muttered to himself, already considering the worst option.

That is to request assistance from Atlantis, using a bunker buster missile or a certain scale of nuclear missile to drill into the volcano surface and detonate.

Violently sealing the magma vents!

This plan's precise outcomes are unknown, but theoretically, it is feasible.

Hence, it remains Yano Yamakawa's last resort, a desperate gamble if no other measures work!

Ultimately, there's no escaping the disaster.

As he was feeling hopeless, Emergency Response Squad Commander Goto Eleven walked in.

"You came just at the right time. What is the progress of the corpse examinations?"

"Has there been any sign of the shadow on the mountain?"

"Or, has any corpse matched that figure?"

With a trace of expectation, Yano Yamakawa called Goto Eleven closer, raising several urgent concerns.

He believed that if there were no progress on the volcano, uncovering details about that shadow attracting worldwide attention, allegedly an immortal figure, would at least provide some positive news!

After all, there had been multiple reports of espionage activities from various countries in Divine Light Country, investigating the secret research into immortality!

This suspicion, if not clarified, could lead to unnecessary defensive measures from other countries towards Divine Light Country.

This global scrutiny, exclusion, or even hostility is terrifying!

Each recent event could, if handled well, boost one's political career rapidly!

Or earn acclaim among the domestic public!

Yano Yamakawa faced two significant problems simultaneously.

Goto Eleven hesitated, scratching his head awkwardly, unable to speak for a long time before finally mustering the courage!

"The corpses all came from Atlantis!"

"There were several male corpses and one intact female corpse, unburnt by the fire; she was beautiful, perfectly curved, with fair skin and slender legs..."

"Is that what I'm concerned about!?"

Yano Yamakawa glared at the drooling Goto Eleven, enraged by his frivolous talk about the female corpse, wanting to shoot him!

"Oh, oh, oh!"

"The deaths were strange; their heads seemed burnt by intense fire, leaving only skulls, but the flesh below remained intact!"

"There were no signs of weapons around the bodies capable of such temperatures, and the cause and identities are pending research results from the institute..."

Goto Eleven's eyes darted, trying to avoid Yano Yamakawa's cold gaze, feeling increasingly pressured and anxious!

Chapter 287: Is This What You Call Dealing with People?_2

The words grew quieter towards the end.

Shan Ye Yechuan looked at him in astonishment. Just as Gang Taitainan had said before, Gang Shiyilang pushed the female corpse hurriedly into the laboratory.

And now there were still no results, and they were making excuses, saying they had to wait for the research institute!

Thinking of this, Shan Ye Yechuan had already come to a conclusion in his heart. He was immediately furious, unable to repress the burning anger within him any longer!

He suddenly kicked Gang Shiyilang. This unexpected kick sent the well-trained 1.78-meter tall Gang Shiyilang flying four or five meters, collapsing uncontrollably to the ground!

The severe pain from his abdomen made his head feel groggy!

The entire conference hall instantly fell silent. Everyone turned and stared at the scene in astonishment!

They had never witnessed such a scene before. Since Shan Ye Yechuan took office, no such incident had ever occurred. Everyone seemed to understand; it might be due to the enormous pressure he was under.

They all felt sorry for Gang Shiyilang, who happened to be in the wrong place at the wrong time!

In reality, there were other reasons mixed in with Shan Ye Yechuan's anger. Based on his reactions, one could deduce a thing or two.

And from Gang Shiyilang's words, it was clear his admiration for the female corpse, and his flickering eyes revealed his guilty conscience.

"Do you know those people came from Atlantis!"

"They died within the Divine Light Country's borders and it's already unexplainable. If they request the bodies back and discover something from them, how do you expect Divine Light Country to explain?!"

"What you've done is inhumane!!?"

Shan Ye Yechuan sternly rebuked; his anger was still unresolved, wishing he could kick him a few more times!

"No, impossible!"

"I didn't! I really didn't! I was just admiring her figure!"

Gang Shiyilang hastily tried to explain while retreating, nearly causing Shan Ye Yechuan to pull out his gun and shoot him!

All the professionals from various departments present were terrified, breaking into a cold sweat at the thought of being shot for poor performance!

Seeing the shock on the others' faces in the conference room, Shan Ye Yechuan had to put away his gun.

"Leave it to the military court to handle!"

Shan Ye Yechuan sighed, motioning for the guards to take Gang Shiyilang away.

Gang Taitainan was the happiest inside, not only because he lost a political rival but also because he took credit for avoiding the disgrace of his inaction on Jingli Mountain.

Not long after Gang Shiyilang was taken away, news from the research institute arrived with the latest autopsy report.

However, the news they provided left all the professionals present dumbfounded!

The head of the corpse was severely burned by high temperatures, turning the skin and flesh to ashes!

Only the skull was left, and even the brain had turned to ashes!

The dissection of the body revealed no traces of gunshots, leading them to conclude the cause of death was the head being burned!

And it was a quick death, with no signs of resistance or struggle!

One male corpse was found with multiple bruises and several broken bones, but the fatal injury was also the head being burned by extremely high temperatures!

The research institute explained that there are many potential causes for such high temperatures!

Excluding lava, as lava's temperature would have turned even the skull into ashes!

The temperature was evidently lower than lava, but higher than normal flame guns!

Capable of instantly turning human flesh to bone!

The research institute proposed two hypotheses: one was some newly developed "new material weapon!"

The other, more credible, was "chemical substances!"

Indeed, some chemical substances can corrode human flesh instantly, but this has not been confirmed yet; it remains speculation by the institute!

In response to the report, the Volcano Research Institute's conference room fell silent before breaking into a cacophony of discussion!

The conference hall was abuzz with discussion for a long time. Finally, everyone oddly turned their gaze to the large screen in unison!

Shan Ye Yechuan had also made a judgment!

"That figure practicing cultivation!"

"It's highly likely it was his doing!"

"Compared to chemical substances, I believe more in the killing methods of that figure!"

"It must be that!"

"Otherwise, these series of miracles can't be explained!"

Shan Ye Yechuan, his eyes dazed, pondered for a long time. Finally, he slammed the table, making up his mind.

"Return the bodies to Atlantis, saying they died in the volcano!"

"Do not reveal anything else!"

Gang Taitainan was about to carry out the orders when Shan Ye Yechuan called him back!

"Wait!"

"Calculate the number of casualties caused by the volcano, find a few more bodies from Atlantis, and hand them over together!"

"Also, the exploration team at the Jingli Mountain volcano should not stop for a moment! Report any new findings to me at any time, 24/7!"

"Additionally, Gang Taitainan, the commander of the emergency response team will now be replaced by you!"

A long-lost smile appeared on Gang Taitainan's face. Though it seemed like a mere smile, inside, he was overjoyed.

This unexpected good news seemed somewhat anticipated, yet sudden.

He dared not delay Shan Ye Yechuan's orders, quickly assuming command of the emergency response team, and began organizing the casualty statistics.

...

...

In a spicy hot pot restaurant near Imperial Capital University in Great Xia Kingdom.

"Beichen, during your trip to Divine Light Country, did you get any local young beauties?"

"Yeah, yeah, I heard their masters are skilled in all kinds of tricks! So enticing, making you not want to come back!"

"..."

Han Yuan grinned at Lin Beichen, while Liang Dong with a simple smile echoed the topic.

In fact, they had seen some information about Divine Light Country online and were just trying to get confirmation from Lin Beichen.

"You guys are so perverted. Do you think Beichen is that kind of person?"

Wu You couldn't bear to listen any longer, feeling that Han Yuan was leading Liang Dong astray!

Lin Beichen did not rush to explain. Instead, he sipped the clear broth of the dual-flavored hot pot, biting into a piece of soft black corn. Seeing Han Yuan was still intent on questioning, Lin Beichen stepped on his foot under the table, face remaining stoic.

"You guys should stop reflecting your battle scenes from your phones onto others!"

"My bad, my bad!"

"Just curious, you know!"

Han Yuan, clutching his foot, realized his mistake, noticing that after returning from Divine Light Country, Lin Beichen's aura had changed significantly!

He had become more composed, with an inscrutable depth!

Han Yuan and Liang Dong, finding that they couldn't extract anything from Lin Beichen, dropped the idea but still felt he was hiding something yet couldn't pinpoint what.

"Hey Beichen, did you hear? Imperial Capital University is holding a sports meet soon!"

"With your kick earlier, I think you should sign up!"

A thought popped into Han Yuan's mind, recalling the university's sports meet in half a month.

"But the competition is pretty stiff! Back in high school, I was second in city-level athletics, but here, I dare not say I could rank!"

Liang Dong's opinion piqued Wu You's curiosity, prompting him to ask:

"No way, are there that many skilled people in Imperial Capital University? Even a city-level second could sink unnoticed?"

"Unlikely!!"

Wu You and Han Yuan both thought Liang Dong was exaggerating.

"It's true!"

"This university doesn't only admit students based on academic scores!"

"There are also special talent students admitted for their high competition achievements!"

"For example, the city's 100-meter first place in high school participates in East Mountain Province's finals and gets sixth place in that session!"

"Nevertheless, such a provincial sixth place is nothing here; there are plenty who have first places provincially!"

"So, are you genuinely encouraging Beichen to join or just making fun of him?"

Liang Dong shared his opinion, immediately drawing everyone's attention to Lin Beichen to hear his thoughts.

Chapter 288: Study God!

"Hey, Beichen, are you going or not?"

"Our physics department is known as the science freaks of the whole Imperial Capital University. People always compare us to those science maniacs in TV shows. Apart from doing physics research, you can hardly see anyone from our department in any other scene!"

Han Yuan and Liang Dong were a bit anxious. Ever since they majored in physics, they were practically isolated from all the clubs and sporting events outside.

They had become the science maniacs in everyone's eyes!

Throughout the long period since they enrolled, you could never see anyone from the physics department in any competition. They led an entirely anonymous existence.

"I want to give it a try. Beichen, why don't you sign up with me?"

Liang Dong invited Lin Beichen, wanting to take his chances. Maybe he'd grown a bit taller and could compete against provincial-level opponents!

"Alright, I'll give it a shot, but I'll just be your sidekick. Don't expect too much from me!"

Seeing Liang Dong and Han Yuan pleading so earnestly, Lin Beichen agreed. After all, he hadn't discovered the presence of any other Elements recently and had nothing better to do, so he might as well treat it as entertainment.

"I'll sign up too!"

"I'm in!"

Han Yuan and Wu You looked at each other and made the same decision.

Although each had different thoughts and purposes for signing up.

Han Yuan wanted to use this sports event to make a name for himself and use the opportunity to flirt with girls.

Wu You, on the other hand, wanted to see what the provincial-level champions Liang Dong mentioned were really like.

Liang Dong's goal was the simplest; he just wanted to build his courage, try to change his introverted personality, and test whether his physical strength had improved.

Lin Beichen had an even simpler reason—he was bored.

"207 Dormitory F4 Male Band, go!!!"

The four of them cheered and cracked open four bottles of beer, downing them in one go!

The next day, in the classroom, everyone was astonished to see Lin Beichen sitting in his seat!

Even the teacher who was about to begin the lecture was taken aback and almost didn't recognize Lin Beichen, the all-subject top scorer who was admitted to Imperial Capital University!

Since enrolling, Lin Beichen rarely showed up in class, which wasn't surprising.

Imperial Capital University was very open and flexible. The teaching methods were different; students were not required to attend classes as long as they could earn enough credits to graduate!

Many students immersed themselves in laboratories following certain professors' scientific research right after enrollment, gaining knowledge no less than what they would get in classrooms!

Classroom teaching was more of a supplementary method, emphasizing practical combination. After all, physics itself is primarily based on experiments.

Lin Beichen showed up in class this time just to make an appearance, so it didn't seem like there was no one in the whole class. He didn't want to make things too difficult for Hao Jianhua either, since frequently requesting leave wasn't good for his reputation.

People who didn't know might think the all-subject top scorer was taking a correspondence course!

Lin Beichen came to class also to catch up on his physics knowledge, having been absent for so long without hearing a proper lecture.

"Lin Beichen, how long has it been since you last attended my class!?"

"It's almost midterm exams. Did you really think you could handle university as easily as you handled high school top scores?"

The female teacher in the class saw Lin Beichen and felt somewhat disrespected by him.

In her eyes, her course, dealing with mathematical equations, was paramount. Everything was tied to mathematics, the foundation of science!

In physics research, mathematical model calculations are both difficult and crucial!

One could say that if the mathematical formulas were accurate, you could calculate everything!

Mastery of abacus skills wasn't a joke!

And now, Lin Beichen, not even showing up for such an important class, seemed to be disrespecting the subject.

"Teacher, you can test me with a problem!"

Lin Beichen stood up and answered politely.

The female teacher, seeing this, said no more and swiftly drew a complex problem with chalk on the blackboard, quickly filling up half of it within minutes!

Yet, it was just a single equation!

A single equation that filled half the blackboard!

The other students in the class were immediately shocked. They had never seen such a long formula in their studies.

Some even began quickly flipping through their textbooks, trying to find similar problems or solution tutorials!

"Solve it!"

"Keep the final four decimal places!"

The female teacher put down the chalk and clapped the chalk dust off her hands, exuding confidence in her problem.

The classroom buzzed with excitement. Some of the top students began calculating on their scratch papers, trying to see if they could solve it too.

Lin Beichen stood up and walked toward the podium.

Meanwhile, various discussions erupted among the students:

"Holy crap, this problem looks like the test question from the last few pages of the textbook!"

"What? She gave us the final exam question directly?"

"No way! We haven't even been taught how to solve this yet. We're only halfway through the book!"

"I can't solve this, no way!"

"No starting point at all!"

"The teacher is ruthless. She's giving Lin Beichen a hard time!"

"I feel like only the second-year students could solve this!"

...

Lin Beichen ignored the discussions and walked toward the podium while the complicated calculation ran through his mind.

Chapter 289: Study God!_2

At the same time, he was flipping through books and found relevant problem-solving cases.

The female teacher looked at Lin Beichen flipping through books as he walked and couldn't help but chuckle a few times.

"There are no answers in the books!"

"There are only cases, but even if there are cases, you can't understand them without explanations!"

"If you can't solve it, I will report to the principal, and you won't be allowed to miss any class in the future!"

"Also, you must complete... complete..."

Before the female teacher finished speaking, Lin Beichen had already walked up to the blackboard with the book in hand, without pausing or looking at her.

Instead, he grabbed a piece of chalk, and with a few swift moves, wrote down the answer!

Just like that, effortlessly!

Without even making a draft, he directly wrote down the answer next to the equal sign!

In the distance from his seat to the blackboard, Lin Beichen had already completed the calculation in his mind!

Before the female teacher finished speaking, she was stunned into silence!

She looked in disbelief at the string of numbers near the equal sign, thinking it was impossible!

"Teacher, did I get it right?"

Lin Beichen still asked the female teacher respectfully whether the answer was correct.

In fact, he didn't know this mathematical formula at all before the female teacher called on him.

But during his walk to the blackboard, with his extraordinary talent, he inferred the solution to the problem on the board by comparing it with the cases in the book and completed the calculation in his mind.

The class instantly went silent, everyone held their breath and stared at the blackboard, waiting for the teacher's response!

This also made Han Yuan, Liang Dong, and Wu You, who sat next to Lin Beichen, break out into a cold sweat for him.

"The answer is correct!"

The female teacher was shocked for a moment before finally giving a reply. She tried to control the shock on her face, but her heart was already in turmoil!

She never thought that someone who had hardly attended her class could so easily solve a mathematical formula that she had just improvised!

She was convinced that this answer couldn't be found in any book!

Nor could it be found online!

It was a spur-of-the-moment question, and even seniors would struggle to solve it in such a short time.

Moreover, he did it without making any drafts!

"I'll give you another problem. If you can solve this one, you can come and go from my class as you please!"

The female teacher still didn't quite believe it, thinking maybe Lin Beichen just happened to have studied this problem before; otherwise, such talent would be astonishing!

"Sure, teacher, go ahead!"

Lin Beichen agreed without thinking, respectfully made a gesture of invitation, and then stepped aside to wait.

The female teacher then wiped the blackboard clean and started writing with chalk once more. This time it took a bit longer as she calculated in her head for a while.

She changed the problem midway, editing it several times!

In the end, she incorporated all the knowledge she had learned from this course over the past few years into this one problem!

She thought that if he could solve it, she would give him full marks for this course!

The entire blackboard was filled with dense numbers and symbols, covering every corner!

The top students and class representatives in the classroom, upon seeing the full blackboard of numbers and symbols, immediately gave up!

They didn't even bother flipping through their books, as there were no such complex mathematical formulas in the freshman textbooks.

Everyone unanimously believed that the teacher was making a statement!

Aiming to break Lin Beichen's arrogance! And to demonstrate to everyone that there is no end to mathematics!

That what everyone learned is merely superficial, not even at the threshold!

This problem left everyone in the classroom feeling utterly bewildered!

"Go ahead!"

The female teacher handed the chalk to Lin Beichen and then stepped aside.

However, this problem indeed stumped Lin Beichen. To him, it was like asking a kindergartener to solve a problem that even a high school teacher couldn't solve!

"Teacher, I can't solve this problem!"

Lin Beichen honestly conveyed his current predicament.

This statement lifted a lot of weight off the shoulders of everyone in the classroom, as the question itself was headache-inducing. If someone could solve it, that would be unbelievable!

And this person hadn't even been to class a few times, so what did that make those who attended every day?

Upon hearing this answer, the female teacher finally showed a calm smile, adjusted her glasses, and said:

"It's normal not to be able to solve it, sit down and pay attention in class!"

"Being able to solve the first problem shows you have some talent, but in the face of boundless mathematics, it's far from enough!"

Lin Beichen shook his head and said, "Teacher, there's a mistake in this problem!"

"Based on the final formula, it has hundreds or even thousands of solutions!"

"...."

Upon hearing this, the female teacher gasped, staring intently at the string of characters Lin Beichen pointed out!

Sure enough, as Lin Beichen said, she had used multiple formulas to increase the difficulty, overlapping them, and included the most challenging formulas from the entire semester!

She hadn't carefully examined the compatibility of these formulas when combined.

The female teacher then recalculated using her notes and filled two pages of scratch paper, finally confirming that Lin Beichen was right!

She was shocked!

She scrutinized Lin Beichen with disbelief, even suspecting that a new math prodigy was about to be born!

After a while, the female teacher finally withdrew her gaze, corrected the erroneous characters in the formula, making the entire calculation process coherent and error-free!

"Alright, you can give it another try!"

The female teacher stepped aside again, handing the chalk to Lin Beichen.

This time, though, Lin Beichen didn't write the answer directly as before.

"Teacher, may I borrow your notes on the calculation?"

The female teacher felt puzzled. The notes only proved there was an error and had nothing to do with the final answer!

Thinking it wouldn't help with solving the problem, she handed them to him.

Lin Beichen took the notes, instantly running calculations in his mind, and quickly grasped the teacher's problem-solving approach!

But it still took him a long time, over half an hour, before he finally wrote the answer on the blackboard.

The female teacher took a look and exhaled deeply, "Beichen, from now on, you can come and go as you please in my class!"

After saying that, she left the classroom. They had already been dismissed for a while, and everyone stayed to see if the final answer was correct.

Upon receiving the teacher's reply, the entire classroom erupted in excitement!

At that moment, Lin Beichen became a legendary figure in their eyes!

...

...

Within the Divine Light Country, at Shenzhao University.

Hao Jianhua, along with the remaining students who participated in the academic exchange at Shenzhao University, did not rush back to Great Xia.

After learning that Lin Beichen was safe and had been sent back to Imperial Capital University by the Security Bureau, and that all the procedures for their group had been completed with the Security Bureau's involvement,

There was no longer anything to worry about.

So Hao Jianhua continued the academic exchange at Shenzhao University with the remaining students, ensuring that they prepared summaries and reports of their exchange experiences.

Followed by various networking gatherings, photography sessions, and handshakes and photo-ops with Shenzhao University President Nohara Hikofu.

The goal was to maximize the impact of this academic exchange, showcasing it to the media and other rival universities.

It also added credibility to Imperial Capital University.

Even though the volcanic activity within the Divine Light Country continued, the academic atmosphere at the university remained vibrant and unaffected.

After a week of completing all the projects and procedures of this academic exchange, Hao Jianhua finally led the students away from Shenzhao University and headed back home.

Chapter 290: Tactical Armor-Piercing Nuclear Warhead!

Hao Jianhua's return to the Great Xia Kingdom this time was prompted by the upcoming grand university sports event at Imperial Capital University, where he was needed to preside over the opening ceremony.

Shenzhao University's president, Nohara Hikofu, personally saw him off and dispatched a special plane for the scholars involved in the academic exchange to return.

President Nohara Hikofu apologized all the way until Hao Jianhua boarded the plane, then stopped to bid farewell from a distance.

He feared that the eruption of Jingli Mountain would affect relations between the two universities, possibly disrupting academic exchanges.

In Nohara Hikofu's view, Shenzhao University still lagged behind Imperial University in world university rankings, and the relationship needed to be maintained!

After all, the Great Xia Kingdom's culture, with its thousands of years of history, offered many aspects worth borrowing.

Meanwhile, near the crater of Jingli Mountain.

Ganta Tanaka had just been promoted to the Chief Commander of the emergency response squad, which was one rank higher than the head of the Volcano Research Institute!

As the saying goes, a joyful spirit brings vigor; personally leading the team up the volcano, he reached the nearest point to the crater.

The lava on this side of the mountain had long cooled, but the lava on the other side continued to flow.

Standing at the top, they could see the lava resembling a long red dragon crawling on the ground, with its head spreading expansively towards the surroundings.

This dragon was still extending, and its head was slowly expanding!

It seemed to have the tendency to swallow everything!

The emergency response team, watching this from the summit, felt a chill down their spine.

The damage caused would be difficult for the Divine Light Country to compensate for within the next ten years!

The original cityscape had long been destroyed, surpassing even the destruction of war!

Thick smoke billowed, volcanic ash filled the sky and did not dissipate, the air was filled with burnt debris, making breathing difficult.

"We need to speed up the progress and detect the volcano surface conditions!"

"The world's countries are waiting for us to give an accurate answer!"

"The Emperor and the Cabinet are waiting for our news!"

Ganta Tanaka's team made the final mobilization, determined to detect the surface activity patterns!

Because at this moment, the Volcano Research Institute was bearing the pressure of global condemnation and threats of diplomatic severance from major powers!

There were internal protests, cabinet pressure, and the Emperor's urging!

Atlantis even suggested uncontrolled aggression, directly using nuclear bombs!

The whole world was watching the latest news about the volcano, focusing on whether it would affect the nearby chemical plant.

This time, Ganta Tanaka brought the latest detection equipment, and the team arranged detectors around the crater to establish a real-time monitoring network of surface activity!

They mapped the intensity of surface activity to provide data to Sakawa Shigeki, who would decide whether to use the nuclear bomb to level the ground!

This was a significant matter; every person arranging detectors dared not slack off!

Even the helicopter live-streaming platform in the air was forcibly taken down, aiming to relieve the mental pressure on Ganta Tanaka and his team.

However, the effect was noticeable, the team's efficiency greatly improved, and with Ganta Tanaka personally leading as Chief Commander.

They quickly arranged the detection devices at the crater!

"Group A has completed the setup!"

"Group B has completed the setup!"

"Group C has completed the setup!"

"Group D has completed the setup!"

...

A total of 8 groups spread out, arranging 128 sets of the latest detection equipment at Jingli Mountain's crater.

After receiving the reports, Ganta Tanaka immediately linked this data to the Volcano Research Institute's data network, as calculations required transmitting data to the institute's supercomputer for conclusions.

"Director, data successfully connected with the research institute!"

"I am leading the emergency response team, standing by at all times!"

Ganta Tanaka promptly called the research institute, greatly reassuring Sakawa Shigeki.

This was Ganta Tanaka's highest efficiency ever!

After hanging up the phone, the broadcast director switched the screen to a data interface.

Sakawa Shigeki pressed the final password, and the supercomputer received the data from the summit of Jingli Mountain and began calculations.

At that moment, a red phone on Sakawa Shigeki's desk rang.

This phone connected to the Cabinet and the Emperor; usually, it wouldn't ring for years!

Sakawa Shigeki frowned immediately, stopped his work, and hurriedly answered the phone!

The familiar voice from the other end was that of a Cabinet liaison officer!

"We can't wait anymore; the Cabinet ministers have decided to accept Atlantis's nuclear bomb leveling proposal!"

"You urgently need to make a damage estimation report and post-disaster measures!"

"But....."

"Shouldn't we consider the radiation from the nuclear explosion?"

Sakawa Shigeki had kept this proposal deep down because of its uncertainty!

And the radiation from the explosion!

Although it's a penetrator!

Directly hitting the volcano surface to explode, using special substances inside the nuclear bomb, it could quickly solidify the lava!

Thus achieving the method of leveling the crater!

"Only underground explosion won't cause surface radiation!"

"Jingli Mountain will be declared a forbidden mountain in the future!"

"All residents continue to retreat!"

"The plan has got the Emperor's approval, just follow it!"

"But the new round of detection has just begun, calculations are ongoing! Should we....."

Sakawa Shigeki started to say, but ultimately swallowed his words, and the call on the other end was simultaneously disconnected.
