

## **Another World 1521**

### Chapter 1521: Wild-natured Beauty

Although other people didn't know, Huang Daoran and Feng Baiming did. When the two heard that the Bug Race were returning to Fabio Planet, they immediately knew that this was because of Zhao Hai.

But since the transmission formations were sealed up, news couldn't spread as much. Huang Daoran could only accept the news. Fortunately, the bugs have retreated, they no longer have to worry as much.

Zhao Hai was still flying forward with no stopping. Moreover, he felt that as he continued forward, the bugs he met were getting stronger. Now, the bugs blocking his way had Transcending Tribulation-level strength. He didn't know how these bugs crossed their tribulation, but they did indeed had traces of the Transcending Tribulation Stage.

Zhao Hai could feel that he was getting closer and closer to the heart of the Bug Race. This was because he could feel the danger increasing. This danger was definitely not because of the bugs in front of him, but the Queens Nest instead.

After killing some Transcending Tribulation-level bugs, Zhao Hai suddenly felt that the bugs ahead of him had vanished. This caused him to stare. Then he immediately drove the Hell King's Ship to head directly inside.

After breaking through two entrances, Zhao Hai appeared in a very enormous space. In this Space was an incomparably huge lava pond. The lava inside gurgled and bubbled. One could see at a glance how hot it was.

Above this space was a huge egg-shaped meat sac. This meat sac looked like an enormous egg several hundred meters high and nearly 100 meters wide. There were a lot of fleshy membranes connected to the sac. The membranes looked like strips of muscles. Part of these strips were connected to the top of the cave while some were connected to the lava pool underneath. Most of the strips were hung across to the surrounding walls.

Zhao Hai stared at this scene. Then he noticed a few fleshy pipes connected to the sac carrying water from outside. There were also pipes coming from below sucking lava into the meat sac.

Zhao Hai couldn't help but raise his brows. The temperature of the lava wasn't that high. However, it was still unexpected for the meat sac to be able to take it in. Looking at this egg, it doesn't seem to be very strong. However, why does he feel that there's something dangerous inside?

At this time, a young lady's laughter could be heard. Then a female voice was heard, "What? Are you interested in this little treasure of mine?"

Zhao Hai stared, then he looked at the egg. The egg's surface fluctuated before a falling sound was heard. A female then walked out. This female was completely naked.

Her skin was very white, nearly transparent. Her hair was pitch black but very long, dragging from the top of her head to her heel. Her hair was braided and was fixed with a ruler-length bone hook at the tip. The hook was cold white, looking very beautiful. At the same time, her hair was constantly moving like a conscious snake. It swayed side to side.

Zhao Hai was curious about this woman. Zhao Hai couldn't say that she was very attractive. However, her wild nature added a lot to her charm. Her figure was perfect. She was fat wherever she needed to be fat and thin where she needed to be thin. Considering the place she was in, she looked like a subject inside a painting.

The seductive nature of her aura didn't come from her naked body but instead her temperament. Her eyes and gaze made her fatally attractive.

Despite her charms, Zhao Hai was calm as he looked at the woman. This woman came out of the egg and she also called it her little treasure. From this point, it seems like this female was inseparable from the Bug Race. She might even be the queen of the Bug Race. The most important thing about her was the feeling of danger surrounding her body. This danger was even stronger than the ones Zhao Hai felt on Immortal Experts.[1]

A female from the Bug Race that had a more dangerous aura than Immortal Experts. If Zhao Hai still dared to treat her as an ordinary person, then he would be an idiot.

Seeing that Zhao Hai didn't speak, the female smiled and said, "What? Are you curious about who I am?"

Zhao Hai gave an honest nod and said, "I'm indeed curious. Who are you? If you're from the Bug Race, then why do you have that form? And to be honest, you look like a beautiful woman. I didn't expect the Bug Race to understand the aesthetics of human beauty. It honestly surprised me."

Hearing Zhao Hai, the smile on the woman's face widened even more. However, her face revealed the doubt on her face as she explained, "I also don't know who I am. I only know that I cannot leave this place. As for why I have this form, I also don't know. In any case, this is me. Why, do you like me?"

Zhao Hai stared, but he changed the topic and asked, "Why do you attack Cultivators?"

The female smiled and said, "They're the ones who attacked us first. But also, I can obtain a lot of benefits from them. They can make us more powerful. I don't know why we must become powerful. However, I want to be more powerful. Isn't that a good reason?"

Zhao Hai smiled bitterly. He really didn't know what to say. He looked at the female and said, "So what do you think about me?"

The female immediately answered, "Naturally, I want to eat you. You're very powerful. After eating you, I will become even more powerful."

Zhao Hai was speechless. This female couldn't even be considered to be a female human. She's just a very intelligent beast.

A beast eats because they're hungry, and this woman wants to eat to make herself stronger. In her opinion, since eating would make her stronger, then why can't she eat? And with someone coming over to provoke her, it'll be a pity if she doesn't eat them.

Looking at the female, Zhao Hai sighed and said, "I'm afraid you won't be able to eat me."

The female smiled and said, "That is still uncertain." After she said that, she flung her hair as it extended and the bone hook headed straight towards Zhao Hai.

Although the cave was big, Zhao Hai still couldn't use the Hell King's Ship. Zhao Hai already put the Hell King's Ship away. Seeing the female attacking him using her bone hook, Zhao Hai immediately swung his sword. A moment passed and a 'dang' sound was heard as the sword hit the bone hook. The flying sword bounced back. What shocked Zhao Hai was the fact that the bone hook left a dent on the flying sword. This was the first time this has happened.

After blowing the flying sword back, the bone hook still flew towards Zhao Hai. Zhao Hai was taken aback, then his body flashed yellow before he stretched his hand and caught the bone hook. Zhao Hai's hand has turned into a yellow crystal.

The female bug didn't expect Zhao Hai to capture her hair. Her face had an astonished expression. She threw herself forward while turning her hands into two blades.

Zhao Hai didn't think that the female bug would become aggressive this quickly. However, he didn't think much about it. He let go of the bone hook and took out two axes. He then met the charge of the female bug.

'Dang' 'Dang'

Two collisions were heard as the two axes collided with the two blades. Zhao Hai's arm trembled. He was surprised with the woman's raw strength.

It must be known that Zhao Hai was currently using the Demon Subjugation Technique. Despite this, he felt his arms tremble upon receiving the female bug's blades. One could see how formidable the strength of this female bug was. However, Zhao Hai didn't have any time to think about this as the female sent a kick towards him. At the same time, she used her hair to attack Zhao Hai.

Zhao Hai's body changed. He no longer had his axes and was instead wearing gloves. At the same time, his feet turned metallic. He was using both the Descending Dragon Technique and the Crouching Tiger Technique. Zhao Hai knew that he could no longer use conventional methods or else he wouldn't be able to fight against the female bug. This person was just too dangerous, more dangerous than any Immortal Expert he met so far.

These Immortal Experts had artifacts during battle yet this female bug didn't have any. She used her body as her weapon. Moreover, her hands and feet could turn into extremely hard bone blades. Most

importantly, her attacks were very formidable. Zhao Hai already covered his hands and feet with the transformed liquid silver. These defensive equipment also had yin-yang lightning ponds inside to provide Zhao Hai with energy to block incoming attacks. Even so, he still felt the powerful attacks of the female bug.

Zhao Hai no longer had any stray thoughts at this point. All of his mental energy was focused on dealing with the female bug in front of him. She was truly strong, far from what he expected.

Although Zhao Hai had already crystallized his body and was no longer afraid of any attacks, he was still threatened by the female bug's attacks. Zhao Hai was almost certain that he would still be heavily injured if the female bug was allowed to hit him a couple of times.

Because of this, Zhao Hai had to be careful in making his moves. The two exchanged more than 100 moves. It was very rare for Zhao Hai's battles to last this long. At this level, after probing each other, the two combatants would use all of their strength to deal with their enemy. Battles lasted very short periods. It was possible to win in just a few moves.

But this time, it was actually different. Zhao Hai was forced to use his full power. Moreover, he can feel that the female bug was also using all of her power. Zhao Hai believed that, besides him, other Immortal Experts wouldn't be able to leave this place alive. If they want to leave this place, then they would need to defeat this female bug. But this female bug was very strong. It would be very hard to defeat her!

The two exchanged moves another 100 times. Without the support of the Space, Zhao Hai wouldn't have been able to fight this long against this female. This caused Zhao Hai to be startled. His facial expression turned serious.

At this time, the female bug retreated and returned to the huge egg-shaped sac's side. Also, all of her weapons disappeared as she returned to her original appearance.

Zhao Hai stared, but he was still on alert as he looked at the female bug and said, "You're not trying to eat me anymore?"

The female gave out a charming smile as she said, "I couldn't win against you. So I can't eat you. You can leave."

Zhao Hai was stunned. He didn't expect this female bug to say these words. He looked at the female bug in confusion and found that she was also looking at him. This woman's look was very bewitching. And the fact that she was naked made Zhao Hai feel like he was turning into a hungry wolf.

Zhao Hai took a deep breath to calm himself down. He looked at the female bug and said, "Why are you staring at me? Do you have anything to say? I told you, I will not let you eat me. I cannot leave now, unless you forbid the bug race from leaving the planet."

The female bug knit her brows and said, "I won't eat you anymore. But you can accompany me. It's boring here. Although the children can stay with me, they can't speak. I'm truly bored. How about chatting with me?"

Zhao Hai stared, he asked, "You can't leave? How can someone as strong as you be unable to leave this place?"

The female bug snorted and said, "I would have left this place if I can leave. Why would I stay in this place? Do you think it's fun here? Aside from sleeping, I can only command the children to find something to eat. I'm very bored. I was like this ever since I was born. I can't leave too far from this place. I tried it before and I almost died. From then on, I didn't dare to leave this egg anymore."

Zhao Hai stared. He couldn't help but turn his head towards the large egg-shaped sac. His two eyes shone as he looked at the female and said, "You really want to leave this place? If I help you, will you leave?"

Zhao Hai originally wanted to absorb the queen's nest into the Space. But with this female bug, Zhao Hai found it impossible. Hearing that the female bug wants to leave, Zhao Hai felt that an opportunity has come!

At this point, just think of the Bug Race as the Zerg from Starcraft.

Chapter 1522: Seals!

When she heard Zhao Hai, the eyes of the female bug shone for a moment. Then she turned vigilant as she snorted and said, "I won't be fooled by you. You cannot help me to get out of here. You want to trick me and then eat me. I know how sly you humans are."

Zhao Hai stared, he asked, "You know about Humans?"

The female proudly humphed and said, "Of course I do. I obtain part of the memories of those I eat. You Humans aren't good people."

Zhao Hai smiled bitterly. It seems like eating and being eaten was normal in this female bug's vocabulary. This made him feel uncomfortable. But he still said, "I really can take you out of here. Not only you, we can even take the huge egg over there. This way, you won't leave the egg and you won't lose your strength. What do you think?"

The female bug was silent when she heard Zhao Hai. It's obvious that the prospect of leaving this cave was very attractive to her. Although she still didn't believe Zhao Hai, she was beginning to hesitate.

Seeing that his words managed to move the female bug, Zhao Hai added, "I can take you out of here, but I don't want you killing other people. You're so powerful that I can only fight you to a draw, so it's impossible to stop the Bug Race from killing people. So as long as you promise to not kill anyone, I will take you out of here. What do you think?"

When the female heard what Zhao Hai said, the hesitation on her face seemed to decrease. She knew why Zhao Hai came here today. This was because the Bug Race had been killing people outside. Now that Zhao Hai said that, she was more convinced of his reason.

However, she still said, "How will you take me out?"

Zhao Hai smiled faintly and said, "I'm a spatial ability user. I can take living beings inside my space. If you don't believe me, you can take a look." Zhao Hai waved his hand as two silverwhip snakes came out of a spatial rift.

Zhao Hai looked at the female bug as the two silverwhip snakes ran up to him and then he said, "These are beasts I raised in the past. They stayed inside my Space all this time. What do you think? Since my Space can take in living beings, naturally I can take you and your egg as well."

The female bug looked at the two silverwhip snakes and the hesitation on her face reduced once more. But she still said, "That's no good. Everything here is connected to water above and lava below. If you took me and the egg away, there would no longer be any water and lava. The egg wouldn't be able to survive."

Zhao Hai paused for a moment. Then he smiled and waved his hand and took out a small vessel. He handed it to the female bug and said, "This is a spatial artifact. I can remodel the inside of it to be similar to this cave. This way, you will be able to survive, what do you think?"

When the vessel arrived in front of the female bug, it quickly became bigger and bigger. It would have expanded more if it weren't afraid of damaging the fleshy membranes of the egg.

The thing that Zhao Hai took out was the Hundred Spirits Tree fruit. Although the fruit had many uses, Zhao Hai rarely took it out. This item was heaven defying. Although it was much worse than the Space, other cultivators would treat it as a treasure. If a cultivator were to get their hands on this fruit, they would no doubt refine it to be their life source artifacts.

Besides its other functions, one of the most important aspects of the Hundred Spirit Tree fruit was its lack of attribute. In other words, anybody can refine it to be their life source artifact.

Think about it, an artifact that can be used for transportation, can help with cultivation, can defend and attack, and can even be planted on. Any cultivator would want to have their hands on it. Because of this, Zhao Hai didn't take it out. If he did, then he would certainly cause a bloody war in the World of Cultivation.

The World of Cultivation was a place where the strong prey on the weak. Anyone who can get their hands on the Hundred Spirits Fruit would greatly benefit from it. However, this was in exchange for the amount of blood spilt on acquiring the fruit. Killing people to steal their treasures happen from time to time in the World of Cultivation. Once the Hundred Spirits Fruit comes into light, it would certainly attract a large amount of attention akin to a heavenly sword or a dragon killing blade.

This was the first time that Zhao Hai took out a Hundred Spirit Fruit. He did this to deal with the highly suspicious mindset of the female bug. If he didn't take it out, then she wouldn't enter the Space. As long as she enters the Space, everything else would be fine.

The female bug looked at the Hundred Spirits Fruit. Although she wasn't an expert in using spiritual force, she could still feel how formidable the fruit was.

Upon scanning the Hundred Spirits Fruit, the female bug was shocked. It was actually larger than what she expected. Moreover, planted on the fruit vessel were all kinds of plants. Inside was a cave almost exactly like the cave they were in right now.

The female bug looked at Zhao Hai in surprise. Zhao Hai smiled and said, "What do you think? If you want, you can move into it. I can then take you out of here. I can even take your children away with you."

The female bug looked at Zhao Hai and then to the Hundred Spirits Fruit vessel. To be honest, the prospect was very attractive for her. She had always wanted to leave this cave. And now that an opportunity had presented itself, how could she not agree.

When she thought of this, the female bug looked at Zhao Hai and said, "Alright. You can take me out of here. I can promise that we will no longer kill people."

Zhao Hai smiled and said, "Then, please."

Zhao Hai believed that the female bug had a way to move the egg into the Hundred Spirits Fruit. Sure enough, the female bug looked at Zhao Hai and then stretched her hand out towards the egg sac. She closed her eyes for a while before the egg sac squirmed slightly. Then the egg sac's fleshy membranes retreated back. The egg sac turned into a detached egg.

The female bug leapt on top of the egg. Then she looked at the surrounding walls with a solemn expression.

Then at this time, as the two tubes connected to the top and bottom of the egg withdrew, a stream of clear water leaked in. When the water fell on the love below, a spray of cloud and mist immediately filled the cave, making it look like a fairyland.

After that, the female bug waved her hand as the egg flew towards the Hundred Spirits Fruit. Seeing the female enter the fruit vessel, Zhao Hai couldn't help but feel delighted. Then at this moment, a sudden change occurred.

As the female bug entered the fruit vessel, countless symbols lit up around the cave. These symbols were composed of countless Buddhist swastika(卐). These symbols then proceeded to rush towards the fruit vessel.

Zhao Hai was startled. He could see that these symbols were seals. Someone actually sealed the Bug Race here? Who was this person? Why did they do this?

As Zhao Hai was puzzled, the symbols fell on the fruit vessel. A huge explosion was heard as the Hundred Spirits Fruit vessel exploded. Both the female bug and the egg appeared back in the cave.

Seeing that a seal was about to fall into the female bug, Zhao Hai immediately appeared before her. He waved his hand and sent the female bug and the egg into the Space. When the female bug saw the symbols, she seemed to be stunned stupid. She didn't even notice Zhao Hai's movements before she was sent to the Space.

When Zhao Hai sent the female bag into the Space, the seal arrived. However, the seal no longer went after the female bug but instead it entered Zhao Hai's body. Zhao Hai suddenly felt a foreign strength enter his body. Zhao Hai felt a tearing pain as it drilled into his body.

At this time, Faith Power exploded from within Zhao Hai's body and met with the foreign energy. The foreign energy was formidable, but it became like snow being melted by the sun when it met Zhao Hai's faith power. Before long, the faith power proceeded to swallow the foreign energy.

This was the second time that Zhao Hai saw his faith power swallow another strength. The first time was the tribulation lightning and now it was an energy of sealing. How did this happen?

While Zhao Hai was thinking about what happened, he felt the energy being swallowed by faith power re-enter his body. Then the qi inside his body seems to have evolved as if something was added. Originally, Zhao Hai's qi was silvery-white with a trace of lightning on it. But now his qi has become golden yellow. Although the lightning still looked the same, Zhao Hai could feel that it was much stronger compared to before.

Besides his lightning, Zhao Hai felt another type of energy on his qi. Zhao Hai couldn't help but investigate it to see what it was.

Before long, Zhao Hai felt the new energy inside his body. Unexpectedly, it was Buddhist qi! Buddhist Qi and ordinary qi were different. Generally, Buddhist Qi could only be acquired by attaining enlightenment. This kind of qi was useless for people who don't cultivate. Ordinary cultivators with Buddhist Qi would find their attacks infused with buddhist light allowing them to ward off all kinds of evils. Despite this, it wasn't very useful for Zhao Hai.

However, Buddhist Qi was a supreme weapon for those who practice Buddhism. Using Buddhist Qi to practice Buddhist Techniques would result in twice the reward with only half the effort. It would also increase the strength of any attacks using Buddhist Techniques. It can be said that Buddhist Qi was something that all Buddhist longed to obtain.

Unfortunately for most Buddhists, Buddhist Qi could only be acquired by High Monks who attained enlightenment. These High Monks would hardly fight anyone. Unless they were dealing with extremely evil beings or traitors, these High Monks wouldn't kill. Instead, they would seal these beings.

#### Chapter 1523: Level Up

Zhao Hai began comprehending Buddhist Qi. Buddhist Qi began to be integrated into Zhao Hai's own qi and changed it. Before this, Zhao Hai's qi was dazzling like the stars, but it was sharp and quite savage.

This savageness didn't mean that Zhao Hai's spiritual qi was evil. This savageness was merely the feeling that his qi gave out. In the past, Zhao Hai's qi was like an unsheathed double-edged sword, sparkling with cold light. It's very lethal but it made people feel uncomfortable.

But now, Zhao Hai's qi was filled with purity, tolerance, and mercy. This made Zhao Hai's spiritual qi appear noble and dignified. It's something that wouldn't show itself unless required.

Zhao Hai can feel that the Buddhist Qi inside his body was indeed the true Buddhist Qi. This was because he could see that it was infused with an endless amount of mercy as well as good intent. Moreover, it brought upon an holistic change to his spiritual qi.

At the same time, on top of the Dao Lotus on Zhao Hai's tanzhong(chest) acupoint, a long-haired buddha appeared. This long-haired Buddha had the exact same appearance as Zhao Hai. The Buddha's eyes were closed and a faint smile could be seen on his face. He exuded an aura of great kindness.

Naturally, Zhao Hai had no idea what this Buddha could do. But after it appeared, the avatar in the baihui acupoint above his head has become stronger. Moreover, its smile was beginning to resemble a Buddha.

Zhao Hai didn't care much about these things. However, he could feel how advantageous this Buddhist Qi was for his 18 Buddhist Techniques. Take the Enlightenment Technique for example. It was Zhao Hai's most studied technique among the 18. The benefits of this technique were infinite. This was especially true for its ability to convert an enemy to his side.

Zhao Hai let out a long breath. Then shortly after he heard a prompt from the Space, "Hostile Bug Race Queen detected. Subjugating. Subjugation completed. Infinite evolution ability detected. It is currently weak. Extracting the evolutionary ability and integrating it to the Space. Integration completed. Space may now evolve by itself. All living and nonliving things inside the Space have gained the ability to evolve. Space has leveled up to level 250. Universal Processing Machine has leveled up. Universal Scanner has leveled up. The Space's Universal Processing Machine and Universal Scanner have merged to become Universal Refining Machines. Urging the Host to work hard!"

"Because the Bug Race brood is currently weak, the Space has strengthened it. All current genes beneficial for the Bug Race will be added to the Bug Race brood. Adding intelligence. Bug Race brood has been successfully upgraded. The brood can now absorb any ability for its own use. Production of Bug Race has been unlocked. The strongest bug that can be made will be at the Immortal Stage."

Thump! Zhao Hai could feel a pork pie fall on his head. This pie was very big, causing him to be stunned.

The benefits brought by the Bug Queen and the egg sac was too great. Forget anything else, the ability to evolve the Space was already great by itself. This was what Zhao Hai wanted the most. Before this, Zhao Hai had to look around for materials in order to upgrade the Space bit by bit. And with how high the Space's level was, it had become too difficult for Zhao Hai to upgrade it. The ability of the Space to evolve was akin to a mortal being able to cultivate. Although the speed of evolution wouldn't be quick, it was still something that Zhao Hai needed.

Additionally, everything inside the Space has gained the ability to evolve on their own. This was a good thing for Zhao Hai.

Also, there's the Bug Race brood's ability to produce Immortal-Stage bugs. This was something that Zhao Hai didn't expect. But soon Zhao Hai understood. Don't forget that the Space already had an Immortal Expert. Although the Immortal Expert was an Undead, its genes were still present, which was a benefit for the Bug Race. The Bug Race can absorb the genes of any lifeform in order to evolve. Now that they have absorbed the genes of an Immortal Expert, along with the myriad of genes present inside the Space, it's normal for them to be able to produce Immortal-stage bugs.

Zhao Hai intends to make Immortal-stage Bugs. However, they would be kept for later use. They can't be revealed unless extremely necessary. Otherwise, their presences would frighten people.

Just as Zhao Hai was thinking about these, another prompt was heard, "Because the Host has subjugated the Bug Race Queen, the Host has obtained the loyalty of the Bug Race. From now on, the Bug Race will provide the Host with Faith Power. Because the Bug Race can be considered to be beasts and belong to the Beastman Race, the Host's affinity to the Beastman Race will increase in the Future. All Beastman inside the Space will provide more Faith Power to the Host. Only beasts with wisdom can provide Faith Power."

Zhao Hai stared. He didn't expect an additional surprise to come up. However, this was still very good. Later on, he would be able to obtain more Faith Power.

Zhao Hai looked around and saw that there's nothing left for him in this place. After entering the Space, Laura and the others welcomed him. At this time, they all had excited expressions. They were very glad with the Space's level up.

Zhao Hai was also smiling widely. But this time, he noticed two additional people among the women. Naturally, one of them was Zheng Yun. Although Zhao Hai took Zheng Yun in, he had yet to consummate their marriage. Seeing Zhao Hai, Zheng Yun was somewhat shy, so she stayed at the back.

The other person was the female bug he saw in the cave. It can be said that this female was the Bug Race's queen. But this time, she was wearing clothes and her hair had been tidied up.

After Laura and the others exchanged words with Zhao Hai, Zheng Yun stepped forward and shyly greeted Zhao Hai, "Big Brother Hai."

Zhao Hai smiled faintly and said with a soft voice, "Have you become familiar with living here? You're my woman from now on."

Zheng Yun's complexion turned red as she nodded. At this time, another voice was heard, "Young Master, when will you take me in?"

Zhao Hai stared, then he turned his head towards the Bug Race Queen. Zhao Hai was greatly surprised. He didn't expect her to be this forward.

Zhao Hai opened his mouth but didn't know what to say. Looking at Zhao Hai's reaction, Laura giggled and said, "Brother Hai, I have given her the name Julie. She still doesn't understand the customs of Humans. But she's diligently studying. Moreover, Julie is now your woman. Make sure to pay her some attention."

Hearing this, Zhao Hai gawked. He couldn't help but think about the strength Julie showed him back at the cave. Her offensive strength was something that Zhao Hai cannot take head-on. He didn't expect that female to become his woman. Most importantly, he felt a little awkward thinking that she was the Queen of the Bug Race.

However, he soon changed his mind and relaxed. If he received Cai'er who was the main body of the Seven-colored Flower, then receiving a Bug Race Queen was no problem.

If Zhao Hai had just transmigrated, then he would feel awkward. At that time, he would compare his situation with the customs back on Earth. If he met Julie then, it would be impossible for him to take her. But now it was different. Zhao Hai has reached the Ten-thousand Realm Battlefield and became a person of the Hundred Treasures Realm. Beastmen, Elves, and other races, he had seen all of them. Although other races looked different from Humans, they were now similar to Humans in Zhao Hai's eyes. Because of this, he didn't have any qualms about taking Julie in right now.

After thinking things through, Zhao Hai nodded. Zhao Hai also somewhat knew that the moment Julie entered the Space, she would eventually become his woman.

Seeing Zhao Hai nod, Julie said, “Young Master, there’s still a lot of children left on Fabio Planet. You should take them into the Space.

Zhao Hai frowned for a moment before giving a nod. It’s not impossible for the Cultivators to deal with the bugs left outside. However, it would still cause the cultivators some losses. The World of Cultivation had just experienced a war, they couldn’t afford to lose any more manpower.

Zhao Hai looked at Julie and said, “Julie, I’ll open a few spatial rifts around Fabio Planet. Order the bugs to enter them.” Julie nodded. Zhao Hai opened a few spatial rifts and the bugs swarmed into them under Julie’s command. Zhao Hai placed the bugs on an uninhabited planet inside the Space.

Afterwards, Zhao Hai turned to Julie and said, “Julie, do you know who sealed you inside that cave?”

Julie shook her head and said, “I don’t know. I only know that it was there when I gained awareness. If I left the cave, the seal wouldn’t have too much reaction. But once I try to take the egg sac, it will immediately act up. We have suffered so much under that seal.”

Zhao Hai nodded, then he turned to Laura and said, “Fabio Planet needs to be destroyed. We need to erase any traces.”

Laura nodded, “This wouldn’t be difficult. The Space can make some nuclear bombs to blow up the planet. But if we do this, the surrounding planets will be affected. How about controlling the core of the planet and setting fire to the surface. This way, nobody would have any doubts.”

Zhao Hai thought for a moment before nodding. Then he collected the corpses of the bugs on the planet and then placed them on the planet’s core. Then he controlled the lava pool to erupt. Before long, the entire planet was turned into a huge fireball. Zhao Hai also left the planet.

#### Chapter 1524: Polite Immortal Experts

Zhao Hai stood outside Fabio Planet as he looked at it being swallowed by flames. His heart finally relaxed. Looking back, his decision to deal with the Bug Race on his own has been correct. With Julie’s strength, even Immortal Experts wouldn’t be able to take care of the problem. And as long as Julie gains

the genes of an Immortal Expert, the strength of the Bug Race would skyrocket. When the time comes, even if he went to Fabio Planet, it would be impossible to take Julie in.

Additionally, Zhao Hai was happy. Fortunately he didn't destroy Fabio Planet directly. If he did, then he would have destroyed the cave where Julie was sealed in and released her from her cage. If that happened, then with his current strength, it would be impossible to trick Julie into entering the Space.

All of these were attributed to his luck. If he hadn't learned the Instinct Technique, then he wouldn't have made the right decisions.

But what made Zhao Hai feel fortunate the most was the fact that Julie didn't leave the cave before he attacked.

Although the cave was sealed, Zhao Hai could feel that the seal had become weak and its energy was somewhat insufficient. Otherwise, Zhao Hai's Faith Power wouldn't have been able to swallow it with ease.

If Julie discovered this before and repeatedly challenged the seal, then she would have broken it. But since she suffered early on in her life, Julie didn't dare attack the seal. She was frightened by it and was forced to be obedient.

In the end, it turned out to be beneficial for Zhao Hai. If Julie did break through the seal and was allowed to go out, then not only the World of Cultivation, even the Ten-thousand Realm Battlefield would suffer bad luck.

Zhao Hai let out a long breath. At this time, the sound of wind was heard. Actually, Zhao Hai already knew what it was without looking. Immortal Experts from the World of Cultivation, along with Huang Daoran and Feng Baiming as well as Transcending Tribulation Experts, appeared.

Since the World of Cultivation had just settled themselves on their new territory on the Ten-thousand Realm Battlefield, Kong Miao and the others still hadn't come back. Therefore, Zhao Hai didn't know a lot of people who appeared here.

Although Zhao Hai didn't know them, they were aware of who Zhao Hai was. Immortal Experts approached Zhao Hai and then gave him a salute as they said, "We have seen Mister Zhao Hai."

Zhao Hai smiled faintly and said, "This Zhao Hai has seen the Masters."

Hearing this, the Immortal Experts quickly replied, "We don't deserve Mister calling us that. Mister is too polite. We made Mister work this time, we apologize for that."

Zhao Hai smiled and said, "There's no need to be polite. Although I'm now a citizen of the Hundred Treasures Realm, I'm still born in the World of Cultivation. I can't just ignore what happened here. I have to say, the Bug Race is indeed powerful. I have to use all my strength to defeat their Queen. And since I find it annoying to deal with the bugs on the surface, I decided to set fire to the planet. I hope you'll forgive me for this decision."

The Immortal Expert at the lead said, "Mister, you shouldn't say that. You did what you can for the World of Cultivation. Moreover, Mister took it upon himself to deal with the World of Cultivation's problem. Mister, we're going to prepare some food and wine. I hope you enjoy them."

Zhao Hai knew that the spiritual food of the World of Cultivation was quite good. Ordinary people couldn't just eat them. Even people like Huang Daoran and Feng Baiming couldn't eat it whenever they wanted.

Zhao Hai smiled and said, "There's really no need. I still have some things to take care of in the Hundred Treasures Realm. I understand your sentiment. However, the World of Cultivation is where I came from. This is my responsibility. Everyone doesn't need to be so polite."

Hearing Zhao Hai, the Immortal Experts didn't urge him anymore. Instead, one of the Immortal Experts took out a spatial bag and handed it to Zhao Hai before saying, "We've inconvenienced Mister. Mister, we know that you want to collect unique things. These are things we managed to get over the years. We don't know how to use them, so we'll give them to Mister. Mister, please accept it."

Zhao Hai stared, but he also knew that it would be unreasonable for him if he also rejected this. He smiled faintly as he received the spatial bag and said, "Then this Zhao Hai will receive it. Everyone, thank you."

Seeing Zhao Hai receive the gift, the Immortal Experts showed a smile. After that, everyone accompanied Zhao Hai for a little chat.

On the other hand, Feng Baiming and Huang Daoran looked a little silly. They had received Kong Miao's order to be polite to Zhao Hai. They also knew that Zhao Hai had joined the Hundred Treasures Realm. However, they didn't think much about it at that time. Although they were more polite to Zhao Hai, they weren't this excessively polite.

And now, upon seeing the Immortal Experts, they couldn't help but be stunned. These were Immortal Experts. Even if they go to other realms, they would be treated with respect. However, these powerful Immortal Experts were very polite to Zhao Hai, as though they were employees flattering their boss. This attitude caused Feng Baiming and Huang Daoran to finally understand Zhao Hai's status in the Ten-thousand Realm Battlefield.

Huang Daoran and Feng Baiming couldn't help but be amazed. They only knew that Zhao Hai joined the Hundred Treasures Realm. They didn't know that Zhao Hai had such high status.

Huang Daoran and Feng Baiming didn't spend a long time in the Ten-thousand Realm Battlefield. Naturally, they didn't understand the disparity between high-grade realms and the World of Cultivation. They also didn't know how important Zhao Hai's position was. Therefore, they weren't that serious in treating Zhao Hai.

But after witnessing the attitude of the Immortal Experts, they understood how high Zhao Hai's position was in the Hundred Treasures Realm. He was only on level below Mu Yu and Tang Jie. Who were Tang Jie and Mu Yu? There were future pillars of the Hundred Treasures Realm. They had a lofty status. With how Zhao Hai was on par with them, these Immortal Experts wouldn't dare put on any airs in front of him.

Before long, the group arrived at a planet close to Fabio Planet. Zhao Hai didn't stay long. After chatting for a while, he used transmission formations to return to the Ten-thousand Realm Battlefield.

After Zhao Hai left, the leader of the Immortal Experts immediately said, "Huang Daoran, Feng Baiming."

Huang Daoran and Feng Baiming didn't dare ignore this. They immediately approached the Immortal Expert and said, "Huang Daoran(Feng Baiming) has seen Senior."

The Immortal Expert nodded and said, "The two of you have the deepest relationship with Zhao Hai among us here. We've decided to assign both of you to the Ten-thousand Realm Battlefield to communicate with Mister Zhao Hai. Go make your preparations. Someone will come get you soon."

Huang Daoran and Feng Baiming were shaken. They discovered that they still underestimated Zhao Hai's status. Just to communicate with Zhao Hai, the two of them were assigned to the Ten-thousand Realm Battlefield. This was a huge benefit.

Although the two of them had entered the Ten-thousand Realm Battlefield, they weren't able to stay for long before they were injured and forced to retire. After that, it had become impossible for them to return. Now, because of Zhao Hai, they were given the opportunity to return. One could see how much importance the higher-ups gave Zhao Hai.

The two didn't dare ask any questions as they hastily complied. The Immortal Experts waved their sleeves before they entered the transmission formations. Before long, all of them were gone.

When the Immortal Experts left, the Severed Soul and Transcending Tribulation Experts surrounded Huang Daoran and Feng Baiming and began congratulating them. Then one of them suddenly said, "Chen Daochang, haven't you just returned from the Ten-thousand Realm Battlefield? What happened there? Why were those Elders so polite to Zhao Hai?"

The person called Chen Daochang was the only one present who didn't show surprise, and people were beginning to recall it right now. When Chen Daochang saw Zhao Hai, his expression also turned respectful. Although he didn't approach Zhao Hai, he behaved himself and didn't dare show any signs of disrespect.

Chen Daochang looked at everyone before he sighed and said, "Everyone, I can't tell you too much about what happened in the Ten-thousand Realm Battlefield. But I can tell you that the Hundred Treasures Realm is now experiencing a great boom in popularity in the Ten-thousand Realm battlefield. The experts they have are countless. That realm can send Transcending Tribulation Experts and Severed Soul Experts casually. Also, several thousand of their experts are enough to raze our stronghold to the ground. And right now, Zhao Hai has gained the favor of the Hundred Treasures Realm's Immortal Experts. Immortal Experts of the Hundred Treasures Realm had to smile in front of Zhao Hai. With his current status, Zhao Hai can decide the World of Cultivation's fate in the Ten-thousand Realm Battlefield with his words alone. It's not a mystery why the Elders didn't dare to disrespect him."

Hiss! Everyone present breathed in cold air. They didn't expect Zhao Hai's status in the Ten-thousand Realm Battlefield to be this prestigious.

One of the Severed Soul Experts asked, "What did Zhao Hai do? Why did the Hundred Treasures Realm treat him with importance?"

Chen Daochang sighed and said, "Actually, Mister Zhao Hai saved the World of Cultivation more than once. Everyone, our World of Cultivation is merely a low medium-grade realm in the Ten-thousand Realm Battlefield. Originally, we are subordinated to a high-grade realm named the Giant Spirit Realm. The World of Cultivation had always been paying tribute to the Giant Spirit Realm every year. The Hundred Treasures Realm is the long-term enemy of the Giant Spirit Realm. There had been many battles between the two realms over the years. The Hundred Treasures Realm planned to deal with us in order to cause damage to the Giant Spirit Realm. We suffered heavy losses from this. Later on, Mister Zhao Hai made a move and killed thousands of people from the Hundred Treasures Realm. But unexpectedly, the Giant Spirit Realm decided to abandon us. Mister Zhao Hai was furious. He discussed it with everyone and in the end we decided to defect to the Hundred Treasures Realm. The Hundred Treasures Realm agreed. But this caused the Giant Spirit Realm to attack us. Under Mister Zhao Hai's lead, and in cooperation with the Hundred Treasures Realm, we were able to repel the attacks of the Giant Spirit Realm, embarrassing them in the process."

Chen Daochang stopped as he looked at everyone before continuing. "During the battle against the Giant Spirit Realm, Mister Zhao Hai showed his abilities and was beginning to be treated as a promising youth by the Hundred Treasures Realm."

A Severed Soul Expert nodded and said, "I see. No wonder the Hundred Treasures Realm is fond of Mister Zhao Hai. Mister Zhao Hai helped them deal with the giant Spirit Realm. It would be strange if they didn't treat him well."

Chen Daochang looked at that person and said, "Did you think that was the end? The Giant Spirit Realm suffered a loss. Seeing that they couldn't defeat us, they invited one of the Five Great Realms of the Ten-thousand Realm Battlefield, the Fireweaver Race. The Fireweavers are much more powerful compared to the Hundred Treasures Realm. They had countless experts and had rifles. These rifles are different from the guns of the Machine Field. These rifles are very powerful. Transcending Tribulation Experts would be severely injured if not killed if hit by their bullets. The Fireweavers and the Giant Spirit realm arranged a several hundred thousand army to attack the Hundred Treasures Realm. The Hundred Treasures Realm also used all it had to defend. This was a war between hundred thousand-man armies of which the weakest were Transcending Tribulation Experts."

Everyone was pulled in by Chen Daochang's words. After taking a breath, he continued, "At the critical moment, Mister Zhao Hai helped the Hundred Treasures Realm defend against the Fireweaver Rifles and withstand the attack of the enemies. In the end, the other high-grade realms in the Ten-thousand Realm battlefield could no longer accept the meddling of the Fireweavers and they made a move. The Fireweavers were forced to return to their territory. On the other hand, the Giant Spirit Realm was forced to leave the Ten-thousand Realm Battlefield. It can be said that, without Mister Zhao Hai, the World of Cultivation would have been forced to leave the Ten-thousand Realm Battlefield. The Hundred Treasures Realm might have been forced to leave too. With the amount of contributions Mister Zhao Hai made, how could he not be treated well?"

Everyone began to understand the events of the Ten-thousand Realm Battlefield. A hundred thousand-man army with people at the Transcending Tribulation Stage and above, what would that be like? Those present couldn't help but feel amazed just by hearing it.

Chen Daochang looked at everyone, then he turned his head to Huang Daoran and Feng Baiming before saying, "You two. Mister Zhao Hai cares about the World of Cultivation. Mister Zhao Hai's sentiment is important for the realm's future development. I have to ask you to keep Mister Zhao Hai connected to the realm. Otherwise, it would be hard for the World of Cultivation to survive in the Ten-thousand Realm Battlefield."

Huang Daoran and Feng Baiming nodded. The Immortal Experts were too lofty to explain these things, so they used Chen Daochang to express their words and make it clear how important Zhao Hai was. Chen Daochang's words were equal to the words of the Immortal Experts.

#### Chapter 1525: Matters Behind The Curtains

When Zhao Hai appeared on the World of Cultivation's stronghold, Kong Miao was already waiting for him along with some people. Seeing Zhao Hai come out, Kong Miao immediately welcomed him as he bowed and said, "Mister Zhao Hai, thank you."

Zhao Hai stared, then he smiled and said, "Grandmaster, there's no need to be too polite. Just call me Little Hai like before. The World of Cultivation is my home, I cannot just ignore its issues. Grandmaster, I still have things I need to take care of in the Hundred Treasures Realm, so I won't be remaining here for long. If the World of Cultivation needs anything, don't hesitate to tell me."

Kong Miao had some understanding about Zhao Hai's matters and knew what Zhao Hai needed to deal with. He heard rumors that Zhao Hai has been bestowed a planet by the Hundred Treasures Realm.

Naturally, he didn't know that this was because Zhao Hai was able to give the Hundred Treasures Realm a planet's worth of materials. They thought that the planet was bestowed because of Zhao Hai's contributions during the war.

Kong Miao was also aware of the Hundred Treasures Realm's rules of inheritance. Zhao Hai would be assigned 10 thousand youths who hadn't begun their cultivation. These youths would be Zhao Hai's future servants. He could also choose among them who he would take as disciples.

Zhao Hai just got a planet, along with the responsibilities tied with it. Him going to the World of Cultivation to help was already a huge favor. It would be unreasonable if Kong Miao held Zhao Hai up here. Because of this, Kong Miao immediately said, "Then, Little Hai, I won't be keeping you. If you need anything, you can tell us. Although the World of Cultivation is a small realm, we are also your most solid backing."

Zhao Hai smiled and said, "Grandmaster Kong Miao, you're too polite. This Zhao Hai will not forget that I'm from the World of Cultivation. Well then, I'll be going." After saying that, he entered a nearby transmission formation and returned to the Hundred Treasures Realm's headquarters.

The Hundred Treasures Realm's headquarters was currently very busy. The war caused too much damage to the realm, especially to the headquarters. Everything needed repairs so that they can return to being operational.

Moreover, although the Hundred Treasures Realm managed to gain territory, they had yet to digest it. Don't think that other realms wouldn't fight for these territories. Those fellows weren't saints. As long as they have the opportunity, they would definitely take a bite.

Because of this, not only does the Hundred Treasures Realm need to stabilize internally, they also have to guard their newly-gained territory. Each person in the headquarters was very busy. The place looked like a machine running to full capacity.

But even so, Mu Yu and Tang Jie still had time to welcome Zhao Hai. Seeing Zhao Hai appear, Mu Yu stepped forward and said, "Little Hai, is everything fine?"

Zhao Hai smiled and said, "Everything's fine. Brother Mu doesn't need to worry. How is it going? If you need help, you can tell me."

Mu Yu paused for a moment, then he said, "Now that you mention it. I have something I need your help with. I heard that you've built an academy on your planet. Can you lend us your robots and machines?"

Hearing Mu Yu, Zhao Hai laughed and said, "So it's this. Don't worry. When I head back, I'll immediately send them over to you."

Mu Yu smiled and said, "A lot of buildings have been destroyed all around the territory. Although we don't use most of them, this also concerns the face of the Hundred Treasures Realm. We have no choice but to fix it. By the way, Little Hai, it seems like your academy is doing well. How did you design it?"

Zhao Hai gave out a smile. Construction wasn't easy to do. From the building design to the internal decorations, everything needed to be considered well. Most cultivators were ignorant in the matters of construction. Even sect buildings were basic structures that were modified a bit. To be honest, these buildings weren't built very well.

On the other hand, the academy that Zhao Hai built was designed and made by the Universal Scanner. Naturally, this structure was incomparable to basic structures. And these buildings were built very efficiently.

Zhao Hai smiled and said, "Laura and the others designed it. Why did Brother Mu ask? Do you want to redesign the buildings of the headquarters? I can bring them over when I head back."

Mu Yu patted Zhao Hai's shoulder and said, "Alright, then I'll leave it to you. Have the sister-in-laws come over and help us redesign the structures of the headquarters. With the realm's recent victory, Master and the others want to rebuild the outer halls and make it more prestigious. Later on, we'll use it to receive people from other realms."

Zhao Hai nodded and said, "Alright. Then I'll head back and have them come over. I'll make sure to show Brother Mu the architecture they're capable of."

Mu Yu nodded. Zhao Hai cupped his fist towards him before turning around and entering the transmission formation, returning back to Bluetree Planet. The academy on the planet had been mostly built. The academy was built based on a simple atmosphere. However, it wasn't built with simple

materials. Many high-grade materials were used to construct the buildings. And since the Space had them all, the structure was quickly built.

At this point, only the finishing touches were left. Zhao Hai nodded and left some Undead to take care of the place's greenery. After that, he brought the robots along with Laura and the others back to the headquarters. Naturally, he didn't bring Cai'er and Julie along.

Cai'er's form was unusual. Additionally, she was in-charge of taking care of the Space. Because of this, Zhao Hai didn't take her out much. As for Julie, she had yet to get used to dealing with humans, so she stayed inside the Space with Cai'er.

Zhao Hai took Laura and the others to the Hundred Treasures Realm's headquarters. Seeing them arrive, Mu Yu immediately greeted them as he laughed and said, "You really came back fast. Come, Master wants to see you."

Zhao Hai stared, then he quickly replied, "Elder Mu wants to see me? Is something wrong?"

Mu Yu smiled and said, "It's fine. Master heard that you brought your wives over, so he wants to take a look. Hehe, Master is really fond of you, he says he wants to give gifts to sister-in-laws."

Zhao Hai smiled bitterly as he led Laura and the others to the conference room. Mu Yao, Tang Yaoen, and the others were already inside. Zhao Hai took Laura and the others to give greetings to the Elders.

Mu Yao took a close look at Laura and the others, then he laughed and said, "I didn't expect Little Hai to be such a romantic. He actually has such beautiful wives. As an Elder, I naturally can't lose to you. Take these, treat it as my meeting gift to you." After he said that, artifacts appeared in front of Laura and the others. The women quickly accepted them and gave their thanks.

Mu Yao turned his head to Zhao Hai and said, "Little Hai, you should be aware about the current wave the Hundred Treasures Realm is riding on right now. This is both a good and bad thing. Not to talk about anything else, because of the Hundred Treasures Realm's current fame, our headquarters is receiving countless visitors every day. However, the reception hall of the headquarters is very lacking. I heard that you're quite good at making buildings. I'll leave this matter to you. You can destroy whichever building you want. But if you don't do the job well, I won't let you off."

Zhao Hai quickly agreed. Mu Yao laughed and said, "Go all out. Make sure that nobody dares underestimate the Hundred Treasures Realm anymore." Zhao Hai nodded as he led Laura and the others out of the conference hall.

When he got outside, Zhao Hai took a proper look around the headquarters and the reception hall. Several buildings needed to be destroyed. To be honest, even if they stayed up, they still weren't great to look at.

Laura and the others also put on a performance. They really couldn't design a building since the Space did everything. However, they still discussed with each other to keep up appearances.

After looking around for some time, Zhao Hai brought Laura and the others back to his cave residence. When they entered the residence, they immediately entered the Space. Cai'er had already printed out several sketches, each building as beautiful as the next.

Zhao Hai looked over the drawings and nodded. Then he turned to Cai'er and said, "Wait for me while I take these to Elder Mu and the others. Once the buildings are settled, we can return to Bluetree Planet. The children will be sent over as well. I'll have to trouble you then."

Laura smiled and said, "Right, Brother Hai, you should be able to rest for a while right? There shouldn't be anyone coming over to provoke the Hundred Treasures Realm."

Zhao Hai shook his head as he sighed and said, "The situation isn't that simple. Remember our previous analysis? There may be people standing behind the Hundred Treasures Realm and the Giant Spirit Realm. Don't you think it's strange that there seems to be a force that prevents the Ten-thousand Realm Battlefield from becoming peaceful? I'm afraid it won't take long before something happens again. And there's Julie's case as well. Who sealed her in Fabio Planet? I feel that these things are connected. We need to see behind the curtains. To be honest, I'm quite worried. It seems like no matter how diligent we work, we're still pieces in another person's chessboard."

Laura and the others turned silent when they heard this. To be honest, they haven't thought of it like this. Hearing Zhao Hai, they also thought that he made sense. From the World of Cultivation to the Ten-thousand Realm Battlefield, everything that happened seems to have traces of interference from hidden hands. Moreover, the Six Realms Battlefield and the Ten-thousand Realm Battlefield were man-made realms filled with treasures. If they told someone about this, then they wouldn't believe it, but it's true. So what was really hidden behind all of these things?

## Chapter 1526: National Affairs

Zhao Hai walked out of the Space holding several drawings. Of course, these drawings were merely two dimensional. The real projection of the buildings were uploaded to Zhao Hai's computer. Mu Yu and the others would use these drawings as previews of the structures.

Zhao Hai's heart was a bit heavy. He didn't want to scare Laura and the others. He truly felt a sense of crisis. As long as he doesn't know the creator of the Ten-thousand Realm Battlefield, he wouldn't feel relaxed.

To be honest, it doesn't feel good to be a chess piece. But given the current situation, he didn't have a choice. He needs time. As long as the Space levels up, he would be stronger. When the time comes, he would have the strength to resist.

Zhao Hai took a deep breath and then exhaled the bad air from his lungs. After that, he walked towards the conference hall. He no longer needs to ask for permission before entering. As soon as he was inside, he immediately saw Mu Yu and the others. After giving his greetings, he showed the drawings to Mu Yu and the others and said, "Elder Mu, these are plans that Laura and the others made. See if you like them. If you're interested in one, I'll show you a detailed projection."

Mu Yao looked at the drawings, then he smiled and said, "It seems like your wives are really talented. I didn't expect them to come up with these drawings so quickly." After he said that, he scanned the drawings he was presented with.

These drawings were naturally made very well. They were all made according to the topography of the headquarters. The style of each building was different. Some had courtyards scattered around the place and some had buildings that were pleasing to the eye. But generally speaking, these buildings had a taste of Chinese architecture mixed within them. At the same time, they weren't too modern.

Mu Yao looked through these drawings and gave a satisfied nod. Although the drawings look different, all of them were very beautiful. He could understand at a glance that they were made very well.

After some time, he passed the drawings to Tang Yaoen and the others and said, "You take a look at these drawings as well. Tell me if there's anything you like." Tang Yaoen received the drawings and began to scan through them.

In the end, the group decided on one design. Coincidentally, this was the one Zhao Hai thought Mu Yu and the others would choose.

This drawing wasn't the most artistic of all. However, this drawing had the superior atmosphere. Although the buildings weren't very tall, they were built to fit the aesthetic of the mountain. They were scattered without losing the overall design effect. It looks quite grand, which was the style Mu Yao and the others want.

Seeing the drawing everyone else chose, Mu Yao nodded and said, "Alright, then we'll pick this." Zhao Hai nodded and then took out his computer to present the full image of the design. He also showed the interior of each building.

After listening to Zhao Hai, Mu Yao nodded and said, "Good, very good. Let's go according to your plans. Make sure to build it well." Zhao Hai nodded before asking to leave.

Mu Yao followed Zhao Hai out. He smiled and said, "Kid, you really do things quickly. Alright, I'll leave everything to you. I have to go back to work. By the way, the children will be sent to you in two days. Don't forget about it."

Zhao Hai nodded with a smile before Mu Yu turned around and left. After that, he immediately took out the robots and construction vehicles. After that, he programmed the robots with the design chosen by Mu Yu and the others. The robots and machines swiftly began to work.

A lot of people from the Hundred Treasures Realm haven't seen robots before, so they were interested in them. The robots and the machines didn't care about this. They just worked according to the program.

After arranging everything, Zhao Hai no longer cared much about the construction. He would just check it from time to time. He spent most of his time inside his cave residence. Of course, this was what the people outside thought. In fact, he was inside the Space all this time.

The construction wasn't slow at all. After a couple of days, the buildings shown on the drawings have been built. It was also at this time that Zhao Hai officially took Zheng Yun in as his woman.

Additionally, the children have been sent to Bluetree Planet and entered the academy. Large numbers of Undead also entered the academy in order to teach these children about cultivation.

At this point, Zhao Hai had a large amount of cultivation methods in his hand. Naturally, he would pick the best methods for these children to use. But before teaching them cultivation, Zhao Hai inspected their constitution.

Zhao Hai not only inspected their spiritual roots, but also their muscle strength, bone structure, and other aspects. This was to ensure that each student was taught in accordance to their aptitude.

A person's achievements didn't only depend on their spiritual root. Factors such as muscle strength and bone structure were also important. So according to the result of the inspection, Zhao Hai assigned different cultivation methods.

Zhao Hai treated the 10 thousand children with importance. He treated them like a master treats his disciple. Not only was this rare in the Hundred Treasures Realm, it was rare in any other realm.

At the same time, the meals of the children were being calculated. They also undergo culture training as well as refining classes. They would also learn how to plant herbs every seven days.

The main purpose of the planting class was to let the children learn how to grow various medicinal plants. They would not only learn how to plant, they also learned how to identify various medicinal materials along with various ores. They were also taught the uses of these plants and ores.

It can be said that Zhao Hai's academy was the most advanced cultivation school in the Hundred Treasures Realm. Naturally, Zhao Hai didn't want these children to be flowers grown in a greenhouse. Every other month or so, he would test them. The tests were simple. The children need to either kill or dissect a beast on their own.

The beasts were sacrificial meat prepared for the children. Zhao Hai wanted to train their courage.

Zhao Hai also arranged survival training for the children. Naturally, he wouldn't do it now. He has to wait for them to grow up. Zhao Hai wanted to train cultivators, not assassins. There's no need to train them in a cruel manner.

What makes Zhao Hai happy with these children was the fact that they were evenly distributed between the two genders. This was something that Zhao Hai didn't expect. This was because no matter which realm, yang qi was more abundant than yin qi. Therefore, female cultivators were very rare.

What Zhao Hai didn't know was that there were plenty of female cultivators in all high-grade realms. The problem was that female cultivators couldn't enter the higher levels of cultivation. This time, Mu Yao wanted to test Zhao Hai. He wanted to take a look if Zhao Hai's academy would work. Since this was the case, it was impossible to send boys only, so girls were also sent over.

Zhao Hai didn't mind this arrangement. Having girls was good as well. It was just that training them would be slightly difficult. There weren't as many methods and teachers for female cultivators.

After ten days, the buildings of the headquarters were completed. The greenery and interior decoration were also finished. The buildings weren't only attractive, but they were arranged in a defensive formation. Even the design of the garden was taken into consideration.

If someone wanted to attack the headquarters of the Hundred Treasures Realm in the future, then these buildings would form a defensive formation. Inside one of the buildings was a transmission formation. This made it very safe to reinforce or evacuate the inhabitants.

It was precisely because of these considerations that it took so long for the construction to finish. It needs to be known that the materials used by Zhao Hai were all high-grade. Not only were they strong and durable, they also had short drying time. Majority of the time was spent on interior decoration.

The interior decorations of the buildings were themed. They all paid attention to being simple and rich. The decorations looked simple, but they didn't make people feel cheap. This was also in-line with Zhao Hai's style, which was low-key arrogance.

Once the construction was finished, Zhao Hai approached Mu Yao and the others to have them inspect the buildings. Mu Yao and the others gave nothing but endless praise to the buildings. They were very satisfied, which caused Zhao Hai to feel relieved.

After visiting the buildings, Mu Yao and the others returned to the conference hall along with Zhao Hai. Today, Mu Yao made an exception and had Zhao Hai sit. After sitting down, Mu Yao looked at Zhao Hai and said, "Little Hai, the buildings you made are very beautiful. I don't want to work here now. I want to go there instead. Good, very good."

Zhao Hai smiled faintly and said, "Elder Mu is very polite. This Zhao Hai does not deserve your praise."

Mu Yao waved his hand and said, "There's no need to deny it. If you do well, you will naturally be praised. Right, Little Hai, I heard that your academy is already functional and the children have started going there. How are they doing?"

Zhao Hai didn't quite understand what Mu Yao was aiming at, but he quickly replied, "Fortunately, they were able to adapt to the environment. The preparations have also been done and their curriculum has been set. They should be able to start their learning soon."

Mu Yao nodded, "Let me take a look at their curriculum." Zhao Hai nodded as he took out a copy of the curriculum and handed it to Mu Yao.

After looking carefully at the curriculum, Mu Yao knit his brows as he said, "You're actually planning to have them eat? Can't they just eat pills?"

Zhao Hai shook his head and said, "I have planted vegetables in some of the medicinal fields in Bluetree Planet. I also bred a lot of magical beasts. The children can eat them. These will be transformed into medicinal meals upon being cooked. Its effects are much better than eating pills. These foods also don't leave toxins inside the body. Pills can't be eaten every day while the grown food can."

## Chapter 1527: School Visit

Hearing what Zhao Hai said, Mu Yao was stunned for a moment. He looked at Zhao Hai and said, "Really? Aren't these kinds of food hard to grow?"

Zhao Hai smiled and said, "That's true. Back when I was in my home realm, I obtained a seed of a tree. This tree was planted by a race called the Elves in the lower realms. They treated this tree like a deity.

Upon being planted on an area with spiritual qi, once it grows up, it would produce more spiritual qi. It's the best tree to use in order to change an environment. I originally had a planet in the World of Cultivation where I planted a lot of these trees. When I picked Laura and the others up, I also took a lot of these trees with me. Now that the environment of Bluetree Planet has been improved, it became possible to plant those vegetables."

Mu Yao could no longer sit still. He stood up and walked to Zhao Hai and said, "Let's go to Bluetree Planet and let me take a look. I want to see what Bluetree Planet looks like now."

Zhao Hai smiled and said, "You're more than welcome. I was just about to invite the Elders for a drink in Bluetree Planet. Since this is the case, I'll also invite the Elders to share a meal in Bluetree Planet."

Hearing Zhao Hai, Mu Yao and the others laughed. Then they all stood up and walked out. As soon as they arrived at the door, they saw Mu Yu coming over. Seeing Mu Yao and the others coming out, Mu Yu was stunned, then he asked, "Master, where are you going?"

Mu Yao looked at Mu Yu, then he smiled and said, "What's wrong, did something happen?"

Mu Yu shook his head and said, "It's nothing big. The repairs of the headquarters are basically completed, so I came to give my report. Would you like to take a look?"

Mu Yao smiled and said, "There's no need to be anxious about that. Come with us, we're going to Little Hai's Bluetree Planet to take a look."

Hearing Mu Yao, Mu Yu smiled and said, "So it's that. Even if you don't go, I would still tell you about it. The academy that Little Hai built was very good."

Mu Yao waved his hand and said, "There's no use hearing about it. Just come with us, I want to see it on my own." After that, the group went to the transmission formation and arrived at Bluetree Planet.

When the party appeared on Bluetree Planet, they discovered Laura and the others already waiting for them there. After the two groups exchanged greetings, they proceeded towards Bluetree Planet's academy.

Zhao Hai's academy was built like the universities back on Earth. The dormitories had rooms that could accommodate four people and each included a bathroom. The academy also has a canteen, a field, a public library, laboratory, training grounds, and farming area. There were also gardens and greenery that occupied a lot of space.

Zhao Hai brought Mu Yao and the others around the academy and visited the public facilities. He also explained each place and their uses. Additionally, Zhao Hai also introduced the Undead teachers.

The Undead teachers were all experienced veterans. And with the facilities being perfect, they were able to properly teach the students.

The children were taking notes while studying. They weren't using computers but instead pens and papers. Zhao Hai deliberately did this so that they can deepen their impression of the topic they're studying.

Zhao Hai also brought Mu Yao and the others to Bluetree Planet's breeding farms and crop fields. These two places could be said to be the most important places in Bluetree Planet. This was because the meat, grain, medicine, and vegetables of the planet relied on them.

Zhao Hai also took Mu Yao and the others to see the elven trees. Although Zhao Hai raised a lot of beasts and planted a lot of vegetables for food, he never put aside planting medicinal materials. The medicinal fields had been transformed. They were now using high-tech equipment to monitor the overall state of the fields. A little change to the environment would alert the system. Moreover, robots guarded the fields all-year round. These robots were fitted to handle the medicinal plants. In an instant, they were able to see if a plant was sick and they would immediately treat them. Naturally, these didn't come from the Machine Field, but instead created by the Space. However, since Zhao Hai came from the Machine Field, people implied that the robots came from there. Of course Zhao Hai wouldn't deliberately talk about the origin of the robots. He just told people that he modified the robots after getting them from the Machine Field.

The visit made Mu Yao and the others learn a lot. The school that Zhao Hai made completely exceeded their imagination. Looking at the children taking notes while wearing uniforms as well as the facilities present at the academy, Mu Yao and the others felt that the spring of the Hundred Treasures Realm was coming.

After exploring the entire academy, Zhao Hai brought Mu Yao and the others to the school canteen. The canteen was very clean. There were robots inside cooking the meals. Although the robots weren't as

good as Meg, their cooking wasn't bad. When Zhao Hai's group arrived at the canteen, the students already finished their meal and went back to rest. Zhao Hai asked Mu Yao and the others to sit down. Then Laura and the others brought the group a cup of tea.

Zhao Hai turned towards Mu Yao and said, "Elder Mu, this is herbal tea made by me. Drinking it will clear your mind. Please have a sip."

Mu Yao picked up the teacup and took a sip. The first thing he noticed was the fragrance of the tea, then he felt his mind clear up. He felt really great. Mu Yao put down the teacup as he nodded and said, "Good tea. Very good. Little Hai, is this tea easy to produce?"

Zhao Hai smiled and said, "It's hard to make, very hard. This tea needs leaves of the elven trees as well as other medicinal plants. It can be said that it is medicinal tea." Then he paused for a moment as he looked at Mu Yao and the others and said, "Elders, rest assured, I have already calculated the output of this tea. I can send you a good amount every year. If you use spring water to make tea, its effect will be better."

Mu Yao laughed and said, "Good kid. You arranged this a long time ago, right? Alright, then we'll accept it." Zhao Hai smiled faintly but didn't say anything. At this time, Laura and the others also brought the food to the table. The food this time was made by Meg. There were 12 dishes overall. They were meaty and plain but had all sorts of delicious colors and flavors.

Zhao Hai took out a few jugs of liquor and poured everyone a cup. Then he took his cup as he turned to Mu Yao and the others and said, "It's rare for Elders to visit Bluetree Planet. Allow this Zhao Hai to offer his respects."

Mu Yao laughed loudly and said, "Little Hai, you're too polite. Take a seat. I want to taste your food and wine." However, some of the Elders returned Zhao Hai's greeting before they tasted the dishes on the table.

The dishes tasted very good. Most importantly, as Zhao Hai said, there's no toxin in them. After eating, the food immediately transformed into qi. This was the first time they have eaten such a good dish.

Fortunately, Mu Yao and the others were people with high status. After eating, Zhao Hai invited them to his residence for tea. Since Mu Yao and the others also had something to tell Zhao Hai, they didn't decline.

After arriving at the residence, Laura and the others brewed them a pot of tea before withdrawing. Mu Yao looked at Zhao Hai and said, "Little Hai, can we establish schools like yours on other planets?"

Zhao Hai guessed that Mu Yao and the others would ask about this. He shook his head and said, "The academy can be built, but the problem was that there weren't enough teachers. Elders should have seen it, I use Undead for teachers. At this stage, the Undead has no problems teaching the children. But once they grow up, the Undead would no longer be able to. Fortunately, after the war, I was able to get Transcending Tribulation Undead. They can teach the children once they grow up. However, there can only be so much Transcending Tribulation Undead. The academies can be built. The spiritual food can be grown. Elven trees can be transplanted. The most difficult problem to solve is the lack of teachers."

Mu Yao sighed and said, "That problem is very hard to solve. Without enough teachers, building academies is useless."

Tang Yaoen looked at Zhao Hai and said, "Little Hai, do you have any solutions for this?"

Zhao Hai already thought about this problem. He looked at Mu Yao and the others and said, "This problem is actually easy to solve. We have a lot of planets in the Hundred Treasures Realm, but there's no need to have an academy for each planet. Once someone reaches the Core Formation Realm, they would no longer need teachers, nor learning at school. So I think that the Hundred Treasures Realm can concentrate its resources and teachers into certain planets. These planets will be specialized to teach children. Once these children reach Core Formation, they can return to their planet and learn from their master. This way will be much easier. It would also be easier for their master."

Hearing Zhao Hai, Mu Yao and the others immediately understood what he meant. However, they didn't agree on it on the spot. Instead, they thought about it for a while before Mu Yao said, "This method is good. We'll think about it before making a decision. But Little Hai, if we decide to do this, we'll be expecting you to help us."

Zhao Hai smiled faintly and said, "Elders, rest assured, I will do my best."

Mu Yao nodded, then he stood up and said, "It's already late, so we'll be heading back. Little Hai, you can remain here. If there's anything you need, just go to the headquarters and look for us directly." Zhao Hai nodded. After that, Mu Yao took the other Elders and left.

Zhao Hai didn't follow the others back to the headquarters. It actually doesn't matter if he goes to the headquarters or not. Because of the construction task, Zhao Hai was given the opportunity to map out the entire headquarters. Even the secret caves had been mapped out. Because of this, Zhao Hai no longer needs to go to the headquarters to see if something was wrong.

What Zhao Hai needed to do right now was to map out the entire Hundred Treasures Realm as soon as possible. At the same time, he wants to see what the entire Hundred Treasures Realm was really like.

Zhao Hai believed that the Hundred Treasures Realm, World of Cultivation, and the other realms were in the same universe. It's even possible that they're part of an even bigger realm. But because they were far apart from each other, it seems like they had no connection. Zhao Hai wanted to see if his guess was correct.

While understanding the situation of the Hundred Treasures Realm, Zhao Hai was also going all out understanding the state of the Ten-thousand Realm Battlefield. The Ten-thousand Realm Battlefield just has too many realms. Too many to cause Zhao Hai to be surprised. Moreover, the battlefield was an extremely huge continent. Despite there being a lot of realms inside it, no one actually arrived at its edge.

The Hundred Treasures Realm was now very popular in the Ten-thousand Realm Battlefield. However, Zhao Hai was very worried about this. It was said that the rafter that sticks out will rot first. The Hundred Treasures Realm was now a rafter that stuck out. The other realms in the battlefield would certainly try to deal with them. When the time comes, the Hundred Treasures Realm would suffer a misfortune.

Moreover, the Hundred Treasures Realm now has a very powerful enemy, which was the Fireweaver Race. Although the Fireweavers suffered a loss, it wasn't to the point where their vitality was damaged. At most they were forced to retreat. But because they hadn't been injured by their defeat, the Fireweaver Race was a predator waiting to strike. The Hundred Treasures Realm needed to tread carefully, otherwise they would give this predator a chance to attack.

Most importantly, Zhao Hai wanted to find clues from the Ten-thousand Realm Battlefield to see how it was created. Even if he didn't find out how the realm was made, at least he wanted to know the people

behind the Hundred Treasures Realm; if there really was someone behind the Hundred Treasures Realm.

Originally, Zhao Hai thought that it was one of the five Great Realms. But after probing Mu Yu and the others time after time, he wasn't able to get a positive answer. From what he found out, the five Great Realms don't have enough strength to compel the Hundred Treasures Realm to become their subordinate. In other words, the Hundred Treasures Realm's background was much stronger than the five Great Realms.

Zhao Hai wanted to look for clues in the Ten-thousand Realm Battlefield to confirm his own judgement. In the beginning, Zhao Hai was very confident in his judgement. He was fully convinced that there were people behind the Hundred Treasures Realm and the Giant Spirit Realm. But after the war, his judgement was shaken. If there were really people behind the two realms, then why didn't they stand up when the Giant Spirit Realm was about to be evicted out of the Ten-thousand Realm Battlefield? Could it be that the other party can endure its subordinate realm being evicted off of the battlefield? Was that possible?

Because of this, Zhao Hai wanted concrete proof that there were people standing behind high-grade realms such as the Hundred Treasures Realm and the Giant Spirit Realm!

#### Chapter 1528: Handover

Time passed and it has been two years since the last battle between the Hundred Treasures Realm and the Fireweaver Race. In the past two years, the Ten-thousand Realm Battlefield had been calm. It seems like the battlefield returned to its original state.

The territory of the Hundred Treasures has grown larger. The subordinates under their protection had also increased. The realm's overall strength has risen. The Hundred Treasures Realm has already become a top powerhouse in the battlefield. Their future was looking bright.

The other realms didn't dare offend the Hundred Treasures Realm. At the same time, the Fireweavers have been behaving themselves. Zhao Hai knew that Fireweavers were behaving themselves because they would risk being attacked by all high-grade realms if they dared to make a move. And once this happens, the other four Great Realms would definitely try to shake the foundations of the Fireweaver Race.

Being able to become one of the five Great Realms, the Fireweavers certainly weren't simple. They knew how to attack and retreat. The last time, they only made a move because they saw an opportunity. And when they saw their odds going bad, they decidedly withdrew. To be honest, Zhao Hai admired this aspect of the Fireweaver Race.

However, the more the Fireweavers were like this, the more wary Zhao Hai was. Such enemies were bound to be very dangerous. Right now, the five Great Realms were in an equilibrium. None of them wanted to make a huge move right now. And now that the Hundred Treasures Realm had become more powerful, it was almost impossible for the Fireweavers to make a move on them. In the meantime, the Hundred Treasures Realm wasn't in any danger.

On the other hand, Zhao Hai's investigation towards the Hundred Treasures Realm's background wasn't doing well. However, he was now certain that the Hundred Treasures Realm had someone behind it.

No matter what, it seems like the Hundred Treasures Realm's backer didn't care too much about the realm's affairs. They didn't do anything despite knowing that the Giant Spirit Realm and the Fireweaver Race were ganging up on the Hundred Treasures Realm.

Zhao Hai found some clues on ancient scrolls of the Hundred Treasures Realm. When he began looking for clues, he wasn't able to find anything because of the long-term feud between the Hundred Treasures Realm and the Giant Spirit Realm. Even so, the records he found were very ominous, causing Zhao Hai to be suspicious. However, this wasn't the time to be anxious. Zhao Hai felt that he would find proper clues sooner or later.

In the past two years, Zhao Hai rarely went to the Ten-thousand Realm Battlefield. Sometimes he would visit Yan Planet. Yan Planet had already been listed as a forbidden land by Mu Yao and the others. It was now impossible to treat the planet as a garbage dump. Mu Yao and the others also assigned people to guard the planet. Naturally, waste materials were still being sent over to the planet.

Zhao Hai went to Yan Planet in order to recycle the waste materials being sent. But normally, he stayed inside Bluetree Planet in order to look after the children. He wanted to train these children to become his loyal subordinates.

Despite having an abundance of resources, Zhao Hai actually has very few people to use it on. Now that he has the opportunity, he naturally wouldn't just let it go.

Although the Hundred Treasures Realm looks calm, it was in fact divided into factions. For now, the strongest was Mu Yao's faction. And because of Mu Yao's connection with Zhao Hai, he was grouped up with them. The troubles of the Hundred Treasures Realm would begin from here.

Because of this, the most important thing for Zhao Hai was to establish his own influence. As long as he grows his strength, nobody would dare make a move on him.

Additionally, Zhao Hai has insurance for himself, and that was his status as Refining Grandmaster. He can recycle waste materials into useful resources. As long as he held this skill, nobody from the Hundred Treasures Realm would dare offend him.

Actually, Zhao Hai was most happy about the children. The children have been learning for two years now. In the past two years, Zhao Hai was very dedicated to teaching the children. At the same time, the children were also very competitive. More than a thousand of them were already close to the Foundation Establishment Stage while the worst of them was approaching the peak of Body Refining.

Moreover, the children's innate talents were beginning to show. Some of the children had skills regarding medicinal plants, some were good at refining. Zhao Hai made sure to develop these talents.

If Zhao Hai wants to develop his power, then it's impossible to rely on cultivation alone. Therefore, Zhao Hai didn't only focus on fostering the cultivation of the children, but he went along with their aptitude. In any case, these children were now his servants and disciples in the future. They would all follow his surname, so he can teach them as he wants.

In the past two days, the Hundred Treasures Realm also built academies on other planets. Moreover, they followed the method that Zhao Hai suggested. So far, the academies were doing well. Once the children reached the Foundation Establishment stage, they would be sent back to their respective planets to follow their master. Although the effect wasn't as good as Zhao Hai's academy, it was still much better to their previous system.

Needless to say, Zhao Hai made a great achievement this time. Although a lot of children were still below the Foundation Establishment Stage, the proportion that had broken through was still much more than before. Even if these children couldn't enter the Transcending Tribulation Stage, as long as they reach the Nascent Soul Stage, they can become very good teachers. In turn, this would benefit the future development of the Hundred Treasures Realm.

Zhao Hai also learned a lot about the Hundred Treasures Realm in the past two years. The Hundred Treasures Realm seen on the Ten-thousand Realm Battlefield was not the real Hundred Treasures Realm. The realm was indeed one of the top existences of the battlefield. Zhao Hai was now aware of the realm's true face.

Because of the recent war, the Hundred Treasures Realm were able to gain a lot of good things. At the very least, the Hundred Treasures Realm can now make Giant Spirit Treasures Ships on their own. They can also make rifles. These two were very beneficial to the future of the realm.

In the past two years, Mu Yao would also return to the realm from time to time to take a look, the same was true for Tang Jie and the others. Mu Yu's status in the Hundred Treasures Realm was now very high. After the war, Mu Yu's military exploits, adding to his formidable background, made it impossible for other people to make a move on him.

This day, the children in Zhao Hai's Bluetree Academy were attending their lessons. The students were divided into classes. These classes weren't decided based on the student's aptitude, but instead by what they were interested in. For example. There were physical training classes, refining classes, alchemy classes, spearmanship classes, and many others.

At this point, the teachers in the academy have been changed into high-level Undead. These were Undead in the Transcending Tribulation Stage and above. In addition to providing the children with better education, Zhao Hai also had the Undead teach in order to train them. It must be known that imparting knowledge wasn't an easy matter.

At this time, a flash of white light appeared on the transmission formation. After that, three people could be seen. Zhao Hai turned to look and saw that it was Mu Yu, Tang Jie, and Tang Wen.

Zhao Hai immediately flew over and greeted them, "Brothers, why did you come over? Did something happen?"

Mu Yu smiled and said, "We're here to ask you for a drink."

Zhao Hai laughed, then he led the three towards his residence. After arriving, Zhao Hai and the others provided them with food and drinks. Mu Yu drank his liquor, then he sighed and said, "Little Hai, the reason we're here is because we have something we need you for."

Zhao Hai stared, then he asked, "What is it?"

Mu Yu forced a smile and said, "Little Hai, you should be aware that there are countless realms in the Ten-thousand Realm Battlefield. The location is also quite strange. Facing the sea. The Hundred Treasures Realm surrounded by the five Great Realms. It's now impossible to increase our territory. As for the seas, it is surrounded by a poisonous purple fog as well as the black clouds overhead. Even if we went to the sea, it's still impossible. However, we haven't given up yet. After several expeditions, we discovered that the purple fog and the dark clouds weaken every 50 years. Because of this, the realm sends young people to scout the sea every 50 years. However, despite sending a lot of people, none of them had yet to return. These people have the same strength as you. But this didn't stop the major realms from sending people every 50 years. The time to send people is approaching. However, nobody was willing to go because they knew that nobody was able to return alive from these expeditions. I came this time to tell you that Master is about to end his 100-year assignment in the Ten-thousand Realm Battlefield. He and the other elders will be replaced with another batch of Immortal Experts. This new batch of experts aren't very friendly with Master. Me and Tang Jie aren't in any danger since our Masters have already taken care of this for us. But as for you, Little Hai, I advise you to go into a close-door cultivation soon. Otherwise, people will assign you to explore the sea, compelling you to a dead end."

Zhao Hai stared, he also understood the factional strife of the Hundred Treasures Realm in the past two years. However, this was the first time he heard of this matter. He couldn't help but frown as he said, "They want to make a move on me? I have repeatedly gained achievements for the Hundred Treasures realm. Moreover, I can recycle waste materials into usable resources. No matter what their purpose is, they shouldn't touch me, right?"

Mu Yu sighed and said, "Little Hai, every time the Immortal Experts in the Ten-thousand Realm Battlefield gets rotated, a huge wave would ripple out in the Hundred Treasures Realm. Me, Little Jie, and Little Wen have Immortal Experts behind us, so nobody dared to deal with us. Otherwise, once our Master sits in the position, they would deal with the other party's disciples. However, although you are now under Master Mu's umbrella, you have no power behind you. The merits you made will also be counted on the Master's faction, not on you. I'm afraid they will deal with you first. To them, your presence is a huge boost towards Master's faction. You aren't someone they can allow to exist for a long time. In their opinion, now that the Giant Spirit Realm has been driven out of the battlefield, the Hundred Treasures Realm's biggest enemy is now gone. To the other party, losing you won't be that big."

Chapter 1529: I'm Going!

Zhao Hai stared. He didn't really expect things to be like this. He thought that he could be on par with disciples of Immortal Experts with only his own skill. He didn't expect people to actually ignore his situation.

Zhao Hai knew that Mu Yu and Tang Jie were both stable people, especially after their experience in the war. Since they both told him about this, it means that it was very likely to happen. This caused his expression to change.

Zhao Hai looked at Mu Yu and said, "Big Brother Mu, what advantage do they gain doing this?"

Mu Yu smiled bitterly and said, "What other advantage could there be? In their opinion, cutting off the arms of the Mu faction is an advantage. In fact, I think that Immortal Experts like them should not interfere with the matters of the realm. However, this was the rules, and the leadership would take turns. Nobody can change it."

Zhao Hai shook his head and said, "I didn't expect there to be so many twists and turns in the Hundred Treasures Realm. If this is the case, then will the World of Cultivation and the Xu Race be touched as well?"

Mu Yu shook his head and said, "That won't happen. There is a clear rule in the realm that as long as someone becomes a subordinate, they would not be suppressed. The offenders will be disposed of by the Immortal Experts."

Zhao Hai let out a long breath and said, "Good. So what am I expected to do? Do I just explore the sea? If they really want me to go, I'll have no choice but to go and see."

Mu Yu didn't expect Zhao Hai to say that. He couldn't help but be stunned as he said, "Little Hai, don't go. The poisonous fog and the black clouds are very powerful. Even Immortal Experts won't dare face them, not to say you. You shouldn't go."

Zhao Hai smiled faintly and said, "That is because Immortal Experts generally don't have Faith Power. Brother Mu, let me tell you the truth. Ever since I gained Faith Power, I had been invincible against poisons. Whether it be the purple fog or the dark cloud, they wouldn't be able to do anything to me. Don't worry about me. I'm also a Space Divergent Ability User. If I really can't bear it, then I will return."

Mu Yu shook his head and said, "That's no good. Master already instructed me to prevent you from going. If you suffer an accident, the Hundred Treasures Realm would lose so much."

Zhao Hai smiled bitterly and said, "If I don't go, then the other party would just hatch another plot. I might as well go. And if I manage to find something beyond the sea, then wouldn't that be good for the Hundred Treasures Realm? Don't worry, nothing will happen to me."

Despite hearing this, Mu Yu still shook his head. Seeing this, Zhao Hai added, "Big Brother Mu, let me tell you, even if the realm doesn't send me, I would still want to go to the sea in order to take a look. Just as you said, we could no longer gain more land. Moreover, I don't want to see land anymore, it's no longer interesting for me. It's better to head out to the sea. I'm not a normal person. I want to go to weird places and collect weird things."

Seeing Zhao Hai's resolve, Mu Yu said, "You really want to go? If you really do, you have to see Master. I can't take responsibility for this decision."

Zhao Hai smiled faintly and said, "Alright, then I'll go visit Elder Mu. Meanwhile, let's have a drink and some food."

Mu Yu impatiently shook his head and said, "If you go, I will help you take care of Bluetree Planet. So you don't have anything to worry about."

Zhao Hai smiled faintly and said, "There's no need for you to look after the planet once I go. I will take the children with me so they can learn. This is also a lesson for them."

Mu Yu smiled bitterly and said, "You really want to play around. Alright, you can discuss this with Master. Let's have a drink."

The four ate and drank while chatting. Zhao Hai also asked about the Immortal Expert who was about to take over the Hundred Treasures Realm. From what Mu Yu said, the person's name was surnamed Shen, His full name was Shen Wei. He was an old Immortal Expert who had some problems with Mu Yao since they were young. The two fought against each other their whole lives. Later on, when Mu Yao entered the Immortal Stage first, Shen Wei took it as the greatest shame in his life. Although Mu Yao didn't care about him, this person had always wanted to move against the Mu faction. It was just that he couldn't do anything to Mu Yao's faction.

However, a few years ago, Shen Wei's direct disciple went outside and got killed. Up until now, nobody was able to discover who killed him. However, that disciple used to be on par with Mu Yu. Because of this, Shen Wei suspected that it was the Mu Faction that killed his disciple and since then he wanted to retaliate. But since Mu Yao was in-charge of the realm, even if Shen Wei wanted to retaliate, he wouldn't be able to do anything. And now that Mu Yao was about to hand over control, Mu Yu and the others were instructed to be more careful. They were all instructed to close up.

Mu Yao wasn't very fond of Shen Wei. Because Shen Wei had been domineering, many people in the Hundred Treasures Realm didn't like him. Mu Yao was the exact opposite. He was gentle and knew how to reward and punish. Because of this, there were more people around Mu Yao. The reason why Mu Yao didn't confront Shen Wei was because he didn't want to cause any instability in the Hundred Treasures Realm.

Naturally, Shen Wei also didn't dare go too far. Although he was resentful towards Mu Yao, he was also someone who thought of the larger picture. He also considered the future of the Hundred Treasures Realm.

Because Zhao Hai wasn't his disciple, Mu Yao was afraid that Shen Wei would act against him. Moreover, Zhao Hai made a lot of great contributions towards the Hundred Treasures Realm. The more achievements Zhao Hai made, the more unfavorable it would be for Shen Wei. This was because all these achievements would be placed under Mu Yao's name.

Additionally, Zhao Hai's performance in the recent war was too eye-catching. A lot of youths in the Hundred Treasures Realm treat him as an idol. It can be said that Zhao Hai's fame was bound to surpass Mu Yu's. In this case, it would be impossible if Shen Wei didn't try to deal with him.

Shen Wei wouldn't dare make a move on Mu Yu. This was because Mu Yu was the foremost expert of his generation. Making a move on Mu Yu was basically crippling the future of the realm. Not only Mu Yao, but the other Immortal Experts wouldn't agree.

However, Zhao Hai was different. Firstly, Zhao Hai was just an immigrant from the World of Cultivation. Secondly, Zhao Hai wasn't Mu Yao's direct disciple. Thirdly, Shen Wei didn't know that Zhao Hai has the ability to recycle waste materials. And even if they knew, they still wouldn't accept it. Therefore, it's quite possible for Shen Wei to make a move on Zhao Hai. Because of this, Mu Yao made sure to warn Zhao Hai.

Upon understanding Shen Wei's position, Zhao Hai sighed. He could hear from Mu Yu's words that Shen Wei wasn't a bad person. However, he was somewhat biased and stubborn. Otherwise, he wouldn't have pinned the murder of his disciple onto Mu Yao.

After the four finished drinking, they rested a while before they all went to the headquarters. Mu Yao was currently very busy. He needed to organize everything before Shen Wei took over. Everything needed to be smoothed out before the handover.

This was quite normal for the Hundred Treasures Realm, so they were used to the process. It's just that so many things happened in Mu Yao tenure. He had a lot of things to deal with.

Seeing the four arrive, Mu Yao couldn't help but stare. Then he turned to Zhao Hai and said, "Little Hai, why are you here? Do you need anything?"

Zhao Hai smiled faintly and said, "I have seen Elder Mu. This time, I came to discuss something with you."

Mu Yao raised his brow and said, "What is it?"

Zhao Hai smiled and said, "I heard that the realm would send people out to the sea. I'm thinking of volunteering for the task."

Hearing Zhao Hai, Mu Yao couldn't help but stare. Then his expression changed as he said, "No, absolutely not. If you suffer an accident, the Hundred Treasures Realm would lose out too much."

Zhao Hai smiled bitterly and repeated to Mu Yao what he said to Mu Yu. Moreover, he also said that he would take the 10 thousand children with him to gain experience.

Hearing Zhao Hai, Mu Yao was in doubt. He looked at Zhao Hai and said, "Little Hai, do you really want to go? How confident are you?" Mu Yao knew clearly that Zhao Hai wouldn't hurt the children. If he wasn't confident, then he wouldn't take the children with him.

Zhao Hai nodded and said, "I'm very confident. Elder, don't worry. When have I made decisions where I'm not sure?"

Mu Yao looked at Zhao Hai, then he laughed and said, "Alright. But you still need to be cautious. Hearing your reason, then I'm assured. If you're really confident, then you can go. However, this is only our speculation. If Shen Wei makes you go, then you can. If he doesn't, then you can forget it."

Zhao Hai smiled and said, "Even if you don't make me go, then I would still take a look. Originally, I'm still on the fence, but now I have to go. Elder Mu, this one also has something to tell you. Although your kindness is for the Hundred Treasures Realm, others can still treat it as weakness. When necessary, it's better to be overbearing."

After hearing Zhao Hai, Mu Yu and the others let out a cold air. Zhao Hai's words towards Mu Yao were somewhat excessive. Mu Yao was currently the head of the Hundred Treasures Realm. Zhao Hai was essentially giving advice to Mu Yao. And his words might cause turmoil to the Hundred Treasures Realm.

Mu Yao narrowed his eyes and said, "Little Hai, what do you mean by your words?"

Zhao Hai replied with a serious tone, "Elder, if Elder Shen Wei can send me to the sea, then what if he sends someone else as well? Every Severed Soul Expert in the Hundred Treasures Realm is precious. If something happens to them, then it would be a great loss to the realm. If he can send people to explore the sea now, then what's stopping him from sending others later? The Hundred Treasures Realm cannot always accept such losses. It would be detrimental to the realm's future development."

When he spoke up to this point, Zhao Hai stopped for a moment, then he continued, "Everyone knows of my great contributions to the realm. If Elder Shen Wei sends me on an expedition to the sea, is he really the one that should be making the real decisions for the realm?"

#### Chapter 1530: Preparing for Departure

Zhao Hai stood calmly outside the conference hall. It has been two months since his last entry to this room. Last time, Zhao Hai left very impolite words towards Mu Yao. However, Mu Yao didn't blame him. On the contrary, he agreed with what Zhao Hai said.

A month ago, Mu Yao officially handed control over to Shen Wei. Now, Shen Wei had become the Hundred Treasures Realm's leader for the next 100 years. It was also at this time that Mu Yu and the others began their closed-door cultivation.

Zhao Hai didn't close up and even attended the handover ceremony. When he saw Shen Wei, Zhao Hai didn't expect to see him as a gentleman. His whole person looked gentle and elegant, with an extraordinary temperament. However, there was an arrogant look on his face, which made Zhao Hai uncomfortable.

After attending the handover ceremony, Zhao Hai returned to Bluetree Planet. Meanwhile, in the headquarters, things were changing. Shen Wei moved swiftly. Naturally, he didn't overrule anything that Mu Yao set in place. This was because Mu Yao's arrangements were good for the Hundred Treasures Realm. If he vetoed it, then the people in the Hundred Treasures Realm wouldn't allow it. Instead, Shen Wei cleaned up the people in the headquarters, he let his own people in while he transferred others. With this, the Mu Faction began to lose some influence in the Hundred Treasures Realm.

Zhao Hai didn't oppose this. After all, a new boss would bring his own staff. A new officer would naturally arrange his own people to important positions in order to calm his heart.

In this way, no massive waves were caused to the Hundred Treasures Realm. There was a smooth transition. And since the Mu Faction tolerated it, this matter passed quietly.

The reason why Zhao Hai was back in the headquarters was because of the sea expedition! Last time, when Zhao Hai talked with Mu Yao, they weren't in the conference hall but in Mu Yao's abode. Because of this, nobody knew that Zhao Hai volunteered to explore the sea.

There were still ten days before the expedition would leave. The Hundred Treasures Realm already decided on who to send. As expected by Mu Yao, it was Zhao Hai.

Zhao Hai knew that when Shen Wei decided that he would explore the sea, a lot of people came to oppose it. However, Shen Wei was stubborn and determined. And since Mu Yao didn't come forward, Zhao Hai's assignment was set in stone.

Zhao Hai also knew that this was Shen Wei acting against him. But he didn't care since he knew about it a long time ago. He wasn't worried at all.

At the same time, Zhao Hai was aware why Mu Yao didn't step forward. This wasn't because Mu Yao can't do anything, but instead it's because Shen Wei hasn't done anything excessive yet. Therefore, Mu Yao just lied in wait.

Zhao Hai knew that the words he spoke to Mu Yao that day had been received. Mu Yao wanted to wipe out Shen Wei's arrogance. However, he needed an opportunity. An opportunity that Shen Wei wouldn't just willingly give.

Although Mu Yao didn't want to battle with Shen Wei for the stability of the Hundred Treasures Realm, Shen Wei had been more and more insolent lately. Shen Wei's action towards Zhao Hai was too much for Mu Yao's bottom line. Now that Shen Wei did indeed act against Zhao Hai, what's stopping him from dealing with Mu Yao later? It's precisely because of this that Mu Yao was ready to deal with Shen Wei.

Mu Yao doesn't want to go head to head against Shen Wei. But once he decided to, Mu Yao wouldn't be a saint. He knows how to fight tigers. Therefore, he needed to wait for a chance, a chance to deal damage to Shen Wei that he wouldn't be able to recover from.

Had it not been for his conversation with Zhao Hai, Mu Yao would have come out and gone head to head with Shen Wei once the latter decides to send Zhao Hai for the expedition. But if that happens, Mu Yao wouldn't be able to beat Shen Wei. But after talking with Zhao Hai and knowing that Zhao Hai had a desire to go to the sea, Mu Yao decided to wait for an opportunity.

The entire headquarters was under Zhao Hai's surveillance. Therefore, he knew whatever Mu Yao was planning. He doesn't blame Mu Yao. Conversely, he agreed to Mu Yao's method. An opponent like Shen Wei needed to be erased. Otherwise, he would cause endless trouble in the future.

Now that it has been decided that Zhao Hai would go out to explore the sea, Shen Wei sent a jade sword message to summon Zhao Hai to the headquarters. In the past, Zhao Hai treated the conference hall like his own home, coming in and out at will. But now, he already stood outside the hall for quarter of an hour and had yet to be invited in.

Zhao Hai wasn't worried nor angry about this. He already knew that Shen Wei would pressure him. Therefore, he calmly waited outside. This wasn't a shameful thing. On the contrary, it would only make Shen Wei look worse to the rest of the Hundred Treasures Realm.

Everyone in the Hundred Treasures Realm knew who Zhao Hai was. He was someone who contributed a lot to the Hundred Treasures Realm. His popularity wasn't any lower than Mu Yu. In this case, nobody objected when Mu Yao allowed Zhao Hai to just enter the conference hall whenever he wanted.

And then there's Shen Wei who made Zhao Hai wait outside for a quarter of an hour. The others from the Hundred Treasures Realm couldn't bear it.

Everyone was aware that Zhao Hai was someone from the Mu Faction. But strictly speaking, Zhao Hai couldn't be considered as someone under Mu Yao. The benefits that Zhao Hai gained were obtained through his contributions. Although he was close friends with Mu Yu and Tang Jie, he doesn't have any enmity with the Shen Faction. It was Shen Wei and Mu Yao who had a grudge with each other, so why did Shen Wei bother Zhao Hai and assigned him for the sea expedition?

Zhao Hai could hear the conversation of everyone around him, but he kept his calm. With eyes half-shut, he just stood in place. People who didn't know would think that he was asleep.

Actually, Zhao Hai was communicating with Cai'er. At this time, Cai'er and the others were organizing the students to enter the Hell King's Ship. After all, Zhao Hai decided to bring them along for the trip.

With the students leaving, the only ones left in Bluetree Planet were the robots. These robots would look after the medicinal fields as well as the plantations and crops.

Since Zhao Hai and the students were leaving, there was no need for the medicinal fields to be harvested. Some medicinal plants get better as they get older. And this time, Zhao Hai and the others would be on a long journey.

As for the beasts in Bluetree Planet, they had been butchered and loaded into the Space. These beasts would be used as meat. If they were left behind, then all the plants in Bluetree Planet would be eaten.

A year ago, Zhao Hai also took Julie in officially as his woman. Although Julie still had her wild nature, she was now able to distinguish right from wrong. She could now act like a human.

As Zhao Hai was paying attention to the preparations in Bluetree Planet, a voice was suddenly heard, "Zhao Hai, enter." Zhao Hai opened his eyes and walked slowly towards the conference hall.

Upon entering the hall, Zhao Hai saw Shen Wei in the head seat. As usual, Shen Wei had the righteous look on his face. As he sat in his seat, Shen Wei did look like an upright official.

Zhao Hai cupped his fist as he gave his greetings, "Zhao Hai has seen Elder Shen Wei and the other Elders. I don't know why Elder summoned me, but I would accept any advice."

Shen Wei looked at Zhao Hai, then he coldly snorted and said, "Is this your first day in the Hundred Treasures Realm? How come you can't even give an offering? Forget it, this Elder wouldn't haggle against you. In ten days, the semicentennial exploration of the sea will begin. This Elder has decided to give you this opportunity. Do you have any opinion about this?"

Zhao Hai smiled faintly and said, "Zhao Hai doesn't have any opinions about it. I'll listen to Elder's arrangement."

Zhao Hai's reply caused Shen Wei to stare. He thought that Zhao Hai would reject his order. He didn't expect Zhao Hai to agree so quickly. Shen Wei sized Zhao Hai up as he said, "The sea expedition is very important to my Hundred Treasures Realm. Since you agreed to this assignment, you need to go to the appointed place in time. Otherwise, this Elder will punish you heavily."

Zhao Hai smiled and said, "Zhao Hai will remember. I guarantee that I'll arrive on time. Elder can rest assured."

It was difficult to hit a smiling face. Zhao Hai has been smiling ever since he entered the hall. Moreover, he accepted the assignment without delay. This denied Shen Wei the chance to show his authority. This aggrieved Shen Wei. He looked at Zhao Hai and said, "It's good that you know. This is the place where the other explorers will gather. There is still time, but don't be late. Now go."

Zhao Hai nodded as Shen Wei gave him a jade slip. Then he withdrew from the conference hall. As Zhao Hai left, Shen Wei frowned and said to the Immortal Expert at his side, "Third Brother, what do you think about Zhao Hai? Why did he accept easily? Doesn't he know the dangers of exploring the sea?"

The Immortal Expert at the side knit his brows and said, "I don't know. Although we haven't been in contact with Zhao Hai for a long time, rumors say that he's someone who plans deep before taking action. How is it possible for him to not know the dangers of the sea? Moreover, even if he doesn't know, how could the Mu Faction not? Mu Yao stepped back and allowed us to do this. It's impossible for him to withhold the danger to Zhao Hai. This is indeed strange."

Shen Wei knit his brows and said, "I originally want to use Zhao Hai to lure Mu Yao out and use the name of justice to deal with him. However, I didn't expect Zhao Hai to accept the task. The situation has become more difficult."

The Immortal Expert next to him said, "This is no big deal. In any case, Zhao Hai has to undergo this task. If he doesn't go, then we will deal with him. I don't believe that Mu Yao would just watch if that happens. No matter how much contributions Zhao Hai gave to the Mu Faction, if Mu Yao doesn't protect him, then nobody would dare follow him in the future."

Shen Wei nodded, then he coldly snorted and said, "This time, I must let Mu Yao suffer a big loss."

Then at this time, an Immortal Expert sitting on the end of the table turned towards Shen Wei and said, "Brother Shen, I'm fine with dealing with the Mu Faction. However, I think we shouldn't touch Zhao Hai. Although he gave great achievements to the Mu Faction, all of these achievements were also made for the Hundred Treasures Realm. Everyone in the realm knows about this. If we touch Zhao Hai, then people would think bad of us. I don't think it's worth it."

Shen Wei looked at the Immortal Expert, then he coldly snorted and said, "Zhao Hai is just someone who moved to the Hundred Treasures Realm. What's so great about that. The Mu Faction is just putting gold on his face. If we can deal with him, then we'll deal with him. What can he do?"

Looking at Shen Wei, the Immortal Expert no longer said anything. He knew that Shen Wei had been muddled by anger. When Mu Yao was in charge of the Hundred Treasures Realm, the Giant Spirit Realm and the Fireweavers attacked. At that time, he was also involved in the war. However, at that time, they were sent to deal with the other party's Immortal Experts. Therefore, they hadn't seen Zhao Hai's actions. However, the Immortal Expert was aware that Zhao Hai's achievements were real and not Mu Yu pinning it on him. To be honest, Mu Yao gave too little reward to Zhao Hai. It wouldn't be a wise decision to deal with such a person. It would be going too far. Even if they succeed, they would suffer backlash in the future.

However, the Immortal Expert also knew that even if Shen Wei looked scholarly and well-mannered, he was actually hard-headed. He wouldn't listen to criticism and advice. Anything the Immortal Expert would say from now on would be in vain.

When Zhao Hai exited the hall, he took a glance at it one more time before going to the transmission formation. When he arrived at Bluetree Planet, Zhao Hai took out the jade slip and read the contents inside. The jade slip recorded the time and place where the realms would begin exploring the sea. The location was quite far from the Hundred Treasures Realm. If he wants to arrive there in ten days, he needs to depart right now."

The sea expedition wasn't only the Hundred Treasures Realm's operation. Other high-grade realms also deemed it important. Each one of them would send a famous youth to participate. And whether they had any grudges or not, once they entered the sea, they all needed to work together. Otherwise, they would suffer punishment when they come back.

Although Zhao Hai can use transmission formations to shorten his journey, the last bit of the trip needed to be flown. Considering this, ten days of traveling time was still a little tight.

Moreover, Zhao Hai heard from Mu Yu that during the expedition, the realms would send an Immortal Expert to escort the representative towards the meeting site. But from what Zhao Hai can see, Shen Wei wasn't planning on sending someone to escort him.

The reason people needed an escort was because the road towards the meeting site wasn't safe. Although a lot of realms would send representatives over, they would set off to the sea at the same time. If one arrives late, then they would lose their qualifications to join the group. And if the expedition finds something, then that realm wouldn't be able to get a cut.

There was a realm in the past that deliberately sent their people late so that they wouldn't participate in the expedition. But in the end, they were pressured by the other realms. In the end, the representative of the realm was killed in order to quell the anger of the other realms.

It can be said that the sea expedition has become a major competition between high-grade realms.
