

## Apocalypse 114

### Chapter 114 Scarlet Honey's Effect

Kisha was motionless for the whole 10 minutes and Bell did not want anyone, including Duke to disturb Kisha at that moment but they did not know what was happening. And after 10 minutes, Kisha slowly opened her eyes with newfound clarity and her skin and every part of her body seemed to be radiating at that time, her skin turned even more supple and fair.

Amidst the backdrop of suggestive noises and the tense standoff between Duke and Bell, all eyes gravitated towards the trio. In the midst of this heightened tension, everyone bore witness to the mesmerizing transformation unfolding in Kisha.

Over the course of just 10 minutes, her once-muted complexion burst into life – her cheeks blooming with a rosy hue, her lips adorned with a vibrant red akin to freshly applied lipstick, and her locks shimmering with a newfound, healthy luster. It was as if nature itself conspired to enhance her beauty, casting a spell of enchantment upon all who beheld her.

Kisha sported a glow that could rival someone fresh from a lavish spa retreat, exuding an aura of blissful satisfaction. Despite her obvious elation, she found herself perplexed, unable to discern what changed in her body.

"What's going on with you?" Duke's expression morphed into one of incredulity as he scrutinized Kisha, eager to uncover the mystery behind her changes. However, before Kisha could even process his question, she was already engrossed in examining her status window, oblivious to Duke's inquiry.

Though the changes weren't particularly dramatic, Kisha's gaze fixated on the unfamiliar addition to her status window: (Exp: 0/100 X 0.5). The mere sight of it brought a smile to her face, the implications clear. Despite her curiosity tempting her to test the effect by consuming a crystal core, she resisted the urge.

She knew that doing so would only squander both the crystal core and its multiplier at this early stage.

Indeed, Kisha was convinced that the indicator represented a multiplier, likely enhancing either the potency of the spiritual energy within the crystal core or her body's efficiency in absorbing it or perhaps even both simultaneously. Regardless of the specifics, she recognized it as a positive development, anticipating the benefits it could bring.

If indeed the indicator represented a multiplier, Kisha realized the importance of maximizing it to its fullest potential. This would ensure that each crystal core could propel them as far as possible. While their current status as lower-level superhumans might not fully leverage the multiplier's benefits, Kisha foresaw its crucial role in the future.

As they advanced to higher levels, where consuming low-level crystal cores would prove futile, the multiplier would become invaluable, optimizing their progress significantly.

Glancing at the Scarlet Honey still nestled in her hand, Kisha couldn't help but smirk mischievously. Despite her overwhelming desire to down the entire glass, she knew better than to give in to greed. Indulging too much at once could have dire consequences.

Her body might struggle to handle the intense stimulation, risking nerve paralysis or excessive flooding in her dantian that could lead to damaging it instead of the intended benefits.

Moreover, there was no rush for Kisha to level up at the moment; she recognized the importance of solidifying her foundation first. As she pondered this, a giggle escaped her lips, recalling a crucial effect mentioned in the description.

[Scarlet Honey (Mythic Grade)]

Description: Scarlet Honey strengthens one's constitution, laying a robust foundation for enhanced strength. Over time, regular consumption of Scarlet Honey expands the spiritual passageways, facilitating the gathering of heaven and earth energy. It also aids in enlarging the dantian, thereby reducing the likelihood of martial arts practitioners sustaining internal injuries.

Additionally, Scarlet Honey can be utilized in pill-making processes, improving the chances of success and enhancing the quality of the resulting pills.

As Kisha stared at the description once more, her eyes fixated on specific lines, reading them over and over to confirm her understanding. Her repeated giggles caught Duke's attention, his concern growing with each passing moment. He couldn't shake the worry that something had gone awry with Kisha.

'Has she been affected by what she consumed?' Duke's heart clenched with unease as he glanced at her, his expression filled with concern and a touch of heartache.

Fueled by impatience and mounting worry, Duke reached out, gently grasping Kisha's shoulder. "Kisha, are you okay?" His voice quivered with emotion as he spoke the words, unable to fathom the possibility of something going wrong with Kisha. The mere thought sent a shiver of dread down his spine, his mind racing with concern for her well-being.

It wasn't until that moment that Kisha tore her gaze away from the system interface to meet Duke's eyes directly. Despite the concern etched on Duke's face, Kisha's smile remained undiminished, her eyes crinkling with unmistakable delight. "I've stumbled upon something amazing, it was good stuff" she exclaimed, her excitement bubbling over.

Now, Duke's mind began to race with suspicions. He couldn't shake the thought that whatever Kisha had consumed might be some form of hallucinogenic drug, affecting her perception. A surge of pain began to throb in his temples, signaling the onset of a headache as he grappled with the troubling possibility.

As if sensing Duke's thoughts, Kisha's annoyance was palpable as she pouted. 'How dare he assume I'm taking drugs!' With a swift motion, she tossed both her dagger and smaller katana into the air. Before they could even graze the ground, Kisha effortlessly seized control of them mid-air, a triumphant smile spreading across her face.

Earlier that day, she could only manage control over a single dagger, because she was still struggling with the weight and size of her smaller katana. The larger and heavier the weapon, the greater the strain on her mental capacity, requiring heightened focus and control.

Moreover, since she hadn't yet made a skill for this, every movement still demanded manual control, draining her spiritual energy even further.

With just a single spoonful of Scarlet Honey, its effects have already become evident in numerous aspects.
