

Apocalypse 1266

Chapter 1266: Huge upgrade

“A famous French author once said. He said that when a chance comes, it is like lightning; you don’t have time to think.”

Ye Zhongming picked up an item. He didn’t place it into the gate and just looked at Death King Tree and Talking Lady.

“I know your worries and also know that both of you want freedom. That is the basis of life.”

“But...”

Ye Zhongming’s voice became firm and hurried.

“Everything has a price in this world. If you want to absorb energy to evolve, you have to battle against strong enemies. Yangos is stronger. It went from level seven to level eight. It is happy, and all of you envy it. But why? Because it is my battle pet. It is one with me, so it doesn’t need to take any risk. I have taken his risk for him.”

These words stopped in their ears. Although their expressions didn’t change, they were emotional.

They didn’t want to lose their freedom. To get stronger, they had to fight and face dangers to evolve.

During this process, they would fight and get injured. There was also a chance that they would die at any moment.

Although they didn't make a final choice, Ye Zhongming's words made sense.

"You can consider it, and I can wait for both of you for a while." Ye Zhongming smiled and played around with the items while waiting for them to reply.

He looked calm, but he wasn't sure if the two would agree.

Although the Death King Tree had a good relationship with Cloud Peak and had a chance of agreeing, it didn't mean that it would be willing to serve Cloud Peak forever. No matter how nice Ye Zhongming made it sound, those words relied on the Gate of Blessing. If they became his battle pet, would they not need to fight?

Of course not. They would still need to fight and would even face more dangers.

What they would get would be the upfront benefits.

Talking Lady was more so. Death King Tree and her were different. She was a mental energy type of lifeform and could control zombies. More importantly, she also had a helper of the same level: that black cat. She had a big reason for wanting freedom.

Because of the black cat, the Talking Lady's evolution was much tougher. She needed two times more energy to do so. Similarly, her combat strength was pretty much twice stronger as those of the same level.

Did she like what Ye Zhongming suggested? Of course! But she would weigh the pros and cons.

Seeing the two level-eight lifeforms hesitate and then calm down, Ye Zhongming's heart sank.

He knew that his plan failed. These two lifeforms at the peak of the food chain resisted the temptation and decided to be free.

Ye Zhongming shrugged.

This was the best chance to make the two lifeforms join Cloud Peak. Unfortunately, while having high intellect, they could think for themselves. They chose another path.

"Hey, Ye, don't be like that. Our relationship isn't something a scroll can show. We are friends. En, if you are willing to mate with me, I can still consider this problem."

"You should turn into a human first." Liang Chuyin rolled her eyes. She was unhappy with the Death King Tree, wanting to seduce Ye Zhongming.

"I... Just want to ask what happened to Red Hair."

Talking Lady and Ye Zhongming's relationship wasn't as good as with Death King Tree, so she had a bigger reason to reject.

Ye Zhongming knew why Talking Lady found Red Hair. He nodded and didn't say anything.

Since the attempt didn't work, Ye Zhongming gave up. It was decent that he still planted a seed in their hearts.

He tossed the items into the gate.

"Time to wish, judging the sacrifice..."

"Sacrifice, Hell Nether Soul, level, good, will you sacrifice?"

"Sacrifice, Shocking Skeleton, level, good, will you sacrifice?"

"Sacrifice, Lazy Stone, level, good, will you sacrifice?"

.....

.....

Ye Zhongming tossed over 30 good items in.

Logically speaking, he shouldn't do that. If the ability that appeared weren't good, things would go to waste.

But he naturally wouldn't make such a mistake. He took off all the equipment he didn't want to upgrade. All that remained were things he liked.

Like the star Battle Armor, Nature Staff, Treasure Nurturing Gourd, Demon Nurturing Hive, etc.

When he felt it was enough, he stopped and upgraded.

“Start to upgrade Explosive Mechanic!”

It was actually that small thing?

Ye Zhongming obtained it early. When his level was slightly low, this thing made up for his lack of combat strength. Even when he entered the Secret Realm, the machine that unlocked four states terrified King Neal and protected Ye Zhongming, who wasn't strong then.

But as his level increased and his weapons got better, his fellow wasn't used.

But Ye Zhongming didn't want to give up on it as its potential was huge. It was only weak now. There were four higher levels. If he got the blueprint, he could increase its strength. At that time, this thing would return as a killing weapon.

He kept it in his space, so naturally, he was ready to upgrade it.

"Starting to upgrade weak grade Explosive Mechanic, upgrade... Success, level increase by 15."

"Energy remains, continue to upgrade... Success, level increase by 15."

"Energy remains, continue to upgrade... Success, level increase by 15."

.....

Ye Zhongming didn't know what the level was. It should be a way to judge the Explosive Mechanic. When he listened to three notifications, he was excited.

But a sudden notification made him helpless.

“Energy remains, continue to upgrade... Upgrade fail, energy not enough. Continue to add sacrifices.”

Ye Zhongming could only continue. He was careful this time, placing one by one and controlling the energy range to avoid any wastage.

Finally, it succeeded.

“Energy remains, continue to upgrade... Upgrade success, upgraded to ordinary grade Explosive Mechanic!”

Chapter 1267: Big Upgrade (2)

Explosive Mechanic had four forms and five levels.

The four forms were Laser Cannon, Flying Bullet Cannon, Lightning Cannon, and Light Blade Cannon.

The five levels were weak, normal, tough, good, and elite.

It was a weak grade. Without the blueprint, it lost its position. Now that it has upgraded to a normal grade, Ye Zhongming looked at its stats.

“Attack form 1, Laser Cannon (unlocked), two units of energy needed (level 2, number of attacks 5, strength 100 PA, range 100 meters. Fire rate 0.1/second.)”

“Attack form 2, Flying Bullet Cannon (unlocked), 15 units of energy needed (level 2, number of attacks 10, strength 80 PA, range 200 meters. Fire rate 1/second.)”

“Attack form 3, Lightning Cannon (unlocked), 80 units of energy needed (level 2, number of attacks 5, strength 200 PA, range 80 meters, area covered 50m². Fire rate 0.2/second.)”

“Attack form 4, Light Blade Cannon (unlocked), 900 units of energy needed (level 2, number of attacks 3, strength 350 PA, range 300 meters, area covered 70 m². Fire rate 0.1/second.)”

“Use two forms at most each time. Cooldown time: 10 hours for one form, 15 hours for two forms.”

“Durability: 1000, launch time follows durability. Inject energy to repair durability. 1 durability= 100 units of energy.”

Facing such data, Ye Zhongming’s heart jumped.

As compared to the previous explosive mechanic, the four states changed.

First was the level. Its attack level became level two. This fits the normal grade.

The level increased, and so did the strength. He didn't understand what PA meant, but it didn't stop him from comparing it to the previous value.

The 50 PA attack for four terrified the level seven Neal. Now that it reached 350 PA, it would threaten a level eight lifeform. It might even be able to hurt a level-nine lifeform.

The three differences were required energy, attack range, and fire rate. This was an all-rounded upgrade.

Finally, what made him happy was that the Explosive Mechanic had a different use after upgrading.

You could only select one form. After this, the entire Explosive Mechanic would enter a 30-hour cooldown.

Now, you can use two forms before it enters cooldown. The cooldown time also dropped. When using one form, it was ten hours. If you used two forms, it would be five more hours.

Of course, the Explosive Mechanic was bigger, but not by much. The overall structure didn't change and just looked more exquisite. The machine bodies had dark patterns.

The Gate of Blessing asked if he would continue. Ye Zhongming looked at the items and hesitated.

Continue? That was great. Since the normal Explosive Mechanic was this strong, the higher level would be better. Even with a cooldown time, the strength would allow it to decide a battle.

Don't continue? That was good, too. He would have a chance to upgrade other equipment and skills. Maybe it would be the crystal energy demon gun, what if it reached seven colored?

Ye Zhongming felt that he was thinking too much.

The problem was in front of him. He thought about it for some time before deciding to continue.

He could upgrade other equipment or abilities, but would the increase in combat strength exceed the Explosive Mechanic? That was not certain!

This weapon with a cooldown would have high explosiveness. Upgrading it would increase the attack. Compared to other random abilities, it would be more valuable.

At least, that was the case in most situations.

He placed sacrifices in like water.

It might seem like they had used many sacrifices after upgrading Yangos and Ya Ni, but they used the low-level sacrifices he had a large amount of. The remaining seemed few, but they were high-level items. Each of them was at least a good grade.

He heard the notification very quickly. The Explosive Mechanic upgraded quickly, but this time, each upgrade was only ten.

This meant that he had to use more sacrifices.

Finally, the upgrade notification spread again. It went from a normal grade to Tough Grade!

“Attack form 1, Laser Cannon (unlocked), three units of energy needed (level 3, number of attacks 10, strength 150 PA, range 100 meters. Fire rate 0.1/second.)”

“Attack form 2, Flying Bullet Cannon (unlocked), 20 units of energy needed (level 3, number of attacks 15, strength 110 PA, range 200 meters. Fire rate 1/second.)”

“Attack form 3, Lightning Cannon (unlocked), 120 units of energy needed (level 3, number of attacks 5, strength 250 PA, range 90 meters, area covered 80m². Fire rate 0.2/second.)”

“Attack form 4, Light Blade Cannon (unlocked), 800 units of energy needed (level 3, number of attacks 3, strength 450 PA, range 350 meters, area covered 100 m². Fire rate 0.1/second.)”

“You can use three forms at one time. Cooldown time, one form 7 hours, two forms 12 hours, three forms 20 hours.”

“Durability: 2000. When firing, consume durability. To recover durability, inject energy. 1 durability= 100 units of energy.”

The Tough Grade Explosive Mechanic’s strongest attack reached 450 PA. Ye Zhongming was pleased. He was also happy with the other aspects.

But like before, he faced a choice. Should he continue?

Ye Zhongming hesitated longer as he found it tough to make the choice.

Finally, the gambling nature in his bones exploded. He decided to continue!

He tossed more items in. The energy was amassed, and he started to upgrade.

Until... He heard a delightful notification.

“Upgrade success, Tough Grade Explosive Mechanic upgraded to good grade!”

Chapter 1268: Finally seven colored

“Attack form 1, Laser Cannon (unlocked), five units of energy needed (level 4, number of attacks 15, strength 200 PA, range 150 meters. Fire rate 0.1/second.)”

“Attack form 2, Flying Bullet Cannon (unlocked), 15 units of energy needed (level 4, number of attacks 20, strength 150 PA, range 250 meters. Fire rate 1/second.)”

“Attack form 3, Lightning Cannon (unlocked), 120 units of energy needed (level 4, number of attacks 7, strength 300 PA, range 100 meters, area covered 100m². Fire rate 0.5/second.)”

“Attack form 4, Light Blade Cannon (unlocked), 800 units of energy needed (level 4, number of attacks 4, strength 500 PA, range 400 meters, area covered 120 m². Fire rate 0.1/second.)”

“Max uses each time: four. Cooldown time. 3 hours one form, 7 hours two forms, 12 hours three forms, 20 hours four forms.”

“Durability: 3000. Shooting time depends on durability. Inject energy to recover durability. 1 durability= 100 units of energy.”

The Good Explosive Mechanic was much stronger, and the peak attack reached a terrifying 500 PA. Ye Zhongming felt this attack could threaten level-nine lifeforms.

It wasn't a surface-level threat but a true threat.

The only uncertainty was if its attacks would be dodged.

One thing was for sure now. It had turned into a true killing weapon. Within four hundred meters, whether solo or group targets, it could attack and kill them. The four forms could all be used.

One could say that if this thing was placed on the battlefield, it could fire quickly. It could cover four hundred meters with its strong firepower.

Ye Zhongming believed that it would be a terrifying zone.

There was one more elite grade, which was its highest level. To be honest, Ye Zhongming wanted to continue but feared the last sacrifice's energy wasn't enough. After all, any equipment or skill would need a huge amount of energy to upgrade to the highest level. Although Ye Zhongming prepared a lot, especially with two special items, he was unsure if they could provide so much energy. To be safe, Ye Zhongming didn't choose to continue upgrading the Explosive Mechanic.

Seeing Ye Zhongming give up, everyone heaved a sigh of relief.

They didn't know its stats but felt it just looked good. They didn't think it changed much.

Not many sacrifices remained. Ye Zhongming took a look and sacrificed all the darkness element equipment and lifeforms. Only that unconscious Black Abyss Envoy was left.

Ye Zhongming could upgrade the Elimination Technique to the highest grade and even the Treasure Nurturing Gourd because of the Black Abyss soul state. The Gate of Blessing saved him and sucked it away, which allowed him to return to Earth.

Now, Ye Zhongming wouldn't take the risk of getting hit again. He could only find a Black Abyss Envoy to get the most value.

As for whether or not it could provide a huge amount of contribution as he thought, it would depend.

Ye Zhongming placed the unconscious job user beside the Gate. The Saintess was shocked when she saw that the last sacrifice was a human. She looked at Ye Zhongming with a complicated expression. She wanted to stop him but didn't say anything.

Ye Zhongming received the notification and heaved a sigh of relief. The Dark Abyss Envoy was what the Gate of Blessing loved the most and judged it as the best.

After choosing to sacrifice, that job user was sucked in.

Ye Zhongming took a deep breath and knew this was the final gamble.

"Start to upgrade Stamina Fountain..."

Ye Zhongming's heart sank when he heard that notification.

This ability from the stat stone was the cornerstone of Ye Zhongming's fights. But as he had the Blood Stepping Boots, it replaced the Stamina Fountain. This was one of the choices that Ye Zhongming wasn't willing to see.

As this body was his, it was one of the choices. He didn't expect that it would be chosen.

This luck... Wasn't good.

But things were already done, and Ye Zhongming was forced to upgrade it.

"Upgrade success, obtained advanced Stamina Fountain."

"Energy remains, upgrade continues, upgrade success. Obtained Super Stamina Fountain."

"Energy remains; Stamina Fountain has reached the highest level, unable to upgrade, choose the next to upgrade."

Ye Zhongming, who had slightly given up, eyes lit up. Two upgrades, and it reached the highest level? There was still energy left?

"Start to upgrade Gate of Sacrifice."

Hearing that this equipment was the upgraded one, Ye Zhongming felt complicated.

It wasn't bad. After all, this equipment gave you endless possibilities, and you didn't know what surprises it would bring.

To say it was good, that was not the case. After all, it was similar to Gate of Blessing. You needed to sacrifice many things, and these were costs.

But like the chosen Stamina Fountain, this was a fact that couldn't change. He could only allow the Gate of Blessing to upgrade it.

"Upgrade success, obtained purple Gate of Sacrifice."

"Energy remains; continue to upgrade."

"Upgrade success, obtained seven-colored Gate of Sacrifice."

"Energy remained; Gate of Sacrifice has upgraded to the highest level, but is unable to upgrade. Choose the next one to upgrade."

"Start to upgrade basic hell envoy bloodline."

“Upgrade success, obtained intermediate hell envoy bloodline.”

“Energy is not enough, unable to upgrade... Please continue to place items.”

Ye Zhongming was listening closely, but he was stunned.

Right, he wasn't sacrificed with this round. If the Explosive Mechanic was still okay and was an A+, Stamina Fountain was a B+. Gate of Sacrifice was now C.

Ye Zhongming thought it was over. After all, Gate of Sacrifice was gold, and he thought it would be good to upgrade it. Even if there were energy left, it would have been wasted as he had nothing to continue to upgrade.

But the truth was that Dark Abyss Envoy provided more energy than he thought. Much more.

Chapter 1268.5- Finally seven colored (2)

This upgraded Gate of Sacrifice to the highest seven-colored grade!

Even then, some energy was left to upgrade the Hell Envoy bloodline to intermediate grade.

Ye Zhongming had seen many good things. Three years had passed, and he had become eight-star evolved and had many purple tems. He even fought level-nine lifeforms.

Compared to the last life when he was just a six-star evolved, this life was amazing.

But!

Although he was confident that he could reach the peak in many things like nine-star evolved. Like leading Cloud Peak to become a super faction. Like having the best equipment.

What you had to note was the time.

To Ye Zhongming, he was unable to reach that level now.

But reality slapped him.

A sweet slap.

The Gate of Sacrifice reached the highest level for equipment.

Seven-colored level!

Seven-colored!

Ye Zhongming wanted to shout out loud to show his excitement.

Maybe the Gate of Sacrifice couldn't be used to kill enemies. Maybe it required better sacrifices now. Maybe the sacrifices would be tough.

But he didn't care. This was a seven-colored piece of equipment!

Ye Zhongming had heard of such things before, but only a few people had such equipment.

Ye Zhongming was sure that this was the best on Earth now!

As the things it upgraded needed to appear before it, the Gate of Sacrifice appeared.

Not many people knew it existed. Those were the people who followed Ye Zhongming from the start, like Liang Chuyin, Little Tiger, Xia Lei, etc. The others found out about it for the first time.

Gold grade had shocked them. After upgrading, it turned purple. The core members were shocked. After all, after understanding what this exquisite equipment could do, they looked at it like it was a treasure gathering pot.

The purple was upgraded and turned into a dazzling seven-colored light like heaven behind the gate.

These people couldn't suppress their hearts, screaming and exclaiming.

These people, who were at least seven stars, stared at it without blinking, as if blinking would cause the equipment to disappear.

The seven-colored gate changed from before.

The current gate was three meters high and had a sharp tip at the top. It was made of a seven-colored material that looked like gold and jade. The gate had beautiful lifeform drawings, and each time the light shone on it, those lifeforms seemed to come alive.

The center of it was a bright energy veil.

The energy bar from before was still at the top but became simple. There was only one line, and now this line was full.

Ye Zhongming held it. As if the gate recognised him, it shone and sent some information into his mind.

Regarding energy...

Regarding reward...

Regarding use...

Regarding sacrifice...

The Gate of Sacrifice introduced itself to the owner.

Ye Zhongming went from excited to shocked.

After becoming a seven-colored piece of equipment, the rules of the gate changed.

His worries didn't happen. The Gate of Sacrifice didn't become picky because it became a piece of seven-colored equipment. On the contrary, it accepted everything, and anything could be sacrificed.

This meant that as long as it contained energy, even if its level was low, it would provide a unit of contribution.

The second point was that the Gate of Sacrifice only had one energy bar. If the energy bar was full, you could complete one sacrifice, and it would give him one reward, which meant that you couldn't accumulate energy to control the rarity of equipment.

You had to control the type of sacrifice to obtain a piece of good equipment. In theory, if all the items were of the same nature, the reward would have a higher chance of being related.

Of course, this didn't mean that the reward wasn't good. On the contrary, this Gate of Sacrifice's rewards were already fantastic. To fill the energy bar once wouldn't be easy.

"Boss, just sacrifice, open our eyes!"

Little Tiger was eager, and the others looked forward.

They wanted to know what a seven-colored equipment would reward them with!

Ye Zhongming agreed. He was also excited.

He chose to sacrifice.

The entire Gate of Sacrifice shone, and a seven-colored glow shone, occupying the space around and wrapping everyone.

The beings on the gate became virtual forms and started flying around.

The magical things didn't end. When everyone thought it was about to end, another light pillar fired. The seven colors stabbed into the sky and the dark Blue Secret Realm sky.

The entire city lit up, and from afar, the city turned into a seven-colored realm.

The light exploded and turned into specks that scattered like snowflakes.

Finally, the snowflakes gathered together and formed a ball of light. The light weakened and turned into an exquisite box.

Ye Zhongming received a notification for the first time from this seven-colored equipment.

“Congratulations, obtained Newbie Sacrifice Box.”

“This box will only appear once. It is the highest level of equipment that the gate will give. Please cherish it.”

Chapter 1269: Lucy's tears

After the light disappeared, the Gate of Sacrifice returned to normal. But its beauty was still shocking.

Ye Zhongming tested but couldn't place the Gate of Sacrifice back into his space. He couldn't shrink it and also couldn't cover its glow.

This meant that he had to place this at a fixed spot in the future.

Ye Zhongming's head hurt. One could imagine that once the location of this equipment was spread, it would draw much attention and problems.

But he thought about Cloud Peak's defense and relaxed a little.

"Boss, boss!"

Little Tiger pulled his sleeves while looking at the box.

"Open it?"

Little Tiger was so eager to see what was inside.

The other core members laughed. Only Little Tiger had the face to disturb Ye Zhongming. The others didn't dare to do that due to the difference in status.

Ye Zhongming fiddled with the box and agreed.

He pressed the button on it, and the box clicked. A light flowed out from inside and lit up the area around.

Everyone held their breath and got close to take a look. They looked forward to what would appear inside.

Ye Zhongming opened the box and saw that there were three layers. As the box opened, three storage drawers appeared before him.

Naturally, his gaze landed on the top drawer.

Inside it were two silver pearls.

He grabbed them, and some information appeared in his mind.

“Lucy’s Tears.”

Ye Zhongming saw this special name and had a rough idea of how precious it was.

“A different choice would give rise to a different outcome.”

“If you use the pearls as food, then it would be one of the most delicious foods in the world.”

“Function 1, food. Use Lucy’s Tears. If the user is a guy, strength increase by 30%. If you use the two together, the effect would be 50%.”

“2. If it is a female, agility increases by 30%. If she uses two, the effect would be 50%.”

“3. Other mutated lifeforms would obtain Surging Heart. When it faces a fatal attack, the Surging Heart will crack and turn into Surging Power, protecting your life. Mutated plants would turn into seed, and mutated animals would become an egg. Using the second pearl would add a-- Heaven Gift Heart. Add a certain amount of energy randomly; the range is within 40-80% of the current user’s body.”

Ye Zhongming was surprised. He was prepared for this thing to be special but didn’t expect it to be so special. It had many uses, and one was to be eaten. Its effects were also different for different genders. That was fresh.

The effect shocked Ye Zhongming.

It was strong.

Guys had an additional 30% strength, 50% if they ate two. Women could get an additional amount of agility.

If you ate both, 50%. That was half of your current strength and agility!

Ye Zhongming couldn't imagine what would happen if Ye Zhongming or Shengyuan ate it and gained 50% more strength!

One must know that the later you got, it was tougher for evolved with high levels to improve further. To get stronger, you needed to find other ways. People loved to use items that increased their stats by a percentage.

Not to mention 50%, just 1%, would be expensive in the high-end market of the apocalypse. Things above 5% had no market. If it was above 10%, it was priceless. If it was 50%, then congratulations. Anyone with such an item would get rich.

If these two pearls were moved to the market, they could exchange for more than five seven-star potions.

Chapter 1269.5- Lucy's tears (2)

"Use two, Chisel items."

"When the target is a weapon, each pearl can increase the weapon's attack by 30% and increase its level. Highest level is purple."

"When the target is a piece of defensive equipment, each pearl can increase the weapon's defense by 30% and increase its level. Highest level is purple."

"When the target is an accessory, each pearl can increase the weapon's main stat by 30% and increase its level. Highest level is purple."

Another percentage increase.

Chisel equipment was very rare. As for how rare it was, just look at Ye Zhongming's Glory Smith job's skill, which was rarely on cooldown.

Normally speaking, gems could be chiseled, but the former was rare. Things like talisman stones could only be crafted by special jobs, so the chances of seeing them weren't high either.

The second use of the tears was to chisel. There were different types, weapon, defensive equipment, and accessories. Just these alone were already very overpowered.

The more overpowered thing was that you could increase the original stat by 60%. Moreover, you could increase the equipment level by one.

Golden equipment would turn purple the moment you used it!

This meant that if you used it on a gold piece of equipment, not only would it increase the stats by 60%, but you could also upgrade the equipment to purple. Naturally, its stats would further increase, which would be a second round of upgrades.

This thing was functional.

"Use three, replace organs."

“If it is used on humans, it can replace all the functions of an organ and form a relevant ability. If you used the two pearls on the same person to replace similar organs, apart from forming relevant abilities, you would form a third ability that isn’t restricted to the organ. If the organs are different, apart from replacing the organ’s function and forming an ability, you will strengthen the abilities by 30%.”

“2, if they are used on mutated animals, replace the organ's functions and increase the strength of the ability most suitable for the lifeform by 50%. If you use the second pearl to replace a similar organ, let the strongest ability most compatible with the user reach the next level. If the organs are different, apart from obtaining the functions of the organ, randomly select an ability to upgrade.”

“If it is used on a plant, apart from replacing the organ and also obtaining its functions, obtain a relevant ability. Add a random ability if both pearls are used on the same person on similar parts. Moreover, obtain 50% of the body’s current energy (restricted to level seven). If the parts are different, obtain a random ability. When evolved to level nine, the energy needed is reduced by 20%.”

Ye Zhongming was initially apprehensive about this. Although he had seen many people use equipment to replace organs, he couldn’t fully accept it.

Now that the tears could replace organs, he instinctively opposed it. But he was then attracted by the introduction.

When used on humans, you could gain two abilities. That meant two skill scrolls. Although the ability was random, it wouldn’t be bad. After all, this thing had high priority and made it clear that it was a relevant ability.

You could replace similar or different organs, and they both had benefits.

It was good to use on plants, too, and there were many benefits. Be it strengthening abilities or, upgrading levels, or random abilities, they were dream-like ways to get stronger. Moreover, you will find it 20% easier to get to level nine when you used it on plants.

This 20% might seem small, but how many level eight lifeforms died while amassing energy. This helped to reduce the risk of death.

“Use four, accessory material.”

“When it is used as a material to craft an accessory, obtain the following abilities...”

“Ability 1, Persistence. When worn, increase the strength of the user’s job skill. The increase has to do with the evolved’s level and mental energy amount.”

“Ability 2, Rid of the bad. When it is worn, increase the user’s bloodline ability. Increase has to do with the user’s level and mental energy recovery speed.”

“Ability 3, natural feelings. When it is worn, strengthens the senses of all organs. Danger sense doubled.”

“Ability 4, Living light. Increase the user’s vision, hearing, and smell by a level.”

“Ability 5, unobstructed. Wearer’s resistance to extreme environments increased. The extent of increase is related to the wearer’s level and body stats.”

“Ability 6, Bright Star. When the user is fighting, the accessory will record the target’s ability and battle method and mark weaknesses. Accuracy is related to the user’s sensory ability and level.”

“Ability 7, Lightning Sound. User can activate this skill to collect soundwaves when he isn’t fighting. When needed, turn them into Lightning Soundwaves to damage a target. The strength is related to the collection time and strength.”

Chapter 1270: Two gold equipment

“When the two tears are made into accessories and worn by the same person, they will form an additional set effect.”

“Set ability 1, Sparks Fly. Users can hit the two accessories together to form a shockwave and deal scorching damage to a target. The strength increases according to the accessory level.”

“Set ability 2, Dream Wings. User can activate this ability when needed to give themselves energy wings for a short amount of time. When used, the ability cannot be broken or damaged.”

“Set ability 3, Charging Field. User will form a field around his body to repel magnetic attack and items and protect the user.”

“Set ability 4, Love Protection. Activate this ability. The accessory will turn into two weapons that can attack to deal light element attacks to a target. The time and number of attacks is not limited, but it would consume the user’s stamina and mental energy.”

“The number of abilities the accessory can show has to do with the level it has. Gold grade will have all the abilities.”

This fully introduced the tears.

Ye Zhongming heaved a sigh of relief. This was too complicated. More accurately, there were too many ways to use it, which made one hesitate.

At this current point, Ye Zhongming didn’t think about how to use it.

He looked at Little Tiger and then kept the pearls. He then looked toward the second drawer.

“Wenjia Furnace (Gold).”

Ye Zhongming saw an exquisite furnace. He instinctively took it out. Who knew that it would change suddenly? This small furnace expanded in Ye Zhongming’s hand.

Only someone with high strength, like Ye Zhongming, wouldn’t be crushed by that sudden increase in weight. He placed it calmly on the ground. If it were someone else, this fellow would cause him huge injuries.

“Damn...”

Little tiger and the others looked at it grow. Moreover, it turned into a 30-meter giant furnace in a dozen seconds.

The space inside the Saint Hall was huge. He was not afraid that the furnace would damage it. But when he saw the bottom of the furnace, it looked far more complicated than any technology there was on Earth. The furnace had various exquisite parts that shocked everyone.

They might be able to in the future, but Cloud Peak's items weren't as detailed as this.

Ye Zhongming learned some details about the Wenjia Furnace.

“Wenjia Furnace.”

“Energy source- 1. demon crystals. 2. electricity. 3. Heat. 4. Waves. 5. Nuclear energy. 6. Evolution power. 7. Mental energy.”

“Crafting target- recipe items.”

The main content wasn't as complicated, but there were many explanations.

For example, how the seven energy sources were used, how they were dealt with to provide energy, etc. Of course, it was tough to use some sources of energy. Some were relatively gory and cruel.

If you used heat and waves as sources, you needed a converter to convert the energy into a suitable method. If it was nuclear, you needed protection and energy injection equipment before placing it into the nuclear reactor.

What shocked Ye Zhongming was the evolution power as a source. That was a way to absorb from evolution lifeforms. You needed to create a piece of converting equipment to absorb the evolution power, which was the power of flesh and blood.

This was similar to what certain darkness jobs do.

This restricted the crafting target. It couldn't be used to craft everything; only recipes and blueprints were suitable.

Wenjia Furnace had a few of its own recipes, so fortunately, they wouldn't be useless just because they didn't have anything.

As for crafting other things, they had to search for relevant recipes.

Ye Zhongming took a simple look. There were three recipes. One was Qin Brick, a type of building material. There were many colors, and each gave a different stat.

Second was an equipment rack called a Nourishing Platform. If you placed the equipment on it, it could strengthen some abilities.

The third recipe was a Bouncing Power Ball, a one-time attack weapon of four types, each with different stats and attack methods.

There was a rough introduction on the recipe. As for the exact numbers and effects they could produce, he had to craft and take a look.

Ye Zhongming also saw the materials needed and found it tough to use this gold equipment.

Fortunately, it could be kept and wouldn't remain in this state like the Gate of Sacrifice. As long as you weren't using it, you could keep the furnace back into that exquisite box.

Ye Zhongming kept it and looked at the final reward.

Another box?

The case was similar to the furnace. It got bigger slowly, but it wasn't as big as the furnace. It stopped when it reached two meters long.

“Saint Duelist Case!”

Little Tiger moved in, looking and touching before coming to such a conclusion.

The case's metal material gave off a white-jade-like feeling. Its six sides all had exquisite human diagrams and patterns.

Ye Zhongming observed and noticed a button. He pressed it and turned. The box made a mechanical sound, and then one side opened, revealing what was inside.

Everyone looked and nearly spat.

They saw an armor-like thing inside. The blue glow made it look translucent.

“It really is a Saint Clock?”

Little Tiger's mouth nearly dropped. He swore that he was joking.

“Right.”

Ye Zhongming was the one who replied to Little Tiger.

He received notification that the thing in the case was something called 'Saint'.

“Moon Saint Armor (Gold)!”
