

Apocalypse 1271

Chapter 1271: Space Venom Beast

“Oh my god!”

“Am I dreaming?”

“How is this possible?”

“I must be wrong.”

“Too beautiful, really too beautiful!”

“1, 2, 3, 4, 5,6.. Six of them. Rich, rich.”

“To be honest, after living for so many years, this is the first time I have seen so many good things.”

“This thing is good, but is it as good as the Gate of Sacrifice?”

“Too much, too much.”

“What stats are these?”

.....

.....

Everyone looked at the set equipment and was shocked. They discussed and would glance at the Gate of Sacrifice and the box in Ye Zhongming’s hands.

The metal case had a female armor, six parts, all of them were... Gold grade.

This level wasn’t rare for Ye Zhongming. After all, he got the Blood Stepping Boots and Gate of Sacrifice at the start so he did have gold equipment.

But having it didn’t mean that such equipment wasn’t precious.

On the contrary, it was very precious.

As the Glory Smith, the highest grade equipment he could craft was blue.

Gold grade could only be crafted under very strict special circumstances.

If he upgraded the Glory Smith to the highest grade, would he be able to craft such equipment normally?

A gold piece of equipment was enough to impress him.

Moreover, there were six at once.

“Boss boss, what are their stats? Who does it fit?”

Although Little Tiger would not be able to use it as he was a guy, he wanted to know who this set would belong to.

No matter who it was, they would jump to become the person in Cloud Peak with the second-best equipment!

Ye Zhongming smiled and wanted to tell everyone about its stats.

But suddenly, be it the Saintess or him, they turned toward a direction. Yangos, who was circling above, also gave out a furious roar.

A killing intent, along with a black mist, rose behind the ground. There was then the sound of human exclamations.

Four shadows appeared at two corners of Saint Hall and attacked the crowd, covering them with a black mist.

The sudden attack caused the situation to become somewhat chaotic. Ye Zhongming and the Saintess were the first to react. They blocked in two directions, waving their weapons to block the black mist.

This gave the others time to react. Cloud Peak's core members entered battle states. Skill light shone in the Saint Hall.

Ye Zhongming saw what appeared. They were four pig-sized beings with sharp heads and two crab claw-like front limbs. It had six limbs, and there was a silver powder-like thing on them which shone in the Saint Hall light.

“Space Venom Beast!”

The Saintess said the name of this monster so everyone knew what this level six demon monster was.

This monster wasn't a strong demon monster. In the Secret Realm, where one's body was the most important, they were slightly weak.

But it had a weird ability. The most famous was that it could break through space and teleport. They were able to sneak attack before the target knew anything.

There was one more annoying point, which was that the black mist would cause people to attack everything around them.

Without Ye Zhongming and the Saintess noticing them, the core members would have been hit.

“They are demon monsters only found in the Cursed Abyss!”

A light pillar fired from the ball in her hands, and after sweeping the first one, it attacked a second. Two of them were sent flying and could not fire the mist.

Ye Zhongming used his speed and strength advantage. With the Earth Elf’s help, he arrived before the two. He punched both and shattered their shell.

Ye Zhongming could insta kill level six demon monsters with average defense and speed.

But the other four in the other direction hit the others.

As everyone gathered to look at the gold equipment, many people were caught off guard. Liu Zhenghong and Le Dayuan were at the back. Shengyuan, in charge of their safety, stood beside them.

The Space Venom Beast appeared beside them.

The four of them were noticed immediately. Although he didn't react immediately, he blocked them, and the mist hit his body.

He was the one who exclaimed and scoffed.

With Shengyuan's block, the others adjusted themselves and protected Le Dayuan and Liu Zhenghong. They moved toward the Space Gate. Some crossed Shengyuan to attack.

These seven-star evolved controlled the situation and attacked the few monsters. They finished them in a few seconds.

But Shengyuan was hit and started to lose his mind. He held his shield. Sweat flowed down his forehead, and he tried to maintain consciousness.

But his body was not strong enough to be immune to the mist. He roared, and he looked around with red eyes.

Before he could do anything, Ye Zhongming arrived behind him and hit his neck with the blade. He fell unconscious.

“Bring Sister Hong and him back!”

Ye Zhongming passed Shengyuan to the side. Someone caught him and left toward the Space Gate.

“It is that animal!” Saintess came over and looked outside, “This fellow is trying to disturb us and attract our attention. Its real goal is outside!”

The other Cloud Peak members saw that giant black holes appeared outside. There were over ten of them that they could see.

The black holes had opened and numerous demon monsters charged out at the few in the Saint Hall.

“Boss, we can’t cross the gate!”

Tong Hu’s anxious voice spread which caused Ye Zhongming’s heart to sink.

Chapter 1272: Way to get free

The current situation was caused by the level nine lifeform. But Ye Zhongming didn’t expect it to have such an ability.

It opened a tunnel to teleport its subordinates. This was already very overpowered. He hadn’t heard of anyone with such an ability; even those in the last life didn’t.

The more terrifying thing was that it could seal the Space Gate!

This was something Ye Zhongming couldn't understand!

The wheel produced the secret realm key. How terrifying was this level nine demon monster such that it could seal it?

Now he had a problem. Ye Zhongming's plans were all built on the fact that he could open the Space Gate. Now that it couldn't be open, everyone was trapped.

He tried to think. He dashed to the side of the Space Gate and wanted to retract the key, but there was no reaction. Everyone watched, but they knew they were facing a huge problem when they saw his expression.

Cloud Peak's core members were all in Saint Hall. Apart from Mo Ye, everyone was here. That included Liu Zhenghong and Le Dayuan.

Apart from that, Xia Bai's battle squad and the trusted right hand-men of the core members were here, too.

There were around a thousand of them.

Although many of them were strong, Xia Bai's squad had an average level of above five. They had three digits of six-star evolved. The core members were all seven-star. Even Ye Zhongming, the Saintess, and Yangos had reached eight.

This group would scare off any faction on Earth. But before a level nine lifeform, they weren't strong enough.

Moreover, there were a huge amount of demon monsters.

The situation became really bad right at the start.

One could even say that they were in despair.

“Open this place!”

At the crucial moment, be it the Saintess or Xia Lei, they showed their calmness and decisiveness. They suggested attacking the Space Gate to see if they could break the restriction.

Ye Zhongming didn't hesitate. He raised his head and attacked the gate that seemed frozen.

Be it the Saintess, Xia Lei, or him, their attacks were very strong. But when they hit the Space Gate, it didn't loosen.

The attacks stopped as they were useless. Another reason was because the demon monsters had charged into the Saint Hall. Those at the front even had blood on their claws.

They had killed the believers of the Saint Hall outside.

“Destroy the black holes!”

Since they couldn't break the seals on the gate, they had to destroy the tunnels that led here.

At least they hadn't sensed the arrival of the level nine lifeform, so it would probably not be able to get here soon. Or, it was waiting to pass through the tunnel.

After so many battles, the core members knew what they had to do. After hearing Ye Zhongming's orders, they split into a few groups.

They didn't surge toward the same spot and didn't split up toward each black hole. Shengyuan and Park Xiuying were the core. Along with some defensive warriors, they formed a defensive formation to protect Liu Zhengong and Le Dayuan. Some ranged job users joined in to assist.

As for the remaining, Saintess had one direction, Ye Zhongming with one, and Yangos with one. The three level eight evolved could hold on one side on their own.

Xia Lei, Xia Bai, Little Tiger, and Liang Chuyin led the others to charge at the other four holes.

All of this happened quickly, but the demon monsters filled the area around. Half of the Saint Hall was with these demon monsters.

The battle became intense. The battle between humans and night demon plains exploded again after so long.

Ye Zhongming was holding Wind and Lightning. But this weapon wasn't as strong as before, and he didn't know why.

But that didn't affect the fact that it was still powerful.

Ye Zhongming was unable to use it, as well as the Saint Father, where he could launch instant attacks to catch people off guard. But Ye Zhongming's strikes were still fast. Level seven and below couldn't block it.

He held one direction alone. To maintain efficiency, he didn't hold back. He waved the blades to send sword light flying. Blood and bones flew up, and no one could block him.

The Saintess was also very strong. She had been living in the Saint Father's shadow, so people felt she was pure and demure. Few saw her attack. She only revealed her combat strength when she attacked the Imperial City.

The pearl in her hands looked like it had infinite energy. It launched white pillars, and any demon monster that was hit would be sent flying. The burning light killed those with weaker defense.

The other four paths weren't as quick as them, but as there were many people who were also strong, they were only slightly behind.

The ones under pressure were Shengyuan and Park Xiuying. Others charged toward the black hole while they remained on the spot. The other demon monsters attacked them.

Shengyuan used his skills to form an energy shield wall to protect everyone. The other defensive warriors used their abilities to protect Liu Zhenghong and Le Dayuan. The ranged users attacked to reduce their pressure.

They didn't need to aim as any attack would hit the dense group of demon monsters.

Some people would even toss crystal grenades at them to clear the area around.

Liu Zhenghong and Le Dayuan used the things they carried to help.

Everyone was fighting.

But the first to show effect was Yangos above. This evil dragon showed everyone how terrifying a level eight dragon was.

Chapter 1273: Evil dragon's strength

In Yangos's own words, its life was twisted.

It lived under the shadow of true dragons, and was then unknowingly teleported to Earth.

When it was in Ying City, it was when it had the most freedom. Although it didn't rule that place, it was one of the strongest. No one offended it. If it was unhappy, Ying City couldn't do anything.

But Ye Zhongming's appearance and the giant Poppy Wheel ended that part of its life.

It became a slave but became a level eight lifeform. It was then captured and had its source stolen, causing its level to drop.

It became someone's mount again but returned to level eight and obtained a true dragon's ability. Yangos felt that it was evolving toward becoming a true dragon.

It flew happily in the sky and noticed a black hole immediately with many weird demon monsters surging out.

Those at the front even roared at it.

Apart from those it couldn't defeat, it had a bad temper toward every other lifeform. Seeing someone weaker than it disrespects it, it charged over.

Its pride couldn't be insulted.

It showed the strength of a level eight lifeform. It scratched, bit, and charged.

There were fewer demon monsters in the sky than on the ground. It noticed the hole early and when Ye Zhongming gave the order to destroy the hole, it was already close.

As the soul slave contract existed, it fully obeyed Ye Zhongming. It realised what was going on and how urgent the situation was. It opened its mouth and launched its quickest and strongest attack which was the dragon breath.

It became the upgraded Red Dragon Flame!

Giant flame pillars swept toward the black hole.

Compared to its previous dragon breath, the Red Dragon Flame was hotter. Its color looked the same, but if you looked closely, you would see that there were mysterious runes in it.

These runes were increasing the power.

Those flying demon monsters were quickly burnt to ash, and the pillar hit the black hole.

No one knew what the black hole was, but it was still an energy body. When it clashed with the flames, it became unstable. The demon monsters were shredded. Yangos's eyes were red as it spat out its breath. Ten seconds later, the two energies exploded. The giant shockwave sent Yangos flying by a few dozen meters.

When it looked, the black hole disappeared, leaving some twisted bits of space that quickly recovered.

Yangos roared in glee. It did something that Ye Zhongming and the Saintess couldn't.

But Ye Zhongming cursed at it for it to attack again.

Ye Zhongming's order wasn't to attack the black hole but to weaken the number of demon monsters to reduce Shengyuan's pressure.

The evil dragon roared for Ye Zhongming to watch it before flapping its wings.

It was above Saint Hall and extremely quick. When it reached a certain height, it spat flames. Even the black hole couldn't block this, so the demon monsters couldn't, either. Any place that the flames hit was empty. Nothing could survive.

Yangos quickly cleared the demon monsters around Saint Hall. In a short amount of time, tens of thousands of them died to its dragon breath, which reduced their pressure.

“Well done!”

Ye Zhongming, who was in an intense fight, still praised it.

It giggled, but it seemed a little tired.

Although it was level eight, it had just happened, and its body was still unstable.

Dragon breath was also a skill that consumed a huge amount of energy. Consecutive uses were a little too much for it.

But what was the time? If they didn't stabilize the situation, Ye Zhongming might die here, and naturally, it would die, too.

The evil dragon didn't rest. It turned its body and headed toward the closest black hole. It didn't use the dragonbreath. It used a mental energy attack to destroy the minds of a few demon monsters. It then relied on its own strong body to smash into the demon monster group, turning many of them into meat paste.

Using the momentum, it glided on the ground and got close. When it stopped, it used the dragon breath.

This was the fastest way to destroy the black hole.

Yangos went all out. It ignored the demon monsters attacking it and just tanked it. It spat fire, and this black hole exploded very quickly, sending Yangos and the surrounding demon monsters flying.

The evil dragon stood up and flapped its wings, killing the demon monsters that were still alive. It lowered its head and looked at its body. Some cracks had appeared on its scales.

The demon monsters in the Secret Realm relied on their bodies. Although it was only a few seconds, they dealt damage to Yangos. As it was close to the hole, the explosion also shook its organs.

“Mom, I am going to die.”

It muttered and knew that it wasn't time to complain. It set its mind to asking Boss Ye for something nice to eat. It flew up toward the third hole.

Saintess and Ye Zhongming charged to a black hole. They didn't have AOE skills like Yangos and relied on themselves to kill many monsters to get here. Facing the hole, they attacked without hesitation. The first attack caused it to be unstable. The second attack caused monsters to stop coming through, and the third destroyed their targets.

The explosion sent them flying, but they controlled their bodies quickly. Ye Zhongming and the Saintess weren't far from each other. They glanced at each other before choosing new targets.

They were in a race against time. More monsters appeared each second, and once the number reached a certain level, they couldn't handle it.

Chapter 1274: Le Dayuan's trump card

But things didn't happen the way they wanted. When they destroyed the second hole, each and the other team destroyed one, the remaining seven to eight holes stopped transporting demon monsters.

This stunned Cloud Peak.

Was the level nine lifeform unable to keep up with and support long-distance teleportation?

Or, the black holes were one. The rest couldn't be used as long as over half were destroyed.

The answer appeared quickly.

Cloud Peak was disappointed. It wasn't that the monsters couldn't continue to pass through, but the ones that passed were all much stronger.

Level seven demon monsters appeared from the remaining holes.

Maybe they were caring about the number previously, so the demon monsters sent through were only level five. Occasionally, there would be some level six ones, but there were only one or two level seven monsters.

But now, seven to eight of them appeared, which was different from before.

The other demon monsters attacked the humans as if they didn't want them to disturb the higher-level allies.

This allowed the level seven demon monsters to step onto the battlefield.

But this didn't mean that it ended. More level seven demon monsters appeared from the black holes.

Next were the third and fourth batches...

The number of high-level demon monsters increased as time passed.

“Quick, we don't have much time!”

The Saintess was really anxious. She recalled some things regarding that level-nine life form. As both sides were far away, although Saint Light Hall monitored the Cursed Abyss, they didn't know much. They wouldn't have heard so much if they hadn't been doing it for an extended period.

However, as time passed and they got more information, the information didn't link to what they had before. The Saintess felt that they were unreliable and didn't think much about them.

But now, she recalled some unrelated records and guesses and felt like those people were correct.

This level nine lifeform was truly special.

“We must destroy the black hole. The demon monsters didn’t come to kill us but to delay us. Also, their final use is to sacrifice! That level nine animal will use a secret technique to sacrifice them and come through the black hole!”

The Saintess’s shouts weren’t loud on the battlefield, but the others heard them, and their expressions changed.

The demon monster levels weren’t high before, so they could fight. But since the level seven demon monsters appeared, the pressure increased. Xia Bai and Xia Lei’s squad didn’t push forward as quickly as before and found it tougher. ~~RAZOBES~~

Only Ye Zhongming, the Saintess, and Yangos could maintain their aggressiveness. But they were slower than before.

But the lifeforms from the hole didn’t slow. Although they appeared one by one, that was just normal walking speed, and close to a hundred appeared in a short while.

Everyone went all out and started using all their trump cards. This explosion gained some results. The few teams passed a distance and were close to the black hole.

Ye Zhongming and Saintess even started to attack.

However, Shengyuan's side was at a disadvantage. They were forced to retreat to reduce the pressure. Their backs were on the sealed space gate, and they were forced to defend passively.

"This can't do; we have to think of a way!"

Liu Zhenghong frowned and said.

She couldn't see the situation outside and didn't know what was happening. But she noticed that although not many high-level demon monsters were inside and attacking them, a few still dealt huge pressure to their defense.

They were about to fall as Shengyuan's bloodline could only last for a few seconds.

"Old Le, what about your thing?"

Liu Zhenghong tossed the crystal gun she had fired too many times and looked toward her husband.

Le Dayuan bit his teeth, and his heart hurt.

“Do you know how much this is worth?”

“You are about to lose your life, so what is the point in keeping this?”

Le Dayuan took a box from his own space, and two silver balls were inside.

“Let me!”

Liu Zhenghong grabbed them, and after hitting them together, she tossed them toward the demon monsters.

She didn't toss them through the air but rolled them on the ground.

Although she wasn't a combat-type job user, her strength wasn't small. The two silver balls rolled a long way. When it touched the demon monsters, it would only change directions and not stop.

Very quickly, they were a distance away.

Liu Zhenghong pressed Le Dayuan's box and then called out to Shengyuan and the others at the front. The team retreated and headed to a corner.

Two seconds later, the two silver balls changed. The circular ball changed. A sharp metal pole stabbed into the ground, and it bloomed like a flower, showing many black holes.

Many smaller silver pearls shot from the holes and reached a meter above the ground, hanging there.

This was the demon monsters' region. Very quickly, the pearls were touched. What happened next shocked everyone.

Those pearls gave off a green ray. There weren't many rays, and each pearl had only six laid out evenly around the pearl, forming a plane. The rays started to rotate in the next second.

Thus, something terrifying happened. The rays became impenetrable and sharp, slicing any demon monster that touched them.

Each ray was a meter long, but there were so many silver pearls, hundreds of them.

The hundreds of rays were like meat grinders that floated in a region, slicing anybody they touched.

Shengyuan and the others were by the space gate and watched as the bodies of the demon monsters were sliced. Their bodies fell, and they were sliced again, before they turned into corpses.

After a few seconds, there were no living things in that region!

Chapter 1275: Silver Ghost

Some people said not to put your eggs in the same basket. Ye Zhongming knew that theory, so he always had a backup plan.

In the last life, he had seen many experts who died because they didn't have a trump card. He was also killed because he had no way of dealing with an assassin.

But in this life, he always gave Cloud Peak, himself, and the important members some self-preservation methods.

Liu Zhengong and Le Dayuan were the two most important people in Cloud Peak, so naturally, they had the best help.

Apart from being protected every moment, they had their life-saving methods—and they had more than one of those.

Moreover, their special identities gave them abilities that others didn't. Some of the trump cards were their style, like the silver balls that Le Dayuan took out.

Le Dayuan called them Silver Ghosts.

Ye Zhongming and he crafted this equipment together. It was a combination of Earth and wheel technology.

The Exquisite Floating Ball inspired Le Dayuan. Its appearance opened another gate for him and gave him new ideas.

However, the Exquisite Floating Ball was made mainly of wheel technology and used a few Earth skills. Le Dayuan studied it but didn't learn much.

What really changed his ideologies was those few War Fortresses.

In the modification process, Le Dayuan could compare the other two. He saw the pros and cons and wasn't afraid of spoiling any. At most, he would follow the other two War Fortresses and rebuild them. So, the modification of a new War Fortress was a learning process for him. He relied on his knowledge and the brain energy of an evolved to gain relevant technologies in a short amount of time.

He not only learned but also had new ideas.

After all, Cloud Peak wasn't the Resistance Zone, and he had less resources. Especially the strictly controlled high technology things from peacetime. Those were things that he had nothing about.

So, Le Dayuan and Cloud Peak couldn't support the War Fortress.

For Le Dayuan who was proud of his job, this was a hard blow to him.

He had been thinking about this since he modified the war Fortress. When Ye Zhongming returned to Cloud Peak, he dragged him to do many experiments and complete many amazing ideas.

Finally, Le Dayuan created something.

These were the silver balls that he had just used.

The equipment that Le Dayuan called Silver Ghosts was very complicated to craft. It concerned Le Dayuan's profession and also four other people. Liu Zhenghong, Ye Zhongming, and two job users.

One had micro carving skills, and the other used the Soul Catcher Hunter job.

The four of them and Le Dayuan completed the creation of the two balls.

Le Dayuan was in charge of the basic parts. Ye Zhongming was in charge of modifying and upgrading their level and function. The person with micro carving was in charge of meshing them together.

The special parts were down to Liu Zhenghong and that Soul Catcher Hunter.

Due to the materials, Le Dayuan could not use the top Earth technologies. He turned his attention to his wife and used gene lifeforms as the core parts of this thing. RANÖBĘŠ

That Soul Catcher Hunter had a skill that could control small lifeforms and place them into this small ball. Finally, they would provide some energy for the silver balls.

One had to say that the small balls were very exquisite and complicated. The materials were very rare and expensive. Apart from being fully Ghost Metal, each part was made of rare metal.

Don't forget that crafting had a success rate. So many things caused the success rate to drop. While these two balls succeeded, the number of failures before nearly made them give up. Those two job users nearly fainted a few times in a couple of days, even when they used mental energy potions.

This is why Le Dayuan was reluctant to use it when Liu Zhenghong asked.

Le Dayuan estimated that when the two balls succeeded, the cost could raise a 100-person five-star battle squad!

No wonder his heart hurt!

This thing burnt so much money.

But the outcome was great. No, it was shockingly powerful.

The two balls representing the perfect merger of all of Cloud Peak's technologies caused a huge empty area to appear. The demon monsters were all killed, including those level seven ones. They weren't able to block the light rays.

It couldn't do much, even if they shattered a few small pearls before they died.

Those frenzied beasts looked at the small beads and were terrified.

The silver ghosts' attacks gave them breathing space.

"Master Le, would this thing last for long?"

Shengyuan was sweating, and his body was bleeding. He wasn't injured, but when defending, the force of those demon monsters caused his skin to tear.

"No, only for a while. I am unsure how long it will last as this is my first time using it."

Hearing Le Dayuan's words, everyone was helpless. They didn't know how expensive this was.

This place was temporarily safe, but the outside situation wasn't good. Ye Zhongming shattered a black hole during this period, and Saintess was about to. The others were in a tough battle. There were still five or six of them, and the monsters walking out were level eight!

They were slower than before. But each that appeared caused the balance to tip toward their side.

Ye Zhongming didn't know when that sacrifice would happen but knew it would be close since the level eight demon monsters had appeared.

He looked at the situation and knew he had to use some trump cards.

But at that moment, a strong energy wave fired from the black hole and swept the battlefield!
