

Apocalypse 1281

Chapter 1281: Found you

The entire process, from Yangos and Ye Zhongming's sneak attack to the black shadow's counter, was very short. Each moment, both sides tried to outwit the other. The difference was that the shadows were in the dark, and they were in the light. Their movement and actions were slightly suppressed.

Ye Zhongming took a risk by using the space gate as bait. He knew that the black shadow would appear, and he was confident in his ability and connection with Yangos, which is why he chose to do that.

But the black shadow's ability, or rather, its terrifying speed, caught them off guard.

He thought the sneak attack on Yangos was its limit, but it held back. After failing to kill them, it chose to get out. However, this was more strategic than the first time.

Ye Zhongming and Yangos followed him in.

After the uncomfortable tugging force, they returned to Earth and saw some chaos.

Saintess stood there with a sunken face. Beside her were the core Cloud Peak members. Further away, the entire mountain range was boisterous.

"You didn't stop it?"

Yangos said some human words before flapping its wings to get into the sky.

Everyone knew that it was extremely dangerous to let that black shadow enter Cloud Peak. With its speed and the cold light that could easily break dragon scales, no one would be safe. If the others were alone, they wouldn't be able to resist.

If they couldn't find it, Cloud Peak might even be destroyed by it.

Ye Zhongming looked at the Saintess and saw that her white robe had a tear.

He knew that the robe was called the Robe of Faith; it was an elite Saint Hall equipment. Along with her crown and staff, they were the things she relied on the most.

When he fought her, he wasn't able to break her robe.

"Too quick, even though we were ready."

She didn't reply. It was Xia Lei who held the blue blades that spoke.

Ye Zhongming and Yangos put up a show on the other side. On Cloud Peak's side, they were also well prepared. Saintess and Death King Tree led the way and formed a formation at the gate. If the shadow broke through, they would attack.

They waited for the black shadow and attacked it, but they didn't stop it.

The black shadow escaped right in front of their eyes.

He swept the ground and saw a few drops of purple blood.

"Collect this and send people to Saint Hall to clean up the battlefield." Ye Zhongming gave orders, "Pay attention to the blood there too; don't miss out. Send drones and people with special abilities to see where the demon monster army is. Once we confirm their location, return, and I will close the Space Gate."

Although Xia Lei and the others didn't know why Ye Zhongming didn't tell them to search for the black shadow, they listened.

Ye Zhongming looked toward a direction and smiled coldly, "Don't panic and do your own things. Best if you stay in a sealed space. Send your battle squad members to defend the two labs and defensive formation core."

He looked toward the Saintess, "Saintess, Death King Tree, we will kill that fellow!"

He didn't explain and left in the direction he was looking toward after whistling.

Saintess and Death King Tree were stunned, but they followed.

They knew that Ye Zhongming had a way to find it.

Ye Zhongming did know where it was.

Yangos's trap and Saintess's ambush were to kill this black shadow. If they couldn't kill it, he still had back up plans.

When he brushed past it, he activated the small equipment he had used on the Chain Prisoner-- Origin Mark.

This small equipment was special and only had one function. Make a mark that only the user of the equipment could see.

The equipment level was low but it could mark even level nine lifeforms. The difference was that level nine lifeforms might be able to remove it with their abilities.

Of course, some special abilities and equipment could also remove this mark.

At Sharp Peak Mountain, Wen Zhong noticed that Ye Zhongming had placed this mark on him.

As for how he figured it out, that was not known.

There was one thing that Ye Zhongming was sure about. Apart from only a few pieces of equipment, even if the marked lifeform knew that it existed, if the user didn't remove it, there was nothing he could do.

But this thing could only work when they were a short distance away. Ye Zhongming and the black figure brushed past each other,, giving him a chance to use it.

Thus, even if the others couldn't find the black shadow, he could use this mark to find it. To the eyes of the Cloud Peak king, this black shadow couldn't hide.

Remove?

Ye Zhongming was confident that it couldn't remove it! It wasn't level nine, and didn't have the ability. Find rare equipment? This lifeform wasn't even from earth, so it didn't know if equipment would have such functions. Even if it did, it wouldn't be able to find one. Those pieces of equipment that could remove negative statuses could only be found by luck. If you tried to find them, you might not find one in your entire life.

The current black shadow was moving toward a direction. It wasn't outside Cloud Peak but internal. It was in the shadows of a building, and it stopped there.

Ye Zhongming couldn't see it, but he could confirm its location. He led Saintess and Death King Tree with Yangos above. The four of them headed over.

Since he found it, he didn't plan on letting it go. No matter what it was!

The Exquisite Floating Ball flew into the sky. This equipment was like a radar, monitoring the region that the black shadow was at.

When they reached a certain spot, Ye Zhongming, the Saintess and Death King Tree split. He jumped before a villa which belonged to him. He searched and something rose from the roof.

Chapter 1282: Surrounding

It was a weird-shaped box that gave off a metallic feel under the sunlight.

There were many metal parts on the box, and some of them exceeded Earth's technology.

Ye Zhongming pressed it and revealed a circular hole. He placed a few demon crystals and a gun case in a certain part of the box.

The bullet at the top shone green. It was different from the other bullets with levels.

Ye Zhongming controlled it, and a few centimeter-long metal barrel appeared at the tip, aiming at the black shadow in the corner.

This thing was Gun Pool Box. No one knew why it was called that; anyway, Le Dayuan called it that.

This weapon was a by-product when Le Dayuan was researching. Or rather, it was a small test model of War Fortress when he was experimenting on it.

After succeeding, the War Fortress was no longer used and was attached to the roof of Ye Zhongming's villa.

Ye Zhongming was the most suited to use it in Cloud Peak.

Although it was a small weapon, it was relative to huge things like the War Fortress. In truth, the Gun Pool Box was not small. Mature guys didn't have a size advantage compared to it, and it was inconvenient to carry.

Some unique points meant that the box had high requirements. For example, you had to be a gun user. Your strength had to reach a certain amount. If not, you wouldn't be able to handle the recoil. Your senses had to be sharp if not, you wouldn't be able to hit the target without any aiming aid. The consumption was huge. You needed crystals and bullets that had a high level. You had to have a huge amount of mental energy as you had to use it along with your gun skills.

Only Ye Zhongming had money and the ability to use it.

Gun Pool Box relied on demon crystals for energy. Its accuracy was high and powerful, but its range was smaller than that of some sniper rifles.

To put it more simply, this Gun Pool Box's abilities were top-grade and much stronger than those of the sniper rifle that Ye Zhongming used.

The black shadow charged through the defenses but didn't leave Cloud Peak. Why was it still here?

No one knew, but that didn't stop Ye Zhongming from thinking that this person had no good intentions.

Destroy this place? Steal the Secret Realm key? Or kill many people here?

No matter what it was, Ye Zhongming couldn't accept that.

Thus, he decided to use this weird-shaped box to teach that black shadow a life lesson.

He didn't look directly at the shadow, fearing it would notice. Instead, he spread his mental energy in that direction and adjusted the box's angle.

He used mental energy to aim.

Only Ye Zhongming could do this in Cloud Peak.

The Saintess and Death King Tree had passed the last villa. If both sides could see each other, then they were already within range.

Ye Zhongming chose to fire when the Saintess and Death King Tree appeared.

A bright light that couldn't even be outshone by the sun fired from the short barrel of the box. In the next second, it moved toward where the black shadow was. RãÑÖBεs

Everything happened too quickly, and the black shadow couldn't react, so it was hit.

The black shadow flew from the dark corner and fell onto the hard stone.

That weird and disgusting sound appeared, but it was more ear-piercing.

The injured black shadow showed itself to Cloud Peak for the first time.

It was a lifeform that was very similar to humans, but its head and hands were much bigger.

The head had no hair, and its short neck couldn't be seen. But that small area that connected the head to the body, which was a few centimeters long, was covered in gills. Its face had no breathing organs, only a pair of eyes without eyelids and a mouth without lips.

The hands, no, the claws were huge. They were much bigger than the black shadow's body, and the sharp fingernails had a greyish-white color.

It struggled to get up and bent its back. Its claws hung above the ground, making it look like a mutated lycan.

At this moment, the black shadow ignored the charging Saintess and Death King Tree. It stared at Ye Zhongming and gave an unfriendly expression.

It then retreated. In the blink of an eye, it entered the space, and they lost track of it.

It left a pool of blood where it was standing.

Saintess and Death King Tree couldn't see where it was, but they used the blood to track it. Ye Zhongming also directed Yangos to chase it.

You could see them chasing it from the screens in the Exquisite Floating Ball. Apart from Ye Zhongming and a few others, a few other people were also chasing it.

To intercept this black shadow, Ye Zhongming used people with special abilities who had been living in Cloud Peak with other identities.

They belonged to Chameleon.

“Force it to the back mountain! Try to catch it alive!”

Ye Zhongming ordered Yangos and the few Chameleon experts. They used various methods to force the black shadow toward the back mountain.

It was a cliff, meaning the black shadow had no way to escape.

A giant energy net appeared from the sky, covering a huge region of around ten thousand square meters. Under the energy net was the running black shadow.

A mist scattered from the energy net. It didn't go upwards but downwards.

Very quickly, the energy net turned into an ice spike.

As Chameleon members roared, the energy net sped up and covered the black shadow.

The injured monster's speed was obviously affected. Although it tried to raise its speed, it couldn't dodge it. The edge of the net hit it. Although it used its claws to slice the ice net, that bought time for the Saintess and the Death King Tree to get behind them. A light covered the black shadow and rotated to fire more streaks of saint light. It broke its miraculous ability to enter space. Numerous vines also appeared to surround it. The sharp tips stabbed toward the black shadow's body!

Chapter 1283: Killing dragon

After losing the biggest thing it relied on- speed, the black shadow wasn't as suppressive as before. It also placed it in danger.

The black shadow definitely wasn't level nine. Ye Zhongming felt it was, at most, an ordinary level eight without speed.

Now that it was sealed on the spot and facing the Saintess and Death King Tree's attacks, it was on the back foot.

After stopping, everyone noticed that Ye Zhongming's shot had left a wound on its left shoulder. Purple organisms were within and growing at a quick speed. In maybe just a few hours, it would recover.

This fellow's healing ability was so strong.

The Saintess's Saint Light attack was slightly weaker, and most of it went to breaking the monster's invisibility ability. The Death King Tree was harder to deal with. Even without World Nature, the vines were powerful enough.

Pierce!

The sounds of it stabbing into flesh could be heard as the vines entered the black shadow's body.

Death King Tree's female face gave off a smile of disdain.

She was very unhappy when the black shadow escaped from the vine formation that she had set up. In human words, she lost a lot of face.

Now, she found back some respect. If this monster was left here, it wasn't so strong. This was what she thought.

Ye Zhongming got close. The other Chameleon members saw that the boss had rushed over and the monster was controlled, so they went to hide.

They weren't needed anymore.

Yangos lowered its body, and the giant shadow covered the Saintess, Death King Tree, and the black shadow monster. Any attack from it would arrive instantly from this distance.

The evil dragon lowered its head and looked at this monster with hatred.

This fellow nearly made it lose an eye.

Everything seemed to be under Cloud Peak's control.

But things were never so smooth. That black shadow suddenly smiled.

The Saintess's expression changed instantly, and raised the Glory Staff.

She realised that although the vines were all in its body, its arms weren't injured.

But she was too late. The monster raised its claws and the cold light sliced all the vines that seemed soft but were actually as hard as steel.

The sudden pain caused the Death King Tree to shudder. She screamed, and the crystal tree crown swung many pieces of leaves.

Even without using World Nature, this was still one of her strongest abilities.

The black shadow laughed. It charged forward and was a few dozen meters away, causing their attacks to miss.

The hot dragon breath landed and covered the black shadow.

At this point, Yangos ignored Ye Zhongming's orders as it felt uneasy about the black shadow.

It always believed its intuition. It felt like this thing couldn't be caught.

Saintess and Death King Tree stopped. The flames were a huge threat to them so they didn't dare to get close.

Seeing that the black shadow was burnt for five seconds, they relaxed. Even if this monster wasn't burnt to ashes, it would be badly injured.

If they were the ones burnt, they wouldn't be able to handle five seconds. Dragon race's ability wasn't something to be underestimated.

"Move aside!"

A giant roar spread from behind. Ye Zhongming got close. He rushed while shouting at Yangos. He was so anxious that he didn't manage to use mental energy to communicate. ㄝAN`0E5

Yangos was flying at a low height to surround it with the Saintess and Death King Tree as it had to give black shadow pressure. It then used the dragon breath to increase the damage. It also lowered its head while its body flapped its wings to maintain its height.

This made its head very close to the ground.

When Ye Zhongming shouted, a cold light slashed through the dragon flames and sliced where Yangos's neck and head connected. The angle and speed were perfect.

This strike was very cunning, but from a third-party angle, it was a textbook counterattack.

Since the black shadow escaped from the trap and fell into the flames, it tanked the high temperature and waited for a chance to counterattack.

All this was worthy of respect.

Dragon blood scattered. Yangos couldn't even make a sound before its neck was sliced. Its giant body fell from the sky and smashed into the ground. It then struggled.

Many people who saw that were terrified.

Yangos's struggle felt like that of someone unwilling to die, like that of a fish about to be made into food. It was using this way to show its resistance and strength.

It was a level eight lifeform that was pretty much a peak level eight dragon. Was it going to die from that hit?

Ye Zhongming's eyes opened wide. He didn't care about the energy use and told the Earth Elf to use Gravity Jump. It slowed the black shadow that was still on fire and then used Thousand Seal Blade.

Ye Zhongming was filled with killing intent.

No matter what Yangos did in the past, it was now a part of Cloud Peak. It was Ye Zhongming's partner and well-behaved battle beast.

It was even an ally.

It was sneak attacked right before Ye Zhongming's eyes. This was something Cloud Peak couldn't allow.

He was going to kill that fellow today!

Many Cloud Peak members saw the boss's furious strike.

Ten blade shadows appeared in the sky and sliced at the enemy.

Thousand Seal Blade had ten blade shadows at the start and would have a hundred when it reached intermediate grade. But Ye Zhongming didn't use the upgrade scroll, and there were so many more. His evolution level increased; he used Life Grain and the various Cloud Peak delicacies, which improved his job skill.

With the effect of the gravity, the black shadow had to lift its claws to block the blade light.

After scoffing, the monster left half of its claw on the ground.

Ye Zhongming's job skill, scorching flame technique, and Wind and Lightning broke the giant claws, which were so sharp that they could slice through dragon scales.

The black shadow fell and rolled two rounds. Large amounts of blood extinguished the dragon breath. It didn't turn its back and just jumped off the cliff.

Chapter 1284: Heaven Benevolence

Maybe because there were many trees around, or if the height wasn't too high, Cloud Peak's wind wasn't as big as expected.

Apart from one place, which was the back mountain.

During the Cloud Peak defense battle, the mutated lifeforms and enemy faction used this as a place to break through. Thus, this was one of the most protected areas in Cloud Peak.

The cliff had high city walls with various defensive weapons, especially toward the sky.

Everyone's World's defensive castles were also here and were also a part of the defensive formation. They were maintained with demon crystals.

But these were more for the outside. When the black shadow monster charged, it wasn't obstructed.

Ye Zhongming took one look and ran toward Yangos.

The monster wouldn't fall to its death. On the contrary, although it didn't know how to fly, it had its special balancing skill. The mark showed that it didn't fall quickly because of gravity and was just gliding into the distance in a stable manner.

Without Yangos, Ye Zhongming didn't dare to jump from here. Even if he didn't fall to his death, he wouldn't be able to catch up.

He got close to the struggling Yangos and told it to calm down. But he could sense that the dragon's mind was in a mess. That blow placed it on the verge of death and its mind had collapsed.

Ye Zhongming found a chance to jump on Yangos's back. He used his terrifying strength to press it onto the ground.

"Use medicine!"

Ye Zhongming found it hard to compete with the dragon with strength. It forced those words out of his mouth. The captains defending the back mountain used the medicine they always carried.

When the struggle wasn't so intense, everyone saw how terrifying that wound was. This was Yangos's thinnest part of his body, but that was only relative. The neck had a meter-deep wound. Precious dragon blood was flowing out like it was free. Yangos looked stunned; it pressed its wings onto the ground and wanted to get up.

The more it did so, the more blood flowed. Ye Zhongming saw several centimeters of ripping wounds in such a short time. These were caused by it when it struggled.

Thankfully, Yangos was a dragon and was level eight; if not, it would have died instantly with such injuries.

Anyone who saw this neck wound would feel a chill down their spine.

They scattered the medicine on it, but there was no effect as it was too deep. The medicine was for evolved. Although its struggling weakened, the wound didn't change.

A white light landed and wrapped around Yangos's neck. The Saintess used the Saint Light Technique. After the light, the bleeding slowed, but the wound didn't heal. It was obvious that Saint Hall's strongest healing technique was not useful.

Park Xiuying rushed over, and after using Cleansing Dew, she didn't rush to use any other skill. She focused on that wound and wanted to see if her skill was effective.

The Saintess discussed.

The three-nosed elephant used its nose to touch the giant dragon to console it.

That was weird. Yangos, who treated everyone like a hooligan in Cloud Peak except Ye Zhongming, had a good relationship with the three-nosed elephant whose head was damaged and whose IQ was affected.

“I need to use the ability.” Park Xiuying looked at Yangos’s bleeding wound and said calmly.

Ye Zhongming was stunned and nodded. He told everyone to press Yangos down.

Ye Zhongming didn’t dare to send it unconscious. With such heavy injuries and it not being human, he was not sure how much strength and which spot to hit. RANøBÈS

Everyone made a move. They pressed parts of its body so that it couldn’t struggle.

At the same time, Ye Zhongming ordered Cloud Peak’s defensive formation to be closed and for the defense battle squad to be on guard. The main battle squads also entered Cloud Peak and closed all paths into Cloud Peak.

Ying City and Puxing Town noticed their weird movement. They noticed the Cloud Peak forces gathering in the base. Some closer factions also became wary.

Everyone was curious and guessed what had happened, but no news had spread.

Within Cloud Peak, Park Xiuying raised her staff and became very serious.

Her white robe started dancing even though there was no wind, and a comfortable power started spreading from her body.

A white light shot from her staff into the distance. That white light traveled a long distance and shot into the blue sky.

A white cloud formed above Cloud Peak.

Park Xiuying closed her eyes, and a magic pearl appeared in her other hand. She raised it and shook it toward the cloud, which started to tremble.

Many Cloud Peak members were stunned. Only the core members knew what had happened.

The last time Ye Zhongming was back, apart from bringing Xia Lei the blue grade blades, Shengyuan the hanging shield and advanced strength potion, Candy the experimental platform, Mo ye and spear parts, and other potions for others, he brought back two purple equipment. One was Xia Bai's fallen wings. The other was the white robe on Park Xiuying's body.

Heaven Benevolence!

A piece of unique healing job equipment.

“Ability 1, Mercy. Healing job user’s healing skill effect increased by 20%.”

“Ability 2, Benevolence, When healing job user uses healing skills, mental energy consumption reduced by 50%.”

“Ability 3, calming heart. When healing job users heal a target, reduce the damage they take. Close combat damage reduced by 40%, ranged damage reduced by 60%.”

“Ability 4, Heaven Heart, healing job user will have a chance to produce healing crystal. Each crystal has some healing ability. The strength of the ability corresponds to the healing skill level and effect. The probability of producing the crystal depends on healing ability level and user level.”

Chapter 1285: Heaven Drawing Technique

“Ability 5, Split Healing Technique. After activating this skill, the healing job user’s single target healing skills will split into two to five different abilities. After splitting, you can heal other targets or heal the same target. If you choose only one target, the effect will be three times that of the original spell. Cooldown of three hours.”

“Ability 6, Heaven Drawing Technique. After activating this ability, the job user will consume a huge amount of mental energy to combine all their healing skills to form a super healing skill that can heal all external injuries. After use, all healing skills will enter a 3 to 30-day cooldown. The lower the level and healing effect, the shorter the cooldown.”

“When it is used on lifeforms that aren’t injured, let the target enter Heaven Realm, greatly increase combat strength with no side effects. The time and target’s level are related. The higher the level, the shorter the time.”

“When using the Heaven Drawing Technique, you will cause a phenomenon and give off a fragrance that attracts lifeforms.”

This was the ability of Heaven Benevolence.

Healing potions were useless, and Saint Light Technique’s healing effect wasn’t obvious. Now that Yangos might die at any moment, the Heaven Drawing Technique became the best choice.

Although this ability didn’t say it outright, it will cause a huge commotion when used and might attract

Cloud Peak was on guard because of that.

Another point was that the Heaven Drawing Technique drew things from the sky. Ye Zhongming was afraid that the defense structures would attack the energy, so he ordered to remove the defensive formation.

Very quickly, the clouds increased, and their size was so huge that they could cover the entire Cloud Peak. They gave a huge pressure.

Some voices spread from around from the mutated lifeforms. The Heaven Drawing Technique’s side effects had started to show. Some mutated lifeforms were tempted by the energy and the fragrance and moved toward Cloud Peak.

Cloud Peak warriors entered their various positions. The Posthumous People and Saint Hall warriors in Cloud Peak helped to defend. The various patrolling squad and reserve squad members went to the various transport nodes and prepared to attack.

The entire Cloud Peak entered defensive modes in a short amount of time.

The first group of mutated lifeforms appeared around Cloud Peak, which consisted of a bunch of flying-type mutated lifeforms. They looked like mutated sparrows but were now strong as a bull and as quick as lightning. A few thousand gathered in the sky like a cloud and headed over.

The crystal cannons and defensive weapons they moved from the Imperial City fired. The ranged warriors also used their abilities to kill these level three to six mutated birds.

At the same time, some mutated rats couldn't control their desire and charged toward Cloud Peak.

But very quickly, the intelligent and timid king gave some orders. Most of the mutated rats calmed down, which helped solve some problems for Cloud Peak.

In a short amount of time, more mutated lifeforms appeared around Cloud Peak. These fellows didn't dare to come near places where many evolved gathered usually. But they couldn't resist the temptation the Heaven Drawing Technique gave off and charged over. The smart ones hesitated and waited for a good opportunity.

As they had never used it, Ye Zhongming was very nervous because they didn't know how long the skill would take. They also didn't know how many and how strong the mutated lifeforms that came were and didn't know if the technique would succeed.

Although such skills had a high success rate and few failed, it had conditions. The user had to have two artifacts, one of which was a pearl that would be the energy transfer medium. They had to have enough healing skills, and the level must be high enough. The mental energy use was huge, and you had to ensure that you had enough.

Ye Zhongming couldn't help Park Xiuying with all this, and she had to rely on herself. Ye Zhongming didn't even know if she could deal with his worries.

After all, she didn't have much time to prepare.

If she failed...

Yangos would die.

Energy condensed really quickly. Even an eight star evolved like Ye Zhongming trembled from the energy. This ability drew respect from all life forms.

There was a loud explosion and a pure light from the clouds fired and hit the pearl that Park Xiuying had raised.

Her body shook, and she tried to stabilise her shaking body. She placed the staff in her other hand down on the ground.

She then grabbed the pearl with both hands and moved slowly toward Yangos. A few seconds later, the pearl fired another streak of light onto Yangos's wound and started to heal it.

The pillar of light and light from the pearl formed a 90-degree angle.

Ye Zhongming guarded on the side. He didn't dare to help her as he was afraid that he might cause the skill to fail. He could only look at Teacher Park struggling to control the pearl that was a medium.

At this point, the light that descended from the sky stunned all the surrounding evolved. Cloud Peak always caused such a huge commotion.

They noticed something abnormal and saw that mutated lifeforms had entered Ying City and were heading toward Cloud Peak.

People who could live here were all close to Cloud Peak. They didn't know what had happened but knew that the mutated lifeforms were up to no good. Thus, the other Cloud Peak forces that were outside and them started to stop them.

As more mutated lifeforms entered Ying City, a battle broke out. Half the city was covered in flames of battle in just a few dozen minutes.
