

Apocalypse 1306

Chapter 1306: What the universe races created

One couldn't deny that this scorpion was very strong. It could threaten Ye Zhongming but it wasn't strong enough that Cloud Peak couldn't deal with it.

Ye Zhongming conserved strength because he was dizzy from Meng Ao's words.

The ear stud was really Angela Earrings? It didn't belong to Talos Red Dwarves? This crystal scorpion was? Why didn't the mission say anything?

Many questions rose in his heart, which made him worried.

The crystal scorpion used the time to absorb the ear stud.

Ye Zhongming took a step back. He didn't use the chance to attack. He wanted to see what abilities that crystal scorpion would have such that the universe races would use their spokesperson to kill each other.

The crystal scorpion was different from the scorpions on Earth. After it changed, the gap was even bigger.

First was its body. It didn't look like a scorpion and was more like a human. The sides of its head had a helmet-like structure,; behind it were three layers of crystal wings forming.

The difference was that the tail was much thinner than before. It was shorter and looked like there were sharper crystal pieces on the tip.

Ye Zhongming had a weird feeling. This crystal scorpion felt cumbersome.

After transforming, the scorpion's movement became slow. Moreover, it stopped attacking YE Zhongming and retreated to Meng Ao's side.

"Don't think that the things Talos Red Dwarves create are amazing. The other races only have requests from you, so they are nice to you. You aren't even in the top thousand in terms of combat strength. Do you think no one dares to offend you? You always act so arrogant."

Meng Ao hid behind the scorpion and blocked Ye Zhongming's gaze.

"Your representative always acts like a boss and thinks that apart from the Talos Red Dwarves, no one knows how to use this crystal scorpion. But in truth, we know!"

Ye Zhongming heard some noises. At the same time, he knew the name of the crystal scorpion-- Crystal Scorpion Armor.

"Since we know how to use it, why do we need you? I killed your spokesperson."

Ye Zhongming took a step back carefully as he noticed something.

Meng Ao was being absorbed into the scorpion.

“Let me show you the power of the races of the universe!”

Meng Ao entered the crystal scorpion armor. This man-made equipment wasn't as cumbersome as before, and it felt sharper and more dangerous.

It was like a tiger staring down at you.

“Angela Earrings is a controller?” Ye Zhongming asked.

Meng Ao felt much safer after entering the armor. He spoke lowly, “More accurately, it is a connector. Without it, the scorpion armor can only be used in scorpion form. Its combat strength is similar to an ordinary level eight lifeform and might be even weaker. With this connector, it can enter its second form. I can merge with evolved lifeforms and be several times stronger than before!” RǎNōběě

“Ye Zhongming.” Meng Ao raised his hands, “I told you to let me go, but you disagreed. So now, I can only step on your corpse.”

The two crystal arms fired many pieces of light. They were like two machine guns that fired at Ye Zhongming.

Ye Zhongming dodged. The first few pieces brushed his body, but with his Star Armor's strong defence, they didn't damage him.

But the drop in durability shocked him.

With this as a base, he calculated that even with his sick defense, he could only take a hundred strikes. Then, his body would be injured!

Ye Zhongming was forced to dodge!

At the same time, he thought differently about the crystal armor.

This was what Talos Red Dwarves created? The idea was magical, and its strength was split into stages. You could merge with evolved lifeforms to even threaten a level eight evolved like himself.

Think about it: the fact that it entered Earth meant this wasn't a good piece of equipment. But such a thing was so strong, so what about the other items?

Ye Zhongming used the wheel's equipment to judge the armor, and the conclusion was that it was far above purple grade. As for whether it was similar to seven-colored equipment, that was hard to judge. Ye Zhongming didn't have an attack-type seven-colored equipment. To date, he was also unable to use Wind and Lightning properly.

He broke three walls and finally broke free from the attack range of this machine-like fellow.

“Not bad, not bad.”

Meng Ao drove the crystal scorpion armor and followed. Although his movement speed was slower than his own, it was enough to keep up with Ye Zhongming.

The machine gun-like attacks stopped. When Ye Zhongming revealed his body, Meng Ao moved, and the three short wings on the back of the armor flapped. This strong equipment floated into the sky. The wings flapped again to give out an ear-piercing whistle. In the next second, he pounced quickly.

Ye Zhongming’s agility was slower than that of Xia Bai and Liang Chuyin, but it wasn’t slow. He was even faster than ordinary agility-type evolved. But he still didn’t dodge that attack. He was only able to move his body before the armor smashed into him.

His strong instincts stopped him from panicking. He reached with his left hand and lifted his right knee. He tossed the scorpion armor to the side with the other leg as the center.

Ye Zhongming felt pain in his arm. The giant scorpion tail that was about to pierce his head was blocked by his left hand. At the same time, his knee hit the armor’s stomach. Using these two forces, he started to break away from the opponent. A blue dagger appeared in his right hand, and he silently stabbed it towards the enemy’s neck!

Chapter 1307: Strongest Ye Zhongming

“Hehe!”

Meng Ao laughed.

“Zila!”

The sharp, circular pieces on the scorpion’s tail started to rotate.

“Clang!”

The blue dagger stabbed the neck of the armor.

“Crack!”

The crystal arms grabbed Ye Zhongming’s body.

These four sounds occurred at the same time, and four actions were performed simultaneously.

Ye Zhongming’s left hand was bleeding. A crystal was sent flying by the blue dagger, but the dagger was stopped and unable to pierce further. He had already been a distance away, but now that fellow had caught up.

Using the long arms, the scorpion armor had a natural advantage. Ye Zhongming’s reaction was perfect, but this advantage made up for it, and his attempt was dissolved. Instead, he was being attacked.

“I will grind you into paste!” Meng Ao’s eyes were red. He was already regretting being afraid of this guy. He should have taken the armor and killed this person. Hongkan Freedom Army wouldn’t have collapsed.

What a waste of his men!

Meng Ao could already imagine the glory he would get for killing the Cloud Peak boss and replacing him in the rankings.

Ye Zhongming didn’t fight back. His eyes turned ice cold, and the star rings of the armor exploded. At the same time, the dagger disappeared. He pressed his right hand on the scorpion armor and used-- Cloud Slice!

If people were watching, they would be impressed by these short few seconds. Both sides were using their advantage to gain victory. One used it on their own body to try to slice Ye Zhongming into pieces through close combat. Ye Zhongming was using his abilities to break free.

After the intense clash and bright lights, both sides split up.

Ye Zhongming hit another pillar. The cement walls were too weak for him. This caused another portion of the stairs to collapse. He had to move quickly towards the next building.

The scorpion armor wasn’t in a good state, either. However, it didn’t fly like Ye Zhongming; the beautiful armor was left with sharp cuts, some very deep.

Meng Ao's heart hurt. He knew that it would be difficult to repair once the armor was damaged. Fortunately, he had the Angela Earrings. It was still possible if he had some time.

But this would affect his combat strength.

He had a new respect for Ye Zhongming, and killing intent intensified.

He started to realise that the guy wasn't as weak as he had imagined. He was very strong and problematic to deal with. If he couldn't kill him quickly, once the female guards arrived, even if he had the scorpion armor, he wasn't confident in winning. Running might also become a problem.

The three-layered wings flapped, helping him leave the collapsing building. Both sides got close quickly. Seeing that he couldn't break free, Ye Zhongming used a skill but it didn't do much.

Ye Zhongming and Meng Ao started to fight in a primitive manner.

It wasn't that they didn't want to use skills but they used all those that they could. Mental Energy Field, Gravity Control, etc. were used, but as they were close, these weren't useful, and they could only rely on equipment.

Both sides clashed and were so quick that you couldn't see their actions.

Both sides moved while fighting. Anything in their path, like buildings, statues, or evolved, was shattered and forced away.

Only when they knocked into a giant memorial structure did its collapse split both parties.

Ye Zhongming panted as he stood up. He looked at his defensive equipment and knew he had to change for another set. In just that short while, a large portion of them were destroyed. He took them off to reveal his muscular body. RãNOBÊs

Wind and Lightning appeared in his hands. A bright star appeared above his head. Dark patterns appeared on his body, and his eyes turned dark. A two-horned beast appeared beside Ye Zhongming, and pieces of sand flowed from his space equipment.

It wasn't over. Two giant white needle birds appeared above him and flapped their wings. Looking at the demon crystals on their forehead, they were at level seven.

He placed Staff of Nature beside him, and in it was an intermediate ice element gem.

Explosive mechanic also appeared beside him, and the barrel gave off a cold glow.

Also... The sky turned dark. The clouds turned into a sky full of stars. Some silver sand landed and floated around, but they didn't hit the ground.

The area it covered was huge, covering the entire Ji City fully. Be it the human evolved on this side of the river or the mutated lifeforms on the other; they could only watch in shock and feel the pressure pressing on them.

“You, you, this, this...”

Meng Ao was stunned.

He didn't find it weird when the Staff of Nature, Explosive Mechanic, weapons, etc, appeared. If he wasn't in the armor, he also had many of these.

But what was this phenomenon? Also, what was the silver sand that was floating around like snow?

It should be from this guy, but... How can a human cause such changes? It was as if he was controlling the entire area!

Right, not only did the sky change, but the earth changed, too. The color difference wasn't as huge, but Meng Ao knew that gravity had changed. The ability of his armor was broken, captured by Ye Zhongming by his ability. Now, he was covered by the Gravity Field.

Ye Zhongming didn't say anything and just raised his sword.

When he fought the level nine Saint Father, he was very strong. He had just reached eight-star and had the Heaven Body. Although he couldn't defeat the Saint Father, he could complete the plan.

In the next few months, he continued to improve.

One thing couldn't be denied. The current Ye Zhongming was much stronger than before.

Meng Ao and the scorpion armor had forced Ye Zhongming's strongest form!

Chapter 1308: Star Gaze

Ye Zhongming activated his bloodline. The Lightning Sand Monster was the summoned bloodline being. The sand was to increase the strength of his bloodline, where he was 20% stronger when he was in the sand.

The Lightning Sand Monster could be upgraded using the skill upgrade scroll. Ye Zhongming had upgraded it twice. This fellow's attack was as strong as a level seven mutated lifeform now.

Needle Bird, Explosive Mechanic, and Staff of Nature had been Ye Zhongming's support. So it was no surprise that he took them out.

That shining star appeared above his head. This was the Star Elf's ability--- Shining Star.

As for what caused the phenomena, it was also the new ability that he got after the temporary Star Elf became the permanent Star Elf.

The permanent star elf had become like this.

“Star Elf Ability 1, Shining Land. When needed, the Star Elf will light up a space similar to its size. In this space, the user will have a speed buff.”

“Star Elf Ability 2, Unobstructed Space. Star Elf has the ability of the elves and can move across space.”

Star Elf Ability 3, Shining Star. Star Elf will release a small star when fighting that can be controlled by the user. When needed, launch a Star Laser.”

“Star Elf Ability 4, Greedy. Star Elf can eat anything it is interested in to store energy in its body. It will enter its next growth stage when it reaches a certain number.”

Star Elf Ability 5, Star Gaze. You can use this ability once every three hundred hours. The user can turn a 15km radius into the night sky. In this area, the user will obtain Star Blessing. The user’s body, skill, bloodline, summoned being, etc., stats, and strength will increase by 25%.”

“Star Elf Ability 6, Night Dropping Sand. When using Star Gaze, based on the Star Elf’s level, form three different phenomena. At birth: Star Veil. Lifeforms in the star veil will have their movement speed reduced by 20%. Baby stage: Star Ocean. Lifeforms in the star ocean will have their agility reduced by 30%, and the user can use the stars to damage the enemy. Mature: Star Storm, agility reduced by 50%. When controlled, the star sand in the Star Gaze distance can form a giant star storm to deal mixed damage to the target.”

“Star Elf Ability 7.”

.....

.....

.....

“Star Elf Ability 12.”

Today was Ye Zhongming’s first time using the two abilities. He covered 15 km in Star Gaze. Ji City wasn’t big. A 15km radius meant around 700 square kilometers, which nearly covered the entire city.

Some lifeforms at the border were especially shocked when they saw half the sky was white and the other was dark.

This phenomenon was even more shocking than the Hongkan Freedom Army being attacked.

“I need to thank you.” Ye Zhongming’s body gave off a dark aura, “I rarely have the chance to go all out, so I don’t know what I am at my full strength. You gave me the chance.” ㄟ NÓĚđ

Wind and Lightning flashed, and a few dozen streaks of light appeared. It shone and attacked Meng Ao and the armor.

At the same time, Staff of Nature, Explosive Mechanic, Needle Bird, and Lightning Sand Monster attacked, covering the region that the scorpion armor was in.

This was Ye Zhongming's strongest attack.

At this time, Ye Zhongming forgot all about Talos Red Dwarves' request to capture Meng Ao alive and obtain the Angela Earrings. He just wanted to use his strongest attack. This was a rare opponent.

Meng Ao was in the first layer of Star Veil. The scorpion armor's ability couldn't be used, and his speed was reduced. Facing so many attacks, he didn't try to dodge as he knew it was impossible. The crystal wings could let me move quickly, but the distance wasn't big. Along with the speed reduction, he didn't think that he could dodge.

He knew that at this crucial moment, Ye Zhongming had gone all out.

He instinctively did some actions, controlling the armor to use his strongest moves.

The entire armor was pale red like a machine going into overdrive. The three-layered wings turned into a real piece of armor that wrapped his body. The tail also wrapped around his body with the tail being before his chest. There was the only part that wasn't covered, and it was the reddest part.

The tail and chest combined to form a red energy pillar to clash with Ye Zhongming's attacks.

Under the star light, a sun-like glow exploded, which chased the darkness away. The giant energy ripped spread like dominos. The buildings in range collapsed and only stopped a distance away.

A fifth of the entire Ji City region was leveled to flat ground.

The shockwave also killed many warriors.

Ye Zhongming didn't put Wind and Lightning down. He panted and looked forwards with killing intent.

The scorpion armor had collapsed there. The beautiful machine was now broken and tattered. The parts that weren't missing were covered in cracks. This equipment that came from the races in the universe was nearly destroyed.

Due to the damage, Meng Ao was ejected and was under the armor. He couldn't move and no one knew if he was alive.

Ye Zhongming didn't even look at him but at a guy a few meters away.

“Busybody?”

Chapter 1309: Advanced spokesperson-- Dark

That sentence was said by the person who had suddenly appeared.

Just now, Ye Zhongming had a clear grasp of the situation. It was undeniable that the final strike from Meng Ao was very strong. It was nearly comparable to the Nature Staff, Needle Birds and Explosive Mechanic attacks. But Ye Zhongming's strongest attack exceeded that ability, so he could not block it.

After the various permanent potions, Cloud Peak delicacies, Ocean King Crown, Earth and Star equipment, etc, improved his body, Ye Zhongming's current attack exceeded what anyone could think.

That strike was enough to kill Meng Ao and destroy the scorpion armor. In truth, they were nearly destroyed.

All this was because of the guy that had suddenly appeared.

After saying those words, both sides didn't gaze much at each other, just turning and looking at the palm-sized thing on the ground.

It looked like a mirror. Under the starlight, it looked life-like. But it was now shattered into a few pieces.

Even if it was damaged, Ye Zhongming could sense a disappearing energy. The amount of energy was also huge.

That should be a defensive piece of equipment whose level shouldn't be low.

“You can’t kill him.”

That person adjusted his emotions, but he was very anxious. His anxiousness was probably caused by the destruction of that equipment.

“Give me a reason.” Ye Zhongming’s killing intent continued to surge and was becoming thicker and thicker. He was thinking about killing this guy who had appeared suddenly.

A golden-red body appeared behind that person. Yellow Ball showed itself, and its claws made a digging motion. It roared toward the guy who had appeared.

Xia Bai’s body flashed through the sky. She was a darkness element user so she was like fish in water in the Star Gaze. The wet blood on her body filled her with killing intent no weaker than Ye Zhongming.

The female guards had completed their mission. They appeared from various directions and surrounded this place.

That person coughed and opened his arms, “Meng Ao is Shattered Talisman Star Belt’s spokesperson and has level three permissions. It will be problematic if you kill him.”

Ye Zhongming looked at him seriously and asked, “Who are you, then?”

“You can call me Dark.” That person introduced himself, “I am also a spokesperson. But different from you two, I represent Reina Star Faction.”

Ye Zhongming was stunned. He had come across Ruan Xiao and Captain Liang. They were spokespeople of a race, but he had never heard of anyone representing a faction. Su Race was special, and they weren't included.

Based on the information he received, Reina Star supported the wheel and was behind Five Ring Money. The races of the universe in the Sky Monument Path who tried to recruit Ye Zhongming all belonged to this faction.

"The few deacons and Five Ring Money have a good relationship with Cloud Peak. They all belong to the Reina Star Faction. Based on this, I think we have the conditions to speak. What do you think?"

Dark looked at Ye Zhongming. He saw that Ye Zhongming's killing intent had reduced and pointed at the sky. He asked him if he could remove the Star Gaze.

"Meng Ao belongs to Reina Star Faction?"

Ye Zhongming asked.

"As you can see." Dark replied, "I know that Meng Ao is at fault, but, this happens anywhere in the universe. You won, and you badly injured him. You will also get back what you want. So that is enough; how about you give me face?"

Ye Zhongming placed Wind and Lightning down. After the Star Elf got the order, it ended Star Gaze. The sky's color returned to normal, and Dark heaved a sigh of relief.

Although he didn't know what ability this was, he knew that fighting under the starlight would mean he was fighting in Ye Zhongming's home ground. Even if he didn't want to fight him, it didn't feel good to be in someone else's domain.

He took a few steps forward and walked beside Meng Ao and the scorpion armor. He looked at their situation and shook his head.

He was expressionless, but deep down, he was shocked.

His identity was special. As Reina Faction's spokesperson, he obtained more benefits than the other spokespeople.

As his identity was a secret, few people knew about him. But he was very strong. He believed that he could defeat the people in the country rankings.

Before coming here, Ye Zhongming was one of those people. He felt like apart from the extremely strong evolved, the rest that could match him were the few advanced spokespeople. ㊦ANŌ㊦ÈŠ

After seeing Ye Zhongming, his thoughts wavered. From the moment the defensive mirror he got from a universe race shattered to when he saw the situation of Meng Ao and the crystal armor. He had a feeling. He couldn't do anything from Ye Zhongming.

He wanted to help Meng Ao up but felt killing intent cover him.

Dark stopped and frowned, "Boss Ye, didn't we agree?"

"What did we agree?" Ye Zhongming turned his head and asked.

"I will bring Meng Ao away, and you will take the scorpion armor."

Ye Zhongming shook his head, "I didn't agree."

Dark's expression turned ugly, "You are giving me face like that?"

"Your face only helped you keep your life. To be honest, I gave Five Ring Money face. Your face isn't worth money to me."

It wasn't Ye Zhongming being a bully. Meng Ao was part of the mission. Even if you represented Reina Star, did you expect that you could take him away just because you wanted me to give you some respect?

The mission mentioned clearly that he had to capture Meng Ao alive, and he would get a blue equipment upgrade scroll. This was still very precious to Ye Zhongming, who could craft blue equipment. After all, he had to consume many precious materials and would fail several times.

A foreign person's face was not worth a blue piece of equipment.

Moreover, he didn't even verify this person's identity.

"Ye Zhongming, I know you are used to being a boss, but sometimes, you must stop thinking that you can decide everything." Dark squinted his eyes, and his attitude became firm.

Ye Zhongming nodded, "Kill him."

Chapter 1310: Success rate of extortion

There was a short moment where Dark thought that Ye Zhongming was joking.

This was the first time he faced such treatment after revealing his identity.

With what he knew, Ye Zhongming had just become Talos Red Dwarves' spokesperson. He should respect the races in the universe. He already said that he was the advanced spokesperson of a big faction, so why did he still dare to attack him?

But six human skull-sized balls appeared around the body of the golden-red dog, spinning around it at high speeds. The whistling sounds represented how much energy they had.

A woman in the sky with wings raised a black scythe.

At the same time, Dark could sense the female evolved, aiming their weapons at him. Maybe in the next second, they would fire in unison.

Also, Ye Zhongming hadn't moved. He was the one that made him feel the biggest pressure!

"You..."

He could only say one word before Yellow Ball charged to his side. The metal balls landed. He couldn't even turn his head and was forced to push off with his legs to charge forward. At the same time, something appeared in his hand that flew to his head. It turned into a stone gate with its own scripture chants, which clashed with Xia Bai's attack.

A level eight lifeform and a seven-star evolved. Two attacks were broken by Dark.

But as long as Ye Zhongming didn't tell them to stop, they wouldn't stop attacking.

Blood surged in Yellow Ball's eyes. It barked, and the sound caused the ground to shake. Dark's body stopped, and then he was drowned by the flames that Yellow Ball had spat.

At the same time, Xia Bai's scythe sliced the stone gate, causing stone to splash. Using the force, her body dove toward the side. An energy light fired from her mask and covered the region that Dark was in.

The purple equipment could even threaten a level nine lifeform. This Dark was only an eight-star evolved.

Flames and light were the only things that could be seen.

At the same time, the female guards fired. They had three weapons. The weapons they were used to using were their first type of weapon. The crystal guns and crystal grenades were the other two.

Although they weren't as dazzling as their own skills, the fixed equipment was good because their attacks and strength were uniform, making them easy to control. When working with Xia Bai, they would usually use crystal guns.

Moreover, once Cloud Peak's crystal weapons were changed and refreshed, the first to be switched would be Ye Zhongming's close guards. So they were extremely strong now, and their crystal grenades had reached the fourth version!

After three shots, everyone stopped.

Dark appeared in a deep hole that was covered in smoke. As the wind blew, everyone saw that Dark was gone. There was a two-meter-tall egg among the ruins of the stone gate that shattered. The white shells were covered in cracks.

"F**** stop!" Dark's furious roar spread from the egg.

The eggshell cracked, and Dark appeared. His defensive equipment was damaged, and there were two wounds on his face. Because of the flames, his skin was slightly dark.

“Ye Zhongming, don’t go overboard!” Dark was regretting. He felt things would have gone better if he had been more direct or had given Ye Zhongming some benefits.

But now, it was obvious that he had messed up.

This had to do with the pride and confidence that he usually had. He also overestimated his identity.

Dark thought that Ye Zhongming wouldn’t dare to attack. Who knew that he would be so decisive?

At the same time, he cursed. Dark had witnessed Cloud Peak’s ability. Without Ye Zhongming attacking, just Yellow Ball, Xia Bai, and the female guards were enough to destroy two of his strong defensive equipment. The stone gate focused on air attacks, and the white egg cover was the other. ṚÑóβES

If you include the D Type Glasses from before, he had destroyed three pieces of equipment belonging to the races of the universe.

This trip was a huge waste.

What replied Dark was Ye Zhongming's shining blade.

"Okay, I won't care about this. You are the strongest; is that good enough?"

Dark decided to retreat. He realised that Ye Zhongming wanted to kill him, and there was a high chance that he would.

It wasn't that he felt that Ye Zhongming could defeat him. But because Ye Zhongming had help, he might not be his match.

Ye Zhongming heard those words and didn't continue attacking. He smiled.

"Actually, the moment you said your identity, I was happy that you came." Ye Zhongming didn't look like a cold killer and was more kind and merciful.

"What?" Dark didn't understand what Ye Zhongming meant.

"Your arrival gave me a rare chance." Ye Zhongming took two steps, "I can know a lot of news and also get many benefits."

Ye Zhongming suddenly asked, "You are really Reina Faction's spokesperson, right? You are very high-level, right? Don't lie to me; I easily trust people."

Dark rolled his eyes, "Of course! There is no need for me to lie about this."

Ye Zhongming relaxed and nodded, "That is good; if not, this wouldn't work."

"What do you mean?" Dark felt Ye Zhongming was crazy.

"I need to ask a few questions, and I need to know the answer."

Hearing Ye Zhongming say that, Dark was furious, "You could have asked me previously, but why did you attack me?"

Although Dark was arrogant, he didn't plan on fighting Ye Zhongming. They did have a good chance of communicating.

Although he was an advanced spokesperson and didn't belong to the same faction as Talos Red Dwarves, they weren't enemies. The two even worked together a lot.

The reason he cared about this matter was because of Meng Ao. He couldn't watch things happen to this spokesperson and do nothing.

If Ye Zhongming agreed, he could bring Meng Ao away. He really didn't mind telling him some things in return.

But Ye Zhongming's reply nearly angered him to death.

"Because now you know that I can kill you. So when I threaten you, the success rate will be high."
