

Apocalypse 1401

Chapter 1401: Eating and taking

Silence.

The room was silent.

Alamos, Wen Yan, and the others all felt there was a chance Jiu Long would lose. But just now, a few seconds ago, Jiu Long gave them hope, and they all thought he would win.

Who knew that the battle would end like this?

He could lose, but for him to lose so cleanly and quickly...

The first battle not only didn't cause the energy to increase, but it also meant they had to be more careful in the next battles.

"He was only seven stars, so it wasn't hard to understand how he lost to an eight-star opponent."

Gyanendra started talking after being recognised. Xia Bai's performance caused his eyes to flash, and no one knew what he was thinking.

Wen Yan nodded, "Him having that earthworm is such a waste. If it were someone else, they would definitely win."

"That might not be true."

David suddenly said, "Don't you think she won too easily? What does that mean? She didn't use her full strength. She just activated her bloodline to increase some of her strength and relied on the speed of her wings and the sharpness of her scythe. She didn't even use a single skill."

Everyone was silent and knew that David was right. Although Xia Bai's victory took a little longer, it was very simple. It was a crushing victory.

"Look!"

Everyone had turned to each other because of their conversation. Xia Bai's victory meant she would be teleported, so most people didn't look at the screen. Hearing that shout, everyone turned.

Xia Bai didn't disappear and just squatted beside Jiu Bao, looking at the face without eyes.

Of course, this might be its tail.

"Jiu Long and Jiu Bao were deemed as a single body by the space. Jiu Long is dead, but Jiu Bao is alive. She still needs to kill Jiu Bao!"

Someone shouted, but the voice was very soft. Everyone knew that the earthworm was weak due to it buffing Jiu Long. Just a wave of her scythe could kill it.

The question was if Xia Bai was willing to use that strike.

But instantly, everyone realised that something wasn't right. Xia Bai didn't wave her weapon and even kept it. She reached her hand out and tried to get close to Jiu Bao.

People who saw this had some guesses but hoped it wasn't true. They also didn't think it was possible.

Xia Bai's hand landed on its skin and that giant body shuddered. But this level eight battle beast didn't react. Its head and tail wrapped around and surrounded Xia Bai in the middle. No one knew what that was for.

"Impossible, this is impossible."

There was a sharp voice in the quiet room.

He was Li Lin, originally Thousand Beast Villa's battle beast keeper. Although he wasn't a top expert in this field, he did have some knowledge. As one of the members who staged the coup, he controlled some power, so the space recognised him and allowed him to be here.

He saw what Xia Bai did. This would only happen if the battle beast recognises someone as a master.

Mutated lifeforms, even herbivores, would have fierce natures. To turn them into battle beasts, you either raise them from young or have strong contract scrolls. If not, you need to tame them.

Taming sounded simple, but it was extremely hard to achieve. Normally, even if you beat a mutated lifeform to death, it wouldn't willingly become your battle beast.

You can try using some benefits to seduce the mutated lifeform but these fellows usually wouldn't think of giving up themselves. Like Yangos. Even if Cloud Peak could give him many benefits, raising his level and helping him recover, he only formed a master and servant relationship with Ye Zhongming through a contract. If not, that dragon would have betrayed them.

Battle beasts were among the most studied aspects of the apocalypse. In Thousand Beast Villa, battle beasts recognized masters on their own. After all, the beasts they nurtured were less hostile than those in the wild.

Thus, Li Lin was familiar with Jiu Bao's current state. It was accepting an evolved as its Master.

If not, Jiu Bao would retaliate. Even if it couldn't win, it would only quiet down when it was killed. Especially when it had a Master before, and it was being forced to recognise its master's killer.

He felt it was impossible, but it was happening.

A dark energy appeared in Xia Bai's hand, and it spread to Jiu Bao's body. The earthworm shook. The skin that had turned green after it passed some energy to Jiu Long started to turn dark, and there were golden ring-shaped spots.

At the same time, the two ends underwent huge changes. Features started to appear. There wasn't any nose, but there were two pairs of eyes, also... A pair of white ears with some fur...

That looked weird.

Why would an Earthworm that lived underground have a pair of rabbit-like ears?

No one could explain it, but it appeared.

The head and tail had such changes.

Moments later, Xia Bai retracted her hand. They could tell that she was very tired, but Jiu Bao had obtained new life. Its black body had golden rings. Four eyes, giant mouth, rabbit ears...

Xia Bai retracted her wings and Jiu Bao lowered its body to let Xia Bai sit on its neck. It then raised its neck and raised its Master into the sky.

In the next moment, they disappeared.

Breaking free was the reward for the victor.

“What happened?”

Wen Yan shouted. They lost that battle, and the other party obtained a battle pet. It was even level eight. This caused Xia Bai to get much stronger. Although Jiu Bao was a support battle beast, how strong would Xia Bai get if she was buffed by it?

Everyone knew how loyal she was to Ye Zhongming. Even if this operation succeeded and Ye Zhongming died, Xia Bai would take revenge. The target would most likely be Wen Yan, who would remain in the country. For such an eight-star and level eight battle beast to target him, even he felt he wouldn't be able to sleep well.

But he tried his best to calm down. He could only look at the current situation. Since Xia Bai broke free, then Ye Zhongming must die. If not, Wen Yan would be the dead one.

Chapter 1402: Li Lin's team

The quietest person trapped in this space would be Xia Bai, who had an enemy before her. The most uneasy would be Xiao Min and the female guards.

They felt like they were going mad.

They lost their boss in the rainforest, and after hearing what he went through in that mysterious space, although they found it unbelievable, they felt more afraid.

Ye Zhongming made it sound easy, but everyone could tell how dangerous it was. Bloodline and job were skilled, and he could only rely on his body. When these people chatted, they felt that he wouldn't have been able to escape if his boss hadn't been lucky and had been in time for that season that absorbed energy.

Failing to protect Ye Zhongming meant they lost their meaning in life.

This was the difference between ordinary people and those who had been humiliated and tortured to the brink of hell.

Their loyalty might be twisted, but it was undeniable.

Now, they noticed that their boss and themselves had entered another magical space. Ye Zhongming wasn't with them again, so most of them were in a crazy state.

Xiao Min and the few captains couldn't control themselves. The female guards ran around and shouted. They tried to use abilities that might be useful to get out of there or contact Ye Zhongming.

After failing, they even tried to attack the only target they could find... The ground. This was to vent their despair.

The female guards were fearless. They had the best equipment and went through the strictest training. They were willing to challenge the gods for Ye Zhongming.

But if he weren't here, they would go mad. Their mental support was gone, and no one could stop these women who had serious psychological problems from taking revenge on the apocalypse.

When they were okay, they could jump into the water to tease their boss in West Asia. When it was bad, they would destroy the world coldly.

This was the female guards.

Now, they were on the verge of going crazy.

They couldn't find Ye Zhongming.

At this time, a team appeared in the space.

Li Lin didn't want to take the risk and enter, but he had no choice but to face the famous female guards. He had a bunch of battle beasts that were weak against high level evolved but had a high chance of winning ordinary evolved.

More importantly, Li Lin was only a six-star evolved in this space. He didn't consume much energy to enter the space. As for the battle beast team he led, they didn't consume energy energy.

Thus, it would be best if he won, and it wouldn't matter if he lost. Thus, he was sent...

The highest chance of winning was in Li Daqian's space. The strongest person was badly injured and about to die, and only Li Zizhong was left.

However, the people inside were afraid that the pair would have other ways to control the battle beasts, so they didn't let Li Lin head there. They chose the female guards.

The background of this team was well spread after the few years of the apocalypse. Many people treated this as the origin of the hatred between Cloud Peak and Soul Merchant.

Naturally, they knew about the identities of these female guards and how they were treated before. Many people felt Li Lin's battle beast squad would win them easily.

Although the female guard ladies were near crazy, when an enemy appeared, their training and understanding became an instinct. They gathered together and looked at this bunch of special opponents.

This team was made of purely battle beasts. There were over a thousand of them. At the front were common black apes. There were around five hundred. Behind them were mutated white doves that looked like cows. There weren't as many as the apes, but still over three hundred.

Behind them were rats, but they were all lab rats, and there were around two hundred of them.

Lastly were five mutated parrots that flew in the sky.

Also, Li Lin was all the way at the back.

“Killing you, I...”

This was Li Lin’s opening speech. But when he spoke, their attacks arrived.

Be it he or the audience before the light veil, they were stunned.

They fought instantly? What if this was Thousand Beast Villa’s reinforcements? Even if they recognised him as an enemy, shouldn’t they ask before attacking? Why did they attack right away?

Li Lin quickly placed the golden whistle in his mouth.

What level were the female guards now? What equipment did they have?

Average of six stars! All green equipment!

Many outsiders knew that the female guards were strong, but they didn’t know why they were strong. They all thought they relied on Ye Zhongming and thus had good equipment. Also, they were fearless.

In truth, they were strong in other areas, too. There was their evolution level, job distribution, skills, and their logical arrangements.

That strike was rushed and wasn't their strongest strike. But when the light landed, over a hundred mutated apes fell. Even a few mutated white swans behind them died.

Those apes weren't the ones that the labs experimented on previously. Most of them were level four, and there were a few dozen level five apes. The white swans had a higher level and were all level five. Those mutated rats had a lower level and were all level four.

The most eye-catching were those multi-colored parrots, which were all level six.

The level of these battle beasts showed how strong Thousand Beast Villa was. If not for Li Lin's betrayal, it was near impossible to break such an organisation.

"Kill them!"

After blowing some whistles, Li Lin's eyes turned red, and many red patterns appeared on his face. A pair of horns appeared on his head, his back bent, and he leaned.

After shouting those words, he stretched his arms, and two red energy lines sputtered from his palm. They hit five mutated parrots, and after these fellows mimicked the words "Kill them," the space's color changed. Light the same color as their feathers appeared around each lifeform.

Chapter 1403: Heart Demon Illusion

Xiao Min and the others felt like they entered a memory space they weren't willing to enter.

There was a greyish-white room with ice-cold metal beds. There were mutated lifeforms screaming day and night and a bunch of guys in white lab coats. These people had the ugliest faces in the world.

They looked at the people they shared a house with and saw scenes they would hear and imagine.

Women were being used as tools. They were forced to drink evolution potions, and their levels increased. At a suitable moment, they would be fed to other allies that had turned into zombies.

Everyone knew they were going to die, but no one knew when. Everyone wished they would die and not lie on the bed with their limbs powerless, waiting to be fed to the pigs.

Many female warriors shuddered. They saw the guys that terrified them pounce. They wanted to dodge, but they could only close their eyes.

Many people started screaming, and the formation became messy. Their attacks also stopped.

Using this chance, the mutated apes and other mutated lifeforms started to charge.

Both sides weren't far from each other. For the black apes that weren't fast, they were still able to charge into the female guards' formation.

Although their levels were high, the moment the powerful apes got close and they couldn't fight back, normally, they would be killed quickly.

The scales of victory leaned towards Li Lin's side.

The people in the monitoring room relaxed.

They lost the first battle. If they lost the second one, even if it wouldn't cause much difference in energy, it would be a huge blow to their confidence.

This would put the third person who entered the field at a psychological disadvantage, and their emotions would be affected.

Thus, sending Li Lin was right. The battle beast army, especially the five mutated parrots, could counter the female guards.

These women who killed people without blinking had their heart demons drawn out, and they lost their minds.

Li Lin didn't stop after releasing the red energy. The parrots needed his help to complete this heart demon illusion ability.

The first batch of black apes charge into the female guards.

The battle beasts nurtured by Thousand Beast Villa were less hostile than wild animals, and at least half of them didn't have skills. The remaining few only had support skills like roar that could increase strength. Like berserk. Like Growth that could increase their size and increase their strength. Like Chest Thump that could stimulate pain and give them a temporary buff.

These apes didn't obtain any strong attack skills and could only increase their body's stats.

When facing other opponents, these skills could increase their strength. Their combat strength would increase by a large amount, and the battle's outcome would change.

But when they faced the female guards, things changed.

The first batch of apes caused many female warriors to fall, which delighted the people in the room.

But what happened next was something they couldn't understand.

None of them died. On the contrary, they immediately came to their senses, standing up and fighting back.

Wen Yan, Alamos, and the others didn't understand because they didn't know the female guards.

Although the apes' bodies were strong, their evolution levels were there. Most were level four, and some were level five. After their stats increased, their strength was at most increased by half a level.

The female guards were mostly six-stars, with some reaching seven. No battle squad could compare to the female guards in the entire country.

This was only their evolution level. Don't forget that they used modified potions to evolve. Their bodies were much stronger than evolved on the same level.

Also, they were wearing full green equipment. Even if it wasn't a set, the equipment was great. These pieces of equipment were the source of envy of many faction bosses. Apart from super factions, other top leaders didn't even have a full green set.

The defense of this set could even block level six and level seven attacks and help them survive one blow.

There was another point that couldn't be missed. Each of them had a battle beast. Although they weren't as orderly as the Thousand Beast Villa, each of them was specially selected by Ye Zhongming and matched the warriors' bloodline and job. When feeding them, he used the best food and spent a whole bunch of money to buy special food from Five Ring Money and Cannibal Chains.

The female guards were a team that Ye Zhongming spent all his effort to create. They ate, wore, and used the best. The members of such a team, even the ordinary six-star evolved, were terrifying.

In Xiao Min's words, they would be able to fight the strongest evolved in the world when they were together. If not, they wouldn't be able to protect Ye Zhongming.

Alamos, Wen Yan, and the others underestimated them.

Equipment, beasts, and their own strength meant they could be knocked down but not killed.

The apes were the vanguard. Not only did they fail to kill the female guards, they woke them up.

Li Lin had a bad expression, but he didn't dare to stop. Although more warriors woke up, some were still in the illusion. He was afraid they would wake up and organise a more efficient attack.

At least now, they were still in chaos.

He could only hope that the other mutated lifeforms could surprise him.

As he anticipated, the first surprise happened.

It was from the ordinary mutated doves.

The reason why such a lifeform appeared was that doves, chickens, and ducks were the easiest to get their hands on and the easiest to reproduce.

The doves were the biggest and strongest of the three and thus became best targets.

After many years of research, the mutated dove techniques became very mature. These level five fellows were a show of their highest breakthroughs.

The black apes took the lead and the mutated doves' attacks continued.

Chapter 1404: Wave of attacks

Ordinarily speaking, mutated chickens, ducks, and doves weren't common in the apocalypse. Even when all evolved were mutated, the environment wasn't good for them.

They were still things that lifeforms and humans hunted.

So, even if they appeared in groups, they were extinct in some cities.

Many people weren't familiar with them.

The doves entered their attack range when the black apes charged into the female guard's formation.

The only difference from peacetime was their bigger size. The crystal on their forehead was the only thing that showed their difference. But once they attacked, the situation changed.

Their bodies turned gold. They stretched their neck and spread their wings to turn into a gold figure that charged toward their targets.

They also gave off sharp sounds.

A simple strike showed three talent skills.

The ability that turned their bodies gold was called-- Golden Dove. It could increase their body's strength. The sound was a mental energy attack called--- Sky Song. It could cause enemies to be dizzy. That charge with its spread wings was called- Red Step. They gathered their energy into their beaks to charge.

This was their strongest attack and peak strength. After this, their species restriction reduced their attack strength. They would basically be massacred.

This was the reason why they were placed behind the apes. These mutated doves were a fierce attacking force, but they couldn't be the vanguard as they couldn't tank attacks.

The black apes hit the female guards. They woke up and counter-attacked. A few hundred of them weren't chaotic against a similar number of apes, but they didn't notice the doves behind. When their attacks arrived, the female warriors could only rely on their instincts to adapt.

The level five mutated doves were far stronger than the huge mutated apes.

Many of them were caught off guard. The female warriors who went dizzy because of Sky Song were hit, and some beaks broke their equipment. Blood surged from within their armor.

The black apes saw the situation and used their legs to step on these female warriors who fell to the ground. There were even a few that jumped and used their weight.

The female warriors that woke up could deal with numerous apes. If they found a chance, they would kill them. They were as weak as puppets. Now that the apes found a chance to fight back, they were very excited.

The few warriors were drowned by the opponent.

This situation continued. The female warriors at the front were caught off guard by the doves and fell to the ground. The apes around then attacked them.

Most of the female guards were awake, but those that weren't were being awakened by their allies. Many people noticed the situation and used their best moves to support.

The warriors behind were under less pressure than those in front. They didn't even feel any pressure at all. The black apes were blocked. They were awake and didn't panic because their allies were facing fatal attacks. They gathered together. With two battle beasts as the core and six as the support, the other warriors raised their staffs. They gave off a twisting light that gathered together and formed a white veil. It spread and turned into specks of light that entered the bodies of the six support beasts.

The support beasts gave out a light from their mouth, and they spat it into the stomach of the two beasts in the center. Two of them gave a sharp cry, and light shone. Many balls of light flew.

Like a fast pea shooter, the light balls hit the black apes. They aimed at the heads, and each one that hit exploded. No matter what level they were, they were instantly killed.

This technique fired three balls each second. Two beasts meant six were fired, and they were claiming the lives of black apes.

In a short dozens of seconds, a batch of them fell.

There were only five hundred of them. The female guards killed a portion of them previously, and this time, most of them fell. Only a hundred were struggling.

Without these apes, many warriors were able to support them. Their weapons sliced the bodies of the apes or split the mutated doves into two.

The female guards that woke up exploded. In just a minute, they turned the tides and even were in the ascendency.

“Rats!”

Xiao Min suddenly shouted. The female warriors who were saving their allies saw around two hundred white rats pouncing over. They were quick and were getting closer.

Many people used their skills. They saw the rats being around level four. They were able to kill them in one strike.

But when the attacks landed on their bodies, they did insta kill them. But an energy exploded that wrapped the entire squad.

The entire explosion was intense, and the space shook. The monitoring room screens could only see light, smoke, blood, and body parts.

Alamos and the others were on a rollercoaster. At first, they were confident in Li Lin. They then lost confidence, but now they had hope.

Those rats were explosive rats.

Each of them had a powerful bomb in their bodies.

It looked simple, but this was their killing move. A bunch of evolved with the rare Explosive User job could create life bombs. They implanted these into the mutated lifeforms and connected them to their lives. They then let them evolve, and as their levels increased, the explosion strength increased. There might only be two hundred level four rats but they could dazzle seven and eight star evolved.

The dust scattered to reveal the situation.

Chapter 1405: Damov vs Che Dongzhi

To modern people, or 99% of people, they would vomit when they saw that. But it was nothing to those who survived for four years in the apocalypse. Blood and limbs were common in the world.

Be it Alamos, Wen Yan, or Gyanendra, all of them were silent and had complicated expressions.

At the start, although their hearts sank, it was still okay. Most of the female guards fell in the final explosion. Although they won, they were badly injured. From now on, Cloud Peak's terrifying blade was only left with a handle.

Even if they didn't get the energy returns, they only used a low-level beast army. It wasn't too much of a loss.

But when the female warriors stood up one by one, their expressions got uglier.

The rats explosion didn't do much damage to the female guards. At most, it damaged the equipment on their bodies.

When the female guards stood up, Alamos and the others realised that only a few people were gone.

Those few people were at the front. Not only were they the first to be attacked, but the mutated doves and white rats also hit them. After they fell, they weren't able to stand back up.

“What is Cloud Peak?” Alamos asked Wen Yan.

He was slightly terrified of this Chinese faction.

Be it Xia Bai or this female guards, the ability they showed made Alamos worry about what they would face if their plan failed. He looked at Ye Zhongming. Could Gyanendra deal with this guy?

Wen Yan didn't reply. He knew that he didn't need to reply. Alamos was just worried. He needed to prepare for the future.

Xia Bai's revenge was limited to one person. Now that the female guards had won and left the space, he would have to face them regardless of whether Ye Zhongming died.

If Ye Zhongming died, they would want revenge against him. If Ye Zhongming were alive, they would still want revenge.

“We can change our target, that... Would have benefits.”

Wen Yan said.

The others were stunned and understood what he meant.

The first two battles targeted Cloud Peak, and they lost. The first battle was a complete defeat, and the second was also that.

The outcome was the low morale in the room.

If Gyanendra went to challenge Ye Zhongming, it was okay if he won. But if he lost...

Gyanendra said he wanted to face Ye Zhongming, but after seeing their performance, he was unsure he could win.

“Let me do it.”

Damov was the one who spoke. The guy from Russia was the one who produced the jerky.

His target was Ming City Protector Squad’s Che Dongzhi.

Everyone looked at Alamos.

The energy was lowered because of Li Lin, who had exploded because of his own rats, but it was still stable. But if Damov entered, the situation would change.

“You are...”

“Eight stars!”

Everyone heard his reply and frowned.

Only Alamos and Wen Yan were confirmed as the eight stars in this room. They didn't say it, but everyone knew.

Gyanendra dared to challenge the eight-star Ye Zhongming, so he was eight-stars, too.

No one else revealed they were eight stars.

Hearing Damov say it, everyone was shocked. Everyone in the apocalypse had their own secrets and luck.

“Okay, but you better win.”

Damov laughed when he heard that but said nothing and left the monitoring room.

Everyone looked at Che Dongzhi's room. A few subordinates and he were searching the space and wanted to find a way out.

Half a minute later, Damov's mountain-like body appeared in the space.

People in the monitoring room turned their heads and saw that the energy that dropped to 43% when Li Lin entered had now dropped to 29%.

It dropped by 14%!

No wonder Alamos's face was so bad when the energy was below 50%. So, an eight-star evolved's challenge would use so much energy! Didn't this mean the energy would be finished if they sent two more eight-star evolved?

Many evolved who didn't think much had a huge sense of danger. If they failed, not to mention if anyone could survive the space, just think about Xia Bai and the female guards waiting outside. They were enough of a problem.

"Let's watch; there is no use in thinking so much." Alamos accepted fate.

Damov and Che Dongzhi were ready.

When Damov wanted the space, he was munching on something. He tossed some colorful jerky into his mouth. After chewing twice, he swallowed it. His body became stronger as he ate the jerky.

Seconds later, Damov was done. He ripped the clothes on his body and was naked. Some white hair spread through the pores of his skin and covered his body.

He bent and opened his mouth to reveal the sharp teeth in his mouth. His body swelled, and the angle he bent was more than an elephant's.

Damov had turned into a terrifying polar bear.

Conversely, Che Dongzhi led his six guards in a 1-2-4-2 formation. Each guard member used ancient Chinese swords.

He didn't move, and a finger-thick golden snake appeared from his sleeves. After it landed on the ground, it grew bigger and instantly turned into a five-meter-long python.

This was the 9th-ranked Nether Gold Python!

But as compared to that level six, the gold python had a purple crystal and was a level seven battle beast!
