

Apocalypse 2621

Chapter 2621 Havenly Aurora! II

The unfolding reality and exchanged words that revealed a great deal of information caused a buzz to rise in the surroundings, the wills and eyes of many beings observing as the first of their kind delved into the obsidian mist past the Veil Rift as he was the first to be granted entry into whatever this Culmination Step of Dissolution was!

His entry was akin to a rousing fire that began to burn endlessly. Like the match that set off endless suns!

More and more Inheritances and Clans sent their forces forth into the myriad of Vein Rifts stretched out across the Nether Haven of Dissolution, no longer sending their weakest as some of the truly powerful Scions and Elders began to make a move!

In the Vein Rift holding the grand visage of the Haven Saber Smilodon, Aquatic Eon Dragonfly, and Lightning Titanoboa, the Temporal Field of Dissolution that Extremity Blue had gone in pulsed with a bright light as when the Tier 3 Hyperversal Extremity called Zaman was about to delve in...

[Wait.]

...!

The Zenith Tier 3 Hyperversal Extremity Haven Saber Smilodon spoke out once more as Zaman instantly halted and nodded respectfully.

[Yes, Lord Commander.]

Lord Commander.

This was what the Zenith Tier 3 Hyperversal Extremity was referred to as his voice echoed out with a sneering light when he watched the Temporal Field of Dissolution that Extremity Blue had disappeared into!

[Let her simmer in there a bit longer.]

The words of the Lord Commander Smilodon were astonishing as they showed these Havenly Beasts guarding the Vein Rift were bound by some process, and yet there was some leeway in how they acted in all this!

The actions of Extremity Blue were disliked by the Lord Commander as at this moment, her combatant did not yet enter the Temporal Field of Dissolution.

This scene was observed by many as next, yet another event that caused many wills to buzz occurred.

A veiled figure who actually emanated waves of Dissolution from the Underdwellers came forward and stepped past the transparent barrier of the Vein Rift.

It was the Adjudicator of Dissolution herself as the Lord Commander Smilodon gazed at her calmly, his voice the same as ever.

[You may gain passage so long as you are victorious.]

WAA!

Along with his words, a second Temporal Field of Dissolution opened up in this space as the head of the Lord Commander Smilodon turned towards the massive Lightning Titanoboa on the side!

[Batiatus, accompany her and observe her worth as a Zenith.]

...!

Even more explosive words affirming the stature that the Adjudicator of Dissolution had achieved thundered out as obsidian lightning of Dissolution surged, the massive Lightning Titanoboa moving from the back as it disappeared into a flash of light in the next second that entered the Temporal Field.

The veiled figure of the Adjudicator of Dissolution also didn't delay as a moment later, she also flickered and disappeared!

—

The obsidian mist obscured one's will and vision as nothing past it could be seen unless it was crossed.

It felt similar to the thick wall of Dissolution they had faced at the end of the Initiation Step of Extremity Sanctification, with Noah crossing the Mist of Dissolution speedily as he felt the spacetime continuum distort in magnificent ways!

It meant that this mist wasn't just something like a wall that after a person crossed, they would arrive at some land opposite it.

It distorted space similar to the wormholes that formed to take existences from the Planar Palisades of Extremity and into the Seven Havens as after Noah navigated multiple spatial distortions...

SAA!

He finally saw brightness.

He finally felt something new.

Behind him, an endlessly vertical obsidian Wall of Dissolution stretched up and down as ahead of him...was a fantastical sight that caused his Nine-

Pupiled Eyes to radiate profound brilliance!

First, the surroundings were heavily concentrated with tendrils of Dissolution, but Noah could also see crimson tendrils of light that he recognized as Helios, as well as white tendrils that should represent Genesis!

4 other wondrously colored tendrils intermixed in this space as it seemed like the highest concentration was Dissolution, but the minuscule authorities of the other Supernal Havens of Extremity were also here!

And ahead of him...the astonishing scene of a massive island the size of a Major Plane of Existence could be seen.

Hazy obsidian streams of Dissolution leaked from the ends of the island like a waterfall as atop it, ancient and titanic trees and vegetation rose endlessly!

In addition to this, an overabundance of auras and Lifeforms could be felt on this island as Noah saw endless variations of the Havenly Smilodon Lineage either floating between the innumerable obsidian white trees or walking on its verdant lush grasslands.

They varied in power as most were in the Boundary Expansion Realm, with Noah being able to sense thousands in the Apex Aeonic Lifeform level just on this floating island the size of a Major Plane of Existence before him!

All of this was paired with the blazing auras of four Hyperversal Extremities burning brightly on this landmass.

What was more astonishing was that further away, to Noah's left and right...

similar floating islands such as this could be seen as on the right side, light years away, the outline of another floating island holding hundreds of thousands of the Havenly Titanoboa Lineage could be seen.

To the left, yet another floating island with numerous beasts of the Havenly Dragonfly Lineage could be seen!

Far below Noah, space stretched out endlessly until his eyes met billowing and roiling obsidian mist of Dissolution, and the skies were the same as they stretched out endlessly until billowing clouds of Dissolution obscured everything.

In between...clusters of gorgeous floating islands the size of Planes of Existence were stretched out as Noah was most astonished by a phenomenon at the very peak of these islands!

There, he could see a swirling Singularity that seemed to be collecting the pure authority of Dissolution from all around.

And in addition to this, he caught something with his eyes that others may not be able to see.

He could only see it because his body was currently filled with it as he held its Innate Vitalis Hyperversal Meridians!

He could see faint traces of Vitalis Hyperversal Authority manifesting from the surroundings and mixing with Dissolution in the singularity at the very peak of these floating islands, and then streams of fantastical light washed down onto these islands to form into...wonders.

Wonders was all he could call them.

Atop the island directly before him, dense clusters of what seemed to be Aeonic Treasures of Extremity could be seen surrounded by a halo of transparent light, along with the shocking scene of Golden, Obsidian, and even a few Crimson Extremity Panaceas here and there!

Fantastical treasures and different forms of loot were clustered beautifully across the skies of the floating island, the Havenly Smilodon Lineage moving around it nonchalantly as if it were the norm!

The pristine light floating from the Singularity of the intermixing Vitalis Hyperversal Authority and Dissolution continued to drip down as even now, Noah could see halos of circular bubbles holding half forged Aeonic Treasures of Extremity- treasures that were gradually becoming complete as others like them were littered all across this glorious floating landmass.

For light years.

The scene was mind boggling as Noah's eyes felt like there was something at play here- with the dense auras of Havenly Smilodon Beasts on this island moving about freely and not plucking the treasures before their eyes causing a sense of incongruency.

But he could figure this out slowly.

As he appeared, Noah saw the eyes of many of the Havenly Smilodons turn towards his direction, along with the oppressive wills of the four Hyperversal Extremities just on this island alone.

He began to float towards them as his body began to change, lustrous black fur with cherry-colored stripes appearing on his skin as his form turned bestial.

He went on his four limbs as his head soon transformed into the savage visage of an Earth sword Smilodon carrying shocking handsomeness, a flaming black crown that emanated the aura of Dissolution rising above as below his four paws wielding sharp claws, tendrils of authority that seemed like Dissolution buzzed feely!

His status as an Absolute Hyperversal Inscrutable presence was out to use as he took on the form of an Earth Saber Smilodon, his body giving off the aura and authority of Dissolution outwardly even though he had not grasped this Havenly Concept!

Since there were Hyperversal Extremities coming for him into these lands that only had strength as king, he would find his own ways to survive as at this moment...even if Blue arrived and saw Noah right before her eyes- she wouldn't be able to recognize him with his aura, Realm, body, or anything else as he floated to mix with the Heavenly Smilodon Beasts on the massive island before him!

His speed was fast as he arrived within a nanosecond, the Earth sword Smilodons on the edge of the island looking at him with interested gazes as the moment Noah landed on the edge where luscious verdant and black grass grew, the voice of one of the Four Hyperversal Extremities within this landmass echoed out in his mind.

[The First Underdweller to arrive into our blessed Supernal Havens, and an interesting one at that to be able to mimic us so proficiently...Mmm, do you have enemies coming behind you? Well, no matter. Come, you shall have the honor of getting an introduction.]

Chapter 2622 Heavenly Aurora! III

The first Underdweller to arrive in the Supernal Haven of Dissolution!

Noah claimed this title as when he landed atop the floating landmass of pristine fantastical grandeur, the voice of a Hyperversal Extremity echoed out as he saw the verdant and obsidian grass around him make way and form a path towards the depths of the island.

The Smilodons around this area only gazed at him briefly before they went back to their prior actions- many of them lying down with their eyes closed as the aura of Dissolution formed into tendrils of light around them.

With his body as a black and cherry-colored Smilodon, Noah went deeper into the island as he began to come across more Apex Aeonic Lifeforms, passing through the groves of thick and ancient trees pulsing with Dissolution until a clearing began to open up ahead of him.

A small mountain rose within this clearing as a stream of stellar obsidian water could be seen circling around it- the small mountain divided into floors as the bodies of Apex Smilodons were sprawled all around it, with the aura of a Hyperversal Extremity Smilodon at the very peak of this small mountain!

It was the only thing in this clearing as the mountain was surrounded by heavy concentrations of Dissolution, and Noah could see that far above this region, the halos of circular bubbles holding profound Aeonis Treasures of Extremity floated majestically!

[My, I really can't tell you apart from other Smilodons...just what did you use to even fool the senses of a Hyperversal Extremity?]

The feminine voice of a Haven Saber Smilodon thundered out as it stemmed from the regal red-furred existence at the top of the small mountain.

Watching it was akin to a habitat of a pride of lions, with the eyes of the Haven Saber Smilodon locked onto Noah as a smile formed on her head!

Noah's visage was calm as he responded.

[Just a trick I came across not too long ago. You mentioned an introduction?]

An introduction. If one didn't want to stumble in these new lands, this was invaluable!

The Hyperversal Extremity before Noah did not release an aura anywhere as powerful as the three managing the Vein Rift as she seemed to be Tier 1 at most, with her serene utterance continuing to echo out at this moment.

[Mmm...you've just arrived in the Supernal Haven of Dissolution and stepped on one of its Havenly Archipelagos. One of the more common Golden Havenly Archipelagos that holds the most basic Havenly Treasures.]

...!

Havenly Treasures!

As she spoke, she pointed her paw upwards and tapped as from the glorious glimmers of light above, one of the halos of circular light surrounding a treasure floated down until it came just below the mountain in front of Noah.

[Reality may be entirely different in your Nether Haven of Dissolution, but the reality in the Supernal Havens of Extremity is one where above the Havenly Archipelagos, Havenly Authority gathers and mixes with the Authority of the Supernal Haven to produce a myriad of Havenly Treasures. And to attain them...well, why don't you take a look and try to take the one before your eyes? It is something that an Underdweller like you would need the most right now.]

WAA!

An entirely different reality.

The Havenly Saber Smilodon talked of the Havenly Authority gathering above the Havenly Archipelagos as she referred to Vitalis Hyperversal Authority, with Noah's mind putting all the information together as he floated up to the halo of light that when coming closer, one could see a dazzling black and white scroll contained within!

Noah's paws went towards the halo of light containing this black and white scroll as...

BZZT!

His hand was rebuffed.

And thereafter, streams of information surged out that for him- they transformed into gorgeous prompts.

[Insufficient Units of Havenly Aurora to acquire the Golden Aurora Accumulation Modus Operandi. 100 Units of Havenly Aurora are required.]

...!

The usage of the Units of Havenly Aurora!

Noah had attained 10 from defeating the Earth Saber Smilodons as it seemed all the Havenly Treasures atop the Archipelagos of the Supernal Haven of Dissolution required such a form of authority in order to be obtained!

[Unique, isn't it?] The voice of the Haven Saber Smilodon continued as Noah stared at the black and white scroll before him with blazing eyes.

[Reality revolves around the Units of Havenly Aurora one has as with a sufficient amount, one can even acquire Havenly Treasures that can take them to Extremity on Obsidian or Crimson Havenly Archipelagos. The bodies of the Havenly Lineages across the Supernal Havens of Extremity have slowly collected Havenly Aurora since they were born, with the Challengers that you Underdwellers are facing having been prepared as they already utilized most of their Havenly Aurora to redeem Treasures before stepping out- just in the case they lost against any of you, they wouldn't lose much of their accumulated Havenly Aurora!]

Even more dazzling words came out as a few truths became clear.

One was that it was possible to slowly build up the Havenly Aurora over time while in the Supernal Havens of Extremity.

Another was that a method to attain Havenly Aurora was to overpower and defeat another being- this in turn transferring their Units of Havenly Aurora to the victor!

And of course, there was the Golden Aurora Accumulation Modus Operandi floating in front of Noah and unattainable by him at this moment.

His eyes were fiery as he gazed at it, the voice of the Haven Saber Smilodon continuing with its smile becoming even wider.

[Ah yes, the faster way to build up Havenly Aurora. Even though it's the lowest tier of the Aurora Accumulation Modus Operandi, the Golden Aurora Accumulation Modus Operandi grants you the wisdom on how to pull Units of Havenly Aurora into your existence faster- this being the major way existences accumulate Aurora apart from Challenges!]

...!

[Challenges...you can participate in these on any Havenly Archipelago you land on as if you step on the Challenger Arena, you can battle others. So long as you win, their Havenly Aurora is yours. And the biggest introductory lesson I can give to an Underdweller like you is if you start battles anywhere else apart from Challenger Arenas and commence massacring Havenly Beasts to acquire their Aurora...you would not live long as just like you massacre others, someone more powerful will arise to do the same to you.]

Chapter 2623 Havenly Aurora! IV

Strength was king in the Supernal Havens of Extremity as they didn't have something like the Investiture of Extremity!

But this didn't mean their lands were filled with chaos as due to the Havenly Lineages spread throughout, there was actually a sense of profound harmony across the Supernal Havens of Extremity.

Those more powerful of the Havenly Lineages supported and defended their Lineages.

If a powerful Apex Aeonic Lifeform who enjoyed killing came to be as they went wild in such a venture, they would quickly be put down by a slap from a Hyperversal Extremity.

If a Tier 1 Hyperversal Extremity wanted to quickly accumulate Havenly Aurora and began massacring the lives within entire Archipelagos for it, they would soon be surrounded by Tier 2 Hyperversal Extremities and be erased out of existence!

Strength was king.

And you truly had to be strong to move fearlessly across these fantastical lands.

So when more and more beings from the Nether Haven of Dissolution arrived here and understood the means of Havenly Aurora...any chaos that might arise from it was bound to be an astounding future to look forward to.

For wild beings like Extremity Blue...how long would they be able to survive in these lands if they continued to act the way they did?

[But, that's the serious stuff out of the way. I was going to be nice and obtain this Golden Aurora Accumulation Modus Operandi for you, but your nature has made me curious as I want to see more of a display of your abilities. If you wish to keep your head start against other Underdwellers, you'll need to begin accumulating Havenly Aurora as soon as possible as why don't you...enter the Challenger Arena of this Archipelago? If you can win against other Challengers, you can obtain more Units of Havenly Aurora and gain the capability to springboard your power as you...haven't seen anything yet.]

...!

Her words were valiant as the Apex Aeonic Earth Saber Smilodons around this area pulsed with power.

The feline visage of the Haven Saber Smilodon rose with a yawn and a stretch as a heavy Hyperversal Extremity Authority of Dissolution erupted around her, covering the Smilodons here in addition to Noah as with a devilish glint in her eyes, she echoed out.

[Let's go.]

WAA!

With a glimmer of light, the Smilodons here turned into obsidian shadows that were taken deeper into this extensive Havenly Archipelago- towards a Challenger Arena that was on all such floating landmasses to designate a place for battle!

—

The Vein Rift that held the Havenly Smilodon Lineage was a rowdy one as two Temporal Fields of Dissolution pulsed with radiance at this moment!

The Challenger for the Temporal Field with Extremity Blue had entered after the purposeful delay, with time passing as nobody came out from any Temporal Field.

That is until...

SAA!

Flickers of light erupted from a certain Temporal Field as two auras were spat out!

The Tier 3 Hyperversal Extremity Smilodon known as Zaman innumerable wounds stretching across his body, and the visage of Extremity Blue...was utterly gory as half of her body was missing!

Flesh, brain matter, and skeletal structure were wiggling and trying to reform, the scene being utterly shocking for a Tier 3 Hyperversal Extremity who held something as unique as Hyperversal Haki of Extremity.

And yet...

[Haha!]

She laughed gloriously.

[8,699 Units of Havenly Aurora? What is this? How do I use it? Hmm?]

She spoke shocking words as Zaman turned his head towards the cold and apathetic Lord Commander Smilodon and bowed down respectfully before he turned into a flicker of light back into the obsidian mist!

But the words of Extremity Blue showed she had actually won as how exactly had she pulled it off?

As her musculature wriggled and tried to reform, the Lord Commander Smilodon gazed at her coldly while voicing out.

[You have come out victorious and gained entry into the Supernal Haven of Dissolution. Be mindful of your actions within as if you offend those you should not, your life is not guaranteed.]

...!

The same words that were said to Noah.

The same words applied to even powerful Tier 3 Hyperversal Extremities!

Extremity Blue's laugh faded at such words as it seemed like clarity returned to her, with her body beginning to float towards the obsidian mist in the distance as outside the Vein Rift, many beings began to clamor.

The first Hyperversal Extremity to gain entry into the unknown lands.

And she seemed to be on a hunt as many wondered what would become of the destiny of the First Underdweller to have entered the unknown lands within the Extremity Vein!

Nobody stopped her anymore as with a flicker of light, Extremity Blue disappeared into the obsidian mist.

What many didn't know was just how precious of a gain she had gotten from defeating a Tier 3 Hyperscopic Extremity Havenly Beasts.

8,699 Units of Havenly Aurora!

Tier 3 Hyperversal Extremity Celestial Creatures were immeasurably more powerful than one at the Apex Aeonic Lifeform level that Noah had defeated.

Their means of obtaining Units of Heavenly Radiance were many as the number Extremity Blue had attained was that much greater!

Within moments, space warped around her as she very soon found herself in a grand space filled with the dense authority of Dissolution.

Streams of authority of other Havens also flowed serenely as massive floating islands with their edges flowing with authority in the form of waterfalls could be seen!

The moment Extremity Blue arrived, many wills focused on her.

Her eyes were sour as she sensed over a dozen Hyperversal Extremities locking onto her, with her eyes being drawn over to the floating island directly ahead of her that held Smilodons.

She gazed at its peak with the phenomenon of a spinning singularity washing down a treasured light, as well as the auras of circular bubbles holding treasures of Extremity!

She began to float towards it with interest as her aura spread out, her voice echoing out to the Smilodons on the island before.

[You all wouldn't have happened to see a cute young man pass through here before me, would you? Dark hair, fair skin like a newborn's, and confident eyes bordering on arrogance and superiority over all others. He's my weak little hubby that needs to be protected...]

She spoke with a smile towards the Earth Saber Smilodons cultivating below, their eyes opening to gaze at her vibrant aura of a Tier 3 Hyperscopic Extremity as they only blinked calmly before they went back to their business!

Chapter 2624 Havenly Aurora! V

They...actually ignored a Tier 3 Hyperversal Extremity.

Extremity Blue was astonished at this, but she nodded soon after as she continued to feel the gazes of multiple Hyperversal Extremities on her!

Strength was king.

And the Smilodons down below knew it.

If she went on a rampage here...it was hard to say what the result would be as for now, she continued forward.

She warped to instantly appear near the dense bubbles of halos of light on the skies of the floating landmass, her authority overtaken by the abundant Aeonic Treasures of Extremity floating calmly without anyone taking them as when she reached out towards own of the more radiant halos of light...

[You have sufficient Units of Havenly Aurora to obtain the Entry Albatross of the Authority of Dissolution. Would you like to obtain it in exchange for 1,000 Units of Havenly Aurora?]

...!

Her eyes flickered with brilliance.

Entry Albatross of the Authority of Dissolution!

Something that would actually allow her to truly embark on the Concept of Dissolution that relates to the very Haven itself!

Something that made the Haven Saber Smilodon she fought nearly injure her gravely.

Her eyes flickered as her will instantly went forth, feeling the streams of authority within her reduce by 1,000 Units as the bubble of light around an entirely obsidian pulsing singularity faded as it was quickly absorbed into her body!

She closed her eyes as within a few nanoseconds...

BZZT!

A weak but profound Authority of Dissolution erupted around her body.

[Haha...]

Her eyes curved into a devilish smile as their blue radiance hungrily went on all the dazzling Halos of light next to her.

This was supposed to be the Culmination Step of Extremity Sanctification that Apex Aeonic Lifeforms reigned in under the eyes of the Underdwellers of the Seven Aeonic Havens.

And yet....

There seemed to be boundless opportunities for Hyperversal Extremities!

Extremity Blue gazed at the wonders around her as more information flowed into her mind.

[You have sufficient Units of Havenly Aurora to obtain the Golden Extremity Panacea of Dissolution. Would you like to obtain it in exchange for 100 Units of Havenly Aurora?]

[You have sufficient Units of Havenly Aurora to obtain the Golden Aurora Accumulation Modus Operandi. Would you like to obtain it in exchange for 100 Units of Havenly Aurora?]

[You have sufficient Units of Havenly Aurora to obtain the Fragment of an Armament of Extremity. Would you like to obtain it in exchange for 1,000 Units of Havenly Aurora?]

Many possibilities rose before her eyes as they were things to aid one in traversing the Layers of Dissolution and even Fragments of Armaments of Extremity!

Her bright eyes shone with destiny as she instantly spent another 100 Units of Havenly Aurora to obtain the Golden Aurora Accumulation Modus Operandi, her actions revealing a shocking truth in the future to come.

Those with more power- existences who had already achieved Extremity...

would only have a larger starting point as their power would be getting a major boost once they started going through the Havenly Archipelagos and accumulated Units of Havenly Aurora!

They would further reform their power as the heights they couldn't scale before would become possible for them now.

Extremity Blue felt the fantastical Modus Operandi flow into her mind as she learned a great deal about Havenly Aurora, her smile becoming even wider as before she could do anything else, she felt rousing movements below her.

Towards the center of the floating island, she could see massive stellar black trees surrounding a circular platform meant for battle.

The auras of Smilodons could be seen all around the branches of the thick trees as they bellowed out loudly, seemingly cheering on a finished battle as an obsidian cherry-colored Smilodon with a flaming black crown overpowered another Earth Saber Smilodon!

The phenomenon drew her attention as she instantly warped over to this location, her blazing aura drawing some eyes as the voice of a Hyperversal Extremity thundered out from above the tallest tree.

[And another victory for the Challenger! Truly marvelous...any others to accept his Challenge? He should have reached over a hundred Units of Havenly Aurora now as it's enough to buy a Havenly Treasure helpful in even crossing the Boundary Layers of Dissolution!]

The focus was egging others on as it favored battles, the figure of Extremity Blue arriving here with a smile and observing everything as even more truths of these new lands unveiled themselves.

She wanted to quickly begin searching for the one known as Osmont, this being likely already having run far away from this entry location as searching for him would be a great pain!

So she thought of familiarizing herself with these new lands first as after she arrived in the massive clearing showing a grand arena below her built from obsidian crystalline material pulsing with Dissolution, she voiced out.

[Over a hundred Units of Havenly Aurora? I just spent some as I can refill them now.]

She spoke brilliantly while gazing at the Earth Saber Smilodon with a flaming crown who had just won the battle.

And the Tier 1 Hyperversal Extremity Smilodon who had just been speaking...

sneered towards her as she let out a sharp reply.

[Fuck off to another Challenger Arena that has Tier 3 Hyperversal Extremities waiting. Why would you want to bully an Apex Smilodon just for a hundred points, Underdweller?]

...!

A Tier 1 Hyperversal Extremity spoke towards a Tier 3 Hyperversal Extremity like so.

It was enough to cause Extremity Blue to flash with a deadly light as her smile became even more gorgeous and deadly.

[My oh my...the natives of this land don't seem to have an ounce of respect towards those more powerful!]

The Earth Saber Smilodons that hadn't even reached Extremity paid her no heed.

And now, this Tier 1 Hyperversal Extremity even told her to fuck off!

In front of thousands of Apex Smilodons and while the auras of other Hyperversal Extremitied watching the surroundings too.

In response to her words, the Tier 1 Hyperversal Extremity Smilodon yawned her reply while stretching her body.

[Respect goes both ways. If you act like a dumb bitch, I'll treat you like a dumb bitch. You just won against Brother Zaman to gain entry as you're seriously injured, and he is recuperating in his domain on this very same Havenly Smilodon Archipelago. Sister Seppia with the same power as you is also on this Archipelago, with other Tier 3 Hyperversal Extremity Havenly Beasts occupying the Titanoboa Archipelagos and the Dragonfly Archipelagos nearby. If Underdwellers like you want to begin acting rowdy as soon as you arrive...well, I can only tell you to fuck around and find out.]

WAA!

The words were of utmost disrespect.

It was such a shocking reality that Extremity Blue had never faced before as when ascertaining its truth...she could only laugh!

[These new lands...are so very interesting. Alright, then can I take this Challenger Arena and see if any of the Tier 3 Hyperversal Extremitied you mentioned would want to battle?]

Her eyes still radiated wonder.

She could see the shocking importance of Havenly Aurora as she wanted more of it as quickly as possible!

She needed to ascertain how much she could acquire with the Golden Aurora Accumulation Modus Operandi, but it seemed like the path to obtaining Havenly Aurora quickly lay on fighting and obtaining it from others!

And yet towards her words...the paws of the Tier 1 Hyperversal Extremity Smilodon waved dismissively.

[This Arena is currently taking battles for Apex Aeonic Lifeforms. Go to the Titanoboa Archipelagos or Dragonfly Archipelagos, maybe they will want to entertain you. Or just proceed deeper into this Supernal Haven of Dissolution and you'll come across Obsidian and Crimson Archipelagos where Hyperversal Extremities fighting is a norm.]

...!

Extremity Blue was once again rebuffed.

She smiled dangerously as she locked her eyes with the speaking Haven Saber Smilodon, not saying anything else before she moved away from this location!

She thought of many things as she also thought about how the current situation would soon change when more beings like her entered these lands.

If someone like the Adjudicator of Dissolution were to enter and there was nothing stopping her from acting against her...

With this thought and many more in mind, Extremity Blue passed over the skies of the Havenly Smilodon Archipelago and obtained a few more radiant halos of light before she turned into a streak of blue light that shot into the distance- heading even deeper into the Supernal Haven of Dissolution!

Back in the Havenly Smilodon Archipelago she just left, the Haven Saber Smilodon gazed towards Noah's figure on the Challenger Arena below as she sent a mental message.

[What did you do to have such a spiteful woman chasing after you, hmm?]

Noah had only shown good will as wondrously, Extremity Blue appeared right before him without knowing it was him standing before her eyes- and the Haven Saber Smilodon nor any other Smilodons paid heed to Extremity Blue!

Noah got off the Challenger Arena after battling multiple Apex Smilodons who rose to take his challenge, shaking his head towards the Haven Saber Smilodon in reply as his eyes were gazing at the halos of treasured light above.

He had attained enough Units of Havenly Aurora to acquire some things!

Chapter 2625 Shocking the Havenly Smilodon Archipelago! I

Through his quality as an Absolute Hyperversal Inscrutable Existence, he expressed tendrils of Dissolution outwardly as his visage of Smilodon moved across space to float towards the Halos of blinding light!

Below him, the visage of the female Havenly Smilodon who had given him an introduction and even sent away Extremity Blue watched silently as a moment later, the aura of another Haven Saber Smilodon appeared beside her.

[Little Sister Laeta, why are you busying yourself with this Underdweller's business?]

The voice stemmed from a Tier 2 Hyperversal Extremity stronger than Laeta, and yet she harrumphed towards him while replying.

[I'm not boring like you, Senior Brother Kyle. And anyone who can veil themselves from my eyes like he is...there has to be something special! If I hadn't seen him change right before me, I wouldn't be able to tell him apart from any other Smilodon. Imagine if such a being reached Zenith Tier 3 or even crossed the threshold beyond it...just how much fun and chaos could such a being cause? I just wanted to observe him to see if I can peel his layers of uniqueness as him utilizing the Golden Aurora Accumulation Modus Operandi for the first time will reveal a bit about his Soul and Foundation.]

...!

Laeta's pulsing could already see Noah's figure appear in front of another Golden Aurora Accumulation Modus Operandi surrounded by a halo of Havenly Authority.

Beside her, her Senior Brother shook his head indifferently as he gazed at tens of thousands of Smilodons across the Havenly Smilodon Archipelago who were currently practicing the same Golden Aurora Accumulation Modus Operandi and attracting thin streams of the Havenly Authority intermixed with the Authority of the Supernal Havens themselves as they would slowly become Units of Havenly Aurora!

He spoke dismissively when he thought about the newcomer Underdweller.

[Havenly Beasts that were born within the Supernal Havens themselves and baptized by the Havenly Authority can barely accumulate 5-10 Units of Havenly Aurora daily when they first begin. The Underdwellers who have the most minuscule traces of Havenly Authority within their existence will maybe be able to accumulate half of that if not less. Asking for any surprises from a being such as this may be expecting too much...]

He stated the harsh truth and reality as all incoming Underdwellers would come to find how harsh the conditions were in these lands unless they already had sufficient power!

The First Underdweller to arrive may as well discover first as they watched Noah perceptively.

In the skies, Noah reached the blinding halo of light holding another black and white scroll as a different message appeared before his eyes!

[You have sufficient Units of Havenly Aurora to obtain the Golden Aurora Accumulation Modus Operandi. Would you like to obtain it in exchange for 100 Units of Havenly Aurora?]

121 Units of Havenly Aurora.

This was how much he was able to obtain after taking down three Apex Aeonic Smilodons in the Challenger Arena!

All three held the 16th Boundary Layer of Dissolution as their highest, with their power being something the current Noah could easily overcome as he didn't go wild in battle...yet.

He would see how many Units of Havenly Aurora could be accumulated with the Modus Operandi before him as if his ongoing theories proved to be true...

A blinding light shone in front of him as he felt the halo of light disappear, and 100 thin streams of authority left his soul at the same time as the moment the exchange was completed- the scroll turned into a glimmer of light that vanished into Noah's head!

And this glimmer of light turned into waves of information.

[Golden Aurora Accumulation Modus Operandi]:: A unique tool granted to any being within the Supernal Havens of Extremity as it isn't just a method of operation, but a key that allows the birth and growth of a Havenly Organ that is capable of isolating and drawing in minuscule concentrations of Havenly Hyperversal Authority while also mixing it with the Authority of the Supernal Havens of Extremity the being is currently in. The circulation method of operating the Havenly Organ and growing it to be capable of accumulating even more Units of Havenly Aurora faster is as follows...

...!

A grand method of circulation showed itself as the moment that the Golden Aurora Accumulation Modus Operandi entered Noah's soul- a small minuscule Singularity was born near his heart!

The beginnings of a Havenly Organ.

As Noah read its description, he couldn't help but speculate one more as the so called Havenly Hyperversal Authority he could see above the Havenly Smilodon Archipelago and the other Archipelagos truly seemed like a form of Vitalis Hyperversal Authority!

And the mixing of Vitalis Hyperversal Authority along with the Authority of the Supernal Havens of Extremity seemed to give birth to the astounding treasures floating serenely atop these floating islands as...what would happen if Noah tried to utilize a method of accumulating Units of Havenly Aurora with his body?

With his existence that held Innate Vitalis Hyperversal Meridians that had genuine Vitalis Hyperversal Authority flowing within?!

'Let's find out...'

His soul was calm as while floating in the skies, he began to follow the Golden Aurora Accumulation Modus Operandi.

The barely formed Havenly Organ near his heart that was only a minuscule Singularity...began to spin.

Around him, barely discernible thin streams of Havenly Authority authority began to materialize and draw towards him, becoming mixed with the Authority of the Supernal Haven around before it was drawn towards the Havenly Organ within Noah's body!

And before his eyes...

[.01 Units of Havenly Aurora have been accumulated.]

A small number rose.

lightsnovel.com

In the distance, the figure of the Havenly Smilodon Laeta and Hyperversal Extremity Kyle observed as the former tilted her head while the latter nodded as if it was to be expected!

[You at times expect too many things from others, Laeta-]

Hyperversal Extremity Kyle had only just begun to speak when his words stopped.

The barely visible streams of Havenly Authority and Authority of Dissolution being drawn above Noah stopped at this moment.

And Noah's body throbbed as the action of drawing in Units of Havenly Aurora through the Havenly Organ for the first time caused this organ to be formed as a part of Noah truly at this time.

And the moment this occurred, the calm and lustrous Meridians within his body came to life. His Aspects of Existence that were filled with pure and extremely powerful Vitalis Hyperversal Authority came to life!

Chapter 2626 Shocking the Havenly Smilodon Archipelago! II

His body! His soul! His Origin! His Innate Vitalis Hyperversal Meridians!

He couldn't actively control this authority even though he had undergone the First Vitalis Awakening, but at this moment, a natural reaction occurred as the Havenly Organ that was drawing in lesser forms of Vitalis Hyperversal Authority and mixing it with the Authority of Dissolution to create Units of Havenly Aurora...it felt the shockingly Pure Vitalis Hyperversal Authority spread across Noah's body as a quintessential change occurred!

Since the Havenly Organ was drawing in minuscule streams of Havenly Authority, the Vitalis Hyperversal Authority within Noah's Aspects of Existence and Innate Vitalis Hyperversal Meridians surged and instantly flowed towards the Havenly Organ.

But the organ also needed to draw the Authority of Dissolution to ultimately form Havenly Aurora.

And at this moment, it had begun to receive extremely pure Havenly Authority from the body it was in. It needed extremely pure Authority of Dissolution to balance this out and begin forming Units of Havenly Aurora as if it could not obtain such pure authority...it would have to at the very least replace this with enough volume.

And so...

The skies above the Havenly Smilodon Archipelago buzzed.

As if his body was a conduit, tendrils of the Authority of Dissolution began to draw from nearby reality en masse as within a nanosecond- a swirling storm of Dissolution had already gathered above.

It was Dissolution, along with ant streams of authority of the other Supernal Havens of Extremity that were naturally in the surroundings!

It gathered at a shockingly high speed as even more of it continued to come from the surroundings, creating an inverted obsidian mountain of authority that had its sharpest point sinking into the visage of a single being!

...!

BOOM!

An eruption of authority erupted as large volumes of the Authority of Dissolution entered Noah's body and went straight into the Havenly Organ that had shockingly Pure Vitalis Hyperversal Authority flowing in, the organ rotating like a strained engine to very quickly fuse these authorities together!

And the product of all this was a glorious one as prompts rapidly began to flash before Noah's eyes.

[+100 Units of Havenly Aurora have been accumulated!]

[+100 Units of Havenly Aurora have been accumulated!]

[+100 Units of Havenly Aurora have been accumulated!]

Prompt after prompt.

Wave after wave!

Streams of Havenly Aurora began to form en masse as the small Havenly Organ within Noah's body began to expand- and it had to do this, otherwise it would be destroyed from the sheer volumes and purity of authority it had to fuse together!

And at this point as Noah's body released pure Vitalis Hyperversal Authority automatically into the Havenly Organ, they began to feel the natural dwindling and usage of this authority as his Innate Vitalis Hyperversal Meridians pulsed.

They bellowed out with tyranny and majesty as an instant later, what the Havenly Beasts considered Havenly Authority- the authority that was gathering above the Archipelagos...pure, transparent streams of it mixed with a gorgeous white began to be drawn towards Noah until a rising transparent white storm formed below his body.

An inverted obsidian mountain of the authority of Dissolution and other Supernal Havens of Extremity above, and a transparent white mountain storm of Havenly Authority below.

They all rushed into one being's body in a phenomenon of utter incredulity- the eyes of Hyperversal Extremities Laeta and Kyle opening their eyes wide in shock as on the massive Havenly Smilodon Archipelago- the few more powerful Hyperversal Extremities began to rouse...along with the wills of Extremities from the far away Titanoboa and Dragonfly Archipelagos!

All of these eyes and Wills were directed to a single existence.

An existence that continued to experience rows of prompts thundering over his eyes amidst this glorious show of Quintessence!

[+200 Units of Havenly Aurora have been accumulated!]

[+500 Units of Havenly Aurora have been accumulated!]

[+1,000 Units of Havenly Aurora have been accumulated!]

Even greater volumes of authority were being mixed in as Havenly Aurora was produced, with the process being so glorious and violent that the Havenly Organ began to creak and fracture no matter how big it was growing to accommodate the rapid rate of Accumulation!

[The Golden Havenly Organ is being put under a great strain!]

[To prevent its apocalypse, the rate of Accumulation is being reduced.]

[+800 Units of Havenly Aurora have been accumulated!]

[+500 Units of Havenly Aurora have been...]

lightsNovel.com

[+100 Units of Havenly Aurora have been...]

The rapid churning and spinning of the Havenly Organ slowly and reduced.

The overactive Vitalis Hyperversal Authority within Noah's Aspects of Existence began to calm down as the mountains of authority outside of his body slowly became less intense!

In his body, the Havenly Organ had fractures extending all over it due to the immense level of purity of the authority it had to mix together, its spinning becoming ever so minuscule as a few final prompts flashed before Noah.

[A total of 10,000 Units of Havenly Aurora have been accumulated as the threshold of Accumulation for the Golden Havenly Organ has been reached.]

[Once the Golden Havenly Organ has been repaired and returned to its prime state within 24 Hours, a similar or higher quantity of Units of Havenly Aurora can be collected again.]

[An Obsidian or Crimson Havenly Organ will be capable of bearing the load of authority at much greater levels.]

[For the next 24 Hours, the Golden Havenly Organ will passively accumulate 1 Unit of Havenly Aurora per minute until it is fully repaired.]

...!

Clear guidelines were set as Noah almost broke a recently formed Havenly Organ.

But the results were stupendous as ridiculously, 10,000 Units of Havenly Aurora were gained within a few seconds!

And he could only attain such a number again or even greater after a day passed as his path...was bound to be filled with glory.

He opened his eyes as his surroundings returned to a level of calm, the stormy mountain of the authority of Supernal Havens of Extremity and Havenly Hyperversal Authority dispersing.

But in the surroundings...things were not as calm as they were before as heavy and powerful auras now filled the surroundings.

The visage of Extremity Laeta and Kyle floated right before Noah along with two other Haven Saber Smilodon- one of them being the one who had faced Extremity Blue in the Temporal Field!

On the right side, four massive Titanoboas floated majestically as they pulsed with Hyperversal Extremity Authority, while on the left side- four Extremity Dragonflies looked at Noah as their eyes shone with a profound light!

Stark silence descended in the surroundings as in such an environment...the visage of Laeta responded quickly as her voice thundered out.

[The Heavenly Smilodon Lineage will take him into our folds.]

Chapter 2627 Grasping Dissolution!

Noah's soul radiated brightness as around him, a Haven Saber Smilodon proclaimed that he would be taken into the gold of their lineage.

And not a moment later, a Titanoboa pulsing with back flames snorted while booming out.

[Take him on? Why don't you give that option to him? Have him choose which Lineage to join after knowing all the facts.]

On the left, yet another voice followed out thereafter as an austere Tier 3 Hyperversal Dragonfly reiterated calmly.

[And which facts will he receive that won't contain a bias towards one side or against another?]

...!

Hyperversal Extremities spoke out one after another as Noah was gazed at as something they had to enter into their folds.

And of course, they had to after witnessing what just occurred with Havenly Authority and the Authority of the Supernal Havens of Extremity!

As Hyperversal Extremities, they knew how critical Havenly Authority was.

For it to be drawn towards this existence before them at a rate that only powerful Hyperversal Extremities who were lucky enough to find an Obsidian or Crimson Aurora Accumulation Modus Operandi would be able to compare to...it meant this being had a shocking inclination to Havenly Authority!

To the extent they even wanted to ask him some questions about it.

Extremity Laeta was one of the weakest Hyperversal Extremities here being at Tier 1, and yet she harrumphed and spoke freely.

[Hmph, just look at him. Which part of him looks like a Titanoboa or Dragonfly? From where I stand, he is already a Smilodon you all are trying to poach from this Archipelago!]

WAA!

Dazzling words that caused the Hyperversal Extremities to look at each other ironically were uttered out.

They couldn't deny her words even though they knew this being before them was an Underdweller!

But before the environment became even more hectic...

[You all know what it was like when you first gained trenches of Havenly Aurora. Why don't we discuss amongst ourselves and let this young friend here explore the Havenly Treasures atop this Archipelago and the Titanoboa and Dragonfly Archipelagos as well? Decisions can be made after he is more familiar with everything.]

A deep voice of authority announced from an utterly massive Titanoboa that seemed to be at the very precipice of Tier 3 Hyperversal Extremity...Zenith just barely out of his grasp.

When others heard it, they remained silent with affirmation as they acknowledged Noah and dispersed.

Laeta was the only one that remained as she stared at Noah with beastial eyes before she stretched and floated back into the depths of the Havenly Smilodon Archipelago.

[Just remember who was the one showing you the ropes when you first arrived...]

Her words penetrated Noah's ears as his eyes emanated brightness.

They calculated the many possibilities for the future as they ultimately landed on the Halos of light floating above this Archipelago.

There were some that were absolutely crucial to obtain as his Will spread out to learn of all the Havenly Treasures here!

And every time his will passed over them, he received a message right after.

[You have sufficient Units of Havenly Aurora to obtain the Flaming Dissolution Circulation Modus Operandi. Would you like to obtain it in exchange for 1,000 Units of Havenly Aurora?]

[You have sufficient Units of Havenly Aurora to obtain the Lightning Dissolution Circulation Modus Operandi. Would you like to obtain it in exchange for 1,000 Units of Havenly Aurora?]

Methodologies on how to circulate authority in one's Aspects of Existence that caused the fantastical effects of flames of Dissolution or obsidian lightning of Dissolution pulsing around the bodies of the Havenly Beasts.

But with his Quintessential Breath of Extremity Modus Operandi, Noah didn't need any of these as he could at most purchase them as reference materials!

His eyes and will continued to wave outwards.

[You have sufficient Units of Havenly Aurora to obtain the Fragment of an Armament of Extremity. Would you like to obtain it in exchange for 1,000 Units of Havenly Aurora?]

[You have sufficient Units of Havenly Aurora to obtain the Entry Albatross of Armament of Extremity. Would you like to obtain it in exchange for 1,000 Units of Havenly Aurora?]

[You have sufficient Units of Havenly Aurora to obtain the Entry Albatross of the Authority of Dissolution. Would you like to obtain it in exchange for 1,000 Units of Havenly Aurora?]

[You have sufficient Units of Havenly Aurora to obtain the Golden Extremity Panacea of Dissolution. Would you like to obtain it in exchange for 100 Units of Havenly Aurora?]

lightsNovel.com

...!

The things his soul sought for showed themselves.

Something as fantastical as a Fragment of an Armament of Extremity...and an Entry Albatross that gave him access to truly step on Dissolution!

There was even a Golden Extremity Panacea of Dissolution to aid one across the Boundary Layers of Dissolution!

His will was sent out.

And soon after, two Halos popped and faded away as a blinding singularity shot into Noah's head from the distance, while an obsidian flower decorated with stellar black gems that seemed to contain whole realities within it landed on his hands.

The first one was an Entry Albatross of the Authority of Dissolution as the unfinished runic ecriture of [DISSOLUTION] in his soul lit up gorgeous while the rest of the letters began to be completed!

And when the [N] in Dissolution fully materialized...

The heavy concentration of Dissolution in the surroundings seethed again.

Noah sucked the potent Authority of Dissolution nearby as if he was a black hole, a glorious prompt unfolding before him soon after.

[The 1st Havenly Boundary Layer of Dissolution has been attained.]

[An authority connecting to the very Vitalis Havens of Extremity!]

[The Authority of Dissolution has been subtly altered by Quintessence.]

[The Authority of Dissolution is termed a Havenly Boundary due to its nature as elevating it is of utmost difficulty, but attaining Hyperversal Extremity of Dissolution or any Havenly Boundary will allow one to move unhindered within said Haven.]

Waves of information thundered down as yet another glorious concept was anchored to his soul.

The more unique thing in all of this...was the fact that he held Quintessence.

Quintessence had ever so subtly changed Dissolution as in addition to this...

Quintessence deemed that all of Noah's Boundaries would be taken to the 9th Boundary Layer automatically the moment they were expanded towards Extremity!

And so, even though it was stated that proceeding across the Layers of Dissolution was so very difficult...

[The 2nd Havenly Boundary Layer of Dissolution has been attained.]

[The 3rd Havenly Boundary Layer of Dissolution has been attained.]

Chapter 2628 A Weapon Against Hyperversal Extremities!

[The First Havenly Boundary Layer of Dissolution]:: While moving under any Vitalis Havens of Extremity, all of your statistical values are increased by 25%. When moving outside the scope of all Vitalis Havens of Extremity, all of your statistical values are increased by 50%.

The Boundary Layers of Dissolution were unique ones as they reveal some truly critical information on these types of Boundaries.

Noah received its information and continued forward as he put his standing as an Absolute Hyperversal Inscrutable Existence to use and reduced any ridiculous flashiness around him- with him steadily controlling the waves of Dissolution coming inside his existence as all it was spread out across his soul, all the way back to his Main Body!

His Main Body.

It remained in the constantly changing and expanding Infinite Hyperversal Haven that had just swallowed up the Noblesse Planes of Existence that were brought to heel under Henry, Aurelia, Orion, and his other Vassals.

While his Reified Wealdian Source of Indefatigable had entered the Supernal Haven of Dissolution, his Main Body was moving in the Infinite Hyperversal Haven to do something just as critical!

—

Pulses of Dissolution went on on the fair hands of his Main Body in the Infinite Hyperversal Haven, his body being warped across great distances to arrive in the ever-expanding Prana Aletheian Haven at this moment.

Many changes were being quantified in regards to him, as well as all the wonders that the 15th and 16th Boundary Layers of his most important Boundaries brought forth.

Manadynamics was particularly domineering as its 16th Boundary Layer caused his resource regeneration rate to become utterly obscene!

[The Sixteenth Boundary Layer of Manadynamics]:: As you approach Extremity, understanding the workings of Mana becomes utterly crucial as your Reality Passages, Quintessential Breath of Extremity, Heart, Foundation, and All Aspects of Your Existence now flow in harmony to grant you the most pristine flow of energy. You can now regenerate 100% of all Quintessential Hyperversal Values in 60 Seconds, with any abilities requiring the usage of Quintessential Hyperversal Soul Values having 98% of their cost initially paid for by your Quintessential Hyperversal Mana Values. Be prepared, for you know what the endgame is...

A glorious description that quantified part of his wonders.

And the last sentence of this description was addressed to Noah by the very concept of Manadynamics itself!

For him to be prepared as he knew what the endgame was.

'The endgame...' Noah smiled as he felt his endless reserves of Mana and what this description would be alluding to.

He then gazed around as he arrived at his target location, his eyes feasting at the sight of Seven Quintessential Undead Thanatos Vassals who seemed to have at their base- the Seven Chthonian Sinners of Thanatos!

Currently, two existences were bickering while floating on a verdant crystalline landmass full of life- so absorbed that they barely noticed Noah approaching with his closed off aura.

One had golden hair flowing freely, his fair face showing annoyance at this time as his lab coat fluttered in the wind.

"The balance towards death has already been tilted too much by you. I say the next phase is to fuse parts of or all of an Ender of Extremity into these 7 Champions of Thanatos. That may complete them to an even greater state..."

Dr. Hall spoke fearlessly as the one standing beside him was a dazzling Haven Lich Ra'Zan who currently adorned an obsidian black lab coat, his skull radiating deadly green flames as he also spoke with annoyance!

[I've kept a delicate balance of life and death so far with the inclusion of a Prana Aletheian Vessel in their Souls, completing them would require a deathly counterpart...maybe the corpse of a Hyperversal Extremity, or-]

In the midst of his words, the Haven Lich stopped and turned around as his flaming sockets came to land on Noah.

[Ah...Master. I apologize for not noticing your arrival sooner. How may this humble skeleton be of assistance?]

The Haven Lich Ra'Zan bowed down as beside him, Dr. Hall did the same while calling out towards Noah!

"At ease," Noah held a smile as he appreciated the massive Champions of Thanatos these two beings before him had been working on, having the Quintessential Absolute Thanatos Dynamis of Extremity at their core as with his rising strength, they had evolved to become even grander as well.

"I'm here for another project today. You'll be working with the Wealdian Council of Extremity to come up with...a virus, a plaque, a disease...any form of something that will be capable of infecting a Hyperversal Extremity along with their Recorded Histories in the Aeonic Annals of Extremity that will ultimately lead to their demise."

WAA!

Shocking words emanated from him from behind, the Wealdian Sources of Vitalistic, Thanatos, Aletheian, and Lotra appeared grandly- the only ones not joining being Indefatigable and Oraculum as they went about their own business!

Four of the 6 Council Members of the Wealdian Council of Extremity.

They arrived here as Noah was looking for a way to combat Hyperversal Extremities that were hunting him down!

The barrier between those who had attained Extremity and those who hadn't was absolute.

Billions of Apex Aeonic Lifeforms could group up against a single Tier 1 Hyperversal Extremity, and they still wouldn't be able to kill such a being!

The line of demarcation between Extremity was just that vast.

Noah would also not be able to threaten an Extremity for the next few days or even possibly weeks as when he gazed at the possible Unrecorded Histories to come through Oraculum, he saw no signs of Extremity in the short term!

lightsNovel.com

Yet he was being chased now.

But even if he could not fight against Extremities in a straightforward manner, he saw a possibility of fighting them in an underhanded manner!

At the core of this possible plan was something he couldn't readily manipulate yet.

Yet a change that had occurred in the last few minutes had triggered the opportunities for Noah as he gathered the different parts of his Soul as well as entities like Dr. Hall and the Haven Lich to design a virus!

He would bring any other worthy Vassals into this project if need be, but he already gave this project of enacting a virus capable of infecting Hyperversal Extremities a time limit of a day!

The key to this 'virus' he was imagining lay in Vitalis Hyperversal Authority.

Something Hyperversal Authorities desperately sought for. Something utilized in the formation of Units of Havenly Aurora!

He already theorized that due to its abundance and more open entry in the Supernal Havens of Extremity, there were likely Hyperversal Extremities that had undergone the First Vitalis Awakening if not even grander opportunities within the Supernal Havens of Extremity.

But among the Underdwellers, this number should be extremely few in ratio to the vast numbers of Hyperversal Extremities out there.

His enemies- beings like Extremity Blue, had not yet undergone any sort of Awakening.

Such a being would be extremely perceptive to a virus or poison carried by Vitalis Hyperversal Authority as their very souls sought for this authority.

And when using the Golden Aurora Accumulation Modus Operandi...this authority would be attracted into one's soul along with the authority of the Supernal Haven they were in!

Herein lay Noah's access.

Herein lay the possibilities!

Chapter 2629 Eons of Change! I

The goal was clear.

The Wealdian Council of Extremity was convened!

The Haven Lich Ra'Zan adopted an expression of extreme happiness as the Thanatos Quintessential Absolute Dynamis of Extremity buzzed around with glory.

[We can already alter the very Records of those who have perished through Thanatos...we just have to apply this to living when creating whatever Master is envisioning! Thereafter...Ka Ka Ka!]

Heavy cackling reverberated out as a flood of authority bloomed.

Noah smiled while waving his hands and causing the concentration of authority in the surroundings to rise to alarming levels, his voice ringing out...

"The crucial thing to grasp in all this is Vitalis Hyperversal Authority, and how it can be weaponized..."

The project was led by his main body as along with the Wealdian Council of Extremity, Dr. Hall, and the Haven Lich Ra'Zan...Noah sought a weapon against Extremities before he grasped any concept even close to it!

—

Within the Nether Haven of Dissolution.

The number of Apex Aeonic Lifeforms and Hyperversal Extremities had grown exponentially since the appearance of the Vein Rifts and the shocking changes all throughout the Seven Aeonic Havens.

But the center point remained as countless beings converged here!

Those of the Seven Clans.

Those of the Major Inheritances.

They all made their way over as they could feel...that the Culmination Step of the Last Extremity Sanctification was going to be one that made them experience the changing of eons.

The changing of the very nature and structure of the Seven Havens as after this, it would not be the same!

And at this moment...

HOONG!

A blaring horn reverberated out as if it were announcing the arrival of grand existences, with space twisting a violet light permeated across innumerable light years!

And soon after, a massive vessel the size of a Major Plane of Existence appeared as it looked like an inverted pyramid, its sharp end pulsing with tendrils of violet light as its structure seemed to be forged from the hardest Aeonic Metal.

It was a vessel known as the Courier of Senatus.

It was rarely utilized, but when it was...it represented the power of the Senatus of Extremity making a move!

The Senatus of Extremity that held existences standing above allegiances, Clans, or Inheritances!

The governing body of the Seven Aeonic Havens of Extremity.

At the top of the Courier of Senatus, the presence of a few billion existences could be felt as at the very forefront, the auras of at least one hundred thousand Hyperversal Extremities could be felt.

One hundred thousand!

The vast majority were of the Tier 1 Hyperversal Extremity level as only a few thousand were of Tier 3, but the sheer numbers were enough to give one a glimpse of the power accumulated within the Senatus of Extremity over the eons.

The Millions of Apex Aeonic Lifeforms who had survived since the First Extremity Sanctification to now.

Many had died over the years as they defended their borders against Vacuous Malignancies, but many more lived as the power expressed on the Courier of Senatus...was not every single Apex Aeonic Lifeform and Hyperversal Extremities under their banner.

This number was what the Senatus deemed sufficient to explore and take the reins of the occurring changes they had known were coming, but it was hard to say whether they knew just how drastic the changes were!

If groups like the Curagulus of Extremity could learn the words [As above, so below], what about the Senatus of Extremity? Just to what extent did they know or have any control over what was currently unfolding?

Atop the Courier of Senatus.

The few billion Apex Aeonic Lifeforms and One hundred thousand Hyperversal Extremities were all adorned in radiant violet robes inlaid with golden lines- the symbol of the inverted pyramid present on the left side of all robes.

For the Apex Aeonic Lifeforms, the inverted pyramid on the robes held an ecriture of [0].

Tier 1 Hyperversal Extremities adorned robes with an ecriture of [I], with Tier 2 Hyperversal Extremities holding an ecriture of [II] on their violet robes and so forth!

At the very forefront of the Courier of Senatus, past the lines of tens of thousands of Hyperversal Extremities, there were a few that stood at the very forefront and stared at the far away Vein Rifts.

Their bodies gave off a stifling pressure of immensity as these beings...had exceeded the Zenith Tier 3 Hyperversal Extremity stage.

They had to at the very least be Tier 4 Hyperversal Extremities!

And yet the violet robes they adorned...did not have any markings on their etched pyramids.

There were 9 of such beings as a golden-haired man in the middle gazed out into the Vein Rifts while speaking calmly.

[What has been learnt so far?]

His question was laid out in the open, but the voice of a Zenith Tier 3 Hyperversal Extremity behind him emanated out serenely.

[The contribution goes to the Avernus Clan for this information as one of theirs has already entered. But the theory of entirely separate Havens within the Extremity Vein has been confirmed, with the first things that one can come across being things like Entry Albatross of the Authority of Dissolution- capable of being obtained for a cost.]

[Oh?]

The words of the serene voice raised a few brows as a tan woman on the right side of the 9 existences exceeding Zenith Tier 3 Hyperversal Extremity spoke out sharply!

[The Treasures of Extremity that have been appearing in the Extremity Step of the previous Havens are freely available at the Culmination Step here?]

...!

Things like the Entry Albatross of the Authority of different Havens were obtained by them before in the previous processes of Extremity Sanctification.

Otherwise, how would beings like the Adjudicator of Dissolution wield the Authority of Dissolution? Or the other 6 Adjudicators of their own Havens wield the authority of the Land they were supposed to oversee?

The words of these existences revealed many things the Courier of Senatus approached closer and closer, some clustered Inheritances moving away as many stared towards them with a combination of calm and fear.

This was how prominent and assertive they were across the Seven Aeonic Havens!

Chapter 2630 Eons of Change! II

When the massive Courier of Senatus neared close to the Vein Rifts ahead of them, the figure of the golden-haired man flashed forward as he only took a few steps to instantly appear past the transparent barrier of a Vein Rift that held three Tier 3 Heavenly Siren Beasts and their Legions behind them!

The three Heavenly Beasts became stern at the appearance of this existence before them, their fishlike lower bodies smashing their tails down as their gorgeous humanoid upper bodies veered away- the Legions behind them splitting left and right as they made a path.

...!

It was a shocking phenomenon observed by others as this was the first time that the phrase [You may gain passage so long as you are victorious] was not repeated when an existence approached!

Instead...

[The stage of power you have attained grants you free entry.]

...!

The sonorous voice of the Heavenly Siren echoed out with glory.

Beings that had exceeded Zenith Tier 3 Hyperversal Extremity did not need to prove themselves.

The stage of power they had achieved was enough of a deal of approval in itself!

The gaze of the golden-haired man was placid at this development as he waved his hands behind him.

And an instant later, tens of Tier 3 Hyperversal Extremities surged forward and appeared behind him, seemingly ready to traverse with him into the misty fog in the distance!

Their appearance caused the expressions of the Tier 3 Heavenly Sirens to turn cold as before they could say anything...

[How many?]

WAA!

He didn't ask whether they would allow it or not.

His question was so tyrannical that he already made it known that he would be coming with those behind him, and he simply asked for the limit on the number!

[...]

The gazes of the Heavenly Sirens were sharp as the Zenith Tier 3 Hyperversal Extremity at the very forefront spoke out for all to hear.

[An existence exceeding Zenith Tier 3 Hyperversal Extremity may at most take 100 other Existences to enter with him. That is the extent their authority can cover.]

...!

The tyranny of Tier 4 Hyperversal Extremities was seemingly accounted for as for them, many rules were bent!

The golden-haired personage at the very forefront nodded as he began stepping forward, 100 Tier 3 Hyperversal Extremities following his path as very quickly, they disappeared into the obsidian mist as they would find themselves near the Heavenly Siren Archipelagos!

Outside of the Vein Rifts, others were shocked at the new development as on the Courier of Senatus, the tan woman whose skin shone with a caramel stellar luster smiled as she also began to float towards a Vein Rift.

[Esteemed Thadeus has gone ahead as the rest of you must follow. For those who have to fight for entry...defeat is not an option!]

Her words were directed to the masses of Existences atop the Courier of Senatus, her figure stepping into a Vein Rift and coming across the same treatment as she also waved her hands to select a chosen 100 Tier 3 Hyperversal Extremities that disappeared along with her into the obsidian mist!

The myriad of Inheritances and Clans watched this scene playing out with brilliant eyes as at this moment, all Vein Rifts had multiple beings seeking entry.

One of the more quiet ones held a single Temporal Field of Dissolution that pulsed at this moment, the visage of a massive Titanoboa and the Adjudicator of Dissolution stepping out of it!

The veil on the Adjudicator of Dissolution remained calm as not a shred of evidence of battle could be seen on her, with the massive Titanoboa only nodding slightly towards the Lord Commander Smilodon as even though its massive obsidian scales were just as pristine, one could sense the aura around it being turbid and unstable.

The Adjudicator of Dissolution gazed around with her Will, observing the recent developments as after a few seconds, her figure disappeared into the obsidian mist ahead!

She had made her preparations already as her main body delved into the Supernal Havens of Extremity, her Hyperversal Extremity Clone would remain in the Haven she was leaving as her role...had never ended.

—

Within the Supernal Haven of Dissolution.

In the Havenly Smilodon Archipelago.

com

[How does a Havenly Boundary feel compared to the concepts you've expanded before?]

The voice of the Tier 1 Hyperversal Extremity Laeta rang out as Noah opened his eyes and gazed at the genuine authority of Dissolution around his body.

It had achieved the 9th Boundary Layer through Quintessence as now...his visage of Alexander would place it in his Meridians for it to enjoy the ridiculous boon of matching the highest boundary layer that Noah had achieved!

As he felt how pronounced and different it was compared to other Concepts of Extremity, his reply to Extremity Laeta was mild.

"It's so so..."

[It's so so...hmp, come. They allowed me to be the one to tell you more about the Supernal Havens of Extremity and what a being like you fits into all this before you make a decision on where to go.]

As she spoke, Hyperversal Extremity Authority erupted around to encircle their figures- both of them being taken to the depths of the Havenly Smilodon Archipelago!

Not too far from the Archipelago, in front of an endlessly massive obsidian misty wall...the figure of the Adjudicator of Dissolution just so happened to emerge at this time as the auras of many turned towards her- Noah's will also only gazing briefly before he arrived at the depths of the Havenly Smilodon Archipelago.

[Mmm, a Zenith...the big dogs are beginning to come in it seems.]

Laeta spoke with a smile as they went past groves of ancient trees and passed through a veiled barrier, the reality around them changing as they seemed to have entered the depths of the Archipelago!

The massive trees disappeared around them as they appeared in a stellar enclosed domain shining with obsidian Singularities like stars all around, with a huge cylindrical architecture made of obsidian crystals pulsing with Dissolution floating at the very center.

On this massive structure, the auras of the Hyperversal Extremities within the Havenly Smilodon Archipelago could be felt as the figures of Laeta and Noah entered one of the many floors of this grand building- Noah observing pools of golden liquified treasure light on the four ends of this floor as in the center, a long rectangular table holding a dense cluster of Aeonic Treasures of Extremity in the form of ecstatic fruits and herbs overflowed.

Thrones were laid out around this grand table as the feline figure of Laeta began to change at this moment, her visage turning curvaceous and humanoid as a black dress came to drape over her.

Dazzling inky black hair flowed to her shoulders and endlessly black pupils smiled towards Noah as she went to sit on one of the thrones around the grand table.

[Even a Zenith's will can't enter in here. Come, be comfortable.]

At her words, Noah's figure also changed to become humanoid, though his face carried distinct changes as he seemed like a sharp genius of some faction!

Laeta pursed her lips at this as she reached out to grab grapes pulsing with tendrils of Dissolution around them.

[Not your original devilishly handsome face huh...too bad. Have a seat, and let me tell you about the Supernal Havens of Extremity.]

WAA!

Her dark eyes radiated an enticing majesty as she plucked the grapes before her, Noah sitting on an opposing throne naturally as he gazed at this Tier 1 Hyperversal Extremity who continued with a smile.

[First, one of the crucial points every Underdweller needs to quickly grasp is that in these Supernal Havens of Extremity, Havenly Aurora is everything.]

...!

Havenly Aurora was everything. Vitalis Hyperversal Authority mixed with the Authorities of the Supernal Havens was everything!

[Units of Havenly Aurora are a currency and a commodity- with the Naturally Formed Havenly Treasures you've seen in this Golden Havenly Archipelago...

being only the tip of the iceberg. In Obsidian and Crimson Havenly Archipelagos, there are things that individuals cannot acquire even if they accumulate Havenly Aurora for their whole lifetime- Hyperversal Havenly Treasures costing millions and Billions of Units of Havenly Aurora to acquire!]

WAA!

[There are Havenly Archipelagos one cannot even near unless they have a backing. Unless they are a part of the Four Hyperversal Havenly Extremity Lineages. And herein lies your conundrum...my dear Underdweller Anomaly.]
