

## ARCEUS' PIRATE JOURNEY

### Chapter 10: That's my dear old man, I have to pay more

Chapter 10 That is my dear old senior, I have to pay more

"You were also a member of that research institute in the past. You should know how those slates came from, right?"

"I know, one of them was sent with these two guys, and the other was sent by the World Government after Vega Punk reached a cooperation with the government. I don't know the details, but it should be from Lunalia. obtained from the clan."

The information is completely correct. The Fireball Slate was originally lent to the patriarch of the Lunaria clan, and it is not surprising that he fell into the hands of the government after his defeat.

The normal-type clearance slate was always carried by Shaina.

"Does the government have any other slates?"

"How can I possibly know this kind of thing, I didn't know there were so many of these things before, but from the words of those people, they seem to think that there are more than two pieces of this kind of slate, and another piece should be in the hands of the World Government. ."

Quinn was not too sure, after all, this was just an inference, but Arceus felt that there was nothing wrong with his inference. There was a slate that was lost on the way of the Lunaria people's escape, and that also fell into the hands of the World Government. Strange.

"They seem to have studied this kind of slate, but the definition they come up with is just an indestructible slate, which they think holds great power and can unconsciously affect the surrounding environment.

Those people let Vega Punk try to control the power in the slate, but he has no clue. "

This is a normal thing. Arceus is the only owner of the slate. The slate may affect the surrounding environment unconsciously, but without his advice, no one can use the power of the slate.

"Oh, yes, the researcher has also tried to make a device to search for slate, but this proposal was finally abandoned. Those slates are like ordinary stones in the research institute, and there is no special ingredient in them."

The principle of        and metal detectors is that the person believes that there is a special component in the slate, and as long as an instrument to analyze this component is manufactured, this slate can be found in a wide range.

But the problem is that the slate has never dropped any dross anyway, so there is no possibility of implementation at all.

It can't be destroyed or analyzed. Some people proposed to use it to make armor, but it was rejected. According to previous events, Lunaria and the slate may have a special relationship, so they sent the fireball slate to this place to try. .

"I remembered, I saw a similar thing when I was on the Rocks ship."

Human potential will be stimulated under special circumstances. Originally, Kaido didn't have much impression of this slate, but the ability to create phantom beasts made his heart unceasingly. The technology is exclusive to Arceus, so he naturally found a way Find those slates.

Through his memories, he finally remembered why he felt familiar. Back then, there were a lot of treasures in the treasure house of the Rocks Pirates, and gold and silver were just the most common things.

Devil Fruit, a rare mineral, which Lox grabbed from all over the world, including those from the Dragons, there is such a slate to pad the bottom of the box.

"Rocks?"

"Well, Rocks D. Gibek, the pirate group I used to be in, the Rocks guy is a real monster, and he has the ambition to become the king of the world, but five years ago in the Valley of the Gods, that big battle Let the Rox Pirates be completely destroyed, and the remaining people will go their separate ways."

The Rocks Pirates, the true sea overlords, whether they are captains or crew members, are all famous characters. The young Whitebeard, Golden Lion, Charlotte Lingling, and Kaido were all part of the ship. member.

Kaido is even a trainee on this ship.

However, unlike the adventurers who gathered because of their dreams, this is a violent group that was forcibly united on the premise of Rox's absolute strength.

The people on the boat are already in their own way, and when the situation is not good, they naturally go their separate ways.

At this time, the Battle of the Valley of the Gods had ended for only five years, although Inlox's "heinous crime" was wiped from the world and history by the World Government, and propaganda about this person was prohibited.

But the time is too short, there are still many people who know this person, and it will be a few years before Rox will gradually be forgotten.

What's more, Kaido is an experienter of things, and he won't listen to the government's words. He has no scruples when it comes to Lox.

Of course, the experience on the Rocks ship was not important, so he omitted it.

"Since the Rocks Pirates are gone, where does that slate go, in the Valley of the Gods?"

"No, the so-called Valley of the Gods has long since disappeared from the sea, and there is nothing there. As I said, the people on the boat were all pregnant, some died, some were arrested, but many people fled there.

The one who likes treasure the most on the ship is John. If nothing else, everything on the ship should have been taken away by John. "

"Where is he now?"

"I don't know, but it won't be difficult for such a person to find his position, but it's not easy to do if he finds it. With his character that values treasures, it's impossible to take things away. I'm afraid it will take a fight. Row.

But that's the old man on the ship I used to be on, so it's not very convenient to get started. "

"Why, are the pirates so moralistic? Didn't you say that the crew members of Rox gather together for their own interests, and that internal fighting is commonplace?"

Kaido is good to his own people and has a very high tolerance. The premise is that this person has enough strength to be valued by Kaido. Arceus is obviously the one that Kaido values most and wants to recruit the most. He has the ability Kaido dreams of. .

But he didn't believe that Kaido had anything to remember about John.

"I don't have a good relationship with him. I mean, that guy is not easy to deal with. Although it won't be too difficult to find him, it will take a lot of time and money."

Five years ago, he was still a trainee of the Rox Pirates, but today is different. Five years later, he is no longer the same as he used to be.

He didn't owe John anything, so of course he had to maximize John's value at this time.

Kaido didn't ask for anything more, but he proposed to pay the "remuneration" in advance this time, and he couldn't wait.

"It's not impossible, Quinn, come here." He wanted to use Quinn to try more abilities, and now he just gave Kaido a little more sweetness.

And there was no one else around except to watch Quinn. The same force poured into Quinn's body, consuming less than Shaina and more than Jhin, in a compromise position.

Quinn is a ruthless man who can make strange transformations of himself. This kind of thing is not contradictory, but when he used his ability later, he found that a bunch of bananas grew on his chin.
