

Arceus 26

Chapter 26 What if he has murloc blood

He hid more treasures in places that only he knew. He also knew very well that he had few people he could trust. They all had their own ambitions. will burst out.

It took five years for John to find the clues to the Lox treasure, and he went to Hackinos to search for a crucial clue.

That's all that Priart knew. He only knew that John had got a clue, because John had explained to him a lot of knowledge that he only knew in order to allow Priart to disguise himself better.

Priart copied his own abilities. Ordinary pirates are not his opponents. The powerful monsters are basically in the new world. It will take a lot of time to return to the South China Sea from the new world even if they can fly.

And the average big pirate will inevitably throw the rat, and it is impossible to fight him directly. It would be a good thing for him to be attracted by Priart.

Only those who were also on the Rocks ship at the time could discover this drawback, but those people were all in the new world, and there were people by his side, he never thought that there would be an anomaly like Kaido who happened to be in the South China Sea.

"Well, the news is almost right, Quinn, get rid of him."

"?! Wait, I didn't lie, I told you all! Why is this?! Didn't I just let me go?"

"When did you have this hallucination? Even when Jhin tortured you, he didn't say that." Kaido said disdainfully, although there would be a door, but this kind of door stopped it at all. Can not see the hearing enhanced by color.

"Wait, wait, I can be your undercover agent"

"Forget it, you can't be trusted at all, and you're too weak, I'm not interested in people like you, Quinn, throw him into the sea."

Sinking into the sea is basically a sentence of death for those with fruit ability. Ordinary people have to tie a stone to the sea to bind their hands and feet, but for those with ability, even this step can be omitted directly.

After sinking into the sea they will automatically enter a state of weakness and will not be able to swim.

But when Quinn was going to throw him into the sea, he happened to meet Arceus who was going to see the situation.

"what are you going to do?" *n0Ve1Usb.c0m*

"He's useless, and all the information he knows has been released. Brother Kai asked me to deal with him."

"So you're going to throw it directly into the sea?"

"Ah, he's a capable one, isn't that very simple."

"How can you do this."

Arceus's words gave Priart a burst of hope, but Arceus's next words shattered his hopes.

"What if he has murloc blood and can breathe underwater, what if he happens to be swallowed by some big fish and then caught by someone, since we have to deal with people, we should deal with them cleanly, and then throw them away after they are sure of death. ."

It is a big taboo to kill the mouth and not make up the knife, not to mention that this is a senior second or fifth boy. What happened on Khaqila Island is not in line with his three views. He is not interested in the life and death of Priert at all, just let Quinn clean his hands and feet. .

The result didn't change, just some steps were added, such as cutting off the head before throwing it into the sea.

After that, Arceus also took a look at the few fruits in the kitchen. After the fruit person dies, this fruit will be randomly reborn in a corner of the world. If you are lucky, then this fruit is likely to be reborn in nearby.

Maybe he can get a randomly generated magical backpack too, but it turns out that no one on this ship has such luck.

The fruits were still the same, but looking at these fruits, Arceus suddenly had a question.

Just then Quinn came over and picked up an apple. In order to make a more delicious banana after a while, he increased the intake of fruit.

"Quinn, Devil Fruits will randomly attach to other fruits, right?"

"That's right, what's the problem?"

"You said that an able person, when eating a fruit, happens to have a mutation in the fruit, and he accidentally bites it and the juice flows into his mouth, what will happen?"

It's no secret that eating two Devil Fruits will make people explode, it's not a secret that the fruits will respawn randomly, but when these two things are put together, it's a bit scary.

Although the chances are slim, it is not impossible. Looking at the fruit in his hand, Quinn suddenly hesitated.

Then he picked up the knife and cut the fruit first. Even if the fruit was reborn, it would only be reborn on the complete fruit, so it was safe. From now on, even if you eat grapes Quinn, you have to cut the grapes. Made a whole bunch of straight-to-eat things.

Now they have the direction of sailing, but a new problem has arisen. The life card can indicate the direction and even display the owner's health status, but there is no way to display the distance.

They didn't know how long it would take to find John.

Priort just said that John was in the first half of the Great Route now, and John didn't tell him the exact location at all.

But after all, there is a direction, and this patrol ship continues to sail towards the great route.

Two days later, the team dispatched by the Navy Headquarters completely blocked the sea area near Khaqila Island and gradually reduced the encirclement. The reason why it wasted so long was to expand the encirclement.

These assembled pirates had no power to fight back against the elite fleet of the headquarters, and were completely wiped out in a very short period of time. Because of Kaido's overlordship at the beginning, most people did not know what happened.

A few of them couldn't explain the situation, and only saw a giant dragon, and the culprit, John, was nowhere to be seen.

But the news from the navy is that the navy has won a great victory, and John fled. Today, when the navy face is being provoked, they must have a news of victory.

A large number of pirates are escorted to various prisons. There are many pirates here who are not even qualified to enter Impelton. Today's Zefa is still the general who "doesn't kill". many.

Spandain was the first to know the news, and Priert's loss of contact made him think that the other party ran away with John. Under his operation, a group of agents began to look for each other's traces.

At this time, Arceus and his party were staying near an island. Quinn dismantled the original boat and remodeled the naval patrol ship. They were about to reach the windless zone, where they wanted to sail by sail. It's impossible, so he's adding new powerplants like outer wheels to the boat.

And Arceus looked at the vast sea of the windless zone, where there was a feeling that made him throb, and it was still moving.
