

Arceus 261

Chapter 261 Family Tour of Shampoo

Although it takes a lot of time to go to that position, the impact is not very big in essence. After all, the training of Kaido and Arceus is carried out alternately. Kaido's entertaining and entertaining makes him have a lot of fun, and the training results are still good. Can.

For example, after the rock slate returned to his body, he also came up with some new tricks, using rocks as muscles, plants as meridian bones, and a group of rock-made dummies standing in front of Yamato.

Under the control of Arceus, these rock soldiers attacked Yamato directly as if they were alive. This is a brand new training ground he prepared for Yamato and others, which he called the Eight Arrays of Stone Soldiers.

is an upgraded version of Battle Royale. They have to travel through the maze made of rocks, knock down rock soldiers that may appear at any time, and reach the exit within the specified time.

There may also be various organs, including but not limited to knots, invisible rocks, whirlpools, etc.

Kaido's training is more dangerous, but all kinds of dangers are known. Although Arceus's training is safer, it is full of surprises.

On the last night before departure, Yamato rushed out of the eight stone formations arranged by Arceus out of breath.

"Father, I succeeded!"

"Well done, I can prepare for you to open Level 2."

"Huh?! Adoptive father, you were brought up by your father, you were not like this before."

"It's because you've grown up, okay, today's training is over, and I'm going to Shampoo tomorrow, is there anyone who wants to go with you?"

The Hundred Beasts Pirates have the potential to develop towards the Hundred Beast Kindergarten, and this trend is still strengthening as the Beasts' roots in Wano Country get deeper and deeper.

Kaido's daughter, a child picked up by Kaido when he went out, children picked up by other cadres when he went out, and some children of ordinary pirates under the Beast Pirates.

However, there are only a few that Kaido personally trained in Onishima. Although the competition mechanism of the beasts is that the capable ones are superior, there is still a big difference in what the internal members enjoy.

Yamato's playmates are just so few, of course, she won't be the only one to take with her on a trip to Shampoo.

"Well Jack and Maria are going, Robin hasn't answered yet, foster father, can Robin go out?"

"Can."

O'Hara is the only person who can come and go freely. Although she is also a doctorate awarded by O'Hara, this degree has not been reported, and there is no information about her from the World Government.

"Okay!"

"Okay, go take a bath and rest, don't let the auspicious eggs sing."

She would be so excited that she couldn't fall asleep whenever there was a big event, and it became the norm for Geely Eggs to hypnotize her, but as her age increased and her self-resistance increased, the effect of singing began to weaken.

At the same time, in the empty island above Onishima, Robin also told Olivia Yamato's invitation to her.

"They are going to play in the Chambord Islands?"

"That's what she said, but it seems like they're going to do something in the Chambord Archipelago, and it's just a way to play."

Some things are lost and can never be found again. Now Robin has made up some childhood playmates in her life, but her mind is much more mature than ordinary children.

There are more things to consider even when playing.

"The shampoo field has been coming and going for almost two months, do you want to go?"

"I want to go."

"Okay, I'll pack your clothes for you and have fun."

Olivia has always had a feeling of guilt for Robin, exploring history is her own ambition, and it is also her late husband's will, so she left O'Hara when Robin was two years old.

She wanted to make up for Robin, but she never had a chance, and she didn't stop her in this matter.

The next day, the Siwon set sail on time, and Shaina and Olga boarded the ship together. They have been handling the Chambord auction in recent years, and this time was no exception.

After a month and a half, they reached the Chambord Islands, which took longer than Olivia had estimated, because they were not walking in a straight line.

Ordinary people will dive through the coating and take the route of Fishman Island to reach the Chambord Islands, but the Beast Pirates will choose to take a detour and fly directly to the red soil continent when Arceus and Kaido are accompanying them.

And Yamato, who was sitting in his special seat, has now seen towering mangroves.

Alchimian mangrove, a tall plant unique to this world, with sturdy roots above the water, 79 mangroves together form the Chambord Archipelago. The roots of each mangrove are very broad, and people are distinguished by the labels on the trunks. different trees.

Arquitto mangroves secrete special resins, and it is these resins that form a unique bubble culture here.

Bubble Shopping Cart, Bubble Ferris Wheel, Bubble House, this is the paradise of yellow square people in Beachburg.

However, after leaving this range, the bubble will burst, so the bubble culture did not spread.

Another function of is coating. Through the coating of ships, you can dive into the deep sea and pass through the vicinity of Fishman Island to reach the new world.

Coating craftsmen are a high-income group in the Chambord Archipelago, but there are also countless counterfeit goods here. You must be careful when choosing craftsmen, otherwise the coating will be broken on the way.

Almost all the craftsmen here maintain zero negative reviews. After all, those who fail to coat will die from strong water pressure, and almost no one can come back alive to give negative reviews.

Although there are navies stationed on the Chambord Islands, the biggest role of these navies is to maintain law and order when the Tianlong people appear here.

also manages Areas 60-69, which are the Naval Stations and the entrances and exits of the World Government offices.

You can also see navy patrols in some areas. The law and order in these areas is relatively stable, but the navy will not care about what happens in the illegal zone No. 1-29.

By the way, the navy area and the illegal zone are right next to each other, just separated by a section of tree roots, which reflects a completely different scene.

However, because of this management method, there is basically nothing to do if the pirate ships do not dock next to the naval station.

Siwon stopped directly at area 30, which is where Soap Bubble Park is located.

The flag of the Beast Pirates fluttered in the wind, which shocked many people at the port. Most of the people living here are used to seeing pirates, and ordinary pirate flags will not let them care. , but beasts are different.

"The Beast Pirates, how did they appear here?"*novELusb.com*

"I don't know how the pirates of the new world came to this island of failure"

The island of failure and the island of re-departure, these are the other names of the Chambord Islands, because countless pirates have hit a wall here, and countless pirates have entered the new world from here.

Chapter 262 Beasts and Fruits Branch in Chambord

The Great Route is extremely dangerous compared to the Four Seas. If the pirates from the Four Seas enter the Great Route, the first level of upside-down mountains can screen out most of them.

After entering the great route, whether it is their own competitors or the navy stationed on various islands, their strength is not comparable to the four seas.

The number of pirates who can successfully reach the Chambord Islands is quite large, but this number cannot be compared with the number of pirates going out to sea, and when they got here after passing through difficulties, new difficulties appeared again.

Gaya Island has stopped countless pirates because of the empty island, but Gaya Island is only one of the seven routes, and the Chambord Islands are the sum of the seven routes.

No matter which route you choose, those pirates will eventually meet here, and some people will stop at the record pointer pointing down.

Those who set sail legally can take the elevator to cross over after paying taxes on the Red Land. Although they need to change boats, it is much safer.

Not all pirates' coating craftsmen are called Rayleigh. Ships that failed to coat and were crushed by water often floated around the Chambord Islands. These lessons scared many people's courage.

Those people stayed here and started to live in the lawless zone, which is the origin of the Loser Island.

And those pirates who successfully passed through the Chambord Archipelago to the New World will soon face the terrifying weather in the New World. This is only the first test, and it will not take long for them to understand why the first half is called Paradise.*nOveLus**b.Com***

Except for those buffer zones, almost every island has its owner, whether it is a well-known old pirate or some new pirates huddled together for warmth, none of them can deal with those who have just entered the new world.

The invincible nature system in Paradise is just a rare ability in the New World. What they experienced is very similar to when they just went to sea. The new voyage has made the Chambord Islands an island for departure.

Ordinary pirates can't even make a splash in the new world, and only those supernovas who have offered a reward of over 100 million in the first half of their voyage are still worth watching.

Most of the pirates who go out to sea today are influenced by Roger's last words. Their purpose is to find the legendary treasure.

So there is an endless stream of pirates from Chambord to the New World, but the number of reverse sailings is very small, so the presence of the Beast Pirates here will attract some people's attention.

Those are newcomers who have some knowledge of the New World, but they have not yet arrived in the Chambord Islands, and some people who have settled here are no strangers to it.

"The time for the Shampoo Land auction is coming up. It's not surprising that they appear here. See less and do more. As long as you don't offend those people, nothing will happen."

However, newcomers always have a lot of questions. When a group of people in neat uniforms rushed over from a distance, he still asked questions.

"How did those people come here?"

The clothes are not exaggerated, they are very similar to ordinary company employees, and they have a logo composed of several tree fruits. They are the employees of the Beast Fruits branch in Chambord.

Although the business chain of Beasts and Fruits is getting wider and wider, meat and dairy products, fruits, grains, medicines, and textiles are gradually included in the business chain, but they still use this icon with fruits as their initial products.

You can see them in the specialty shop on the mangrove tree on No. 47. Although this is not a specialty of Chambord, it is reasonable to see special products from other areas in the tourist attractions.

"The owner behind them is here, of course these people have to come to greet them."

Hundred Beast Fruits directly used the name of the Hundred Beast Pirates, and the relationship between them can be found out by simply checking, and the World Government does not care about this kind of business behavior.

As long as there is a fig leaf like a hundred beasts and fruits, the general public does not know that this is a pirate enterprise, then nothing else matters.

The composition of Hundred Beast Fruits is much more complicated than that of the Pirates. Of course, the core members here are all members of the Beasts Pirates, but there are a large number of ordinary people among the ordinary employees and the salespeople below.

The branch in the Chambord Islands is even more so, but those ordinary people are now in the store, and the members who really belong to the beasts have come here.

The official piers are all in Area 60, but that is where the World Government and the Navy are stationed, and pirates will not dock there.

Due to the nature of mangroves, boats can be parked anywhere around the island, which means there are no rules here.

The size of the Siwon is not much inferior to the warships that execute the Demon Slaying Order. After all, it is a ship that can accommodate a giant like Sauro, and Arceus can prepare a small training ground on it on the way.

And this size also occupies this place suitable for docking. Although there is a first-come, first-served principle, not all pirates will abide by the rules.

The pirate flag of the beasts made Siwon no trouble in the new world, but when it came to Paradise, trouble came.

Soon after the Siwon entered here, another ship followed, and they seemed to have taken a fancy to this place.

In the real version, the way to grab a ship's seat is naturally bombardment. Leng Touqing, who has never reached the new world, does not understand the meaning of the flag on the Siwon.

But when they tried to attack, Arceus and the others had already left the Siyuan, and the size of the Siyuan blocked their view. Although they could hear the sound of the cannon, they couldn't see what happened.

The location of the explosion indicated that they were attacking the Siwon. Although there were people left behind, they resolved it like a gun battle, which was too much time-consuming.

"Shaina, go and deal with it, don't waste your time."

"clear."

Shaina disappeared here with a flick of her wings, and the employees of Beast Fruits didn't take it seriously. It would be a big joke if the leaders of New World couldn't deal with Paradise's stunned youth.

Shortly after Shaina left, two fires rose not far away, and the employees here were still briefing Arceus about the latest situation.

"Master Holy Beast, the auction is still two days away. In addition to the population, there are suspected famous knives and devil fruits in the current auction list. Here are the details, please take a look.

Do you need us to arrange accommodation? "

"No, you can do as usual, we will stay on the boat at night." Although there are hotel areas in the Chambord Islands, for pirates, the hotel area here may not be safer than the pirate ship.

Even if you are a legal citizen of a member country living here, you have to be careful. If you go out at night, you may encounter misfortune.

Chapter 263 The Singer

Human traffickers don't check other people's documents when they abduct and sell people. Even citizens of the allied countries will end up in their hands. After all, the Chambord Archipelago has a population auction site.

The traffickers here are not kidnappings, but robbing and kidnapping.

Although the civilian area is managed by the navy, it is difficult to do things that happen in the dark.

Once someone is brought into the illegal zone, even the navy will not bother to search for someone, unless the person has the energy to get the world government or the naval headquarters to issue an order.

The navy here sometimes takes a laissez-faire attitude towards pirates. As long as they don't do too much to make the navy come down, they will turn a blind eye.

Before the store manager's report on the information was over, Shaina had already returned, and there were no scars except for some drying marks on the trousers.

"How did you do it?"

"That. The quality of their boat is too bad. I wanted to kick the keel, but it went straight into the water."

Several flagships of Hundred Beasts are made of Baoshu Adam, even if the ones not made by Baoshu Adam are of high-quality wood, and the pirates seem to have just gone through a big battle, the tattered ships have extremely low endurance.

Then Shaina and some of the employees of Beasts and Fruits went to prepare for the auction two days later, while Olga followed Arceus and the others to Soap Bubble Park.

"Yawa, don't run around, you all follow closely, don't spread out at will."

They landed at Mangrove No. 30, and Soap Bubble Park is located in Mangrove No. 33. There is still some distance to go there. There are other tourists on the island, but one thing in common is that all the children are held by their parents. No one dared to let them run around.

It was very rare for Yamato and the others to run around at will. When they were away from home, their life cards were all in Olga's hands. Even if they were taken away, they could find their location, but that kind of movement would be troublesome.

"understood!"

There was a response from his mouth, but he didn't fully listen to the action. Yamato was poking at a resin bubble in front of him, which was naturally generated by the resin of mangrove trees. It can be seen everywhere in the Chambord Islands, and there are often such bubbles on the ground. bubbles emerge.

From time to time, people look at Arceus and his party. Elizabeth and Arceus in the form of a thousand-faced convict are easy to attract people's attention, and these children who came to the Chambord Islands for the first time are also more excited.

But these eyes were quickly moved away. Here, there are various identities of mermaids, such as bounty hunters, pirates, navy, traffickers, and civilians.

There are both stunned young people who were previously vying for ships, as well as bounty hunters with good eyesight.

They make a living by hunting pirates in exchange for bounties, which requires them to be familiar with the pirates' bounty orders, otherwise they will not be able to choose suitable targets.

Although the bounty is not completely linked to strength, most pirates can use it as a reference. Although the high bounty is very tempting, it is necessary to have a life if you have money.

"Children, do you want a bubble car? Rent it for 500 Baileys a day, and buy one for only 10,000." *novELusb.com*

People who often live here are no strangers to Bubble. Yamato and the others are here for the first time, and this is the opportunity for Bubble to do business.

Bubble is naturally generated in the Chambord Islands, they just provide a simple wooden frame, which is basically no business, as long as you sell one, you will earn blood.

However, the bubble car can only be used in the Chambord Islands. The bubble will be broken directly away from this range. The local people will not pay this IQ tax, so they usually make a fortune from the people who come here for the first time. .

And every day, new people arrive at the Chambord Islands. The huge flow of people makes them not consider repeat customers at all, and they basically do one-off transactions.

10,000 Bailey is not very expensive, they just use this mentality to trick some people into buying their bubble car.

"Hey, you got the wrong target!"

A few people who worked in Beasts and Fruits came directly over. They had been following here before and had been doing business here for several years. Of course, they were familiar with everything here.

But they didn't say the reason, after all, telling the truth in front of tourists would cut people's money.

"Is the guest a local? That's really embarrassing, so how about renting four of your 1000 Baileys?"

They are all doing business here, and there are such unspoken rules between them. Beasts and Fruits did not break his way of making money, so he also gave him a discount.

"Wei Bao! Wei Bao! Great Airway bun, anyone want to buy it!" Shambord's specialty bean paste bun has a shelf life of three months.

"Chocolate with soap bubbles, chocolate that floats!"

Before reaching the Soap Bubble Park, the people behind him already had a bunch of soap bubbles in their hands. This is the Shambord Archipelago's way of replacing shopping bags.

They were like a group of balloon sellers, carrying various soap bubbles filled with local goods and souvenirs.

This is still part of the result that has been sent to Siwon.

With the tall Bubble Ferris wheel in sight, they finally reached Soap Bubble Park.

From daytime to nightfall, they played all the projects in Soap Bubble Park more than once. The people from Hundred Beasts did not disturb them during the game. They played together.

This is also a must-see for her when she comes to Shampoo. She was almost bored to the point of schizophrenia in the belly of Lantern Fish, so she has always been interested in this kind of project.

Although their novelty is not over yet, as the night falls, some projects are also closed. Just when they were struggling with where to go, a burst of singing caught Yamato's attention.

A man with brown-green hair was singing in a corner of Soap Bubble Park, with a piano case in front of him, and there were scattered Baileys in it.

Flicked the guitar in his hand, and sang the classic lyrics from his mouth:

"Yo hoo hoo hoo, yo hoo hoo hoo,

Bring Binks' wine to your side,

day after day in the twilight of dreams,

I will never see the figure waving goodbye again."

Originally this song was usually accompanied by accordion or violin, but now he has replaced it with guitar. Although the track has some changes, it is integrated with the accompaniment.

However, the effect is not very good. Most of the Baileys in front of you are coins, and the most is only 500 Baileys.

The song is good, but the place to sing it is not very suitable. After all, this Binks wine is called the song of the pirates, but soon, he received the largest denomination today, Bailey, pocket money from Yamato

Chapter 264 Tezzolo

Binks' Wine, a classic from the sea, has been around since Roger was a rookie.

Whether it is a sailor or a pirate, many people who sail at sea will hum a sentence or two, and there are not a few people in the Beast Pirates who can sing this song.

The creator of the track is unknown, but the song has been passed down for a long time.

But there are very few sailors or pirates here. Even if he sings well, it is difficult to resonate with people, so the money he gets is not a lot.

Yamato gave him a note with a face value of 5,000 Bailey, which was almost his biggest gain today. Although Yamato knew that he should give some change, it was the smallest note on her body.

Anything less was some 100 Bailey coins, which she felt was inappropriate.

In Wano, there are very few places where she needs to spend money. Except for the last time she collected bottle caps, she cleared the inventory for Kojiro, and her small treasury was basically untouched.

The amount of accumulated so far is that many people can't earn it back in their lifetime, so 5000 Bailey is just change for her.

The singer did not stop, but just bowed to her, which he often does depending on the proficiency of the movements.

The sky is getting darker and darker. Although the lighting equipment in Soap Bubble Park has been turned on, there are fewer and fewer people in the park. The people in front of the singer stop and go, and now the people who listen to him are gradually leaving. Only Yamato and the others have been sitting in front.

"Little sister, do you like listening to me sing?"

"It sounds great, you sing very well, better than Uncle Quinn."

"It sounds good. It's really a good review. But I'm sorry, little sister, today's performance is over. If you want to hear it, you can only come back tomorrow."

Logically speaking, he should sing more for a character like this kind of financial master, but he still works during the day, if he is absent from work, his salary will be deducted. In order to prepare for tomorrow's work, he must rest.

However, he looked at his old watch again and found that it was still early, and the income he could earn after working hard for a day was only about 10,000 baileys. It was inappropriate to end directly in the face of such a sponsor.

"It's a special performance for you guys, do you have any songs you want to listen to?"

He needs money very much. If Dahe is happy, it would be best to give him more rewards. He didn't have any crooked thoughts. Although he needed money urgently, and there was a child with a huge amount of money in front of him, he chose to use labor. in exchange for money.

This is his promise to others. His name is Gilder Tezzolo, the golden emperor who will control a lot of money in the world in the future, but now he is still a young man working hard for his ideals.

"You can sing which song you are best at."

"The best. That should be this song."

After adjusting the strings of the guitar, Tezzolo sang the song she was most familiar with, but Yamato's expression was a little wrong. The power of Vibrant allowed her to communicate freely with Pokémon, but the power it brought was much more than that. .

Under the influence of Vivian's power, she is more sensitive to other people's emotions, and singing is a bond that can convey emotions, and she hears something different from it.

"Big brother, you seem to have something on your mind, what are you thinking about?"

Many people gave him money when he sang, but there are only a handful of people like Yamato who have heard the end and said he sang well.

But there is only one person who can hear his mind - Stella, which is also the source of his desperate efforts to make money.

"That's a long story, do you want to hear it?"

Yamato's behavior of hearing his thoughts seems to have touched his heart. This is the second time he has told others about his experience, and the listeners are a group of children.

19 years ago, he was born in a not-so-good family. His father was a gambler and his mother was an alcoholic. One was addicted to gambling and the other was addicted to alcohol.

An alcoholic and a gambler, such a family is naturally very poor. Because of poverty, he was ostracized by friends of the same age. One day he passed a mobile opera house. The singing inside attracted him, and it became his original dream to enter the venue to watch the performance. .

He wanted to go to the show, and he wanted to be as striking as the stars on stage.

At the age of 12, his father who was addicted to gambling died of an illness. Although his father was a gambler, he was also the main source of income for the family, which made the family that was not wealthy even worse.

After that, his mother continued to drink heavily every day, and began to hate Tezzolo's singing, and then strictly prohibited him from continuing to sing. In this environment, 12-year-old Tezzolo fled the home.

But at the age of 12, he couldn't support himself at all, so he started stealing. Through the stolen money, he met a lot of people. After that, he thought he had made friends.

Naturally, he could not learn well by following a group of deceived friends, and like his father, he was also infected with the bad habit of gambling.

Ten bets and nine loses, and the chance of winning was given by someone fishing. Tezzolo, who was caught in the abyss of gambling, almost followed his father's old path.

At the age of sixteen, he lost everything in the casino, where human trafficking has always existed, so he was caught by the human traffickers in the casino and planned to sell him.

At this time, those friends in his mind left him one after another, and no one cared about his life or death. He knew what would happen if he was caught by the traffickers, so he desperately resisted.

Although he was beaten badly, he finally escaped. In a panic, he didn't look at the road at all, and ran directly to the human trafficking shop, where he met the salvation of his life - Stella.

It was a woman who was captured as a slave. Although she was used as a commodity in an iron cage, she did not give up her desire for life.

Although they were separated from the iron cage, they had a good chat, Tezzolo sang a song to Stella, and he was praised for the first time by others.

After that, he was inspired to give Stella back her freedom, so he started working hard to make money.

During the day, he would work in the shipyard in Chambord, because the wages there are the highest, and at night he would come here to sing, but he never did anything illegal. *NovEls&.com*

This is his agreement with Stella, and he will use legal means to make money.

Stella is a high-priced "commodity" in the human trade shop, which is both a good and a bad thing for Tezolo.

The high price of made him not worry about Stella being easily bought, but it was relatively difficult to save enough money.

For almost three years, he worked without sleep or sleep every day, saving every bailey while he was frugal, and now he is very close to his goal.

Chapter 265 False wealth is not exposed

"Master Arceus, leave them alone?"

"Everyone grows up. At this age, they should have their own judgment. If there is no danger, don't interfere."

Yawa and the others seemed to have no one around them, but more than one stared at them. If Tezzolo really had any thoughts, his fate would be tragic.

He is not the Golden Emperor who cultivated the fruit to awakening after blackening. He is just an ordinary person. Such a person does not even need Olga or Elizabeth to do it. He can't even beat the current Yamato. Kaido's one finger Still very valuable.

They are not puppets and cannot always grow up under the control of others. If they do not have their own values of right and wrong, they will easily be abducted by others.

Arceus just made sure that the general direction would not be crooked, and the rest was up to them.

"That's about it. In short, I need money very much. Well, it's really time to go to rest. Children, you should go back early. Even the shampoo place at night is not safe in No. 33 area."

said and put the money in the piano box into his pocket, every penny means that he is one step closer to Stella, they have been in love with each other for nearly three years.

Yamato's 5,000 Bailey made him get closer and closer to his goal, and another month's work would be enough.

"Big brother, how much money are you missing? She won't be bought by others."

"It's still 300,000 Baileys, but don't worry, I'll be able to save up enough next month."

He has been working hard to make money just because he was worried that something like that would happen. Although Stella has been staying here for almost three years, he is not sure if something unexpected will happen.

"You are lying, and you are obviously worried too."

"Don't worry about this kind of thing if you're a child, go back early, but what about your adults? How dare you let your children stay here alone?"

After leaving the Ferris wheel, Olga had been following them more than 20 meters away. There were many people around just now. Tezzolo thought that their parents were also inside, but now that everyone was gone, they were still here.

The family of a child who can take out 5,000 Baileys can't be ordinary, and it is obviously unreasonable that there is no one around.

"Little girl, you won't steal your money like I used to? It's not good."

"No, it's all my own pocket money, but if it's 300,000 Baileys..." Yamato took out his wallet, which looked like a pink auspicious egg, and even the wallet and auspicious eggs Just as chubby, that's because it's stuffed inside.

After opening it, it seems to be a stack of egg rolls, but it is a rolled up Bailey, and it is rolled up ten sheets by ten, and there are about 1 million Baileys stuffed inside.

"Well, I lent you 300,000 Bailey, remember to return it to me next month."

Because she thought it was right to do so, she did it. Under the influence of Vivian's power, she thought that the other party did not lie. He was very short of money, and she had a lot of money. She thought that she would lend the money to the other party and let him do a There's nothing wrong with something important.
noVeluSb.com

And what she said was borrowing, not giving, she didn't think she should help him unconditionally, just wanted to help him reduce the occurrence of unexpected things.

As for whether Tezzolo will default on his debts, and how to repay the money if he wants to, she didn't think about it.

This is undoubtedly a windfall for Tezzolo, but after a brief rejoicing, a cold sweat broke out from his forehead, and after taking Yamato's money, he pressed her wallet back.

He really couldn't refuse the money. Although Stella had never been bought in the past, the longer this kind of thing dragged on, the more hidden dangers would be.

But he used to be a thief, he knew very well how chaotic the shampoo field was, and he didn't know how many people were looking for a target in a seemingly stable environment.

Although the sky is getting darker now and there are a lot fewer people in Soap Bubble Park, it is unknown whether there are peeping eyes around.

"Didn't your adults tell you the truth about not revealing wealth?"

"I said so, but it's just a little pocket money, it's not big money."

One sentence blocked all the words behind Tezzolo, and the money that she had worked hard day and night for a month to save was just pocket money for her.

The gap between people seems to be too huge, which makes him a little frustrated, and at the same time, he yearns for money two points more.

"Okay, go and redeem your big sister, remember to return the money to me next month, otherwise you will be miserable."

"I will definitely return the money to you, but... Forget it, where do you guys live, I'll send you back, it will be troublesome if it's too late."

"No, there's someone next to you. Eh, where's the person? Maria, Robin, Jack, have you seen Sister Olga?"

"She didn't follow him at the beginning, and it seems that Lord Arceus didn't come either." Jack and Maria didn't notice this, but Robin saw it, and the people who were the beasts and fruits quietly left not long ago.

"I'll send you off, where do you live?"

"A boat outside Mangrove 30."

"Master Arceus, is this really good?"

Naturally, only Arceus can call Olga away, and he has also transferred those who are the fruit of the beasts, in order to test their handling in the face of emergencies.

Kaido had that intention for a long time, but Kaido wanted to let them experience it directly on the battlefield, so he never implemented it.

So far they have only experienced ordinary training, and now the situation in Shampoo is just right.

"Are those people still following?"

"It's still following, and the identity has been found out. It's a group of local traffickers in the Chambord Islands."

"Then let them practice their hands, it's time to see blood, but don't be careless, you and Elizabeth follow, don't be discovered."

"clear."

Tezolo sent Yamato and the others back to Mangrove No. 30, and Olga's vision made her and Elizabeth follow the group almost invisible, and the traffickers were farther away.

Their goal is Yamato and Maria. Robin is just an ordinary human girl. As for Jack, although he is a murloc, he doesn't look like a murloc, and outsiders can't see this at all.

Yamato and Maria, with their outstanding looks and horns on their heads, naturally attracted the attention of those traffickers.

Although they are more rampant, they are not rampant enough to directly tie people up in front of everyone, so they have been waiting from the day until now, just to find a chance.

Those who followed them left one after another, and now there is only one Tezzolo left, which is an opportunity for them.

Chapter 266 The first battle of the new generation

"Head, haven't we started yet?"

"Wait, it's too messy in Soap Bubble Park, it's already dark now, and they can do it when they go out. This is a rare high-quality product, and it's still a big fat sheep."

Young and beautiful girls are the most popular in the population market here, not to mention a person like Yamato who carries a lot of money. After selling someone, he can find a way to extort a large amount of ransom from his family. This is his idea.

Human trafficker organizations are spread all over the sea, but these people do not have a unified organization, and the quality and strength of their members are also uneven.

There are murloc scumbags who kidnap their own clan, there are weak trash, and there are elite human traffickers who are powerful enough to kidnap people on the Nine Snakes.

There is also the nun Carmelite who cooperated with the world government and deceived the giants through a series of methods. In a sense, these people can be said to be the second largest organization after the photographer group.

Some weaklings are also inevitable. There are stains on every ship, and there are alternative existences on every ship, including but not limited to the photographer who forgot to take off the lens cap, and Bucky the Clown, the crew member of One Piece.

Yawa's face didn't mean the slightest worry, and he was even in the mood to see what was different in the Chambord Archipelago in the dark. The same was true for Jack and Maria.

Robin is not as calm as the others, but he is not too worried about this kind of thing under the rendering of emotions.

Arceus's performance along the way did not match his sudden disappearance. She felt that Arceus should be staring at them in a corner.

But Tezolo is different. He doesn't know why these four children are so big-hearted, although Maria and Jack can be regarded as adults according to the standard of giants, and their size is enough to be called little giants.

But at this time, they still didn't show this. Jhin also began to grow rapidly after puberty, reaching a height of more than six meters. Today's Jack and Maria only look like thirteen or fourteen-year-old children.

After they left Soap Bubble Park, the lights around them also dimmed. During the day, only parts of the Shambord Islands are illegal, but at night, the influence of the illegal zone expands.

Fighting, illegal trading, these things all happen quietly in the shadows, and as their positions reach the junction of the mangroves, trouble comes.

"Run! There is a navy patrolling the civilian street on No. 31! Those people dare not arrest people in front of the navy!"

Although the population trade of the Chambord Islands is in front of the navy, they don't care about those things, and they have to help maintain order there, but those navies still have a bottom line.

Taking other people into slaves in front of them is unbearable, at this time they are at the junction of mangroves 33 and 32, but the Chambord is a circle, not a straight line.

There is more than one mangrove connected to the mangrove No. 33. It is not difficult to reach the area patrolled by the navy from here, but the traffickers naturally think of the things he can think of. They are gangs committing crimes, and there are several directions to escape. There are traffickers approaching.

"Boy, I advise you not to be too troublesome, and be careful to set yourself on fire."

A fat human trafficker threatened Tezzolo, but he was slapped by the person in front of him before he finished speaking.

"Idiot! There are so many people surrounding this place, you still want to let him go?? Of course, they are arrested together! It's not that men can't sell for money!" *nOvElusℓ.coM*

Their main targets were Yamato and Maria, but they were already surrounded by people, so there was no reason to let half of them go, so he wanted to capture them all.

"Boy, you can't blame us for throwing yourself into the trap. Now you can suffer less if you don't resist. We will find a good buyer for you."

Injuring the face will affect the price. Most of those traffickers have weapons such as ropes and cloth bags. If the terrain here is not too open, they will probably use anesthetic gas directly.

"There's no way, little girl, I can't take care of you anymore. I'll try to run away in a while. It's up to you if you can run away or find someone to help you."

He doesn't have the confidence to defeat more than a dozen strong men by himself, even if he himself may not be able to run away, looking at their appearance, he has already set his sights on Yamato and them, even if he wants to attract attention, he can't do it.

However, Yamato's reaction was different from what he thought. Instead of the panic of a child, he was a little excited.

"They're all human traffickers, right?"

"Yes, but now is not the time for popular science.. Listen to my password in a moment. If I say run, you will run."

Tezolo's one hand grabbed his pocket, which was filled with quicklime, and he didn't have anything on him, and the other hand also pulled out a knife from the guitar case.

But Yamato's behavior was very different from what he thought.

"Great, these bad guys can be beaten up!"

Being beaten by Kaido every day, being trained by Arceus, and being beaten by the Stone Man, she had long wanted to experience what it was like to fight in real life, but she never had the chance.

said that, she put down her backpack, took out A Jian 4.0 from it, and was always carrying her own mace when she went out.

"Jack, Maria, get ready to fight, Robin, help me take care of Xiaoxian." The average height of the frost milk fairy is about 30 cm, and usually hangs on her shoulders like a doll.

Because she was already a big child, the auspicious eggs didn't follow her out, only the frost milk fairy followed her like a pet.

At the same time, Maria and Jack also made the same move, giving Robin their frost milk fairy.

Maria took out a pair of finger tigers, and Jack's backpack contained a small sickle, which made Tezzolo, who was going to work hard, a little confused, and these children seemed to be a little abnormal.

The refers to the tiger can also be said to be self-defense, but the sickle and the mace are nothing like what normal people carry.

Even the traffickers who approached didn't believe such a thing, and laughed at Yamato's mace.

"Little girl, don't use inflatable toys to scare people, no one will play with you here, so be honest and be careful about hurting your face."

"A Jian No. 4 is not a toy, it inherits the legacy of No. 1, No. 2 and No. 3, and is my comrade-in-arms!"

"Hahahaha, kid, this is the funniest joke I've heard today. I can't bear to sell you. If you want to blame it, go to the shampoo place yourself."

said and walked over with the rope, but Yamato did not continue arguing with him, just clenched the mace in his hand, and then jumped up in his unbelievable eyes.

"Thundering gossip!"

Chapter 267 The water battle of the murlocs, the group battle of the electric spiders

"Bang!"

The trafficker only felt a gust of wind in his ears, and then the mace hit his head. At this moment, he understood that the mace in Yamato's hand was not an inflatable toy, but a real mace.

The huge force penetrated through the skull and directly to the brain. For a moment, he only felt the darkness in front of him. After staggering a few steps, he rolled his eyes and fell to the ground.

Today, Yamato's Thunder Gossip has no choice but its shape. Although she is no different from Kaido's Thunder Gossip in the waving of her moves, the core of Thunder Gossip is the combination of domineering.

Whether it is the attachment of the armed color or the entanglement of the overlord color, only when this is achieved can the power of the thunder and gossip be truly exerted. Yamato is still polishing her body and skills and has not yet mastered the domineering. Her thunder and gossip is just a simple swing.

But regardless of the domineering aspect, she has mastered the skill of swinging the bat, otherwise Kaido would not be able to use two fingers.

The milk from the big milk tank and the love eggs of Geely Eggs provide her with sufficient nutrition. The bloodline inherited from Kaido after long-term exercise makes her strength completely different from ordinary people.

During the training of the Eighth Array of Stone Soldiers, the stone figures arbitrarily created by Arceus would be damaged under Yamato's attack, not to mention the flesh and blood. *noVeluSb.com*

"Don't laugh at my Ah Jian No. 4!"

Yamato, who had knocked him down with a single blow, stood in front of him, and said his declaration again, but he couldn't hear it anymore. He couldn't bear the stick, and the foam overflowing from the corner of his mouth showed that his brain stem has been hit hard.

Not all people who are beaten by mace are called Kinemon, he does not have that high resistance.

"Boom"

The sound of a soap bubble bursting spread throughout the nearby area. After Yamato's stick, the scene became quiet. Those traffickers looked at Yamato completely confused, and they all fell silent for a while.

"Go! Catch that little girl! She can sell for a sky-high price, enough for all of us to be at ease!"

Pretty little girls can sell for high prices, and powerful people are also very marketable at auctions. When the two are combined, the price will double again. The reason for the arrest.

In the first half of the Great Route, the Nine Snakes are the label of strong women, and the women marked with the Nine Snakes can sell better.

Caibo is moving, and under the lure of the bounty, a group of traffickers rushed up, and Yamato also began to look for her next target.

There are a lot of traffickers, and their target is not just Yamato. Yamato's force just now made five or six people charge towards her, while the rest attacked Maria and the others.

Watching the person who rushed over, Tezzolo spilled the lime in his pocket, and after fascinated by the eyes of several people, he took out a dagger and stabbed it out.

He promised Stella that he would not do evil, but he is protecting himself. There is nothing in this world that is too defensive. If he is not ruthless in the face of these traffickers, he will only get worse.

Three years of hard work allowed him to exercise a strong physique, but he was only one person after all. Although he stabbed one person, the dagger was also knocked off, and now he is fighting with others.

Jack's side is also a melee. Most people subconsciously believe that the strength of men is much higher than that of women. Yamato's performance makes them dare not be careless, so Jack, who looks fat and strong, attracts many opponents.

A noose caught him, but the trafficker holding the rope suddenly felt a huge force, and the force from Jack was far beyond his expectations.

The physique of the murlocs has a natural advantage in the face of people of this level. The rope was directly broken away by him with brute force, and then he raised his scythe and rushed towards the opponent in front of him.

"I want to be the right-hand man of Big Brother Kai, who do you think you are!"

Looking at the three or four people surrounding him, Jack made his own judgment. He threw his scythe at one of them, and hit them directly while they were evading.

They were already on the edge of the mangrove tree, and there was turbulent sea water below. Jack slammed into one, and the huge brute force even brought the people around who wanted to pull them into the water.

"Puff!"

A few clumps of water splashed out of the sea, and Jack came to his home. He was a murloc, and he played a much bigger role in the sea than on land.

But those traffickers didn't know this. The sea water under the night was very cold. They wanted to find Jack, but Jack grabbed his ankle and pulled him into the deep sea.

He is reckless, but not stupid. It is difficult to deal with so many people on land, but it is easy to say underwater.

Robin and Maria are not worried about Jack, they know that Jack is a murloc.

The traffickers don't worry about their comrades either. They don't know that Jack is a murloc.

People consume more oxygen under the struggle, and the cold flow takes away the heat in their body all the time. When they can't hold their breath and choking, Jack's chance will come.

Although there is still a human trafficker in the sea, but human vision makes him unable to see anything now, and the light above is reflected into the water, making him blind.

It was too late when he saw the two floating companions and then tried to climb up, Jack rushed out of the water, grabbed his neck and pressed under the water.

On land, Tezzolo became the weakest one. One trafficker fought back and forth with him, and several others rushed towards Maria. At first she was able to cope, but as the number of people increased, she started to parry.

She doesn't have the perverted physique of Yamato and the talent of the Jack Murlocs.

"You bastards. You forced me to use this ugly gesture!"

Maria's body began to change, six arms emerged from her back, and the spider's abdomen also appeared on her body, but the difference was that her spider coat turned yellow.

On the way, Arceus changed her spider from a tarantula to an electric spider.

"Zizzi.."

There was a sound of electric current in the air, and then several spider feathers shot out of Maria's body.

That is the characteristic of electric spiders. In addition to its own spider web, its hair is also a powerful weapon. After the hair on the abdomen is launched, it is like a flying needle, and a strong current is attached to it.

Ordinary people will fall into a paralyzed state as long as they are caught in this kind of fluff, and at the same time, their mouths wriggle, and then a yellow spider web is spit out by her.

Electric spider's spider silk is charged, whether it is used to defend, set up traps, or use it to attack, it is a good player.

If it weren't for the spider stance being unsuitable for combat in this environment, she really didn't want to use this form.

Chapter 268 Let the bullets fly for a while

It's not that the electric spider is ugly, but the spider fruit is the virtue. She is still a beautiful girl. The ghost spiders in the navy use their fruit abilities to look even more ghostly.

He uses the return of life to manipulate the hair into six hands and his fruit ability also has a lot to do with it, because that's the fighting stance he's used to.

Quinn's potion didn't work yet, but her face didn't change when she transformed, which made her reluctantly accept this gesture.

"That girl is a capable one!"

There are no strong people among the human traffickers, and the fruit power can already have a fatal impact on them. After being hit by the charged spider webs and fluff, those human traffickers fell one after another in screams.

However, Maria is not familiar enough with abilities. It can be said that her electric spider level is very low, so the strength of the electric current released is not enough. Although those people have entered a state of paralysis, they have not lost consciousness.

But this is not a good thing. The cobwebs attached to the thunder and lightning are always in a state of discharge. The people trapped in the cobwebs have no ability to resist, and can only be beaten.

"Maria Electric Fist!"

There was thunder and lightning attached to her fist, and her resentment was mixed in it. After all, she used this gesture again.

At the same time, a trafficker ran towards Robin, he was not beaten in the head, he was not caught by the grid, he was not dragged into the water, but he was covered in cream.

The cream released from the palms of the frost milk fairies can be directly sprayed out like compressed cream. The traffickers never thought that the cream milk fairies like ragdolls could do such a thing, and after that, a sharp pain came from his crotch. come.

Two hands grew under his legs, and they smashed the **** all over the place.

The cream splashed into his eyes, making his eyes hurt, and he was hit **** the crotch. For a while, he didn't know whether to cover the bottom or the top, so he rolled in front of Robin, and finally passed out in pain.

Tezolo, who had finally defeated his opponent, just got up and looked at the scene in front of him and was doubting his life. He felt that his nineteen years were almost in vain.

"So strong"

The leader of the slave trader was shocked when he saw the scene in front of him. More than a dozen sturdy adults were beaten down by a few children, and there were two capable ones. This was far beyond his expectations, but he didn't. make him afraid.

Because he still has backers, these dozen people are just part of their gang. He thinks these people are enough to catch a few children, and more people are wary of others.

In his eyes, this is a piece of fat. In order to prevent other traffickers from staring at them, those who are good at fighting under him are on guard at key parts.

"Very good, very good, two capable people, the price that can be sold is even higher now, come out! Catch them at all costs! It doesn't matter if they get hurt!"

These people are all bare-handed or holding ropes or the like, and those who are on guard have lethal weapons in their hands.

If it's just an ordinary child, his goal is to capture it completely, but the strength of Yamato and others has shown that it is impossible.

He thought that his subordinates would stand up after he gave an order, but in fact the surroundings were still silent, as if nothing had happened.

"What, is there anyone else? Then call them out."

“.”

The leader of the human trafficker didn't know what to say. He didn't mean to joke with his subordinates. When he was puzzled, several people were thrown flying in front of him.

A lizard came out in the shadows, it was Elizabeth who had followed Yamato and the others before. It was only a humanoid lizard, but three people hung like candied haws on the long tail behind Elizabeth.

The blood-stained face in the dark night is like an alien, and the long tail hanging heavy objects rustles on the ground, which is like the bell of **** to the leader of the trafficker.

Those people wanted to attack when they saw that the situation was wrong, and Elizabeth who was accompanying was just to prevent this from happening.

In the face of human traffickers like Yamato and the others, he was able to fight back, but in the face of Elizabeth, it was a one-sided massacre. *NovelSB.com*

Then Elizabeth flicked her long tail, and those people were thrown in front of the trafficker leader.

"Miss Yamato, Lord Arceus means that you should go back to wash and sleep, and I will handle the matter here."

They are just a few traffickers. For Arceus, it is not as important as Yamato and the others to go to bed on time, and they have done what they need to do. Naturally, there is no need to continue wasting time.

So, Elizabeth, who received the order, stood up directly, and took the opportunity to fetch Jack from the water. Although it was a good tactic to smash the enemy into the water, he did not consider the terrain.

So after finishing your own enemies, you can't get up.

"What, the adoptive father has been watching, hey, big brother, remember to redeem Sister Stella, and remember to pay back the money, see you later."

Hearing Elizabeth say that, Yamato didn't have to continue the duel, and went to the Siwon with Maria and the others. Before leaving, he didn't forget to ask Tezzolo something.

Today's experience was somewhat dreamy for Tezzolo, and he didn't respond until Elizabeth called him.

"You should leave, I will not be responsible for your safety."

"That person escaped, won't there be any trouble?" Tezzolo stood up and sorted his clothes. The guitar was broken, but it didn't affect anything.

As long as he does his last day's work tomorrow, he will have enough money to buy Stella after receiving his salary plus the 300,000 Bailey that Yamato has funded him.

But he was curious as to why they let the leader of the traffickers go. Just when Elizabeth turned back to talk to Yamato, the leader of the traffickers started to run away.

"Don't worry, he can't escape."

Elizabeth's left hand took the position of a pistol and aimed it in the direction of the trafficker's leader. Then, with a bang, a water bullet shot out from his fingertips, piercing the man's head directly.

After being pierced by Elizabeth's sniper, his remaining consciousness heard the sound of water bombs.

"Foster father, have you seen it, I did a great job."

Yamato, who returned to the Siwon, showed off their battles like taking credit. This was their first time fighting an enemy.

"It's good, but don't be proud, you're still far from it."

A few human traffickers are a relatively simple test for them. The combat power of these human traffickers is not too strong, but they are quite satisfactory.

Some traffickers will even capture pirates, and many people will buy powerful pirates. For example, Tianlong people like to buy those pirates as their mounts.

And the exploding collar on the neck of the slave is a guarantee. With it, the slave can't do it whether it is to escape or resist, and even death is an extravagant hope.

ps: Ghost spiders are capable, the comics have pictures, but the animation team just missed them

Chapter 269 Money and Status, Power and Truth

The next day, Tezzolo was working in the shipyard with excitement. Although there were some bruises on his face, he was still enthusiastic. Even the workers around him didn't know why he was so happy.

But those people are not very familiar with Tezzolo. The previous experience made him understand a truth. Money can buy friends, money can also lose friends, and he is working hard to save money.

He never goes to social gatherings or gatherings among the co-workers, so he naturally has no relationship with the co-workers.

In the evening, he got his salary from the boss as he wished, and immediately ran to the No. 1 mangrove, where the population auction is located and where the population market is located.

In the cage, a blond woman with a metal collar around her neck was looking into the distance. She was Stella, Tezzolo's biggest spiritual support, and she was also waiting for Tezzolo.

Because the time to make money is very tight, Tezzolo will come here to visit Stella every few days, tell him what he has seen and heard these days, and talk to Stella.

"Stella! I saved enough money!"

Tezzolo, who ran over, couldn't wait to tell Stella about his results before he could catch his breath.

"Tomorrow, as soon as this place opens tomorrow, I can give you freedom!"

"What are you doing with your face?" Stella was also very excited to hear that Tezzolo had saved enough money, but she was more concerned about why Tezzolo was injured.

"It's okay, I had a fight with a trafficker, I met a particularly interesting girl, I told you."

Tezzolo told Stella about his encounter with Yamato, but omitted the danger he encountered. After that, he quietly opened his bulging shirt, revealing Bailey hidden inside.

6 million Bailey, this is the price of Stella, and it is also the result of Tezzolo's three years of hard work. He does some heavy work. Even if he wants to save money, he has to protect his body. If he It's really over when it falls.

So he also had some expenses in the past three years, but most of them were saved like this.

"That's a good girl, I have to thank her well in the future."

"Well, let's go to the West Sea after paying off the money. I heard there is an island there"

The lights of the humanshop were shining on it, while Stella and Tezzolo stayed up all night, thinking about the future, but when the next day came, the boss here was late.

Today is the day of the auction. He went there to prepare some things. When he just returned here, Tezzolo ran directly in front of him.

"I want to buy her!"

Tezzolo had some bloodshot eyes in his eyes, pointed at Stella with a trembling finger, his tone was full of excitement, and then handed six million to that person.

"Have you really saved enough money?"

The owner of the shop looked at Tezzolo in disbelief. He didn't expect this person to be able to save enough money. He often chatted with Stella at the door of his shop, and he naturally knew that this person existed.

He thought Tezzolo was just a diasosi who only knew delusions, but he didn't expect that he would actually do it.

"Unfortunately, if you had not had so many troubles a few days earlier, arrest him!" The boss who accepted the money suddenly turned his face and ordered his subordinates to arrest Tezzolo.

"what are you doing?!"

"What? You stole my money, of course I'll arrest you."

"What nonsense are you talking about! That's the money I saved for three years, you bastard!"

Tezzolo wanted to rush up angrily, but he was not the opponent of the two bodyguards there at all, and was directly pressed to the ground.

The reason just now was told to the people next to him. Although this is an illegal area, one of his bosses still needs to give reasons for arresting people, otherwise the business will not go on.

Then he squatted down and said to Tezzolo: "Of course I know that you have saved money for three years, and it is only a person like you who has no money and no power to do this. Unfortunately, if you had been half a month earlier, I would She was sold to you, but she has already been reserved by the Tianlong people."

Stella is a very special commodity here. Six million Bailey can buy a woman as beautiful and talented as her.

He put Stella outside and set such a price because he didn't want her to be easily bought. This was his advertisement, which made outsiders think he had a lot of high-end goods.

Ordinary people can't afford this money, and those who can afford it don't want to be taken advantage of. I didn't expect to meet such an outlier as Tezzolo.

As he said, if he usually sells Stella to him, he still has to be honest, but not long ago, a servant of the Tianlongren made an appointment for Stella and said that he would come to pick it up next month. goods.

That Heavenly Dragon Man has a hobby of taking goods personally, and he doesn't have time to come here now, so he has nothing to do about it, he can't go against the Heavenly Dragon Man.

As for why Tezolo was arrested, because he couldn't bear the six million Baileys.

"Asshole! You bastard!"

Tezolo struggled to get up, but he couldn't resist the power of those two people at all.

"Don't resist the kid, who made you not a world noble? Accept your fate, kid."

If you have more money, if your status is higher, your power will be stronger.

The scene from yesterday came to his mind, whether it was Yamato's free and easy way of taking out hundreds of thousands of Baileys, or his ability to defeat the enemy with one blow, he couldn't forget it.

Money, power, status, he longed for things that were not his own, but now he was powerless.

"Put the collar on him." After hearing this, his subordinates took out an explosive collar and planned to put it on Tezzolo's neck. Tezzolo tried to resist, but it was of no use.

"Damn."

"Tezolo! What are you doing?!" Stella in the iron cage didn't understand why this happened, but the restraint of the cage made her powerless, and she didn't even know that she had been reserved.

"You let me go!"

At this moment, a crisp roar came from one side, and Yamato looked here angrily.

Today was the day the auction started, Yamato and the others naturally came here, and just saw this scene.

Of course he wouldn't listen to a child, but at first glance, the group of beasts looked like a crowd, so of course they couldn't treat Tezzolo the same way.

But he can open a population market in the No. 1 mangrove tree. Of course, he has his own power behind him, and he has no fear.

"What are you doing? What does it have to do with you when I catch a thief by myself? Children, don't meddle in your own business."

"He's not a thief! He also has a part of his money that I borrowed!"

"You said it was you who borrowed it? Did you write your name on the money?" The boss of the population market looked disdainful. He didn't plan to spit out the money he got, but Yamato's answer surprised him.

"Write it! If you don't believe me, take out the money. There are thirty sheets with my name on it!"

In order to show his ownership of the New Year money, Dahe asked Tutu Dog to mark it. It can be said that it is a unique pattern. The boss of the population market did not expect this hand, and he did not know what to say for a while.

But he suddenly reacted to a question, what did he have to explain to a kid?

"It doesn't matter if he is a thief or not, what I say here, go home quickly." *noVeluSb.cOm*

The quarrel here has made many security guards in the human trafficking market come out. They are not those human traffickers. The sophisticated armor and weapons are not easy to deal with at first glance. In the face of these people, Dahe thinks that he may not be an opponent.

"Father, can you help me?"

"You can help others as much as you can, but what you want to do now is beyond your ability, then this is causing trouble for other people, unless you have a reasonable reason, otherwise I will not help you."

Yamato is a little naive. He doesn't mind Yamato being a good person, but he has to have a degree and can't unconditionally harm the interests of his relatives and friends for the sake of others.

"Well, he owes me 300,000 yuan, so no one will be able to pay back the money if he is caught."

"The reason is ordinary but barely qualified, Shaina, bring people back."

Chapter 270 You reminded me well, then silence

"As ordered."

Shaina, who received the order, appeared in front of Tezzolo in an instant, and a sweep kicked the two who suppressed Tezzolo aside. No flames, no skills, and even pure leg strength they couldn't bear. .

Shaina directly kicked them in the head. The huge impact force has exceeded the upper limit of the neck. During the flight, the necks of the two were twisted into twists, obviously they would not survive.

At the same time, he picked up the boss of the population market. Although she was only over three meters tall, she was a little smaller than Jhin, but she was still a giant for this ordinary boss.

"What are you going to do!"

Shaina didn't speak, she just took a bunch of keys from his waist, and then threw him out together. Tezzolo had an explosive collar on his neck. Of course, he had to do things better, not just orders matter.

Since Arceus's order was to bring Tezzolo back, of course things like the key had to be handled properly.

Then she picked up Tezzolo and put it back on the ground. After being beaten, he didn't seem to have the strength to unlock himself. Yamato was trying one by one with the keys.

"Stella, please, help me bring Stella out with me"

The movement of the mouth during the speech involved the wound on the face. Those people didn't slap the face just now. He was just an ordinary man, so naturally he didn't need to pay attention to this kind of thing.

"Please, let me give anything"

He struggled to raise his hand and grabbed Yamato's wrist. The experience just now made him understand one thing. It is useless to have money. If you only have money without the power to protect it, then in the hands of others, you are a lamb to be slaughtered. .

Power, power, money, only by combining these can you do what you want to do in this world.

"Okay, I promise, but you have to work for us later."

This is Yamato's nature. She is different from Kaido. Although Kaido acts recklessly, he will also consider the interests of the part and make trade-offs among them.

And Yamato thinks that she is right to do this, she did not consider her own interests when doing this, she just followed her heart, so she agreed to Tezzolo's request.

She doesn't know the trajectory of Tezzolo's life. From her point of view, she can gain at most two people's gratitude and two ordinary people.

The last sentence is already the result of Arceus' education. There are too many injustices in this world. If she wants to interfere in all things, it is impossible for her, so she will be asked to think more about other things.

"Father, that's fine."

"Of course you can, but your training intensity will gradually increase again, not to mention your father's strength, at least you have to reach the level of Mandelfish, so that you don't always rely on outsiders."

When Shaina heard what she said, she walked towards Stella before anyone told her. What imprisoned her was just an ordinary iron cage. It could imprison an ordinary person, but for a person like Shaina, there was no such thing as a use.

She broke the railing with a thick wrist, and at this time, the panicked voice of the population market boss came out.

"Stop! That woman is the goods ordered by the Tianlong people, do you want to die!"

The subordinate was kicked away, and he was thrown out. This kind of thing happened to him, which made him strangely angry, but he calmed down quickly.

He is very aware of how hated his business is, so the two bodyguards are very good. The pirates with a bounty of 10 to 20 million are not their opponents. If they can kick them away, the identity of the other party will never be the same. Simple.

The most important thing in his line of work is to watch people cook, he knows who can offend and who can't

The era of the great pirates has spawned more and more powerful people, but there are only a few people who have offered a bounty of over one billion. Most of these people have their own striking characteristics, such as the appearance of Arceus.

He didn't pay attention at first. After being thrown out, he quickly remembered the identity of the other party. The identities of Shaina and Olga, the two officials who offered a reward of over 100 million yuan, also surfaced.

In any case, he would never have imagined that a person like Tezzolo would have something to do with these people. This is someone he can't afford to offend.

"You can do whatever you want with that man, and I'll pay you back double the money, but that woman can't do it!"

If the Tianlong people can't see their goods when they come here, his own fate will inevitably be miserable, and I am afraid that he will be directly turned into a slave.

His blocking was naturally ineffective, Shaina was just carrying out Arceus' orders, and could not be disturbed by this kind of external force.

"Aren't you afraid of provoking revenge from the Tianlong people!"

After saying these words, Shaina stopped temporarily, and then she cut her palm towards the railing, and a section of the railing was held in her hand like a javelin.

"You talk a lot, but you're right about one thing, the Draco bugs are having too much trouble."

"Stink bugs?! How dare you talk like that!"

"Why don't you dare? Sooner or later I will crush all those scumbags to death." The former Lunalia tribe lived on the red soil continent, and the Tianlong people were their enemies. Of course, she would not have any respect for the Tianlong people.

At this time, the boss of the population market suddenly realized something. This group of people disliked the Tianlong people, but they hated the Tianlong people. At the same time, they were doing things that would make the Tianlong people angry.

If they don't want to get in trouble, then the best way is that no one knows about it, and the insiders here are only themselves.

"Wait" *novelUS&.com*

"Hey!"

Before he could say anything, Shaina weighed the railing in her hand and threw it towards him. Flames were attached to the railing, and the sharpened "spearhead" pinned him across.

"You are all dead, no one knows what happened?"

This is an illegal zone, and it is not uncommon for a few people to die here.

Even though the clothes of ordinary members have the mark of the Beast Pirates, they still encountered a lot of small troubles on the way here. There are always newcomers who are not afraid of death who want to challenge the combat power of the new world.

"Master Holy Beast, you go to the auction first, we will handle it here."

After getting Stella out, Shaina has no intention of leaving. The so-called aftermath is not just a simple matter of silence, it is not enough to eliminate insiders, and the relationship behind the opening of the population market here is not simple.

To clear traces and create chaos, she still has a lot to deal with, and at the same time Olga is also left behind, her phantom ability can play a big role.

Not long after Arceus and the others left, the population market was engulfed in flames.
