

## ARCEUS' PIRATE JOURNEY

### Chapter 5: ember

#### Chapter 5 Jhin

It can be heard from their words that there seems to be frequent explosions in that direction, so that people here have become accustomed to it. The place where Kaido landed is the no-man's land on the island, and it did not attract too many people's attention, but entering After the town, they still attracted the attention of many people.

It's not because of bounty and identity, except that he is a pirate, or his profession is closely related to pirates, such as the navy and bounty hunter, ordinary people can't recognize all pirates, unless the person's reputation has already resounded in the sky. .

Although Kaido now has his own reputation, he has not yet reached the point where everyone knows it.

However, none of the people in this group are normal in appearance. Although there are many people with peculiar physiques in this world, most of them are of normal physique. Little giants like Kaido will naturally attract the attention of others, except for Kaido's The body shape is very different from ordinary people, and there are wings behind Abel and Shaina.

The flame can be temporarily extinguished, but the wings cannot be retracted into the body, so they had to be shrouded in huge black robes, covering their faces, coupled with the unique appearance of Arceus, the group is quite eye-catching.

"Abel, you are strong enough, you will call yourself "Jing (king in the future, your original identity is a trouble after all, and it will lead to too many unnecessary things. "

The world government has never stopped offering bounties to the Lunaria tribe. As long as you inform the people, you can get huge bounties. The characteristics of the Lunaria tribe are too obvious, and if they are ostentatious, they will cause countless troubles.

Whether it is Abel himself or Kaido himself, the identity of the Lunaria family needs to be concealed.

After saying that, he looked at Shaina on the other side.

"I want three powerful people to become the strongest fighting force under my command, called the "big kanban" of the three disasters, and now there is still one less, how about taking this position?"

Arceus listened to this title and looked at Abel. With the ability to burn flames behind his back, and his black wings, he is Jhin, the head of the three disasters of the future Beast Pirates, but there is still a gap in size, and it seems that he will grow taller in the future. Not a lot.

But Shaina. No matter how you look at it, she will not be the famous ship king.

"That's right, Shaina's condition should be dead." At that time, he used the power of the slate to replenish Shaina's vitality, otherwise she wouldn't be able to persist.

And it can be seen from the previous battles in the current research institute that Shaina's strength is not inferior to Abel's, and the title of Jack is still affordable, but Shaina did not accept this title.

"Thank you for rescuing Abel, but the one who really saved my life is the Holy Beast-sama. Whether it was the offering of the Lunaria clan at the beginning or now, I will only obey the Holy Beast-sama."

"That's a pity." One second he was still sighing, but the next moment Kaido burst into tears regardless of the occasion. It seems that the repeated recruitment failures caused a lot of fluctuations in his mood, but he also thought firmly. To completely pull the idea of Arceus joining the party.

The terrifying firepower is also bound to another talented young man, and the heart rate is beyond description.

At this time, Kaido seemed to be uncontrollably exuding his own aura, making everyone around him stay away from this "madman", and the street soon became empty, and he never looked at this place again.

Shaina didn't have a code name similar to "Jin", so the probability of her name revealing her identity is low. There are still a lot of people in this world, and there are many people with the same name. Things are fine.

Although wings and flames are obvious, there are not no hidden methods, such as devil fruit, strange abilities are the best way to cover up the singularity of the body.

Flying animals are enough to cover up the problem of wings. As for flames, dogs don't eat burnt fruit these days, and they use more fire.

As passers-by were scared away by Kaido's aura, a figure on the empty street appeared unusually conspicuous.

Tall, fat, round-looking, with a mechanically modified prosthesis in his left hand, wearing sunglasses, purple lip gloss on his lips, a golden braid on his head, two golden beards on his mouth, and the back of his head. Leave a golden scorpion braid.

is exactly the person Kaido is looking for, and also the big sign for the future of the Beast Pirates, the plague-Quinn.

Quinn is here because of his previous status, a few hours ago he was a member of MADS.

MADS is a crazy research group, and its leader is known as the genius who led the world for five hundred years, Vega Punk.

MADS was an illegal organization not long ago, but at this time it has been incorporated and is carrying out some research projects according to the orders of the world government.

Arceus and their former institute were researched by MADS people.

At this time, MADS had their own ideas. They were scientists who gathered to study more things, and many of them could be called lunatics.

But the world government only cares about Vega Punk. It does not plan to absorb everyone in the group. It can be said that MADS has been disbanded. Vega Punk has been led by CP to discuss the specific details with Mary Joa, which is also the research institute. The reason for the slightly weak garrison.

And Kaido's escape and Quinn also have a certain connection, it is Quinn who released Kaido who was bound in the research institute.

MADS was disbanded, and members of the organization naturally wanted to find a new way out. For example, Vinsmoke Gage, planned to return to the North Sea to revitalize the kingdom of Germa. There were old forces behind him that he could rely on.

Vega Punk has the backing of the World Government, while Quinn saw the potential of Kaido. The members of MADS have their own specialties, such as Gage who studies human blood factors, and Quinn who is good at viruses.

Those studies can't be done by one person alone, so Quinn released Kaido and said that if Kaido can get out of trouble successfully, he can come here to find him.

Even if there is no Quinn, Kaido can break free, but he saw Abel, so he stayed for a while, and the device that bound him did not use Hailou stone, because at this time, there were not many people who knew that Kaido was capable. .

He had been arrested many times before joining the Rocks Pirates. At that time, he did not have a Devil Fruit. His fruit was given to Charlotte Lingling when the Rocks Pirates disbanded after the Battle of the Valley of the Gods. his, and this is Kaido's first arrest since Valley of the Gods.

To be precise, he was hungry and wanted to find a buffet, so he brought it to his door. This is not the first time. It can be said that he is familiar with it.

Vegapunk drew his blood, but left here with the sample before it could be analyzed.

Although Vegapunk created the first artificial devil fruit based on Kaido's blood, that is a future thing and has not been studied yet.

This is also the first time he has used his abilities in a grand manner. Although the research institute has been completely destroyed under the light of sanctions, the news may have already spread.

"Yo, you managed to escape. It seems that you will be called Big Brother Kai from now on."
