

Arceus 771

Chapter 771 on how Kaido's self-blame came about

The banana orchard has been planted for so many years and nothing happened, but something went wrong at this time.

If there is a problem, that's all. It's not a small problem. If I don't go to the scene, I'm afraid I won't be able to figure out what it is. With the complexity of this component, ordinary people really can't figure it out.

You need to have a good understanding of tropical dragon bananas and viruses and bacteria to better solve this problem. This is already reading Quinn's ID card.

Even if Naiqin is good at botany, he is not as good as Quinn in other aspects.*nOvelusB.com*

Quinn felt that this was probably a conspiracy, but he didn't have conclusive evidence. After all, it wasn't a day or two since he was blamed, and there were more than one beast plantations, and this was just one of the more important ones.

No one can be sure that he will really go out for this thing, and Quinn has no evidence to prove that this is a conspiracy against him, so he still has some luck at this time.

"Contact Tezolo and ask him to find some experts to take a look."

After thinking about it, Quinn temporarily restrained his desire. Beast Fruit is the owner of those bananas on the bright side, and there are also people who are good at agricultural products under its banner.

Received Quinn's instructions, and the younger brothers also conveyed Quinn's request to Tezolo, and a group of professionals also came to the plantation with their large and small packages.

As time passed, Quinn also received new news.

Good news, they found the root cause, there was a problem with the rainfall on that island recently, the rainwater contained a virus, it was this virus that destroyed the banana trees and eventually caused their death.

At the same time, this virus only uses plants as parasites, and it is extremely easy to die. Without a host, it will die soon, and it will not harm other plantations.

Bad news, they can't handle this stuff, and the death process of the plant was accelerated after one attempt.

"Brother Quinn, according to the report, it will be fine after all the plants on that island die, and they can be replanted after a while, even though that island is the island with the largest banana production.

But if we compress the rationing, we can still survive this year. "

"Compressed rationing? No, wouldn't my life be fun? I still have to let my uncle do those wastes."

As the business expands, their output has a fixed allocation. If it is compressed, it is impossible to compress only one person. As a hedonist, he pays great attention to his extravagant life, and the fat on his stomach is the best prove.

But he still didn't leave Ghost Island, but began to use the method of remote live broadcast to remotely control the people on the island to make corresponding medicines to deal with this crisis, but in the end he still failed.

"Trash! You bastards! I've made it so clear, haven't you researched the results yet?!"

Quinn yelled at the screen in front of him. Except for failing to get started with micro-manipulation, he had already taught everything he could teach. As a result, this group of people just couldn't get the results that satisfied him.

Seeing that the fruit-bearing period is approaching, if we don't hurry up and solve it, this batch of bananas will be scrapped.

"Miss Yamato hasn't come back yet, and Master Arceus has gone out again, so only Brother Kaito is left."

Survival or delicious food, Quinn didn't want to give up, so he wanted to find a strong enough umbrella to go out with him. Obviously, he was also a strong person in the sea, but now he became extremely cautious.

With a slightly apprehensive heart, Quinn found Kaido who was on the empty island. At this time, Kaido was watching his mount fight.

Different from the Pokémon that only has a huge size after being extremely gigantic, the Eight-Headed Dragon, King Yanwu, and Bankira are also giant beasts under normal conditions.

Normally speaking, Pokémon determines its age by the time of its birth, and the eight-headed dragon that was born the latest is undoubtedly the younger brother.

But following Kaido, its character has become more and more belligerent, and at the same time thinks that he should not be a little brother.

It is also a creature created by Arceus. It also has extremely strong combat power. He wants to be the big brother! Therefore, the position of the two "sisters" is being challenged by force.

It doesn't know what it can gain by doing this, but it just wants it, and it seems that it will make the owner and creator happier.

It's hard to say whether Arceus is unhappy, at least Kaido is happy now, seeing that the mount fits his character so well, his laughter has lasted for a long time.

With the advantage of flying, the eight-headed evil dragon is indeed stronger than King Yanwu and Banjila in one-on-one situations, but it is still young, and it challenges its two older sisters at the same time, and the two older sisters are also a little unhappy about the expansion of the younger brother. , so they teamed up to blow its arrogance.

When Quinn came here, Kaido was comforting his mount.

"Hey, don't be discouraged, you are challenging two at the same time, and you are still young, Quinn, what are you doing here?"

Patted the most important head of the eight evil dragons, Kaido looked at Quinn beside him.

"Well, Brother Kaito, there are some production problems on the outer islands, can I trouble you to go there with me to check the situation?"

"Huh? Do you still need me to deal with such a trivial matter? Can't you just find someone?"

"No, Brother Kaido, this matter is quite complicated. Most people can't handle it. I have to do it myself. If it doesn't work out, it will affect our business reputation. Master Arceus has managed to establish this good reputation. "

"Then you can go by yourself, do you think you are a child?"

Speaking of this, Kaido suddenly stopped, he was not deceived by Quinn's rhetoric, but caught another important point.

"I said Quinn, you must be too scared to go out, right?"

Quinn's words are okay to fool Yamato, but if you want to fool Kaido, it's still too far behind.

"for this I."

"Okay, needless to say."

"Brother Kaito, listen to my explanation."

"No, as the big kanban under my subordinates, you actually feel afraid because of this kind of thing. These are all my dereliction of duty! Wow!"

At the end, Kaido suddenly burst into tears again. At this time, Quinn saw a lot of wine jars scattered on the island cloud beside him. Kaido seemed to drink a lot while watching the battle.

Aware of the abnormality, he wanted to leave secretly, but Kaido grabbed his shoulder.

"Brother Kaikaido"

"It's my fault. If you were stronger, you wouldn't have to worry about this. So...let me help you get stronger!"

"Wait! Don't!"

Looking at Kaido who picked up the mace, Quinn wanted to leave here, but this was obviously impossible. Kaido completely blocked his retreat with just one swing of the bat.

Chapter 772 How to persuade a "strict wife", Quinn's tragic confession

【Humans are so strange. 】

Ban Kira grabbed a piece of island cloud, seemed to be thinking about whether it could be eaten, hesitated for a moment, and stuffed it into his mouth.

Eating soil is a habit of Banjila, and Daogumo is also a kind of soil in theory, but it has not really studied whether this thing can be eaten.

The island cloud melted instantly after stuffing it into its mouth, and there was a gleam of light in Bankira's eyes, as if it had discovered a new continent.

It just stopped after taking two bites. It didn't want to just fall like this, it would be very painful.

【Yeah, human beings are so strange. The way they get along is really hard for Pokémon to appreciate. Xiaoba must have learned badly from them. 】

【I said don't call me that! I am the dragon! 】

【Tsk, do you like the nickname your enemy gave you? Sure enough, you should hit your brother as soon as possible. 】

Banjila, King Yanwu, and the Eight-Headed Dragons spoke words that humans could not understand, while complaining about the strange behavior of Kaido and Quinn, and did not agree with the Eight-Headed Dragons' taste.

Although they are the same creator, the eight-headed evil dragon is closely related to the fruit of Yamata no Orochi, and differences are inevitable.

Under Kaido's drunkenness, Quinn suffered an additional ordeal, which also let him know that Kaido's path is impossible.

Subordinates are afraid to do something because they are timid to fight. This is the behavior Kaido hates the most. If it happens again, I am afraid that Kaido will really beat him to death.

"Damn it, Master Arceus has just left, I don't know how long Miss Yamato will have to play."

He is not so rigid. Since the top combat power cannot be found, it is not impossible to be close. Shaina left with Arceus, and Olga is also floating in the open sea. The only choice that suits him is Zera. Ola and Jhin are gone.

After thinking for a while, he chose to go to Jhin first.

"roll."

"Hey! You torture pervert, I came to invite you politely, is this your attitude?!"

"Guy who can't overcome a little bit of appetite, I don't have time to talk to you."

Jhin was very impatient, and the long knife straddling his waist had already been drawn out. Quinn didn't know that when he came here, Jhin was using Lily Carnation, but he interrupted the process.

Now there is no direct kick, it is already very restrained.

Now, Zeraora has become the last choice. After returning to the laboratory, Quinn tinkered with some small things, and took the gift box to Zeraora's residence.

As for why he brought gifts, if it was only Zeraora, he would go there empty-handed, but his problem is that Zeraora has a wife, and according to Quinn's analysis, the seemingly generous Setsuna is actually a narrow-minded person. .

I just interrupted her dating more than ten years ago, and now I still get picked out from time to time to flog her corpse.

Empty-handed, go out to find Zeraora to do something that may be risky, and there is a high probability of being shot as a hedgehog.

"This guy's life. Is it too easy?"

When they first came to Wano Country, it was really an ordinary thatched cottage, just two ordinary bungalows. Later, Zeraora and Setsuna built a new home here, and then turned it into a villa when they got married.

Now, after several expansions, the villas have become a group of villas, and there are many new buildings around, warehouses, guest rooms, and small amusement parks.

In comparison, my income is no less than that of the other party, but it looks miserable.

"Uncle Quinn, what's the matter?"

Miao Na got out from the flowers outside the door.

"Oh, I'm coming to see your dad, he's home."

"Not here, but why is your face so swollen? Did you steal too much food?"

“.”

It is difficult for Quinn to answer this question. After all, Kaido kept hitting him in the face at that time, and he was still able to act normally without a bandage, which was the result of Kaido's mercy.

"Where is your father?"

"He and his mother went fishing at the beach."

“Toys for you and Worf, go and play by yourself.”

Just as he handed the things to Miaona, he saw the husband and wife returning with a bucket of fish.

"Quinn? What are you doing at my door?"

In the living room, Setsuna and Zeraora listened to Quinn finish his explanation of their visit.

"So you're here to borrow Zeraora?"

"Hey, hey, he's a real person, and he's not your property. Is it really appropriate for you to say that?"

"Don't pay attention to this, this is not the point, the point is what dangerous thing are you going to do again?"

"There is really no danger. To put it bluntly, if there is danger, I am in danger. It is fine for your Zeraora to retreat."

In order to persuade Setsuna, he gave a very miserable reason, and the people around him felt very reasonable after hearing it.

"Then why did you insist on taking him?"

"The two of us go together, even an admiral can handle it. Even if something happens, he is the fastest to ask for help. Are you satisfied with this reason?"

Sighing, Quinn drank the water in the teapot in front of him.

The admiral and the four emperors, their force value is a big boost for the people below. Even the green bull with the worst expressiveness can easily solve Jin and Quinn, although this has something to do with their own injuries. Relationship.

Unless it is an opponent of the same level, facing a general-level opponent can only delay at most.

He and Zeraora are enough to deal with the admiral. This is already a slightly inflated confidence of Quinn after the ability enhancement and Kaido's devil training.

"Forget it, it's up to you, Zeraora can go if she wants."

Logically speaking, he doesn't need to persuade Setsuna, but Zeraola and Mandelfish are both of the same virtue, and sometimes Tezolo has to be added, and Xian Chong in the three teams respects the other half's ideas very much.

He must have a good reason for such a risky action

"Don't worry, he will definitely come back safely. I'm well prepared this time."

As he spoke, Quinn took out a devil fruit and shook it in front of the two of them.

"Devil Fruit? What use are you using this thing? We all have our own abilities, so we don't need this thing."

Looking at the devil fruit in his hand, Ji Mo showed puzzled eyes, she and Zeraora both have their own power, and Miao Na and Worf also have the power bestowed by Arceus, there is no need to add weaknesses to yourself .noVeloSb.com

"This thing is for my own use."

"Are you going to commit suicide? You can't be so overwhelmed, right?"

Eating two devil fruits will explode and die. This is the inherent cognition of Dahai Haishang, so Setsuna didn't understand what Quinn said.

"How is it possible? This is a new move I secretly prepared. Whoever dares to provoke me, I will definitely let that **** know how powerful I am."

Chapter 773 Let me show you the wrong way

Tossed the devil fruit in his hand, and showed his arsenal, showing his determination for this mission.

"Oh, by the way, this is for you. Although you don't usually like to use weapons, you should bring them this time."

As the current research leader of Onijima, Quinn not only perfected his own weapons and equipment, but also brought some small equipment to Zeraora, an ordinary sea stone dagger.

It is really not easy for the outside world to create this thing. Due to the hardness and characteristics of Hailou Stone itself, it is very difficult to shape it. Generally, the ore is as big as it is, and it is made into an object of similar size.

Just in Wano Country, you can have any shape you want.

Therefore, they have many weapons containing sea stones, but Zeraora did not have the habit of using weapons in the past.

Fist is his most powerful weapon.

"I said. You really didn't lie to me? Is it because of something wrong with your orchard that you went out this time?"

Looking at what Quinn had prepared, Setsuna always felt very strange. He seemed to believe that there was a conspiracy in this operation.

"No, your authority is not much lower than mine. Your Zeraora's authority is also very high. You can check it yourself. If there is any false news, I will not eat rice cake and red bean soup for a year."

Setsuna believed in Quinn's oath. Although this guy is not a good person, he values food very much. This is a person who dares to grab food for rice cake soup and BIG MOM, and directly attacks each other with a head hammer.

It can be seen how obsessed he is in this regard.

"Go out and wait first, I'll pack some clothes for Zeraora, Bepo! We're seeing off the guests!"

He found a reason to send Quinn out, and took Zeraora aside in an instant.

"What's wrong?"

"There is something wrong with that guy. If there is something really wrong, you just let him attract the firepower and go away first."

"Isn't this bad?"

"What are you afraid of, have you forgotten what the guy's reward order says? Only alive, you will be in danger if you push him, and if neither of you can handle it, you can only rely on Mr. Kaido and Al Master Zeus."

Colleague and husband, she still cares more about Zeraora.

Although Quinn is a companion, his status in Setsu's heart cannot be compared with that of Zeraora.

"Don't worry, I know what to do, don't worry."

In this way, Quinn successfully persuaded a companion, and went to the banana plantation with Zeraora.

It was only when they set off that Zeraora realized that he had underestimated Quinn's caution.

"is it necessary?"

"I think there are still some, anyway, you can fly, and we don't fly all the time, we just take a boat in another place."

Strictly speaking, Wano Country's export to the outside world is only a diving port, which is the safest way to leave Wano Country. Secondly, if you are brave enough, you can choose to go to the waterfall. As long as the boat is strong enough, whether it is climbing the waterfall against the current or sailing directly Jumping a waterfall is achievable.

In addition to this, they have another method, using flying.**novEusb.Com**

At this time, Quinn took Zeraora to this platform, and left Wano Country in the dark.

He was worried that he would sail out to be watched by the Navy's surveillance ships, so he chose this silent method. He thought that no one would care about the two small black shadows in the night sky.

A few days later, Zeraola and Quinn arrived at the plantation. Seeing that most of the banana tree leaves on the island had turned yellow, Quinn could only feel tears rolling in his eyes.

"Asshole! What are you looking at! Take me to the laboratory!"

Due to the severe damage to the banana orchard, Quinn was in a bad mood. Seeing the surrounding employees looking at him in confusion, an unknown fire arose in his heart.

"Yes, but, Mr. Quinn, why did you come here?"

"If I don't come again, everything on this island will be gone! Stop talking nonsense and lead the way!"

"I invite you to come here!"

The angry Quinn was still very intimidating. The ordinary employees under him immediately took him to the place where the agricultural problems were dealt with on the island. Before the researchers inside could figure out the situation, they were pushed aside by Quinn.

"Get out of the way! If you can't understand such a simple thing, what use are you for!"

"Master Quinn, we worked hard, but"

"No but! Learn carefully! How can you not understand such a simple step?"

As he spoke, Quinn turned on the device and started on-site teaching.

"As expected of Master Quinn, did you actually do this step?"

"It turns out that this is the case, this will save more than double the time!"

In order to save his own banana as soon as possible, Quinn's arm has been waving afterimages, and various instruments are flying in his hands, and he quickly got what he wanted. As a former member of MADS, he still has a lot of research talent of.

People in MADS would rather scold each other every day than waste their time with trash. In this regard, his ability is indeed world-class. The people around him are not just flattering. Quinn has indeed done something that they can't do well. matter.

But as the last drop of liquid flowed into the beaker, gray smoke suddenly appeared on the test bench, followed by a burst of explosion.

Zeraora, who was watching from the side, was speechless for a while. Even if he didn't understand science, he knew what happened when he looked at the messy test bed.

Quinn also seems to have failed.

When the gunpowder smoke cleared, Quinn's face was covered with chemical residues, but he didn't move at all, as if he had been petrified.

The onlookers around were also too frightened to breathe out. Who knew whether Quinn would become angry from embarrassment.

"Ahem, have you seen it? This is why you failed! I showed you how you failed, and you must learn from it!"

After brainstorming, Quinn quickly made up a new reason to cover up his failure.

"Next, I will show you what the correct approach looks like."

After cleaning up the test bench, Quinn repeated the previous actions again. In order to prevent accidents, he had activated the modified part of himself, and there would be no problem with the accuracy. However, after a few minutes, the explosion happened again.

Quinn's eyes were full of doubts. After several explosions in succession, he confirmed one thing after another. It wasn't that he had a problem, but that something was wrong. Otherwise, this kind of experiment would not be overturned over and over again.

After driving everyone out, Quinn picked new samples from the banana field outside and returned to the initial stage.

It's not that what he wants to study is mysterious, but that he is worried about losing face in an accident.

"How many times have you done it, but still no results?"

Even Zeraora became a little impatient looking at the cumbersome experiment, and began to urge Quinn to speed up the progress.

Chapter 774 If you dare to destroy my banana plantation, I will not let you go even if it is an admiral!

"There are results, but troubles are expected to come. This is not a natural disaster, but a man-made disaster."

Looking at the analysis results in his hands, Quinn had a gloomy expression.

He finally figured out the reason, and also knew why he had been failing before.

This time he discovered that the ingredients that caused bananas to get sick were not what he understood before, but a man-made product, and even the maker of this product was his old acquaintance.

"That **** Caesar, when I see him again, I must make him plow me with his face!"

"Caesar?"

"Caesar Courant is just a piece of trash. I was in a research group with him before. This thing is the product of his failed experiment. It should be said to be an improved version. I didn't realize what it was at first, but now I can be sure. "

"Like? A new virus?"

"No, that guy's experiment direction is a bit different from mine. He has always liked artificial fruits, but he has never succeeded. He followed some plant breeding characteristics when cultivating fruits, and finally came up with this special "pesticide".

You won't understand if you say too much, but fortunately it's not too troublesome, I should be able to handle it well. "

Quin didn't explain more expertise, but used a short way for Zeraora to understand what it was.

"It's just that this thing can't appear here out of thin air. He is now a running dog of the world government. This is really a **** conspiracy against Lao Tzu!"

There is a conspiracy, this matter has always been expected by Quinn, but when he confirmed that this is the real conspiracy, his heart was still very complicated.

"So, what's your decision now?"

"Eh, this one"

Logically speaking, after discovering the problem, he should leave here immediately. He can prepare the antidote after leaving here, but it will waste a lot of time, and these bananas may not be able to hold on.

"Do you mind waiting a few more days?"

"You bastard. Sooner or later you will die with this mouth."

Seeing Quinn's fearful and reluctant look, Zeraora wanted to give him a kick, and he suddenly understood what Shaina said back then.

【I don't know why I wanted to kick him, I couldn't help the urge when I saw that face. 】

Just at this time, someone helped them make a decision in advance, and there were bursts of alarms in the laboratory, and someone helped Quinn make a decision.

Taking advantage of speed, Zeraora saw the situation outside first.

"Quinn, good news, you don't have to worry about how to deal with this matter anymore."

"Um???"

There were explosions in his ears one after another, and Quinn suddenly had a bad feeling in his heart.

"You mean"

"It's almost burnt. You probably don't have time to save those bananas. This is a big problem."

The sound coming from the ear was different from the ordinary gunpowder explosion. When Quinn came to the window, what he saw was the banana garden that gradually turned into a sea of flames, and the magma bombs that continued to fall along with ordinary shelling.

Not far away, the shadow of a warship can be seen gradually getting bigger.

"It's that mad dog"

Looking at the navy with a red suit on the bow of the warship and a coat of justice on his shoulders, Quinn instantly recognized his identity. The only person in the navy who can use magma as a weapon is the Admiral of the Navy Headquarters - Sakaski, code-named Red Dog .

Because of the grievances between Olga and him back then, Beasts has always used the nickname Mad Dog to describe him. It took Olga a lot of strength to get rid of him.

"Master Zeraora! Master Quinn! There is a navy attacking us, and the leader is..."

"Okay, needless to say, I have seen it all. You lead people to retreat, so there is no need to stay and add chaos."

This is a planting island for beasts. There are not many people on the island. Except for a few pirates, there are some workers. Two ships can accommodate them all.

The island is not responsible for fighting. Most of them are retired pirates. They can't play any role in this kind of battle.

"Yes, I understand! Those two adults."

"I'll help you break it down for a while, and report the news here to Guidao."

Zeraora briefly arranged these things, and then looked at Quinn on the side.

"I'm going to delay that guy, how about you?"

If he wants to leave, he can leave now. Sakasky can't stop Zeraora. In terms of flexibility, he can't limit the other party. But if he does that, the rest of the pirates on the island will suffer. The highest combat power of the navy is not They can handle it.

It's just that he still has a sense of responsibility, even though he promised that Setsuna will put his own safety first.

In this case, the safest way is to leave directly, but he can't do it.

There will always be a little reasonable error between what a man promises at home and what he fulfills when he goes out.

He thought that Quinn would want to retreat together, but this time Zeraora really underestimated Quinn.

"Hold on? I'm going to kill that guy! I don't care what kind of dog he is, if he dares to burn my banana plantation, even Brother Kaidou, I will fight him hard!"

Quinn's eyes were congested, and the adrenaline in his body was being secreted at an accelerated rate. He moved his food. No matter who the enemy was, he couldn't forgive him. At this time, he was already dazzled by anger and lost a certain amount of sanity.

Made the bravest decision in more than ten years.

The skin began to squirm, and the muscles in the body continued to expand and change. When he walked out of the room, he had already turned into a huge tropical dragon and flew towards the navy ship.

He doesn't care about the casualties of these ordinary pirates, he just wants to avenge those unborn bananas.

"General Sakasky! The target has appeared, he has not escaped, and is approaching us!"

Caesar's ingredients that can destroy plants, and the red dogs that appear here, these are naturally actions arranged by the world government, and it is also an attempt by them.

There is no manpower to be sent inside Ghost Island, and it is very easy for an intelligence officer to sneak into the outer islands. Through the analysis of Quinn's preferences, a CP team planned this operation.

They integrated the potion made by Caesar into the rain cloud, causing the plants here to get sick, and let Sakasky temporarily perform tasks nearby. According to the current situation analysis, they want to capture alive in a short time and destroy the opponent under special circumstances. This is the safest course of action.

In theory, Polusalino is more suitable for this operation, but he is responsible for the safety of Vegapunk, and the Navy has not transferred him from his post.
noVELuS&.com

"The plan remains unchanged, the bombardment continues, and all the pirates on the island will be wiped out!"

His arm is still spewing magma into the sky, and the action must be carried out thoroughly. Now that he has done it, there is no need to be lenient. Whether it is Quinn or ordinary pirates, it is his decision to wipe out all the enemies.

Chapter 775 Don't be cowardly!

For pirates, Sakaski will never show mercy. When he was sent to carry out this task, his goal was to eliminate all these turbulent factors.

If it weren't for the fact that the navy is not allowed to attack the Emperor of the Sea at will and have a large-scale conflict with it without the order of the world government, Sakasky would have done so long ago.

"Adjust the muzzle and attack ships first!"

Sakaski's meteor volcano has great power and range. The disadvantage is that the accuracy is not very good. The hit rate after the Magma Fist is launched will be seriously affected by external factors. It is only suitable for large-scale firepower coverage, and the number can make up for the hit rate. missing.

If you want to accurately hit some ships, you still need to rely on naval guns.

The naval guns on the ship were not for display either. Under the cover of double firepower, the plantation island quickly turned into a sea of flames.

"Sakaski's general! New situation, new cadres have been found, and Zeraola is also on the island, and he is protecting the evacuated ships!"

The undercover on the island only sent the signal of Quinn's arrival, and did not describe the composition of the enemy in detail.

"Full speed ahead, speed up the landing speed!"

Due to the limitation of the fruit's ability, Sakasky's combat performance on the sea is not as good as that of Kuzan and Polusalino. Kuzan can freeze the sea at will, and Polusalino can fly freely. The limitation of site factors.

But for Sakalski, it is best to exert its strength on the earth.

At this time, around the island, the lightning in Zeraora's hand was almost condensed into a solid body, and as he waved it, all the approaching shells were detonated by him in advance.

"Master Zeraora! The news has been sent back to Ghost Island, take care!"

On the ship, the evacuated pirates reported their situation loudly, otherwise under the cover of the explosion, others would not be able to hear these voices clearly.

"Bastard! Are you just watching? Push the cannon out and shoot back!"

The cadres on the ship issued new orders. They would not be able to intervene in battles at the general level, but they were not afraid of the shelling of a warship.

Their naval guns are not less powerful than those of the navy. If the navy can hit them, they can also hit the navy. This is a new world, and they are also pirates. It is impossible for a pirate ship to have heavy firepower, even if the ship is mainly The same goes for those who work in transportation.

The banner of beasts can only avoid most troubles, and sometimes you still have to rely on cannons to speak.

Under the organization of the cadres, the retreating pirates also began to fight back with artillery fire. At this time, Quinn had already arrived above the warship.

"You magma mad dog, do you know how much effort I spent on this banana plantation!"

The transformed body has expanded into an arsenal, and he began to pour his own firepower at Sakalski's position, but this is only to vent his anger. Whether it is a laser or gunpowder weapon, the body of the natural system None of them worked.

Lava-like holes bloomed on Sakaski's body. Whether it was Quinn's bombardment or the debris blown up by the ship, they were all melted by the hot magma.

But the attack was a disaster for ordinary navy soldiers. Quinn didn't care about this kind of thing, and it wasn't even enough to vent his inner anger, but in an instant, Sakasky below disappeared.

When Quinn looked up again, the other party had already come in front of him.

"Is there anything to regret about the hard work of pirates?!"

Billowing black smoke billowed from the fist, and the magma fist hit Quinn's face directly. Today's three generals are all natural-type abilities. Although the natural-type has brought them terrifying destructive power, their physical skills are also Not to be underestimated.

Even though Zefa always said that Kizaru paid too much attention to fruit abilities, his own swordsmanship and kicking skills surpassed most people.

Zefa's comparison target is the small group of people who stand at the pinnacle of physical arts. Compared with the older generation of navy who specialize in physical arts, Polusalino is somewhat lacking, but the ability to cooperate with Shining Fruit is also enough He has become a top powerhouse.

And Sakaski is even stronger than Polusalino in this respect.

The order given to him by the world government is to try to capture alive, or choose to kill, but he has automatically ignored the previous option, so that the sinners who suffered huge losses in the navy have no reason to live.

He will not allow Quinn to slaughter the soldiers on the ship like this. Although Sakaski will sacrifice some soldiers in order to achieve the goal, and he does not care about sacrificing a small number of people for absolute justice, but death is in exchange for benefits.

He is also an admiral, the cornerstone of the navy at the forefront, and he will definitely stand up in this situation.

Moon steps have long been the foundation for people like them. Although Quinn stretched out his arm to block it, the huge magma fist still knocked him out.

During this process, the wings on Quinn's back released two flying leaf blades with incitement, and even added arrogance to them, but the scars he left were still slowly healing.

"Domineering? This kind of domineering is not enough."*novelUsb.com*

As long as the opponent's attack position is predicted by the color of knowledge, the natural ability user can avoid this damage. Faced with Sakalski's taunt, Quinn did not continue to attack.

Looking at the slightly melted part of the mechanical arm, feeling the burning sensation on his face, he gradually regained his sanity lost under the rage.

This is the admiral. It seems a bit early to challenge this opponent.

It's just that he wants to leave, and Sakalski doesn't agree.

"Ghost dog!"

The magmatic arm stretched out quickly, stabbing at Quinn like a poisonous snake spewing out a message, and the huge body seemed to be a target for Sakalski.

This move was very fast, and Quinn couldn't dodge it, but Kaido's years of tempering played its own role. With his deep armed color, the ghost dog couldn't make a hole in him.

The scorching magma was constantly scorching his skin, and when his defense was about to be broken, a thunderbolt fell from the sky, interrupting Sakaski's attack.

"Yo, you're finally here!"

"I'm fast enough, how does it feel?"

When Quinn attacked Sakalski, most of the artillery on the warship was destroyed, and Sakalski also turned to attack him. Naturally, there was no need for Zeraora to cover the retreat of those people, and soon We will soon come to the battlefield here.

"It's okay, it's not as painful as Brother Kaidou, let's find a way to deal with this big trouble, otherwise it won't be so easy for us to leave."

He tried his best to get Zeraora out, just to prevent problems before they happen, and he has no psychological burden on joining forces.

"Correct you, it's not us, I can leave now if I want to, he can't keep me, and didn't you just want to kill him?"

“ ”

Chapter 776 My epidemic is also super brave, okay!

Just a few minutes ago, Quinn was indeed full of anger and wanted to directly kill the **** who ruined his banana plantation, but after the battle started, he calmed down a bit.

It may be that he has lived with a group of reckless people for too long, which has caused him to gradually become reckless. This kind of behavior is undoubtedly extremely irrational.

Fortunately, he had the foresight to come here with Zeraora. With the abilities of the two of them, he would not run away in embarrassment when facing the admiral. It was what Zeraora said that made him a little guilty.

He seems to have said that if something goes wrong, he can withdraw first and then ask for help. If he really does that...

"Hey, I said you won't be so unfeeling"

A few drops of cold sweat dripped down on his forehead, it seemed that Zeraora could only consider himself unlucky if he did that.

Although according to the information obtained by the thorny ammonite beast, the world government has some killing intent on him, but it still mainly captures him alive, but the person who performs the task is a paranoid, and he may really be burned to ashes.

Among the current three generals of the Navy, Polusalino is the one with the strongest pursuit ability at sea, and Kuzan is the one with the most restrictive power. It means that he has nothing to do at sea.

Zeraora couldn't catch up, so it's not a problem to stick to Quinn.

"If you have the time to talk nonsense here, why don't you help me in the battle."

It is impossible to walk directly. Although the other two pirate ships have left the shelling range, they are still not safe. Now Zeraora can cover Quinn to retreat first. Because it is safe.

But the people on the other two ships will suffer. There are also some agricultural experts on board. According to Arceus, those are precious talents, and their safety must be protected as much as possible.

A battle cannot be escaped after all.

Geiraora's fur flickered with lightning, and the lightning stored in his body entered a fighting state under the mobilization of thinking, and Quinn also regained some courage. He was not alone, and this was a two-on-one.

As for those ordinary naval soldiers, Quinn didn't take them seriously at all. Although there were two major generals on board who were in charge of other things, such opponents were very easy to deal with, but the bullets that hit him from time to time made him quite unhappy.

This is what naval soldiers and ordinary pirates do most often. Even if they know that the weapons in their hands are not very effective, they will still consume the opponent's physical strength in this way during long-distance naval battles.
noVELUS&.com

"Do you think I'm easy to bully?! Don't forget that I'm a plague!"

Although he was a little cowardly in his mouth, he did not do so in action.

A cannon barrel protruded from the mechanical arm, and Quinn's plague bomb was ready. Over the years, he has shown more and more abilities, but his nickname has never changed.

On the one hand, this is the habit of the navy. Unless some people show a completely different combat performance from before, and the battle scenes are completely captured, they will consider changing their nicknames. Arceus is an example, but this situation is very common. rare.

Most people's first reward nickname will stay with them for a lifetime, but Quinn has a more special point. Even if he shows various abilities, his greatest influence on the outside world is still the plague bomb.

In a large-scale battle, a plague bomb is a terrifying weapon that can instantly change the situation of the battle. The new toxin extracted from the stinky mud and double-bomb gas gave Quinn's plague bomb several more sequences, which can deal with various a special case.

It's just that beasts won't use this thing easily, and it has too much impact on the occupation of an island. In most cases, the use of plague bombs is only considered when executing revenge plans.

The cannon came out of the chamber, and a warhead with a firing rate much slower than conventional ammunition flew towards the deck. As long as the plague bomb was detonated, those people on the deck would become overwhelmed, but Sakasky didn't let him do so.

"Big fire!"

The arm evolved into a huge magma fist, which was caught in Quinn's plague bomb before it detonated, and then launched into the sky.

Boom!

The magma fist exploded in the sky, and the unknown ingredients in the plague bomb were detonated, and then burned up in the air.

As the admiral of the navy, all the information of cadres like Quinn is in his head. Let that thing explode, and the soldiers in this ship will basically be scrapped.

The small magma blocks that exploded were cooled by the cold air during the landing, and gradually condensed into stone rain, and Sakasky also made his own actions. He had come to Quinn's place during the time when Quinn released the plague bomb. before.

"The dog gnaws the red lotus!"

A large amount of magma gushed out from the front of the arm, and the hellhound-shaped magma bit towards Quinn. Compared with the more flexible Zeraora, he still took Quinn as the main target of attack.

One of them is the key target mentioned in the mission, and the other is that the plague bombs are too troublesome.

Although Sakaski has just protected the navy soldiers, he will not give up the opportunity to act for the safety of the soldiers. He knows very well that the people on board are not Zeraora's opponents. If Zeraora attacks those soldiers at this time, the people on board have almost no ability to resist.

But he is also confident that a Quinn is not his opponent. If Zeraora does this, he will use the time bought by the soldiers to deal with Quinn as soon as possible. This is a death he can accept.

If Zeraora comes to aid Quinn, the soldiers on board will be safe, and they can continue to chase the fleeing pirate ships, after all, they cannot intervene in the battle of the admiral.

There is no point of leverage in the sky, and the huge force forced Quinn to keep retreating. Sakasky is a natural ability user, but at the same time he is also a monster who can wrestle with Whitebeard, even if he is seriously ill and injured. The strange power erupted by the Zhenzhen fruit is enough to kill adult giants in seconds.

Quinn's size is not enough for him to overcome this. Zeraora didn't pay attention to those warships. Akainu was not there, and those people on board were enough to deal with them. He turned his head and flew in the direction of Quinn and Sakasky go.

"Mhahahaha, the admiral is nothing more than that, compared to Brother Kaidou, your strength is too weak!"

On the island, two deep ravines were drawn under Quinn's feet, which were forced from the sky to the ground. With a stronger point of leverage, he finally took Sakaski's blow.

The fire on the island came into his eyes, and he could still see the crushed banana tree at his feet. Even though his opponent was the admiral of the navy, the anger of the foodie still made him find his courage.

Although there were a few scorched holes on his arm, it was only a minor injury to him.

The dog chewing red lotus is more powerful than the ghost dog. If he used his left arm to resist, the damage he would suffer would be much smaller, but he didn't do that because he was planning how to fight back.

Chapter 777 The Devil's Grace

"Winch Bash!"

He has a technology similar to Germa's in his body, but whether it's lightning or sparks, it doesn't have much effect on the ability users of the natural department, and the brute force brought by the winch green can play a certain role.

His left arm was wrapped around domineering, in the battle just now, he chose to use his right arm to resist Sakaski's attack.

It stands to reason that using the mechanized left arm is the optimal solution, but he didn't do it.

When resisting the ghost dog before, the outer metal melted to a certain extent. If you continue to do so, the driving parts in the manipulator may be damaged, so the right arm that has not undergone modification is used to resist.

The expanded mechanical arm grabbed Sakalski, the enlarged steel claws made a sound of breaking through the air, and the domineering claws began to operate under the operation of hybrid power.

Through human body transformation, these robotic arms have already become part of Quinn's body. Even if he does not feel pain, he can still receive feedback. This attack did not achieve the expected effect, and the joints of the robotic arms also became creaky. the sound of.

Relying on his own physique, Sakaski directly stuck Quinn's mechanical arm, lava was also oozing from the body surface, and bursts of black smoke were overflowing from Quinn's mechanical arm to the surroundings.

Facing this kind of opponent, Quinn is also very difficult to deal with. He has a lot of equipment, but the attacks of those equipment have no effect on those with natural abilities. Whether it is the fragments of the explosion or a single elemental attack, hitting There is no effect on magma.

These technological weapons are crushing against ordinary weapons, but they also have disadvantages. Quinn has no way to add arrogance to invisible objects such as lightning or lasers released.

Even the tropical dragon's skills are difficult to have an effect on lava. Akainu is his most difficult opponent. After all, this is the only admiral who did not fight fake matches in the top war. After being driven into the ground by Whitebeard, he still A monster that can make other captains helpless.

Now that Quinn can wrestle with him, it is already a considerable improvement, but it doesn't matter, he is not the main force to deal with Sakalski, as long as he can be beaten now, it is enough.

The right fist smashed at Sakaski with domineering aura, but Sakaski didn't focus on this at all, and the thunder that resounded in his ears was even more dangerous.

Boom!

Quinn's fist hit the ground, just now Sakaski's body was completely turned into lava, he got rid of the wrestling with Quinn, gathered aside along the dents on the ground, and reassembled his own body.

Correspondingly, Zeraola's attack also failed. Fast speed does not mean invincibility, otherwise Polusalino would have been invincible long ago. With the help of knowledgeable predictions, Sakaski successfully avoided Zeraola's attack. attack.

However, although fast speed does not mean invincibility, it means a faster attack frequency. When Sakaski's body just gathered, Zeraora kicked him in the head.

With the assistance of domineering, he attacked Sakaski's entity, and relied on his own speed to avoid the counterattack from the opponent. After his fists were filled with lightning, he launched a new round of attacks.

At this time, his whole body was surrounded by lightning, and he had already entered the additional state of plasma lightning fist. Unlike Quinn who was slightly suppressed before, the battle between the two could not tell the result for a while.

Jeraora's speed is extremely fast, most of Akainu's counterattacks are evaded by him, and a small number of unavoidable attacks are also blocked by the defense.

In contrast, the effect of Zeraora's attack was not obvious. Sakalski's arrogance and physique were very strong. Relying on his extraordinary physical fitness, he only had a little blood on the corner of his mouth.

"Nice job! Hit him! Hit him in the face!"

"Don't order me! Don't just stand there!"

"Hey, here we come, it's not easy to make such a big noise!"

Quinn gave verbal encouragement from the sidelines, but was scolded afterwards. If this was Arceus' order, Zeraora would have no complaints even if they fought to the end.

But he was only called out by Quinn to help. If it weren't for Quinn's mess, he should be at home to tease his children and accompany his wife instead of fighting here.

It is still impossible for Quinn to command him, and he will only come because of the friendship of his "companion".

As long as this is not a battle, he must find time to fight Quinn.

Quinn is not an idiot either, he didn't just stand and watch the play stupidly, although he didn't make any big moves, but what he prepared has arrived.

Boom!

The sky is covered by dark clouds, and the entire island is covered with thunderclouds. This is the result of Quinn just now, and the large-scale prayer for rain has turned the entire island into a rainy day.

Because of Sakaski's attack, the island has long been turned into a sea of flames, and a large amount of hot air has risen, making it easier to gather rain clouds. Otherwise, Quinn really couldn't make the range of praying for rain so large.

This kind of weather is not suitable for his battle, but it is very suitable for Zeraora, and the ensuing heavy rain is also a weakening of Sakaski's magma.

The torrential rain poured down, but the flames were not extinguished immediately. The initial rainwater was evaporated when it entered the fire site, and a large amount of water vapor almost filled the entire island.

Through this layer of smoke, you can see that the red magma and the yellow thunder are constantly intertwined, and Quinn is interfering with fire from a distance to help Zeraora delay the opponent's pace.

Boom! Stab it! The clouds rolled over, a large number of thunder and lightning swept down, and Zeraora also temporarily broke away from the battle.

"The others have almost evacuated to a safe place. This guy is hard to deal with. If we fight like this for a few days, we won't be able to tell the difference."

The battle lasted for a little while, and the fur on Zeraora's body had already showed some scorched black marks, and Sakalski's suit looked extremely tattered, but the condition of the two of them was not too bad.

This battle will not yield any results for a while. It is difficult for Sakaski to defeat the two of them at the same time, and there is no way for the two of them to defeat each other quickly.

Quinn's body is not injured at all. Through self-regeneration, the scar on the right arm has recovered, but the mechanical hand on the left arm is considered to be temporarily useless, and Zeraora is also supplementing her physical strength with the help of lightning.

"If it drags on, it may be necessary to expand the scale of the battle. It's too late. It's a pity that Lao Tzu's banana plantation is gone. Anyway, it's like this. Just give him a big gift."

Speaking of which, Quinn took out the devil fruit out of nowhere.

"what you up to?"

"Master Arceus taught me a move called Grace of Nature. The power of that move is completely dependent on the fruit I carry. Devil fruit is also a fruit. Using this grace of nature, what effect do you think it is?" *novelusb.Com*

Chapter 778 The Liberated Demon

Looking at the devil fruit in Quinn's hand, Zeraora didn't try to guess the result, but remembered another thing.

"How do I remember that in the previous transposition battle, someone reported that one of the devil fruits in the spoils was missing, and I didn't figure out where it went. Could it be? Did you use it for experimentation?"

"Ahem, don't pay attention to that detail. In short, this move is very powerful. If the island has not been destroyed, I don't want to use this move."

Looking at the devastated plantation, Quinn's heart is very complicated. Sakaski's meteor volcano caused serious damage to the island, and the subsequent lightning caused the island to further collapse. Now the ground of the island is full of potholes.

Don't talk about growing bananas, you can directly soak in hot springs.

"Use it when you need it, why are you hesitating?"

"The Grace of Nature activated by it is different from the normal Grace of Nature. It takes a lot of energy, and it's a bit difficult to hit. You have to find a way to help me restrain him. Use that. I'm afraid of the ability users who are in trouble. , just prepared for you.

Just stabbing him once, and the stiffness is enough. "

Speaking of which, Quinn started to activate the moves. At this time, the thunder released by Zeraora had also ended. What Sakaski saw was Quinn who was holding a devil fruit and began to lose weight.

Release skills need to consume one's own physical strength. Devil fruit is not a tree fruit, but the power of Arceus combined tropical dragon and brachiosaurus fruit, and finally developed this new usage, at a great cost.

Almost all of his accumulated energy is supplying the release of this move.

Seeing that Quinn was preparing a new ultimate move, Zeraora didn't talk nonsense, and took out the ordinary dagger. The Hailoushi weapon is indeed a nemesis for capable people, but it can only be used for surprise attacks.

Once the opponent is prepared, it will be difficult to take effect again.

People who are strong enough can also have stronger tolerance. Hailoushi can make them temporarily useless or lose some power, but it will not be directly paralyzed.

Charlotte Lingling was bound into rice dumplings by high-purity Hailou stone chains, and she didn't just collapse to the ground. If Hailou stone is really a magic weapon, ordinary soldiers should carry more Hailou stone in the war on the top, and look for opportunities Greeting to Whitebeard is enough.

Its biggest dazzling performance is that the ghost spider took advantage of Marco's inattention and used sea stone handcuffs to shady him.

In the previous battles, Zeraora hadn't used that dagger, and Sakasky wasn't aware of it, but in the new round of battles, he felt a fatal crisis.

Originally, Zeraora was aiming at his heart, but Sakaski, who noticed the abnormality, did not choose to use armed defense, but quickly evaded, but his speed was much inferior, and Zeraora's dagger still pierced into it. over his shoulder.

Then he quickly dodged backwards, the insertion of Hailoushi's dagger made Sakaski's body tremble suddenly, but he still resisted the discomfort and pulled out the dagger.

If you want it to stay in the opponent's body for a long time, then Zeraora can't let go, but in this way he loses his own flexibility, and he is not Sakalski's opponent head-on.

Although he can cause a lot of damage during this period of weakness, it is not enough to be fatal. If he is caught because of this, he will be at a disadvantage in subsequent battles.

A ray of purple light wrapped the fruit that almost melted and hit Sakaski, and Zeraora returned to a safe distance again.

Looking at Quinn who had finished releasing the moves, Zeraora was already convinced that what Quinn said about being thin and charming was nonsense, or it might be because he was too thin now.

"Your trick consumes so much?"

"It's okay, just eat two good meals, magma bastard! Feel the anger of my uncle!"

Although the tone was a little weak, he could still hear the show off in his words, but after his voice fell, there was just a very ordinary explosion under Sakalski's feet, which was not even as powerful as ordinary shells.

"are you kidding me?"

Seeing Quinn's thunderous and rainy moves, Zeraora didn't know how to evaluate him, but Quinn was very calm.

"Don't worry, this thing needs a little preparation, it's almost done now."

Boom!

A giant scorpion with a size of more than 20 meters suddenly appeared near Sakalski, and waved its claws at Sakalski without saying a word.

Animal type · bug fruit · scorpion form, this is the type of fruit Quinn used, and the effect of his natural grace can be understood as liberation.

Currently, he has only done experiments with the fruits of the animal department, because they are very special, and the animal department hosts the consciousness belonging to the beast, and Quinn liberated this consciousness.

This is also the reason why his physical strength is almost exhausted. The action of the fruit requires a carrier, and the physical strength of the user becomes the best option. The natural grace released by the animal devil fruit is equivalent to creating an awakened one out of thin air. Animal abilities.

The giant scorpion seemed to have targeted Sakaski as an enemy, and the pliers in his hand smashed at him. Sakaski didn't pay attention to the attack of this large beast, but at the next moment, his body couldn't Smooth elementalization.

"What the **** is this?"

When he was puzzled, Zeraora also asked a similar question.

"I don't know either, but the devil is lodged in the devil fruit. My behavior like this is equivalent to liberating the devil in that fruit. It is reasonable for the devil to deal with the devil and not obey our rules."

This is the answer given by Quinn, and it is also the reason why the scorpion was able to attack Sakasky's body.

"This move is divided into three stages, the first is to lock, the person I hit will be taken as the target, and now is the second stage, the host demon will deal with its own enemies, unfortunately, this move is too laborious , too expensive."

Since discovering this move, Quinn has only tried it once, because this move is a one-time use, and each time it is used, it will consume a devil fruit. One shell per 100 million Baileys.

And it takes a lot of physical strength to activate it, and it will drain him every time.

"Okay, now we're about to leave and leave this guy alone."

"The combat power of your thing doesn't feel like it will last long."

Although the scorpion was able to attack Sakaski's body, it was only relying on the instinct of the beast to fight, and there were no outstanding results.

"Don't hold on for too long, didn't I say, this thing has three stages, and when the power to maintain it is exhausted, this thing will explode." *nOvELuSb.cOm*

Chapter 779 Rounding, I, Quinn = Admiral

"Ghost dog!"

Sakaski's whole body was covered in magma. His fist turned into a vicious dog and he hit the huge scorpion in front. The carapace on his body could not protect it well. In just a moment, the scorpion's carapace was destroyed. Lava hole pierced. *nOvELuSb.cOm*

A burst of burnt smell also came out, and the giant scorpion roared and waved the pliers in his hand at Sakasky. After suffering a loss, he chose to dodge, and the pliers smashed a big hole in the ground. Kee's piercing wound didn't take the scorpion out of action.

Because of Quinn's liberation of it, it already has the effect of awakening an animal-type ability user-incomparable recovery power.

In particular, it does not reside in a human body. Strictly speaking, it is a creature without an "entity". It only temporarily possesses this body with the physical strength provided by Quinn, and its recovery power is stronger than that of ordinary ability users. .

"Has that guy's research on devil fruit reached this point?"

Seeing is believing, Sakaski saw with his own eyes how Quinn summoned the scorpion, he clearly saw that a devil fruit became like this under Quinn's use, and he didn't know why , It can actually hurt the body of the natural department.

This thing didn't scare him. Since ordinary attacks can't achieve much effect, he should prepare a more powerful move.

Sakaski stomped on the ground, a large amount of magma gushed out of his body, and then disappeared into the island.

On the other side, Quinn was also admiring his victory.

What effect this trick can achieve, whether the harvest feature can make the used devil fruit reincarnate in other fruits on his body, he doesn't know, because the cost of the experiment is too high.

In the last experiment, a devil fruit was directly used. Although the ordinary animal type is relatively cheap, it is also a secret treasure in the sea, and it is not always possible to buy it if you have money.

Scientific research is even more expensive than war. After winning the war, you can get spoils, but scientific research is not necessarily. No matter how much you invest, you have to be prepared to waste money. No one can judge the result until the last moment of the experiment.

An experiment guarantees a minimum cost of 100 million Baileys. This is the result after conversion. The effect that a fruit can exert is often not measurable by money.

"You really discovered something amazing, what about the superhuman and natural systems?"

"I don't know, I remember that I told you that the fruit of the animal department is the most special, and they themselves contain a special will, so I made a similar attempt.

Superhuman fruits are rarer, and the effect is unknown, and I have not done any experiments. As for the natural department, we have not collected this kind of fruit for so many years. "

Quinn did not keep his own experimental results, and there was no need to hide it from Zeraora. He just lamented the rarity of natural fruits. Over the years, no traces of similar fruits have been found through various channels.

"It's almost there, Zeraora, stay away from here, you will see the third stage soon, give me a hand, I can't fly right now."

With the help of Zeraora, Quinn and him began to stay away from the island. Logically speaking, Sakasky should choose to ignore the monster scorpion and deal with Quinn or Zeraora first, but I don't know why, something really hates the scorpion in front of him.

It even slightly affected his judgment, making him decide to kill the scorpion first.

"Hell flames surge!"

The ground was cracked inch by inch, and several wide cracks surrounded the monster scorpion, and magma gushed out from the ground like a fountain, surrounding and submerging the monster scorpion in an instant.

Sakaski discovered that there is a dark river-like space under the island.

Just now Sakaski injected a large amount of magma into the underground space. As he continued to inject, the pressure below also increased. Before reaching the limit, Sakasky broke a gap and guided the magma to appear .

This is the advantage of people with natural abilities. Most elements can easily change the landscape and carry out large-scale indiscriminate attacks.

The shell of the scorpion turned red under the burning of the magma, and Sakaski's body gradually condensed in the magma. He is the magma, and the magma cannot harm him, but he can move freely in the magma.

"The dog gnaws the red lotus!"

The right arm pierced the giant scorpion's abdomen, and a large amount of magma was continuously injected into the giant scorpion's body. Under this series of onslaughts, the giant scorpion's body began to collapse, and finally collapsed into the lava.

But it was not charred by the scorching magma like ordinary creatures, but it burst out with a strange white light.

BOOM!

The third stage, explosion.

A huge mushroom cloud soared into the sky, and a powerful shock wave swept every inch of land on the island. The original remaining buildings disappeared under the baptism of the shock wave. This explosion is the essence of the grace of nature attack.

The powerful skill launched under the condition of the devil fruit has reached the extreme in power. It can be said that this time, thanks to the grace of nature, the power of the explosion has directly come to the 2.0 era of version update.

On the surface of the sea, the sea wind from the explosion blew Zeraora's fur, and Quinn also saw his masterpiece. This is the reason why he asked Zeraora to leave quickly. This explosion does not distinguish between friend and foe. If it is affected, He himself will not feel better.

In the last experiment, he didn't use all his physical strength, and he directly blew up the experimental field. Seeing the full power of the grace of nature, Quinn had already shown a wild smile.

"Mhahaha, as expected of my uncle, after such an explosion, there should be nothing left on the island. Well, there is nothing left."

Some people cried while laughing. Thinking of the bananas on the island that were about to bear fruit, they couldn't help but feel a burst of sadness in their hearts. The joy brought by the explosion has disappeared.

As for going back to check the results, he didn't want to do that. Now that they have escaped smoothly, Sakasky is the top combat force of the navy after all. Quinn doesn't think such a person will be killed directly, and not everyone is named Ah. Asura boy.

The sad time didn't last long, and he thought that he could deal with the admiral together with Zeraora, and he couldn't help but have hope for the future again. It seems that he was a little too cautious before, and he is still very strong.

These are all Quinn's inner dramas. In Zeraora's view, Quinn is like a lunatic, laughing and crying for a while, not knowing what he is thinking.

"How about I give you a message to calm you down?"

"What?"

"You shared a lot of pressure on the gang leader before, but you don't seem to be blamed for doing it like this."

Chapter 780 Explosive wolf speech, self stone hammer

Plague Quinn, most of the bounties came from the man who took the pot, and Zeraola also admitted this. When Arceus didn't want to attract attention, Quinn's identity attracted most of the firepower.

So when Quinn asked for help, he came, even if he didn't follow him in words, he helped him a lot in action.

In Beasts, it is not uncommon to lose control of emotions. The drunken Kaido basically has an irregular cycle of emotions, so Zeraora is used to it. Even if it was Quinn who did this, he wanted to help He returned to normal as soon as possible.

After all, no one has ever used that kind of weird move, it would be bad if people were really crazy.

He was fantasizing about some strange things just by looking at it. Since this is the case, he must be made to recognize a reality.

Listening to Zeraora's words, Quinn blinked his eyes a little dully, and then thought of some very bad things.

"What did you just say?"

"I said you used that trick in front of the admiral, isn't that self-inflicted?"

Everyone was having a pleasant werewolf killing. The navy and the world government believed that one of Arceus and Quinn must be a wolf, or both of them were werewolves, but there was no evidence. Everyone put on their own clothes.

Just in the speech just now, Quinn made a wolf-like speech-I am a good person, and I stabbed him last night.

To be more precise, he directly pressed the self-destruct button.

"Hello, hello? Are you okay?"

Jeraora and Quinn's body proportions are very different, so he had to pat the top of the other's head, trying to get a response from Quinn.

"Did I do something outrageous?"

"It's not too much, it's the natural grace of using the devil fruit in front of the red dog. Of course, they don't understand what is the natural grace. They probably think that you have mastered the technology of living the fruit. After all, it looks very similar. ."

"Tell me, is there a possibility that the mad dog is blind, or they didn't think about it?"no*VeUs&.CO*m

"What do you think?"

"I don't want to do this either, really, that **** forced me."

Quin's right hand rested on his face, and the prosthesis of his left arm had been scrapped during the battle, so he probably disappeared in that battle at this moment.

There is only one reason why he worked so hard and didn't consider the consequences, the boss.

Originally when he received the news that the banana plantation was critically ill, he was always depressed and worried about what he might encounter when he went out.

After creating the antidote, he thought that the banana plantation had been saved, but in the end he killed another red dog.

Losing, owning, and then watching them go, for a foodie, this has smashed his bottom line, so he used his current strongest move without thinking.

Without this, with prayers for rain and thunderstorms, the two of them can always leave after some time.

"Hey, light a cigarette for me, please?"

Quinn took out the cigar and put it in his mouth, but he couldn't find the lighter for a while because the manipulator was damaged.

Looking at Quinn with a serious face, Zeraora helped him light the cigar with an electric spark, and Quinn also fell into a state of thinking about life.

The previous blame was still in Schrödinger's state. Whether it was on him or not depended on the thinking of the Navy's intelligence agencies, which could change at any time, but at this moment, he successfully turned the blame into a part of his body.

And it is entirely on its own initiative.

In the end, he still failed to keep his banana orchard. Looking at it this way, it was meaningless to come out this time.

And in the place where you just fought.

The original island has become barren, and the lush vegetation has completely disappeared, leaving only a thick layer of floating soil. The center of the explosion has formed a lake shape, which is nothing but a lava lake.

Magma gushes out from the ground and gradually condenses into the shape of Sakaski.

Ever since he ate the magma fruit, he hasn't experienced the power of an explosion for a long time.

Sakaski did not forcefully resist, but used the impact of the explosion to follow the magma into the ground, thereby avoiding a lot of damage.

But the power of the explosion was too great, and it took him a long time to re-condense his body.

"Ahem."

After wiping the blood at the corner of his mouth and calming down the blood in his body, Sakaski looked at his right hand. When he used the dog to gnaw the red lotus before, his right arm pierced into

the body of the strange scorpion. The impact of the explosion was also the greatest, and the front section had turned black and red.

But this is not magma, but the color of flesh and blood. If it is an ordinary person, this degree of burn will inevitably lead to serious infection and eventually death, but for these monster-like people, it is just a flesh injury.

"Stop chasing, come back."

The death of a soldier must have its own value. Quinn and Zeraora have returned with a high probability. It's hard to say how much combat power Quinn has left, but Zeraora is different. The people on the boat can't deal with him, so keep pestering him. Pointless.

Besides, this is the territory of pirates. If it continues to drag on, it will soon lead to a full-scale war. The world government does not allow this kind of thing to happen.

He failed to keep Quinn, which meant that the battle had been lost, and this mission was declared over.

"General Sakaski, your wound has been treated, you can rest for a few days, and it will not affect your future life."

"Well, let's go back."

At this time, his shoulders and arms have been bandaged, and the injuries in the battle are not serious, but the knife attack by Zeraora with the Hailou Stone and the subsequent explosion caused a lot of trouble.

After telling the medic to leave, Sakaski pulled out his phone bug.

"Hello, Sengoku Marshal? I'm Sakaski, the mission failed."

"Failed?"

Navy Headquarters, Sengoku received the call with a look of surprise. It can be said that this operation has been arranged for a long time. In order not to expose them too early, they did not send too many people. He thinks that one general is enough to deal with this problem.

He thought that Sakalski might overdo it, but he didn't think he could.

"Well, it's Lightning and Plague. Lightning's speed is very troublesome, and it's holding me back for a while. It's no big deal if I'm alone, but that Quinn used an unprecedented method. I'll report in detail when I return to the headquarters. ."

"Hurry up and return."

The two of them didn't talk nonsense about this matter. At this time, Sakasky's warship looked very dilapidated, even the main guns were damaged. Such a warship could easily attract attacks in the waters of the New World.

After solving several blind pirates, Sakaski has returned to the Navy headquarters and explained what he saw.

"You mean, he "resurrected" a devil fruit?"

"seen it myself."
