

Arceus 881

Chapter 881 The Benefits of Money, Mouse and Bucky

At this time, Aaron spent most of his time by Tiger's side. Unlike Jinping, Tiger has absolute suppression on Aaron, both in strength and psychology. The baptism of time also made Aaron a little bit Variety.

When Tiger is not around, he is like an amusement park guard, fishing in the amusement park built by Mandelfish, and he has changed from a bully in the East China Sea to a security uncle at the entrance of the kindergarten.

Looking at the murlocs and mermaid children playing inside, his words also changed, it was no longer the previous set of hate theory, but he still had his doubts.

【Don't be naive, not all humans are the same as the people here, remember to stay away when you see humans in other places, and don't make trouble for yourself. 】

Aaron's logic is also reasonable. The outside world's general view of murlocs or mermaids has not changed, because if the life here makes them let go of their guard, it is actually very dangerous for them.

Aaron's life has changed, and the same is true in the vicinity of Keke Yaxi Village. Without Aaron, they did not have this oppressor, and they lived a good life for a period of time. Coke Yaxi is also getting richer due to the gold mine. .

The reserves of that gold mine are not small, and it is not easy for the villagers of Kekeyasi Village to mine it.

Led by Ajian and Bermer, they began to contact people from several nearby villages to jointly mine the gold mine.

To be precise, it is not only mining, but also protection. They need young adults from other villages to work together to protect the gold mine from being robbed by others.

The world government has no interest in this kind of rural place, and there are many islands in Pirate World. Whoever digs out this small place belongs to him, and there is no need to report everywhere.

Even Beast Mining has a lot of unknown mine sources in private, and the company they opened was only one of them approved.

With a gold mine, there will be money, and at the same time, it will also breed greed. The people who covet this gold mine have never disappeared. After enjoying the convenience brought by the gold mine, the people in Cocoyasi do not want to give it up, and conflicts also arise. Start here.

Using gold mines as the source of funds, they also bought a lot of weapons. After integrating the villagers in the village for training, they established a mine protection team. Kekeyasi Village has gradually changed from an inconspicuous small village to a small local tyrant.

This is the East China Sea. Capable pirates are almost extinct. The reward of more than 10 million is the rare "big pirate". With the quality of equipment strong enough and the terrain in the mountains, most people will take this gold mine for nothing. Method.

Although the two Heracrosses who settled in the orange orchard were not top-notch Heracrosses, ordinary people were not their opponents. Kokoyasi had been developing peacefully for a while, until the appearance of mice.

As the armed force of the world government, the navy is huge in size, with great routes, four seas, and any sea area. Even in the increasingly tense new world, the navy has retained the last bridgehead.

The huge size leads to great differences in the quality of personnel within the navy, and in the four seas, there are many stains in the navy.

The colonel of the 153rd branch-Monka, the colonel of the 16th branch-rat, these are cancers in the East China Sea Navy.

The mountains are high and the emperor is far away. In these places, as branch managers, they are the local emperors.

In the original timeline, he was often bribed by Aaron, so he didn't care about Aaron's domineering behavior in the 20 villages in the East China Sea, but in fact he couldn't control it, because he didn't have the strength to deal with evil dragons at all.

The colonel of the branch of the Great Route is at the same level as the officers of the headquarters, and is also the main grassroots combat force of the navy.

But the highest military rank in the four seas is generally the colonel, and the headquarters is lowered by three ranks. After the mouse's strength has been eliminated, it is difficult to be a lieutenant in the headquarters.

Although the strength is weak, the ambition of the mouse is not small at all. Not long after taking office, he began to plan the gold mine in Coco Yaxi.

As the supreme officer of the 16 branches, he has jurisdiction over the villages near Cocoyasi.

Originally, Cocoyasi Village also handed over part of the gold as tax, but the mouse was not satisfied with this amount, he wanted all of it.

He didn't directly rob, he had to weigh this kind of thing. If he was really exposed, the Navy Headquarters would definitely use him as an example to protect the reputation of the Navy, so he fiddled with sales.

Using his power to prevent the gold mined in Cocoyasi Village from being sold, he wanted the people in Cocoyasi to succumb and sell the gold to himself at a low price.**noveLuSB.COM**

But he underestimated these people. The villages near Cocoyasi were already self-sufficient, and the gold would not disappear even if they put it in their hands, so they entered into a confrontation with the mouse.

Some time ago, the boss he had bribed sent a report letter to him and asked him to deal with it himself. It was a report letter secretly written by Bermer and others. They bypassed the rats, but they did not expect the above people Also bought by the mouse.

In this case, the mouse decided to use more drastic means. He planned to contact a group of pirates to ransack Cocoyasi Village.

Before, due to the geographical location, Kekeyasi Village did not encounter any pirates, but now the mouse intends to take the initiative to find the pirates.

Originally, he chose Creek, wanting Creek to destroy the village, and he would quietly contact Smoker, and let Smoker catch all these pirates.

In this case, the gold is his, and the meritorious service is also his, and he can still use the pirates to kill those people.

Different from the ordinary East China Sea navy, Smoker, as a natural-type ability user, has a certain degree of dominance in the East China Sea, and is a rare just navy.

But when the mouse was about to act, Crick had already entered the great route, so he began to look for a partner again, and found Bucky the Clown.

Under the temptation of gold, Bucky agreed to this action, and caused a lot of damage to Cocoyasi, and Heracross could not resist his special shells.

They are insect-type, not steel-type or rock-type. Those Pokémon with extremely strong defenses can also be injured by trained naval soldiers with knives and guns.

Pokémon are not invincible. To be precise, these Heracrosses are not invincible.

Relying on the terrain of the mining area, the mine guard team is still guarding the gold mine.

And Heracross also started his own action to shake people. At this time, including Hero, dozens of scattered Heracrosses had gathered together.

But there are only four Heracrosses, who are also the first generation. Now these Heracrosses are gathering together to discuss countermeasures, and Bucky's reward order has been placed on the wooden board by them. This is the most difficult enemy in their eyes. .

Chapter 882 Miraculous face blindness

"The **** Bucky the Mouse actually colluded with the pirates!"

In the temporary combat department in the mine, Ah Jian angrily slapped the table in front of him. They knew that the mouse was very greedy, but they never expected that this mouse would choose to collude with the pirates.

As for how they knew, after discovering the gold mine, they didn't pay taxes at all. Kekeyasi Village is not an island occupied by pirates, but a residence of the Kingdom of the East China Sea.

After being attacked by pirates, they also contacted the navy, but they never got a reply, and the navy didn't make any movement.

The navy's communication channel is the same, unless you have the personal contact information of a certain branch chief, otherwise the contact must be the nearest branch, it is very difficult for them to get over the mouse to contact the superior navy .

"Bermer, is your report letter really useful?"

"I contacted an old friend from the past. He owed me his life. He shouldn't lie to me. Maybe the evidence is not enough, or the investigator is still on the way."

For ordinary people, the navy is a trustworthy group. Although the mouse is a navy scum, no one thought that his superiors would also accept bribes from the mouse.

"However, this guy actually teamed up with the pirates. The evidence of this crime should be big enough. As long as we can find evidence of his teaming up with the pirates, this cancer will definitely be wiped out."

Boom! boom!

Before Bellmel finished speaking, a few explosions came, and the Bucky Pirates started to attack again.

"Let's talk about it later, let's deal with those nasty guys first."

As a former navy, Bermer has also put in a lot of effort in the training of the mine guard team, and there is no problem in preparing for a counterattack.

"Captain Bucky, are you not going to make a move?"

"A few ordinary people, do you want me to make a move directly! This is an opportunity for you. If I make a move, you will have no chance to show."

Bucky said his reasons in a serious manner, but in fact, it was because he was beaten by two unicorns in yesterday's battle. The shattered fruit can make him immune to slashing, but it cannot be immune to the impact of Heracross .

Relying on his specially made Bucky bullets, Bucky repelled the two Heracrosses, but he didn't know if there were other terrifying creatures hidden here, so he finally decided to let his little brothers go to mine.

The mouse did not send anyone to participate in Bucky's operation, but provided him with some obsolete munitions. The navy's standard equipment is much better than what the pirates can get, which also brought a lot of gold mine guards pressure.

Although the night fell, the battle did not stop, and the Heracrosses flew out in groups.

Their bodies can't resist artillery bullets, so they chose night battles.

There are countless waste rocks in the mining area. One by one Heracross carried huge stones to the sky above the Bucky camp and launched a special air strike.

The boulders that fell from the sky temporarily repelled the pirates, but did not resolve the crisis of the mine from the root. Bucky, who was far away from the mountains, re-camped in an open space, as if he was planning something.

And Nami and Nuo Qigao also sneaked out from the mining area quietly, they wanted to collect evidence that the mouse and Bucky joined forces.

After all, it is the rats who are greedy for this mine, not other people. If the rats are not eliminated, even if Bucky can be defeated, there may be other pirates in the future.

"Hey, I suddenly remembered that I got a disease that would kill me if I got close to the naval base, so..."

On the Merry, Usopp tremblingly hugged the ship's mast, and made up all kinds of weird illnesses.

"Stop joking! How can there be such a disease!" *NOVELUSB.COM*

"That's the navy! The navy! Just the few of us, are we going to directly enter the navy branch?!"

"No, we're just going to rescue Hero."

Lu Fei stroked his hat and said very seriously.

They followed other Heracrosses, it is not clear what exactly happened, and these two Heracrosses met another Heracrosser on the way, and got some Heracrosses Caught by the Navy Branch news.

The mouse is not a fool, knowing that there are two unicorns that are difficult to deal with in that mine, so he caught some Heracros who rushed there, and planned to use these to force those unicorns to surrender.

Luffy, who didn't know the details, mistakenly thought that Hero was one of them, so he made a decision to rescue Hero.

"Usopp, you have already boarded the pirate ship, and it will be a matter of time before you become an enemy of the navy."

"Yes, if you are so afraid, you might as well go home."

"Don't you two want to persuade him! There should be a better way!"

Looking at Sanji and Zoro who are gearing up for a fight, Usopp doesn't understand what they are thinking.

"Huh? What are you talking about? This guy is the captain. Since you are on this ship, you must obey the captain's orders. I don't know what is the difference between this branch and the previous branch."

Wrapping the turban on his head, Zoro said his understanding very seriously, and Sanji didn't refute him, but just silently lit a cigarette.

Although scared, in the end, Usopp joined the ranks with a slingshot.

It's just that they didn't see Hero, but they met the exposed Nami and Nuo Qigao.

They sneaked into the naval base and found evidence of rats, but they were discovered at the last moment.

Finally, with the joint efforts of both parties, they successfully rescued the Heracros in the base, and followed Nami and Nuo Qigao to their gathering place.

"Hello! Damn it, are you actually injured?!"

In the mine, Luffy saw a wounded Heracross, and then jumped on it, crying and screaming.

"Huh?"

"Ah, you are not Hero, there are so many Heroes here!"

The environment of the mine is a little dark, and the appearance of Heracross is also similar. Luffy can't tell which one is his Hero for a while, and starts to check these Heracross one by one.

Looking at this inexplicable two-legged beast, Heracross's endurance limit gradually reached its limit. At this time, the Heracrosses who went out to fight came back.

Hero was taken aback when he saw Luffy. After hesitating for a few seconds, he hit and kicked directly at Luffy's waist.

"Hello? Great, so you're fine!"

"Hello, hello?!"

Hero's tone was very complicated. On the one hand, he was surprised that Luffy would catch up, and on the other hand, he was angry. At this time, his words can be briefly summarized as: [How dare you sail without this worm? Aren't you afraid of getting lost at sea?]

Chapter 883 I suspect a traitor among us *OverUsB.CoM*

"Well how on earth did he recognize Hollo? These unicorns all look the same."

Looking at the slightly weird reunion scene between Luffy and Hero, Usopp thought about another question.

Luffy may not even remember people's names and appearances clearly. He basically relies on some special features to recognize people, such as Usopp's nose, Sauron's hair and earrings, and Sanji's eyebrows.

But he was able to find Hero among a group of identical Heracrosses.

"No, the difference is quite obvious. The horns and the texture of the shell of the big unicorn are different. If you look closely, you can see it."

"And the taste is different, they are quite picky about oranges."

Usopp's words caused rebuttals from Nami and Nuo Qigao. In their view, it is not difficult to identify the individual of Heracross.

"That's because you have been together for too long, you say yes, Zoro, Sanji."

"I don't care, it's not a big deal."

"Miss Nami and Miss Nuoqigao are right~"

One is indifferent to this, and the other has already committed nymphomania, which makes Usopp start to doubt again, what is the purpose of getting on this ship.

"Hello?"

"What are you talking about, hehe, aren't we companions? Your friends are my friends, how can I miss fights."

Luffy's thinking is very simple. He doesn't think too much about the consequences when he does things. This person is his friend and his partner, so he will help him unconditionally.

Luffy and Hero chatted passionately, but Nami and Nuo Qigao were scolded by Bermel. For their behavior of breaking into the enemy camp without saying a word, Bermel saw it as courting death.

Once the collusion between the mouse and the pirates against civilians is discovered, what awaits him is a devastating blow. In order to keep this secret, the mouse will do whatever it takes.

"Just a little bit, we were almost able to find his evidence."

"Don't be stupid, you can't find that kind of thing at all, will you keep the evidence of your trade with the pirates? Even if you have, it will be destroyed by him long ago."

This matter is very difficult, even if the pirates outside go to identify him, it is useless, the navy will not believe what the pirates say. "

Ajian did not persuade Bermel either. Although they were not related by blood, he had already regarded the two sisters as his own daughters, and could not understand their adventurous behavior.

"But you clearly said before that this time you have evidence of guilt"

"We want to see if we can find his criminal evidence in the hands of those pirates."

Boom!

The explosion interrupted Bermel's words again, and Bucky and others launched an attack here again.

But this time is different from before, because Luffy made a very simple judgment.

"Okay, I see, as long as these guys are all blown away, there will be no problem, right?"

Squeezing his fist, Luffy took the lead out of the mine, intending to handle the troubles here for Hero, and then continued his voyage.

"Rubber Balloon!"

Relying on the rubber body, Luffy bounced back the shells fired by Bucky, causing heavy casualties to his subordinates, and his subordinates were also defeated by Zoro and Sanji.

Although the shattered fruit allowed Bucky to avoid many attacks, after a split, he found that part of his body was missing. Following his feeling, he found that his body was already in Helo's hands.

"You **** unicorn fairy! Give me back my uncle's body!"

Hero didn't pay attention to Bucky's roar, instead he took his body part and flew into the distance, which also made other Heracross understand how to deal with the enemy in front of him.

In the ensuing battle, Bucky's body continued to shrink.

Whenever a piece of his body was blown away, he would be taken away by other Heracrosses, making him unable to recover. In the end, there was only a dwarf Bucky who was blown away with a punch and turned into a star in the sky. to where.

But when he was hit flying, the special bucky bomb he fired caused a huge explosion. The huge impact made some pirates run out in disorder, but most of the pirates were caught by the mine guard team.

Although no critical evidence was collected, they still decided to continue to report the behavior of the rats upwards.

The gold mine has stabilized here for the time being, and Bucky can be regarded as the first pirate. The news of his defeat is enough to deter other pirates in the East China Sea.

Because of the encounter in the 16th branch, Nami also boarded the Merry. Her dream is to draw a map of the world. This dream is destined to set sail sooner or later. This is just an opportunity.

At the same time, she also wrote a new report letter, wanting to report the despicable deeds of rats in Rogue Town.

For her boarding the ship, the happiest thing is not Sanji, but Hero, because finally there is a serious person on board who knows how to sail, and it no longer needs a Zoro compass to guide the direction, and there is no need to worry about this ship. Accidentally drowned at sea.

Although Bermer and Ajian complained, they still respected Nami's choice in the end.

After the incident in Cocoyasi was over, the Merry with an official navigator embarked on a journey again.

As a reward for defeating Bucky, Luffy also broke the equipment. He seized the sea chart to the great route on Bucky's ship, giving the Straw Hat Pirates a clear direction.

But before entering the great route, they met a girl named Abis by chance, and got acquainted with a thousand-year-old dragon called Dragon Lord, and finally made a decision to send Dragon Lord to the Dragon's Lair.

"Ferren, it's time to arrive this time."

"Here we are, this is the place where our millennium dragons gather. It seems that we should have arrived earlier."

Above the clouds, Yamato and others finally arrived at the destination of this trip, the gathering place of the thousand-year-old dragon.

Circling several times in the sky, Faerun didn't notice the aura of the other millennium dragons, but when they rushed down the clouds, they saw a picture completely different from what they expected.

It's just that Yamato didn't see the Dragon Island that Fei Lun said, but saw several warships.

"Did these navies discover our destination and want to sit on the sidelines?"

Looking at the warship below, Yamato came up with a very special logic.

"How is it possible! There are only three of us here, who can give the navy a tip-off, etc. Why are you looking at me like that?"

Looking at Yamato's eyes, Ulti suddenly felt something was wrong.

"Is there a possibility that Ur-chan, you are too boring, so you deliberately sent a message to the Navy and let them come here in advance."

"Can you be more sane! Who would do such a boring thing! The three of us who are most likely to do such a thing are you! Also, don't call me by such a nasty name!"

Chapter 884 You can always trust your captain (fog)

If someone else said this to her, Ulti would think that the other party was joking, but it was Yamato who said this. If it was her, there is a high probability that she really thought so.

The car was noisy again for a while, but this did not affect the pace of the Millennium Dragon. The cover of the cloud prevented the warships below from finding the Millennium Dragon Group above, and the Millennium Dragons also deflected their direction, surpassing the warship group below and heading towards Fly away.

The sky at this time also became strange. From a distance, there was no difference between this place and the sea outside, but when they got closer, they found that it was a special phantom like a mirage.

After the Millennium Dragon in the front crossed this sea area, it disappeared out of everyone's sight.

"Hey, is there such a special sea area in the East China Sea? I thought the weather was so weird only on the Great Route."

Although it is a novelty, this kind of thing is not unusual for Yamato.

What is special about the New World is not only the unpredictable weather, but also the magical composition of the islands.

Except for the weird weather like the knife, some islands are full of invisible air bridges, which look like nothing, but allow people to run wantonly on them.

Some islands have a special gravity environment, and some islands are even made entirely of food.

All of this was attributed to the magic of the great route, and now it seems that she underestimated this world.

"Ferren, is this your Dragon Island? It looks a bit... desolate."

Passing through a stormy area, a desolate island appeared in everyone's sight. If this is the destination of their journey, Yamato is quite disappointed.

"Roar~"

Ferren's father heard two roars, and Faerun also began to translate his father's words.

"Father said that this is the island he used to come to when he was a child, when there was an ancient human dynasty here.

Because of the mirage-like barrier of the outside world, the people living here can't hide from the world, and have nothing to do with the disputes of the outside world.

Our ethnic groups often pass by here. Those people regard us who can fly as mysterious beings and respect us very much, but everything is different now. "

The lifespan of the Millennium Dragon is very long, and some people have never seen their true face in their entire lives. For the older Millennium Dragon in this group, this island is the canteen at their doorstep.

Walking around for several years, I always want to go in and look for some childhood memories when I go home, but the return date of the Millennium Dragon is too far away for human beings, and when they come back, there is already nothing here.

"By the way, it looks like a castle there."

"Father said that there used to be a human kingdom, and there are some interesting murals inside. If you are interested, you can go and see it."

At this moment, a group of birds flew past them, and it seemed that they came to them after seeing the thousand-year-old dragon.

Although the body shape is similar to that of an ordinary bird, in terms of appearance, it is somewhat similar to the body of the Millennium Dragon.

"Phelan, is this your cub?"

"No, haven't you seen the children of the family? They are bigger than these birds. This is just another bird that has a common ancestor with us, but they have always lived here. No, there are others on this island."

There was a burst of smoke and dust floating on the island, and an unknown object was rushing down from the top of the island at high speed. If you look carefully, you can see a suspected thousand-year-old dragon from a cart.

This is the group of Luffy who escorted Lord Long back to the dragon's lair. According to the guidance of Lord Long, they also came to this island, but there is still a period of time before the dragon's lair is alive. There is also some deviation from the position of the dragon's lair. So no destination was found.

Besides, Lord Dragon has been hunted down by others. At this time, people who are greedy for the keel of a thousand-year-old dragon are also chasing up, so Luffy and others will lead Master Dragon to rush down from above at high speed, and Sauron will be responsible for breaking the rear.

"Are they doing something new? Grass skating?"

"Who knows, but it's good to be able to move around a bit. After leaving Xiaopei, I'm rappelling!" *noVelUSb.com*

Ulti unbuckled his seat belt, opened the door of the carriage, pressed his collar with one hand, and put his arm around Peggy Wan's neck with the other, and jumped straight down.

They originally accompanied the Millennium Dragon home, but now there is a special situation below, and there is a strange Millennium Dragon, no matter how they think about it, they will not ignore it, so Urti pulled Peggy Wan and jumped directly.

"No, I said old lady, can't you get a parachute yourself!"

"No, that's too slow, and it's not as convenient as Xiaopei, you are the best~"

"I don't want you to praise me in this regard at all."

She complained about her sister's indecent behavior, but Peggy Wan was still obedient, or rather pampering, and acted cooperatively.

With the accumulation of time, they have become more proficient at mastering transformation, and they have completed the transformation in the blink of an eye.

A strong airflow spewed out from the cracks in the scales, and Peggy Wan rushed towards the ground. Ulti also took advantage of the wind resistance generated by the slide to come to Peggy Wan's back, and held him very skillfully. of the dorsal fin.

The Millennium Dragon and the Steel Armored Crow also flew downwards, but they were much slower than Ulti and Peggy Wan. After all, Peggy Wan flew in a jet and went straight down.

"Ah!! I feel like I'm the fastest moving person in the world right now!"

On the small cart where Master Long was, Usopp's screams spread throughout the island with the sound of the wind.

"What's the point of that kind of thing!"

Sanji doesn't agree with Usopp's idea, it doesn't make any sense to him.

"Shut up! Luffy, find a way to stop! This cart will fall apart before it reaches the boat!"

"It's okay, it's okay, trust me, it will be fine."

"Trust me! Nami, you asked the wrong person, hehe, think of a way!"

Instead of asking Luffy for this kind of trouble, it is better to ask Hero, which is at least a little more reliable than Luffy.

But their panic didn't last long, someone stopped the cart for them.

Boom!

Peggy Wan, who descended from the sky, inserted his feet into the ground, crossed his arms in front of him, and made the upper fins like a shield, stopping the speeding cart.

It was not difficult to stop the cart alone, but at the same time, Peggy Wan used his skill to defuse the impact on it, so that the cart did not fall apart. This time it showed his power control.

"You guys."

"Cool!"

"Aha?"

Looking at Luffy and Usopp whose eyes were twinkling with stars, Peggy Wan was forced to stop what he hadn't said yet.

Chapter 885 The caring eyes, the old relative of the Millennium Dragon

Peggy Wan's Bite Land Shark was transformed from the Spinosaurus fruit, which is a relatively large type, and Peggy Wan is among the top numbered ones, one of the few capable people who, like Jack, prefer the beast form.

He is about six meters tall in the beast form. Because of the shark-like pectoral fin wings growing on the forearms, the land shark looks like a jet plane when it folds its body and stretches its wings.

Now he stands upright, very similar to a deformed jet fighter. Whether it is this feature or the appearance of biting a land shark, it is the point of excitement for Luffy and Usopp.

Although they are fledglings, because of Luffy, they know that there are mysterious objects called devil fruits in the sea, but they don't know that devil fruits are divided into three categories in detail. Peggy Wan is the first animal they see. Those who can.

"Be normal, you two! No matter how you look at it, this is not a friendly army!"

Hand hammering on the heads of Luffy and Usopp, Sanji hoped that these two people would be normal, but the next moment, he became one of the abnormal people.

"Xiao Pei, what are you waiting for?"

"Ah, this beautiful lady, what can you do to stop us?"

Boom!

Sanji also joined Luffy and Usopp, and was punched by Nami from behind.*noVelusb.Com*

"Eh, sister, what do you think should be done next?"

Peggy Wan was confused by the other party's abnormal behavior. In the new world, the people he faced were either afraid or arrogant. It was the first time someone said he was cool. He was only eighteen years old this year, and his vanity was overwhelmed. Some little satisfactions.

"Wow! The dinosaur is talking! Luffy, did you hear that?!"

"This is even cooler. Where can I catch such a dinosaur? It seems to be able to fly. If you can raise one, it must be awesome."

"Ahem, well, I heard that there are many dinosaurs like this on an island."

Looking at Usopp bragging seriously and Luffy listening to his bragging seriously, a new idea appeared in Peggy Wan's mind.

【This can't be two fools, right? 】

He was never relentless when dealing with the enemy, but fool, this made him a little embarrassed to start. Fortunately, at this time, Yamato and the Millennium Dragons followed suit.

"Thousand-thousand-year-old dragon! There are so many thousand-year-old dragons, hey, are you here to pick up the dragon master?"

Seeing Fei Lun and other thousand-year-old dragons appearing here, the fear in Abis's heart was instantly swept away.

She is a descendant of the ancient dynasty resident that Fei Lun's father said, and she met Long Ye by chance. She was not attracted by the reward of offering a thousand-year dragon reward, but began to do her best to protect Long Ye.

Luffy and others made the decision to **** Long Ye also because of her.

She herself is an ability user of Whispering Fruit. Although there is no increase in combat power, she can communicate with any animal, so there is no obstacle in communicating with the Millennium Dragon.

"Master Long, Master Long, look quickly, your companion is here to pick you up!"

The old Dragon Lord raised his head, looked at the thousand-year-old dragons around him, and a few tears flowed from his eyes.

"Roar"

"Roar!"

One of the thousand-year-old dragons wanted to say something, but was interrupted by the dragon master, and then Fei Lun's father also came over. Looking at the thousand-year-old dragon, the dragon master seemed to recall something.

"I said Abis, what are they talking about?"

Because of the appearance of the Millennium Dragon, Peggy Wan and the others did nothing but listen to a group of Millennium Dragons communicating there. However, the existence of Abis saved Faerun from acting as an interpreter.

"That thousand-year-old dragon seems to be an old acquaintance of Master Long."

Millennium dragons have different ethnic groups all over the world, but when Dragon Island is alive, they will still meet here, which leads to even if they are not of the same ethnic group, they will have some relationship, or even met each other.

【Old man, why did you come here? And it's a little early. 】

【I'm afraid. It's too late】

"Wait, Master Long, didn't you say that your illness will be cured when you arrive at the Dragon's Cave? Your companions have already arrived, so don't worry anymore, they will definitely take you back, right?"

Abis sensed something abnormal in Master Long's words, but Master Long only reassured her and didn't say anything else.

Only other thousand-year-old dragons know that Lord Dragon's time has almost come to an end, and now it is just holding on to that breath, waiting for the reappearance of Dragon Island.

"Hey! What are you doing here! Why don't you leave!"

Sauron's figure appeared from the side, followed by Eric who had been chasing and killing Long Ye.

He also heard the legend that the bone of the thousand-year dragon can make people live forever, so he teamed up with the navy to hunt down the thousand-year-old dragon, and wanted to get the keel he dreamed of. Sauron stayed on it before to delay time.

Looking at the many thousand-year-old dragons present, Eric also had a greedy smile on his face. These are countless dragon bones in his eyes. If he can get all of them, his wish will be fulfilled.

"Roar"

"Roar!"

"Ah, I got it, really, you old man will trouble me if you have something to do, Miss Yamato, you and your father will send Master Long to Long Island first, and I will follow after I deal with this guy.

It doesn't seem to matter if you wait, anyway, there is plenty of time anyway, and it won't take much time to solve this guy. "

The first sound was Master Long telling the enemy, and the second sound was Fei Lun's father asking his son to teach that guy a lesson.

The environment will affect the behavior of intelligent creatures. Living with beasts for a long time, Faerun's group is also the most violent among the thousand-year-old dragons. They will never show mercy to those who want to hunt for dragon bones.

"Thousands of thousands of dragons can also talk!"

"No, it turned into a dragon man! Abis, won't the dragon transform? Let it transform into a dragon too~"

Looking at Faerun who transformed from a thousand-year-old dragon form into a dragon-man form, Luffy became excited again. He saw too many interesting things today.

"Dragon Master never said that a thousand-year-old dragon can become a human"

Before Lu Fei and others said anything, Eric had already taken action. In his opinion, the Millennium Dragon is a very nourishing animal, and the Millennium Dragon that can turn into a human is the Millennium Dragon that has become fine.

The keel of such a thousand-year-old dragon must be more powerful. With a wave of his finger, several sickle weasels flew out from his fingertips, slashing towards Faerun.

"careful!"

This is a reminder from Sauron. For him now, Eric is a very difficult enemy. The weasel swung in his hand is extremely fast and powerful, and even he is quite difficult to deal with.

But Phelan didn't do anything to evade, and walked over with Eric's attack.

"For the sake of sending the old man all the way, let you know what real strength is."

Chapter 886 One Piece, it won't be yours

Eric, a mercenary by profession, can also be regarded as a member of the bounty hunter, but in most cases, he accepts employment from the navy.

Superman · Kamaitachi fruit Kamaitachi, can release powerful Kamaitachi slash with fingers.

The sharp sickle weasel can easily smash rocks, and it doesn't need to be charged. As long as his hand speed is fast enough, he can release countless powerful wind blades.

Of course, this also has disadvantages. While raising the lower limit of attack, Eric's upper limit of attack is also locked. Even if you charge up, you can't increase the power of your own weasel, and you can only increase the power of your own attack through the number.

He can release a large number of weasels to form a weasel tornado, but the power of each weasel has not increased.

It is extremely difficult for him to achieve a qualitative change.

Such an ability is very difficult to deal with in the East China Sea, but for the Millennium Dragon fighting in the New World, Eric's attack is not painful.

No matter how strong the number of attacks that can't break the defense, it doesn't make sense.

Primitive man fruit + progenitor bird ability user, Faerun is a rare dual ability user among beasts, not to mention the body of the thousand-year-old dragon.

To understand it from another angle, Master Long is the second uncle at the entrance of the village who saw his father was born and lived with him for a while. Although he doesn't know him, he is a relative after all. .

Now that someone has sent the old and weak seventh uncle back to his hometown, there is no need for him to express anything, but it is still okay to pour a glass of water.

It is enough for these people to understand the gap in the world.

He is not Kaido, he is not interested in teaching people every day, it is enough to help them open their eyes.

"You have been playing for so long, you should have had enough, right?"

Eric's Kama Weasel fruit is essentially a transparent wind blade, and the wind has no color. Generally, his opponent can barely see the change in the shape of the air, and many enemies cannot react to his attack.

But Fei Lun was different, he didn't even predict, he was simply resisting his attack with physical strength.

In the eyes of outsiders, it is Eric who keeps waving his fingers, while Phelan is slowly approaching him.

Seeing that the situation was not good, Eric ran back, trying to distance himself from Faerun.

But as Fei Lun's wings shook, he appeared in front of Eric again.

"Where do you want to go?" *novELus&.com*

Boom!

The right fist swung out, and Eric was swung by Fei Lun, smashing through several walls of the ruins before stopping.

"Sister Yamato, let me do it, a guy like that is enough."

Seeing Falun playing with Eric like a cat catching a mouse, Peggy Wan couldn't wait any longer. Playing with an opponent who was too weak didn't make any sense at all.

"Forget it, this is a matter of the Millennium Dragon, and there is nothing wrong with letting them do it by themselves, and Fei Lun didn't have any trouble dealing with that guy at all. He probably didn't want this little girl to see too **** scenes."

Yamato didn't think that Faerun would overturn in such a place, and the sound from the ruins was getting smaller and smaller, which meant that it was self-evident.

"Hello, hello~"

At this time, Hero was also flying up and down beside Yamato, talking to Yamato.

"Well, it sounds like you're doing fine."

"You look very familiar with Hero, Hero has never been so close to other strangers before."

"That's for sure, after all, it's Heracross."

Whether it is the power of Tokiwa or her own special identity, the first generation Pokémon born on Onishima has a special affinity for Yamato, and Hero is still suing. Although Yamato has not shown it yet, some people are already going to be unlucky up.

It was also on this day that Luffy officially heard the racial name of Heracross from someone else. He had heard Hero mention this word before, but he didn't know much about this special transliteration word.

Originally, Luffy still had something to ask about Hero, but Faerun who returned interrupted him.

"It's been dealt with."

With Master Long, Yamato and the others went to Luffy's Mellie together. Master Long is already very weak, and it is too difficult to let him fly by himself, and Master Long also went to Long Island with Abis wishes, so Yamato and the others did not fly up with Master Long.

Luffy with a big heart didn't care about this kind of thing, Abis's thoughts were all on Master Long, and Usopp and Nami didn't notice any problems, they just felt that each other was very strong.

Ke Sanji and Zoro are different.

"Hey, Chef, has that guy been gone for less than three minutes?"

"It's even shorter, that Millennium Dragon is too powerful, Eric is no match at all, he doesn't seem to want Abis to see too cruel scenes, otherwise he might kill the opponent directly.

but"

"But what?"

"Those two ladies are so beautiful!"

"You bastard!"

Sauron and Sanji looked at these strangers vigilantly from behind, Yamato was continuing to chat with Heracross, but Luffy and Usopp entangled Peggy Wan and asked him how he achieved the cool transformation .

That kind of innocence from the heart can't deceive people. With the vanity satisfied, Peggy Wan popularized the classification of devil fruits with them.

"There are three types of devil fruits. The ones you eat are ordinary superhuman ones. In addition, there are natural ones and animal ones. I even rarely see phantom beasts."

"It turned out to be like this, it looks amazing."

Some things cannot be fooled. For example, in the crowd, you can see the eyes of some innocent college students who have not yet integrated into the society. This is the situation of Luffy now. His performance is really the same as that of ordinary little fans.

They got along relatively harmoniously for a while, until they came to the seaside again.

"So you are also pirates."

"Yeah, right, I forgot to introduce myself, my name is Luffy, and I'm the man who is going to be the One Piece."

A very classic speech came from Luffy's mouth, but only the laughter of Ulti and Peggy Wan came to his ears.

"Okay Xiao Pei, Ur-chan, don't laugh anymore, it's okay for others to have dreams. Although they can't realize it, we still respect him."

Yamato didn't laugh at the other party, and there was no mocking meaning in what he said, but the damage index was not bad at all.

"Hey! Why do you say that I can't be the Pirate King?!"

"It's very simple, because the one who wants to be the Pirate King is my father."

This is the final consensus of the Hundred Beasts Pirates. Whether it is Yamato who wants to overthrow his father every day, or Ulti who dares to say that Kaido is an idiot to his face, they all have a common understanding in their hearts. The next One Piece, it must be Kaido.

Chapter 887 Jie Wang Assistant is online

Leaving aside the facts, this is the common belief of all members of the Pirates. People who join Beasts have various reasons. Except for being picked up by Kaido, most of them are attracted by his strength.

Many people had fantasized that they would become the One Piece before going to sea, but when they saw the cruelty of reality and realized their own gap, they transferred their past dreams to the captain they admired.

Not only beasts, even Whitebeard who is not interested in the position of One Piece, has the same voice in his pirate group. In the eyes of the members of the Whitebeard Pirates, only Whitebeard can be the One Piece.

Even Whitebeard, who has no interest in this, can't avoid such emotions from the pirates under his command, let alone Kaido, who is already interested in the Great Secret Treasure.

And making Kaido the One Piece is also one of Yamato's goals today. After losing a certain Oden's Horcrux, she is quite normal except for being more stubborn.

And One Piece is not her ideal, her goal is to defeat Kaido head-on through hard power, and then rectify the order of beasts as the second generation of beasts, creating a situation she wants to see.

However, outsiders will not be allowed to intervene in this battle between father and daughter. No matter how they fight, it will be an internal fight among the beasts. No matter who wins or loses, it will ultimately be the problem of the beasts.

Let outsiders intervene, and the nature will change.

Talking about the facts, apart from the ever-expanding overall strength, Kaido is still getting stronger.

In the original timeline, he was called the strongest creature because he couldn't be killed. Although he constantly challenged other four emperors and the navy, he fled after defeat in most cases, and came back after a while.

But now he is the one who defeats the opponent, or retreats calmly after losing interest, and the strongest creature has become more worthy of the name.

Even Kaido has obtained three pieces of information about the historical text of the road signs necessary to lead to Ralph Drew, and he is the person closest to One Piece in the true sense.

Although Luffy shouted that he was the man who was going to become One Piece, Yamato was not angry, but just found it interesting.

This is not a ghost island. If someone breaks into the ghost island and shouts that sentence, it is no different from declaring war. There must be a stick.

To be able to break into Onigashima, it is impossible not to know that it is Kaido's territory. If you say something like that knowingly, what will happen depends on Kaido's mood.

Of course, according to the current situation, if any enemy can enter Ghost Island, the first thing he has to face is the furious Quinn.

That means that someone has crossed the line of defense he set up, which is a great insult to his achievements over the years and a great threat to his life safety.

But it's different here, a group of ordinary pirates who are fledgling and haven't even entered the great route shouted such words, and Yamato and others would only listen to them as a joke.

People always have dreams, or no matter when, dreams will never disappear.

Even in the new world, there are still not a few people who are obsessed with the title of One Piece.

If everyone who yelled this sentence had to be beaten up, she might have just arrived at Murloc Island.

"Your father? But I still won't lose. The one who will become the One Piece will be..."

"Hello!"

Heracross on the side suddenly hit Luffy's head with a heavy slash. Due to his rubber man's characteristics, he almost smashed him into a round pie.

As the external brain of the Straw Hat Pirates today, it believes that it is necessary to shut up Luffy now to avoid any unnecessary conflicts.

"What's the matter, hehe, you don't believe me, I have worked hard for this goal for a long time."

"Okay, just tell a joke once. It's boring to listen to too much. Didn't the battle just now make you realize the gap?"

Yamato didn't care much, and Peggy Wan didn't care, but Ulti, who had the most irritable personality, felt a sense of boredom when he heard him keep nagging that sentence.

"Ur-chan, it's not good to be so irritable."

"Huh? I want this kid to understand the cruelty of the world ahead of time. It's for their own good. Didn't Faeren do the same thing just now? And the only one who can become Pirate King is Captain Kaido!"

As soon as the voice fell, Ulti's figure disappeared in place like a teleportation. When everyone saw her again, she had already come to Luffy's side and pressed him on the deck of the Merry with one hand.

"Damn it, it hurts so much, I'm obviously rubber, how could I be hurt?"

"A naive brat like you should just live your dream of being the One Piece King in the East China Sea. Just these two things, why challenge that throne!"

Without transformation, Ulti completely suppressed Luffy with one hand. In terms of their strength, even Faerun is invincible in the East China Sea. Transformation is completely superfluous.

The reason why Faerun chose to transform before was just to fight in a human form, and Peggy Wan was to fly. For fighting, relying on his own body is enough.

Ulti who suddenly turned his face, and the rubber man who was beaten in pain, all of these made the people in the straw hats on the boat unable to react, all of which happened too fast.

They don't know that this seemingly gentle girl is actually the number one beast among all beasts today, and Jack might not be able to match her alone.*novELus8.com*

This is to see that Yamato and Peggy Wan had a good chat with them before, otherwise they would not just be pressed to the ground.

Zoro and Sanji who were vigilant, Abis who was at a loss, Nami and Usopp who hid behind in fear, Peggy Wan who looked helpless, and Heracross who was anxious. state.

"Ann, An, we are not interested in being your enemy, and you are not qualified to do so, we are just here to witness the dragon's lair of the Millennium Dragon.

Ur-chan is right, you guys are not enough to see on the great route, of course, it is up to you to believe it or not, Faerun, the time is coming soon, right? "

Waved his hand casually, Yamato didn't regard them as enemies, but asked Faerun about the time.

"Soon, we should leave too."

"Well, if the dragon master can't fly now, then he can use another method."

In recent years, it is not the power of Zekrom that Yamato has mastered the most, but the power of the transformed Kyurem.

At the beginning, Arceus used her Dakou True God as a carrier to transform a brand new Kyurem body.

In the beginning, what she mastered was only the power of the original Dakou True God. Until now, Kyurem's power has only shown the tip of the iceberg.

"Frozen. World!"

The power in her body began to rotate, and an extremely cold force erupted from her body and spread along the soles of her feet. As the name suggests, whether it is an island or the sea, under the influence of Yamato power, it has become a new ice world.

Chapter 888 The Frozen World, Reshaping the World View

Lightning strike and staggered lightning, blue flame and staggered flame, these are the exclusive moves of Zekrom and Laceyram. Kyurem, as the body, naturally also has his own exclusive moves.

The frozen world released by Yamato at this time is a powerful skill released by her after becoming more and more proficient in this power.

When Kyurem was used by the plasma group, even if he was imprisoned, the power of the explosion was enough to freeze the entire Ssangyong City. As an important city in the Hezhong area, Ssangyong City has a huge area, at least larger than this ordinary city. The island is much larger.

Rocks, land, vegetation, islands, and everything nearby were frozen at a speed visible to the naked eye. In the blink of an eye, the temperature dropped sharply, and even snowflakes began to scatter in the sky.

As Kyurem's exclusive move, it has the terrifying power to change the sky. Even if it is still sunny, the water molecules in the air will turn into ice crystals and slowly fall under the influence of extreme cold.

Even the Merry was covered in frost, but Longye was not surrounded by ice, which shows that Yamato's grasp of power has become more and more proficient.

Applying the logic of a swordsman, the difficulty of cutting everything is not easy at all compared to cutting everything.

Compared with destruction, protection is more difficult.

"Hey, hey, hey! What are you doing! As for such a big movement! It's so cold!"

Tightening the cloak behind her with one hand, Ulti's voice was slightly dissatisfied. Although this huge temperature difference did not affect her, she still felt very uncomfortable.

"It's not that Master Long is not easy to move, so we can drag it out directly."

"What nonsense are you talking about? This is the sea. Isn't it the same for that raft that floats directly on the water and pulls it across? Sneez! Damn it, whatever you think is your problem!"

"Almost, almost, wait, I'll find you a blanket."

Flipping through her satchel, Yamato took out a thick blanket. It can be said that her satchel is stuffed with all kinds of weird things, and most of the time she can find all kinds of daily necessities.

"No need, Xiaopei and I just squeeze together. It's time to get down to business. Do you still want to waste time here?"

"That's right, little girl, if you want to see Master Long, just follow along. Don't worry, if no one interferes with the ice, it will be fine after four or five days of freezing. It's very strong."

Seeing that the time is coming, she didn't continue to entangle here, she was just a passer-by who met by chance, even if she brought Heracross with her, it could only show that his nature is not bad, and it doesn't mean anything.

and Fei Lun and the others set foot on the ice with the Millennium Dragon, and the group walked towards the outside sea.

"Thirty million Baileys is a good reward in the East China Sea, but there are so many pirates like you on the Great Route. If you still have this mentality, you should disband."

Because of the youth's vanity, when Peggy Wan left at the back of the hall, he looked at the trembling Usopp and said a few more words.

Some changes have taken place in Luffy's reward order. It is no longer the smirking face, but the picture left when they broke into the 16th branch. Even Zoro and Sanji also have some limbs in the photo. It looks more like a hodgepodge.

Pei Jiwan accidentally scanned the reward order just now, so this sentence came out.

Abis had followed the cart that was pulling Master Long when Yamato left, and the thousand-year-old dragons flying around made her let go of her guard and chose to take risks to follow, but most of the Straw Hat Pirates were stunned. Land, don't know what to do.

Hawkeye let Sauron see what the world's number one swordsman is, but Sauron knew that there was a gap between him, but he didn't expect it to be so big. After experiencing the combat power of the ceiling-level swordsman, he has a new struggle Target.

But the appearance of Yamato further refreshed their understanding of the world. She didn't do anything, but with just one step, the whole island was covered with ice, and even the rough sea fell into a still age.

Eric, who had made them very difficult to deal with before, was easily dealt with, which made them have certain doubts about the future. What terrible things will they encounter along the way.

At this time, Luffy sat up again, looking at the frozen sea, he knew that the Merry would not be able to move for a while, but he still walked towards Long Ye.

"Wait! Luffy, what are you going to do?"

"Go and see where Master Long's Dragon Island is."

"those people"

"Hero said that they are not bad people. I believe Hero. Although they are very strong, I still won't give up. Or are you all afraid?"

Straightening his hat, Luffy still chose to follow. Seeing him still full of confidence, the corners of Zoro Sanji's mouth also rose. This is the captain they are optimistic about.

"Well, I suddenly remembered that I have a disease that will kill me as soon as I step on the ice. Wait, wait, I can walk by myself!"

Usopp's objection was meaningless after all, and he was followed by the two of them. Only Nami and Hero, who were behind, looked sad and looked at the group of people in front of them full of worry.

Besides the mirage, several warships have lost their ability to move. The target of these navies is also the Millennium Dragon. In other words, the target of the admiral of these navies is the Millennium Dragon. Eric also came here after accepting his employment.

"Admiral Nelson! All the warships can't move! The ice is so thick that it's very difficult to destroy it!"

On a large warship sits an obese navy. He is Admiral Nelson in the Navy's mouth, Nelson Roy, Admiral of the Eighth Branch of the Navy.

Monka and Rat at least have normal body shapes, while Nelson has been completely fat into a ball. Except for the tattoo on his stomach and the coat on his back, it is completely impossible to tell that such a person is actually an admiral of the Navy Branch.

In fact, this is exactly the case, he has almost lost the ability to move normally due to his obesity.

"Take me there to see."

"yes!" *NOVELusb.com*

The six soldiers lifted the chair Nelson was sitting on with difficulty, and led him to the side of the ship, so that he could observe the ice well.

"Strange, why did the sea freeze suddenly? Is General Aokiji doing anything here?"

In the East China Sea, the navy group knows the most about the world. As the leaders of the branch, they still have a certain understanding of the top generals of the headquarters.

The ability to freeze the sea has always been Kuzan's exclusive ability in the eyes of the Navy.

This also gave Nelson a headache. If Kuzan was really here, many things would be troublesome, but he didn't know that the troubles he encountered were far more serious than Kuzan.

Chapter 889 The turbulent and exploding East China Sea

Kuzan would put him in prison at most, but Yamato and the others would sink him directly to the bottom.

It's just that greed quickly occupied Nelson's heart, because he saw the thousand-year-old dragon. In addition to the dragon master weakly lying on the cart, the thousand-year-old dragon group flying in the sky made his face full of greed. Fat also trembled because of this.

"Hey, keels, there are so many keels."

The fat on his body did not appear out of thin air, but was nourished by years of corrupt life as the admiral of the eighth branch. When he enjoyed a lot of things that ordinary people could not enjoy, he also had a certain impact on his lifespan. More persistence.

The keel of the thousand-year-old dragon became his target. Looking at so many thousand-year-old dragons, desire was already burning in his body. *novELusb.com*

"Fire! Shoot down all those thousand-year-old dragons! Even if they are dead, it doesn't matter, as long as there is a keel, that's enough!"

As long as it is handled properly, the bone can be preserved for a very long time. For Nelson who only needs the keel, the life and death of the Millennium Dragon does not matter.

Before Eric was disposed of by Faerun, Nelson received his news, so he surrounded the fleet with the entire branch. These warships were not the large warships used by the Navy Headquarters to execute the Demon Slaying Order, but ordinary small warships of the Four Seas Branch.

Nelson connected all the warships together with iron cables to form a line of defense with iron cables. However, due to the frozen world of Yamato, this place has been completely frozen, and those warships were also trapped on the ice, so they could only adjust their artillery to shoot .

"Oh, isn't this the navy from before? They really came for the Millennium Dragon."

"Isn't this obvious, but these guys are so annoying, can I sink those ships?"

Kicking the shells fired by the other side, Ulti was full of displeasure looking at those warships. She had been idle for a while, and when her hands were itchy, these navy ships were sandbags for her.

"Whatever, anyway, they are also chasing the Millennium Dragon, they are the enemy in the first place."

"Take your domineering look, these guys can't stand your domineering look, and if you kill them all, there is no point to play."

Overlord color domineering has always been a good helper for clearing miscellaneous soldiers, and crowd tactics are meaningless against the owner of overlord color domineering at all.

Because the trial of the dragon space can enhance the strength of the overlord color, considering the average quality of the East China Sea Navy, it is impossible to escape the fate of being wiped out.

"You don't have to worry about that. There is still a chance for you to fight. If it doesn't work, I will ask Father to fight with you after returning to Ghost Island."

"Shut up! Who wants to fight with your idiot father! You'd better suffer the pain yourself, Xiaopei, you are on the left, I am on the right, let's see who fights better."

Hearing that Yamato mentioned Kaido, even Ulti shivered.

Even she has a serious psychological shadow on Kaido's "teaching", and all the cadres who are ranked first in Beasts have a deep understanding of this.

Especially Quinn, as a victim who can be paralleled with Yamato, Kaido's eight fasts left too many traces on him.

The ice surface made by Yamato provided a perfect battle field. In the time it took to speak, Ulti rushed towards the enemy warships. At the same time, the Millennium Dragon also launched an air strike on these navies.

As a member of the Hundred Beasts Air Cavalry, they have often fought against the navy in the form of the ancestor bird. Even if they are now in the shape of a thousand-year-old dragon, they can still cause huge troubles to these navies.

"The starboard ship No. 1 is under attack! The port No. 9 ship is under attack! The defense line has been breached!"

After being frozen, these warships lost the ability to move. Facing the flying Millennium Dragon, these warships almost became living targets.

"Counterattack! Everyone counterattack! Anyone who dares to retreat will be exiled to a desert island!"

Hearing the news of the attack on the fleet, Nelson began to order his navy to counterattack. Although he was full of brains, compared with those moths in the East China Sea, his ability was stronger.

The Eighth Branch has at least a large-scale naval fleet, and it also has good combat effectiveness in the East China Sea. Nelson's iron lock tactics are an example. Most pirates in the East China Sea cannot deal with the Nelson Fleet of the Eighth Branch.

Unfortunately, the matching mechanism this time is very bad, even more disgusting than the ELO mechanism. He directly encountered a group of tourist groups who came out of the new world to fry fish.

In addition to the Millennium Dragon who launched the air strike, his fleet also faced two raiding vanguards.

From the beginning of the battle, Nelson heard continuous bad news. Warships were destroyed every minute, and the fleet he usually relied on for survival became weak at this time.

Even with Nelson's order, the soldiers under him showed a tendency to collapse.

"What's going on? What's going on, how many enemies are there!"

"Admiral, besides those thousand-year-old dragons, there are only two enemies."

"Two people?! How is it possible! Did two people defeat my fleet?"

In a panic, Nelson accidentally fell from his seat. The heavy tonnage made it impossible for him to sit up. He had to rely on the support of the soldiers to correct his posture.

"Who the hell, haven't found their information yet?"

"Are you the admiral, you fat pig? It looks like I won."

With a sway of the iron chain connecting the hull, Ulti has arrived on Nelson's ship, holding a bleeding meteor hammer in his hand, but the hammer handle is also hard, more like a mace and a meteor hammer combination.

"It doesn't matter if you win, old lady, you didn't say what will happen if you win."

Peggy Wan landed from the other side of the ship, and looked at Ulti indifferently. There is no bet on the outcome, and it doesn't matter who wins.

Until this time, the intelligence officers in the warship ran out of the cabin in a panic with the information of the two people, but when they saw the two people who had broken through to the main ship, their feet softened, and the two reward orders also slipped down. .

His speed is not slow. Since the beginning of the era of great pirates, the number of pirates on the sea has been increasing day by day. Even in the East China Sea, there are countless people offering rewards of several million.

As a local branch stationed in the East China Sea, their intelligence is also about these newcomer pirates, and they don't pay much attention to the pirates in the new world.

They are not highly recognizable people like Kaido, and Ulti and Peggy Wan are not interested in portraying the Pirate Flag on their bodies, so their time was delayed, but when they figured out each other's identity Afterwards, the heart became even more helpless.

Beast Pirates - Ulti - Bounty - 470 million Baileys

Beast Pirates - Peggy Wan - Bounty - 350 million Baileys

Chapter 890 Kuzan save me!

Due to being plowed too many times, Donghai's average bounty is only three million Baileys.

The bounty of three million Baileys means that the bounty criminal himself has no special ability, at most it is a little stronger, and most of his strength depends on foreign objects, and it is just things like artillery or armor.

There is no tempering of the body, and the skills are not too strong. As long as there is a chance, an ordinary soldier can kill him with one shot. Facing such an enemy, crowd tactics can usually work wonders.

This is also the enemy that the East China Sea Navy faces most often. Not to mention the pirates who offer a reward of over 100 million, they must carefully consider their actions. Otherwise, Klick would not have been rampant in the East China Sea for so long.

470 million and 350 million, the bounty offered by these two people has already exceeded 100 times the average amount of the East China Sea. Unless it is equipped with a product that is still in the laboratory like Seraphim, conventional weapons have already lost their effectiveness.

"What do you look like in a panic? Does this scare you! Later, I will send you to a desert island!"

Looking at the fallen soldiers, Nelson showed a trace of disdain on his fat face.

"As a member of Nelson's fleet, how could you. How could you."

With a bang, Nelson fell from his seat. His overly fat stomach caused him to lose his balance, and he couldn't get up for a while.

Just now, the bounty order that fell on the deck was blown up by the sea breeze, and his peripheral vision glanced at the amount on the bounty orders of Ulti and Peggy Wan, and the nine-digit amount choked back all his words.

The fat body moved on the deck with great effort, and Nelson finally got the two reward orders.

"Ten billion."

The fat on his body trembled a few times, sweat dripped from Nelson's face, and a puddle of liquid quickly gathered under his body. It seemed that besides sweat, a lot of other liquids were mixed in.

"It's disgusting, Xiao Pei, you should deal with that guy. The navy in this place is really a bunch of trash."

"Aren't you quite excited just now, why don't you want to move now?"

"I'm a girl, okay? Do you have the heart to let your lovely sister touch such dirty things?"
noVelusB.COM

"Be patient, and I don't think you care about this kind of thing."

It is common for Urti, who mainly fights in hand-to-hand combat, to be covered in blood. At that time, she would not care about it, and Peggy Wan has long been immune to Urti's coquettishness, so this tone cannot sway him at all.

At this time, Nelson suddenly started laughing like crazy, which made Ulti and Peggy Wan confused.

"Xiao Pei, it's all your fault, I'm scared crazy by this guy."

"No, I think it's because of your hammer, old lady"

"Hahaha! You pirates are finished! You guys are going to be finished soon! You don't even know what you are going to encounter!"

At that moment just now, Nelson felt that he realized that all of this must be a conspiracy of the Navy Headquarters. The reason why Admiral Aokiji appeared here must be to arrest these pirates with a bounty of over 100 million.

Only pirates of this level will let the general of the headquarters take action, which can perfectly explain why Aokiji appears here.

Yes, until now, Nelson still believes that the means of freezing the sea is Kuzan's Ice Age, not Yamato's frozen world.

Yamato hadn't used this trick much in his previous record. Nelson, who had little understanding of pirates in the new world, instinctively brought it into Kuzan's ability.

"You guys have to wait to spend the rest of your life in Imperton! The admiral's promotion is just around the corner! Hahaha!"

During this short period of time, Nelson, who fell into fear, thought he saw hope. If this was Kuzan's plan, Kuzan's character would not give up his bait.

He who has done a good job in luring the enemy will definitely be promoted in the future, and those thousand-year-old dragons probably won't be able to escape, so whether it is the keel or the status, he will be at his fingertips.

"It's really crazy, is the navy in the East China Sea so unintimidated?"

Turning her wrist, Ulti swung her hammer. She didn't want to hit such a strange opponent, but Nelson laughed so wildly in front of her, which made her even more upset.

But before she could throw her hammer, Nelson was hit by another attack.

Boom!

With a loud noise, Nelson's position turned into a big hole, the entire warship was pierced by this blow, and Faerun's figure also appeared in front of them.

Until death came, Nelson did not accept the reality, and was still immersed in his own beautiful fantasy, dreaming of immortality, promotion and wealth

"I'm sorry to bother you, Dragon Island is about to appear, I'll take care of this trouble first, don't you mind?"

"It's okay, it's okay, you just get rid of that dirty thing, Xiaopei, go and see what it looks like below, it's disgusting to think about it."

The soles of Fei Lun's feet were dripping with blood, which was obviously not his own blood. Since Fei Lun's body was a thousand-year-old dragon, Fei Lun was not interested in human clothing. That blow directly pierced through the deck. Nelson's untrained body Not to mention.

From Faerun's blood paw prints, one can guess what kind of virtue is under that deck.

"I don't want to watch it either, so let's blow it up."

BOOM!

The ammunition depot on the main ship of the Nelson Fleet was ignited by flames. The huge explosion destroyed the main ship, and also destroyed the will of the navy on other nearby warships. The ice surface started its own escape.

Ulti and Peggy Wan had no intention of chasing them. Such an enemy was not interesting to them at all, and their mission was not to annihilate these navies.

Where these navies can escape is their own business. In order to hunt the Millennium Dragon, all members of the Eighth Division were dispatched, but the surprise attack of Ulti and Peggy Wan destroyed their fleet's defense line in a few minutes.

Nelson, as the chief, was also instantly killed and had no chance to issue effective orders. This caused other navies to have no idea what happened in this sea area.

If they want to receive information, at least they have to wait for those defeated troops to escape to a safe place. Even if they have phone bugs, they don't have any intention of reporting. There are still terrible guys in the sky.

The Millennium Dragon in the sky didn't mean to let them go, and was still attacking. The sharp stone blades condensed from their mouths, and then turned into the most deadly weapon.

The Millennium Dragons also returned here after chasing them for a certain distance. Instead of landing, they hovered in the sky. Faerun also joined the circling ranks, waiting for the appearance of Dragon Island.
