

ARCEUS' PIRATE JOURNEY

Chapter 9: hapless quinn

Chapter 9 Unlucky Quinn

"This doesn't look like a toothless pterosaur."

As a scientist, Quinn's technical level is still online. Human modification and viruses are his main directions. When it comes to this aspect, biology is an indispensable part.

Not to mention pterosaur fossils, living pterosaurs can be found on some ancient islands.

Toothless pterosaurs do not have the thick tail of Jhin, and the width of the lower and upper jaws far exceeds the shape of the pterosaur's mouth.

"It's just that these wings are a bit of a waste. You Lunalia people can fly, right? That stinky girl's flame temperature has increased a lot, what about you?"

Quinn seems to have regained his vitality, or he didn't want to work hard just now. I don't know how much his body has been transformed, plus the recovery ability of the ancient species, this will have almost recovered.

Those who are engaged in research have a lot of strange exploratory hearts, but after speaking, he suddenly regretted that Jhin was in the form of a complete beast, and the size of the fossilized pterosaur had expanded a bit, and it was flying in the air at this time.

When Quinn questioned his ability, Jhin's eyes showed a rather dangerous look, and there was even a smile on the corner of his mouth.

"Hey, you guy shouldn't"

Quinn swallowed, and the next moment, Jhin waved his wings, and four huge boulders the size of houses appeared out of thin air, burying Quinn directly below.

But this weight is still acceptable to Quinn. After some struggle, Quinn climbed out again in dismay, but today he seems to have suffered a little more.

"Isn't this guy a pterosaur! Why would a pterosaur use the power of a stone! Let's make some sense when transforming the phantom beasts!"

"Are you an idiot? Eudemons are called Eudemons because of their unreasonable abilities."

Quinn didn't say a word. Looking at the boulder that appeared out of thin air, he had already fallen into deep self-doubt. A few minutes ago, these two were not capable.

Although the Ancient Species are not as powerful as the Eudemons, they are also rare animals, and the increase is not small, but after a while, he saw that these two people became Eudemons.

Who would despise more abilities, both horizontally and vertically became landlubbers, of course, the stronger the ability, the better.

People sometimes like to hug together to keep warm, Quinn naturally looked at Kaido, who he thought was not a power one, and then he learned that Kaido is also a phantom beast.

Kaido doesn't mention that the source of Jhin and Shaina's abilities is Arceus in the final analysis, and Shaina's name for Arceus has always been Lord Holy Beast.

Quinn knew exactly what was in that research institute. The only thing that came with the two Lunaria people was that strange egg and those two slates.

He didn't believe that a um. alpaca or a horse could pop out of the stone, and he couldn't see what species Arceus was, but I'm afraid this was hatched from that egg.

And when Quinn looked at Arceus, Arceus was also looking at Quinn. He had tried the ability of the incompetent, and the indefinite mutation of the devil fruit had also been tried. If you want to try other transformations, you need to find a few more demons. Let's talk about the fruit.

At this time, he still wanted to try to transform the ability person. There are ready-made ability people here. Kaido can forget it. Arceus can determine that the stronger the main body, the greater the consumption, and the transformation of Kaido is too laborious.

Quinn is not much worse than the incompetent Shaina, and using him as a test subject is not bad.

It's just that Quinn is not like Jhin and Shaina. They have established a relationship due to race. Although Arceus is not sure about the direction of transformation at this time, it can be determined to be beneficial and harmless. Strengthening Shaina and Jhin is to better find the slate.

is also to let Kaido see the benefits he may obtain. There is no problem with strengthening Quinn, but he feels that there should be more value in this fat man.

For example, this guy is from the research institute, so he should know the traces of some slates.

The slate was released from the body by Arceus and suspended in front of Kaido and Quinn respectively.

"There are still sixteen such slates, and that is my power." In some games, Arceus does not have ordinary slates, because Arceus who does not carry slates is an ordinary type.

But when he became Arceus, the common system also became a part of the power, and each slate represented an immunity to attribute attacks.

In reality, there is no limit to carrying only one slate. When he retrieves all the slates, he can be invincible first, regardless of whether his attack will be effective.

"Kaido, to emphasize again, these are what I need, bring them to me, or bring me information about their location, I will pay for the ability of the Eudemons species, this is the agreement between us, there are Problem?"

"Well, no problem, then the alliance between you and me is established! It's time to hold a banquet!"

The Banquet of Pirate Culture, there is a banquet when an alliance is formed, a banquet is held when there is something good, and a banquet is held when there is no need for a banquet. Even the pirate group of Rox has this influence.

Every pirate basically has a heart to hold a banquet, but now this deserted town is not suitable for a banquet no matter what.

It turns out that Kaido didn't go into a brainless state, and knew that this place was not suitable for banquets.

Of course, the most important thing is that he likes to hold banquets, but he doesn't like to organize banquets by himself. There are only a few people under him, so he can't do anything about it.

"Let's talk about the banquet next time, but we should still drink a feudal wine or something."

When one pirate group decides to join another pirate group, both parties will drink the "wine of the adopted son", but when two people of similar strength choose to form an alliance, they will also take similar actions to express their sincerity. Although it is only a face project, it has always retained this tradition.

I found a few containers from the rice cake azuki bean soup shop where Quinn was just now, two big and three small, Kaido also announced the establishment of his pirate group - the Beast Pirates.

Arceus did not join the beasts, but he planned to use the name of the beasts to search for the slate in the future, so as not to cause some unnecessary trouble.

Now only the few people in front of him know that he was hatched from that mysterious giant egg. If this news reaches the World Government, it may cause a lot of trouble.

It is worth mentioning that the wine bowl of Arceus was helped by Shaina. The core of the Hundred Beast Pirates was established again, and Kaido looked at Arceus's slate, as if recalling something. Arceus did not disturb Kaido, but turned to look at Quinn.
