

## Armipotent 1651

### Chapter 1651 Ancient Kingdom

"Bwahahaha..." Bernal let out a laugh, "Yes! I like those eyes. Yes, that's right. That's a much better idea than just killing you. I will turn your wives into prostitutes and let you witness monsters ravage them! I will torture your children right before you! I will do it! I will make you suffer just like what you did to me!"

Right after finishing his words, a portal formed behind Bernal. The bear-kin had a crazed grin, giving Tang Shaoyang a last glance before entering the portal.

The intense killing intent and raged aura subsided along with Bernal's departure, leaving Tang Shaoyang and Arion.

Tang Shaoyang looked up at Arion and uttered one word, "Why?"

"Listen to me, Tang. You can't fight that guy, you will lose!" Arion answered honestly.

"Me? Lose that guy? That's not funny if that's your joke. Why Arion? Why did you save him?" His expression was flat, responding to Arion.

Bernal might have not gone all out, and so did he. He was still confident in beating Bernal in a fight. Arion should know it.

"Not to him, but to his son. The Sorc Clan is Urosa's descendant. While they are not pure Urosa, they have Urosa Bloodline in their blood. His eldest son managed to awaken Urosa Bloodline, and The Ancient Kingdom took him. Bernal's son is now married to one of The Ancient Kingdom's princesses, and he is one of the Commanders in The Ancient Kingdom. The Ancient Kingdom will come for you if you kill Bernal!"

It was more complicated than just simply killing Bernal. The implication was bigger than Tang Shaoyang thought. That was why Arion helped out.

"Then let them come to me! I would rather they come to me than my family!" Tang Shaoyang was so frustrated, "Now what's the difference? Bernal will ask his son to find my family, and they will still come to me. You are not helping me!"

Arion let out a sigh, "The Ancient Kingdom is far scarier than the Nirvana Alliance and God Alliance combined. They have existed for so long, even further back than your Kankara'Xeo's era."

"And? What's the difference? What you did just put my family in danger. If I killed Bernal now, my family would be safe. The Ancient Kingdom will come for me instead of my family. My family should be safe if you did nothing, but now there's this guy who has a big-shot son who will come for my family."

Tang Shaoyang waved his hand and turned around. He felt like punching Arion's face if he stayed longer with Arion. Losing his Administrator Class was the last thing he wanted in this situation.

Arion regarded Tang Shaoyang as a friend despite their short conversation. He wanted to help his friend, saving his friend from a dangerous force like The Ancient Kingdom. But he realized how different Tang Shaoyang is from the people around him.

Tang Shaoyang prioritized his family over his own which was the opposite of most people he knew. The people Arion knew would not hesitate to sacrifice their family just so they could survive, to keep their life. As long as you were alive, you could create a new family again. Arion had the same view as these people.

He did not understand why Tang Shaoyang cared so much about his family when she could make a new family. Once Tang Shaoyang was targeted by The Ancient Kingdom, no matter how many lives he had, he would die. The Ancient Kingdom was just that scary.

"Ungrateful b\*stard. Not even thanks, huh?" After saying that, Arion left the ruin.

\*\*\* \*\*

Tang Shaoyang vented his frustration at the calamities. He was so mad at Arion who unnecessarily meddled in his affair. They were not even friends. By the time he wiped out the calamities from the ruin, he calmed down a little bit.

He could think clearly now and understood Arion's goodwill. Arion, an Executive Administrator, was afraid of The Ancient Kingdom. Then this Ancient Kingdom was indeed more powerful than The Nirvana Alliance and The God Alliance combined.

That explained how the leader of the Sorc Clan could sneak into this mission place. His connection with The Ancient Kingdom allowed him to get into this place. Even maybe the reason why the one-eyed calamity was willing to work together with Bernal.

However, it changed nothing. He would still kill Bernal and let The Ancient Kingdom come for him rather than targeting Earth.

Boom!

He punched the broken wall. Just remembering what Bernal said to him made him angry. He rubbed his forehead, more homework to do with another new name on the list, Ancient Kingdom.

Tang Shaoyang shook his head and focused on the thing he could control first. But with Bernal's threat, he needed to add another layer of security on Earth. He had Luneia, the twins, Forlan, and Hemlin to protect his home. That was far from enough to protect his home even from The Divine Church let alone the force bigger than Nirvana Alliance.

"Cheer up, boss. We have quite a lot of harvest," Vandir came over, "Your mood is leaking. The skeleton is not taking their share of the skeleton. They want you to use these calamities for sacrifice."

He checked his newly upgraded inventory. After upgrading the inventory, he had almost unlimited slots. At least that was what he thought when he first upgraded them, but that was not the case now.

Vandir did not lie when he said it was a big harvest. It filled eighty percent of his inventory. Because of how big the calamity was, it could not be stacked in one slot. That was the reason why his inventory was almost full.

It did not take long before he made the decision. He took out fifty Unique Rank Calamities, and a few of them were one-eyed calamities.

"Huh!?"

There were six one-eyed calamities in this fifty batch. He remembered that he killed four of them, the remaining six one-eyed calamities should be in the throne hall. He forgot about them because of Arion.

Checking through his inventory, he found the remaining one-eyed calamities. Everything made sense now. Arion came and killed them, at the same time, he spoke with Bernal and forced The Sorc Clan's leader to leave this abandoned world.

## Chapter 1652 Big Harvest

Tang Shaoyang did not use his newly acquired materials to summon new spirits but to get his current contracted spirits stronger. He knew these spirits were loyal to him. They would be on his side even if he resurrected them later on with a few exceptions.

Doombringer was a wild card. The Behemoth who sought a thrill in a battle might not stay with him.

Karoen the Void Knight had not opened up with him as well. He might leave to finish his unfinished business before he dies. He did not know even though they sometimes shared their thoughts.

Baccara was not fully on his side yet, not until he avenged her. Ammor the Sky Dragon, the Guardian of The Dragon Realm was her killer. But he did not want to fulfill that promise yet.

There were The Nirvana Alliance and The God Alliance he needed to take care of first. Now there was also The Ancient Kingdom. He did not want to add the Dragon Realm to his list.

He chose Vampir as the first spirit to upgrade to the next rank. Not because they were so close, but because he wanted to see how many Unique Rank Calamities needed for the High Archaic Spirit to reach the Pinnacle Archaic Spirit.

Tang Shaoyang tried with the first one-eyed calamity and checked the progress bar. One Unique Rank Calamity worth 1% progression. That was not good, at all. That meant he needed to look at one hundred Unique Rank Calamities for the upgrade.

Going through his inventory, he had one hundred thirty-four Unique Rank Calamities in inventory. With the fifty he took out earlier, he had one hundred eighty-four Unique Rank Calamities in total.

That was only enough to upgrade for one High Archaic Spirit. He would need more Unique Rank Calamities to upgrade his current contracted spirits to the pinnacle.

[We have taken down one kingdom, there are sixteen more. We could have at least fifteen pinnacle ranks by the end of this mission. Of course, you can't share the remaining sixteen Calamity Kingdoms with others.]

Vampir read what was in Tang Shaoyang's mind and helped do the math, an estimation. He had returned to the Spirit World because he needed to stay there for the Spirit Advancement.

[If you can have all the colonies as well, then you might have twenty pinnacle ranks.]

That was almost impossible. He might have the sixteen kingdoms since most of the team would avoid a kingdom. But it would be different with colonies.

[You are being too ambitious, Boss. Instead of targeting the pinnacle ranks, you should target the high rank instead. That's more feasible and easier. Then you choose the spirits you fully trust to get to the pinnacle rank. Zara and Karan for example. They are loyal to you, and you trust them.]

There was no one in the Spirit World but Vandir. The others were summoned outside, so that was why the skeleton did not have to pay attention to his words. No one could hear him but Tang Shaoyang and Avyn.

That was more a solid plan than upgrading all his spirits to pinnacle rank. He sacrificed one hundred Unique Rank Calamities for Vandir.

[Woah! Woah! Woah! This is what it feels like advancing to a new rank?]

Vandir sounded so happy after the advancement. The skeleton talked on his own, about research and stuff, something no one understood but him.

[Don't disturb me for at least a month, please!]

"Nope. You must pay for the advancement. You must help me take more Calamity Kingdoms!"

Tang Shaoyang rejected the request without a second thought. Then he recalled Zara back. He had a few hundred Rank 6 Calamities, and he wanted to see how effective Rank 6 Calamity was for the Archaic Spirit.

0.1%

That was the rate for Rank 6 Calamity, which was not worth using for advancement. He needed one thousand Rank 6 Calamity to upgrade the Low Archaic Spirit to intermediate rank. He did not have enough of them because he did not even have a thousand of them to wipe out a kingdom.

However, he had a lot of Rank 7 Calamity. There were more than thirty thousand of Rank 7 Calamities in his inventory. He tried one of them for Zara. It was supposed to give a better rate.

0.3%

It was better, but not much better. It doubled the Rank 6 Calamity, but he had a lot of them in him. Calculating the number in his head. One Rank 7 Calamity was 0.2%, meaning he needed...

[Five hundred Rank 7 Calamities to reach intermediate rank!] Both Zara and Avyn said in unison in his head.

Tang Shaoyang's eyes shone when he heard the number. He checked his inventory once more, checking the exact total of Rank 7 Calamity in his inventory.

32,827

He checked his spirit list. There were twenty-three Low Archaic spirits. That meant he needed...

[11,500 sacrifices to advance them all to intermediate rank.] Both girls were better at math than him for sure. They responded at the same time, and later they giggled.

There was no hesitation as he recalled all the spirits back to Spirit World. Then he had twenty-three Intermediate Archaic Spirit. But there was still one Low Archaic Spirit, Karoen.

Tang Shaoyang asked Karoen first if he wanted to reach the intermediate rank. Karoen's main goal was a resurrection, and going further up in rank meant more Spirit Energy for the resurrection.

The Void Knight could not decide it so quickly like the other spirits.

"My Spirit Energy is still less than four million. The only way for me to increase my spirit energy is to sacrifice bodies for summoning. Using bodies for advancement does not increase my Spirit Energy."

He checked his status screen, and Spirit Energy remained the same when he reached the God Rank. He had not summoned a new spirit since Baccara. He had been using the bodies for advancement.

"Do you want to wait a little more time? Only after I advance them all to high rank will I start summoning the new spirits."

That was his plan, forming a spirit army to fight the Nirvana Alliance and The God Alliance. He could have his Demonic Army with his Demonification, but the spirit was more convenient. He could bring them anywhere and anytime.

Chapter 1653 You Better Not Stop Me

Tang Shaoyang could feel Karoen's struggle. The knight wanted to be resurrected so badly, but he also wanted advancement.

"Take your time, Karoen. It will take a while for me to finish the mission. Maybe I will have enough Spirit Energy by the end of the mission."

He tried to comfort the knight, but he did not dawdle to make Karoen speak. What the Void Knight wanted to do when he was resurrected and so on. If Karoen did not want to tell him, then he would not pry.

Tang Shaoyang then tried Rank 7 Calamity for Intermediate Archaic Spirit. He hoped it would still be valuable for the Intermediate Archaic Spirit. He still had more than twenty thousand of them.

0.01%

He expected it to be low, but not this low. His expectation was 0.1% for one body, but it was lower than that.

[Ten thousand Rank 7 Calamity for one advancement.]

Maldros came up with the number first, faster than Avyn and Zara. That was the number for one advancement to intermediate rank.

Then he tried Rank 8 Calamity. He had a little over eight Rank 8 Calamity in his inventory. He wished for one Rank 8 Calamity worth 0.1%, but it was not up to his expectation.

0.06%

One Rank 8 Calamity was 0.05% progression. That meant he needed two thousand Rank 8 Calamity for one upgrade. That was still low. He did not have enough for twenty-three spirits.

Then he checked Rank 9 Calamity in his inventory. There were 1829 Rank 9 Calamities. He took one to check the number.

0.56%

Even Rank 9 Calamity was just worth 0.5 for intermediate Archaic Spirit. He thought of saving Rank 9 and Unique Rank for High Archaic Spirit. But he might need the Rank 9 Calamity right now.

First, he used the twenty thousand Rank 7 Calamities just to get rid of them from his inventory. Zara and Karan reached a high rank. Then he used all eight thousand Rank 8 Calamities for four spirits: Baccara, Afi, Bronson, and Malki.

The six spirits did not obtain a new title from the advancement. But for sure they acquired new knowledge from the advancement.

Tang Shaoyang decided to keep the Rank 9 and Unique Rank Calamities for later. It was already a big harvest for him. One new Pinnacle Archaic Spirit, six High Archaic Spirits, and seventeen Intermediate Archaic Spirits.

Finishing up his business, he looked around. He could continue his exploration or return to the 17th fort. He had a new target now, the calamity kingdom. It might be too greedy to get the remaining sixteen kingdoms.

"I need to get at least eight or maybe ten more kingdoms," He muttered in a low voice.

But that was a problem with his team. They did not want to fight the calamity kingdom for sure. It was better to go on his own.

Tang Shaoyang was not irresponsible. They chose to join his team despite his risk, so yeah, he could not leave them behind. He did not know if the other teams might target them because of him.

The choice was obvious, returning to the fort. It was fortunate that Karoen set up a portal gate that directly connected to the fort not far from the ruin. His knight set up the long-distance portal so he could return as soon as possible.

One week's journey was cut short in less than a minute. He returned to the fort through teleportation.

Entering the fort, Tang Shaoyang heard a commotion from the main area. He raised his right eyebrow, trying to identify the voice. It was a surprisingly familiar voice; it belonged to Nayla and Renan.

Both were begging and asking for help from the other teams in the fort to save him. However, their pleas were responded to by mockery, laughter, and curses.

Tang Shaoyang shook his head and smiled, "Can't they trust their Captain?"

He was glad that they were asking the other teams for help. That showed how cared they were. They lowered their pride and begged for help for him. That was enough to earn his trust. Of course, he was not so naive to fully trust them yet.

Heading toward the main area, his smile faded, replaced with a frown. The situation escalated as the pleas turned into an argument, and then it turned into violence. He heard screams from his team.

He hurried over, and by the time he got there. Ira was on the ground, with her face kissing the ground and a red-haired woman sat on her head.

A beastkin grabbed Agnes's wrist, hanging her in the air. Two men slapped her smooth face.

Lucia had it worse, there was a sword on her thigh and shoulder. Renan covered for her, with seven swords on his back. Someone was above Kiara, punching her face. Nayla tried to stop The Senior Administrator who tried to throw more swords at Renan.

Nayla was the only one safe, that showed her background that might be even bigger than Ira.

One thing that Tang Shaoyang did not understand. Why didn't they fight back? While they might get overwhelmed by the numbers. It would not be easy to take them down. But why didn't they fight back? Why would they let it happen?

"Help!? Do you think we will help your stupid leader!? He fights the Calamity Kingdom by himself? Who does he think he is!?"

"Yo! Yo! Stop the violence! We need to keep them in good condition, or else how are we going to enjoy our nights? No one could protect them, let's have fun and feed them to Calamity!"

"We bring a lot of healing and stamina potions. They would not die from something like this, so let them have fun first."

It was followed by lecherous laughter.

Tang Shaoyang was about to stop them, but then he sensed a presence above. He looked up and found Arion was there. He did not know how, but Arion almost erased his presence, so no one detected him.

Arion just watched everything happen from above, not even trying to stop these people.

"Since you don't have the intention to stop them, you better not stop me too, Arion!" His voice was loud enough for everyone to hear.

Chapter 1654 Get Things In Order

There were more than a hundred people there, three teams. They all looked toward the voice and were shocked to see Tang Shaoyang was still alive. Everyone thought Tang Shaoyang was dead already, fighting a Calamity Kingdom by himself.

It had been a few hours since his team returned. They expected Tang Shaoyang to die in a few hours.

But they noticed Tang Shaoyang was not looking at them, but looking above them. Everyone followed his gaze and found Executive Administrator Arion above them. They could not sense Executive Arion, at all.

"Tch..." Arion clicked his tongue, surprised that Tang Shaoyang could find him after he erased his presence, "They are not administrators, not one of us. Why would I help them? They are not my responsibility, but yours."

"And yes, I will not stop you as long as you don't kill the Administrators. Those Admin Helpers are disposable. There will be a lot of Admin Helpers ready to take their places!" After saying that, Arion left the 17th fort.

The Executive Administrator leaving without punishing them was a big relief for them. They thought they were done for once they saw Executive Arion. But then they heard what Executive Arion said just now.

That meant they could do anything to these six Admin Helpers and also their captain. As long as they did not kill Tang Shaoyang. They were free to do anything. But they were not aware that those words were not for them, but for Tang Shaoyang.

The reason Arion gave the permission was to let Tang Shaoyang punish them for what they did. Tang Shaoyang could do anything as long as he did not kill the Administrators. Arion would cover for Tang Shaoyang. But of course, that sounded different in Tang Shaoyang's ears and everyone who heard it.

"We can kill these useless Admin Helpers! Kill the man!" A man shouted, pointing his finger at Renan.

But before anyone could do the job, a scream resounded. Everyone turned toward the scream and found Tang Shaoyang grabbing the man who was holding Agnes.

Tang Shaoyang was already in his dragon transformation when he grabbed the man's head and lifted the beastkin into the air.

"Is he Administrator or Admin Helper?" The question was meant for Agnes.

"Admin Helper!"

The moment he got the answer, the head popped out like a watermelon. It was followed by the sudden burst of his aura and killing intent.

The people who surrounded his team members subconsciously jumped away, including the people who held his team members.

Then he summoned all his spirits, all of them, twenty-seven spirits, "Why don't you guys test out your new power?"

"Don't be afraid! We are still outnumbering them!" One of the Senior Administrators shouted.

They were aware of Tang Shaoyang's class. That was the reason why they did not dare to touch the team when Tang Shaoyang was around them. When they thought Tang Shaoyang died, they revealed their true colors. While they were intimidated by Tang Shaoyang, they still gathered the courage to fight back.

A fight almost broke out. Almost because it was not even a fight. Some of them tried to use True Transformation, but Avyn showed them her true form. She subdued in less than one minute. It was not a fight, at all.

There were one hundred and twenty-seven people captured, and he killed one earlier. None of them died, they were subdued so quickly. Of course, there were a few dyings, but healing potions saved them before they were beaten again by his spirits.

One hundred and twenty-eight people were from three teams. Tang Shaoyang thought it was five Administrators teams, but they were three teams.

From these people, there were only thirty Administrators: seven Senior Administrators and twenty-three Junior Administrators. The remaining ninety-seven were Admin Helpers.

Tang Shaoyang brought them to the fort wall. He separated the Admin Helper and Administrator first. He summoned one hundred and twenty Chaos Blades and hung thirty Administrators on the wall.

The humiliation was that they were stark naked, whether women or men. He could not kill the Administrator, but he could humiliate them. That would make them remember not to mess up with him.

Four Blades for each Administrator, and it was not just a normal blade. He imbued Absolute Domination Energy. The blade also had Slayer Energy characteristics, preventing them from natural regeneration and healing. They could not break free from the blades unless they received help.

The nine-seven Admin Helpers were kneeling below the thirty Administrators. Their heads hung low, no one dared to look at Tang Shaoyang or the spirits.

"What should we do about them, Master?" Bronson came over, "Should we execute them all?"

The ninety-seven Admin Helpers flinched when they heard the word execute. Executive Arion said clearly that the Administrators would not be punished for killing them.

"Don't kill them!" Ira came over and stopped the notion of killing these Admin Helpers despite the humiliation she suffered.

"Why!?" Agnes responded in anger, "They must be killed! Kill them all!"

Her bloody cheeks healed with the healing potion. This was not enough to calm her anger. She wanted to kill them all, especially the two Admin Helpers who slapped her. Even though it was an order from the Administrator, she would not forget the humiliation easily.

"Not worth it! They are not worth your energy, trust me," Ira glanced at the Admin Helpers, then shook her head, "Whatever you want to do, sleep with the girls or slave the men during the mission. You can do whatever, but don't kill them."

Tang Shaoyang shrugged and turned toward the ninety-seven Admin Helpers, "I will not kill you, but you must stay still until the mission is over. I will kill whoever leaves their positions!"

"We should kill them, Boss. They are good materials for my advancement, no?" Radiance said in a regretted tone as he looked at the ninety-seven Admin Helpers. He followed the way Vadir called him and became a buddy with the skeleton. A skeleton and a creature made of frost, what a combination.

Tang Shaoyang shrugged, "We will get more materials when we find more Calamity Kingdom. Just wait until then."

He did not know the reason why Ira stopped him, there must be a reason for her to stop him despite the humiliation she suffered.

Chapter 1655 The reason

Arnold Boratos returned to the fort after going out to hunt for four days. He was in a bad mood because he failed to get into the top ten contributions. It was embarrassing that a team led by the Chief Administrator was not even in the top ten.

He returned tonight to make sure the fort was safe because he planned a long hunt. As he entered the fort, someone rushed toward him. He did not recognize this person, meaning this person was at best Junior Administrator or even an Admin Helper.

Arnold's expression turned ugly when he heard what this person explained to him. He rushed over, thinking the fort was attacked. By the time he arrived at the scene, he found thirty administrators were hung on the wall by the deep-red blade, two on the forearms and two on the thighs.

Below the thirty administrators, almost a hundred Admin Helpers were kneeling. Some of them were missing their limbs, but their conditions were much better than the thirty Administrators.

The most bizarre was a white skeleton in skeletal armor, a polished bone sword on the waist, and there was some weird flame in its socket. The skeleton sat on the barrel, with one knee crossed over the other. As if the skeleton was there to punish these three teams which was the most absurd one.

"What is this!?" Arnold roared in anger.

He was in a bad mood in the first place. This scene triggered him even more. He wanted to make sure the fort was safe, but he instead met with this kind of situation.

"Get up and get down from your Administrators!"

To Arnold's surprise, no one listened to him. Some of the Admin Helpers looked up at him, but then these people looked at the skeleton before lowering their heads again. As if they were more afraid of this skeleton than him.

He rushed over to one of the Admin Helpers, trying to get the man to stand up, "Get up and tell me what happened!?"

The Admin Helper shook his head, "I-I a-am not moving! I am not moving!"

Arnold was taken aback. Following the Admin Helper's gaze, he then met with the skeleton's gaze. They exchanged glances, and the skeleton stood up.

The Admin Helper slipped off from his grab and returned to his kneeling position. Meanwhile, the skeleton was making a gesture to him. The skeleton pointed its two fingers on its sockets before pointing at him. It was telling him that it watched him. But then the skeleton disappeared.

He almost exploded and just wanted to smack these stupid Admin Helpers, but he kept it down. Glancing at his team, he ordered them to get the thirty administrators down from the wall.

The first thing he did was to check their wounds. Their wounds were not regenerating despite a high God Rank's regeneration. He gave high-grade healing potions to one of them, so they would speak.

"Tell me what happened!?" He suppressed his fury and questioned the Senior Administrator.

Since all of them were alive, the fort was not attacked by the calamity. That meant it was the other teams' doing. Before he could ask, the administrator in his hand fainted.

Arnold Boratos was so close to exploding and killing the administrator in his hand. He calmed himself and grabbed the same Admin Helper by the neck, "I will pop your head if you don't tell me what happened."

"Tang Shaoyang will kill us if we move! He will kill us if we move!" The Admin Helper frantically told him.

"It's him!" Hearing the name, he got even more irritated, gritting his teeth. Not only did the newbie not listen to him, but now the newbie also made trouble for him.

"Tell me the whole story!" There was a reason as to why he could reach this position, patient. He made sure not to get carried over with his emotion.

Arnold slammed the Admin Helper to the ground once he heard everything. These people deserved for whatever they did. But to his surprise, Executive Arion was here not long ago as well.

"Get your injuries treated and continue your mission!"

All Admin Helpers looked up at The Chief Administrator, "B-but wh-what about Sir Tang Shaoyang?"

At this point, they were more afraid of Tang Shaoyang than the Chief Administrator.

"I will face him if he comes after you! Get your ass up and do your job, or I will be the one who will kill you!"

\*\*\* \*\*

Tang Shaoyang just finished cleaning up one tribe. Keeper transmitted what happened in the fort. He expected Arnold would help them out, and it was an empty threat in the first.

He got things in order, making sure that these people would never touch his team ever again. That was the lesson for them. He was not going to kill them one by one if they moved after he left the fort.

The Keeper's report reminded him of why Ira stopped him from killing them. He did not plan to kill all Admin Helpers, but he planned to kill those directly involved. Just a few, but Ira stopped.

"You haven't told us why you stopped me?" He asked.

Agnes and the others looked toward Ira. They kinda forgot about it because they were arguing whether they should hunt a calamity kingdom or not. They also demanded Tang Shaoyang to tell them how he destroyed a whole kingdom.

Ira rolled her eyes, "The Nirvana Alliance and The God Alliance are still after your head. They might not be able to do anything right now, but they will come for you after their punishment is over. And you want to kill them even if you don't know what their backgrounds are? Do you want to add more enemies to go after your head?"

Tang Shaoyang was surprised to hear that answer from Ira. He did not remember that they were that close. But then he understood now why she stopped him.

She did not want to lose another Administrator like him. He was much better than those administrators who treated the Admin Helpers like whore or slave. Who knew what kind of Administrator she would work for if he died? It was not entirely for him.

"You are a decent Administrator compared to many of your kind. But you are too careless and lazy with the details, your minus point. You should work on it," Ira added.

Her answer confirmed his guess, and he shrugged at the criticism, "Whatever, let's find more Calamity Kingdoms. I need them!"

"NO!" Ira, Lucia, and Agnes replied in unison, "Let's work on a few colonies first, then we can try a calamity kingdom later on."

## Chapter 1656 Second Kingdom

Tang Shaoyang thought he would find another kingdom in a week or two by going in the opposite direction. But it had been two weeks since he left the fort for the second time, and he had not seen another kingdom.

They had been facing six colonies, two dozen tribes, and wild calamities. Most of the time, they fought wild calamities. However, the Reds were still number one in the contribution list. They had a

big lead because Tang Shaoyang took down a kingdom and almost two hundred Unique Rank Calamities.

The exploration was uneventful and was smooth. His teams were adjusting to his pace, no longer fearful of the Unique Rank Calamity. They had seen so many times how Tang Shaoyang handled the Unique Rank Calamity that they developed trust in Tang Shaoyang.

The same morning, this was the fourth time they had stopped their journey for a night's rest in the last two weeks. They could go without sleeping for three to four days. The exhaustion caught up in three to four days, and they took a night's rest.

Looking at the meal boxes in his hand, Tang Shaoyang let out a sigh, "This is the last meal box."

It was a ration for a month for one person. Elin made them for him, but he ended up sharing them with his team. It was gone in three weeks. If he did not regulate it carefully, it might be gone in a week.

"Is it really?" Nayla looked at him suspiciously. Not only that, but the others also cast the same suspicious gaze. They suspected Tang Shaoyang wanted to keep the food for himself.

Tang Shaoyang shrugged, "Yes. No more food for us. Is Calamity's meat edible?" He asked. While the God Rank could go on without food longer than sleeping, he still wanted to eat every day.

He then remembered that he had eaten calamity's meat before. It was back in the first stage of the trial, that Exotic Restaurant opened by Manoe. The meat was edible, but it tasted awful.

"Have you found a colony or a tribe nearby?" Ira changed the topic.

Usually, Tang Shaoyang would send out his spirits to scout the area. They would be surprised by a colony or a tribe.

"I found a kingdom."

The team was surprised when they heard it. The discussion of whether to fight a kingdom or not was put on hold because they did not find one. But it was different now if they found another kingdom.

"I will fight with you this time!" Renan was the first one to give the answer.

He was determined to fight alongside Tang Shaoyang. The Elephant beast-kin remembered very well his captain did not back down in the face of three Administrator Teams. In other people's eyes that might be nothing, but it was significant for him.

If it was another Senior Administrator, that person would not save them like Tang Shaoyang did. As Executive Arion said, Admin Helpers were disposable. There were a lot of Admin Helpers waiting to be picked up.

It was rare to find someone as responsible as Tang Shaoyang. He would fight together with Tang Shaoyang and prove his worth in this fight.

"Don't worry, we are not the only team here. It seems the administrators from the other forts find it first."

That was the reason why he was not excited even when he found another kingdom. Another team found it first, and they were currently camping outside the kingdom, planning to attack them.

"Pack up! They have found us, and they are coming!"

The six exchanged glances, and then they packed up quickly. As Tang Shaoyang told them, a minute later, a group of five found their camp. One Junior Administrator and four Admin Helpers.

"Executive Arion orders us to bring you to him!"

There were no greetings or anything, The Junior Administrator stated his purpose immediately.

"Let's go!"

The Junior Administrator was surprised at first. Why did these people leave without waiting for him? He had the thought of letting them be so these people would be lost in this creepy forest. To his surprise, they were on the right path, and soon they arrived at the main camp for 16th Fort.

All Administrator teams from 16th Fort were here right now. They were planning to take on this calamity kingdom.

"You stay outside! Executive Arion only allows him to enter the camp!" The Junior Administrator stopped Ira and the others as he led Tang Shaoyang to where Arion was.

Arion was inside the camp along with one Chief Administrator and three Senior administrators. Everyone looked at Tang Shaoyang when he entered the camp. All of them frowned, not liking his presence in the camp. If not for Executive Arion, they would chase him away.

"Why don't we ask this person's opinion who has taken down a kingdom by himself?"

The four experienced administrators furrowed their brows. They did not believe Executive Arion. But when they checked the ranking, The Reds were still leading the board. This person should be from The Reds then.

"Are you from The Reds?" The Chief Administrator asked in a doubt.

"I am The Leader of The Reds," Tang Shaoyang nodded, also furrowing his brow at the sight of Arion.

Looking at Arion's face once more, reminded him what Arion did a few weeks ago. That made Tang Shaoyang mad again.

He kept his face straight and shared his ranking. When he shared the ranking list, The Reds were in red, and the other teams' names were in white. That proved that he was part of The Reds' team.

"He is a famous Administrator's killer. You better watch out," Arion meant to joke about it, but everyone in the camp took it seriously.

The recent trial manipulation incident was spread that all Chief Administrators and Senior Administrators knew about it. Tang Shaoyang obtained a name from them, Administrator Killer.

The Junior Administrator who had not left the camp flinched when he heard it. He also heard about the incident. He was glad that he was not in that trial, or else he might be killed as well.

Then he remembered how he treated the number one team a while ago. While he did not say anything offensive, he did not show them respect either. He thought this team was just a nobody team with seven members.

Recalling what he did, his body shuddered. He immediately left the ten, hoping The Administrator Killer was not petty.

#### Chapter 1657 Conversation With Arion

"My name is Birom, Gosion's team leader," Birom offered his hand for a handshake. He did not reveal his status as Chief Administrator to Tang Shaoyang.

Tang Shaoyang reached his hand and nodded, "Tang Shaoyang from The Reds."

He was familiar with the Gosion name, one of the teams in the top five.

"We plan to attack the kingdom today when Sir Arion arrives. However, Sir Arion told me that someone who had taken down a kingdom was nearby. I want to know how you and your team take down a kingdom with just one team?"

Birom no longer doubted Executive Arion after Tang Shaoyang proved he was part of The Reds. The only reason why the first and the second positions had such a large gap was because of a kingdom. He believed The Reds must take one kingdom before.

The other three Senior Administrators also introduced themselves and their teams as well. Their team was not in the top ten. He knew nothing about them, whether their teams were famous or not.

Tang Shaoyang looked at Arion. The latter should know how he fought the kingdom, but Arion did not tell Birom. He did not understand why.

"There's no plan, really. I fight them head-on by myself."

"Ridiculous!" The Senior Administrator who introduced himself as Ayson blurted out, "It's fine if you don't want to share your secret. There's no need to lie!"

Birom furrowed his brow, he then glanced at Executive Arion. The latter did not make any expression, not even refuting the claim.

"You can ask Executive Arion. He watched my fight from the start to the end if you don't believe me."

Tang Shaoyang took it easy and gestured toward Arion. This guy watched everything. Through his avatar until the real one came in person and made a mess for him.

The four administrators could not say anything when Executive Arion was brought up. No matter how absurd it sounded, they could not ignore it when it involved the Executive Administrator.

"He did fight a calamity with mental ability. Even though he almost died, he indeed fought alone and won," Arion nodded, confirming the event.

That was different when an Executive Administrator said. The four looked at Tang Shaoyang as if they were looking at a monster. Now they understood why such a person could survive a manipulated event.

"Are you willing to join us to subdue the kingdom, Tang Shaoyang?" Birom shot the offer.

Based on the rules, the 16th Fort had the right to attack the kingdom first. But he invited Tang Shaoyang to join even though Executive Arion was around.

"That's the reason why I am here. Yes, I will join," Tang Shaoyang accepted the invitation even though he did not know why they invited him formally like this. He was part of the team to reclaim the abandoned world. It was natural for him to join.

"How are you going to do it? Do you have a plan?"

Birom's first experience fighting a kingdom was when he was still a Junior Administrator. It was way long back then, and he was part of the support team, not the team that entered the kingdom to fight. He did not have a specific plan, especially when he knew nothing about what was behind the wall.

"We don't have any plans."

They wanted to consult with Arion, but the latter called someone else to help them. That someone was in front of them.

"Then I will be the vanguard, and you will support me from behind?" Tang Shaoyang asked.

He was not sure about a plan either. There was no need for a plan, just an attack. That was the plan. He put it that way to make it sound like a plan.

"Then Aquavale will be the vanguard with you as well!" Ayson followed up.

In his mind, Tang Shaoyang could fight a kingdom alone by himself. The kingdom might not be as dangerous as he thought. Then it should not be a problem for his team to be the vanguard.

"Are you sure? You will be fighting more than a hundred Unique Rank Calamities, and more than one thousand Rank 9 Calamities. Can you and your team handle it?"

He was not lying about the number. In fact, he lowered it a little bit to be less intimidating so they would not make things complicated. It was almost two thousand Rank 9 Calamities and around one-hundred-fifty Unique Rank Calamities.

Ayson was about to blurt out that Tang Shaoyang lied, but the words stuck in his throat. Executive Arion was next to them and could vouch for Tang Shaoyang. He would humiliate himself by not believing Tang Shaoyang. But those numbers were ridiculous. It was ridiculous for one person to fight them all.

"He's telling the truth," As if Birom caught what was in Ayson's mind, he confirmed it. He still remembered the bloody battle back then.

While Tang Shaoyang might exaggerate the numbers, the number was not far off. Ayson could not join Tang Shaoyang in the front. It must be his team because The King of The Calamity would come for the vanguard. It was not just Rank 9 Calamity or Unique Rank Calamity, but the king.

"Can you and your team be the vanguard? We don't want unnecessary casualties!" Birom asked once more.

"No, not my team, just me. My team will join the support. I don't think they could survive if they followed me. Also, make sure to bring the strongest in your team to be in the vanguard. I am in the front to attract their strongest force, not to protect your team members."

Tang Shaoyang made it clear as well that he would not protect Birom's team members.

Birom nodded in agreement. He would not ask someone else to keep his team members safe. He was the leader of the team. That was his responsibility to protect his own team.

"Since the discussion is over, can you leave me with Tang Shaoyang alone?" Arion finally said something.

The Executive Administrator who was supposed to help them fight the kingdom did not say anything until now. Not even an advice.

There was nothing they could say since Arion was The Executive Administrator. Someone in authority who could take their privilege as administrator.

Chapter 1658 Make Up

"What do you want?" Tang Shaoyang changed his tone the moment the four administrators left the tent.

"Are you still mad at me?" Arion acted surprised, "Come on, Tang. You should have found out about The Ancient Kingdom from your team members by now right?"

"That still changes nothing, Arion. I will kill him even if I make an enemy of The Ancient Kingdom!"

Arion furrowed his brow, then shook his head again, "I saved your life. Not only did you not thank me, but you were mad at me. This is unbelievable."

"First, I never asked you to save me. Second, your family might be insignificant to you, but I am different from you. The reason I am here is because of my family. I am hungry for power because I want to protect my family, not to bring disaster for them!"

Tang Shaoyang explained because he understood Arion's thoughts. He tried to tell Arion that his family was more important than anything else. That was why he fought like a crazy person, to protect his home.

"I don't understand. Why is your family more important than your own life? Are you a fool? If you die, they will die as well. If you are alive, and they die. You can still create a new family. I see you have five women on your team. You can—"

Tang Shaoyang waved his hand, stopping Arion from finishing the sentence.

"I don't care if you don't understand. But you need to know that, so you will not unnecessarily meddle in my affair again. What do you want to talk about?"

Arion stumped for a moment, but it made sense. He did not need to understand why Tang Shaoyang acted this way. Inherently they were different. Even though in this case, Tang Shaoyang was an anomaly.

He then took out a scroll and tossed the scroll at Tang Shaoyang, "To make up for my mistake, even though I still think I am not wrong. I will not apologize, but this is to make it even."

Tang Shaoyang caught the scroll. It was an Enchanted Chart, and the chart was filled. Someone had mapped the whole abandoned world and marked all the remaining sixteen kingdoms.

The map truly made him less mad at Arion. Even though they had different beliefs, it did not mean they could not get along.

"Are you sure this is okay?"

"Give it back if you don't want it," Arion gestured to give the scroll back.

Of course, Tang Shaoyang kept it in his inventory immediately, "That's it? If you have nothing, then I will start my mission. I will help you clear out the kingdoms for you." He said as if he was doing a favor for Arion.

"And you should be more careful with your new ability to turn calamity as your companion. While the skill is not considered as taboo for now, if you cause a problem with that skill. The Executive Administrator will come to execute you. Make sure your companions are not running wild just like the calamities in this world."

That was what Arion wanted to talk about with Tang Shaoyang. The skill is not special, but it could not be used on any species. Or else, The Demon Race would dominate the universe already if they could use Demonification the same way Tang Shaoyang did.

He tried it once on Unique Rank Calamity. While he succeeded in turning the calamity into a demon, the calamity was not under his control. It was still a wild calamity with a mind to destroy everything around them. He tried in a lower rank calamity, Rank 9 Calamity.

The result was the same even though he used the same test subject. He got a Unique Rank Calamity, but it was uncontrollable. It attacked him right after. They did not categorize the skill as a taboo skill, but the person was.

After deliberation, The Executive Administrator decided to watch Tang Shaoyang for now. As long as Tang Shaoyang had perfect control over the calamity, then it should be fine. Calamity was after like a pest in the world governed by the System. It was the Administrator's job to get rid of the pest for The System.

"My spirits are more convenient than my companions. You don't need to worry about me running around with calamities around me," Tang Shaoyang waved his hand at Arion and left the tent.

Arion clicked his tongue, "He is really careless. He doesn't know how scary an Executive Administrator is."

\*\*\* \*\*

Tang Shaoyang took the warning seriously when Arion said he was being watched by The Executive Administrators. But there was nothing he could do about it. As long as he did not do something stupid like using Demonification on all calamities in this world.

[But it's actually a good idea if you don't have enough force to fight those two Alliances that come after your head. You turn their people into demons and let them fight themselves.]

Vandir suggested the idea. He was not wrong with the idea. In fact, it was a brilliant idea. He never thought about it until Arion and Vandir spoke about it. On top of that, he had a better skill than turning their people into demons. Calamitification, turning their people into calamities and letting those calamities run amok in their world.

"If that's the only way, then yeah," He muttered in a low voice.

[Ah, right. You still have the heart of a human even though you are far from a human.]

Vandir joked about how reluctant Tang Shaoyang was to use the skill as he suggested. If he followed the suggestion, it was the same as destroying the world itself. The people who were not related to the two Alliances would be affected too. That was why Tang Shaoyang did not want to rely on Demonification and Calamitification.

Tang Shaoyang returned to his team and told them the plan to attack the kingdom before going to meet Chief Administrator Birom.

Birom and his ten team members, half of them were beastmen, were waiting for Tang Shaoyang. His team members doubted Tang Shaoyang but did not say anything because they trusted Birom.

"We are ready!"

#### Chapter 1659 Hiding In Plain Sight

Tang Shaoyang nodded and used his Transformation Skill. Then he activated Wrath of Slayer and also an integration with Zara this time.

Birom and his team members were surprised to see the four pairs of black-feather wings on Tang Shaoyang's back. Two pairs of dragon wings and four pairs of fallen angel wings, a weird combination in one person.

Tang Shaoyang looked at the kingdom's location. The state of this kingdom was much worse than the previous one. The wall was in ruin, and so was the city inside. He did not see any calamities roam around, including with his Chaos Eyes.

However, there was a massive tree at the center of the city. The tree was so big that it covered the whole ruin. It was much bigger than his True Dragon form. Maybe a thousand-meter tree, or even more. But there was no calamity activity.

"Follow me!"

With a flick of his twelve wings, Tang Shaoyang's figure shot up to the ruin. He landed on the part of the city wall that still stood up. He looked around, also with Chaos Eyes.

He tried to find the calamity, but he did not find a single calamity in the ruin. However, there was a strong pressure around him, the strong energy filled the ruin. He could not find the source of this energy because it filled each part of the ruined city.

Tang Shaoyang paid more attention, making sure he did not miss anything. The buildings were destroyed by the roots that came out from the ground. Behind the root, under the root, and under the ruined building. He checked all parts of the city, yet he could not find any lead.

Birom and his team caught up and landed next to Tang Shaoyang. They were also as confused as Tang Shaoyang.

"What kind of calamity have you guys fought?" Tang Shaoyang asked. He was afraid it was a calamity with perfect camouflage. Then this place might be more dangerous than the previous kingdom.

It was not dangerous for him but for his team members. He had a Divine Sense that could see the future for a few seconds. An ambush should never work on him.

"We haven't fought any calamities from this kingdom."

Tang Shaoyang raised his right eyebrow, confused, "Then how do you know this is a kingdom?"

In the previous encounter, the one-eyed calamity showed up upon sensing his presence. That was how he found out it was a kingdom.

"The tree is surely big, but it does not mean this is a kingdom, right?"

He realized something when he thought about the tree. He did a quick scan on the whole ruin, with his Chaos Eyes as well.

"I see. That thing is the king!" Tang Shaoyang pointed at the massive tree.

The pressure and intense energy were from the tree. Everything around them was emitted by the tree. That was why he could not find any calamity. The calamity was the giant tree in front of him, hiding in plain sight. They overlooked the giant tree just because it was a tree.

As if the tree realized it had been found, the ground was shaking. The giant root came out from underground, hanging in the air with its pointy end aiming at them.

The remaining roots also resurfaced, destroying the ruin even further. It was just like a cocoon, the calamity tree spawned more calamities from the roots. It was a humanoid calamity, something he never encountered before.

"It's Dryad... Dryad Calamity..." Birom muttered in a low voice after looking at the dark-skinned calamity from the root.

"Regular Dryad is good at elemental and illusion magic, but I am not sure about this one. It's just very rare for an intelligence race like Dryad to turn into a calamity. The tree might have the ability to turn them into calamity. We should not get caught by it!"

As soon as it was found, the tree calamity immediately launched an attack on Tang Shaoyang and Birom's team. Dozens of giant roots shot toward them.

"Dodge!"

Birom and his team leaped backward, dodging the attack. They did not dare to make contact with the tree until they found out more about the tree.

Even though he said they would be the vanguard, Birom would not be that stupid to jump forward into the army of Dryad Calamity. The best decision was to jump backward to ensure his team's safety.

However, The Chief Administrator saw from the corner of his eyes. One man stayed behind on the wall where they just stood. That man was Tang Shaoyang.

'Fool! No matter how strong he is, a newbie is still a newbie, after all.'

That was what was in his mind at that moment.

Tang Shaoyang gave a quick glance at the back, shaking his head, "Yep, you should never trust your back to anyone."

The first thing he did was use the seventh Heavenly Gate; Heavenly Tortoise. The black tortoise shell formed above his head, an unbreakable defense. He was not done, yet.

When the roots were just three meters away from him. He opened the void gate, a big void gate. It would not be possible to create such a big void gate with his Void Elemental Power mastery alone. Zara was the reason he could do this.

Opening such a big void gate was dangerous. A void creature might sneak into the gate and add more trouble. But he was confident to open such a big gate, big enough to fit all the roots. He could close it before any void creatures came out.

The calamity tree knew where that gate led, but it could not stop its root from entering the gate. When a quarter of its root entered the gate. It intended to pull its roots out, but Tang Shaoyang did not give it the chance.

The void gate closed and cut the roots before it even touched the tortoise shell.

That was the surprise, black blood poured from the roots. Like a waterfall made from blood, the black blood poured toward Tang Shaoyang's shell. The shell protected him from getting dirty.

There Tang Shaoyang found out it was just not the common tree. The tree was made of flesh instead of wood.

## Chapter 1660 The Joy Of Battle

The ground shook fiercely, the only way for a tree to express its anger. More roots came out from the ground. The branches elongated, and more Dryad Calamity came out from the trunk.

The Dryad Calamity from the main trunk was different. They were bigger, equipped with weapons and armor, and looked like a knight. Not just knights, but there were also Dryad Calamity with robes and magic staff.

These lineups proved that these Dryad Calamities were not just weak mobs spawned by the tree. They were organized and had their own respective roles. More like an army than a disorganized calamity colony.

It was then followed by a rumble from outside the wall. Through his Chaos Eyes, he saw more roots outside the wall. The roots came out from the ground, forming a natural fence before spawning more Dryad Calamity.

He had angered the calamity tree to the point that it focused its resources on him. Those roots and Dryad Calamity outside were to block the reinforcement from the other teams.

Tang Shaoyang did not try to escape or regroup. In fact, he was happy that the calamity tree blocked them off. He could get the high-ranking calamities for himself.

Meanwhile, the tree calamity pulled back its roots from Tang Shaoyang. The injured roots returned underground. It was followed by the barrage of spells from the Dryad Calamity.

The army of Dryad Calamity launched their first attack. They sent a volley of black fire at Tang Shaoyang. Dryad Calamity made a distance from him, avoiding the impact of their mage army. Meanwhile, the knights stayed behind, surrounding the mage, protecting the mages.

The systematic movement proved further they were not the same as the mindless wild calamities.

Tang Shaoyang shook his head. Such an attack would not work on him. He took out Azure Dragon Blade and then formed a portal with Void Elemental Energy. The portal was connected with another

one that was behind the weaker Dryad Calamity. He skipped them and went directly to the front of the knights and mage army.

The knights pulled out their swords, and Tang Shaoyang also pulled out his sword.

Heavenly Sword - Heavenly Revoke

His figure blurred, moving to the first row of the Dryad Calamity knights. His sword flashed in blue, cutting through dozens of the knights in one strike. He did not stop there. Raising his sword upward, the fifty-meter gold sword formed. He brought down his sword, and the golden sword followed.

Heavenly Sword - Heaven Fall

The calamity sensed how dangerous it was. It tried to protect the army. Many of its branches tried to block the sword. The gray leaves enlarged, forming a shield. Layers upon layers of defense were formed.

However, it was futile as the gold sword pierced through the leaves and the branches. More black blood poured out from the wound. The ground was shaking even fiercer, expressing its pain when its body was cut.

The sword pierced the defense and landed right in between the mage army. It exploded in golden brilliance, engulfing the mage and the knight.

A big chunk of the calamity tree was gone along with thousands of its army. But Tang Shaoyang was not over yet, bending his body slightly, his sword position was on his waist, holding the sword with just one hand. The azure sword glowed in burning red.

The Eight Heavenly Gate - Heavenly Vermilion

Then he followed with another sword technique: Heavenly Sword - Heaven Severing World.

His figure flashed forward, and at the same time, the image of a vermilion bird formed behind him. The azure sword lit up in crimson fire. It was followed by the screech as he slashed forward.

The crescent red blade formed by the Heavenly Energy was wide enough to reach two hundred meters. The red blade cut through everything in front of Tang Shaoyang.

The knights and the mages that survived the golden sword had to face another technique. The quick-thinking calamity tried to dodge while the slow one tried to block it with a magical barrier or their shield. Their attempt was futile as the blade cut through everything and reached the calamity tree's trunk.

The blade cut deep and burned the tree. The blood that flowed out from the trunk was sizzling, and evaporated, creating a bad smell.

The ground had not stopped shaking for a while, shaking even fiercer. More roots came out from the ground, whether it was small or big.

The weaker Dryad Calamity turned around and rushed toward Tang Shaoyang, including the ones outside the city. The calamity tree focused everything on Tang Shaoyang.

Tang Shaoyang grinned in excitement as he took out his battle ax, World Destroyer. A battle ax in his right and a sword in his left hand, he stood in front of the massive tree.

The calamity tree ordered its army to target Tang Shaoyang. Even the Dryad Knight with no lower half, crawling toward him. The mage started to send more volleys of spells.

The spells were rendered useless, whether it was fire, wind, or even ice. The Heavenly Tortoise's shell blocked them off.

Meanwhile, the surviving knights managed to reach Tang Shaoyang. The shell did not stop them from reaching him. Their movement was no longer systematic. The knights rushed toward him even though the mage rained him down with spells. It showed the mental state of the calamity tree.

The army was not the only thing the tree relied on. The branches and the roots started to move again. It slammed everything it had on Tang Shaoyang even though it might cost its army.

Tang Shaoyang greeted the attack with a wide grin. He rushed toward the band of knights, fighting them hand in hand. His sword cut through the knights, and his battle axe crushed them into pieces along with their armor. He did not use any technique or skills, pure close combat.

The branches and the roots hammered him from above, but after several times, it realized it could not break the shell. The calamity tree chose its army's route, attacking below the shell.

The root pierced through the knights, aiming at Tang Shaoyang's head.

Swoosh!

The Azure Blade Dragon cut through the root easily. Then it was followed by another bang by World Destroyer. It split apart the root and shattered the root completely.

Dozens of roots and branches came from behind him, and he easily dodged them. With a wide grin plastered on his face, he cut through everything and came closer to him. Thousands of Chaos Blades formed, pinning down many roots and branches, poisoning the calamity tree with his Chaos Energy.

Tang Shaoyang danced with his enemy, alone. That was right, he was alone. He did not summon his spirits or more like he forgot to summon them.
