

The Amazing Son In Law Chapter 6043 -

Facing the invitation of this young man called "Old Hu", Charlie Wade readily agreed, and said with a smile, "In this case, then we will not be polite to you!" Old Hu smiled and said, "Hey! You must

definitely be welcome, we are all friends from all corners of the country, and taking care of each other is also a fine tradition of our donkey friends."

Then, he asked Charlie Wade, "Brother, what's your name?"

Charlie Wade was about to speak, when Lin Wan'er beside him smiled and said, "I The boyfriend's surname is Kaiden, and his name is Charlie Kaiden, so everyone can call him Kaiden!"

Charlie was taken aback when he heard that, he probably understood Lin Wan'er (Alani)'s thoughts, after all, he was here to wait for Sara, no matter what. Whether it's Charlie Wade or Lin Wan'er, Sara is definitely familiar with it, so it's better not to use her real name as much as possible.

However, he didn't expect that Lin Wan'er would give herself the pseudonym "Charlie Kaiden", and even a nickname of Kaiden.

He thought to himself, "Kaiden? How does this title sound like a barber?"

At this time, Lin Wan'er said to everyone, "My surname is Wade, and my name is Suman. It's good for everyone to call me Suman.

"Old Hu smiled and said, "Kaiden, Suman, you are welcome to temporarily join our family of 'Southern Yunnan Wanderers'. We all came to South Yunnan for hiking, and we basically didn't know each other before. It was during the hiking. I have known each other, and we have been together until now."

He said, and he introduced himself, "My name is Arlo Hu, which means I am happy, but this name sounds a bit feminine, so I let my friends call me directly. I'm Hu."

Then, he gently embraced the girl next to him who had been planning to hold a bonfire party before, and introduced, "This is my girlfriend Hallie, a top student at Tsinghua University. We met on this hike, and then Together."

After Arlo Hu and everyone introduced them one by one, he volunteered to say, "Kaiden, I don't think you often go out for hiking and camping, why don't I help you set up the tent first!"

charlie Wade thanked and said, "Thank you buddy, I can fix it by myself in a while, it shouldn't be a problem."

Arlo Hu said seriously, "Just speak up if you have something to do, don't be polite!"

charlie Wade nodded his thanks, feeling somewhat ashamed in his heart.

Because only he knew that these people regarded him as a friend who met by chance, but he needed to use them as a cover for himself and Lin Wan'er, which was somewhat inappropriate.

Young people who are keen on the outdoors are generally very outgoing and open, and they are basically the kind with full of social cattle attributes, and these young people are very enthusiastic about charlie Wade and Lin Wan'er, so everyone chats very quickly.

Arlo Hu is a leader among this group of people. It can be seen that everyone admires him. Seeing that he doesn't look too old, charlie Wade asked him curiously, "Old Hu, are you a student or already working?"

Arlo Hu nodded and said, "I'm still a student. I studied in the United States before, and I'm a Chinese-American. Isn't it summer vacation? So I want to go back to China for hiking and appreciate the great rivers and mountains of the motherland." Arlo Hu then said, "

We Most of them are college students. I, Sun Jing, and Ma Linchao are all studying in the United States. Hallie and Xiao Bo are from Tsinghua University, Haipeng and Lijin are from Peking University, and some are studying in the UK and Canada. You two What about it?"

charlie Wade said casually, "We are classmates in high school. When we were in high school, we were busy with dating, and didn't study hard. As a result, we didn't get admitted to any university. Later, we went to Eastcliff to find a private pheasant that didn't need grades. I've been in college for two years, and I didn't get into it until I graduated."

Lin Wan'er looked at Charlie Wade resentfully, and protested in her heart, "My son, the tens of hundreds of degrees in my family these years are considered useless..."

Actually, the reason why Charlie Wade said this was to create a subjective impression for these people that he and Lin Wan'er were scumbags. Otherwise, if everyone really grasped the topic of university and chatted endlessly, the two of them might easily reveal their secrets. Tell me which university you graduated from, or which university you studied in. Once these people have an acquaintance in the school they mentioned, it is very likely that they will not be able to chat.

And if I say that I am a pheasant college dropout, it will create a kind of subconsciousness for these people, making them think that they have low self-esteem about the school, so they will naturally ask as little as possible and mention less university-related topics. The risk of exposure is avoided.

The Amazing Son In Law Chapter 6044 -

Sure enough, as soon as Charlie Wade said that he and Lin Wan'er hadn't even finished the Pheasant University, these people immediately became sensible and didn't ask any more questions about the school.

Arlo Hu was also afraid that Charlie Wade and Lin Wan'er would feel inferior because of school problems, so he said with a smile, "Actually, it doesn't matter whether you go to a good university or not, it doesn't even matter whether you go to a university or not. Well, the most important thing is to live a happy life." "Exactly."

"Arlo Hu's girlfriend, Hallie, echoed, "Study is actually quite boring. My parents have been raising babies since kindergarten, and kept raising them until I was admitted to Tsinghua University. They also wanted me to prepare to go to Harvard for graduate studies. In the first half of the year, I finally I got the admission notice from Harvard as I wished. As a result, I just booked the air ticket to the United States this month, when I was found to have glioma, and it was growing on the brain stem, and I couldn't be operated on. I don't know how long I will live. Now they I finally realized that baby chickens are far more important than making children healthy."

Lin Wan'er heard her words and asked in surprise, "You have glioma?"

“Yeah.” Hallie nodded, and said calmly, “The incidence rate It’s less than one ten-thousandth, but I still hit it.”

Arlo Hu also smiled and said, “My situation is similar to Hallie’s. I was diagnosed with advanced lung cancer last year, and it was still small cell lung cancer. I have smoked a cigarette, and I have never even touched the marijuana that is rampant in the United States. It turns out that I have advanced lung cancer. There is no good treatment, so I can just enjoy life.” Lin Waner (Alani) subconsciously said, “Advanced small cell lung cancer can also be treated with radiotherapy and chemotherapy

. Yes, with targeted drugs, it can also have a relatively good therapeutic effect, so don’t give up on yourself.”

Arlo Hu smiled and said, “I didn’t give up on myself either. I originally came to China from the United States to participate in the clinical trial of Jiuxuan Pharmaceutical’s “Jiuxuan Zaizao Pill”. It is said that this drug has a good therapeutic effect on almost any kind of cancer. , the doctor also advised me to give it a try to see if I could get a quota, but after I arrived, I realized that the competition for this quota was too fierce, among other things, even James Smith, the former director of the US fda There is no way to get a quota for his son, let alone an ordinary person like me.”

Hallie said on the side, “That’s not the case, Jiuxuan Pharmaceutical’s quota allocation is not based on who is rich and powerful, but who What’s more, they need to be treated. Those who sign up for clinical trials are all cancer patients without exception. At least 30% of them are declared by doctors to live less than half a year. There are hundreds of patients with advanced pancreatic cancer alone, and many patients They are still children, and it is almost difficult for us in our twenties to get a place.”

charlie asked curiously, “Hallie, have you also signed up for the clinical trial of Jiuxuan Pharmaceutical?”

Hallie nodded and said, ” I went, but I was not selected. The review mechanism of Jiuxuan Pharmaceutical is a bit similar to the comparison of misery. First, who is the most sick, and then who is the youngest, whose family situation is the most pitiful, and whose family responsibility The most important thing is, they have a point system. The worse the actual situation is, the higher the points will be. In the end, all the lists will be selected from the hundreds or thousands of people with the highest points, which is similar to the logic of point settlement. My first The wheel was brushed down directly.”

charlie Wade was not surprised by this, because this rule basically came up with guidelines by himself, and Liam was responsible for the actual implementation.

The essence of Jiuxuan Zaizao Pill is actually a diluted version of Sanxue Jiuxin Pill. This thing may only be made by yourself in the world, and it takes it is impossible to achieve mass production by using aura as the price of refining, and it is the stepping stone that I use to knock on the door of the FDA.

And charlie Wade also knew very well in his heart that he was neither God nor the Holy Mother. There were too many cancer patients in this world who could not be saved by himself, so he could only save some of them within his ability, and they were still very small. part.

Since it is to save this small group of people, it is naturally impossible for anyone with money to get a quota, so charlie Wade asked Liam to save only the worst group.

They may have never experienced good luck or met any blessings in their lives, but at the critical moment of life and death, Jiuxuan Pharmaceutical can still give them a chance to counterattack.

Therefore, in charlie Wade's view, he is more inclined to ask Liam to save a terminal cancer patient who has lived for 20 years and suffered for 20 years, rather than to save a middle-class family who has lived for 20 years. The proud son of the year.

Under this tone, Arlo Hu and Hallie are basically not eligible to be selected.

At this time, one of the friends said indignantly, "The boss of Jiuxuan Pharmaceutical doesn't know what he thinks, why doesn't he give priority to saving talents like you who are useful to society?"

"It's just that if I read more books, it may not be really useful to the society. Besides, it's only natural for doctors to save lives and critically ill patients first. You can't let me jump in the queue just because I have a high degree of education?" Arlo Hu said with a smile, "Hey

, I also understand them very well. James Smith from the fda is said to have resigned from his job to do charity work in Aurous Hill for a long time. Basically all his net worth has been invested in it. He hasn't given up yet, nor

has he given his son a chance. The people from Jiuxuan Pharmaceutical also said that although his son is very sick, there are more children than his son who are seriously ill.” A person

in the crowd asked in surprise, “The person in charge of the US fda quit his job and went to Aurous Hill to do charity?”

“Yes.” Arlo Hu nodded and said, “I talked to that elder brother, and he is the one who suffers the most. When Jiuxuan Pharmaceutical was about to enter the US market, they came to him with Jiuxuan Rezao Pills and found out that his son had cancer. , and even gave him some medicines for free trial, he always felt that Chinese prescription medicines were unreliable and had no scientific basis, and he looked down upon them. As a result, when he came back to his senses and tried to find someone else, they had already given up Jiuxuan Zaizao Pills and entered The American market...”

Speaking of this, Arlo Hu sighed, and said, “Then I can’t help it, my son can’t get better at the Mayo Clinic, so I can only go to Aurous Hill to try my luck. To, gold and stone can be opened...”
