

charlie wade - The Amazing Son In Law Chapter 6442

1. The Amazing Son In Law Chapter 6442

charlie Wade chatted a lot with Helena, and it was already morning. He kept paying attention to his mobile phone, looking forward to receiving news notifications about Sifang Baozhuan's return to China.

However, before the news was received, I received a call from Lin Waner (Alani).

charlie Wade said to Helena: "I'll answer the phone first."

Helena nodded slightly and said softly: "Mr. Ye, please hurry up first. I'll make you a pot of tea."

After that, she stood up and left. Room.

charlie Wade answered the phone and asked with a curious smile: "Ms. Lin, what advice do you have for calling so early?"

Lin Wan'er (Alani) chuckled and said softly: "Sir, it's already night here at the slave's house."

charlie Wade said with a smile . : "I forgot about the time difference."

Lin Waner (Alani) smiled and said, "Master, there is something that I need to synchronize with the master. I wonder if it is convenient for the master?"

charlie Wade said: "It is convenient, Miss Lin, please tell me!"

Lin Waner (Alani) Said: "The slave family heard that the National Security Agency of the United States is using a particularly large force to order a plane to turn around and return to the United States. Moreover, the plane was leased by Chen Zhimin. Now the plane has begun to return. This matter should be done by the young master. ?"

charlie Wade asked in surprise: "How did Miss Lin know so clearly? I only knew that the plane had flown away, but I didn't know that it had been ordered to return."

Lin Wan'er (Alani) said shyly: "Master, please don't underestimate me. The Nu family, the Nu family has some connections..."

"Yes, yes, yes." Charlie Wade said hurriedly: "Miss Lin has been working all over the world for so many years, so it is natural for her to have strong connections..."

Lin Wan'er (Alani) smiled and said, "Didn't the Nu family call me? To show off to the young master, it was Lao Sun who just told the Nu family that Eastcliff has begun testing the Sifang Baozhuang, and the results will be available soon. Once the results come out, I am afraid that the Rothschild family in the United States and Sara will be among the first. I received the news at once."

Charlie Wade said: "Then I guess Sara will be very angry. This time the United States came to the United States in vain."

Lin Wan'er (Alani) smiled: "Young Master is right, Sara will definitely suffer a lot this time. A blow, but the slave family called the young master this time to remind him that the slave family received a very unusual news. After being educated by the young master, the Rothschild family overnight transferred the most popular artificial intelligence model in the United States to The combination of high-precision monitoring equipment unexpectedly yielded a very powerful AI monitoring system. If you deal with the Rothschild family in the United States in the future, you must be more careful."

Charlie Wade asked curiously: "Yes What kind of AI monitoring system?"

Lin Wan'er (Alani) introduced the monitoring system to Charlie Wade in detail on the phone.

Charlie Wade was shocked when he heard that. He had also known about the AI model before, but he did not expect that the model would be so useful. More importantly, this thing can learn so fast that it can be trained according to the needs in one night. It is really amazing Somewhat incredible.

Lin Wan'er (Alani) added: "This AI model has become more and more powerful. Learning and analysis are only its primary functions. Its advanced function is the independent generation of pictures and videos. If its advanced functions become more mature and the overall calculation The strength is also constantly increasing;"

"Nujia thinks that as long as you give it a script and tell it who you want to play which role, it can use super computing power to automatically generate images that are real and fake. An ordinary movie has 24 frames per minute, and a movie takes two hours. , a total of only 170,000 frames is needed. As long as its computing power supports it to generate 170,000 frames of images, and then play these images at a speed of 24 frames per second, a movie can be made without anyone actually shooting it. Yes!"

charlie Wade sighed: "This technology is indeed very powerful, I have never paid attention to it before."

After that, charlie Wade asked again: "How many companies have this technology now?"

Lin Waner (Alani) said: "Many companies They all claim that they have developed a complete AI model, but the one that is truly mature and unparalleled is the one controlled by the Rothschild family." After

saying that, Lin Waner (Alani) added: "The slave family called, it's the one controlled by the Rothschild family. I want to tell the young master about this. I feel that this thing will have a very wide range of uses in the future, and it will have revolutionary subversion in many fields. It may not make a lot of money, but it will definitely play a key role in key places. If the young master has a chance to take control of the Rothschild family this time, he might as well try to take this company over from them, or let them secretly build a set of such a model for the young master!"

No data found.

1. The Amazing Son In Law Chapter 6444

Speaking, Lin Waner (Alani) added: "It would be better if there was any way to bring Sara into conflict with the Homeland Security Bureau. "

charlie Wade smiled and said: "Sara's strength is far superior to mine. If she really sneaks into the vicinity of the airport, she will definitely use her spiritual energy to confirm that the Sifang Baozhuang is on that plane before taking action, otherwise she will definitely not Will take action rashly. "

That's true. " Lin Wan'er (Alani) said with a smile: "Young master should think more comprehensively, but if he can force her to run an extra 400 kilometers, it will definitely make her mentality collapse more completely." "

That's true. " charlie Wade smiled and said: "I'll first ask Steve from the Rothschild family for the helicopter imaging data currently being inspected to see if Sara is among them. If she is, it will be easier. When will she be released?" I'll know it like the back of my hand, and when the time comes, including the time it takes her to fly all the way there, I'll almost be able to grasp the best time to release the news.

Lin Wan'er (Alani) said happily: "That's great! " It is up to the young master to control this opportunity. The slave family is waiting for news about the young master in Aurous Hill. Once the young master says it is okay, the slave family will tell Lao Sun that the news will be sent out within a minute or two at the latest! "

Speaking, Lin Wan'er (Alani) said happily: "When I think that Sara will collapse soon, the slave family is so happy! "

charlie Wade smiled and said: "Don't worry, when she knows that Sifang Baozhuang has returned to China and realizes that Chen Zhimin and Uncle Sean are probably dead, she will definitely doubt her life. I guess she has never been so aggrieved in her life. when. "

Lin Wan'er (Alani) said with a smile as bright as a flower: "Sara has been pursuing the slave family for so many years, and has made the slave family feel aggrieved for so many years. It is finally her turn to taste the aggrievedness! "

As she said that, she said again: "Sir, the slave family can wait here for the news of the master with peace of mind! "

"good! "

Marven agreed readily. After hanging up the phone, he immediately left Helena's room and went to the room where Steve and Zhou Liangyun were.

Steve was already a little impatient at this time.

He planned to leave Sifang Baozhuang Time in the United States, it felt like the Sifang Baozhu should have arrived in China a long time ago, but for some reason there has been no news yet.

He was also hoping that after the news came back from China, the bad news about his family would come from New York.

But he just waited and waited. There was no movement, and Steve was inevitably getting angry.

Just when charlie Wade knocked on the door and came in, he couldn't wait to step forward and asked: "Mr. Wade, has Sifang Baozhuang returned to China? Why hasn't the news come out yet? "

charlie Wade smiled and said: "Don't worry. Although the things have arrived in China, they still need to be appraised by experts organized by the official government. After all, it is a major event that needs to be announced to the outside world. It must be ensured to be foolproof. Besides, even if the things go back However, the material still needs to be processed briefly, and the news broadcast by the TV station also needs to be edited, arranged, and post-processed and checked for errors before it can be broadcast. This all takes time. "

Steve nodded quickly and said: "You are right, these do take time, but when do you think the exact news will be available?"

charlie Wade thought for a while: "I estimate that in two or three more It's almost an hour."

"Okay." Steve looked at the time and said subconsciously: "Two or three hours is okay, it's not too long..."

charlie Wade asked him at this time: "Yes Steve, can you help me get the relevant imaging data of your helicopter inspection site today?"

Steve nodded: "No problem, my fourth brother's family seems to be in charge of the helicopter inspection point, I'll contact them Want it."

charlie Wade asked him: "Does your fourth brother know much about the Internet?"

Steve said: "He knows nothing, his son knows better."

As he said, he suddenly thought of something and said quickly: "Yes Yes, his son is your mother's junior student. He also imitated your mother and invested in many companies in Silicon Valley, but he didn't seem to have invested in a particularly powerful company."

charlie Wade said: "He should have invested in a company that develops AI. You Have you heard of it?"

"No." Steve shook his head and said casually: "I'm not interested in concepts like the Internet. Some time ago, Mark created a metaverse. He came over excitedly and introduced it to us for a long time. It felt like It's not even as good as the video games played by children. Later someone told me about AI, but I didn't even bother to understand it."

charlie Wade smiled slightly: "It's the AI you are too lazy to understand, and it almost took away your position as heir. Now, they have integrated AI and monitoring systems and are helping to screen all helicopters that need to be inspected. This is a very successful attempt for them and has opened up new ideas for their AI applications. I estimate that they will soon It will combine AI with more traditional fields to achieve greater effectiveness."

At this point, charlie Wade looked at Steve and said very seriously: "Steve, you have to thank me properly!" If I had not taken the huge risk to send the Sifang Baozhuang out of New York and back to China, then the one who found it in the end would definitely not be you, but your fourth brother's son! By that time, you will no longer be part of the family The heir can only become the heir to his uncle!"

No data found.

1. The Amazing Son In Law Chapter 6446

And the more anxious she was, the less efficient the queue in front of her was.

After she waited in line for an hour, it was finally her turn to inspect the helicopter she was riding in.

At the request of the soldiers, Sara, Jadiel and the pilots all got off the plane and underwent body searches. In addition, many people carried professional testing equipment and carefully checked up and down the helicopter. Even the fuel tank of the helicopter was not released. However, you need to use professional equipment to detect the internal structure and see if the Sifang Treasure Building is hidden in it.

After all inspections were correct, Sara's helicopter was finally allowed to take off.

The helicopter climbed to the designated altitude in accordance with the requirements of air traffic control, and then, under Sara's almost hysterical urging, flew in the direction of the target airport at extremely high speed.

Half an hour later, the pilot of the Gulfstream G650, accompanied by two F35s at close range, nervously completed the approach.

The moment the plane aimed at the runway, both of them were extremely panicked.

Both of them have been flying civil aviation for more than ten years, but this was the first time they were accompanied by a fighter jet.

The two anxious people landed the plane on the runway. As soon as the speed slowed down, the two armed helicopters immediately took off and followed the plane at a height of about ten meters above the plane to leave the runway as required.

At this time, the Department of Homeland Security is facing a formidable enemy. When the plane flies back, they are no longer worried about the leakage of national defense secrets, but are worried that the pilot of the plane will take extreme actions.

Fortunately, the pilots themselves were innocent. They obeyed the requirements and slowly parked the plane into the hangar. As soon as the engine was turned off, someone immediately used professional equipment to lock the tires of the plane. In this case, even if the pilot wanted to escape, the plane would not be able to push out smoothly with its engines.

Subsequently, dozens of special forces armed with live ammunition had completely surrounded the aircraft. The person in charge radioed the crew: "On behalf of the Department of Homeland Security, I require all personnel on board to wait at the hatch immediately. After the hatch is opened, everyone must raise your hands behind your head and line up in an orderly manner to get off the plane, otherwise, we will take extreme measures."

Not daring to delay, the crew members quickly opened the door and walked off the plane one by one with their heads in their hands.

The special forces, who had been waiting for a long time, immediately controlled them all, and then thousands of dedicated personnel conducted

detailed body searches. More agents boarded the plane immediately and began to conduct extremely detailed inspections of the aircraft.

Since the report was relatively general and only mentioned national defense secrets, but did not reveal what the items were or whether they were large or small, the person in charge was already prepared for a protracted war. He asked people to immediately start interrogating several crew members. personnel, while preparing their agents, using professional testing equipment, with the help of the maintenance staff and referring to the blueprint of the aircraft, to find out everything that does not belong to the factory configuration of the aircraft.

This work is expected to take at least three days to complete.

When Sara finally rushed to the designated location, which was only three kilometers away from the airport, the agents at the airport had just inspected half of the cockpit.

After Sara arrived, she immediately asked Jadiel to ask the scouts if they had seen anyone or vehicles leaving the small airport. The answer was no.

This made Sara breathe a sigh of relief.

No one left the airport, which proved that as long as Sifang Baozhuang was on that plane, he must still be in this airport.

So, she released more than half of the spiritual energy in her body, and the spiritual energy spread to all corners of the airport, in order to search for movements related to the magic weapon. What

Sara didn't know was that Charlie Wade already knew it as soon as the helicopter she was riding in landed.

So, he immediately sent a message to inform Lin Wan'er. The content of the message was: "It's ready to be broadcast!"
