

## The Amazing Son In Law Chapter 6491

By / February 28, 2024

At this moment, Howard was really looking forward to getting Helena's affirmative answer. Once she agreed and married into the Rothschild family, it would be equivalent to making up for the only shortcoming of the Rothschild family in the past two hundred years.

Helena naturally sneered at Howard's proposal in her heart and did not consider it at all. However, when she thought of the task that Charlie Wade had given her, she said with some embarrassment: "Mr. Howard, I am here to visit you. I have considered these issues... Your sudden proposal really caught me off guard."

Howard said quickly: "Her Majesty the Queen... this... this proposal is not... effective in a short period of time, you... .. You can take the exam well... think about it, no matter... whether it's three years... or five years, the Rothschilds... the Rothschild family... are willing to wait..."

Helena pursed her lips, He looked at Howard and then at Steve, deliberately acting like he was hesitant to speak.

An old fox like Howard, whose body is hemiplegic but whose brain is still flexible, looked at his son Steve and said: "Shi... Steve, you... you and the doctor... the doctor... go out first, I... .. I want to have a chat... alone with Her Majesty the Queen."

Steve knew that this was the old man trying to help his son work harder, so he blurted out without thinking: "Okay father!"

After that, He quickly asked the doctor to leave, and before leaving, he did not forget to say to Howard: "Father, there is still enough time. You can chat slowly with Her Majesty the Queen. I will ask everyone outside to keep an absolute distance of more than 20 meters. You can Don't worry."

Howard nodded with satisfaction, then flicked the back of his hand at him twice to signal him to go out.

Steve slammed the door shut, and quickly blasted everyone outside twenty meters away, including himself.

Seeing that everyone had left, Helena immediately went straight to the point, looked at Howard on the hospital bed, and said, “Mr. Howard, actually, the main purpose of my coming today is to do a business with you.”

## **The Amazing Son In Law Chapter 6492**

By / February 28, 2024

Without waiting for Helena to answer, he added: “Don’t... don’t tell me... you... You simply want to come... to visit me. If you just... just visit, you... you are even... less qualified!”

Seeing that he was getting angry, Helena was not angry at all, but smiled and said: “Mr. Howard, I am the current Queen of Northern Europe. Two hundred years ago, your ancestors had to curtsy when they saw my ancestors. Now if you see me in public, you still have to bow to me just like your ancestors did to my ancestors. Curtsey, otherwise, the world will definitely say that you do not respect the royal family, but they will not say that I am not qualified to accept your curtsy.”

Howard was a little angry at once. Regarding the etiquette issue, Helena was right. In the upper class of Europe, , even if the respect for the royal family is only superficial, it must be observed once in public places, otherwise it will inevitably be criticized by European and American society. Even the former president will be ridiculed by the whole society if there is a problem with etiquette when meeting the Queen of Britain. Make complaints.

Howard, who was extremely depressed, yelled angrily: “This... this is... the Rothschild... manor! It’s not... it’s not a public place! I... I can expel you out at any time... at any time!

” Suddenly, Howard wanted to ring the bell immediately and ask someone to drive Helena away.

Seeing that Howard was obviously angry, Helena was not angry, but smiled and asked: “Mr. Howard, if I say that I have a way to make you recover immediately, and even make you healthier than before the stroke, then you can come again Tell me, am I qualified to stand here and discuss cooperation with you?”

Howard scoffed when he heard Helena’s words.

He asked angrily: "My... Rothschild... family... has the best... medical... medical team in the world... none of them... dare to say... such things... ..You...why...why?"

Helena smiled and said: "Your team can't cure your disease, but I can."

After saying that, Helena took out Charlie Wade from the handbag she carried with her. He took the blood-dispersing and heart-saving elixir and said to Howard: "This elixir comes from the ancient and mysterious East. As long as you take it, you can recover as before. In order to dispel your concerns, I can give it to you for free before we discuss the terms." Take one-tenth of it so that you can really feel its effect, and then we can talk about the price calmly."

## **The Amazing Son In Law Chapter 6493**

By / February 28, 2024

From the beginning to the end, I have never had the idea of getting closer to the Rothschild family, let alone marriage. I have no interest in being friends;"

"And the reason why I'm here today is entirely just to discuss this business with you, so you don't have to doubt my motives. Since I'm here in person, I'm not the only one who's responsible for this. Personal honor, as well as the reputation of the Nordic royal family, so I can't harm you."

After saying that, she took a water glass from Howard's bed and saw that there was still about a quarter of the water in it, so she used another cup of her own. Using a leaf-shaped brooch, scrape off about one-tenth of the blood-dispersing and heart-saving elixir and put it into a cup to melt it.

As soon as Howard saw her movements, he guessed that she was going to do something hard, and said nervously: "You... what are you going to... do! I... I'm warning you not to... don't mess around! I... If I have... any three... three longs and two shortcomings... the Rothschild family... the family will never forgive you!"

Helena chuckled and asked him: "Mr. Rothschild thinks that I harmed you, right? Is there any benefit for me? If you die, not a single cent of your trillions of assets will go into my pocket. I will also bear legal responsibility and infamy for your death. How can I, the majestic Queen of Northern Europe, let myself be reduced to this? To such a situation?"

Howard knew that what she said was reasonable, but looking at the movements of her hands, he still said with some fear: “Then...then you...then you get that...that pill...is it... What should I do...?”

Helena said calmly: “Of course I’ll let you drink it first. You stutter too much, and it’s really hard to communicate with you. Drink these medicines, and we’ll ease up on your stuttering. Communicate, this can also save you some energy, don’t you think?”

After saying that, Helena came to Howard’s bedside, saw his frightened face, and said: “I’m sorry, Mr. Rothschild, our Nordic royal family usually My acting style is very dignified. I am a little rude today just to save you time. Please be considerate.”

Howard was frightened and said in panic: “You...you don’t want to pass...don’t come over...”

As he said, I just want to reach out and ring the calling bell.

## **The Amazing Son In Law Chapter 6494**

By / February 28, 2024

The moment Howard’s chin was lifted, his esophagus opened instantly, and the little water flowed directly into his stomach along the esophagus, and he drank it all.

Howard’s eyes were filled with fear, and what he was thinking about was that it might be too late to say goodbye to this world.

The next second, when Howard felt a different kind of warmth rising in his stomach, he was even more frightened, thinking: “Helena, this poisonous woman! She must have fed me poison! The poison is about to take effect now, I... I’m dead... It’s a pity that I, Howard, have a great reputation, but I didn’t expect to be so useless when I died!”

Thinking of this, Howard blurted out angrily: “Helena! God will... definitely let you go to hell! Helena

noded and asked: “Why did God let me go to hell?”

Howard scolded: “You poisoned me! God...how could God forgive you!”

Helena smiled and said calmly: “Look Your stuttering situation is much better. Let’s feel it again. Have other symptoms improved?” When

Howard heard this, he was startled for a moment, then suddenly understood and blurted out: “Eh?! It’s really... really hard to speak now. Why are you stuttering...”

After saying that, he tried to move his body, and it was obvious that his control over his body was much improved than before!

He exclaimed in an instant: “This...isn’t this amazing?! Could it be...is it all the effect of that little pill?!”

Helena took out a piece of paper from the bedside and wiped the pinch of Howard just now He put his hand on his chin and sighed: “To deal with stubborn people like you, we really need to use some methods.”

After saying that, Helena said again: “I told you earlier, this pill can not only cure you The disease can make your body better than before. Do you believe it now?”

Howard said quickly: “I believe it... I believe it! Hai... oh no... Her Majesty the Queen, can you... again ...Give me some more elixirs? I think...I want to try a more...obvious effect!”

Helena shook her head and said: “Mr. Howard is in a high position and may rarely go to supermarkets. Although supermarkets and airports There is also a free trial service, but there is no category that you can eat to your heart’s content before considering whether to buy it or not, so I won’t be able to give you any more elixirs until the price is agreed upon, so please forgive me.”

Howard said without hesitation . He said: “Okay! If this... this pill... can completely cure me... I... I am willing to pay... 100 million US dollars!”

Helena was stunned, then looked at her watch, He smiled and said, “I’m sorry, Mr. Howard, I still have something to do. Let’s go ahead and recover slowly. Oh, by the way, if you have nothing to do, don’t let anyone contact me. I’m usually too busy and don’t want to waste time. Goodbye!”

## **The Amazing Son In Law Chapter 6495**

By \_ / February 28, 2024

Howard originally thought that \$100 million was already an astronomical figure, and the price he offered was completely enough to show his sincerity.

But how could he have imagined that after Helena heard the offer, she didn't even bother to negotiate the price and turned around to leave.

He had just felt the real effect of the medicine. One tenth of it had such an effect. Taking a whole pill would definitely make him recover as before, so how could he give up this golden opportunity.

So he quickly shouted: "Your Majesty the Queen... If there is anything we... we can discuss... But you turned around and left. Why... why?"

Helena said lightly: "Mr. Rothschild, I never like to talk about cooperation with people who don't understand clearly. In Mr. Howard's opinion, my health is only worth 100 million US dollars. So with all due respect, what else do I have to talk to you about? I, Helena, compare with you Although I don't have much money, in my opinion, my own health must be measured by more than this little money, right?"

Howard was speechless for a moment.

He did not expect that Helena would raise the issue of pricing to her net worth.

See what this means, if you have more money, it is reasonable to spend more money?

How can I talk about this when I am worth a trillion dollars? Should I just give her three to five hundred billion?

At this time, Helena thought of something and added: "Oh, by the way, I received a piece of news today that Che Wang's family is going to auction his private car to pay for Che Wang's treatment. It is said that Che Wang has been in coma for many years, and his family has suffered a lot. Hundreds of millions of euros have been paid for his treatment. Let me give you an inappropriate analogy. If it were Mr. Howard and you were comatose in bed, would your family only pay 100 million US dollars in medical expenses for you? Or, You just want them to pay you \$100 million?"

"This..." Howard's face burned.

At first, he did realize that the price he had just quoted was a bit stingy.

Secondly, he didn't expect Helena to speak so directly, which really didn't save him any face.

So, he could only say in a low voice: "Your Majesty the Queen... If you think the price... the price is too low... you can just make a price..."

Helena said lightly: "Mr. Rothschild, before I make the offer... Before talking about the price, I hope you can understand that the reason why I brought this elixir here is to save you from fire and water. Since it is to save you from fire and water, then you must refer to your worth when you are in fire and water. How much."

After saying that, Helena added: "You must be the only one who knows Mr. Rothschild's current situation best. The stroke not only affects your actions, your language, and your quality of life, but also affects your entire society in Rothschild. The role you play in the Child family, if you regain your health, you can postpone the decision to give up the position of head of the family to Steve today and continue to play the role of the patriarch. But if you lose your health, you will lose everything. ."

As soon as Howard heard this, he knew that if he wanted to get this pill today, he had to be prepared for heavy bleeding, and there was no chance of saving money.

So, he could only bite the bullet and said: "Your Majesty the Queen...I understand everything you said...so...so please just...please give me a clear price...just give me a clear price!" Helena

noded and said coldly: "One hundred billion U.S. dollars."

Howard's eyes widened: "How...how much?!"

Helena repeated again: "I said, one hundred billion U.S. dollars." ."

Howard blurted out: "This... this is outrageous... One hundred billion... One hundred billion US dollars can give the United States... build a most advanced aircraft carrier fleet for the United States, and... maintain its operation for at least two years. Need..."

Helena nodded and smiled: “Yes, one hundred billion dollars can not only build the most advanced aircraft carrier fleet, but also send humans to Mars and bring them back, and maybe even on the moon. Build a Disneyland.”

## **The Amazing Son In Law Chapter 6496**

By / February 28, 2024

At this point, Helena asked: “But what does Disney on the moon mean to you? One hundred billion dollars spent on these places can buy everything, but only I can’t buy your health back.”

After saying that, Helena added: “Actually, if Mr. Rothschild can give up himself for the family, he can save this money and let this money support the future of this family. Development will play a greater role. By that time, your descendants may build a monument for you to commemorate you.”

Howard felt a pain in his liver. He covered his abdomen and waved his hands and said, “Don’t... don’t say it... Since It’s a deal... you can make a price... then I... then I can bargain, then I’ll come up with a... price that can be achieved in one step.”

After that, he stretched out five fingers and said firmly : “Fifty billion U.S. dollars! No more! If it’s more, even if my body recovers, I will be mentally depressed. When I think about spending hundreds of billions of dollars like this, I’m afraid I won’t be happy in my later years... ..”

Spending hundreds or even hundreds of billions of dollars just to buy a pill, Howard was really in pain.

Some people are poor and generous even without money.

But some people become more stingy when they get rich.

Some people believe that health is something money can’t buy.

Some people think that when health is too expensive, they might as well just give it up.

This thought in Howard’s mind can be said to be half and half, half true and half false.

What's fake is that he is actually very eager to get back to health. After all, he lived a wise life and ended up like this after suffering a stroke. The gap is too big.

But really, he really cannot accept spending \$100 billion to buy health.

He couldn't die from a F\*cking stroke. Compared to staying in bed and jumping around, the latter would cost a hundred billion dollars more. At this time, he couldn't help but think that he could at least save a hundred billion dollars by staying in bed.

In fact, Helena didn't really want so much money from him.

According to Charlie Wade's psychological price, one or two billion US dollars is already very good. After all, our main purpose is not to make money, but to take advantage of Howard and his son Steve.

And now Charlie Wade has added a new demand, which is the AI model mastered by the Child family. Therefore, her psychological price today is actually 10 billion U.S. dollars. Plus a set of AI models, as long as it can reach. This condition is already considered a success.

However, she also knew that Charlie Wade just handed over the shopkeeper and handed these things to herself, but she could never communicate with Howard according to his bottom line, and she must try to win as many benefits as possible for Charlie Wade.

So, she looked at Howard and said calmly: "Mr. Rothschild, we don't speak secretly. What I want is not just cash, but also the AI model that your Rothschild family invested in;" "

So, my final offer is this, 50 billion US dollars in cash, plus a 100% replica of that model!" "

You want your team to go to Northern Europe to build an exact set of AI models for me, from hardware to the software is not allowed to be any different, and I ask you to do simultaneous updates and upgrades for me;" "

In other words, whatever version you upgrade to in Silicon Valley, my version in Northern Europe will be upgraded to this version at the same time. , the maximum delay shall not exceed one hour;" "

"Also, all knowledge bases in the AI model must be fully synchronized:"

"And, you must always maintain this system for me, and you must not stop maintenance for any reason in the next 20 years."

When Howard heard this, he immediately became anxious and blurted out: "That AI model... is now... has been spotted by the U.S. Department of Defense... and its commercial... commercial application prospects are... also very broad... in the future. The valuation space is no less than 100 billion U.S. dollars. After organic... organic integration with other industries, the added value may be... even more immeasurable... Your Majesty, you... are simply... idiotic dreams!"

## **The Amazing Son In Law Chapter 6497**

By / February 28, 2024

Seeing that Howard was a little angry, Helena was not angry, and just said lightly: "Mr. Rothschild, don't get angry in a hurry. I have an additional condition that I haven't finished yet." After a

pause, Helena continued: "I want your set of models for personal use and will not be used for any commercial purpose, which means it will not have any impact on your original market. I just want an exact copy for my own use. To you, it is nothing more than Send me a copy, give me a set of hardware, and give me twenty years of maintenance fees. The cost shouldn't be much, right?"

Howard asked coldly: "How can I be sure... you won't... won't For commercial use?"

Helena smiled and said: "This is the specific details I am going to talk about next. You will still pay me 100 billion US dollars, but I will sign a contract with you and agree on 50 billion US dollars. , will be returned to the Rothschild family at an amount of US\$2.5 billion per year in the next twenty years;"

"If you cut off the upgrade and maintenance to me, I will cut off the subsequent return of this money;"

"If I take your AI model for commercial use, you can immediately stop the upgrade and maintenance, and sue the Nordic royal family in court, demanding full repayment of US\$50 billion;" "

All our cooperation, as long as we reach an agreement, will be written in Contracts will be protected by law.”

Howard said angrily: “Oh, I will give you 100 billion U.S. dollars, and then you turn around and put it into a trust. Judging from the current median rate of return in the U.S. financial market, the annual interest It’s at least several billion dollars!”

”And once the compound interest is calculated, this is an astronomical figure. Aren’t you just borrowing chickens to lay eggs? Lend my chickens to lay eggs for twenty years, and then return the chickens to me. , where can I find the eggs that have been around for twenty years?”

Helena said generously: “How about this, you still give me 100 billion U.S. dollars, of which 50 billion U.S. dollars will generate interest every year, and I will get a penny of it. “Everything will be refunded to you;”

## **The Amazing Son In Law Chapter 6498**

By / February 28, 2024

Howard just got a 10 billion concession. , I felt a lot more comfortable. Now that I heard Helena explain her background, she quickly explained: “Everyone is discussing business... We... We make more money from NVIDIA... That can’t be related to this matter. ...confused...confused, Her Majesty the Queen, are you right?”

”Yes.” Helena nodded and said: “However, I will give you a hardware cost of 10 billion US dollars, which has something to do with NVIDIA. You will definitely still have to purchase the hardware for my AI model from NVIDIA. You are a shareholder of NVIDIA. If you go to NVIDIA for bulk purchase, this is to a certain extent equal to the left hand and the right hand;” “In the first place

, even if it is external The quoted cost is 10 billion, and you can’t actually spend that much money on the actual purchase;”

”Secondly, you are a shareholder of Nvidia, so you still have a share of the profit from this order;”

”Thirdly, this order will definitely be able to Promote NVIDIA’s sales volume and stock price to rise, and the stock price to rise. You can also make profits from it. The shares you hold through institutions can make profits on

the valuation. The circulating shares you hold in the secondary market can make direct profits. You can make money in any part of the American market. In the end, your actual cost may not even be 10% of 10 billion.”

At this point, Helena concluded: “I won’t go either. Let me tell you the exact cost. My final quotation now is 40 billion US dollars, plus a set of AI models with free upgrades and maintenance for twenty years. If you think it is okay, we can sign an agreement now.”

After saying that, Helena took out some printed contracts, handed them to Howard, and said: “The contract template has come out, just write in the specific amount of money, and then write in the terms of the agreed repayment of interest. Ross If Mr. Child is interested, we will proceed. If not, I will go back first.”

As soon as Howard heard this, he knew that Helena had done enough preparation and homework before coming.

The facts are indeed as she said. The Rothschild family itself controls Nvidia’s shares through multiple institutions and individuals, and holds a large number of circulating shares in the secondary market. They have already reaped huge profits from Nvidia, Helen. The 10 billion that Na gave up indeed left a lot of room for maneuver for the Rothschild family.

Although Howard didn’t care about the money, now that he was being taken advantage of, he naturally wanted to get a little less.

## **The Amazing Son In Law Chapter 6499**

By [\\_](#) / February 28, 2024

Now that both parties had reached a consensus, Helena took out her pen and perfected the details of the contract.

The whole process was recorded with a mobile phone. Coupled with Helena’s identity as the Queen of Northern Europe and the high traffic on the Internet, she was not worried at all that Howard would dare to go back on his word.

After the two parties determined the terms of the contract, Howard wrote his name on the contract, and then the two parties exchanged agreements and the contract became official.

After everything was settled, Helena put away the contract, turned off the video on her phone, and said: “Mr. Rothschild, happy cooperation!”

Howard quickly asked her: “Your Majesty the Queen... now... can you give me the elixir now? “

Of course.” Helena handed the elixir to him without hesitation and said, “Although our Nordic royal family doesn’t have much money, we always attach great importance to the spirit of contract.”

Howard stretched out his hand and tremblingly handed the elixir to him. He took it and was about to ask Helena how to take it. Helena spoke first and said, “Just take it.”

After hearing this, Howard no longer hesitated and took the elixir directly. In the mouth.

In an instant, the elixir in his mouth turned into a heat flow that was several times stronger than before, and quickly flowed into his abdomen.

Howard felt like a deflated balloon that was quickly filled with gas. He could only lie half-lying on the bedside, but he immediately felt that his body had regained strength, and this sense of strength was much greater than before.

With a little effort, Howard sat up from the bed, and he was extremely surprised to find that his body no longer twitched or shook.

He was so excited that he quickly tried to walk on the ground. As a result, the strength of his legs and the stability of his body exceeded his expectations.

He had not had a stroke, and his body was already relatively weak. Although he did not need a cane to walk, he was still stumbling. But now, he tried to take a few steps. It cannot be said that he walked quickly, but at least he was much more stable. When he stepped out with his legs The strength and support after landing have been greatly improved.

Recalling the feeling of being useless in bed after having a stroke, Howard wished he could have laughed up to the sky like “Hahahahahahahaha”!

After walking several times in the extremely spacious and oversized ward, Howard couldn't bear to stop. Instead, he became more and more excited as he walked.

Helena was dizzy as he was dangling in front of her eyes, so she said: "That's it, Mr. Rothschild, don't leave anymore, you haven't given me the money yet."

Howard was stunned for a moment, and then he turned around. Suddenly, he realized that he had not fulfilled his contract, so he smiled a little apologetically and said: "I'm sorry, Your Majesty, I'm really a little excited, please forgive me!"

After saying that, he immediately said: "Forty billion pills. The fee, 50 billion deposit, 90 billion US dollars, I will have someone pay it immediately, and the money will be directly transferred to the account on the contract, right?"

Helena nodded: "Yes, thanks Mr. Rothschild, please arrange it directly."

After saying that, Helena said with a smile: "Mr. Rothschild, have you noticed that you no longer stutter."

"Yes. Oh!" Howard held his right hand in front of him and shook his head a few times, exclaiming in wonder: "It's amazing, it's really amazing! This elixir is really amazing!"

After sighing with emotion, he didn't waste any time and directly picked up his phone and chatted with himself Contact the financial director and ask the other party to arrange transfer payment.

Ninety billion US dollars is an astronomical figure for any country or group, especially such a large amount of cash, which is simply unimaginable.

But to the Rothschild family, this amount of money is nothing, not even pocket money.

The financial strength of the Rothschild family has long been beyond the ability of outsiders to estimate.

Over the years, they have made explicit and implicit investments in countless fields. All offshore companies registered in the Cayman Islands and

Virgin Islands, as long as they have not been listed, do not need to disclose shareholder information. Among them, there are There is no way to verify the actual value of a large number of companies owned or even controlled by the Rothschild family.

## **The Amazing Son In Law Chapter 6500**

By / February 28, 2024

Even for listed companies, only the primary market will disclose shareholder information. The secondary market buys and holds through various channels, and it is impossible to count at all.

Moreover, the Rothschild family has investments in real estate, energy, mining, transportation, etc. all over the world. It can be said that no matter which industry comes to the fore, the Rothschild family can grab huge wealth from it.

During the colonial period, Britain was known as the Empire on which the sun never sets because they had their own colonies in almost every time zone. No matter where the sun shone, they had a piece of their territory.

The Rothschild family is an empire on which the sun never sets in the economic field. As long as they can make money in almost every field in the world, they have a presence, so no matter where the wind blows, there must be a place for them.

Just like the explosive development of AI, the Rothschild family has made a profit of at least US\$300 billion from NVIDIA's shareholding alone, which does not include the value generated by their investment in the AI industry.

For such a powerful financial empire, if their funds were truly audited, they would probably be worth more than 10 trillion US dollars.

Therefore, Howard secretly transferred 90 billion US dollars in cash to the bank account of the Nordic royal family in Switzerland with just a phone call and some instructions.

Helena finally breathed a sigh of relief after receiving the notification that the funds had arrived.

Then he remembered charlie Wade's instructions and said to Howard: "To be honest, Mr. Rothschild, if this kind of elixir were placed at auction, it

would be impossible to sell it at such a low price. The reason why I brought it I came to sell it to you. On the one hand, I am very interested in your AI, and on the other hand, it is also based on the filial piety of your son Steve.”

Beating him violently first and then giving him a candy is Charlie Wade’s specialty, and Steve is no exception. He wants Steve to feel the pain from the inside out, and at the same time, he can clearly feel the sweetness in his mouth. Taste, so he told Helena not to forget to leave some credit for Steve.

”Oh?” Howard asked curiously: “Steve knows that Her Majesty the Queen has this magical medicine?”

Helena shook her head: “That’s not true, but he did appear to be in great pain after hearing that you had a stroke. It can also be seen that he really cares about you.”

After a pause, Helena added: “I think everyone who is filial to their parents deserves respect. It was also his filial piety that moved me, so I thought I brought the elixir to New York to visit you, and see if we can make a deal, which can be regarded as saving half of your life.”

Howard was surprised. He didn’t expect that his eldest son would care so much about his body. It was indeed a bit... More than he expected.

After all, when my father was critically ill, I was very excited and excited. Even now, I still remember it fresh.

Therefore, this made him think that Steve’s affection for his father might be greater than his attraction to the heir.

This really made him feel gratified, and it also made his affection for Steve grow a lot.

Helena saw that he seemed to be deep in thought, so she said abruptly: “Mr. Rothschild, it is indeed very gratifying for you to have such a filial son. I believe that after he officially succeeds to the throne today, he will definitely take care of Rothschild.” The Childe family is doing well. After all, the highest level of business is to serve people with virtue.”

When Howard heard this, he couldn’t help but trembled even though he had already completely recovered from the stroke.

It was indeed gratifying that his son was filial, but when he thought about the family meeting that was scheduled to be held at ten o'clock in the morning, he couldn't help but become nervous, thinking: "I am gratified and touched, but since my body has fully recovered, what about the handover to the patriarch?" The positioning matter must be put on hold for the time being! I didn't want to pass the position to Steve so early. The previous decision to pass the position was a helpless move after a stroke. Now that my body has recovered, there is no possibility of passing the position!"

thought of it ! At this point, he couldn't help but think to himself: "Although this would be unfair to Steve, I believe that since my son is so filial to me and regards my body as more important than his succession, he will definitely not take this seriously." How much does he have an opinion?"

"Besides, even if he has an opinion, I can compensate him. Haven't I never fully finalized the identity of the heir before? This time, I might as well take advantage of the ten o'clock family meeting to discuss it directly. Give him death! Let him at least have some reassurance!"

Seeing that Howard kept his head down silently and thinking, Helena knew that he would definitely not pass on the title of head of the family to Steve as planned.
