

The amazing son in law - The Amazing Son In Law

Chapter 7099

In the last hour before dawn, Abbas led the last group of people to leave the food factory. Charlie Wade asked him to lock the gate from the outside. Only he and Li Yalin were left in the huge food factory.

Li Yalin looked at the site that had been restored to its original state and couldn't help but sigh: "Mr. Wade, the efficiency and execution of these cavalry guards and death soldiers are too strong. Even if I were to come and see this scene, I wouldn't be able to tell that more than 10,000 people had stayed there for a short time before."

Charlie Wade nodded and sighed: "Their efficiency and execution were honed by hundreds of years of slavery from generation to generation."

After that, Charlie Wade let out a long breath and said: "Let's not talk about this. Inspector Li has been busy for several days. Take a break. I'll keep an eye on it and see if the factory director will come today."

Li Yalin had been working non-stop for several days, with little rest. Now that everyone had evacuated, he felt relieved and felt that his body was indeed exhausted. He said to Charlie Wade, "Thank you for your hard work, Mr. Wade. I'll take a nap."

Charlie Wade said, "It's okay. You can sleep without worry. I'll take care of everything here."

Then, Charlie Wade asked Li Yalin to go to the factory director's office, and he walked out of the factory and sat on the ground under the shed outside the warehouse that was used to protect trucks from rain. He continued to operate the hand seals and absorb spiritual energy, while also releasing some spiritual energy to sense the surroundings at all times.

In the past few days, Charlie Wade has been operating the hand seals whenever he has free time, and the spiritual energy accumulated in his body has become more and more full. He plans to inject all the spiritual energy into the ring that Lin Wan'er (Alani) (Alani) gave him when the spiritual energy in his body has accumulated to a limit, to see if there can be any new discoveries.

Soon, the sky gradually brightened.

Li Yalin was sleeping soundly, and time passed quickly while Charlie Wade was meditating.

Almost in the blink of an eye, it was noon.

At this time, Charlie Wade noticed the movement in the distance. The car of the director of the food factory came again.

He smiled and walked back to the factory and came to the director's office.

Li Yalin had just woken up at this time. He had slept for seven or eight hours. He was refreshed. As soon as he opened the door, he saw Charlie Wade coming over, so he immediately asked him: "Mr. Wade, what's the situation?"

charlie Wade smiled and said, "The director is here."

Li Yalin raised his eyebrows and said with a smile, "It seems that he is really anxious."

charlie Wade said, "Let's go, Inspector Li. He will see that the gate is locked from the outside and may climb in to see what's going on."

"Okay." Li Yalin responded with a smile, and left the factory with charlie Wade and climbed out directly from the low back wall.

At the same time, the director also parked his car outside the gate. He got out of the car and saw that the gate was locked from the outside, and he couldn't help but feel confused.

In his opinion, even if the factory has not started upgrading and renovation yet, Li Yalin should not close the factory and leave at noon. Moreover, he saw that although he had not started construction last time, he still had several subordinates here. Even if he had something to do, he should at least leave one person.

After hesitating for a moment, he took out his mobile phone and called Li Yalin to talk about Li Yalin's tone. After all, the last time they met, he used his keen sense of smell and his eyes to judge that Li Yalin must have encountered problems with funds. Li Yalin said that he could solve the problem of funds in three to five days, but now not only did he not start the work, but he also left. This gave people a feeling that something was wrong.

The phone number that Li Yalin left for him was turned off. He called at the door for a long time but couldn't get through. He felt more and more strange.

So he shouted outside the door: "Is anyone there? Mr. Li, are you there?" After

shouting a few times and no one answered, he slapped the door lock on the fence door hard, banging it several times, but there was still no movement inside.

The factory director couldn't help but smile, and felt that something good was going to happen.

Chapter 7100

So he immediately climbed up the iron gate, climbed over it clumsily, and jumped down after struggling for a while. He didn't care about the dirt on his body, and he immediately ran into the factory.

At this time, he was still worried that Li Yalin or his men would suddenly appear, so he kept shouting, "Mr. Li, are you okay? I came in to see you. If you are here, please don't misunderstand me!"

While shouting, he entered the factory.

In the factory, the equipment had been dismantled, and it seemed that the dismantling work was stopped halfway. No one was seen, and there was nothing else unusual at the scene.

He looked around and couldn't help but wonder: "Where did that guy go? Did he temporarily stop working, or did he just run away?"

charlie Wade and Li Yalin had just seen him climb over the door and go in. charlie Wade asked Li Yalin: "Inspector Li, what do you think he will do next?"

Li Yalin said: "Since he can't contact me, he will definitely come here every day. When he finds out that I may not come back one day, he may think about taking over this business again."

charlie Wade nodded and said, "In that case, it seems that the time is not very controllable. It may be better to give him a call directly and say that you have an emergency in China and need to go back. It may take a month or two, but let him rest assured that you will be back before the two-month deadline."

After that, charlie Wade said, "You should deal with the tone. Let him feel that you may be in big trouble and may not be able to come back in two months."

"Okay." Li Yalin said, "Try to get him to resume production tomorrow."

After that, he immediately turned on the phone and called the factory director back.

The factory director was in the factory at that time, dreaming that Li Yalin had disappeared. Suddenly, he received a call from Li Yalin. His heart sank instantly. He looked around nervously, fearing that Li Yalin would suddenly appear from somewhere.

Seeing that there was indeed no one around, he picked up the phone and said with a smile: "Hey, Boss Li, why was your phone turned off when I called you just now?"

Li Yalin said: "I have some urgent business to go back to China. There is no direct flight from Casablanca, and I have to transfer in Cairo. I just got off the plane now. What do you want to talk to me about?"

The factory manager was a little disappointed, but he could tell that Li Yalin's tone was a little anxious, and he seemed a little absent-minded, so he quickly asked him: "Mr. Li, why did you go back before the factory started construction? When will your partner's funds come in?"

Li Yalin said irritably: "Hey, why are you in such a hurry? Our contract clearly states it in black and white. I just need to pay your balance within two months. As for when the factory will be upgraded, you don't need to worry about it."

The factory manager quickly explained: “You misunderstood Mr. Li. I’m not urging you. You gave me the final payment, not because I was worried that you wouldn’t pay me, but because I was thinking about you. Those workers took your money to go on vacation. If you can’t start the work in two months, they will have nowhere to work and will definitely not wait for you. You can’t continue to pay them wages to support them, right? When you finish the renovation and start the work in a while, there will be no skilled workers to find, and it will take time to recruit people and run-in, don’t you think?”

Li Yalin responded: “Okay, I get it, you don’t have to worry about my business. I may not be able to come back for a month this time, and I will accept the losses by then, but don’t worry, I will definitely pay you the final payment before the contract expires.”

After that, Li Yalin didn’t wait for him to reply, and said directly: “Okay, I have something else, I won’t talk to you for now.”

After saying this, Li Yalin hung up the phone.

The factory manager’s brain was working rapidly at this moment. He muttered, “He may not come back for a month. Could this guy be in some big trouble? He left, but he didn’t come to me to cancel the contract and ask for the \$100,000 back. It seems that he still has some hope. But judging from his tone, he must be in big trouble. And he may not come back for a month. I think this guy must not be able to pay the balance. At most, he will come back to me to ask for the \$100,000.”

After saying that, he looked at the equipment around him and said excitedly, “Who cares? The factory is idle and the workers’ wages have been paid. Just call them back to work! If Mr. Li can’t get the money back after two months and comes to me for a refund, I will outlast him. If I can outlast him, I won’t give him the 100,000 US dollars. If I really can’t outlast him, or if he insists on suing me, then I will wait until the court rules that I lose before returning the 100,000 US dollars to him! Even if I return him 100,000, I will still get 100,000 for nothing! The key is that I will start working directly now. He has even paid the workers’ wages for me. Isn’t it just a waste of money in the past one or two months? Maybe I can earn another 100,000 US dollars! This time I’m really lucky!”

Thinking of this, he immediately ran out excitedly, and once again climbed over the wall clumsily. After getting into the car, he did not leave, but directly knocked open the door locked with a chain lock, and then immediately called his foreman and said, “Tell everyone to end their vacation and return to work immediately!”

The foreman asked in surprise, “Boss, didn’t you give us paid leave?”

“Take your mother’s salary!” the factory manager angrily scolded, “Why do you take the money and not work? Do you really think there is such a good thing? Hurry up and get to work, otherwise you must return every penny of the advance you paid to me!”
