

# The Amazing son in law Chapter 7874

Seeing Wu Bolin (Bick)'s shocked expression, Kikuchi Kohei truthfully replied, "Reporting to you, it is indeed that far. Moreover, the area is not just a flat ice sheet; there are also numerous icebergs and hills. Our travel speed will be greatly reduced by taking a detour. Even if the snowmobile travels non-stop, the entire process will take at least eight days."

"Eight days..."

Wu Bolin (Bick) couldn't help but question, "Isn't the straight-line distance only a little over 1,300 kilometers? Why not just fly there?"

Kohei Kikuchi quickly explained to him, "Reporting to you, Master, about 1,000 kilometers of this 1,300-kilometer distance is at sea. This means that there is nowhere for the helicopter to stop and refuel along the way. Even with auxiliary fuel tanks, it simply cannot fly that far."

Wu Bolin (Bick) asked him, "So, you mean there's no other way but to take a detour?"

Kohei Kikuchi thought for a moment and said, "There's no other good way."

Wu Bolin (Bick) then asked, "What about the boat? What if we set sail? We can land the helicopter on the boat, sail the boat to waters closer to them, and then transfer the helicopter there!"

Kohei Kikuchi shook his head: "Didn't Masato not want the Japanese people to know the specifics of the ship? If the ship moves, they'll know we're lying, which is tantamount to treason, and they might even send troops to quell the rebellion."

Wu Bolin (Bick) said, "Can't I just turn off the entire positioning system? How can they detect that the ship is moving if the positioning system is turned off?"

Kohei Kikuchi pointed to the sky and said, "Spy satellites and commercial camera satellites pass over us every day. They have relatively fixed orbits and take pictures of the ground. The system automatically compares these pictures with previous ones, making it easy to detect which objects have moved."

Wu Bolin (Bick) cursed, "Do you think I'm stupid? Isn't it polar night now? What can a satellite possibly capture?"

Kohei Kikuchi said aggrievedly, "Although it's polar night, there are auroras, so the visibility isn't too bad. Moreover, the satellite's resolution and light sensitivity are much higher than the human eye. What the human eye can't see, the camera can still see. And most importantly, our research vessel is very large, so even at night, it can be seen from the satellite. Small objects like vehicles and helicopters are relatively safe."

Wu Bolin (Bick) was so angry he jumped up and down.

This is f\*cking too tricky!

Even if he was arrogant, he wouldn't dare to confront a sovereign nation. If Japan discovered that these research team members seemed to have betrayed the country and actually sent troops, even if he could escape, his search for the Gate of Ascension would be put on hold, and the Japanese might also discover the psychological manipulation he had used on those research team members.

In this case, the only way to reach the research station in the United States would probably be by land.

Eight days to go, eight days to return, that's sixteen days.

Wu Bolin (Bick) was on the verge of tears.

However, he also knew very well that with the current capabilities of the Japanese research team, it was simply a pipe dream to complete the exploration of the entire Antarctic this winter. If they could take down the American McMurdo Station, which had a large number of people, supplies and equipment, it would be a completely different story, and the entire search speed would increase by at least three or four times.

Thinking about it this way, the sixteen-day delay on the road isn't such a big problem; it's just a necessary investment.

Having figured this out, he immediately said to Kohei Kikuchi, "Prepare as quickly as possible; we're about to set off to that American research station to expand our territory!"

Kikuchi Kohei respectfully replied, "Yes, Master, I obey!"

...

When charlie wade returned to the Nordic research station, Li Yalin had already completed the deep processing of the captured audio using AI.

The AI algorithm gradually stripped away all the natural and equipment noise, clearly restoring the conversation between Wu Bolin (Bick) and Kohei Kikuchi.

Realizing that Wu Bolin (Bick) was about to make a major move, he immediately sent the processed audio and video to charlie wade.

## The Amazing son in law Chapter 7875

charlie wade, Lin Wan'er (Alani), Yun Rugo, and Song Ruyu watched the video together, and all four of them looked somewhat shocked.

charlie wade murmured, "This elder of the Broken Qing Society is taking a gamble. If he takes over the more than two hundred people at the McMurdo Station in the United States, even if he is not discovered by the relevant authorities of the United States and Japan for the time being, their large-scale search will inevitably cause a huge fuel shortage and equipment wear and tear. When summer comes and more scientific expedition members and tourists arrive, this secret will be impossible to keep!"

"At that time, the relevant authorities in both countries will be surprised. For example, why did thousands of tons of fuel disappear for no reason in one winter? Why did the odometers of those vehicles increase by an astronomical number? Even if they can adjust the odometers, the wear and tear on the tracks, tires, engines, gearboxes, drive shafts, and other worn parts cannot be hidden. Frequent use of the vehicles will also deplete their spare parts reserves quickly. All of these will make the relevant authorities in their respective countries discover the anomalies, and then a large-scale investigation will inevitably be launched."

Lin Wan'er (Alani) agreed, saying, "Young Master is right. Spiritual energy can erase the traces of memories, but it cannot erase the traces of natural physics. This elder should be well aware of this himself. Therefore, in my guess, he intends to gamble everything this winter. Whether he succeeds or not, he probably will never set foot here again."

Song Ruyu said with some concern, "Their large-scale operation at this time of year will inevitably lead to a shortage of supplies. Even if the McMurdo Station in the United States has a large reserve of supplies, it will definitely not be able to withstand such frequent searches. So they will definitely target other research stations in the near future. Will they come after us?"

"It's not impossible." charlie wade said solemnly, "The current situation is too passive. We can't rashly go out to communicate with that mysterious thing using the aurora. Staying here also carries certain risks. Even if we wanted to leave Antarctica now, it would be a pipe dream. If they really continue this large-scale search, it wouldn't be surprising if they found us. We can only pray that we are not discovered by this elder..."

At this point, charlie wade said with some frustration, "If I had known we would run into him here, I would have tried to bring a few close-in weapon systems with me. If we had known his facial features and physical characteristics, we could have used the close-in weapon systems in conjunction with radar and AI algorithms to lock onto him and ambush him somewhere in Antarctica. Maybe we could have kept him here forever!"

Song Ruyu asked excitedly, "Mr. Ye, can the close-in weapon system still be sent in now?"

charlie wade shook his head: "It's definitely hopeless now. By the time we can get them in, it will be too late."

“Alright.” Song Ruyu said somewhat reluctantly, “If we could kill one of the elders of the Broken Qing Society, it would definitely be a huge blow to Wu Feiyan.”

charlie wade nodded in agreement and smiled, “Unfortunately, we can’t seize this opportunity.”

Lin Wan’er (Alani) was silent for a moment, then said to charlie wade, “Young Master, I have an idea.”

charlie wade smiled and said, “Miss Lin, please speak.”

Lin Wan’er (Alani) said, “If we can send a message to the Japanese Ministry of Education, Culture, Sports, Science and Technology, letting them know that the Japanese scientific expedition team is carrying out some kind of secret operation behind the Ministry’s back, the Ministry will definitely assume that they have betrayed the country and will take it very seriously.”

“But they are too far away to help, as their only icebreaker is stuck here, so they will definitely ask the military for help.”

“Given the cooperative relationship between Japan and the United States, they will most likely inform the United States about this situation and even request assistance from the U.S. military.”

“Once the US and Japanese troops land in Antarctica, not only will they destroy the foundation he has painstakingly built at the Japanese research station, but they will also eliminate his idea of controlling the American research station. At that time, if the two countries launch military operations at the same time, he will probably be like a stray dog, losing his foothold in Antarctica.”

charlie wade nodded with some surprise and said, “Miss Lin’s idea is very good, but I have only one concern.”

Lin Wan’er (Alani) said, “Please speak, young master.”

charlie wade sighed, “What I’m worried about is that if this elder becomes a stray dog, he will definitely have to find a new place to live in the vast Antarctic. If he finds his way here or passes through here, it will be really awkward.”

Lin Wan’er (Alani) nodded and said, “There is indeed a risk, but I don’t think it’s that big. We are only two or three hundred kilometers away from the Japanese research station. If he wants to avoid the search by the Japanese and American military, he will definitely run further away and most likely won’t choose this place.”

“That’s true.”

charlie wade thought Lin Wan'er (Alani) was really bold and meticulous. Her method was very good. If they followed her plan, this elder who originally wanted to expand his territory might lose his base camp due to trouble at home.

The question now is how to get the Japanese Ministry of Education, Culture, Sports, Science and Technology to discover the problem "naturally"!
