The Amazing son in law Chapter 8055

Lin Wan'er (Alani) already knew this, and her invitation showed that she genuinely wanted everyone to have a meal together.

charlie wade naturally didn't want to spoil her fun, so he smiled and said, "No problem, I'm fine with anything, it just depends on what you'd like to eat."

Yun Rugo and Song Ruyu also chimed in.

Yun Rugo smiled and sighed, "I've known Mr. wade and Miss Lin for so long, but we've never had a meal together. I've been thinking about this for a while now."

Song Ruyu also smiled and said, "I'm quite good at cooking, but this Nordic research station doesn't have the right cooking utensils or ingredients for Chinese cuisine. If all else fails, we can try to make a hot pot."

Lin Wan'er (Alani) said happily, "That's what I was thinking too. It's freezing outside, it's polar night, and there's the aurora borealis outside the window. It would be perfect to have a hot pot by the window."

Yun Rugo smiled and said, "Then let's see what ingredients are suitable for hot pot. We have enough ingredients here, but we didn't bring any with us, so we don't have any hot pot base or dipping sauces."

Lin Wan'er (Alani) smiled happily and said, "I'm different from you. You can all do without..." "As a cultivator who needs to eat, I get hungry easily if I don't eat a meal, so I always bring food and drinks when I go out. That's why I have some hot pot base, dipping sauce, and broth in my luggage."

charlie wade laughed, "That's great! Wan'er, go get the base and dipping sauce. I'll go to the research station's kitchen to see what ingredients we have."

Yun Rugo said first, "Mr. wade, you don't need to go to the kitchen. Ruyu and I will go."

Song Ruyu also quickly nodded in agreement, "Yes, Mr. wade, leave the selection and preparation of ingredients to Rugo and me. You can help Miss Lin later."

Lin Wan'er (Alani) suddenly felt a little annoyed, "Oh dear, I didn't bring a portable induction cooker. I only have a small stove for brewing tea. The heat is a bit weak for hot pot. I doubt the Nordic research station has that kind of thing. If we want to eat hot pot, we'll probably have to go to the kitchen. We can't eat by the window then."

"It's alright," charlie wade said with a smile. "All you need is to boil water, and a little spiritual energy will suffice. You can eat here by the window, or even outside in the freezing cold if you want."

Lin Wan'er (Alani)'s eyes lit up, and she exclaimed with delight, "I almost forgot that your cultivation can also be converted into heat! If that's true, I'd really like to try eating hot pot on the Antarctic ice sheet where temperatures are tens of degrees below zero. Does what you said earlier count?"

charlie wade nodded with a smile, "Of course it counts. There are only four of us within a hundred kilometers, so there's nothing to worry about eating outside. Here's what we'll do: once the ingredients are ready, we'll take them all out. I can protect the vegetables and other ingredients with my spiritual energy so they won't freeze."

Lin Wan'er (Alani) agreed with a smile and happily returned to her room.

Yun Rugo and Song Ruyu also went to the kitchen at the back of the research station. The Nordic research station was quite large for four people. The kitchen was over a hundred meters away, and they had to pass through the station's work area, fitness area, and dining area before reaching the kitchen.

charlie wade remained alone in the hall, gazing at the vast ice plains and the ever-changing aurora borealis outside the window. He suddenly recalled the mysterious entity that had guided him under the aurora.

It had not only taught him the Great Sun Tathagata hand seals but had even led him to that mysterious and vast underground city.

charlie wade thought to himself, since it knew about that underground city, it must be related to those advanced cultivators.

Perhaps it was even something they had left behind.

But what exactly was it?

Or rather, where was it hidden?
