The Amazing son in law Chapter 8063

Of course, Rachel's statement only meant she was making a commitment; it didn't guarantee Wu Yongzhen's complete peace of mind, but it did at least achieve about 50% of her goal.

In fact, although young, Rachel's social experience and interpersonal skills far surpassed those of the average adult, even those of seasoned businesspeople.

As a scholar, she received rigorous training from a young age in two areas: skills for integrating into society, such as academic performance and certain artistic talents; and acting skills.

She had to develop exceptionally strong and completely seamless acting abilities from childhood to continuously approach her target during the infiltration process. Therefore, her acting skills and accompanying mental fortitude were even superior to Wu Yongzhen's.

Before attending the banquet, she had thoroughly considered the entire situation.

She knew that Wu Yongzhen needed her most now; before Charlie Wade closed in on him, she only needed to reassure him as much as possible.

As for whether she would ultimately marry Robert Rothschild, that didn't depend on the Rothschild family's decision, but on herself, or rather, on Charlie Wade.

If Charlie Wade could handle Wu Yongzhen, she and her family would definitely gain their freedom. Then, she wouldn't need to pretend with Robert anymore.

Of course, unless Charlie Wade, like the Destroy the Qing Society, also needed her to infiltrate the Rothschild family.

But now, that possibility is extremely slim, because Charlie Wade's control over the Rothschild family is unprecedented. He can directly command the Rothschild heirs. A collateral family like Robert's is nothing in his eyes; he has absolutely no need to plant spies within Robert's family.

To put it bluntly, even if Robert's family installed surveillance cameras all over their house and secretly gave the accounts to Charlie Wade, he probably wouldn't bother to even glance at them.

Therefore, unless Charlie Wade forces her to marry, she definitely won't actually marry Robert.

After all, marrying Robert would only elevate her family's status within the Destroy the Qing Society, but that might not necessarily be a good thing. Sometimes, it's the quiet, scholarly families that survive longer; those radical scholars often suffer the most ruin and death.

Her current display of loyalty to Wu Yongzhen was merely a ploy to deceive him and keep him in check. Once Charlie Wade decided to act, she wouldn't need to continue her act in front of Wu Yongzhen.

At this moment, Wu Yongzhen was unaware that the young girl before him had already calculated his intentions. He smiled and said to Rachel, "Oh dear, your loyalty to me truly moves me. Rest assured, from this day forward, your family will enjoy unprecedented freedom within the territory of the Left Army Commander's Mansion. As long as you complete your mission well, the other scholars in your family can suspend all their infiltration work and enjoy life to the fullest!"

Rachel's mother asked excitedly, "Grand Commander, is what you're saying... true?"

Wu Yongzhen nodded and smiled, "Of course it's true. However, Rachel, you now have a very good opportunity within the Rothschild family. From now on, I'll need you to work hard to maintain contact with the Rothschild family members and provide me with more opportunities..." "You'll need insider information that others can't get, and you must maintain strict secrecy. If you can do that, I'll grant your family the greatest freedom."

Rachel immediately stood up, then knelt on one knee, clasped her hands in a fist salute, and looked at Wu Yongzhen respectfully, saying, "Rest assured, Grand Commander, I will do my utmost."

Wu Yongzhen nodded with great satisfaction, waved his hand, and said readily, "Good! Since you have this attitude, then I declare that from now on, all the other scholars in your family can live the life they want! If they are still studying, they can choose to drop out; if they are still dating someone they don't like, they can break up now; if they are receiving professional training they don't like, they can stop now."
